Essex Property Trust, Inc.:

Large accelerated filer  Accelerated filer  Non-accelerated filer  (Do not check if a smaller reporting company) Smaller reporting company

Essex Portfolio, L.P.:

Large accelerated filer  Accelerated filer  Non-accelerated filer  (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Essex Property Trust, Inc. Yes  No

Essex Portfolio, L.P. Yes  No

As of June 30, 2015, the aggregate market value of the voting stock held by non-affiliates of Essex Property Trust, Inc. was \$13,717,739,025. The aggregate market value was computed with reference to the closing price on the New York Stock Exchange on such date. Shares of common stock held by executive officers, directors and holders of more than ten percent of the outstanding common stock have been excluded from this calculation because such persons may be deemed to be affiliates. This exclusion does not reflect a determination that such persons are affiliates for any other purposes. There is no public trading market for the common units of Essex Portfolio, L.P. As a result, the aggregate market value of the common units held by non-affiliates of Essex Portfolio, L.P., cannot be determined.

As of February 22, 2016, 65,411,581 shares of common stock (\$.0001 par value) of Essex Property Trust, Inc. were outstanding.

**DOCUMENTS INCORPORATED BY REFERENCE:**

The following document is incorporated by reference in Part III of the Annual Report on Form 10-K: Proxy statement for the annual meeting of stockholders of Essex Property Trust, Inc. to be filed within 120 days of December 31, 2015.

## EXPLANATORY NOTE

This report combines the annual reports on Form 10-K for the year ended December 31, 2015 of Essex Property Trust, Inc. and Essex Portfolio, L.P. Unless stated otherwise or the context otherwise requires, references to “ESS” mean Essex Property Trust, Inc., a Maryland corporation that operates as a self-administered and self-managed real estate investment trust (“REIT”), and references to “EPLP” mean Essex Portfolio, L.P. (the “Operating Partnership”). Unless stated otherwise or the context otherwise requires, references to the “Company,” “Essex,” “we,” “us” or “our” mean collectively ESS, EPLP and those entities/subsidiaries owned or controlled by ESS and/or EPLP. References to the “Operating Partnership” mean collectively EPLP and those entities/subsidiaries owned or controlled by EPLP.

ESS is the general partner of, and as of December 31, 2015 owned an approximate 96.7% ownership interest in EPLP. The remaining 3.3% interest is owned by limited partners. As the sole general partner of EPLP, ESS has exclusive control of EPLP's day-to-day management.

The Company is structured as an umbrella partnership REIT (“UPREIT”) and ESS contributes all net proceeds from its various equity offerings to the Operating Partnership. In return for those contributions, ESS receives a number of OP Units (see definition below) in the Operating Partnership equal to the number of shares of common stock it has issued in the equity offering. Contributions of properties to the Company can be structured as tax-deferred transactions through the issuance of OP Units in the Operating Partnership, which is one of the reasons why the Company is structured in the manner shown above. Based on the terms of EPLP's partnership agreement, OP Units can be exchanged for ESS common stock on a one-for-one basis. The Company maintains a one-for-one relationship between the OP Units of the Operating Partnership issued to ESS and shares of common stock.

The Company believes that combining the reports on Form 10-K of ESS and EPLP into this single report provides the following benefits:

- enhances investors' understanding of the Company and the Operating Partnership by enabling investors to view the business as a whole in the same manner as management views and operates the business;
- eliminates duplicative disclosure and provides a more streamlined and readable presentation since a substantial portion of the disclosure applies to both the Company and the Operating Partnership; and
- creates time and cost efficiencies through the preparation of one combined report instead of two separate reports.

Management operates the Company and the Operating Partnership as one business. The management of ESS consists of the same members as the management of EPLP.

All of the Company's property ownership, development and related business operations are conducted through the Operating Partnership and ESS has no material assets, other than its investment in EPLP. ESS's primary function is acting as the general partner of EPLP. As general partner with control of the Operating Partnership, the Company consolidates the Operating Partnership for financial reporting purposes. Therefore, the assets and liabilities of the Company and the Operating Partnership are the same on their respective financial statements. ESS also issues equity from time to time and guarantees certain debt of EPLP, as disclosed in this report. The Operating Partnership holds substantially all of the assets of the Company, including the Company's ownership interests in its joint ventures. The Operating Partnership conducts the operations of the business and is structured as a partnership with no publicly traded equity. Except for the net proceeds from equity offerings by the Company, which are contributed to the capital of the Operating Partnership in exchange for additional limited partnership interests in the Operating Partnership (“OP Units”) (on a one-for-one share of common stock per OP Unit basis), the Operating Partnership generates all remaining capital required by the Company's business. These sources include the Operating Partnership's working capital, net cash provided by operating activities, borrowings under its revolving credit facility, the issuance of secured and unsecured debt and equity securities and proceeds received from disposition of certain properties and joint ventures.

The Company believes it is important to understand the few differences between ESS and EPLP in the context of how ESS and EPLP operate as a consolidated company. Shareholders' equity, partners' capital and noncontrolling interests are the main areas of difference between the consolidated financial statements of the Company and those of the Operating Partnership. The limited partners of the Operating Partnership are accounted for as partners' capital in the Operating Partnership's consolidated financial statements and as noncontrolling interests in the Company's consolidated financial statements. The noncontrolling interests in the Operating Partnership's consolidated financial statements include the interests of unaffiliated partners in various consolidated partnerships and development joint venture partners. The noncontrolling interests in the Company's consolidated financial statements include (i) the same noncontrolling interests as presented in the Operating Partnership's consolidated financial statements and (ii) limited partner OP Unit holders of the Operating Partnership. The differences between

iii

---

stockholders' equity and partners' capital result from differences in the equity issued at the Company and Operating Partnership levels.

To help investors understand the significant differences between the Company and the Operating Partnership, this report provides separate consolidated financial statements for the Company and the Operating Partnership; a single set of consolidated notes to such financial statements that includes separate discussions of shareholders' equity or partners' capital, earnings per share/unit; as applicable; and a combined Management's Discussion and Analysis of Financial Condition and Results of Operations.

This report also includes separate Part II, Item 9A. Controls and Procedures sections and separate Exhibits 31 and 32 certifications for each of the Company and the Operating Partnership in order to establish that the requisite certifications have been made and that the Company and the Operating Partnership are compliant with Rule 13a-15 or Rule 15d-15 of the Securities Exchange Act of 1934 and 18 U.S.C. §1350.

In order to highlight the differences between the Company and the Operating Partnership, the separate sections in this report for the Company and the Operating Partnership specifically refer to the Company and the Operating Partnership. In the sections that combine disclosure of the Company and the Operating Partnership, this report refers to actions or holdings as being actions or holdings of the Company. Although the Operating Partnership is generally the entity that directly or indirectly enters into contracts and joint ventures and holds assets and debt, reference to the Company is appropriate because the Company is one business and the Company operates that business through the Operating Partnership. The separate discussions of the Company and the Operating Partnership in this report should be read in conjunction with each other to understand the results of the Company on a consolidated basis and how management operates the Company.

### PART I

#### Forward Looking Statements

This Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements are described in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, in the section, “Forward Looking Statements.” Actual results could differ materially from those set forth in each forward-looking statement. Certain factors that might cause such a difference are discussed in this report, including in Item 1A, Risk Factors of this Form 10-K.

#### Item 1. Business

##### OVERVIEW

Essex Property Trust, Inc. (“Essex”, “ESS”, or the “Company”) a Maryland corporation, is an S&P 500 company that operates as a self-administered and self-managed real estate investment trust (“REIT”). The Company owns all of its interest in its real estate and other investments directly or indirectly through Essex Portfolio, L.P. (the “Operating Partnership” or “EPLP”). The Company is the sole general partner of the Operating Partnership and as of December 31, 2015 owns a 96.7% general partnership interest. In this report, the terms “Essex” or the “Company” also refer to Essex Property Trust, Inc., its Operating Partnership and those entities owned or controlled by the Operating Partnership.

The Company has elected to be treated as a REIT for federal income tax purposes, commencing with the year ended December 31, 1994 as the Company completed an initial public offering on June 13, 1994. In order to maintain compliance with REIT tax rules, the Company utilizes taxable REIT subsidiaries for various revenue generating or investment activities. All taxable REIT subsidiaries are consolidated by the Company.

The Company is engaged primarily in the ownership, operation, management, acquisition, development and redevelopment of predominantly apartment communities. As of December 31, 2015, the Company owned or held an interest in 246 communities, aggregating 59,160 apartment homes, located along the West Coast, as well as four commercial buildings (totaling approximately 319,079 square feet), and eight active development projects with 2,447 apartment homes in various stages of development (collectively, the “Portfolio”).

The Company’s website address is <http://www.essex.com>. The Company’s annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports, and the Proxy Statement for its Annual Meeting of Stockholders are available, free of charge, on its website as soon as practicable after the Company files the reports with the U.S. Securities and Exchange Commission (“SEC”).

##### BUSINESS STRATEGIES

The following is a discussion of the Company’s business strategies in regards to real estate investment and management.

##### Business Strategies

Research Driven Approach to Investments – The Company believes that successful real estate investment decisions and portfolio growth begin with extensive regional economic research and local market knowledge. The Company continually assesses markets where the Company operates, as well as markets where the Company considers future investment opportunities by evaluating the following:

Focus on markets in major metropolitan areas that have regional population in excess of one million;  
Constraints on new supply driven by: (i) low availability of developable land sites where competing housing could be economically built; (ii) political growth barriers, such as protected land, urban growth boundaries, and potential lengthy and expensive development permit processes; and (iii) natural limitations to development, such as mountains or waterways;  
Rental demand is enhanced by affordability of rents relative to costs of for-sale housing; and  
Housing demand that is based on job growth, proximity to jobs, high median incomes and the quality of life including related commuting factors.

Recognizing that all real estate markets are cyclical, the Company regularly evaluates the results of its regional economic, and local market research, and adjusts the geographic focus of its portfolio accordingly. The Company seeks to increase its portfolio allocation in markets projected to have the strongest local economies and to decrease such allocations in markets

## Table of Contents

projected to have declining economic conditions. Likewise, the Company also seeks to increase its portfolio allocation in markets that have attractive property valuations and to decrease such allocations in markets that have inflated valuations and low relative yields.

Property Operations – The Company manages its communities by focusing on activities that may generate above-average rental growth, tenant retention/satisfaction and long-term asset appreciation. The Company intends to achieve this by utilizing the strategies set forth below:

Property Management – Oversee delivery of and quality of the housing provided to our residents and manage the properties financial performance.

Capital Preservation – Asset Management is responsible for the planning, budgeting and completion of major capital improvement projects at the Company’s communities.

Business Planning and Control – Comprehensive business plans are implemented in conjunction with significant investment decisions. These plans include benchmarks for future financial performance, based on collaborative discussions between on-site managers and senior management.

Development and Redevelopment – The Company focuses on acquiring and developing apartment communities in supply constrained markets, and redeveloping its existing communities to improve the financial and physical aspects of the Company’s communities.

## CURRENT BUSINESS ACTIVITIES

### Merger with BRE Properties, Inc. in 2014

On April 1, 2014, Essex completed the merger with BRE Properties, Inc. (“BRE”). In connection with the closing of the merger, (1) BRE merged into a wholly owned subsidiary of Essex, and (2) each outstanding share of BRE common stock was converted into (i) 0.2971 shares (the “Stock Consideration”) of Essex common stock, and (ii) \$7.18 in cash, (the “Cash Consideration”), plus cash in lieu of fractional shares for total consideration of approximately \$4.3 billion. The Cash Consideration was adjusted as a result of the authorization and declaration of a special distribution to the stockholders of BRE of \$5.15 per share of BRE common stock payable to BRE stockholders of record as of the close of business on March 31, 2014 (the “Special Dividend”). The Special Dividend was payable as a result of the closing of the sale of certain interests in assets of BRE to certain parties, which closed on March 31, 2014. Pursuant to the terms of the merger agreement, the amounts payable as a Special Dividend reduced the Cash Consideration of \$12.33 payable by Essex in the merger to \$7.18 per share of BRE common stock.

Essex issued approximately 23.1 million shares of Essex common stock as Stock Consideration in the merger. For purchase accounting, the value of the common stock issued by Essex upon the consummation of the merger was determined based on the closing price of BRE’s common stock on the closing date of the merger. As a result of Essex being admitted to the S&P 500 on the same date as the closing of the merger, Essex’s common stock price experienced significantly higher than usual trading volume and the closing price of \$174 per share was significantly higher than its volume-weighted average trading price for the days before and after April 1, 2014. BRE’s common stock did not experience the same proportionate increase in common stock price leading up to April 1, 2014. As a result, given that a substantial component of the purchase price is an exchange of equity instruments, Essex used the closing price of BRE’s common stock on April 1, 2014 of \$61 per share, less the Cash Consideration, as the fair value of the equity consideration. After deducting the Special Dividend and the Cash Consideration per share, this resulted in a value of \$48.67 per share of BRE common stock which is the equivalent of approximately \$164 per share of Essex common stock issued.

### Acquisitions of Real Estate

Acquisitions are an important component of the Company's business plan, and during 2015, the Company acquired ownership interests in seven communities comprised of 1,722 apartment homes for \$638.1 million.

Table of Contents

The following is a summary of 2015 acquisitions (\$ in millions):

Property Name	Location	Apartment Homes	Essex Ownership Percentage	Ownership	Quarter in 2015	Purchase Price
8th & Hope	Los Angeles, CA	290	100	% EPLP	Q1	\$200.0
The Huxley <sup>(1)</sup>	Los Angeles, CA	187	100	% EPLP	Q1	48.8
The Dylan <sup>(1)</sup>	Los Angeles, CA	184	100	% EPLP	Q1	51.3
Reveal <sup>(2)</sup>	Woodland Hills, CA	438	99.75	% EPLP	Q2	73.0
Avant	Los Angeles, CA	247	100	% EPLP	Q2	99.0
Avant II	Los Angeles, CA	193	100	% EPLP	Q4	73.0
Enso	San Jose, CA	183	100	% EPLP	Q4	93.0
Total 2015		1,722				\$638.1

(1) In March 2015, the Company purchased the joint venture partner's remaining membership interest in The Huxley and The Dylan co-investments for a purchase price of \$100.1 million. The properties are now consolidated.

(2) In April 2015, the Company purchased the joint venture partner's 49.5% membership interest in the Reveal co-investment for a purchase price of \$73.0 million. The property is now consolidated.

#### Dispositions of Real Estate

As part of its strategic plan to own quality real estate in supply-constrained markets, the Company continually evaluates all the communities and sells those which no longer meet its strategic criteria. The Company may use the capital generated from the dispositions to invest in higher-return communities or other real estate investments, or repay debts. The Company believes that the sale of these communities will not have a material impact on its future results of operations or cash flows nor will their sale materially affect its ongoing operations. Generally, the Company seeks to have any impact of earnings dilution resulting from these dispositions offset by the positive impact of its acquisitions, development and redevelopment activities.

During 2015, the Company sold two apartment communities, Pinnacle South Mountain and Sharon Green, for a total of \$308.8 million, resulting in total gains of \$44.9 million. Additionally, in March 2015, the Company sold two commercial buildings, aggregating 120,000 square feet, located in Emeryville, CA, for \$13.0 million, resulting in gains of \$2.4 million.

#### Development Pipeline

The Company defines development projects as new communities that are being constructed or are newly constructed and are in a phase of lease-up and have not yet reached stabilized operations. As of December 31, 2015, the Company had two consolidated development projects and six joint venture development projects comprised of 2,447 apartment homes for an estimated cost of \$1.4 billion, of which \$787 million remains to be expended, of which \$542 million is the Company's share.

The Company defines predevelopment projects as proposed communities in negotiation or in the entitlement process with an expected high likelihood of becoming entitled development projects. As of December 31, 2015, the Company had various consolidated predevelopment projects. The Company may also acquire land for future development purposes or sale.

Table of Contents

The following table sets forth information regarding the Company's development pipeline (\$ in millions):

Development Pipeline	Location	Essex Ownership%	Apartment Homes	As of 12/31/2015 Incurred Project Cost (1)	Estimated Project Cost <sup>(1)</sup>
Development Projects - Consolidated					
MB 360 - Phase II	San Francisco, CA	100	% 172	\$ 119	\$ 135
Station Park Green	San Mateo, CA	100	% 599	83	354
Total - Consolidated Development Projects			771	202	489
Development Projects - Joint Venture					
Epic - Phase III	San Jose, CA	55	% 200	84	92
Agora <sup>(2)</sup>	Walnut Creek, CA	51	% 49	84	95
Owens	Pleasanton, CA	55	% 255	55	89
Hacienda	Pleasanton, CA	55	% 251	37	86
Century Towers	San Jose, CA	50	% 376	93	172
500 Folsom <sup>(3)</sup>	San Francisco, CA	50	% 545	62	381
Total - Joint Venture Development Projects			1,676	415	915
Predevelopment Projects - Consolidated					
Other Projects	various	100	% —	40	40
Total - Predevelopment Projects			—	40	40
Grand Total - Development and Predevelopment Pipeline			2,447	\$ 657	\$ 1,444

Includes costs related to the entire project, including both the Company's and joint venture partners' costs. Includes (1) incurred costs and estimated costs to complete these development projects. For predevelopment projects, only incurred costs are included in estimated costs.

(2) Estimated project costs for this development include costs to develop both residential and commercial space.

(3) Estimated project cost for this development is net of a projected value for low-income housing tax credit proceeds and savings from tax exempt bonds.

### Redevelopment Pipeline

The Company defines the redevelopment pipeline as existing properties owned or recently acquired, which have been targeted for additional investment by the Company with the expectation of increased financial returns through property improvement. During redevelopment, apartment homes may not be available for rent and, as a result, may have less than stabilized operations. As of December 31, 2015, the Company had ownership interests in five major redevelopment communities aggregating 1,313 apartment homes with estimated redevelopment costs of \$159.8 million, of which approximately \$82.5 million remains to be expended.

### Long Term Debt

During 2015, the Company made regularly scheduled principal payments and loan payoffs of \$118.3 million of its secured mortgage notes payable at an average interest rate of 5.3%.

In March 2015, the Company issued \$500 million of 3.5% senior unsecured notes that mature in April 2025. The interest is payable semi-annually in arrears on April 1<sup>st</sup> and October 1<sup>st</sup> of each year, commencing October 1, 2015, until the maturity date in April 2025. The Company used the net proceeds of this offering to repay indebtedness under the Company's \$1.0 billion unsecured line of credit facility, its \$25.0 million unsecured working capital line and for other general corporate purposes.

## Table of Contents

### Bank Debt

As of December 31, 2015, Fitch Ratings ("Fitch"), Moody's Investor Service, and Standard and Poor's ("S&P") credit agencies rated Essex Property Trust, Inc. and Essex Portfolio, L.P. BBB+/Stable, Baa2/Positive, and BBB/Positive, respectively.

At December 31, 2015, the Company's \$1.0 billion credit facility had an interest rate of LIBOR plus 0.95%, which is based on a tiered rate structure tied to the Company's credit ratings. In January 2016, the Company extended the maturity date on its \$1.0 billion unsecured line of credit facility from December 2017 to December 2019, with one 18-month extension, exercisable by the Company and lowered the interest rate to LIBOR plus 0.90%.

### Equity Transactions

During 2015, ESS issued 1,481,737 shares of common stock at an average share price of \$226.46 for proceeds of \$332.3 million, net of fees and commissions. ESS contributed the net proceeds to the Operating Partnership and used the proceeds to pay down debt, fund the development and redevelopment pipeline, fund acquisitions, and for general corporate purposes. During the first quarter of 2016 through February 22, 2016, ESS has not issued any shares under its equity distribution program.

### Co-investments

The Company has entered into, and may continue in the future to enter into, joint ventures or partnerships (including limited liability companies) through which we own an indirect economic interest in less than 100% of the community or land owned directly by the joint venture or partnership. For each joint venture the Company holds a 50% to 55% non-controlling interest in the venture and will earn customary management fees and may earn development, asset property management fees and may also earn a promote interest.

The Company has also made, and may continue in the future to make, preferred equity investments in various multi-family development projects. The Company earns a preferred rate of return on these investments.

### OFFICES AND EMPLOYEES

The Company is headquartered in San Mateo, California, and has regional offices in Woodland Hills, California; San Jose, California; Irvine, California; San Diego, California and Bellevue, Washington. As of December 31, 2015, the Company had 1,806 employees.

### INSURANCE

The Company purchases general liability and all risk property, including loss of rent, insurance coverage for each of its communities. The Company also purchases limited earthquake, terrorism, environmental and flood insurance.

There are certain types of losses which may not be covered or could exceed coverage limits. The insurance programs are subject to deductibles and self-insured retentions in varying amounts. The Company utilizes a wholly owned insurance subsidiary, Pacific Western Insurance LLC ("PWI") to self-insure certain earthquake and all risk losses. As of December 31, 2015, PWI has cash and marketable securities of approximately \$60.3 million, and is consolidated in the Company's financial statements.

All of the Company's communities are located in areas that are subject to earthquake activity. The Company evaluates its financial loss exposure to seismic events by using actuarial loss models developed by the insurance industry and property vulnerability based on structural evaluations of seismic consultants. The Company manages this exposure,

where considered appropriate, desirable, and cost-effective, by upgrading properties to increase their resistance to forces caused by seismic events, by considering available funds and coverages provided by PWI and/or by purchasing seismic insurance. The Company also purchases limited earthquake insurance for certain properties owned by the Company's co-investments.

In addition, the Company carries other types of insurance coverage related to a variety of risks and exposures.

Based on market conditions, the Company may change or potentially eliminate insurance coverages, or increase levels of self-insurance. Further, the Company may incur losses, which could be material, due to uninsured risks, deductibles and self-insured retentions, and/or losses in excess of coverage limits.

Table of Contents

COMPETITION

There are numerous housing alternatives that compete with the Company's communities in attracting residents. These include other apartment communities, condominiums and single-family homes. If the demand for the Company's communities is reduced or if competitors develop and/or acquire competing housing, rental rates and occupancy may drop which may have a material adverse effect on the Company's financial condition and results of operations.

The Company faces competition from other real estate investment trusts, businesses and other entities in the acquisition, development and operation of apartment communities. Some competitors are larger and have greater financial resources than the Company. This competition may result in increased costs of apartment communities the Company acquires and or develops.

WORKING CAPITAL

The Company believes that cash flows generated by its operations, existing cash and marketable securities balances, availability under existing lines of credit, access to capital markets and the ability to generate cash from the disposition of real estate are sufficient to meet all of its reasonably anticipated cash needs during 2016.

The timing, source and amounts of cash flows provided by financing activities and used in investing activities are sensitive to changes in interest rates, stock price, and other fluctuations in the capital markets environment, which can affect the Company's plans for acquisitions, dispositions, development and redevelopment activities.

ENVIRONMENTAL CONSIDERATIONS

See the discussion under the caption, "Risks Related to Real Estate Investments and Our Operations - The Company's Portfolio may have environmental liabilities" in Item 1A, Risk Factors, for information concerning the potential effect of environmental regulations on its operations, which discussion under the caption "The Company's Portfolio may have environmental liabilities" is incorporated by reference into this Item 1.

OTHER MATTERS

Certain Policies of the Company

The Company intends to continue to operate in a manner that will not subject it to regulation under the Investment Company Act of 1940. The Company has in the past five years and may in the future (i) issue securities senior to its common stock, (ii) fund acquisition activities with borrowings under its line of credit and (iii) offer shares of common stock and/or units of limited partnership interest in the Operating Partnership or affiliated partnerships as partial consideration for property acquisitions. The Company from time to time acquires partnership interests in partnerships and joint ventures, either directly or indirectly through subsidiaries of the Company, when such entities' underlying assets are real estate.

The Company invests primarily in apartment communities that are located in predominantly coastal markets within Southern California, the San Francisco Bay Area, and the Seattle metropolitan area. The Company currently intends to continue to invest in apartment communities in such regions. However, these practices may be reviewed and modified periodically by management.

Table of Contents

ITEM 1A: RISK FACTORS

For purposes of this section, the term “stockholders” means the holders of shares of Essex Property Trust, Inc.’s common stock and preferred stock. Set forth below are the risks that we believe are material to Essex Property Trust, Inc.’s stockholders and Essex Portfolio, L.P.’s unit holders. You should carefully consider the following factors in evaluating our company, our properties and our business.

Our business, operating results, cash flows and financial condition are subject to various risks and uncertainties, including, without limitation, those set forth below, any one of which could cause our actual operating results to vary materially from recent results or from our anticipated future results.

Risks Related to Our Real Estate Investments and Operations

General real estate investment risks may adversely affect property income and values. Real estate investments are subject to a variety of risks. If the communities and other real estate investments do not generate sufficient income to meet operating expenses, including debt service and capital expenditures, cash flow and the ability to make distributions to stockholders will be adversely affected. Income from the communities may be further adversely affected by, among other things, the following factors:

- the general economic climate;
- local economic conditions in which the communities are located, such as oversupply of housing or a reduction in demand for rental housing;
- the attractiveness of the communities to tenants;
- competition from other available housing alternatives;
- changes in rent control or stabilization laws or other laws regulating housing;
- the Company’s ability to provide for adequate maintenance and insurance; and
- changes in interest rates and availability of financing.

As leases at the communities expire, tenants may enter into new leases on terms that are less favorable to the Company. Income and real estate values also may be adversely affected by such factors as applicable laws (ex: the Americans with Disabilities Act of 1990 and tax laws). Real estate investments are relatively illiquid and, therefore, the Company’s ability to vary its portfolio promptly in response to changes in economic or other conditions may be quite limited.

Short-term leases expose us to the effects of declining market rents, and the Company may be unable to renew leases or relet units as leases expire. Substantially all of our apartment leases are for a term of one year or less. If the Company is unable to promptly renew the leases or relet the units, or if the rental rates upon renewal or reletting are significantly lower than expected rates, then the Company’s results of operations and financial condition will be adversely affected. With these short term leases, our rental revenues are impacted by declines in market rents more quickly than if our leases were for longer terms.

We may pursue acquisitions, dispositions, investments and joint ventures, which could adversely affect our results of operations. We may make acquisitions of and investments in businesses that offer complementary properties and communities to augment our market coverage, or enhance our property offerings. We may also enter into strategic alliances or joint ventures to achieve these goals. We cannot assure you that we will be able to identify suitable acquisition, investment, alliance, or joint venture opportunities, that we will be able to consummate any such transactions or relationships on terms and conditions acceptable to us, or that such transactions or relationships will be successful. In addition, our original estimates and assumptions used in assessing any acquisition may be inaccurate, and we may not realize the expected financial or strategic benefits of any such acquisition. From time to time, we may also divest portions of our business that are no longer strategically important or exit minority investments, which could materially affect our FFO, cash flows and results of operations.

These transactions or any other acquisitions or dispositions involve risks and uncertainties. For example, as a consequence of such transactions, we may assume unknown liabilities, which could ultimately lead to material costs for us. In addition, the integration of acquired businesses or other acquisitions may not be successful and could result in disruption to other parts of our business. To integrate acquired businesses or other acquisitions, we must implement our management information systems, operating systems and internal controls, and assimilate and manage the

personnel of the acquired operations. There can be no assurance that all pre-acquisition property due diligence will have identified all material issues that might arise with respect to such acquired business and its properties or as to any such other acquisitions.

Any acquisition may also cause us to assume liabilities and ongoing lawsuits, acquire goodwill and other non-amortizable intangible assets that will be subject to impairment testing and potential impairment charges, incur amortization expense related

7

---

Table of Contents

to certain intangible assets, increase our expenses and working capital requirements, and subject us to litigation, which would reduce our return on invested capital. In addition, if the businesses or properties that we acquire have a different pricing or cost structure than we do, such acquisitions may adversely affect our profitability and reduce our overall margin. Failure to manage and successfully integrate the acquisitions we make or to improve margins of the acquired businesses and products could materially harm our business, operating results and margins. Any dispositions we may make may also result in ongoing obligations to us following any such divestiture, for example as a result of any transition services or indemnities we agree to provide to the purchaser in any such transaction, which may result in additional expenses and may adversely affect our financial condition and results of operation.

Any future acquisitions we make may also require significant additional debt or equity financing, which, in the case of debt financing, would increase our leverage and potentially affect our credit ratings and, in the case of equity or equity-linked financing, could be dilutive to our existing stockholders. Any downgrades in our credit ratings associated with an acquisition could adversely affect our ability to borrow by resulting in more restrictive borrowing terms. As a result of the foregoing, we also may not be able to complete acquisitions or other strategic transactions in the future to the same extent as in the past, or at all. These and other factors could harm our ability to achieve anticipated levels of profitability at acquired operations or realize other anticipated benefits of an acquisition, and could adversely affect our business, financial condition and results of operations.

National and regional economic environments can negatively impact the Company's operating results. The Company's forecast for the national economy assumes growth of the gross domestic product of the national economy and the economies of the west coast states. In the event of a recession, the Company could incur reductions in rental rates, occupancy levels, property valuations and increases in operating costs such as advertising and turnover expenses. Inflation/Deflation may affect rental rates and operating expenses. Substantial inflationary or deflationary pressures could have a negative effect on rental rates and property operating expenses.

Acquisitions of communities involve various risks and uncertainties and may fail to meet expectations. The Company intends to continue to acquire apartment communities. However, there are risks that acquisitions will fail to meet the Company's expectations. The Company's estimates of future income, expenses and the costs of improvements or redevelopment that are necessary to allow the Company to market an acquired apartment community as originally intended may prove to be inaccurate. Also, in connection with such acquisitions, we may assume unknown liabilities, which could ultimately lead to material costs for us. The Company expects to finance future acquisitions, in whole or in part, under various forms of secured or unsecured financing or through the issuance of partnership units by the Operating Partnership or related partnerships or additional equity by the Company. The use of equity financing, rather than debt, for future developments or acquisitions could dilute the interest of the Company's existing stockholders. If the Company finances new acquisitions under existing lines of credit, there is a risk that, unless the Company obtains substitute financing, the Company may not be able to undertake additional borrowing for further acquisitions or developments or such borrowing may be not available on advantageous terms.

Our apartment communities may be subject to unknown or contingent liabilities which could cause us to incur substantial costs. The properties that the Company owns or may acquire are or may be subject to unknown or contingent liabilities for which the Company may have no recourse, or only limited recourse, against the sellers. In general, the representations and warranties provided under the transaction agreements related to the sales of the properties may not survive the closing of the transactions. While the Company will seek to require the sellers to indemnify us with respect to breaches of representations and warranties that survive, such indemnification may be limited and subject to various materiality thresholds, a significant deductible or an aggregate cap on losses. As a result, there is no guarantee that we will recover any amounts with respect to losses due to breaches by the sellers of their representations and warranties. In addition, the total amount of costs and expenses that may be incurred with respect to liabilities associated with apartment communities may exceed our expectations, and we may experience other unanticipated adverse effects, all of which may adversely affect our business, financial condition and results of operations.

Development and redevelopment activities may be delayed, not completed, and/or not achieve expected results. The Company pursues development and redevelopment projects and these projects generally require various governmental and other approvals, which have no assurance of being received. The Company's development and redevelopment

activities generally entail certain risks, including the following:

- funds may be expended and management's time devoted to projects that may not be completed;
- construction costs of a project may exceed original estimates possibly making the project economically unfeasible;
- projects may be delayed due to, without limitation, adverse weather conditions, labor or material shortage;
- occupancy rates and rents at a completed project may be less than anticipated;

8

---

Table of Contents

expenses at completed development projects may be higher than anticipated; and we may be unable to obtain, or experience a delay in obtaining, necessary zoning, occupancy, or other required governmental or third party permits and authorizations, which could result in increased costs or delay or abandonment of opportunities.

These risks may reduce the funds available for distribution to the Company's stockholders. Further, the development and redevelopment of communities is also subject to the general risks associated with real estate investments. For further information regarding these risks, please see the risk factor above titled "General real estate investment risks may adversely affect property income and values."

Difficulty of selling apartment communities could limit liquidity and financial flexibility. If we are found to have held, acquired or developed a community primarily with the intent to resell the community, federal tax laws may limit our ability to sell the community without incurring a 100% tax on the gain on the sale of the community and potentially adversely impacting our status as a real estate investment trust ("REIT") unless we own the community through one of our taxable REIT subsidiaries ("TRSs"). In addition, real estate in our markets can at times be difficult to sell quickly at prices we find acceptable. These potential difficulties in selling real estate in our markets may limit our ability to change or reduce the apartment communities in our portfolio promptly in response to changes in economic or other conditions, which could have a material adverse effect on our financial condition and results of operations.

The geographic concentration of the Company's communities and fluctuations in local markets may adversely impact the Company's financial condition and operating results. The Company generated significant amounts of rental revenues for the year ended December 31, 2015, from the Company's communities concentrated in Southern California (Los Angeles, Orange, Santa Barbara, San Diego, and Ventura counties), Northern California (the San Francisco Bay Area), and the Seattle metropolitan area. For the year ended December 31, 2015, 83% of the Company's rental revenues were generated from communities located in California. This geographic concentration could present risks if local property market performance falls below expectations. In general, factors that may adversely affect local market and economic conditions include the following:

- the economic climate, which may be adversely impacted by a reduction in jobs or income levels, industry slowdowns and other factors;
- local conditions, such as oversupply of, or reduced demand for, apartment homes;
- declines in household formation;
- favorable residential mortgage rates;
- rent control or stabilization laws, or other laws regulating rental housing, which could prevent the Company from raising rents to offset increases in operating costs; and
- competition from other available apartments and other housing alternatives and changes in market rental rates.

The Company may experience various increased costs, including increased property taxes, to own and maintain its properties. Real property taxes on our properties may increase as our properties are reassessed by taxing authorities or as property tax rates change. Thus, our real estate taxes in the State of Washington could increase as a result of property value reassessments or increased property tax rates in that state. A current California law commonly referred to as Proposition 13 generally limits annual real estate tax increases on California properties to 2% of assessed value. However, under Proposition 13, property tax reassessment generally occurs as a result of a "change in ownership" of a property, as specially defined for purposes of those rules. Because the property taxing authorities may not determine whether there has been a "change in ownership" or the actual reassessed value of a property for a period of time after a transaction has occurred, we may not know the impact of a potential reassessment for a considerable amount of time following a particular transaction. Therefore, the amount of property taxes we are required to pay could increase substantially from the property taxes we currently pay or have paid in the past, including on a retroactive basis. In addition, from time to time voters and lawmakers have announced initiatives to repeal or amend Proposition 13 to eliminate its application to commercial and industrial property and/or introduce split tax roll legislation. Such

initiatives, if successful, could increase the assessed value and/or tax rates applicable to commercial property in California, including our apartment communities.

The Company may experience increased costs associated with capital improvements and routine property maintenance, such as repairs to the foundation, exterior walls, and rooftops of its properties, as its properties advance through their life-cycles. Increases in the Company's expenses to own and maintain its properties could adversely impact the Company's financial condition and results of operations.

Competition in the apartment community market may adversely affect operations and the rental demand for the Company's communities. There are numerous housing alternatives that compete with the Company's communities in attracting residents. These include other apartment communities, condominiums and single-family homes that are available for rent or for sale in the markets in which the communities are located. Competitive housing in a particular area and the increasing affordability of

Table of Contents

owner occupied single and multi-family homes caused by lower housing prices, mortgage interest rates and government programs to promote home ownership could adversely affect the Company's ability to retain its residents, lease apartment homes and increase or maintain rents. If the demand for the Company's communities is reduced or if competitors develop and/or acquire competing apartment communities, rental rates may drop, which may have a material adverse effect on the Company's financial condition and results of operations. The Company also faces competition from other real estate investment trusts, businesses and other entities in the acquisition, development and operation of apartment communities. This competition may result in an increase in costs and prices of apartment communities that the Company acquires and/or develops.

Investments in mortgages and other real estate securities could affect the Company's ability to make distributions to stockholders. The Company may invest in equity, preferred equity or debt securities related to real estate, which could adversely affect the Company's ability to make distributions to stockholders. The Company may purchase or otherwise invest in securities issued by entities which own real estate and/or invest in mortgages or unsecured debt obligations. These mortgages may be first, second or third mortgages that may or may not be insured or otherwise guaranteed. The Company may acquire mezzanine loans, which take the form of subordinated loans secured by second mortgages on the underlying property or loans secured by a pledge of the ownership interests of either the entity owning the property or a pledge of the ownership interests of the entity or entities that owns the interest in the entity owning the property. In general, investments in mortgages include the following risks:

- that the value of mortgaged property may be less than the amounts owed, causing realized or unrealized losses;
- the borrower may not pay indebtedness under the mortgage when due, requiring the Company to foreclose, and the amount recovered in connection with the foreclosure may be less than the amount owed;
- that interest rates payable on the mortgages may be lower than the Company's cost of funds;
- in the case of junior mortgages, that foreclosure of a senior mortgage could eliminate the junior mortgage; and
- delays in the collection of principal and interest if a borrower claims bankruptcy.

If any of the above were to occur, it could adversely affect the Company's cash flows from operations.

The Company's joint ventures and joint ownership of communities and partial interests in corporations and limited partnerships could limit the Company's ability to control such communities and partial interests. Instead of purchasing and developing apartment communities directly, the Company has invested and may continue to invest in joint ventures. Joint venture partners often have shared control over the development and operation of the joint venture assets. Therefore, it is possible that a joint venture partner in an investment might become bankrupt, or have economic or business interests or goals that are inconsistent with the Company's business interests or goals, or be in a position to take action contrary to the Company's instructions or requests, or its policies or objectives. Consequently, a joint venture partners' actions might subject property owned by the joint venture to additional risk. Although the Company seeks to maintain sufficient influence over any joint venture to achieve its objectives, the Company may be unable to take action without its joint venture partners' approval, or joint venture partners could take actions binding on the joint venture without its consent. A joint venture partner might fail to approve decisions that are in the Company's best interest. Should a joint venture partner become bankrupt, the Company could become liable for such partner's share of joint venture liabilities. In some instances, the Company and the joint venture partner may each have the right to trigger a buy-sell arrangement, which could cause the Company to sell its interest, or acquire a partner's interest, at a time when the Company otherwise would have not have initiated such a transaction.

From time to time, the Company, through the Operating Partnership, invests in corporations, limited partnerships, limited liability companies or other entities that have been formed for the purpose of acquiring, developing, financing, or managing real property. For example, the Company has made preferred equity investments in third party entities that own real estate. With preferred equity investments and certain other investments, the Operating Partnership's interest in a particular entity is typically less than a majority of the outstanding voting interests of that entity.

Therefore, the Operating Partnership's ability to control the daily operations of such an entity may be limited.

Furthermore, the Operating Partnership may not have the power to remove a majority of the board of directors (in the case of a corporation) or the general partner or partners (in the case of a limited partnership) of such an entity in the event that its operations conflict with the Operating Partnership's objectives. The Operating Partnership may not be

able to dispose of its interests in such an entity. In the event that such an entity becomes insolvent, the Operating Partnership may lose up to its entire investment in and any advances to the entity. The Company may also incur losses if any guarantees or indemnifications were made by the Company. The Company also owns properties indirectly under "downREIT" structures. The Company has, and in the future may, enter into transactions that could require the Company to pay the tax liabilities of partners, which contribute assets into downREITs, joint ventures or the Operating Partnership, in the event that certain taxable events, which are within the Company's control, occur. Although the Company plans to hold the contributed assets or defer recognition of gain on sale pursuant to the like-kind exchange rules under Section 1031 of the Code, the Company can provide no assurance that the Company will be able to do so and if such tax liabilities were incurred they could have a material impact on its financial position.

Table of Contents

Compliance with laws benefiting disabled persons may require the Company to make significant unanticipated expenditures or impact the Company's investment strategy. A number of federal, state and local laws (including the Americans with Disabilities Act) and regulations exist that may require modifications to existing buildings or restrict certain renovations by requiring improved access to such buildings by disabled persons and may require other structural features which add to the cost of buildings under construction. Legislation or regulations adopted in the future may impose further burdens or restrictions on the Company with respect to improved access by disabled persons. The costs of compliance with these laws and regulations may be substantial. Noncompliance with these laws could result in the imposition of fines or an award of damages to private litigants and also could result in an order to correct any noncomplying feature, which could result in substantial capital expenditures.

The Company's portfolio may have environmental liabilities. Under various federal, state and local environmental and public health laws, regulations and ordinances we have been from time to time, and may be required in the future, regardless of knowledge or responsibility, to investigate and remediate the effects of hazardous or toxic substances or petroleum product releases at our properties (including in some cases naturally occurring substances such as methane and radon gas) and may be held liable under these laws or common law to a governmental entity or to third parties for response costs, property damage, personal injury or natural resources damages and for investigation and remediation costs incurred as a result of the impacts resulting from such releases. While the Company is unaware of any such response action required or damage claims associated with its existing properties which individually or in aggregate would have a materially adverse effect on our business, assets, financial condition or results of operations, potential future costs and damage claims may be substantial and could exceed any insurance coverage we may have for such events or such coverage may not exist. Further, the presence of such substances, or the failure to properly remediate any such impacts, may adversely affect our ability to borrow against, develop, sell or rent the affected property. In addition, some environmental laws create or allow a government agency to impose a lien on the impacted site in favor of the government for damages and costs it incurs as a result of responding to hazardous or toxic substance or petroleum product releases .

Certain environmental laws impose liability for release of asbestos-containing materials ("ACMs") into the air, and third parties may seek recovery from owners or operators of apartment communities for personal injury associated with ACMs. In connection with the ownership (direct or indirect), operation, management and development of our communities, the Company could be considered an owner or operator of such properties or as having arranged for the disposal or treatment of hazardous or toxic substances and, therefore, may be potentially liable for removal or remediation costs, as well as certain other costs, including governmental fines and costs related to injuries of persons and property.

Investments in real property create a potential for environmental liabilities on the part of the owner of such real property. The Company carries certain limited insurance coverage for this type of environmental risk as to its properties; however, such coverage is not fully available for all properties and, as to those properties for which limited coverage is fully available it may not apply to certain claims arising from known conditions present on those properties. In general, in connection with the ownership, operation, financing, management and development of its communities, the Company may be potentially liable for removal or clean-up costs, as well as certain other costs and environmental liabilities. The Company may also be subject to governmental fines and costs related to injuries to third persons and damage to their property.

Properties which we intend to acquire undergo a pre-acquisition Phase I environmental site assessment, which is intended to afford the Company protection against so-called "owner liability" under the primary federal environmental law, as well as further environmental assessment, which generally does not involve invasive techniques such as soil or ground water sampling except where conditions warranting such further assessment are identified and seller's consent is obtained. While such assessments are conducted in accordance with applicable "all appropriate inquiry" standards, no assurance can be given that all environmental conditions present on or beneath or emanating from a given property will be discovered or that the full nature and extent of those conditions which are discovered will be adequately ascertained and quantified.

In connection with our ownership, operation and development of communities, from time to time we undertake remedial action in response to the presence of subsurface or other contaminants, including contaminants in soil,

groundwater and soil vapor beneath or affecting our buildings. The Company does so pursuant to appropriate environmental regulatory requirements with the objective of obtaining regulatory closure or a no further action determination that will allow for future use, development and sale of any impacted community.

Mold growth may occur when excessive moisture accumulates in buildings or on building materials, particularly if the moisture problem remains undiscovered or is not addressed in a timely manner. Although the occurrence of mold at multi-family and other structures, and the need to remediate such mold, is not a new phenomenon, there has been increased awareness in recent years that certain molds may in some instances lead to adverse health effects, including allergic or other reactions. The Company has adopted policies for promptly addressing and resolving reports of mold when it is detected, and to minimize any

Table of Contents

impact mold might have on residents of the property. The Company believes its mold policies and proactive response to address any known existence reduce its risk of loss from these cases; however, no assurance can be provided that the Company has identified and responded to all mold occurrences.

California has enacted legislation, commonly referred to as "Proposition 65," requiring that "clear and reasonable" warnings be given to persons who are exposed to chemicals known to the State of California to cause cancer or reproductive toxicity, including tobacco smoke. Although the Company has sought to comply with Proposition 65 requirements, the Company cannot assure you that the Company will not be adversely affected by litigation relating to Proposition 65.

Methane gas is a naturally-occurring gas that is commonly found below the surface in several areas, particularly in the Southern California coastal areas. Methane is a non-toxic gas, but is flammable and can be explosive at sufficient concentrations when in confined spaces and exposed to an ignition source. Naturally-occurring, methane gas is regulated at the state and federal level as a greenhouse gas but is not otherwise regulated as a hazardous substance; however some local governments, such as Los Angeles County, require that new buildings constructed in areas designated methane gas zones install detection and/or venting systems. Methane gas is also associated with certain industrial activities, such as former municipal waste landfills. Radon is also a naturally-occurring gas that is found below the surface and can pose a threat to human health requiring abatement action if present in sufficient concentration within occupied areas. The Company cannot assure you that it will not be adversely affected by costs related to its compliance with methane or radon gas related requirements or litigation costs related to methane or radon gas.

We cannot assure you that costs or liabilities incurred as a result of environmental matters will not affect our ability to make distributions to stockholders, or that such costs or liabilities will not have a material adverse effect on our financial condition and results of operations; provided, however, the Company is unaware of any pending or threatened alleged claim resulting from such matters which would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

The Company may incur general uninsured losses. The Company purchases general liability and all risk property, including loss of rent, insurance coverage for each of its communities. The Company also purchases limited earthquake, terrorism, environmental and flood insurance. There are certain types of losses which may not be covered or could exceed coverage limits. The insurance programs are subject to deductibles and self-insured retentions in varying amounts. The Company utilizes a wholly owned insurance subsidiary, Pacific Western Insurance LLC ("PWI") to self-insure certain earthquake and all risk losses. As of December 31, 2015, PWI has cash and marketable securities of approximately \$60.3 million, and is consolidated in the Company's financial statements.

All the communities are located in areas that are subject to earthquake activity. The Company evaluates its financial loss exposure to seismic events by using actuarial loss models developed by the insurance industry and property vulnerability based on structural evaluations of seismic consultants. The Company manages this exposure, where considered appropriate, desirable, and cost-effective, by upgrading properties to increase their resistance to forces caused by seismic events, by considering available funds and coverages provided by PWI and/or by purchasing seismic insurance. Purchasing seismic insurance coverage can be costly and such seismic insurance is in limited supply. As a result, the Company may experience a shortage in desired coverage levels if market conditions are such that insurance is not available, or the cost of the insurance makes it, in managements view, not economically practical. The Company purchases limited earthquake insurance for certain high-density properties and assets owned by the Company's co-investments.

The Company carries other types of insurance coverage related to a variety of risks and exposures. Based on market conditions, the Company may change or potentially eliminate insurance coverages, or increase levels of self-insurance. Further, we cannot assure you that the company will not incur losses, which could be material, due to uninsured risks, deductibles and self-insured retentions, and/or losses in excess of coverage limits.

We have significant investments in large metropolitan markets, such as the metropolitan markets in Southern California, the San Francisco Bay Area and Seattle. These markets may in the future be the target of actual or

threatened terrorist attacks. Future terrorist attacks in these markets could directly or indirectly damage our communities, both physically and financially, or cause losses that exceed our insurance coverage.

Although the Company may carry insurance for potential losses associated with its communities, employees, residents, and compliance with applicable laws, it may still incur losses due to uninsured risks, deductibles, copayments or losses in excess of applicable insurance coverage and those losses may be material. In the event of a substantial loss, insurance coverage may not be able to cover the full replacement cost of the Company's lost investment, or the insurance carrier may become insolvent and not be able to cover the full amount of the insured losses. Changes in building codes and ordinances, environmental

## Table of Contents

considerations and other factors might also affect the Company's ability to replace or renovate an apartment community after it has been damaged or destroyed.

Accidental death or horrendous injuries due to fire, natural disasters or other hazards could adversely affect our business and results of operations. The accidental death or horrendous injuries of persons living in our communities due to fire, natural disasters or other hazards could have a material adverse effect on our business and results of operations. Our insurance coverage may not cover all losses associated with such events, and we may experience difficulty marketing communities where any such events have occurred, which could have a material adverse effect on our business and results of operations.

Adverse changes in laws may affect the Company's liability relating to its properties and its operations. Increases in real estate taxes and income, service and transfer taxes cannot always be passed through to residents or users in the form of higher rents, and may adversely affect the Company's cash available for distribution and its ability to make distributions to its stockholders and pay amounts due on its debt. Similarly, changes in laws increasing the potential liability of the Company on a range of issues, including those regarding potential liability for other environmental conditions existing on properties or increasing the restrictions on discharges or other conditions, as well as changes in laws including those affecting development, construction and safety requirements, may result in significant unanticipated expenditures, which could have a material adverse effect on the Company and its ability to make distributions to its stockholders and pay amounts due on our debt. For example, the California statute known as "SB375" provides that, in order to reduce greenhouse emissions, there should be regional planning to coordinate housing needs with regional transportation. Such planning could lead to restrictions on property development that adversely affect the Company. In addition, future enactment of rent control or rent stabilization laws or other laws regulating multi-family housing, as well as any lawsuits against the Company arising from such rent control or other laws, may reduce rental revenues or increase operating costs.

The soundness of financial institutions could adversely affect us. We maintain cash and cash equivalent balances, including significant cash amounts of our wholly owned insurance subsidiary, Pacific Western Insurance LLC, as well as 401(k) plan assets in a limited number of financial institutions. Our cash balances are generally in excess of federally insured limits. The failure or collapse of one or more of these financial institutions may materially adversely affect our ability to recover our cash balances or the 401(k) assets. Certain financial institutions are lenders under our credit facilities, and, from time to time, we execute transactions with counterparties in the financial services industry. In the event that the volatility of the financial markets adversely affects these financial institutions or counterparties, we or other parties to the transactions with us may be unable to complete transactions as intended, which could adversely affect our business and results of operations.

Failure to succeed in new markets may limit the Company's growth. The Company may from time to time make acquisitions or commence development activity outside of its existing market areas if appropriate opportunities arise. The Company's historical experience in its existing markets does not ensure that it will be able to operate successfully in new markets. The Company may be exposed to a variety of risks if it chooses to enter new markets. These risks include, among others:

- an inability to evaluate accurately local apartment market conditions and local economies;
- an inability to identify appropriate acquisition opportunities or to obtain land for development;
- an inability to hire and retain key personnel; and
- lack of familiarity with local governmental and permitting procedures.

The Company's real estate assets may be subject to impairment charges. The Company continually evaluates the recoverability of the carrying value of its real estate assets under U.S. generally accepted accounting principles ("U.S. GAAP"). Factors considered in evaluating impairment of the Company's existing multi-family real estate assets held for investment include significant declines in property operating profits, recurring property operating losses and other significant adverse changes in general market conditions that are considered permanent in nature. Generally, a multi-family real estate asset held for investment is not considered impaired if the undiscounted, estimated future cash flows of the asset over its estimated holding period are in excess of the asset's net book value at the balance sheet date. Assumptions used to estimate annual and residual cash flow and the estimated holding period of such assets require

the judgment of management. There can be no assurance that the Company will not take charges in the future related to the impairment of the Company's assets. Any future impairment charges could have a material adverse effect on the Company's results of operations.

We face risks associated with land holdings and related activities. We hold land for future development and may in the future acquire additional land holdings. The risks inherent in purchasing, owning and developing land increase as demand for apartments, or rental rates, decrease. Real estate markets are highly uncertain and, as a result, the value of undeveloped land may fluctuate significantly. In addition, carrying costs can be significant and can result in losses or reduced profitability. As a result, we hold certain land, and may, in the future acquire additional land, in our development pipeline at a cost we may not be able to fully recover or at a cost which may preclude our developing a profitable multi-family community. If there are

## Table of Contents

subsequent changes in the fair value of our land holdings which we determine is less than the carrying basis of our land holdings reflected in our financial statements plus estimated costs to sell, we may be required to take future impairment charges which could have a material adverse effect on our results of operations.

### Risks Related to Our Indebtedness and Financings

Capital and credit market conditions may affect the Company's access to sources of capital and/or the cost of capital, which could negatively affect the Company's business, results of operations, cash flows and financial condition. In periods when the capital and credit markets experience significant volatility, the amounts, sources and cost of capital available to the Company may be adversely affected. Our current balance sheet, the debt capacity available on the unsecured line of credit with a diversified bank group, access to the public and private placement debt markets and secured debt financing providers such as Fannie Mae and Freddie Mac provides some insulation from volatile capital markets. We primarily use external financing, including sales of equity securities, to fund acquisitions, developments, and redevelopments and to refinance indebtedness as it matures. If sufficient sources of external financing are not available to us on cost effective terms, we could be forced to limit our acquisition, development and redevelopment activity and/or take other actions to fund our business activities and repayment of debt, such as selling assets, reducing our cash dividend or paying out less than 100% of our taxable income. In general, to the extent that the Company's access to capital and credit is at a higher cost than the Company has experienced in recent years (reflected in higher interest rates for debt financing or a lower stock price for equity financing without a corresponding change to investment cap rates) the Company's ability to make acquisitions, develop communities, obtain new financing, and refinance existing borrowing at competitive rates could be adversely affected, which would impact the Company's financial standing and related credit rating. In addition, if our ability to obtain financing is adversely affected, we may be unable to satisfy scheduled maturities on existing financing through other sources of our liquidity, which could result in lender foreclosure on the apartment communities securing such debt.

The Company could be negatively impacted by the condition of Fannie Mae or Freddie Mac and by changes in government support for multi-family housing. Historically, the Company has utilized borrowing from Fannie Mae and Freddie Mac. There are no assurances that these entities will lend to the Company in the future. Beginning in 2011, the Company has primarily utilized unsecured debt and has repaid secured debt at or near their respective maturity and has placed less reliance on agency mortgage debt financing. The Administration and lawmakers have proposed potential options for the future of agency mortgage finance in the U.S. that could involve the phase out of Fannie Mae and Freddie Mac. While we believe Fannie Mae and Freddie Mac will continue to provide liquidity to our sector, should they discontinue doing so, have their mandates changed or reduced or be disbanded or reorganized by the government or if there is reduced government support for support for multi-family housing more generally, it may adversely affect interest rates, capital availability, development of multi-family communities and the value of multi-family residential real estate and, as a result, may adversely affect the Company and its growth and operations. Debt financing has inherent risks. At December 31, 2015, the Company had approximately \$5.3 billion of indebtedness (including \$525.3 million of variable rate indebtedness, of which \$225.0 million is subject to interest rate swaps effectively fixing the interest rate, and \$20.7 million is subject to interest rate cap protection). The Company is subject to the risks normally associated with debt financing, including the following:

- cash flow may not be sufficient to meet required payments of principal and interest;
- inability to refinance maturing indebtedness on encumbered apartment communities;
- inability to comply with debt covenants could cause defaults and an acceleration of maturity dates; and
- paying debt before the scheduled maturity date could result in prepayment penalties.

The Company may not be able to renew, repay or refinance its indebtedness when due or may be required to refinance its indebtedness at higher interest rates or on terms that may not be as favorable as the terms of existing indebtedness. If the Company is unable to refinance its indebtedness on acceptable terms, or not at all, the Company might be forced to dispose of one or more of its properties on disadvantageous terms, which might result in losses. Such losses could have an adverse effect on the Company and its ability to make distributions to its stockholders and pay amounts due on its debt. Furthermore, if a property is mortgaged to secure payment of indebtedness and the Company is unable to

meet mortgage payments, the mortgagee could foreclose on the property, appoint a receiver and exercise rights under an assignment of rents and leases, or pursue other remedies, all with a consequential loss of revenues and asset value. Foreclosures could also create taxable income without accompanying cash proceeds, thereby hindering our ability to meet REIT distribution requirements.

Debt financing of communities may result in insufficient cash flow to service debt and fund distributions. Where appropriate, the Company intends to continue to use leverage to increase the rate of return on the Company's investments and to provide for additional investments that the Company could not otherwise make. There is a risk that the cash flow from the

Table of Contents

communities will be insufficient to meet both debt payment obligations and the distribution requirements of the real estate investment trust provisions of the Internal Revenue Code of 1986, as amended (the "Code"). Our ability to make payments on and to refinance our indebtedness and to fund our operations, working capital and capital expenditures, depends on our ability to generate cash in the future. To a certain extent, our cash flow is subject to general economic, industry, regional, financial, competitive, operating, legislative, regulatory, taxation and other factors, many of which are beyond our control.

As of December 31, 2015, the Company had 69 consolidated communities encumbered by debt. With respect to the 69 communities encumbered by debt, all of them are secured by deeds of trust relating solely to those communities. The holders of this indebtedness will have rights with respect to these communities and, if debt payment obligations are not met, lenders may seek foreclosure of communities which would reduce the Company's income and net asset value, and its ability to service other debt.

Compliance requirements of tax-exempt financing and below market rent requirements may limit income from certain communities. At December 31, 2015, the Company had approximately \$281.7 million of variable rate tax-exempt financing. This tax-exempt financing provides for certain deed restrictions and restrictive covenants. The Company expects to engage in tax-exempt financings in the future. The Code and rules and regulations thereunder impose various restrictions, conditions and requirements in order to allow the note holder to exclude interest on qualified bond obligations from gross income for federal income tax purposes. The Code also requires that at least 20% of apartment units be made available to residents with gross incomes that do not exceed a specified percentage, generally 50%, of the median income for the applicable family size as determined by the Housing and Urban Development Department of the federal government. Certain state and local authorities may impose additional rental restrictions. These restrictions may limit income from the tax-exempt financed communities if the Company is required to lower rental rates to attract residents who satisfy the median income test. If the Company does not reserve the required number of apartment homes for residents satisfying these income requirements, the tax-exempt status of the bonds may be terminated, the obligations under the bond documents may be accelerated and the Company may be subject to additional contractual liability. Besides the limitations due to tax-exempt financing requirements, the income from certain communities may be limited due to below market rent ("BMR") requirements imposed by local authorities in connection with the original development of the community.

The indentures governing our notes and other financing arrangements contain restrictive covenants that limit our operating flexibility. The indentures that govern our publicly registered notes contain financial and operating covenants that, among other things, restrict our ability to take specific actions, even if we believe them to be in our best interest, including restrictions on our ability to:

- consummate a merger, consolidation or sale of all or substantially all of our assets; and
- incur additional secured and unsecured indebtedness.

The instruments governing our other unsecured indebtedness require us to meet specified financial covenants, including covenants relating to net worth, fixed charge coverage, debt service coverage, the amounts of total indebtedness and secured indebtedness, leverage and certain investment limitations. These covenants may restrict our ability to expand or fully pursue our business strategies. Our ability to comply with these provisions and those contained in the indentures governing the notes, may be affected by changes in our operating and financial performance, changes in general business and economic conditions, adverse regulatory developments or other events adversely impacting us. The breach of any of these covenants, including those contained in our indentures, could result in a default under our indebtedness, which could cause those and other obligations to become due and payable. If any of our indebtedness is accelerated, we may not be able to repay it.

Rising interest rates may affect the Company's costs of capital and financing activities and results of operation. Interest rates could increase, which could result in higher interest expense on the Company's variable rate indebtedness or increase interest rates when refinancing maturing fixed rate debt. Prolonged interest rate increases could negatively impact the Company's ability to make acquisitions and develop apartment communities with positive economic returns on investment and the Company's ability to refinance existing borrowings.

Interest rate hedging arrangements may result in losses. The Company from time to time uses interest rate swaps and interest rate caps contracts to manage certain interest rate risks. Although these agreements may partially protect against rising interest rates, they also may reduce the benefits to the Company if interest rates decline. If a hedging arrangement is not indexed to the same rate as the indebtedness that is hedged, the Company may be exposed to losses to the extent that the rate governing the indebtedness and the rate governing the hedging arrangement change independently of each other. Finally, nonperformance by the other party to the hedging arrangement may subject the Company to increased credit risks. In order to minimize counterparty credit risk, the Company enters into hedging arrangements only with investment grade financial institutions.

## Table of Contents

A downgrade in the Company's investment grade credit rating could materially and adversely affect its business and financial condition. The Company plans to manage its operations to maintain its investment grade credit rating with a capital structure consistent with its current profile, but there can be no assurance that it will be able to maintain its current credit ratings. Any downgrades in terms of ratings or outlook by any of the rating agencies could have a material adverse impact on the Company's cost and availability of capital, which could in turn have a material adverse impact on its financial condition, results of operations and liquidity.

Changes in the Company's financing policy may lead to higher levels of indebtedness. The Company's organizational documents do not limit the amount or percentage of indebtedness that may be incurred. The Company has adopted a policy of maintaining a limit on debt financing consistent with the existing covenants required to maintain the Company's unsecured line of credit bank facility, unsecured debt and senior unsecured bonds. Although pursuant to this policy the Company manages its debt to be in compliance with the debt covenants, the Company may increase the amount of outstanding debt at any time without a concurrent improvement in the Company's ability to service the additional debt. Accordingly, the Company could become more leveraged, resulting in an increased risk of default of its debt covenants or on its debt obligations and in an increase in debt service requirements. Any covenant breach or significant increase in the Company's leverage could materially adversely affect the Company's financial condition and ability to access debt and equity capital markets in the future.

If the Company or its subsidiaries defaults on an obligation to repay outstanding indebtedness when due, the default could trigger a cross-default or cross-acceleration under other indebtedness. If the Company or one of its subsidiaries defaults on its obligations to repay outstanding indebtedness, the default could cause a cross-default or cross-acceleration under other indebtedness. A default under the agreements governing the Company's or its subsidiaries' indebtedness, including a default under mortgage indebtedness, lines of credit, bank term loan, or the indenture for the Company's outstanding senior notes, that is not waived by the required lenders or holders of outstanding notes, could trigger cross-default or cross-acceleration provisions under one or more agreements governing the Company's indebtedness, which could cause an immediate default or allow the lenders to declare all funds borrowed thereunder to be due and payable.

### Risks Related to the Company in General and the Ownership of Essex's Stock

The Company depends on its key personnel, whose continued service is not guaranteed. The Company's success depends on its ability to attract and retain executive officers, senior officers and company managers. There is substantial competition for qualified personnel in the real estate industry and the loss of any of the Company's key personnel could have an adverse effect on the Company.

The price per share of the Company's stock may fluctuate significantly. The market price per share of the Company's common stock may fluctuate significantly in response to many factors, including without limitation:

- regional, national and global economic conditions;
- actual or anticipated variations in the Company's quarterly operating results or dividends;
- changes in the Company's funds from operations or earnings estimates;
- issuances of common stock, preferred stock or convertible debt securities;
- publication of research reports about the Company or the real estate industry;
- the general reputation of real estate investment trusts and the attractiveness of their equity securities in comparison to other equity securities (including securities issued by other real estate based companies);
- general stock and bond market conditions, including changes in interest rates on fixed income securities, that may lead prospective purchasers of the Company's stock to demand a higher annual yield from dividends;
- availability to capital markets and cost of capital;
- a change in analyst ratings or the Company's credit ratings;
- terrorist activity may adversely affect the markets in which the Company's securities trade, possibly increasing market volatility and causing erosion of business and consumer confidence and spending; and
- natural disasters such as earthquakes.

Many of the factors listed above are beyond the Company's control. These factors may cause the market price of shares of the Company's common stock to decline, regardless of the Company's financial condition, results of operations, or

business prospects.

The Company's future issuances of common stock, preferred stock or convertible debt securities could be dilutive to current stockholders and adversely affect the market price of the Company's common stock. In order to finance the Company's acquisition and development activities, the Company has issued and sold common stock, preferred stock and convertible debt securities. For example, during the years ended December 31, 2015 and 2014, the Company issued 1.5 million and 3.0 million

16

---

Table of Contents

(excluding shares issued in connection with the BRE merger) shares of common stock for \$332.3 million and \$534.0 million, net of fees and commissions, respectively. The Company may in the future sell further shares of common stock, including pursuant to its equity distribution programs with Cantor Fitzgerald & Co., Barclays Capital Inc., BMO Capital Markets Corp., BNP Paribas Securities Corp., Citigroup Global Markets Inc., Jefferies LLC ("Jefferies"), J.P. Morgan Securities LLC ("JP Morgan"), Liquidnet, Inc., Mitsubishi UFJ Securities (USA), Inc., and UBS Securities LLC ("UBS").

In 2014, the Company filed a new shelf registration statement with the SEC, allowing the Company to sell an undetermined number of equity and debt securities as defined in the prospectus. Future sales of common stock, preferred stock or convertible debt securities may dilute stockholder ownership in the Company and could adversely affect the market price of the common stock.

The Company's Chairman is involved in other real estate activities and investments, which may lead to conflicts of interest. The Company's Chairman, George M. Marcus is not an employee of the Company, and is involved in other real estate activities and investments, which may lead to conflicts of interest. Mr. Marcus owns interests in various other real estate-related businesses and investments. He is the Chairman of the Marcus & Millichap Company ("MMC"), which is a parent company of a diversified group of real estate service, investment and development firms. Mr. Marcus is also the Co-Chairman of Marcus & Millichap, Inc. ("MMI"), and Mr. Marcus owns a controlling interest in MMI. MMI is a national brokerage firm listed on the NYSE that underwent its initial public offering in 2013. Mr. Marcus has agreed not to divulge any confidential or proprietary information that may be received by him in his capacity as Chairman of the Company to any of his affiliated companies and that he will absent himself from any and all discussions by the Company's Board of Directors regarding any proposed acquisition and/or development of an apartment community where it appears that there may be a conflict of interest with any of his affiliated companies. Notwithstanding this agreement, Mr. Marcus and his affiliated entities may potentially compete with the Company in acquiring and/or developing apartment communities, which competition may be detrimental to the Company. In addition, due to such potential competition for real estate investments, Mr. Marcus and his affiliated entities may have a conflict of interest with the Company, which may be detrimental to the interests of the Company's stockholders. The influence of executive officers, directors and significant stockholders may be detrimental to holders of common stock. As of December 31, 2015, George M. Marcus, the Chairman of the Company's Board of Directors, wholly or partially owned approximately 1.6 million shares of common stock (including shares issuable upon exchange of limited partnership interests in the Operating Partnership and certain other partnerships, indirectly held shares of common stock and assuming exercise of all vested options). Mr. Marcus currently does not have majority control over the Company. However, he currently has, and likely will continue to have, significant influence with respect to the election of directors and approval or disapproval of significant corporate actions. Consequently, his influence could result in decisions that do not reflect the interests of all the Company's stockholders.

Under the partnership agreement of the Operating Partnership, the consent of the holders of limited partnership interests is generally required for certain amendments of the agreement and for certain extraordinary actions. Through their ownership of limited partnership interests and their positions with the Company, the Company's directors and executive officers, including Mr. Marcus, have substantial influence on the Company. Consequently, their influence could result in decisions that do not reflect the interests of all stockholders.

Our related party guidelines may not adequately address all of the issues that may arise with respect to related party transactions. The Company adopted "Related Party Transaction Approval Process Guidelines" that provide generally that any transaction in which a director or executive officer has an interest must have the prior approval of the Audit Committee of the Company's Board of Directors. The review and approval procedures in these guidelines are intended to determine whether a particular related party transaction is fair, reasonable and serves the interests of the Company's stockholders. Pursuant to these guidelines, related party transactions have been approved from time to time. There is no assurance that this policy will be adequate for determining whether a particular related party transaction is suitable and fair for the Company. Also, the policy's procedures may not identify and address all the potential issues and conflicts of interests with a related party transaction.

Failure to generate sufficient revenue or other liquidity needs could limit cash flow available for distributions to stockholders. A decrease in rental revenue, or liquidity needs such as the repayment of indebtedness or funding of our acquisition and development activities, could have an adverse effect on our ability to pay distributions to our stockholders. Significant expenditures associated with each community such as debt service payments, if any, real estate taxes, insurance and maintenance costs are generally not reduced when circumstances cause a reduction in income from a community.

## Table of Contents

The form, timing and/or amount of dividend distributions in future periods may vary and be impacted by economic and other considerations. The form, timing and/or amount of dividend distributions will be declared at the discretion of the Board of Directors and will depend on actual cash from operations, our financial condition, capital requirements, the annual distribution requirements under the REIT provisions of the Code and other factors as the Board of Directors may consider relevant. The Board of Directors may modify our dividend policy from time to time.

We may choose to pay dividends in our own stock, in which case stockholders may be required to pay tax in excess of the cash they receive. We may distribute taxable dividends that are payable in part in our stock. Taxable stockholders receiving such dividends will be required to include the full amount of the dividend as income to the extent of our current and accumulated earnings and profits for federal income tax purposes. As a result, a U.S. stockholder may be required to pay tax with respect to such dividends in excess of the cash received. If a U.S. stockholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to non-U.S. stockholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, the trading price of our stock would experience downward pressure if a significant number of our stockholders sell shares of our stock in order to pay taxes owed on dividends.

The voting rights of preferred stock may allow holders of preferred stock to impede actions that might otherwise benefit holders of common stock. Essex currently has outstanding shares of 7.125% Series H Cumulative Redeemable Preferred Stock (“Series H Preferred Stock”). In general, the holders of the Company’s outstanding shares of Series H Preferred Stock do not have any voting rights. However, if full distributions are not made on outstanding Series H Preferred Stock for six quarterly distributions periods, the holders of Series H Preferred Stock, together with holders of other series of preferred stock upon which like voting rights have been conferred, will have the right to elect two additional directors to serve on the Company’s Board of Directors.

These voting rights continue until all distributions in arrears and distributions for the current quarterly period on the Series H Preferred Stock have been paid in full. At that time, the holders of the Series H Preferred Stock are divested of these voting rights, and the term of office of the directors so elected immediately terminates. These voting rights of the holders of the Series H Preferred Stock, or that of holders of other preferred stock that the Company may issue in the future, may allow such holders to impede or prevent actions that would otherwise benefit the holders of the Company’s common stock.

The Maryland Business Combination Act may delay, defer or prevent a transaction or change in control of the Company that might involve a premium price for the Company’s stock or otherwise be in the best interest of our stockholders. Under the Maryland General Corporation Law, certain “business combinations” between a Maryland corporation and an interested stockholder or an affiliate of an interested stockholder are prohibited for five years after the most recent date on which the interested stockholder becomes an interested stockholder. These business combinations include a merger, consolidation, share exchange, or, in circumstances specified in the statute, an asset transfer or issuance or reclassification of equity securities. An interested stockholder is defined as any person (and certain affiliates of such person) who beneficially owns ten percent or more of the voting power of the then-outstanding voting stock of the corporation. The law also requires a two supermajority stockholder votes for such transactions. This means that the transaction must be approved by at least:

• 80% of the votes entitled to be cast by holders of outstanding voting shares; and

• Two-thirds of the votes entitled to be cast by holders of outstanding voting shares other than shares held by the interested stockholder with whom the business combination is to be effected.

The statute permits various exemptions from its provisions, including business combinations that are exempted by the board of directors prior to the time that the interested stockholder becomes an interested stockholder. These voting provisions do not apply if the stockholders receive a minimum price, as defined under the Maryland General Corporation Law. As permitted by the statute, the Board of Directors of the Company irrevocably has elected to

exempt any business combination among the Company, George M. Marcus, who is the chairman of the Company, and MMC or any entity owned or controlled by Mr. Marcus and MMC. Consequently, the five-year prohibition and supermajority vote requirements described above will not apply to any business combination between the Company, Mr. Marcus, or MMC. As a result, the Company may in the future enter into business combinations with Mr. Marcus and MMC, without compliance with the supermajority vote requirements and other provisions of the Maryland Business Combination Act.

Certain provisions contained in the Operating Partnership agreement, Charter and Bylaws, and certain provisions of the Maryland General Corporation Law could delay, defer or prevent a change in control. While the Company is the sole general partner of the Operating Partnership, and generally has full and exclusive responsibility and discretion in the management and control of the Operating Partnership, certain provisions of the Operating Partnership agreement place limitations on the Company's power to act with respect to the Operating Partnership. Such limitations could delay, defer or prevent a transaction or a change in control that might involve a premium price for the Company's stock or otherwise be in the

Table of Contents

best interests of its stockholders or that could otherwise adversely affect their interests. The partnership agreement provides that if the limited partners own at least 5% of the outstanding units of partnership interest in the Operating Partnership, the Company may not, without first obtaining the consent of a majority in interest of the limited partners in the Operating Partnership, transfer all or any portion of the Company's general partner interest in the Operating Partnership to another entity. Such limitations on the Company's power to act may result in the Company's being precluded from taking action that the Board of Directors otherwise believes is in the best interests of the Company or its stockholders.

The Company's Charter authorizes the issuance of additional shares of common stock or preferred stock and the setting of the preferences, rights and other terms of such stock without the approval of the holders of the common stock. The Company may establish one or more classes or series of stock that could delay, defer or prevent a transaction or a change in control. Such a transaction might involve a premium price for the Company's stock or otherwise be in the best interests of the holders of common stock. Also, such a class or series of stock could have dividend, voting or other rights that could adversely affect the interests of holders of common stock.

The Company's Charter contains provisions limiting the transferability and ownership of shares of capital stock, which may delay, defer or prevent a transaction or a change in control. For example, subject to receiving an exemption from the Board of Directors, potential acquirers may not purchase more than 6% in value of the stock (other than qualified pension trusts which can acquire 9.9%). This may discourage tender offers that may be attractive to the holders of common stock and limit the opportunity for stockholders to receive a premium for their shares of common stock.

The Maryland General Corporation Law restricts the voting rights of holders of shares deemed to be "control shares." Under the Maryland General Corporation Law, "control shares" are those which, when aggregated with any other shares held by the acquirer, entitle the acquirer to exercise voting power within specified ranges. Although the Bylaws exempt the Company from the control share provisions of the Maryland General Corporation Law, the Board of Directors may amend or eliminate the provisions of the Bylaws at any time in the future. Moreover, any such amendment or elimination of such provision of the Bylaws may result in the application of the control share provisions of the Maryland General Corporation Law not only to control shares which may be acquired in the future, but also to control shares previously acquired. If the provisions of the Bylaws are amended or eliminated, the control share provisions of the Maryland General Corporation Law could delay, defer or prevent a transaction or change in control that might involve a premium price for the stock or otherwise be in the best interests of the Company's stockholders.

The Company's Charter and Bylaws also contain other provisions that may impede various actions by stockholders without approval of the Company's Board of Directors, and that in turn may delay, defer or prevent a transaction, including a change in control that might involve a premium price for the stock or otherwise be in the best interests of the Company's stockholders. Those provisions include:

- directors may be removed by stockholders, without cause, only upon the affirmative vote of at least two-thirds of the votes entitled to be cast generally in the election of the directors, and with cause, only upon the affirmative vote of a majority of the votes entitled to be cast generally in the election of the directors;
- the Company's board can fix the number of directors and fill vacant directorships upon the vote of a majority of the directors;
- stockholders must give advance notice to nominate directors or propose business for consideration at a stockholders' meeting; and
- for stockholders to call a special meeting, the meeting must be requested by not less than a majority of all the votes entitled to be cast at the meeting.

A breach of the Company's privacy or information security systems could materially adversely affect the Company's business and financial condition. The protection of tenant, employee, and company data is critically important to the Company. Our business requires us, including some of our vendors, to use and store personally identifiable and other sensitive information of its tenants and employees. The collection and use of personally identifiable information is governed by federal and state laws and regulations. Privacy and information security laws continue to evolve and may be inconsistent from one jurisdiction to another. Compliance with all such laws and regulations may increase the

Company's operating costs and adversely impact the Company's ability to market the Company's properties and services.

The security measures put in place by the Company, and such vendors, cannot provide absolute security, and the Company and our vendors' information technology infrastructure may be vulnerable to criminal cyber-attacks or data security incidents due to employee error, malfeasance, or other vulnerabilities. Any such incident could compromise the Company's or such vendors' networks, and the information stored by the Company or such vendors could be accessed, misused, publicly disclosed,

## Table of Contents

corrupted, lost, or stolen, resulting in fraud, including wire fraud related to Company assets, or other harm. Moreover, if a data security incident or breach affects the Company's systems or such vendors' systems or results in the unauthorized release of personally identifiable information, the Company's reputation and brand could be materially damaged and the Company may be exposed to a risk of loss or litigation and possible liability, which could result in a material adverse effect on the Company's business, results of operations, and financial condition.

In the third quarter of 2014, the Company discovered and reported that certain of its computer networks containing personal and proprietary information were compromised by a cyber-intrusion. Based on information from our forensic investigation, the Company has confirmed that evidence exists of exfiltration of data on Company systems. The precise nature of the data has not been identified, and the Company does not presently have any evidence that data belonging to the Company has been misused.

After detecting unusual activity, the Company took immediate steps to assess and contain the intrusion and secure its systems. The Company retained independent forensic computer experts to analyze the impacted data systems and consulted with law enforcement.

As described in Note 16, "Commitments and Contingencies", of our notes to consolidated financial statements included in Part IV, Item 15 of this Annual Report on Form 10-K, on December 19, 2014, a putative class action was filed against the Company in the U.S. District Court for the Northern District of California, entitled *Foster v. Essex Property Trust, Inc.* alleging that the Company failed to properly secure the personally-identifying information of its residents. At this point, the Company is unable to predict the developments in, outcome of, and/or economic and/or other consequences of such pending litigation or future litigation or predict the developments in, outcome of, and/or other consequences arising as a result of any potential government inquiries related to this matter.

Privacy and information security risks have generally increased in recent years because of the proliferation of new technologies and the increased sophistication and activities of perpetrators of cyber-attacks. In light of this network intrusion we discovered in the third quarter of 2014, we have dedicated additional Company resources to strengthening the security of the Company's computer systems. In the future, the Company may be required to expend additional resources to continue to enhance the Company's information security measures and/or to investigate and remediate any information security vulnerabilities. Despite these steps, there can be no assurance that the Company will not suffer a similar data security incident in the future, that unauthorized parties will not gain access to sensitive data stored on the Company's systems, or that any such incident will be discovered in a timely manner. Further, the techniques used by criminals to obtain unauthorized access to sensitive data are often novel or change frequently; accordingly, the Company may be unable to anticipate these techniques or implement adequate preventative measures. Expanding social media vehicles present new risks. The use of social media could cause us to suffer brand damage or information leakage. Negative posts or comments about us on any social networking website could damage our reputation. In addition, employees or others might disclose non-public sensitive information relating to our business through external media channels. The continuing evolution of social media will present us with new challenges and risks.

Employee theft or fraud could result in loss. Certain of our employees have access to, or signature authority with respect to, bank accounts or other company assets, which exposes us to the risk of fraud or theft. In addition, certain employees have access to key information technology (IT) infrastructure and to tenant and other information that is commercially valuable. Should any employee compromise our IT systems, or misappropriate tenant or other information, we could incur losses, including significant financial or reputational harm, from which full recovery cannot be assured. We also may not have insurance that covers any losses in full or that covers losses from particular criminal acts. As of December 31, 2015, potential liabilities for theft or fraud are not quantifiable and an estimate of possible loss cannot be made.

Any material weaknesses identified in the Company's internal control over financial reporting could have an adverse effect on the Company's stock price. Section 404 of the Sarbanes-Oxley Act of 2002 requires the Company to evaluate and report on its internal control over financial reporting. If the Company identifies one or more material weaknesses in its internal control over financial reporting, the Company could lose investor confidence in the accuracy and completeness of its financial reports, which in turn could have an adverse effect on the Company's stock price.

Tax Risks

There are various U.S. tax risks in connection with an investment in the Company and in Essex Portfolio, L.P. The Company has elected to be taxed as a REIT under the Code. The Company's qualification as a REIT requires it to satisfy numerous annual and quarterly requirements, including income, asset and distribution tests, established under highly technical and complex Code provisions for which there are only limited judicial or administrative interpretations.

Table of Contents

To qualify under the income test, (i) at least 75% of the Company's annual gross income generally must be derived from rents from real property, mortgage interest, gain from the sale or other disposition of real property held for investment, dividends or other distributions on, and gain from the sale or other disposition of shares of other REITs and certain other limited categories of income and (ii) at least 95% of the Company's annual gross income generally must be derived from the preceding sources plus other dividends, interest other than mortgage interest, and gain from the sale or other disposition of stock and securities held for investment. To qualify under the asset test, at the end of each quarter, at least 75% of the value of the Company's assets must consist of cash, cash items, government securities and qualified real estate assets and there are significant additional limitations regarding the Company's investment in securities other than government securities and qualified real estate assets, including limitations on the percentage of our assets that can be represented by the Company's taxable REIT subsidiaries ("TRS's"). To qualify under the distribution test, the Company generally must distribute to its shareholders each calendar year at least 90% of its REIT taxable income, determined before a deduction for dividends paid and excluding any net capital gain. In addition, to the extent the Company satisfies the 90% test, but distributes less than 100% of its REIT taxable income, it will be subject to corporate income tax on such undistributed income and could be subject to an additional 4% excise tax. Because the Company needs to meet these tests to maintain its qualification as a REIT, it could cause the Company to have to forego certain business opportunities and potentially require the Company to liquidate otherwise attractive investments.

In addition to the income, asset and distribution tests described above, the Company's qualification as a REIT involves the determination of various factual matters and circumstances not entirely within the Company's control. Although the Company intends that its current organization and method of operation enable it to qualify as a REIT, it cannot assure you that it so qualifies or that it will be able to remain so qualified in the future. Future legislation, new regulations, administrative interpretations or court decisions (any of which could have retroactive effect) could adversely affect the Company's ability to qualify as a REIT or adversely affect the Company's stockholders. If the Company fails to qualify as a REIT in any taxable year, the Company would be subject to U.S. federal income tax (including any applicable alternative minimum tax) on the Company's taxable income at corporate rates, and the Company would not be allowed to deduct dividends paid to its stockholders in computing its taxable income. The Company would also be disqualified from treatment as a REIT for the four taxable years following the year in which the Company failed to qualify. The additional tax liability would reduce its net earnings available for investment or distribution to stockholders, and the Company would no longer be required to make distributions to its stockholders for the purpose of maintaining REIT status.

The Company has established several TRSs. The TRSs must pay U.S. federal income tax on their taxable income. While the Company will attempt to ensure that its dealings with its TRSs do not adversely affect its REIT qualification, it cannot provide assurances that it will successfully achieve that result. Furthermore, the Company may be subject to a 100% penalty tax, or its TRSs may be denied deductions, to the extent dealings between the Company and its TRSs are not deemed to be arm's length in nature. The Company intends that its dealings with its TRSs will be on an arm's length basis. No assurances can be given, however, that the Internal Revenue Service will not assert a contrary position.

The Company owns interests in multiple subsidiary REITs that have elected to be taxed as REITs under the Code. These subsidiary REITs are subject to the various REIT qualification requirements and other limitations that are applicable to the Company. If any of the Company's subsidiary REITs were to fail to qualify as a REIT, then (i) the subsidiary REIT would become subject to federal income tax and (ii) the Company's ownership of shares in such subsidiary REIT would cease to be a qualifying asset for purposes of the asset tests applicable to REITs. If any of the Company's subsidiary REITs were to fail to qualify as REITs, it is possible that the Company could also fail to qualify as a REIT.

From time to time, the Company may transfer or otherwise dispose of some of its properties. Under the Code, unless certain exceptions apply, any gain resulting from transfers of properties that the Company holds as inventory or primarily for sale to customers in the ordinary course of business could be treated as income from a prohibited transaction subject to a 100% penalty tax. Since the Company acquires properties for investment purposes, it does not believe that its occasional transfers or disposals of property should be treated as prohibited transactions. However,

whether property is held for investment purposes depends on all the facts and circumstances surrounding the particular transaction. The Internal Revenue Service may contend that certain transfers or disposals of properties by the Company are prohibited transactions. If the Internal Revenue Service were to argue successfully that a transfer or disposition of property constituted a prohibited transaction, then the Company would be required to pay a 100% penalty tax on any gain allocable to it from the prohibited transaction, and the Company's ability to retain proceeds from real property sales may be jeopardized. Income from a prohibited transaction might adversely affect the Company's ability to satisfy the income tests for qualification as a REIT for U.S. federal income tax purposes. Therefore, no assurances can be given that the Company will be able to satisfy the income tests for qualification as a REIT if the Company transferred or disposed of property in a transaction treated as a prohibited transaction. Dividends paid by REITs to U.S. stockholders that are individuals, trusts or estates are generally not eligible for the reduced tax rate applicable to qualified dividends received from non-REIT corporations (the maximum rate on qualified dividends is

Table of Contents

currently 23.8%). Rather, U.S. individual, trust or estate stockholders who receive dividends from a REIT that are not designated as capital gain dividends will be taxed on such dividends at ordinary income rates (at a current maximum rate of 43.4%). This may cause investors to view REIT investments to be less attractive than investments in non-REIT corporations, which in turn may adversely affect the value of stock in REITs, including the Company's stock. Non-U.S. investors that invest in the Company should be aware of the following U.S. federal income tax considerations in connection with such investment. First, distributions by the Company from its current and accumulated earnings and profits are subject to a 30% U.S. withholding tax in the hands of non-U.S. investors, unless the 30% is reduced by an applicable income tax treaty. Such distributions may also be subject to a 30% withholding tax under the "Foreign Account Tax Compliance Act" ("FATCA") unless a non-U.S. investor complies with certain requirements prescribed by FATCA. Second, distributions by the Company that are attributable to gains from dispositions of U.S. real property ("capital gain dividends") will be treated as income that is effectively connected with a U.S. trade or business in the hands of a non-U.S. investor, such that a non-U.S. investor will have U.S. federal income tax payment and filing obligations with respect to capital gain dividends. Furthermore, capital gain dividends may be subject to an additional 30% "branch profits tax" (which may be reduced by an applicable income tax treaty) in the hands of a non-U.S. investor that is a corporation. Third, any gain derived by a non-U.S. investor on a disposition of such investor's stock in the Company will subject such investor to U.S. federal income tax payment and filing requirements unless the Company is treated as a domestically-controlled REIT. A REIT is "domestically controlled" if less than 50% of the REIT's capital stock, by value, has been owned directly or indirectly by persons who are not qualifying U.S. persons during a continuous five-year period ending on the date of disposition or, if shorter, during the entire period of the REIT's existence. The Company believes that it is a domestically-controlled REIT, but no assurances can be given in this regard. Notwithstanding the foregoing, even if the Company were not a domestically-controlled REIT, under a special exception non-U.S. investors should not have U.S. federal income tax payment and filing obligations on capital gain dividends or a disposition of their stock in the Company if (i) they did not own more than 10% of such stock at any time during the one-year period ending on the date of the disposition, and (ii) the Company's stock continues to be regularly traded on an established securities market located in the United States and certain other non-U.S. investors may also not be subject to these payment and filing obligations. Non-U.S. investors should consult with their independent advisors as to the above U.S. tax considerations and other U.S. tax consequences of an investment in the Company's stock, in light of their particular circumstances.

The Company believes that its operating partnership, Essex Portfolio, L.P., will continue to be treated as a partnership for U.S. federal income tax purposes. As a partnership, Essex Portfolio, L.P. is not subject to U.S. federal income tax on its income. Instead, each of its partners is required to pay tax on the partner's allocable share of the income of Essex Portfolio, L.P. No assurances can be given, however, that the Internal Revenue Service will not challenge Essex Portfolio, L.P.'s status as a partnership for U.S. federal income tax purposes, or that a court would not sustain such a challenge. If the Internal Revenue Service were successful in treating Essex Portfolio, L.P. as a corporation for U.S. federal income tax purposes, the Company could fail to meet the income tests and/or the asset tests applicable to REITs and, accordingly, cease to qualify as a REIT. Also, the failure of Essex Portfolio, L.P. to qualify as a partnership would cause it to become subject to federal and state corporate income tax, which would reduce significantly the amount of cash available for distribution to its partners.

## Item 1B. Unresolved Staff Comments

None.

## Item 2. Properties

The Company's portfolio as of December 31, 2015 (including communities owned by unconsolidated joint ventures, but excluding communities underlying preferred equity investments) was comprised of 246 apartment communities (comprising 59,160 apartment homes), of which 28,039 apartment homes are located in Southern California, 18,924 apartment homes are located in the San Francisco Bay Area, and 12,197 apartment homes are located in the Seattle metropolitan area. The Company's apartment communities accounted for 99.3% of the Company's revenues for the

year ended December 31, 2015.

## Table of Contents

### Occupancy Rates

Financial occupancy is defined as the percentage resulting from dividing actual rental revenue by total potential rental revenue (actual rental revenue for occupied apartment homes plus market rent for vacant apartment homes). When calculating actual rents for occupied apartment homes and market rents for vacant apartment homes, delinquencies and concessions are not taken into account. Total possible rental revenue represents the value of all apartment homes, with occupied apartment homes valued at contractual rental rates pursuant to leases and vacant apartment homes valued at estimated market rents. The Company believes that financial occupancy is a meaningful measure of occupancy because it considers the value of each vacant unit at its estimated market rate. Financial occupancy may not completely reflect short-term trends in physical occupancy and financial occupancy rates and the Company's calculation of financial occupancy may not be comparable to financial occupancy as disclosed by other REITs. Market rates are determined using a variety of factors such as effective rental rates at the property based on recently signed leases and asking rates for comparable properties in the market. The recently signed effective rates at the property are used as the starting point in the determination of the market rates of vacant apartment homes. The Company then increases or decreases these rates based on the supply and demand in the apartment community's market. The Company will check the reasonableness of these rents based on its position within the market and compare the rents against the asking rents by comparable properties in the market.

For communities that are development properties in lease-up without stabilized occupancy figures, the Company believes the physical occupancy rate is the appropriate performance metric. While a community is in the lease-up phase, the Company's primary motivation is to stabilize the property which may entail the use of rent concessions and other incentives, and thus financial occupancy which is based on contractual revenue is not considered the best metric to quantify occupancy.

### Communities

The Company's communities are primarily suburban garden-style communities and town homes comprising multiple clusters of two and three-story buildings situated on three to fifteen acres of land. As of December 31, 2015, the Company's communities include 162 garden-style, 78 mid-rise, and 6 high-rise communities. The communities have an average of approximately 240 apartment homes, with a mix of studio, one, two and some three-bedroom apartment homes. A wide variety of amenities are available at the Company's communities, including covered parking, fireplaces, swimming pools, clubhouses with fitness facilities, volleyball and playground areas and tennis courts.

The Company hires, trains and supervises on-site service and maintenance personnel. The Company believes that the following primary factors enhance the Company's ability to retain tenants:

- located near employment centers;
- attractive communities that are well maintained; and
- proactive customer service.

### Commercial Buildings

The Company's former corporate headquarters was located in two office buildings with approximately 39,600 square feet located at 925/935 East Meadow Drive, Palo Alto, California and was classified as held for sale at December 31, 2015. The Company owns an office building with approximately 106,564 square feet located in Irvine, California, of which the Company occupies approximately 8,000 square feet at December 31, 2015. The Company owns Essex-Hollywood, a 34,000 square foot commercial building and a 138,915 square foot retail site in Santa Clara, California as future development sites that are currently 100% leased.

Edgar Filing: ESSEX PROPERTY TRUST INC - Form 10-K

The following tables describe the Company's operating portfolio as of December 31, 2015. The first table describes the Company's communities and the second table describes the Company's other real estate assets. (See Note 8 of the Company's consolidated financial statements for more information about the Company's secured mortgage debt and Schedule III for a list of secured mortgage loans related to the Company's portfolio.)

## Footnotes to the Company's Portfolio Listing as of December 31, 2015

- (1) Unless otherwise specified, the Company has a 100% ownership interest in each community. For communities, occupancy rates are based on financial occupancy for the year ended December 31, 2015; for the commercial buildings occupancy rates are based on physical occupancy as of December 31, 2015. For an explanation of how financial occupancy and physical occupancy are calculated, see "Properties-Occupancy Rates" in this Item 2.
- (2) The community is subject to a ground lease, which, unless extended, will expire in 2082. The Company holds a 1% special limited partner interest in the partnerships which own these apartment communities. These investments were made under arrangements whereby Essex Management Company became the 1% sole general partner and the other limited partners were granted the right to require the applicable partnership to redeem their interest for cash. Subject to certain conditions, the Company may, however, elect to deliver an equivalent number of shares of the Company's common stock in satisfaction of the applicable partnership's cash redemption obligation.
- (3) This community is owned by Wesco III. The Company has a 50% interest in Wesco III which is accounted for using the equity method of accounting.
- (4) This community is owned by Wesco I. The Company has a 50% interest in Wesco I which is accounted for using the equity method of accounting.
- (5) This community is subject to a ground lease, which, unless extended, will expire in 2067.
- (6) This community is subject to a ground lease, which, unless extended, will expire in 2027.

- (9) The Company has a 97% interest and an Executive Vice President of the Company has a 3% interest in this community.
- (10) The Company has a 75% member interest.
- (11) The community is subject to a ground lease, which, unless extended, will expire in 2028.
- (12) This community is subject to a ground lease, which, unless extended, will expire in 2030.
- (13) The community is being developed in three phases with one remaining phase currently under development.
- (14) A portion of this community on which 84 apartment homes are presently located is subject to a ground lease, which, unless extended, will expire in 2028.

Table of Contents

- (15) The community is subject to a ground lease, which, unless extended, will expire in 2070.
- (16) The Company has 50% ownership in each of these communities which is accounted for using the equity method of accounting.
- (17) The Company has 99% ownership in this community.
- (18) This property was the Company's previous headquarters until December 2015 and was unoccupied at December 31, 2015.
- (19) The property is leased through January 2016 to a single tenant.
- (20) The Company occupies 8% of space in this property.
- (21) This community is owned by BEXAEW. The Company has a 50% interest in BEXAEW which is accounted for using the equity method of accounting.
- (22) This community is owned by Wesco IV. The Company has a 50% interest in Wesco IV which is accounted for using the equity method of accounting.
- (23) The Company has a 55% ownership in this community which is accounted for using the equity method of accounting.

## Item 3. Legal Proceedings

The information, which regards lawsuits, other proceedings and claims, set forth in Note 16, "Commitments and Contingencies", of our notes to consolidated financial statements included in Part IV, Item 15 of this Annual Report on Form 10-K is incorporated by reference into this Item 3. In addition to such matters referred to in Note 16, the Company is subject to various other legal and/or regulatory proceedings arising in the course of its business operations. We believe that, with respect to such matters that we are currently a party to, the ultimate disposition of any such matter will not result in a material adverse effect on the Company's financial condition, results of operations or cash flows.

## Item 4. Mine Safety Disclosures

Not Applicable.

## Part II

## Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

## Market Information

The shares of the Company's common stock are traded on the New York Stock Exchange ("NYSE") under the symbol ESS. ESS common stock has been traded on the NYSE since June 13, 1994. The high, low and closing price per share of common stock reported on the NYSE for the quarters indicated are as follows:

Quarter Ended	High	Low	Close
December 31, 2015	\$244.71	\$214.29	\$239.41
September 30, 2015	\$232.20	\$205.72	\$223.42
June 30, 2015	\$231.90	\$208.85	\$212.50
March 31, 2015	\$243.17	\$207.26	\$229.90
December 31, 2014	\$214.43	\$176.70	\$206.60
September 30, 2014	\$196.08	\$177.68	\$178.75
June 30, 2014	\$185.99	\$164.76	\$184.91
March 31, 2014	\$173.01	\$141.79	\$170.05

The closing price of ESS stock as of February 22, 2016 was \$209.53.

There is no established public trading market for Essex Portfolio, L.P.'s OP Units.

#### Holders

The approximate number of holders of record of the shares of ESS common stock was 1,395 as of February 22, 2016. This number does not include stockholders whose shares are held in investment accounts by other entities. ESS believes the actual number of stockholders is greater than the number of holders of record.

Table of Contents

As of February 22, 2016, there were 172 holders of record of Essex Portfolio, L.P.'s OP Units, including ESS.

## Return of Capital

Under provisions of the Internal Revenue Code of 1986, as amended, the portion of the cash dividend, if any, that exceeds earnings and profits is considered a return of capital. The return of capital is generated due to a variety of factors, including the deduction of non-cash expenses, primarily depreciation, in the determination of earnings and profits.

The status of the cash dividends distributed for the years ended December 31, 2015, 2014, and 2013 related to common stock, and Series G and H preferred stock for tax purposes are as follows:

	2015	2014	2013	
Common Stock				
Ordinary income	99.28	% 70.03	% 77.34	%
Capital gain	0.72	% 21.95	% 17.64	%
Unrecaptured section 1250 capital gain	—	% 8.02	% 5.02	%
	100.00	% 100.00	% 100.00	%
	2015	2014	2013

	100.00	% 100.00	% 100.00	%

## Dividends and Distributions

Since ESS's initial public offering on June 13, 1994, ESS and the Operating Partnership have paid regular quarterly dividends/distributions to its stockholders and unitholders. ESS paid the following dividends per share of common stock and the Operating Partnership paid the following distributions per limited partner OP unit:

Year Ended	Annual Dividend/Distribution	Quarter Ended	2015	2014	2013
1995	\$ 1.69	March 31,	\$1.44	\$1.21	\$1.21
1996	\$ 1.72	June 30,	\$1.44	\$1.30	\$1.21
1997	\$ 1.77	September 30,	\$1.44	\$1.30	\$1.21
1998	\$ 1.95	December 31,	\$1.44	\$1.30	\$1.21
1999	\$ 2.15				
2000	\$ 2.38	Annual Dividend/Distribution	\$5.76	\$5.11	\$4.84
2001	\$ 2.80				
2002	\$ 3.08				
2003	\$ 3.12				
2004	\$ 3.16				
2005	\$ 3.24				
2006	\$ 3.36				
2007	\$ 3.72				
2008	\$ 4.08				
2009	\$ 4.12				
2010	\$ 4.13				

2011	\$ 4.16
2012	\$ 4.40

31

---

## Table of Contents

Future dividends/distributions by ESS and the Operating Partnership will be at the discretion of the Board of Directors of ESS and will depend on the actual cash flows from operations of the Company, its financial condition, capital requirements, the annual distribution requirements under the REIT provisions of the Internal Revenue Code, applicable legal restrictions and such other factors as the Board of Directors deem relevant. There are currently no contractual restrictions on ESS and the Operating Partnership present or future ability to pay dividends and distributions.

The Board of Directors has declared a dividend/distribution for the first quarter of 2016 of \$1.60 per share. The dividend/distribution will be payable on April 15, 2016 to shareholders/unitholders of record as of March 31, 2016.

### Dividend Reinvestment and Share Purchase Plan

ESS has adopted a dividend reinvestment and share purchase plan designed to provide holders of common stock with a convenient and economical means to reinvest all or a portion of their cash dividends in shares of common stock and to acquire additional shares of common stock through voluntary purchases. Computershare, LLC, which serves as ESS transfer agent, administers the dividend reinvestment and share purchase plan. For a copy of the plan, contact Computershare, LLC at (312) 360-5354.

### Securities Authorized for Issuance under Equity Compensation Plans

See the Company's disclosure in the 2016 Proxy Statement under the heading "Equity Compensation Plan Information", which disclosure is incorporated herein by reference.

### Issuance of Registered Equity Securities

During 2015, ESS sold 1,481,737 shares of common stock for proceeds of \$332.3 million, net of commissions, at an average price of \$226.46. Common stock sales were made pursuant to a registration statement and ESS used the net proceeds from the stock offerings to pay down debt, fund redevelopment and development pipelines, fund acquisitions, and for general corporate purposes. During the first quarter of 2016 through February 22, 2016, ESS has not issued any shares of common stock.

### Issuer Purchases of Equity Securities

In December 2015, ESS Board of Directors authorized a stock repurchase plan to allow ESS to acquire shares in an aggregate of up to \$250 million. The program supersedes the common stock repurchase plan that Essex announced on August 30, 2007. Under the previous stock repurchase plan, ESS repurchased and retired 816,659 shares totaling \$66.6 million at an average stock price of \$81.56 per share, including commissions.

### Performance Graph

The line graph below compares the cumulative total stockholder return on ESS common stock for the last five years with the cumulative total return on the S&P 500 and the NAREIT All Equity REIT index over the same period. This comparison assumes that the value of the investment in the common stock and each index was \$100 on December 31, 2010 and that all dividends were reinvested (1).

#### Unregistered Sales of Equity Securities

During the years ended December 31, 2015 and 2014, the Operating Partnership issued partnership units in private placements in reliance on the exemption from registration provided by Section 4(2) of the Securities Act, in the amounts and for the consideration set forth below:

During the year ended December 31, 2015 and 2014, ESS issued an aggregate of 203,556 and 185,387 shares of its common stock upon the exercise of stock options, respectively. ESS contributed the proceeds from the option exercises of \$26.5 million and \$11.0 million to our Operating Partnership in exchange for an aggregate of 203,556 and 185,387 common OP Units, as required by the Operating Partnership’s partnership agreement, respectively.

During the year ended December 31, 2015 and 2014, ESS issued an aggregate of 22,939 and 126,931 shares of its common stock in connection with restricted stock awards for no cash consideration, respectively. For each share of common stock issued

Table of Contents

by ESS in connection with such awards, our Operating Partnership issued common OP units to ESS as required by the partnership agreement, for an aggregate of 22,939 and 126,931 units during the year ended December 31, 2015 and 2014, respectively.

During the years ended December 31, 2015 and 2014, ESS issued and sold an aggregate of 1,481,737 and 2,964,315 shares of its common stock, respectively, pursuant to a registration statement and its equity distribution program. ESS contributed the net proceeds from these share issuances of \$332.3 million and \$534.0 million in exchange for an aggregate of 1,481,737 and 2,964,315 common OP Units, respectively, as required by the Operating Partnership's partnership agreement.

## Item 6. Selected Financial Data

The following tables set forth summary financial and operating information for the ESS and the Operating Partnership from January 1, 2011 through December 31, 2015.

<sup>(1)</sup> FFO is a financial measure that is commonly used in the REIT industry. The Company presents funds from operations as a supplemental operating performance measure. FFO is not used by the Company, nor should it be considered to be, as an alternative to net earnings computed under GAAP as an indicator of the Company's operating performance or as an alternative to cash from operating activities computed under GAAP as an indicator

of the Company's ability to fund its cash needs.

FFO is not meant to represent a comprehensive system of financial reporting and does not present, nor does it intend to present, a complete picture of the Company's financial condition and operating performance. The Company believes that net earnings computed under GAAP remain the primary measure of performance and that FFO is only meaningful when it is used in conjunction with net earnings. The Company considers FFO and FFO excluding non-routine items (referred to as

Table of Contents

“Core FFO”) to be useful financial performance measurements of an equity REIT because, together with net income and cash flows, FFO provides investors with an additional basis to evaluate operating performance and ability of a REIT to incur and service debt and to fund acquisitions and other capital expenditures and its ability to pay dividends. Further, the Company believes that its consolidated financial statements, prepared in accordance with GAAP, provide the most meaningful picture of its financial condition and its operating performance.

In calculating FFO, the Company follows the definition for this measure published by the National Association of Real Estate Investment Trusts (“NAREIT”), which is a REIT trade association. The Company believes that, under the NAREIT FFO definition, the three most significant adjustments made to net income are (i) the exclusion of historical cost depreciation, (ii) the exclusion of gains and losses from the sale of previously depreciated properties and (iii) the exclusion of impairment losses on depreciated properties. Essex agrees that these three NAREIT adjustments are useful to investors for the following reasons:

- historical cost accounting for real estate assets in accordance with GAAP assumes, through depreciation charges, that the value of real estate assets diminishes predictably over time. NAREIT stated in its White Paper on Funds from Operations “since real estate asset values have historically risen or fallen with market conditions, many (a) industry investors have considered presentations of operating results for real estate companies that use historical cost accounting to be insufficient by themselves.” Consequently, NAREIT’s definition of FFO reflects the fact that real estate, as an asset class, generally appreciates over time and depreciation charges required by GAAP do not reflect the underlying economic realities.
- REITs were created as a legal form of organization in order to encourage public ownership of real estate as an asset class through investment in firms that were in the business of long-term ownership and management of real estate.
- (b) The exclusion, in NAREIT’s definition of FFO, of gains from the sales and impairment losses of previously depreciated operating real estate assets allows investors and analysts to readily identify the operating results of the long-term assets that form the core of a REIT’s activity and assists in comparing those operating results between periods.

Management has consistently applied the NAREIT definition of FFO to all periods presented. However, other REITs in calculating FFO may vary from the NAREIT definition for this measure, and thus their disclosure of FFO may not be comparable to the Company’s calculation.

- (2) Other items, net are non-recurring in nature and include items such as gains on non-operating assets and tax related items.
- Assumes conversion of all dilutive outstanding operating partnership interests in the Operating Partnership and
- (3) excludes 744,346 DownREIT units for which the Operating Partnership has the ability and intention to redeem the DownREIT limited partnership units for cash and does not consider them to be common stock equivalents.

## Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the accompanying consolidated financial statements and notes thereto. These consolidated financial statements include all adjustments which are, in the opinion of management, necessary to reflect a fair statement of the results and all such adjustments are of a normal recurring nature.

## OVERVIEW

ESS is a self-administered and self-managed REIT that acquires, develops, redevelops and manages apartment communities in selected residential areas located primarily in the West Coast of the United States. ESS owns all of its interests in its real estate investments, directly or indirectly, through the Operating Partnership. ESS is the sole general partner of the Operating Partnership and, as of December 31, 2015, had an approximately 96.7% general partner interest in the Operating Partnership.

The Company's investment strategy has two components: constant monitoring of existing markets, and evaluation of new markets to identify areas with the characteristics that underlie rental growth. The Company's strong financial condition supports its investment strategy by enhancing its ability to quickly shift acquisition, development, redevelopment, and disposition activities to markets that will optimize the performance of the portfolio.

As of December 31, 2015, the Company had ownership interests in 246 communities, comprising 59,160 apartment homes.

The Company's apartment communities are predominately located in the following major regions:

Southern California (Los Angeles, Orange, San Diego, and Ventura counties)

Northern California (the San Francisco Bay Area)

Seattle Metro (Seattle metropolitan area)

As of December 31, 2015, the Company's development pipeline was comprised of two consolidated projects under development, six unconsolidated joint venture projects under development and various consolidated predevelopment projects aggregating 2,447 apartment homes, with total incurred costs of \$0.7 billion, and estimated remaining project costs of approximately \$0.8 billion for total estimated project costs of \$1.4 billion.

As of December 31, 2015, the Company also had ownership interests in four commercial buildings (with approximately 319,079 square feet).

By region, the Company's operating results for 2015 and 2014 and projections for 2016 new housing supply (defined as new multi-family apartment homes and single family homes, excluding developments with fewer than 100 apartment homes as well as senior and student housing), job growth, and rental income are as follows:

**Southern California Region:** As of December 31, 2015, this region represented 49% of the Company's consolidated apartment homes. Revenues for "2015/2014 Same-Properties" (as defined below), or "Same-Property revenues," increased 6.0% in 2015 as compared to 2014. In 2016, the Company projects new residential supply of 30,300 apartment homes and single family homes, which represents 0.5% of the total housing stock. The Company assumes an increase of 168,050 jobs or 2.2%, and an increase in Same-Property revenues of between 5.25% to 6.25% in 2016.

**Northern California Region:** As of December 31, 2015, this region represented 30% of the Company's consolidated apartment homes. Same-Property revenues increased 10.5% in 2015 as compared to 2014. In 2016, the Company projects new residential supply of 18,300 apartment homes and single family homes, which represents 0.8% of the total housing stock. The Company assumes an increase of 95,300 jobs or 2.9%, and an increase in Same-Property revenues of between 8.50% to 9.50% in 2016.

Seattle Metro Region: As of December 31, 2015, this region represented 21% of the Company's consolidated apartment homes. Same-Property revenues increased 7.7% in 2015 as compared to 2014. In 2016, the Company projects new residential supply of 16,050 apartment homes and single family homes, which represents 1.3% of the total housing stock. The Company assumes an increase of 43,100 jobs or 2.7%, and an increase in Same-Property revenues of between 6.00% to 7.00% in 2016.

The Company projects 2016 Same-Property revenues to increase compared to 2015 results, as renewal and new leases are signed at higher rents in 2016 than 2015. Same-Property operating expenses are expected to increase in 2016 by 3.25% to 4.25%.

Table of Contents

The Company's consolidated communities are as follows:

	As of December 31, 2015		As of December 31, 2014		
	Apartment Homes	%	Apartment Homes	%	%
Southern California	23,707	49	% 22,168	47	%
Northern California	14,694	30	% 14,789	31	%

Arizona	—	—	% 552	1	%
Total	48,640	100	% 47,725	100	%

Co-investments, including Wesco I, LLC ("Wesco I"), Wesco III, LLC ("Wesco III"), Wesco IV, LLC ("Wesco IV"), Canadian Pension Plan Investment Board ("CPPIB" or "CPP"), Palm Valley and BEXAEW, LLC ("BEXAEW") communities, developments under construction and preferred equity interest co-investment communities are not included in the table presented above for both periods.

## RESULTS OF OPERATIONS

Comparison of Year Ended December 31, 2015 to the Year Ended December 31, 2014

The Company's average financial occupancies for the Company's stabilized apartment communities or "2015/2014 Same-Properties" (stabilized properties consolidated by the Company for the years ended December 31, 2015 and 2014) was unchanged at 96.2% in both 2015 and 2014. Financial occupancy is defined as the percentage resulting from dividing actual rental revenue by total potential rental revenue (actual rental revenue for occupied apartment homes plus market rent for vacant apartment homes). Actual rental revenue represents contractual rental revenue pursuant to leases without considering delinquency and concessions. Total potential rental revenue represents the value of all apartment homes, with occupied apartment homes valued at contractual rental rates pursuant to leases and vacant apartment homes valued at estimated market rents. We believe that financial occupancy is a meaningful measure of occupancy because it considers the value of each vacant unit at its estimated market rate.

Market rates are determined using the recently signed effective rates on new leases at the property and are used as the starting point in the determination of the market rates of vacant apartment homes. The Company may increase or decrease these rates based on the supply and demand in the apartment community's market. The Company will check the reasonableness of these rents based on its position within the market and compare the rents against the asking rents by comparable properties in the market. Financial occupancy may not completely reflect short-term trends in physical occupancy and financial occupancy rates and the Company's calculation of financial occupancy may not be comparable to financial occupancy as disclosed by other REITs.

The Company does not take into account delinquency and concessions to calculate actual rent for occupied apartment homes and market rents for vacant apartment homes. The calculation of financial occupancy compares contractual rates for occupied apartment homes to estimated market rents for unoccupied apartment homes, and thus the calculation compares the gross value of all apartment homes excluding delinquency and concessions. For apartment communities that are development properties in lease-up without stabilized occupancy figures, the Company believes the physical occupancy rate is the appropriate performance metric. While an apartment community is in the lease-up phase, the Company's primary motivation is to stabilize the property which may entail the use of rent concessions and other incentives, and thus financial occupancy, which is based on contractual revenue is not considered the best metric to quantify occupancy.

Table of Contents

The regional breakdown of the Company's 2015/2014 Same-Property portfolio for financial occupancy for the years ended December 31, 2015 and 2014 is as follows:

	Years ended			
	December 31,			
	2015	2014		
Southern California	96.2	% 96.3		%
Northern California	96.3	% 96.2		%
Seattle Metro	96.2	% 96.0		%

The following table provides a breakdown of revenue amounts, including the revenues attributable to 2015/2014 Same-Properties.

Property Revenues (\$ in thousands)	Number of Properties	Years Ended December 31,		Dollar Change	Percentage Change	
		2015	2014			
2015/2014 Same-Properties: <sup>(1)</sup>						
Southern California	58	\$283,435	\$267,413	\$16,022	6.0	%
Northern California	37	250,478	226,679	\$23,799	10.5	%
Seattle Metro	34	124,143	115,219	8,924	7.7	%
Total 2015/2014 Same-Property revenues	129	658,056	609,311	48,745	8.0	%
2015/2014 Non-Same Property Revenues		527,442	352,280	175,162	49.7	%
Total property revenues		\$1,185,498	\$961,591	\$223,907	23.3	%

<sup>(1)</sup> Same-property excludes BRE properties acquired April 1, 2014 and properties held for sale.

2015/2014 Same-Property Revenues increased by \$48.7 million or 8.0% to \$658.1 million for 2015 compared to \$609.3 million in 2014. The increase was primarily attributable to an increase of 8.1% in average rental rates from \$1,741 per apartment home for 2014 to \$1,882 per apartment home for 2015.

2015/2014 Non-Same Property Revenues increased by \$175.2 million or 49.7% to \$527.4 million in 2015 compared to \$352.3 million in 2014. The increase was primarily due to the BRE merger and the acquisition or consolidation of ten communities, net of dispositions and properties held for sale, since January 1, 2014.

Property operating expenses, excluding real estate taxes increased \$30.3 million or 14.8% in 2015 compared to 2014, primarily due to the BRE merger and the acquisition or consolidation of ten communities, net of dispositions and properties held for sale, since January 1, 2014. 2015/2014 Same-Property operating expenses excluding real estate taxes, increased by \$2.3 million or 1.7% in 2015 compared to 2014, due mainly to a \$1.7 million increase in repairs and maintenance.

Real estate taxes increased \$20.7 million or 19.2% in 2015 compared to 2014, due primarily due to the BRE merger and the acquisition or consolidation of ten communities, net of dispositions and held for sale, since January 1, 2014. 2015/2014 Same-Property real estate taxes increased by \$1.7 million or 3.2% for 2015 compared to 2014.

Depreciation and amortization expense increased by \$92.8 million or 25.7% in 2015 compared to 2014, primarily due to the BRE merger and the acquisition or consolidation of ten communities, net of dispositions and properties held for sale, since January 1, 2014.

Merger and integration expenses include, but are not limited to, advisor fees, legal fees, and accounting fees related to the merger with BRE and related integration activity. The Company completed the merger with BRE on April 1, 2014. Merger and integration expenses were \$3.8 million for 2015 and \$53.5 million for 2014.

Interest expense increased \$40.3 million or 24.5% in 2015, due to an increase in average outstanding debt primarily due to assumed debt in connection with the BRE merger in addition to a \$6.8 million decrease in capitalized interest in 2015 compared to 2014, which was due to a decrease in development costs as compared to the same period in 2014.

Table of Contents

Total return swap income of \$5.7 million in 2015 consists of monthly settlements related to the Company's total return swap contracts that were entered into during the year, in connection with \$257.3 million of tax-exempt mortgage notes payable. The Company had no total return swap income in 2014.

Interest and other income increased \$7.3 million or 62.1% in 2015, due to an increase in the investment of mortgage backed securities, an increase of \$3.1 million in insurance proceeds and \$0.6 million in income from the sale of an investment.

Equity income from co-investments decreased by \$18.0 million to \$21.9 million in 2015 compared to \$39.9 million in 2014, primarily due to events in 2014 which did not recur in 2015, including the Company's share of the gain on the sale of two co-investment communities of \$6.6 million, promote income of \$10.6 million, and income from the early redemption of preferred equity investments of \$5.3 million in 2014, partially offset by \$2.0 million in income from the early redemption of two preferred equity investments during 2015 and an increase of \$7.4 million in equity income from co-investment operations. Additionally, income from preferred equity investments decreased by approximately \$5.1 million from 2014 to 2015.

Gains on sale of real estate and land increased by \$1.3 million or 2.8% in 2015 compared to 2014, due primarily to \$7.1 million in gains on the sales of Pinnacle South Mountain and two commercial buildings as well as a \$40.2 million gain on the sale of Sharon Green during 2015 as compared to approximately \$16.8 million in gains on the sales of Vista Capri North, Coldwater Canyon, Pinnacle Town Center, and a land parcel adjacent to the Company's Park Viridian property, as well as a \$29.2 million gain on the sale of Mt. Sutro during 2014.

Gains on remeasurement of co-investment increased by \$34.0 million in 2015 compared to 2014, due to the remeasurement of the Company's investments, as a result of the Company's acquisition of a controlling interest in The Huxley and The Dylan properties, resulting in a gain of \$21.3 million, and Reveal, resulting in a gain of \$12.7 million.

#### Comparison of Year Ended December 31, 2014 to the Year Ended December 31, 2013

The Company's average financial occupancies for the Company's stabilized apartment communities for "2014/2013 Same-Properties" (stabilized properties consolidated by the Company for the years ended December 31, 2014 and 2013) increased 10 basis points to 96.2% in 2014 from 96.1% in 2013. The regional breakdown of the Company's stabilized 2014/2013 Same-Property portfolio for financial occupancy for the years ended December 31, 2014 and 2013 is as follows:

	Years ended December 31,			
	2014	2013		
Southern California	96.3	% 96.1		%
Northern California	96.3	% 96.1		%
Seattle Metro	96.0	% 96.1		%

The following table provides a breakdown of revenue amounts, including the revenues attributable to 2014/2013 Same-Properties.

Property Revenues (\$ in thousands) 2014/2013 Same-Properties:	Number of Properties	Years Ended December 31,		Dollar Change	Percentage Change
		2014	2013		

Edgar Filing: ESSEX PROPERTY TRUST INC - Form 10-K

Southern California	58	\$267,413	\$253,503	\$13,910	5.5	%
Northern California	35	218,577	199,395	19,182	9.6	%
Seattle Metro	29	115,219	107,225	7,994	7.5	%
Total 2014/2013 Same-Property revenues	122	601,209	560,123	41,086	7.3	%
2014/2013 Non-Same Property Revenues <sup>(1)</sup>		80,059	43,204	36,855	85.3	%
2014 BRE Legacy Property Revenues <sup>(2)</sup>		280,323	—	280,323		
Total property revenues		\$961,591	\$603,327	\$358,264	59.4	%

Table of Contents

- (1) Includes eleven communities acquired after January 1, 2013, three sold communities and one redevelopment community.
- (2) Includes 55 stabilized properties acquired in connection with the BRE merger on April 1, 2014, and two development communities in lease-up.

2014/2013 Same-Property Revenues increased by \$41.1 million or 7.3% to \$601.2 million for 2014 compared to \$560.1 million in 2013. The increase was primarily attributable to an increase in scheduled rents of \$39.1 million as reflected in an increase of 7.1% in average rental rates from \$1,619 per unit for 2013 to \$1,734 per unit for 2014. Scheduled rents increased in all regions by 5.2%, 9.5%, and 7.4% in Southern California, Northern California, and Seattle Metro, respectively. Income from utility billings and other income increased by \$2.2 million and \$1.1 million, respectively in 2014 compared to 2013. Financial occupancy increased 10 basis points in 2014 to 96.2% compared to 96.1% in 2013.

2014/2013 Non-Same Property Revenues increased by \$36.9 million or 85.3% to \$80.1 million in 2014 compared to \$43.2 million to 2013. The increase was primarily due to revenue generated from eleven communities acquired or consolidated since January 1, 2013.

Management and other fees from affiliates increased \$2.0 million or 28.7% to \$9.3 million in 2013 compared to \$7.3 million in 2012. The increase is primarily due to the asset and property management fees earned from the Wesco III, Wesco IV, and BEXAEW co-investments formed during 2014. The increase in management fees was offset by a reduction of \$1.2 million in asset and property management fees from the sale of two Essex Apartment Value Fund II, L.P. ("Fund II") communities in 2014.

Property operating expenses, excluding real estate taxes increased \$64.6 million or 46.1% in 2014 compared to 2013, primarily due to properties acquired in connection with the BRE merger and six other communities in 2014. 2014/2013 Same-Property operating expenses excluding real estate taxes, increased by \$3.8 million or 3.0% in 2014 compared to 2013, due mainly to a \$1.6 million increase in repairs and maintenance and a \$1.3 million increase in utilities expense.

Real estate taxes increased \$50.6 million or 88.3% in 2014 compared to 2013, due primarily to properties acquired in connection with the BRE merger and six other communities in 2014. 2014/2013 Same-Property real estate taxes increased by \$2.3 million or 4.5% for 2014 compared to 2013 due to a \$1.6 million or 15.6% increase in property taxes for Seattle Metro due to higher assessed values for 2014.

Depreciation and amortization expense increased by \$168.2 million or 87.4% in 2014 compared to 2013, due to the acquisition of BRE and six other communities. The increase is also due to the capitalization of approximately \$313.1 million in additions to rental properties through 2013, including \$152.8 million spent on acquisition of and additions to real estate under development, \$81.4 million spent on redevelopment, and \$78.9 million spent on capital expenditures on rental properties. Approximately \$122.0 million in additions to rental properties were capitalized for 2012, including \$17.8 million spent on acquisitions of and additions to real estate under development, \$47.3 million spent on redevelopment, and \$56.9 million spent on capital expenditures on rental properties.

General and administrative expense increased \$14.2 million or 53.2% in 2014 compared to 2013 primarily due to additional corporate employees from the BRE merger and \$2.8 million in expenses related to the cyber-intrusion.

Merger and integration expenses include, but are not limited to, advisor fees, legal fees, and accounting fees related to the BRE merger. The Company completed the merger with BRE on April 1, 2014. Merger and integration expenses were \$53.5 million for 2014 and \$4.3 million for 2013.

Interest expense increased \$48.0 million or 41.2% in 2014, primarily due to additional debt assumed as part of the BRE merger, offset by an increase in capitalized interest from development and redevelopment projects.

Equity income from co-investments decreased by \$16.0 million to \$39.9 million in 2014 compared to \$55.9 million in 2013. The decrease was primarily due to the Company's share of the gain on the sale of two Fund II communities of \$6.6 million, promote income of \$10.6 million, and income from early redemption of preferred equity investments of \$5.3 million in 2014, compared to the Company's share of gain on the sale of five Fund II communities of \$38.8 million, net of internal dispositions costs in 2013.

Table of Contents

## Liquidity and Capital Resources

The following table sets forth the Company's cash flows for 2015, 2014 and 2013 (\$ in thousands):

	For the year ended December 31,		
	2015	2014	2013
Cash flow provided by (used in):			
Operating activities	\$617,410	\$493,312	\$304,982
Investing activities	\$(725,556 )	\$(1,147,156)	\$(453,696 )
Financing activities	\$108,214	\$520,610	\$148,599

ESS's business is operated primarily through the Operating Partnership. ESS issues public equity from time to time, but does not otherwise generate any capital itself or conduct any business itself, other than incurring certain expenses in operating as a public company which are fully reimbursed by the Operating Partnership. ESS itself does not hold any indebtedness, and its only material asset is its ownership of partnership interests of the Operating Partnership. ESS's principal funding requirement is the payment of dividends on its common stock and preferred stock. ESS's sole source of funding for its dividend payments is distributions it receives from the Operating Partnership.

As of December 31, 2015, ESS owned a 96.7% general partner interest and the limited partners owned the remaining 3.3% interest in the Operating Partnership.

The liquidity of ESS is dependent on the Operating Partnership's ability to make sufficient distributions to ESS. The primary cash requirement of ESS is its payment of dividends to its stockholders. ESS also guarantees some of the Operating Partnership's debt, as discussed further in Notes 7 and 8 of the notes to consolidated financial statements included elsewhere herein. If the Operating Partnership fails to fulfill certain of its debt requirements, which trigger the ESS's guarantee obligations, then ESS will be required to fulfill its cash payment commitments under such guarantees. However, ESS's only significant asset is its investment in the Operating Partnership.

For ESS to maintain its qualification as a REIT, it must pay dividends to its stockholders aggregating annually at least 90% of its REIT taxable income, excluding net capital gains. While historically ESS has satisfied this distribution requirement by making cash distributions to its stockholders, it may choose to satisfy this requirement by making distributions of cash or other property, including, in limited circumstances, ESS's own stock. As a result of this distribution requirement, the Operating Partnership cannot rely on retained earnings to fund its ongoing operations to the same extent that other companies whose parent companies are not REITs can. ESS may need to continue to raise capital in the equity markets to fund the Operating Partnership's working capital needs, acquisitions and developments.

At December 31, 2015, the Company had \$29.7 million of unrestricted cash and cash equivalents and \$137.5 million in marketable securities, of which \$57.1 million were held available for sale. The Company believes that cash flows generated by its operations, existing cash and cash equivalents, marketable securities balances, availability under existing lines of credit, access to capital markets and the ability to generate cash from the disposition of real estate are sufficient to meet all of the Company's reasonably anticipated cash needs during 2016. The timing, source and amounts of cash flows provided by financing activities and used in investing activities are sensitive to changes in interest rates and other fluctuations in the capital markets environment, which can affect the Company's plans for acquisitions, dispositions, development and redevelopment activities.

As of December 31, 2015, the Company had \$465.0 million of private placement unsecured bonds outstanding at an average interest rate of 4.5% with maturity dates ranging from March 2016 through August 2021. In January 2016, \$150.0 million of these bonds bearing an interest rate of 4.36% were repaid.

As of December 31, 2015, the Company had \$2.4 billion of fixed rate public bonds, net of unamortized premiums, discounts and debt issuance costs, with interest rates varying from 3.25% to 5.50% and maturity dates ranging from 2017 to 2025.

As of December 31, 2015, the Company had a \$225.0 million unsecured term loan outstanding that has a variable interest rate of LIBOR plus 1.05%. The Company has entered into interest rate swap contracts for a term of five years with a notional amount totaling \$225.0 million, which effectively converted the interest rate on \$225.0 million of the term loan to a fixed rate of 2.4%. The \$200 million tranche of this unsecured term loan has a maturity date of November 2016 and the \$25 million tranche has a maturity date of August 2017.

## Table of Contents

As of December 31, 2015, the Company's mortgage notes payable totaled \$2.2 billion, net of unamortized premiums and debt issuance costs, which consisted of \$1.9 billion in fixed rate debt with interest rates varying from 4.3% to 6.4% and maturity dates ranging from 2016 to 2021 and \$281.7 million of tax-exempt variable rate demand notes with a weighted average interest rate of 1.2%. The tax-exempt variable rate demand notes have maturity dates ranging from 2025 to 2040, and \$20.7 million is subject to interest rate caps and \$257.3 million is subject to total return swaps.

The Company has two lines of credit aggregating \$1.03 billion as of December 31, 2015 including a \$1.0 billion unsecured line of credit. As of December 31, 2015, there was a \$15.0 million balance on this unsecured line of credit with an underlying interest rate of LIBOR plus 0.95%. In January 2016, the facility maturity date was extended to December 31, 2019 with one 18-month extension, exercisable by the Company, with an underlying interest rate of LIBOR plus 0.90%. The Company also has a \$25.0 million working capital unsecured line of credit agreement. As of December 31, 2015, there were no amounts outstanding on this unsecured line with an underlying interest rate of LIBOR plus 0.95%. In January 2016 the maturity date was extended to January 2018 and the interest rate was lowered to LIBOR plus 0.90%.

The Company's unsecured line of credit and unsecured debt agreements contain debt covenants related to limitations on indebtedness and liabilities and maintenance of minimum levels of consolidated earnings before depreciation, interest and amortization. The Company was in compliance with the debt covenants as of December 31, 2015 and 2014.

The Company pays quarterly dividends from cash available for distribution. Until it is distributed, cash available for distribution is invested by the Company primarily in investment grade securities held available for sale or is used by the Company to reduce balances outstanding under its line of credit.

The Company has benefited from borrowing from Fannie Mae and Freddie Mac, and there are no assurances that these entities will lend to the Company in the future. To the extent that the Company's access to capital and credit is at a higher cost than the Company has experienced in recent years (reflected in higher interest rates for debt financing or a lower stock price for equity financing) the Company's ability to make acquisitions, develop communities, obtain new financing, and refinance existing borrowing at competitive rates could be adversely impacted. For the past three years the Company has primarily issued unsecured debt and repaid secured debt when it has matured to place less reliance on mortgage debt financing, and to unencumber more of the Company's communities.

## Derivative Activity

The Company uses interest rate swaps, interest rate cap, and total return swap contracts to manage certain interest rate risks. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves. The fair values of interest rate swaps and total return swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The variable cash payments (or receipts) are based on an expectation of future interest rates (forward curves) derived from observable market interest rate curves. The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparties nonperformance risk in the fair value measurements.

The Company has entered into interest rate swap contracts with an aggregate notional amount of \$225.0 million that effectively fixed the interest rate on the \$225.0 million unsecured term loan at 2.4%. These derivatives qualify for hedge accounting.

The Company has entered into four total return swap contracts, with an aggregate notional amount of \$257.3 million, that effectively converts \$257.3 million of mortgage notes payable to a floating interest rate based on SIFMA plus a spread. Additionally, the total return swaps provide fair market value protection on the mortgage notes payable to our counterparties during the initial period of the total return swap until the Company's option to call the mortgage notes at par can be exercised. The Company can currently call one of the total return swaps with \$114.4 million of the outstanding debt at par, while the call option on the other three total return swaps relating to \$142.9 million of the outstanding debt can be exercised starting on January 1, 2017. These derivatives do not qualify for hedge accounting.

As of December 31, 2015 the Company also had nine interest rate caps totaling a notional amount of \$20.7 million that effectively limit the Company's exposure to interest rate risk by providing a ceiling on the underlying variable interest rate for \$20.7 million of the Company's tax exempt variable rate debt.

## Table of Contents

As of December 31, 2015 and 2014, the aggregate carrying value of the interest rate swap contracts was a liability of \$1.0 million and \$1.8 million, respectively. The aggregate carrying value of the interest rate caps was zero on the balance sheets as of both December 31, 2015 and 2014. The aggregate carrying value of the total return swaps was \$4 thousand and zero as of December 31, 2015 and 2014, respectively.

Hedge ineffectiveness related to cash flow hedges, which is reported in current year income as interest expense, was not significant for the years ended December 31, 2015, 2014 and 2013.

### Issuance of Common Stock

In 2014, the Company filed a new shelf registration statement with the SEC, allowing the Company to sell an undetermined number or amount of certain equity (only ESS) and debt securities as defined in the prospectus.

ESS has entered into equity distribution agreements with Cantor Fitzgerald & Co., Barclays Capital Inc., BMO Capital Markets Corp., BNP Paribas Securities Corp., Citigroup Global Markets Inc, Jefferies LLC, J.P. Morgan Securities LLC, Liquidnet, Inc., Mitsubishi UFJ Securities (USA), Inc, and UBS Securities LLC. Pursuant to its equity distribution program, in 2015, ESS issued 1,481,737 shares of common stock for \$332.3 million, net of fees and commissions, and in 2014, ESS issued 2,964,315 shares of common stock for proceeds of \$534.0 million, net of fees and commissions. During the first quarter of 2016 through February 22, 2016, ESS has not issued any shares of common stock pursuant to this program. Under this program, ESS may from time to time sell shares of common stock into the existing trading market at current market prices, and the Company anticipates using the net proceeds, which are contributed to the Operating Partnership, to pay down debt, fund redevelopment and development pipelines, fund acquisitions, and for general corporate purposes. As of February 22, 2016, ESS may sell an additional 1,719,109 shares under the current equity distribution program.

### Capital Expenditures

Non-revenue generating capital expenditures are improvements and upgrades that extend the useful life of the property. For the year ended December 31, 2015, non-revenue generating capital expenditures totaled approximately \$1,173 per apartment home. The Company projects to incur approximately \$1,200 per apartment home in non-revenue generating capital expenditures for the year ending December 31, 2016. These expenditures do not include the improvements required in connection with the origination of mortgage loans, expenditures for deferred maintenance on acquisition properties, and expenditures for property renovations and improvements which are expected to generate additional revenue. The Company expects that cash from operations and/or its lines of credit will fund such expenditures. However, there can be no assurance that the actual expenditures incurred during 2016 and/or the funding thereof will not be significantly different than the Company's current expectations.

### Development and Predevelopment Pipeline

The Company defines development projects as new communities that are being constructed or are newly constructed and are in a phase of lease-up and have not yet reached stabilized operations. As of December 31, 2015, the Company had two consolidated development projects comprised of 771 apartment homes with an estimated cost of \$489.0 million of which \$287.0 million remains to be expended, and six unconsolidated joint venture active development projects comprised of 1,676 apartment homes with an estimated cost of \$0.9 billion, of which approximately \$500.0 million remains to be expended. The Company's share of these estimated remaining project costs is approximately \$255.0 million.

The Company defines predevelopment projects as proposed communities in negotiation or in the entitlement process with an expected high likelihood of becoming entitled development projects. The Company may also acquire land for

future development purposes or sale.

The Company expects to fund the development and predevelopment pipeline by using a combination of some or all of the following sources: its working capital, amounts available on its lines of credit, construction loans, net proceeds from public and private equity and debt issuances, and proceeds from the disposition of properties, if any.

#### Redevelopment Pipeline

The Company defines redevelopment communities as existing properties owned or recently acquired, which have been targeted for additional investment by the Company with the expectation of increased financial returns through property improvement. During redevelopment, apartment homes may not be available for rent and, as a result, may have less than stabilized operations. As of December 31, 2015, the Company had ownership interests in five major redevelopment communities aggregating 1,313

Table of Contents

apartment homes with estimated redevelopment costs of \$159.8 million, of which approximately \$82.5 million remains to be expended.

## Alternative Capital Sources

The Company utilizes co-investments as an alternative source of capital for acquisitions of both operating and development communities. As of December 31, 2015, the Company had an interest in 1,676 apartment homes of communities actively under development with joint ventures for a total estimated cost of \$0.9 billion. Total estimated remaining costs total approximately \$500.0 million, of which the Company estimates that its remaining investment in these development joint ventures will be approximately \$255.0 million. In addition, the Company had an interest in 10,520 apartment homes of operating communities with joint ventures for a total book value of \$738.9 million.

## Contractual Obligations and Commercial Commitments

The following table summarizes the maturity or due dates of the Company's contractual obligations and other commitments at December 31, 2015, and the effect such obligations could have on the Company's liquidity and cash flow in future periods (\$ in thousands):

	2016	2017 and 2018	2019 and 2020	Thereafter	Total
Mortgage notes payable	\$29,714	\$519,802	\$1,279,300	\$329,451	\$2,158,267
Unsecured debt	350,000	365,000	75,000	2,300,000	3,090,000
Lines of credit	—	—	15,000	—	15,000
Interest on indebtedness <sup>(1)</sup>	221,917	373,819	266,313	223,734	1,085,783
Ground leases	2,742	5,484	5,484	131,851	145,561
Operating leases	1,695	3,557	3,792	12,350	21,394
Development commitments (including co-investments) <sup>(2)</sup>	195,218	329,207	17,235	—	541,660
	\$801,286	\$1,596,869	\$1,662,124	\$2,997,386	\$7,057,665

<sup>(1)</sup> Interest on indebtedness for variable debt was calculated using interest rates as of December 31, 2015.

<sup>(2)</sup> Estimated project cost for development the Company's 500 Folsom project is net of a projected value for low-income housing tax credit proceeds and savings from tax exempt bonds.

## Variable Interest Entities

In accordance with accounting standards for consolidation of variable interest entities (VIEs), the Company consolidates the Operating Partnership and 19 DownREIT limited partnerships (comprising eleven communities). The Company consolidates these entities because it is deemed the primary beneficiary. The REIT has no assets or liabilities other than its investment in the Operating Partnership. The consolidated total assets and liabilities related to these DownREIT VIEs, net of intercompany eliminations, were approximately \$241.0 million and \$206.7 million, respectively, as of December 31, 2015, and \$235.1 million and \$209.1 million respectively, as of December 31, 2014. Interest holders in VIEs consolidated by the Company are allocated net income equal to the cash payments made to those interest holders for services rendered or distributions from cash flow. The remaining results of operations are generally allocated to the Company. As of December 31, 2015, the Company did not have any VIE's of which it was not deemed to be the primary beneficiary.

## Critical Accounting Policies and Estimates

The preparation of consolidated financial statements, in accordance with U.S. generally accepted accounting principles, requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. The Company defines critical accounting policies as those accounting policies that require the Company's management to exercise their most difficult, subjective and complex judgments. The Company's critical accounting policies relate principally to the following key areas: (i) accounting for business combinations; (ii) consolidation under applicable accounting standards of various entities; (iii) assessing the carrying values of the Company's real estate and investments in and advances to joint ventures and affiliates; and (iv) internal cost capitalization. The Company bases its estimates on historical experience, current market conditions, and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from those estimates made by management.

Table of Contents

The Company accounts for its business combinations, including the merger and other acquisitions of investments in real estate, in accordance with ASC 805-10, Business Combinations, which requires the acquired tangible and intangible assets and liabilities to be recorded at fair value, with excess purchase price, if any, recorded to goodwill. The Company must make significant assumptions in determining the fair value of the tangible and intangible assets and liabilities acquired and consideration transferred. The use of different assumptions in estimating the fair value could affect the measurement and timing of recognition of acquired assets and liabilities and related expenses.

The consideration transferred in a business combination is generally measured at fair value. For debt assumed by the Company, the fair value is determined using estimated market interest rates for debt with comparable terms in place at the time of the acquisition. For equity issued by the Company, the fair value is generally based on the fair value of the Company's equity interests at the date of issuance.

The fair value of the tangible assets, which principally includes land and building, is determined first by valuing the property as a whole as if it were vacant, using stabilized net operating income and market specific capitalization rates. The fair value of the land and building is then recorded based on its estimated fair value.

In calculating the fair value of identified intangible assets of an acquired property, the in-place leases are valued based on in-place rent rates and estimated time and cost to lease a unit.

The initial purchase accounting is based on the Company's preliminary assessment, which may differ when additional information becomes available. Subsequent adjustments made to the initial purchase accounting, if any, are made within the measurement period, which will be finalized within one year of the acquisition date.

The Company assesses each entity in which it has an investment or contractual relationship to determine if it may be deemed to be a VIE. If such an entity is a VIE, then the Company performs an analysis to determine who is the primary beneficiary. If the Company is the primary beneficiary, then the entity is consolidated. The analysis required to identify VIEs and primary beneficiaries is complex and judgmental, and the analysis must be applied to various types of entities and legal structures.

The Company assesses the carrying value of its real estate investments by monitoring investment market conditions and performance compared to budget for operating properties and joint ventures, and by monitoring estimated costs for properties under development. Local market knowledge and data is used to assess carrying values of properties and the market value of acquisition opportunities. Whenever events or changes in circumstances indicate that the carrying amount of a property held for investment may not be fully recoverable, the carrying amount is evaluated. If the sum of the property's expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the property, then the Company will recognize an impairment loss equal to the excess of the carrying amount over the fair value of the property. Adverse changes in market conditions or poor operating results of real estate investments could result in impairment charges. When the Company determines that a property is held for sale, it discontinues the periodic depreciation of that property. The criteria for determining when a property is held for sale requires judgment and has potential financial statement impact as depreciation would cease and an impairment loss could occur upon determination of held for sale status. Assets held for sale are reported at the lower of the carrying amount or estimated fair value less costs to sell.

Further, the Company evaluates whether its co-investments are other than temporarily impaired and, if so, records an impairment loss equal to the excess of the co-investments' carrying value over its estimated fair value.

The Company capitalizes all direct and certain indirect costs, including interest and real estate taxes, incurred during development and redevelopment activities. Interest is capitalized on real estate assets that require a period of time to

get them ready for their intended use. The amount of interest capitalized is based upon the average amount of accumulated development expenditures during the reporting period. Included in capitalized costs are management's accounting estimates of the direct and incremental personnel costs and indirect project costs associated with the Company's development and redevelopment activities. Indirect project costs consist primarily of personnel costs associated with construction administration and development, including accounting, legal fees, and various corporate and community onsite costs that clearly relate to projects under development.

The Company bases its accounting estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may vary from those estimates and those estimates could be different under different assumptions or conditions.

Table of Contents

## Net Operating Income (“NOI”)

Same-Property net operating income (“NOI”) is considered by management to be an important supplemental performance measure to earnings from operations included in the Company’s consolidated statements of income. The presentation of Same-Property NOI assists with the presentation of the Company’s operations prior to the allocation of depreciation and any corporate-level or financing-related costs. NOI reflects the operating performance of a community and allows for an easy comparison of the operating performance of individual communities or groups of communities. Prospective buyers of real estate have different financing and overhead structures, with varying marginal impacts to overhead by acquiring real estate, and NOI is considered by many in the real estate industry to be a useful measure for determining the value of a real estate asset or group of assets. The Company defines Same-Property NOI as Same-Property revenue less Same-Property operating expenses.

The reconciliation of earnings from operations to Same-Property NOI for the periods presented:

	2015	2014	2013
Earnings from operations	\$331,174	\$201,514	\$188,705
Adjustments:			
General and administrative	40,090	40,878	26,684
Management and other fees from affiliates	(8,909)	) (9,347	) (7,263
Depreciation and amortization	453,423	360,592	192,420
Merger and integration expenses	3,798	53,530	4,284
Acquisition and investment related costs	2,414	1,878	1,161
Net operating income	821,990	649,045	405,991
Less: Non Same-Property NOI	(357,457)	) (229,244	) (22,599
Same-Property NOI	\$464,533	\$419,801	\$383,392

## Forward Looking Statements

Certain statements in this "Management's Discussion and Analysis of Financial Condition and Results of Operations," and elsewhere in this Annual Report on Form 10-K which are not historical facts may be considered forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities and Exchange Act of 1934, as amended, including statements regarding the Company's expectations, hopes, intentions, beliefs and strategies regarding the future. Forward looking statements include statements regarding the Company's expectations as to the timing of completion of current development and redevelopment projects and the stabilization dates of such projects, expectation as to the total projected costs of development and redevelopment projects, beliefs as to the adequacy of future cash flows to meet anticipated cash needs, expectations as to the amount of non-revenue generating capital expenditures, future acquisitions, the Company's development and redevelopment pipeline and the sources of funding for it, the anticipated performance of existing properties, anticipated property and growth trends in various geographic regions, statements regarding the Company’s expected 2016 Same-Property revenue generally and in various areas, and 2016 Same-Property operating expenses, statements regarding the Company's financing activities, and the use of proceeds from such activities.

Such forward-looking statements involve known and unknown risks, uncertainties and other factors including, but not limited to, that the Company will fail to achieve its business objectives, that the actual completion of development and redevelopment projects will be subject to delays, that the stabilization dates of such projects will be delayed, that the total projected costs of current development and redevelopment projects will exceed expectations, that such development and redevelopment projects will not be completed, that development and redevelopment projects and acquisitions will fail to meet expectations, that estimates of future income from an acquired property may prove to be inaccurate, that future cash flows will be inadequate to meet operating requirements and/or will be insufficient to

provide for dividend payments in accordance with REIT requirements, that the actual non-revenue generating capital expenditures will exceed the Company's current expectations, that there may be a downturn in the markets in which the Company's communities are located, that the terms of any refinancing may not be as favorable as the terms of existing indebtedness, as well as those risks, special considerations, and other factors discussed in Item 1A, Risk Factors, of this Form 10-K, and those risk factors and special considerations set forth in the Company's other filings with the SEC which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. All forward-looking statements are made as of today, and the Company assumes no obligation to update this information.

Table of Contents

## Item 7A. Quantitative and Qualitative Disclosures About Market Risks

## Interest Rate Hedging Activities

The Company's objective in using derivatives is to add stability to interest expense and to manage its exposure to interest rate movements or other identified risks. To accomplish this objective, the Company entered into interest rate swaps as part of its cash flow hedging strategy. As of December 31, 2015, the Company has seven interest rate swap contracts to mitigate the risk of changes in the interest-related cash outflows on \$225.0 million of the five-year unsecured term debt. As of December 31, 2015, the Company also had \$291.7 million of variable rate indebtedness, of which \$20.7 million is subject to interest rate cap protection. All of the Company's interest rate swaps are designated as cash flow hedges as of December 31, 2015. The following table summarizes the notional amount, carrying value, and estimated fair value of the Company's derivative instruments used to hedge interest rates as of December 31, 2015. The notional amount represents the aggregate amount of a particular security that is currently hedged at one time, but does not represent exposure to credit, interest rates or market risks. The table also includes a sensitivity analysis to demonstrate the impact on the Company's derivative instruments from an increase or decrease in 10-year Treasury bill interest rates by 50 basis points, as of December 31, 2015.

(\$ in thousands)	Notional Amount	Maturity Date Range	Carrying and Estimated Carrying Value		
			Estimated Fair Value	+ 50 Basis Points	- 50 Basis Points
Cash flow hedges:					
Interest rate swaps	\$225,000	2016-2017	\$(1,032 )	\$(56 )	\$(2,003 )
Interest rate caps	20,674	2018-2019	—	—	—
Total cash flow hedges	\$245,674	2016-2019	\$(1,032 )	\$(56 )	\$(2,003 )

Additionally, the Company has entered into total return swap contracts, with an aggregate notional amount of \$257.3 million, that effectively converts \$257.3 million of mortgage notes payable to a floating interest rate based on SIFMA plus a spread and had a carrying value of \$4 thousand at December 31, 2015. These derivatives do not qualify for hedge accounting.

## Interest Rate Sensitive Liabilities

The Company is exposed to interest rate changes primarily as a result of its line of credit and long-term debt used to maintain liquidity and fund capital expenditures and expansion of the Company's real estate investment portfolio and operations. The Company's interest rate risk management objective is to limit the impact of interest rate changes on earnings and cash flows and to lower its overall borrowing costs. To achieve its objectives the Company borrows primarily at fixed rates and may enter into derivative financial instruments such as interest rate swaps, caps and treasury locks in order to mitigate its interest rate risk on a related financial instrument. The Company does not enter into derivative or interest rate transactions for speculative purposes.

The Company's interest rate risk is monitored using a variety of techniques. The table below presents the principal amounts and weighted average interest rates by year of expected maturity to evaluate the expected cash flows. Management has estimated that the fair value of the Company's \$4.8 billion of fixed rate debt at December 31, 2015, to be \$4.8 billion. Management has estimated the fair value of the Company's \$525.3 million of variable rate debt at December 31, 2015, is \$527.6 million based on the terms of existing mortgage notes payable and variable rate demand notes compared to those available in the marketplace (\$ in thousands).

For the Years Ended December 31,

Edgar Filing: ESSEX PROPERTY TRUST INC - Form 10-K

	2016	2017	2018	2019	2020	Thereafter	Total	Fair value
Fixed rate debt <sup>(1)</sup>	\$179,677	\$538,685	\$320,080	\$650,620	\$692,440	\$2,350,056	\$4,731,558	\$4,835,891
Average interest rate	4.5 %	3.3 %	5.5 %	4.3 %	5.0 %	3.8 %		
Variable rate debt <sup>(1)</sup>	\$200,038	\$25,495	\$542	\$25,592	\$647	\$279,395	(2)\$531,709	\$527,592

Table of Contents

- (1) Represents scheduled principal payments.
- (2) \$245.7 million is subject to interest rate protection agreements.

The table incorporates only those exposures that exist as of December 31, 2015; it does not consider those exposures or positions that could arise after that date. As a result, the Company's ultimate realized gain or loss, with respect to interest rate fluctuations and hedging strategies would depend on the exposures that arise during the period.

Item 8. Financial Statements and Supplementary Data

The response to this item is submitted as a separate section of this Form 10-K. See Item 15.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Essex Property Trust, Inc.

As of December 31, 2015, ESS carried out an evaluation, under the supervision and with the participation of management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based upon that evaluation, ESS's Chief Executive Officer and Chief Financial Officer concluded that as of December 31, 2015, ESS's disclosure controls and procedures were effective to ensure that the information required to be disclosed by ESS in the reports that ESS files or submits under the Exchange Act were recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such disclosure controls and procedures were also effective to ensure that information required to be disclosed in the reports that ESS files or submits under the Exchange Act is accumulated and communicated to the ESS's management, including ESS's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

There were no changes in ESS's internal control over financial reporting, that occurred during the quarter ended December 31, 2015, that have materially affected, or are reasonably likely to materially affect, ESS's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

ESS's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). ESS's management assessed the effectiveness of ESS's internal control over financial reporting as of December 31, 2015. In making this assessment, ESS's management used the criteria set forth in the report entitled "Internal Control-Integrated Framework (2013)" published by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). ESS's management has concluded that, as of December 31, 2015, its internal control over financial reporting was effective based on these criteria. ESS's independent registered public accounting firm, KPMG LLP, has issued an attestation report over ESS's internal control over financial reporting, which is included herein.

Essex Portfolio, L.P.

As of December 31, 2015, the Operating Partnership carried out an evaluation, under the supervision and with the participation of its management, including the Chief Executive Officer and Chief Financial Officer of the general partner, of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer of the general partner concluded that as of December 31, 2015, the Operating Partnership's disclosure controls and procedures were effective to ensure that the information required to be disclosed by the Operating Partnership in the reports that it files or submits under the Exchange Act were recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such disclosure controls and procedures were also effective to ensure that information required to be disclosed in the reports that the Operating Partnership files or submits under the Exchange Act is accumulated and communicated to the Operating Partnership's management, including the Chief Executive Officer and Chief Financial Officer of the general partner, to allow timely decisions regarding required disclosure.

Table of Contents

There were no changes in the Operating Partnership's internal control over financial reporting, that occurred during the quarter ended December 31, 2015, that have materially affected, or are reasonably likely to materially affect, the Operating Partnership's internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting

The Operating Partnership's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). The Operating Partnership's management assessed the effectiveness of the Operating Partnership's internal control over financial reporting as of December 31, 2015. In making this assessment, the Operating Partnership's management used the criteria set forth in the report entitled "Internal Control-Integrated Framework (2013)" published by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). The Operating Partnership's management has concluded that, as of December 31, 2015, its internal control over financial reporting was effective based on these criteria.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Essex Property Trust, Inc.:

We have audited the accompanying consolidated balance sheets of Essex Property Trust, Inc. and subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, equity, and cash

flows for each of the years in the three-year period ended December 31, 2015. In connection with our audits of the consolidated financial statements, we have also audited the accompanying financial statement schedule III. These consolidated financial statements and the accompanying financial statement schedule III are the responsibility of Essex Property Trust, Inc.'s management. Our responsibility is to express an opinion on these consolidated financial statements and the accompanying financial statement schedule III based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Essex Property Trust, Inc. and subsidiaries as of December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule III, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Essex Property Trust, Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2016 expressed an unqualified opinion on the effectiveness of Essex Property Trust, Inc.'s internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders  
Essex Property Trust, Inc.:

We have audited Essex Property Trust, Inc.'s internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Essex Property Trust, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting, appearing under Item 9A. Our responsibility is to express an opinion on Essex Property Trust, Inc.'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Essex Property Trust, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Essex Property Trust, Inc. and subsidiaries as of December 31, 2015 and 2014, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the years in the three-year period ended December 31, 2015, and our report dated February 26, 2016, expressed an unqualified opinion on those consolidated financial statements.

ESSEX PROPERTY TRUST, INC. AND SUBSIDIARIES  
ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

(1) Organization

The accompanying consolidated financial statements present the accounts of Essex Property Trust, Inc. (“Essex”, “ESS”, or the “Company”), which include the accounts of the Company and Essex Portfolio, L.P. and subsidiaries (the “Operating Partnership,” which holds the operating assets of the Company). Unless otherwise indicated, the notes to consolidated financial statements apply to both the Company and the Operating Partnership.

ESS is the sole general partner in the Operating Partnership with a 96.7% general partner interest and the limited partners owned a 3.3% interest as of December 31, 2015. The limited partners may convert their Operating Partnership units into an equivalent number of shares of common stock. Total Operating Partnership limited partnership units outstanding were 2,214,545 and 2,168,158 as of December 31, 2015 and 2014, respectively, and the redemption value of the units, based on the closing price of the Company’s common stock totaled approximately \$530.2 million and \$447.9 million, as of December 31, 2015 and 2014, respectively. The Company has reserved shares of common stock for such conversions.

As of December 31, 2015, the Company owned or had ownership interests in 246 apartment communities, (aggregating 59,160 apartment homes), four commercial buildings, and eight active development projects (collectively, the “Portfolio”). The communities are located in Southern California (Los Angeles, Orange, San Diego, and Ventura counties), Northern California (the San Francisco Bay Area) and the Seattle metropolitan areas.

On April 1, 2014, Essex completed the merger with BRE Properties, Inc. (“BRE”). In connection with the closing of the merger, (1) BRE merged into a wholly owned subsidiary of Essex, and (2) each outstanding share of BRE common stock was converted into (i) 0.2971 shares (the “Stock Consideration”) of Essex common stock, and (ii) \$7.18 in cash, (the “Cash Consideration”), plus cash in lieu of fractional shares for total consideration of approximately \$4.3 billion. The Cash Consideration was adjusted as a result of the authorization and declaration of a special distribution to the stockholders of BRE of \$5.15 per share of BRE common stock payable to BRE stockholders of record as of the close of business on March 31, 2014 (the “Special Dividend”). The Special Dividend was payable as a result of the closing of the sale of certain interests in assets of BRE to certain parties, which closed on March 31, 2014. Pursuant to the terms of the merger agreement, the amounts payable as a Special Dividend reduced the Cash Consideration of \$12.33 payable by Essex in the merger to \$7.18 per share of BRE common stock.

Essex issued approximately 23.1 million shares of Essex common stock as Stock Consideration in the merger. For purchase accounting, the value of the common stock issued by Essex upon the consummation of the merger was determined based on the closing price of BRE’s common stock on the closing date of the merger. As a result of Essex being admitted to the S&P 500 on the same date as the closing of the merger, Essex’s common stock price experienced significantly higher than usual trading volume and the closing price of \$174 per share was significantly higher than its volume-weighted average trading price for the days before and after April 1, 2014. BRE’s common stock did not experience the same proportionate increase in common stock price leading up to April 1, 2014. As a result, given that a substantial component of the purchase price is an exchange of equity instruments, Essex used the closing price of BRE’s common stock on April 1, 2014 of \$61 per share, less the Cash Consideration, as the fair value of the equity consideration. After deducting the Special Dividend and the Cash Consideration per share, this resulted in a value of \$48.67 per share of BRE common stock which is the equivalent of approximately \$164 per share of Essex common stock issued.

(2) Summary of Critical and Significant Accounting Policies

(a) Principles of Consolidation and Basis of Presentation

The accounts of the Company, its controlled subsidiaries and the variable interest entities (“VIEs”) in which it is the primary beneficiary are consolidated in the accompanying financial statements and prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). In the opinion of management, all adjustments necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented have been included and are normal and recurring in nature. All significant inter-company accounts and transactions have been eliminated. Certain reclassifications have been made to prior year amounts to conform to the current year’s presentation. Such reclassifications had no net effect on previously reported financial results.

F- 20

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

Noncontrolling interest includes the 3.3% limited partner interests in the Operating Partnership not held by the Company at both December 31, 2015 and 2014. These percentages include the Operating Partnership's vested long term incentive plan units (see Note 13).

The Company consolidates the Operating Partnership and 19 DownREIT limited partnerships (comprising eleven communities), since the Company is the primary beneficiary of these variable interest entities ("VIEs"). The Company has no assets or liabilities other than its investment in the Operating Partnership. The consolidated total assets and liabilities related to these DownREIT VIEs, net of intercompany eliminations, were approximately \$241.0 million and \$206.7 million, respectively, as of December 31, 2015, and \$235.1 million and \$209.1 million, respectively, as of December 31, 2014.

The DownREIT VIEs collectively own eleven apartment communities in which Essex Management Company ("EMC") is the general partner, the Operating Partnership is a special limited partner, and the other limited partners were granted rights of redemption for their interests. Such limited partners can request to be redeemed and the Company, subject to certain restrictions, can elect to redeem their rights for cash or by issuing shares of its common stock on a one share per unit basis. Conversion values will be based on the market value of the Company's common stock at the time of redemption multiplied by the number of units stipulated under the above arrangements. The other limited partners receive distributions based on the Company's current dividend rate times the number of units held. Total DownREIT units outstanding were 963,172 and 974,790 as of December 31, 2015 and 2014 respectively, and the redemption value of the units, based on the closing price of the Company's common stock totaled approximately \$230.6 million and \$201.4 million, as of December 31, 2015 and 2014, respectively. The carrying value of redeemable noncontrolling interest in the accompanying balance sheets was \$45.5 million and \$23.3 million as of December 31, 2015 and 2014, respectively. The amounts represent units of limited partners' interests in DownREIT VIEs as to which it is outside of the Company's control to redeem the DownREIT units with Company common stock and may potentially be redeemed for cash, and are presented at either their redemption value or historical cost, depending on the limited partner's right to redeem their units as of the balance sheet date. The carrying value of DownREIT units as to which it is within the control of the Company to redeem the units with its common stock is \$18.4 million and \$30.8 million as of December 31, 2015 and 2014, respectively and is classified within noncontrolling interests in the accompanying consolidated balance sheets.

Interest holders in VIEs consolidated by the Company are allocated a priority of net income equal to the cash payments made to those interest holders or distributions from cash flow. The remaining results of operations are generally allocated to the Company.

As of December 31, 2015 and 2014, the Company did not have any VIEs of which it was not deemed to be the primary beneficiary.

(b) Recent Accounting Pronouncements

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers." The new standard provides a single comprehensive revenue recognition model for contracts with customers (excluding certain contracts, such as lease contracts) to improve comparability within industries. The new standard requires an entity to recognize revenue to reflect the transfer of goods or services to customers at an amount the entity expects to be paid in exchange for those goods and services and provide enhanced disclosures, all to provide more comprehensive guidance for

transactions such as service revenue and contract modifications. In August 2015, the FASB deferred the effective date of the new standard by one year, and it is now effective for interim and annual periods beginning after December 15, 2017. Early adoption is permitted but not before the original effective date. The new standard may be applied using either a full retrospective or a modified approach upon adoption. The Company has not yet selected a transition method and is currently evaluating the impact of adopting the new standard on its consolidated results of operations and financial position.

In February 2015, the FASB issued ASU No. 2015-02 "Consolidation (Topic 810): Amendments to the Consolidation Analysis", which provides new consolidation guidance and makes changes to both the variable interest model and the voting model. Among other changes, the new standard specifically eliminates the presumption in the current voting model that a general partner controls a limited partnership or similar entity unless that presumption can be overcome. Generally, only a single limited partner that is able to exercise substantive kick-out rights will consolidate. The new standard will be effective for the Company beginning on January 1, 2016 and early adoption is permitted, including adoption in an interim period. The new standard must be applied using a modified retrospective approach by recording a cumulative-effect adjustment to equity/capital

F- 21

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

as of the beginning of the period of adoption or retrospectively to each period presented. The Company is currently evaluating the impact of adopting the new standard on its consolidated results of operations and financial position.

In April 2015, the FASB issued ASU No. 2015-03 "Simplifying the Presentation of Debt Issuance Costs", which requires companies to present debt financing costs as a direct deduction from the carrying amount of the associated debt liability rather than as an asset, consistent with the presentation of debt discounts on the consolidated balance sheets. The new standard will be effective for the Company beginning on January 1, 2016 and early adoption is permitted. The Company adopted this standard during the second quarter of 2015. This adoption resulted in a reclassification of \$29.4 million in debt issuance costs, net of accumulated amortization, from an asset to a reduction to associated debt liabilities as of December 31, 2014.

In January 2016, the FASB issued ASU No. 2016-01 "Recognition and Measurement of Financial Assets and Financial Liabilities", which requires changes to the classification and measurement of investments in certain equity securities and to the presentation of certain fair value changes for financial liabilities measured at fair value. The new standard will be effective for the Company beginning on January 1, 2018 and early adoption is permitted. The Company is currently evaluating the impact of this amendment on its consolidated results of operations and financial position.

(c) Real Estate Rental Properties

Significant expenditures, which improve or extend the life of an asset and have a useful life of greater than one year, are capitalized. Operating real estate assets are stated at cost and consist of land, buildings and improvements, furniture, fixtures and equipment, and other costs incurred during their development, redevelopment and acquisition. Expenditures for maintenance and repairs are charged to expense as incurred.

The depreciable life of various categories of fixed assets is as follows:

Computer software and equipment	3 - 5 years
Interior apartment home improvements	5 years
Furniture, fixtures and equipment	5 years
Land improvements and certain exterior components of real property	10 years
Real estate structures	30 years

The Company capitalizes all costs incurred with the predevelopment, development or redevelopment of real estate assets or are associated with the construction or expansion of real property. Such capitalized costs include land, land improvements, allocated costs of the Company's project management staff, construction costs, as well as interest and related loan fees, property taxes and insurance. Capitalization begins for predevelopment, development, and redevelopment projects when activity commences. Capitalization ends when the apartment home is completed and the property is available for a new resident or if the development activities cease.

The Company allocates the purchase price of real estate to land and building including personal property, and identifiable intangible assets, such as the value of above, below and in-place leases. The values of the above and below market leases are amortized and recorded as either a decrease (in the case of above market leases) or an increase (in the case of below market leases) to rental revenue over the remaining term of the associated leases acquired, which in the case of below market leases the Company assumes lessees will elect to renew their leases. The

value of acquired in-place leases are amortized to expense over the term the Company expects to retain the acquired tenant, which is generally 15 months. The net carrying value of acquired in-place leases as of December 31, 2015 of \$2.9 million is expected to be recognized in amortization expense primarily in 2016.

The Company performs the following evaluation for communities acquired:

- (1) adjust the purchase price for any fair value adjustments resulting from such things as assumed debt or contingencies;
- (2) estimate the value of the real estate “as if vacant” as of the acquisition date;
- (3) allocate that value among land and buildings including personal property;
- (4) compute the value of the difference between the “as if vacant” value and the adjusted purchase price, which will represent the total intangible assets;

F- 22

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

- (5) compute the value of the above and below market leases and determine the associated life of the above market/  
below market leases;
- (6) compute the value of the in-place leases and customer relationships, if any, and the associated lives of these assets.

Whenever events or changes in circumstances indicate that the carrying amount of a property held for investment or held for sale may not be fully recoverable, the carrying amount will be evaluated for impairment. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount (including intangible assets) of a property held for investment, then the Company will recognize an impairment loss equal to the excess of the carrying amount over the fair value of the property. Fair value of a property is determined using conventional real estate valuation methods, such as discounted cash flow, the property's unleveraged yield in comparison to the unleveraged yields and sales prices of similar communities that have been recently sold, and other third party information, if available. Communities held for sale are carried at the lower of cost and fair value less estimated costs to sell. As of December 31, 2015 and 2014, two and one properties were classified as held for sale, respectively. No impairment charges were recorded in 2015, 2014 or 2013.

In the normal course of business, the Company will receive purchase offers for its communities, either solicited or unsolicited. For those offers that are accepted, the prospective buyer will usually require a due diligence period before consummation of the transaction. It is not unusual for matters to arise that result in the withdrawal or rejection of the offer during this process. The Company classifies real estate as "held for sale" when all criteria under the accounting standard for the disposals of long-lived assets have been met.

(d) Co-investments

The Company owns investments in joint ventures ("co-investments") in which it has significant influence, but its ownership interest does not meet the criteria for consolidation in accordance with the accounting standards. Therefore, the Company accounts for these investments using the equity method of accounting. Under the equity method of accounting, the investment is carried at the cost of assets contributed, plus the Company's equity in earnings less distributions received and the Company's share of losses.

A majority of the co-investments, excluding the preferred equity investments, compensate the Company for its asset management services and some of these investments may provide promote distributions if certain financial return benchmarks are achieved. Asset management fees are recognized when earned, and promote fees are recognized when the earnings events have occurred and the amount is determinable and collectible. Any promote fees are reflected in equity income (loss) from co-investments.

(e) Revenues and Gains on Sale of Real Estate

Revenues from tenants renting or leasing apartment homes are recorded when due from tenants and are recognized monthly as they are earned, which is not materially different than on a straight-line basis. Apartment homes are rented under short-term leases (generally, lease terms of 6 to 12 months). Revenues from tenants leasing commercial space are recorded on a straight-line basis over the life of the respective lease.

The Company recognizes gains on sales of real estate when a contract is in place, a closing has taken place, the buyer's initial and continuing investment is adequate to demonstrate a commitment to pay for the property and the Company

does not have a substantial continuing involvement with the property.

(f) Cash Equivalents and Restricted Cash

Highly liquid investments with original maturities of three months or less when purchased are classified as cash equivalents. Restricted cash balances relate primarily to reserve requirements for capital replacement at certain communities in connection with the Company's mortgage debt.

(g) Marketable Securities and Other Investments

The Company reports its available for sale securities at fair value, based on quoted market prices (Level 1 for the common stock and investment funds, Level 2 for the unsecured bonds and Level 3 for the limited partnership interests, as defined by the

F- 23

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

FASB standard for fair value measurements as discussed later in Note 2), and any unrealized gain or loss is recorded as other comprehensive income (loss). There were no other than temporary impairment charges for the years ended December 31, 2015, 2014, and 2013. Realized gains and losses, interest income, and amortization of purchase discounts are included in interest and other income on the consolidated statement of income.

As of December 31, 2015 and 2014, marketable securities and other investments consisted primarily of investment-grade unsecured bonds, common stock, investments in mortgage backed securities, investment funds that invest in U.S. treasury or agency securities, and other limited partnership investments. As of December 31, 2015 and 2014, the Company classified its investments in mortgage backed securities, which mature in November 2019 and September 2020, as held to maturity, and accordingly, these securities are stated at their amortized cost. The discount on the mortgage backed securities is being amortized to interest income based on an estimated yield and the maturity date of the securities.

As of December 31, 2015 and 2014 marketable securities and other investments consist of the following (\$ in thousands):

	December 31, 2015		
	Amortized Cost	Gross Unrealized Gain (Loss)	Carrying Value
Available for sale:			
Investment-grade unsecured bonds	\$11,618	\$68	\$11,686
Investment funds - US treasuries	3,675	(9	) 3,666
Common stock and stock funds	34,655	7,091	41,746
Held to maturity:			
Mortgage backed securities	80,387	—	80,387
Total - Marketable securities and other investments	\$130,335	\$7,150	\$137,485
	December 31, 2014		
	Amortized Cost	Gross Unrealized Gain	Carrying Value
Available for sale:			
Investment-grade unsecured bonds	\$9,435	\$145	\$9,580
Investment funds - US treasuries	3,769	3	3,772
Common stock and stock funds	25,755	5,137	30,892
Held to maturity:			
Mortgage backed securities	67,996	—	67,996
Total - Marketable securities	106,955	5,285	112,240
Other investments	5,000	—	5,000
Total - Marketable securities and other investments	\$111,955	\$5,285	\$117,240

The Company uses the specific identification method to determine the cost basis of a security sold and to reclassify amounts from accumulated other comprehensive income for securities sold. For the years ended December 31, 2015, 2014 and 2013, the proceeds from sales of available for sale securities totaled \$3.3 million, \$8.8 million and \$24.2 million, respectively. For the years ended December 31, 2015, 2014 and 2013 these sales resulted in no net gains or losses, gains of \$0.9 million and \$1.8 million, respectively. For the year ended December 31, 2015, the proceeds from the sale of other investments totaled \$5.6 million, which resulted in a realized gain of \$0.6 million recorded in interest and other income on the consolidated statements of income. For the years ended December 31, 2014 and 2013, there were no such sales.

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

(h) Notes Receivable

Notes receivable relate to real estate financing arrangements including mezzanine and bridge loans and are secured by real estate. Interest is recognized over the life of the note as interest income.

Each note is analyzed to determine if it is impaired. A note is impaired if it is probable that the Company will not collect all contractually due principal and interest. The Company does not accrue interest when a note is considered impaired and an allowance is recorded for any principal and previously accrued interest that are not believed to be collectible. All cash receipts on impaired notes are applied to reduce the principal amount of such notes until the principal has been recovered and, thereafter, are recognized as interest income. As of December 31, 2015 and 2014, no notes were impaired.

(i) Capitalization Policy

The Company capitalizes all direct and certain indirect costs, including interest, real estate taxes and insurance, incurred during development and redevelopment activities. Interest is capitalized on real estate assets that require a period of time to get them ready for their intended use. The amount of interest capitalized is based upon the average amount of accumulated development expenditures during the reporting period. Included in capitalized costs are management's estimates of the direct and incremental personnel costs and indirect project costs associated with the Company's development and redevelopment activities. Indirect project costs consist primarily of personnel costs associated with construction administration and development, including accounting, legal fees, and various corporate and community onsite costs that clearly relate to projects under development. The Company's capitalized internal costs related to development and redevelopment projects were comprised primarily of employee compensation and totaled \$10.9 million, \$10.4 million and \$7.5 million for the years ended December 31, 2015, 2014 and 2013, respectively, most of which relates to development projects. The Company capitalizes leasing costs associated with the lease-up of development communities and amortizes the costs over the life of the leases. The amounts capitalized are immaterial for all periods presented.

(j) Fair Value of Financial Instruments

The Company values its financial instruments based on the fair value hierarchy of valuation techniques described in the FASB's accounting standard for fair value measurements. Level 1 inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date. Level 2 inputs include quoted prices for similar assets and liabilities in active markets and inputs other than quoted prices observable for the asset or liability. Level 3 inputs are unobservable inputs for the asset or liability. The Company uses Level 1 inputs for the fair values of its cash equivalents and its marketable securities except for unsecured bonds and mortgage backed securities. The Company uses Level 2 inputs for its investments in unsecured bonds, notes receivable, notes payable, and derivative liabilities. These inputs include interest rates for similar financial instruments. The Company's valuation methodology for derivatives is described in Note 9. The Company uses Level 3 inputs to estimate the fair value of its mortgage backed securities. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

Management believes that the carrying amounts of the outstanding balances under its notes and other receivables approximate fair value as of December 31, 2015 and 2014, because interest rates, yields and other terms for these

instruments are consistent with yields and other terms currently available for similar instruments. Management has estimated that the fair value of fixed rate debt with a carrying value of \$4.8 billion and \$4.4 billion, at December 31, 2015 and 2014, respectively, to be \$4.8 billion and \$4.6 billion. Management has estimated the fair value of the Company's \$525.3 million and \$651.7 million of variable rate debt at December 31, 2015 and 2014, respectively, is \$527.6 million and \$656.3 million based on the terms of the Company's existing variable rate debt compared to those available in the marketplace. Management believes that the carrying amounts of cash and cash equivalents, restricted cash, accounts payable and accrued liabilities, construction payable, other liabilities and dividends payable approximate fair value as of December 31, 2015 and 2014 due to the short-term maturity of these instruments. Marketable securities and derivative liabilities are carried at fair value as of December 31, 2015 and 2014.

At December 31, 2015 and 2014, the Company's investments in mortgage backed securities had a carrying value of \$80.4 million and \$68.0 million, respectively. The Company estimated the fair value of investment in mortgage backed securities at December 31, 2015 and 2014 to be approximately \$110.2 million and \$96.0 million, respectively. The Company determines the fair value of the mortgage backed securities based on unobservable inputs (level 3 of the fair value hierarchy) considering the

F- 25

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

assumptions that market participants would make in valuing these securities. Assumptions such as estimated default rates and discount rates are used to determine expected, discounted cash flows to estimate the fair value.

(k) Interest Rate Protection, Swap, and Forward Contracts

The Company uses interest rate swaps, interest rate cap contracts, and forward starting swaps to manage interest rate risks. The Company's objective in using derivatives is to add stability to interest expense and to manage its exposure to interest rate movements or other identified risks. To accomplish this objective, the Company primarily uses interest rate swaps and interest rate caps as part of its cash flow hedging strategy.

The Company records all derivatives on its consolidated balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and the resulting designation. Derivatives used to hedge the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives used to hedge the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges.

For derivatives designated for accounting purposes as fair value hedges, changes in the fair value of the derivative and the hedged item related to the hedged risk are recognized in earnings. For derivatives designated for accounting purposes as cash flow hedges, the effective portion of changes in the fair value of the derivative is initially reported in other comprehensive income (outside of earnings) and subsequently reclassified to earnings when the hedged transaction affects earnings, and the ineffective portion of changes in the fair value of the derivative is recognized directly in earnings. The Company assesses the initial and ongoing effectiveness of each hedging relationship by comparing the changes in fair value or cash flows of the derivative hedging instrument with the changes in fair value or cash flows of the designated hedged item or transaction.

For derivatives not designated for accounting purposes as cash flow hedges, changes in fair value are recognized in earnings. All of the Company's interest rate swaps are considered cash flow hedges. The change in fair value of the total return swaps is reported as total return swap income in the consolidated statements of income.

(l) Income Taxes

Generally in any year in which ESS qualifies as a real estate investment trust ("REIT") under the Internal Revenue Code (the "IRC"), it is not subject to federal income tax on that portion of its income that it distributes to stockholders. No provision for federal income taxes, other than the taxable REIT subsidiaries discussed below, has been made in the accompanying consolidated financial statements for each of the years in the three-year period ended December 31, 2015 as ESS has elected to be and believes it qualifies under the IRC as a REIT and has made distributions during the periods in amounts to preclude ESS from paying federal income tax.

In order to maintain compliance with REIT tax rules, the Company utilizes taxable REIT subsidiaries for various revenue generating or investment activities. The taxable REIT subsidiaries are consolidated by the Company. The activities and tax related provisions, assets and liabilities are not material.

As a partnership, the Operating Partnership is not subject to federal or state income taxes except that in order to maintain ESS's compliance with REIT tax rules that are applicable to ESS, the Operating Partnership utilizes taxable

REIT subsidiaries for various revenue generating or investment activities. The taxable REIT subsidiaries are consolidated by the Operating Partnership.

## (m) Equity-based Compensation

The cost of share and unit based compensation awards is measured at the grant date based on the estimated fair value of the awards. The estimated fair value of stock options and restricted stock granted by the Company are being amortized over the vesting period. The estimated grant date fair values of the long term incentive plan units (discussed in Note 13) are being amortized over the expected service periods.

## (n) Changes in Accumulated Other Comprehensive Loss by Component

Essex Property Trust, Inc. (\$ in thousands)

Amounts reclassified from accumulated other comprehensive loss in connection with derivatives are recorded to interest expense on the consolidated statements of income. Realized gains and losses on available for sale securities are included in interest and other income on the consolidated statements of income.

## (o) Accounting Estimates

The preparation of consolidated financial statements, in accordance with GAAP, requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to acquiring, developing and assessing the carrying values of its real estate portfolio, its investments in and advances to joint ventures and affiliates, and its notes receivable. The Company bases its estimates on historical experience, current market conditions, and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may vary from those estimates and those estimates could be different under different assumptions or conditions.

## (p) BRE Merger

The merger with BRE was a two-step process. First, 14 of the BRE properties were acquired on March 31, 2014 in exchange for \$1.4 billion of OP units. The preliminary fair value of these properties was substantially all attributable to rental properties which included land, buildings and improvements, and real estate under development and approximately \$19 million was attributable to acquired in-place lease value. Second, the BRE merger closed on April 1, 2014 in exchange for the total consideration of approximately \$4.3 billion.

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

A summary of the fair value of the assets and liabilities acquired on April 1, 2014 was as follows (includes the 14 properties acquired on March 31, 2014 as the OP Units issued were retired on April 1, 2014) (in millions):

Cash assumed	\$ 140	
Rental properties and real estate under development	5,605	
Real estate held for sale, net	108	
Co-investments	224	
Acquired in-place lease value	77	
Other assets	16	
Mortgage notes payable and unsecured debt	(1,747)	)
Other liabilities	(87)	)
Redeemable noncontrolling interest	(5)	)
	\$4,331	
Cash consideration for BRE merger	\$556	
Equity consideration for BRE merger	3,775	
Total consideration for BRE merger	\$4,331	

During the quarter ended March 31, 2015 the Company recorded adjustments to decrease the preliminary fair value of real property by \$13.1 million, to increase the preliminary fair value of co-investments by \$6.0 million and to decrease its preliminary estimate for liabilities assumed by \$7.1 million. The change in estimates were the result of subsequent additional information pertaining to the opening balance sheet identified by management. The Company believes that the information gathered to date provides a reasonable basis for estimating the fair values of assets acquired and liabilities assumed. Due to these adjustments and, certain amounts do not agree to previously reported balances.

## (3) Real Estate Investments

## (a) Acquisitions of Real Estate

For the year ended December 31, 2015, the Company purchased seven communities consisting of 1,722 apartment homes for \$638.1 million. The table below summarizes acquisition activity for the year ended December 31, 2015 (\$ in millions):

Property Name	Location	Apartment Homes	Essex Ownership Percentage	Quarter in 2015	Purchase Price
8th & Hope	Los Angeles, CA	290	100	% Q1	\$200.0
The Huxley <sup>(1)</sup>	Los Angeles, CA	187	100	% Q1	48.8
The Dylan <sup>(1)</sup>	Los Angeles, CA	184	100	% Q1	51.3
Reveal <sup>(2)</sup>	Woodland Hills, CA	438	99.75	% Q2	73.0
Avant	Los Angeles, CA	247	100	% Q2	99.0
Avant II	Los Angeles, CA	193	100	% Q4	73.0
Enso	San Jose, CA	183	100	% Q4	93.0
Total 2015		1,722			\$638.1

- (1) In March 2015, the Company purchased the joint venture partner's remaining membership interest in The Huxley and The Dylan co-investments for a purchase price of \$100.1 million. The properties are now consolidated.
- (2) In April 2015, the Company purchased the joint venture partner's 49.5% membership interest in the Reveal co-investment for a purchase price of \$73.0 million. The property is now consolidated.

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

The \$638.1 million aggregate purchase price for the acquisitions listed above were included on the Company's consolidated balance sheet as follows: \$117.9 million was included in land and land improvements, \$513.3 million was included in buildings and improvements, \$5.3 million was included in acquired in-place lease value, net, and \$1.6 million was included in other financial statement line items within the Company's consolidated balance sheets.

For the year ended December 31, 2014, in addition to the BRE merger, the Company purchased six communities consisting of 1,480 apartment homes for \$460.7 million.

## (b) Sales of Real Estate Investments

For the year ended December 31, 2015, the Company sold two communities consisting of 848 apartment homes for \$308.8 million resulting in gains totaling \$44.9 million. The table below summarized disposition activity for the year ended December 31, 2015 (\$ in millions):

Property Name	Location	Apartment Homes	Essex Ownership Percentage	Ownership	Quarter in 2015	Sales Price	Gains
Pinnacle South Mountain	Phoenix, AZ	552	100	%EPLP	Q1	\$63.8	\$4.7
Sharon Green	Menlo Park, CA	296	100	%EPLP	Q4	245.0	40.2
Total 2015		848				\$308.8	\$44.9

In March 2015, the Company sold two commercial buildings, located in Emeryville, CA for \$13.0 million, resulting in a gain of \$2.4 million.

During 2014, the Company sold four communities consisting of 594 apartment homes for \$120.4 million resulting in gains totaling \$43.6 million, which are included in the line item gains on sale of real estate and land in the Company's consolidated statement of income.

During 2013, the Company sold three communities consisting of 363 apartment homes for \$57.5 million resulting in gains totaling \$29.2 million, which are included in the line item gains on sale of real estate and land in the Company's consolidated statement of income.

## (c) Co-investments

The Company has joint ventures and preferred equity investments in co-investments which are accounted for under the equity method. The co-investments' accounting policies are similar to the Company's accounting policies. The co-investments own, operate, and develop apartment communities.

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

Includes the Company's share of equity income from co-investments, income from preferred equity investments, (3) gain on sale of co-investments, co-investment promote income, and income from early redemption of preferred equity investments. Includes income earned from investments with a related party of \$3.7 million and \$3.8 million for the years ended December 31, 2015 and 2014, respectively.

Operating Co-investments

As of December 31, 2015 and 2014, the Company, through several joint ventures, owned 10,520 and 9,983 apartment homes, respectively, in operating communities. The Company generally owns 50%-55% of these joint ventures and the Company's book value of these co-investments was \$738.9 million and \$812.1 million at December 31, 2015 and 2014, respectively.

Development Co-Investments

As of December 31, 2015 and 2014, the Company, through several joint ventures, owned 1,676 and 2,296 apartment homes, respectively, in development communities. The Company generally owns 50%-55% of these joint ventures and the Company's book value of these co-investments was \$190.8 million and \$121.7 million at December 31, 2015 and 2014, respectively.

In February 2015, the Company entered into a joint venture to develop 500 Folsom, a multi-family community comprised of 545 apartment homes located in San Francisco, California. The Company has a 50% ownership interest in the development which has a projected total cost of \$381.0 million. Construction began in the fourth quarter of 2015 and the property is expected to open in the fourth quarter of 2018. At December 31, 2015, the total remaining estimated costs to be incurred on this project were \$319.2 million, of which the Company's portion of the remaining costs was \$159.6 million.

In July 2014, the Company entered into a joint venture to develop Century Towers, a multi-family community containing 376 apartment homes located in San Jose, California. The Company has a 50% ownership interest in the development which has a projected total cost of \$172.1 million. The Company has also committed to a \$27.0 million preferred equity investment in the project, which accrues at an annualized preferred return of 8.1%. Construction began in the third quarter of 2014 and the property is expected to open in the first quarter of 2017. At December 31, 2015, the total remaining estimated costs to be incurred on this project were \$78.9 million, of which the Company's portion of the remaining costs was \$39.4 million.

Preferred Equity Investments

As of December 31, 2015 and 2014, the Company held preferred equity investment interests in several joint-ventures which own real estate. The Company's book value of these preferred equity investments was \$106.3 million and \$108.7 million at December 31, 2015 and 2014, respectively.

In March 2015, a multi-family property, located in Anaheim, CA that was owned by an entity affiliated with a related party, in which the Company held a \$13.7 million preferred equity investment, was sold. That investment of \$13.7 million plus an additional \$1.3 million in cash was invested as outlined in the next paragraph. Prior to the property sale, the \$13.7 million preferred equity investment earned a 9.0% preferred return and was scheduled to mature in September 2020.

In June 2015, the Company made \$10.0 million and \$5.0 million preferred equity investments in limited liability companies owned by a related party, that own properties located in San Jose and Concord, California, respectively. These investments earn a 9.5% preferred return and are scheduled to mature in June 2022.

In August 2015, the Company made a \$5.0 million preferred equity investment in a limited liability company owned by a related party that owns a property located in Los Angeles, California. This investment earns a 9.5% preferred return and is scheduled to mature in August 2022.

In August 2015, the Company redeemed a preferred equity investment in a joint venture that holds a property in San Jose, California with a carrying value of \$20.4 million. The Company recognized a gain of \$1.5 million as a result of this redemption which is included in equity income from co-investments in the consolidated statements of income.

In October 2014, the Company received cash of \$101.0 million for its share of the redemption of a preferred equity investment related to a property located in San Francisco, California. The Company recorded \$5.3 million of income from penalties due to

Table of Contents

the early redemption of this preferred equity investment which is included in equity income from co-investments in the consolidated statements of income.

## (d) Real Estate under Development

The Company defines development projects as new communities that are being constructed, or are newly constructed and are in a phase of lease-up and have not yet reached stabilized operations. As of December 31, 2015, the Company had two consolidated development projects, six unconsolidated joint venture development projects, and various consolidated predevelopment projects, aggregating 2,447 apartment homes for an estimated total cost of \$1.4 billion, of which \$787.0 million remains to be expended. The Company's portion of the remaining costs was \$542.0 million.

## (4) Notes and Other Receivables

Notes receivable, secured by real estate, and other receivables consist of the following as December 31, 2015 and 2014 (\$ in thousands):

	2015	2014
Note receivable, secured, bearing interest at 6.0%, due December 2016	\$3,219	\$3,212
Notes and other receivables from affiliates <sup>(1)</sup>	3,092	8,105
Other receivables	12,974	13,606
	\$19,285	\$24,923

The Company had \$3.1 million and \$8.1 million of short-term loans outstanding and due from various joint ventures for the years ended December 31, 2015 and 2014, respectively. See Note 5, Related Party Transactions, for additional details.

## (5) Related Party Transactions

The Company has adopted written related party transaction guidelines that are intended to cover transactions in which the Company (including entities it controls) is a party and in which any "related person" has a direct or indirect interest. A "related person" means any Company director, director nominee, or executive officer, any beneficial owner of more than 5% of the Company's outstanding common stock, and any immediate family member of any of the foregoing persons. A related person may be considered to have an indirect interest in a transaction if he or she (i) is an owner, director, officer or employee of or otherwise associated with another company that is engaging in a transaction with the Company, or (ii) otherwise, through one or more entities or arrangements, has an indirect financial interest in or personal benefit from the transaction.

The related person transaction review and approval process is intended to determine, among any other relevant issues, the dollar amount involved in the transaction; the nature and value of any related person's direct or indirect interest (if any) in the transaction; and whether or not (i) a related person's interest is material, (ii) the transaction is fair, reasonable, and serves the best interest of the Company and its shareholders, and (iii) whether the transaction or relationship should be entered into, continued or ended.

The Company's Chairman and founder, Mr. George Marcus, is the Chairman of the Marcus & Millichap Company ("MMC"), which is a parent company of a diversified group of real estate service, investment, and development firms.

Mr. Marcus is also the Co-Chairman of Marcus & Millichap, Inc. (“MMI”), and Mr. Marcus owns a controlling interest in MMI. MMI is a national brokerage firm listed on the NYSE that underwent its initial public offering in 2013. Essex Apartment Value Fund II, L.P. (“Fund II”) paid brokerage commissions totaling \$0.6 million and \$0.4 million, respectively, to an affiliate of MMI related to the sales of properties in 2013 and 2012, respectively. There were no brokerage commissions paid by the Company to MMI or its affiliates during 2015, 2014, and 2013.

The Company charges certain fees relating to its co-investments for asset management, property management, development and redevelopment services. These fees from affiliates total \$15.6 million, \$16.5 million, and \$11.5 million for the years ended December 31, 2015, 2014 and 2013, respectively. All of these fees are net of intercompany amounts eliminated by the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

Company. The Company netted development and redevelopment fees of \$6.7 million, \$7.2 million, and \$4.4 million against general and administrative expenses for the years ended December 31, 2015, 2014 and 2013, respectively.

In March 2015, a multi-family property, located in Anaheim, CA that was owned by an entity affiliated with MMC, in which the Company held a \$13.7 million preferred equity investment, was sold. That investment of \$13.7 million plus an additional \$1.3 million in cash was invested as outlined in the next two paragraphs. Prior to the property sale, the \$13.7 million preferred equity investment earned a 9.0% preferred return and was scheduled to mature in September 2020.

In June 2015, the Company made a \$10.0 million preferred equity investment in an entity affiliated with MMC that owns Greentree Apartments, a 220 apartment community located in San Jose, CA. This investment will earn a 9.5% preferred return and is scheduled to mature in June 2022.

In June 2015, the Company made a \$5.0 million preferred equity investment in an entity affiliated with MMC that owns Sterling Cove Apartments, a 218 apartment community located in Concord, CA. This investment will earn a 9.5% preferred return and is scheduled to mature in June 2022.

In August 2015, the Company made a \$5 million preferred equity investment in an entity affiliated with MMC that owns Alta Vista Apartments, a 92 apartment community located in Los Angeles, CA. This investment will earn a 9.5% preferred return and is scheduled to mature in August 2022.

In July 2014, the Company acquired Paragon Apartments, a 301 unit apartment community located in Fremont, CA for \$111.0 million from an entity that was partially owned by an affiliate of MMC.

As described in Note 4, the Company has provided short-term bridge loans to affiliates. As of December 31, 2015 and 2014, \$3.1 million and \$8.1 million, respectively, of short-term loans remained outstanding due from joint venture affiliates and is classified within notes and other receivables in the accompanying consolidated balance sheets.

In January 2013, the Company invested \$8.6 million as a preferred equity interest investment in an entity affiliated with MMC that owns an apartment development in Redwood City, California. In March 2015 the Company's preferred interest investment was prepaid and the Company recognized a gain of \$0.5 million as a result of the prepayment.

In 2010, an Executive Vice President of the Company invested \$4.0 million for a 3% limited partnership interest in a partnership with the Company that owns Essex Skyline at MacArthur Place. The Executive Vice President's investment is equal to a pro-rata share of the contributions to the limited partnership. The Executive Vice President's investment also receives pro-rata distributions resulting from distributable cash generated by the property if and when distributions are made.

(6) Discontinued Operations

The Company determined that the disposals through the years ended December 31, 2015 and 2014 were not considered discontinued operations in accordance with ASU 2014-08. The gains related to these disposals are recorded in gains on sale of real estate and land in the consolidated statements of income.

During 2013, the Company sold Linden Square, a 183 unit community located in Seattle, Washington for \$25.3 million, resulting in a gain of \$12.7 million. Also during 2013, the Company sold Cambridge, a 40 unit property located in Chula Vista, California for \$4.7 million, resulting in a gain of \$2.5 million, and Brentwood, a 140 unit property located in Santa Ana, California for \$27.5 million, resulting in a gain of \$14.0 million.

The Company has recorded the gains on sales and operations for these various assets sold described above as part of discontinued operations in the accompanying consolidated statements of income.

The components of discontinued operations are outlined below and include the results of operations for the respective periods that the Company owned such assets, as described above (\$ in thousands):

	2013	
Revenues	\$4,454	
Property operating expenses	(1,406	)
Depreciation and amortization	(1,098	)
Expenses	(2,504	)
Operating income from real estate sold	1,950	
Gain on sale of real estate	29,223	
Income from discontinued operations	\$31,173	

## (7) Unsecured Debt

ESS does not have any indebtedness as all debt is incurred by the Operating Partnership. ESS guarantees the Operating Partnership's unsecured debt including the revolving credit facilities up to the maximum amounts and for the full term of the facilities.

Unsecured debt consists of the following as of December 31, 2015 and 2014 (\$ in thousands):

	2015	2014	Weighted Average Maturity In Years
Unsecured bonds private placement - fixed rate	\$463,891	\$463,443	3.2
Term loan - variable rate	224,467	224,130	0.9
Bonds public offering - fixed rate	2,400,322	1,915,975	6.7
Unsecured debt, net <sup>(1)</sup>	3,088,680	2,603,548	
Lines of credit, net <sup>(2)</sup>	11,707	242,824	
Total unsecured debt	\$3,100,387	\$2,846,372	
Weighted average interest rate on fixed rate unsecured and unsecured private placement bonds	3.6	% 3.6	%
Weighted average interest rate on variable rate term loan	2.4	% 2.4	%
Weighted average interest rate on lines of credit	1.9	% 1.8	%

(1) Includes unamortized premium and discounts of \$14.3 million and \$27.5 million and reduced by unamortized debt issuance costs of \$15.6 million and \$13.9 million as of December 31, 2015 and 2014, respectively.

(2) Includes unamortized debt issuance costs of \$3.3 million and \$3.6 million as of December 31, 2015 and 2014, respectively.

As of December 31, 2015 and 2014, the Company had \$465.0 million of private placement unsecured bonds outstanding at an average effective interest rate of 4.5%.

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

The following is a summary of the Company's unsecured private placement bonds as of December 31, 2015 and 2014 (\$ in thousands):

	Maturity	2015	2014	Coupon Rate	
Senior unsecured private placement notes	March 2016	\$ 150,000	\$ 150,000	4.36	%
Senior unsecured private placement notes	September 2017	40,000	40,000	4.50	%

Senior unsecured private placement notes	April 2021	100,000	100,000	4.27	%
Senior unsecured private placement notes	June 2021	50,000	50,000	4.30	%
Senior unsecured private placement notes	August 2021	50,000	50,000	4.37	%
		\$465,000	\$465,000		

As of December 31, 2015 and 2014, the Company had unsecured term loans outstanding of \$225.0 million at an average interest rate of 2.4%. These loans are included in the line "Term loan-variable rate" in the table above, and as of December 31, 2015 and 2014, the carrying value net of debt issuance costs was \$224.5 million and \$224.1 million, respectively. The term loans are at a variable interest rate of LIBOR plus 1.05%. The Company entered into interest rate swap contracts for a term of five years with a notional amount totaling \$225.0 million, which effectively converted the interest rate on \$225.0 million of the term loans to a fixed rate of 2.4%. The \$200 million tranche of this unsecured term loan has a maturity date of November 2016 and the \$25 million tranche has a maturity date of August 2017.

In March 2015, the Company issued \$500.0 million of senior unsecured notes due on April 1, 2025 with a coupon rate of 3.5% per annum and are payable on April 1<sup>st</sup> and October 1<sup>st</sup> of each year, beginning October 1, 2015 (the 2025 Notes). The 2025 Notes were offered to investors at a price of 99.747% of par value. The 2025 Notes are general unsecured senior obligations of the Operating Partnership, rank equally in right of payment with all other senior unsecured indebtedness of the Operating Partnership and are fully and unconditionally guaranteed by Essex Property Trust, Inc. These bonds are included in the line "Bonds public offering-fixed rate" in the table above, and as of December 31, 2015, the carrying value of the 2025 Notes, net of discount and debt issuance costs was \$494.8 million.

In April 2014, the Company assumed \$900.0 million aggregate principal amount of BRE's 5.500% senior notes due 2017; 5.200% senior notes due 2021; and 3.375% senior notes due 2023 (together "BRE Notes"). These notes are included in the line "Bonds public offering-fixed rate" in the table above, and as of December 31, 2015 and 2014, the carrying value of the BRE Notes, plus unamortized premium was \$919.1 million and \$931.4 million, respectively.

In April 2014, the Company issued \$400.0 million of senior unsecured notes due on May 1, 2024 with a coupon rate of 3.875% per annum and are payable on May 1<sup>st</sup> and November 1<sup>st</sup> of each year, beginning November 1, 2014 (the 2024 Notes). The 2024 Notes were offered to investors at a price of 99.234% of par value. The 2024 Notes are general unsecured senior obligations of the Operating Partnership, rank equally in right of payment with all other senior unsecured indebtedness of the Operating Partnership and are fully and unconditionally guaranteed by Essex Property Trust, Inc. These bonds are included in the line "Bonds public offering-fixed rate" in the table above, and as of December 31, 2015 and 2014, the carrying value of the 2024 Notes, net of discount and debt issuance costs was \$394.5 million and \$393.8 million, respectively.

In April 2013, the Company issued \$300.0 million of senior unsecured notes due on May 1, 2023 with a coupon rate of 3.25% per annum and are payable on May 1<sup>st</sup> and November 1<sup>st</sup> of each year, beginning November 1, 2013 (the 2023 Notes). The 2023 Notes were offered to investors at a price of 99.152% of par value. The 2023 Notes are general unsecured senior obligations of the Operating Partnership, rank equally in right of payment with all other senior unsecured indebtedness of the Operating Partnership and are fully and unconditionally guaranteed by Essex Property Trust, Inc. These bonds are included in the line “Bonds public offering-fixed rate” in the table above, and as of December 31, 2015 and 2014, the carrying value of the 2023 Notes, net of discount and debt issuance costs was \$295.9 million and \$295.5 million, respectively.

During the third quarter 2012, the Company issued \$300.0 million of senior unsecured notes due August 2022 with a coupon rate of 3.625% per annum and are payable on February 15th and August 15th of each year, beginning February 15, 2013 (the 2022 Notes). The 2022 Notes were offered to investors at a price of 98.99% of par value. The 2022 Notes are general unsecured senior obligations of the Operating Partnership, rank equally in right of payment with all other senior unsecured

indebtedness of the Operating Partnership and are fully and unconditionally guaranteed by Essex Property Trust, Inc. These bonds are included in the line "Bonds public offering-fixed rate" in the table above, and as of December 31, 2015 and 2014, the carrying value of the 2022 Notes, net of unamortized discount and debt issuance costs was \$296.0 million and \$295.3 million, respectively.

The following is a summary of the Company's senior unsecured notes as of December 31, 2015 and 2014 (\$ in thousands):

	Maturity	2015	2014	Coupon Rate	
Senior notes	March 2017	300,000	300,000	5.500	%
Senior notes	March 2021	300,000	300,000	5.200	%
Senior notes	August 2022	300,000	300,000	3.625	%
Senior notes	January 2023	300,000	300,000	3.375	%
Senior notes	May 2023	300,000	300,000	3.250	%
Senior notes	May 2024	400,000	400,000	3.875	%
Senior notes	April 2025	500,000	—	3.500	%
		2,400,000	1,900,000		

The aggregate scheduled principal payments of unsecured debt payable, excluding lines of credit, at December 31, 2015 are as follows (\$ in thousands):

2016	\$ 350,000
2017	365,000
2018	—
2019 <sup>(1)</sup>	75,000
2020	—
Thereafter	2,300,000
	\$ 3,090,000

(1) Amount does not include \$15.0 million outstanding on the Company's lines of credit as of December 31, 2015, that becomes due in December 2019 in accordance with the January 2016 amendment.

The Company has two lines of credit aggregating \$1.03 billion as of December 31, 2015. The Company has a \$1 billion credit facility with an underlying interest rate based on a tiered rate structure tied to Fitch and S&P ratings on the credit facility and the rate was LIBOR plus 0.95% as of December 31, 2015. As of December 31, 2015 and 2014, the balance of the \$1 billion credit facility was \$15.0 million and \$229.8 million, respectively. In January 2016, the facility maturity date was extended to December 31, 2019 with one 18-month extension, exercisable by the Company and the interest rate, which is based on a tiered rate structure tied to the Company's corporate ratings, was lowered to LIBOR plus 0.90%. The Company also has a working capital unsecured line of credit agreement for \$25.0 million. The underlying interest rate on the \$25.0 million line is based on a tiered rate structure tied to Fitch and S&P ratings on the credit facility of LIBOR plus 0.95%. As of December 31, 2015 and 2014, there was a zero and \$16.6 million balance, respectively, outstanding on this unsecured line. In January 2016, the maturity date was extended to January 2018 and the interest rate, which is based on a tiered rate structure tied to the Company's corporate ratings, was lowered to LIBOR plus 0.90%.

The Company's unsecured line of credit and unsecured debt agreements contain debt covenants related to limitations on indebtedness and liabilities, and maintenance of minimum levels of consolidated earnings before depreciation, interest and amortization. The Company was in compliance with the debt covenants as of December 31, 2015 and 2014.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

## (8) Mortgage Notes Payable

ESS does not have any indebtedness as all debt is incurred by the Operating Partnership. Mortgage notes payable consist of the following as of December 31, 2015 and 2014 (\$ in thousands):

	2015	2014		
Fixed rate mortgage notes payable	\$1,925,985	\$2,049,577		
Variable rate mortgage notes payable <sup>(1)</sup>	289,092	184,740		
Total mortgage notes payable <sup>(2)</sup>	\$2,215,077	\$2,234,317		
Number of properties securing mortgage notes	64	67		
Remaining terms	1-31 years	1-26 years		
Weighted average interest rate	4.4	% 4.6		%

The aggregate scheduled principal payments of mortgage notes payable at December 31, 2015 are as follows (\$ in thousands):

2016	\$29,714
2017	199,180
2018	320,622
2019	586,212
2020	693,088
Thereafter	329,451
	\$2,158,267

Variable rate mortgage notes payable, including \$257.3 million in bonds that have been converted to variable rate through total return swap contracts, consists of multi-family housing mortgage revenue bonds secured by deeds of trust on rental properties and guaranteed by collateral pledge agreements, payable monthly at a variable rate as defined in the Loan Agreement (approximately 1.2% at December 2015 and 1.8% at December 2014) plus credit

<sup>(1)</sup> enhancement and underwriting fees ranging from approximately 1.2% to 1.9%. Among the terms imposed on the properties, which are security for the bonds, is a requirement that 20% of the apartment homes are subject to tenant income criteria. Principal balances are due in full at various maturity dates from March 2019 through December 2046. Of these bonds \$20.7 million are subject to various interest rate cap agreements which limit the maximum interest rate to such bonds.

<sup>(2)</sup> Includes total unamortized premium of \$64.8 million and \$83.8 million and reduced by unamortized debt issuance costs of \$8.0 million and \$11.9 million as of December 31, 2015 and 2014, respectively.

For the Company's mortgage notes payable as of December 31, 2015, monthly interest expense and principal amortization, excluding balloon payments, totaled approximately \$7.5 million and \$2.4 million, respectively. Second deeds of trust accounted for \$48.5 million of the \$2.2 billion in mortgage notes payable as of December 31, 2015. Repayment of debt before the scheduled maturity date could result in prepayment penalties. The prepayment penalty on the majority of the Company's mortgage notes payable are computed by the greater of (a) 1% of the amount of the principal being prepaid or (b) the present value of the mortgage note payable which is calculated by multiplying the principal being prepaid by the difference between the interest rate of the mortgage note and the stated yield rate on a specified U.S. treasury security as defined in the mortgage note agreement.

## (9) Derivative Instruments and Hedging Activities

The Company uses interest rate swaps and interest rate cap contracts to manage certain interest rate risks. The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves. The fair values of interest rate swaps are determined using the market standard methodology of netting the discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). The variable cash payments (or receipts) are based on an expectation of future interest rates (forward curves) derived from observable market interest rate curves. The Company incorporates credit valuation

F- 38

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements.

The Company has entered into interest rate swap contracts with an aggregate notional amount of \$225.0 million that effectively fixed the interest rate on the \$225.0 million unsecured term loan at 2.4%. These derivatives qualify for hedge accounting.

As of December 31, 2015 the Company had interest rate caps, which are not accounted for as hedges, totaling a notional amount of \$20.7 million that effectively limit the Company's exposure to interest rate risk by providing a ceiling on the underlying variable interest rate for \$20.7 million of the Company's tax exempt variable rate debt.

As of December 31, 2015 and 2014, the aggregate carrying value of the interest rate swap contracts was a liability of \$1.0 million and \$1.8 million, respectively, and is included in other liabilities on the consolidated balance sheets. The aggregate carrying value of the interest rate cap was zero on the balance sheet as of December 31, 2015 and December 31, 2014.

Hedge ineffectiveness related to cash flow hedges, which is reported in current year income as interest expense, net was not significant for the years ended December 31, 2015, 2014 and 2013.

Additionally, the Company has entered into four total return swaps, that effectively convert \$257.3 million of mortgage notes payable to a floating interest rate based on SIFMA plus a spread. The total return swaps provide fair market value protection on the mortgage notes payable to our counterparties during the initial period of the total return swap until the Company's option to call the mortgage notes at par can be exercised. The Company can currently call one of the total return swaps with \$114.4 million of the outstanding debt at par, while the call option on the other three total return swaps relating to \$142.9 million of the outstanding debt can be exercised starting on January 1, 2017. These derivatives do not qualify for hedge accounting and had a carrying and fair value of \$4 thousand at December 31, 2015. These total return swaps are scheduled to mature between September 2021 and November 2022. The Company held no total return swaps at December 31, 2014. The realized gains of \$5.7 million were reported in current year income as total return swap income. No such income or expense was incurred for the years ended December 31, 2014 and 2013.

**(10) Lease Agreements**

As of December 31, 2015 the Company is a lessor for three commercial buildings and the commercial portions of 33 mixed use communities. The tenants' lease terms expire at various times through 2031. The future minimum non-cancelable base rent to be received under these operating leases for each of the years ending after December 31 is summarized as follows (\$ in thousands):

	Future Minimum Rent
2016	\$11,067
2017	10,078
2018	9,211
2019	8,467

2020	7,690
Thereafter	24,955
	\$71,468

(11) Equity Transactions

Preferred Securities Offerings

During the second quarter of 2011, the Company issued 2,950,000 shares of 7.125% Series H Cumulative Redeemable Preferred Stock ("Series H") at a price of \$25.00 per share for net proceeds of \$71.2 million, net of costs and original issuance discounts. The Series H has no maturity date and generally may not be called by the Company before April 13, 2016. Net

proceeds from the Series H offering were contributed to the Operating Partnership for a 7.125% Series H Cumulative Redeemable Preferred Interest. As of December 31, 2015 and 2014, there were 8,000,000 shares authorized and 2,950,000 shares outstanding of Series H with an aggregate liquidation value of \$73.8 million.

Common Stock Offerings

During 2015, the Company issued 1,481,737 shares of common stock, through our equity distribution program, at an average price of \$226.46 for net proceeds of \$332.3 million.

In April 2014, Essex issued approximately 23,067,446 shares of Essex common stock as Stock Consideration in the BRE merger at an average price of \$163.82.

During 2014, Essex sold 2,964,315 shares of common stock for proceeds of \$534.0 million, net of fees and commissions, at an average price of \$181.56.

Operating Partnership Units and Long Term Incentive Plan (“LTIP”) Units

As of December 31, 2015 and 2014, the Operating Partnership had outstanding 2,070,360 and 2,076,810 operating partnership units and 144,185 and 91,348 vested LTIP units, respectively. The Operating Partnership’s general partner, ESS, owned 96.7% of the partnership interests in the Operating Partnership at both December 31, 2015 and 2014, and ESS is responsible for the management of the Operating Partnership’s business. As the general partner of the Operating Partnership, ESS effectively controls the ability to issue common stock of ESS upon a limited partner’s notice of redemption. ESS has generally acquired OP units upon a limited partner’s notice of redemption in exchange for shares of its common stock. The redemption provisions of OP units owned by limited partners that permit ESS to settle in either cash or common stock at the option of ESS were further evaluated in accordance with applicable accounting guidance to determine whether temporary or permanent equity classification on the balance sheet is appropriate. The Operating Partnership evaluated this guidance, including the requirement to settle in unregistered shares, and determined that, with few exceptions, these OP units meet the requirements to qualify for presentation as permanent equity.

LTIP units represent an interest in the Operating Partnership for services rendered or to be rendered by the LTIP unit holder in its capacity as a partner, or in anticipation of becoming a partner, in the Operating Partnership. Upon the occurrence of specified events, LTIP units may over time achieve full parity with common units of the Operating Partnership for all purposes. Upon achieving full parity, LTIP units will be exchanged for an equal number of the OP Units.

The redemption value of OP and LTIP units owned by the limited partners, not including ESS, had such units been redeemed at December 31, 2015, was approximately \$530.2 million based on the closing price of ESS’s common stock as of December 31, 2015.

## (12) Net Income Per Common Share and Net Income Per Common Unit

Essex Property Trust, Inc.

Basic and diluted income from continuing and discontinued operations per share is calculated as follows for the years ended December 31 (\$ in thousands, except share and per share amounts):

	2015		2014		2013				
	Income	Weighted- average Common Shares	Per Common Share Amount	Income	Weighted- average Common Shares	Per Common Share Amount	Income	Weighted- average Common Shares	Per Common Share Amount
Basic:									
Income from continuing operations available to common stockholders	\$226,865	64,871,717	\$3.50	\$116,859	56,546,959	\$2.07	\$121,324	37,248,960	\$3.26
Income from discontinued operations available to common stockholders	—	64,871,717	—	—	56,546,959	—	29,487	37,248,960	0.79
	\$226,865		\$3.50	\$116,859		\$2.07	\$150,811		\$4.05
Effect of Dilutive Securities <sup>(1)</sup>	—	189,968	—	—	149,566	—	—	86,335	—
Diluted:									
Income from continuing operations available to common stockholders <sup>(1)</sup>	\$226,865	65,061,685	\$3.49	\$116,859	56,696,525	\$2.06	\$121,324	37,335,295	\$3.25
Income from discontinued operations available to common stockholders	—	65,061,685	—	—	56,696,525	—	29,487	37,335,295	0.79
	\$226,865		\$3.49	\$116,859		\$2.06	\$150,811		\$4.04

<sup>(1)</sup> Weighted average convertible limited partnership units of 2,182,467, 2,224,707, and 2,131,425, which include vested Series Z Incentive Units, Series Z-1 Incentive Units, 2014 Long-Term Incentive Plan Units, and 2015

Long-Term Incentive Plan Units, for the years ended December 31, 2015, 2014 and 2013, respectively, were not included in the determination of diluted earnings per share calculation because they were anti-dilutive. Additionally, excludes 963,172 DownREIT units as they are anti-dilutive.

Stock options of 54,100, 10,843, and 168,325, for the years ended December 31, 2015, 2014, and 2013, respectively, were not included in the diluted earnings per share calculation because the assumed proceeds per share of these options plus the average unearned compensation were greater than the average market price of the common stock for the years ended and, therefore, were anti-dilutive.

All shares of cumulative convertible Series H preferred interest have been excluded from diluted earnings per unit for the years ended 2015, 2014, and 2013 respectively, as the effect was anti-dilutive. All shares of cumulative convertible Series G preferred interest have been excluded from diluted earnings per unit for the years ended 2014 and 2013 respectively, as the effect was anti-dilutive.

Income available to common unitholders	\$234,689		\$3.49	\$121,726		\$2.07	\$159,749		\$4.05

Stock options of 54,100, 10,843, and 168,325, for the years ended December 31, 2015, 2014, and 2013, respectively, were not included in the diluted earnings per unit calculation because the assumed proceeds per share <sup>(1)</sup> of these options plus the average unearned compensation were greater than the average market price of the common shares for the years ended and, therefore, were anti-dilutive. Additionally, excludes 963,172 DownREIT units as they are anti-dilutive.

The cumulative convertible Series H preferred interest have been excluded from diluted earnings per unit for the years ended 2015, 2014, and 2013 respectively, as the effect was anti-dilutive. The cumulative convertible Series G preferred interest have been excluded from diluted earnings per unit for the years ended 2014 and 2013 respectively, as the effect was anti-dilutive.

### (13) Equity Based Compensation Plans

#### Stock Options and Restricted Stock

In May 2013, stockholders approved the Company's 2013 Stock Award and Incentive Compensation Plan ("2013 Plan"). The 2013 Plan became effective on June 1, 2013 and serves as the successor to the Company's 2004 Stock Incentive Plan (the "2004 Plan"), and no additional equity awards can be granted under the 2004 Plan after the date the 2013 Plan became effective.

The Company's 2013 Plan provides incentives to attract and retain officers, directors and key employees. The 2013 Plan provides for the grants of options to purchase shares of common stock, grants of restricted stock and other award types. Under the 2013 Plan, the maximum aggregate number of shares that may be issued is 1,000,000, plus any shares that have not been issued under the 2004 Plan, including shares subject to outstanding awards under the 2004 Plan that are not issued or delivered to a participant for any reason. The 2013 Plan is administered by the Compensation Committee of the Board of Directors, which is comprised of independent directors. The Compensation Committee is authorized to establish the exercise price;

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

however, the exercise price cannot be less than 100% of the fair market value of the common stock on the grant date. The Company's options have a life of five to ten years. Option grants for officers and employees fully vest between 0 and 5 years after the grant date.

Stock-based compensation expense for options and restricted stock under the fair value method totaled \$6.1 million, \$6.1 million, and \$2.3 million for years ended December 31, 2015, 2014 and 2013 respectively. Stock-based compensation expense for options and restricted stock for the year ended December 31, 2015 and 2014, includes \$0.2 million and \$3.6 million related to the BRE merger, of which \$0.1 million and \$1.7 million relates to merger and integration expenses, and which is recorded in merger and integration expense in the consolidated statements of income, respectively. In the fourth quarter of 2015, stock-based compensation expense included \$2.7 million related to an immediate vesting of options and restricted stock for bonuses awarded based on asset dispositions, which is recorded as a cost of real estate and land sold. Stock-based compensation for options and restricted stock related to recipients who are direct and incremental to projects under development were capitalized and totaled \$0.3 million, \$0.4 million, and \$0.4 million for the years ended December 31, 2015, 2014 and 2013, respectively. The intrinsic value of the options exercised totaled \$19.4 million, \$12.7 million, and \$3.0 million, for the years ended December 31, 2015, 2014, and 2013 respectively. The intrinsic value of the options exercisable totaled \$29.8 million, as of December 31, 2015.

Total unrecognized compensation cost related to unvested stock options totaled \$3.4 million as of December 31, 2015 and the unrecognized compensation cost is expected to be recognized over a period of 0 to 5 years.

The average fair value of stock options granted for the years ended December 31, 2015, 2014 and 2013 was \$22.78, \$20.56 and \$15.80, respectively. Certain stock options granted in 2015, 2014, and 2013 included a \$75 cap, a \$100 cap or a \$125 cap on the appreciation of the market price over the exercise price. The fair value of stock options was estimated on the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions used for grants:

	2015		2014		2013	
Stock price	\$227.75		\$176.65		\$153.54	
Risk-free interest rates	1.83	%	2.37	%	2.68	%
Expected lives	6 years		8 years		8 years	
Volatility	20.06	%	18.00	%	18.03	%
Dividend yield	2.73	%	2.90	%	3.15	%

A summary of the status of the Company's stock option plans as of December 31, 2015, 2014, and 2013 and changes during the years ended on those dates is presented below:

	2015		2014		2013	
	Shares	Weighted-average exercise price	Shares	Weighted-average exercise price	Shares	Weighted-average exercise price

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 December 31, 2015, 2014, and 2013

The following table summarizes information about stock options outstanding as of December 31, 2015:

Range of exercise prices	Options outstanding		Weighted-average exercise price	Options exercisable	
	Number outstanding as of December 31, 2015	Weighted-average contractual life (years)		Number exercisable as of December 31, 2015	Weighted-average exercise price
\$66.05 - \$101.01	15,901	3.2	\$74.47	15,901	\$74.47
\$105.64 - \$161.98	367,024	5.3	139.73	218,041	135.00
\$164.76 - \$229.43	142,169	7.5	203.37	108,106	199.02
	525,094	5.8	154.98	342,048	152.42

The following table summarizes information about restricted stock outstanding as of December 31, 2015, 2014 and 2013 and changes during the years ended:

	2015		2014		2013	
	Shares	Weighted-average grant price	Shares	Weighted-average grant price	Shares	Weighted-average grant price
Unvested at beginning of year	25,820	\$168.22	16,176	\$108.06	24,922	\$104.52
Granted	56,177	155.21	22,014	194.03	1,556	158.75
Granted - BRE restricted stock converted	—	—	119,411	173.82	—	—
Vested	(22,939)	148.20	(126,931)	171.56	(7,211)	109.86
Forfeited and canceled	(4,382)	122.06	(4,850)	135.10	(3,091)	100.84
Unvested at end of year	54,676	147.10	25,820	168.22	16,176	108.06

The unrecognized compensation cost related to unvested restricted stock totaled \$7.7 million as of December 31, 2015 and is expected to be recognized over a period of 0 to 4 years.

#### Long Term Incentive Plans – LTIP Units

On December 9, 2014, the Operating Partnership issued 44,750 units under the 2015 Long-Term Incentive Plan Award agreements to executives of the Company. The 2015 Long-Term Incentive Plan Units (the “2015 LTIP Units”) are subject to forfeiture based on performance-based and service based conditions. An additional 24,000 units were granted subject only to performance-based criteria and were fully vested on the date granted. The 2015 LTIP Units, that were subject to vesting, will vest at 20% per year on each of the first five anniversaries of the initial grant date. The 2015 LTIP Units performance conditions measurement ended on December 9, 2015 and 95.75% of the units awarded were earned by the recipients. 2015 LTIP Units not earned based on the performance-based criteria were automatically forfeited by the recipients. The 2015 LTIP Units, once earned and vested, are convertible one-for-one into common units of the Operating Partnership which, in turn, are convertible into common stock of the Company subject to a ten-year liquidity restriction.

In December 2013, the Operating Partnership issued 50,500 units under the 2014 Long-Term Incentive Plan Award agreements to executives of the Company. The 2014 Long-Term Incentive Plan Units (the “2014 LTIP Units”) were subject to forfeiture based on performance-based conditions and are currently subject to service based vesting. The 2014 LTIP Units vest 25% per year on each of the first four anniversaries of the initial grant date. In December 2014, the Company achieved the performance criteria and all of the 2014 LTIP Units awarded were earned by the recipients, subject to satisfaction of service based vesting conditions. The 2014 LTIP Units are convertible one-for-one into common units of the Operating Partnership which, in turn, are convertible into common stock of the Company subject to a ten year liquidity restriction.

---

Table of Contents

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

The estimated fair value of the 2015 LTIP Units and 2014 LTIP Units were determined on the grant date using Monte Carlo simulations under a risk-neutral premise and considered Essex's stock price on the date of grant, the unpaid dividends on unvested units and the discount factor for 10 years of illiquidity.

Prior to 2013, the Company issued Series Z Incentive Units and Series Z-1 Incentive Units (collectively referred to as "Z Units") of limited partnership interest in the Operating Partnership. Vesting in the Z Units is based on performance criteria established in the plan. The criteria can be revised by the Board's Compensation Committee if the Committee deems that the plan's criterion is unachievable for any given year. The sale of Z Units is contractually prohibited. Z Units are convertible into Operating Partnership units which are exchangeable for shares of the Company's common stock that have marketability restrictions. The estimated fair value of Z Units were determined on the grant date and considered the Company's stock price on the date of grant, the dividends that are not paid on unvested units and a marketability discount for the 8 to 15 years of illiquidity. Compensation expense is calculated by multiplying estimated vesting increases for the period by the estimated fair value as of the grant date.

During 2011 and 2010, the Operating Partnership issued 154,500 Series Z-1 Incentive Units (the "Z-1 Units") of limited partner interest to executives of the Company. The Z-1 Units are convertible one-for-one into common units of the Operating Partnership (which, in turn, are convertible into common stock of the Company) upon the earlier to occur of 100 percent vesting of the units or the year 2026. The conversion ratchet (accounted for as vesting) of the Z-1 Units into common units, is to increase consistent with the Company's annual FFO growth, but is not to be less than zero or greater than 14 percent. Z-1 Unit holders are entitled to receive distributions, on vested units, that are now equal to dividends distributed to common stockholders.

Stock-based compensation expense for LTIP and Z Units under the fair value method totaled approximately \$3.5 million, \$6.0 million and \$2.2 million for the years ended December 31, 2015, 2014 and 2013, respectively. Stock-based compensation expense for the year ended December 31, 2014 includes \$1.7 million related to merger and integration expenses and is recorded in merger and integration expense in the consolidated statements of income. No such amounts were recorded in merger and integration expense in 2015. In the fourth quarter of 2014, stock-based compensation expense included \$2.4 million related to an immediate vesting of certain of the 2015 LTIP Units. No such amounts were recorded in 2015. Stock-based compensation related to LTIP Units attributable to recipients who are direct and incremental to these projects was capitalized to real estate under development and totaled approximately \$0.5 million, \$0.4 million, and \$0.5 million, for the years ended December 31, 2015, 2014, and 2013, respectively. The intrinsic value of the vested and unvested LTIP Units totaled \$59.9 million as of December 31, 2015. Total unrecognized compensation cost related to the unvested LTIP Units under the LTIP Units plans totaled \$6.0 million as of December 31, 2015. On a weighted average basis, the unamortized cost for the 2014 and 2015 LTIP Units and the Z Units is expected to be recognized over the next 3.2 years and 9.5 years, respectively.

## (14) Segment Information

The Company's segment disclosures present the measure used by the chief operating decision makers for purposes of assessing each segment's performance. Essex's chief operating decision makers are comprised of several members of its executive management team who use NOI to assess the performance of the business for the Company's reportable operating segments. NOI represents total property revenue less direct property operating expenses.

The executive management team evaluates the Company's operating performance geographically. The Company defines its reportable operating segments as the three geographical regions in which its communities are located: Southern California, Northern California and Seattle Metro.

Excluded from segment revenues and net operating income are communities classified in discontinued operations, management and other fees from affiliates, and interest and other income. Non-segment revenues and net operating income included in the following schedule also consist of revenue generated from commercial properties. Other non-segment assets include real estate under development, co-investments, cash and cash equivalents, marketable securities, notes and other receivables and prepaid expenses and other assets.

## (15) 401(k) Plan

The Company has a 401(k) benefit plan (the "Plan") for all eligible employees. Employee contributions are limited by the maximum allowed under Section 401(k) of the Internal Revenue Code. The Company matches 50% of the employee contributions up to a specified maximum. Company contributions to the Plan were approximately \$1.6 million, \$0.9 million, and \$0.7 million for the years ended December 31, 2015, 2014, and 2013, respectively.

## (16) Commitments and Contingencies

As of December 31, 2015, the Company had seven non-cancelable ground leases for certain apartment communities and buildings that expire between 2027 and 2082. Ground lease payments are typically the greater of a stated minimum or a percentage of gross rents generated by these apartment communities. Total minimum lease commitments, under ground leases and operating leases, are approximately \$2.7 million per year for the next five years and \$131.9 million thereafter.

To the extent that an environmental matter arises or is identified in the future that has other than a remote risk of having a material impact on the financial statements, the Company will disclose the estimated range of possible outcomes associated with it and, if an outcome is probable, accrue an appropriate liability for that matter. The Company will consider whether any such matter results in an impairment of value on the affected property and, if so, impairment will be recognized.

The Company has no way of determining at this time the magnitude of any potential liability to which it may be subject arising out of unknown environmental conditions with respect to the communities currently or formerly owned by the Company. No assurance can be given that: existing environmental assessments conducted with respect to any of these communities have revealed all environmental conditions or potential liabilities associated with such conditions; any prior owner or operator of a property did not create any material environmental condition not known

to the Company; or a material environmental condition does not otherwise exist as to any one or more of the communities. The Company has limited insurance coverage for some of the types of environmental conditions and associated liabilities described above.

The Company has entered into transactions that may require the Company to pay the tax liabilities of the partners in the Operating Partnership or in the DownREIT entities. These transactions are within the Company's control. Although the Company plans to hold the contributed assets or defer recognition of gain on their sale pursuant to like-kind exchange rules under Section 1031 of the Internal Revenue Code, the Company can provide no assurance that it will be able to do so and if such tax liabilities were incurred they may have a material impact on the Company's financial position.

ESSEX PORTFOLIO, L.P. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2015, 2014, and 2013

There have been an increasing number of lawsuits against owners and managers of apartment communities alleging personal injury and property damage caused by the presence of mold in the residential units and common areas of those communities. Some of these lawsuits have resulted in substantial monetary judgments or settlements. The Company has been sued for mold related matters and has settled some, but not all, such suits. Insurance carriers have reacted to the increase in mold related liability awards by excluding mold related claims from standard general liability policies and pricing mold endorsements at prohibitively high rates. The Company has, however, purchased pollution liability insurance which includes some coverage for mold claims. The Company has also adopted policies intended to promptly address and resolve reports of mold and to minimize any impact mold might have on residents of its properties. The Company believes its mold policies and proactive response to address reported mold exposures reduces its risk of loss from mold claims. While no assurances can be given that the Company has identified and responded to all mold occurrences, the Company promptly addresses and responds to all known mold reports. Liabilities resulting from such mold related matters are not expected to have a material adverse effect on the Company's financial condition, results of operations or cash flows. As of December 31, 2015, potential liabilities for mold and other environmental liabilities are not quantifiable and an estimate of possible loss cannot be made.

The Company carries comprehensive liability, fire, extended coverage and rental loss insurance for each of the communities. There are, however, certain types of extraordinary losses, such as, for example, losses from terrorism or earthquakes, for which the Company has limited insurance coverage. Substantially all of the communities are located in areas that are subject to earthquake activity. The Company has established a wholly-owned insurance subsidiary, Pacific Western Insurance LLC ("PWI"). Through PWI, the Company is self-insured as it relates to earthquake related losses. Additionally, since January 2008, PWI has provided property and casualty insurance coverage for the first \$5.0 million of the Company's property level insurance claims per incident. As of December 31, 2015, PWI has cash and marketable securities of approximately \$60.3 million. These assets are consolidated in the Company's financial statements. Beginning in 2013, the Company has obtained limited third party seismic insurance on selected assets in the Company's co-investments.

On December 19, 2014, a putative class action was filed against the Company in the U.S. District Court for the Northern District of California, entitled Foster v. Essex Property Trust, Inc. alleging that the Company failed to properly secure the personally-identifying information of its residents. The lawsuit seeks the recovery of unspecified damages and certain injunctive relief. This lawsuit was filed in connection with a cyber-intrusion that the Company discovered in the third quarter of 2014. At this point, the Company is unable to predict the developments in, outcome of, and/or economic and/or other consequences of this litigation or predict the developments in, outcome of, and/or other consequences arising out of any potential future litigation or government inquiries related to this matter.

The Company is subject to various other legal and/or regulatory proceedings arising in the course of its business operations. We believe that, with respect to such matters that we are currently a party to, the ultimate disposition of any such matter will not result in a material adverse effect on the Company's financial condition, results of operations or cash flows.

(17) Subsequent Events

In January 2016, the Company acquired Mio, a 103 unit apartment community, located in San Jose, CA for \$51.3 million,

In January 2016, a Company co-investment, BEXAEW, LLC, sold The Heights, a 332 unit apartment community, located in Chino Hills, CA for total proceeds of \$93.8 million, of which \$50.3 million was used to repay the loan on the property. The Company has a 50% ownership interest in the BEXAEW, LLC joint venture.

In January 2016, the Company sold its former headquarters office building located in Palo Alto, CA for total proceeds of \$18.0 million.

In January 2016, the Company paid off \$150.0 million in private placement unsecured bonds that had an interest rate of 4.36%.

In February 2016, the Company sold Harvest Park, a 104 unit community located in Santa Rosa, CA for \$30.5 million.
