QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the quarterly period ended September 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
— OF 1934

For the transition period from _____ to _____

Commission file number 0-23406
Southern Missouri Bancorp, Inc.
(Exact name of registrant as specified in its charter)

Missouri 43-1665523
(State or jurisdiction of incorporation) (IRS employer id. no.)

531 Vine Street Poplar Bluff, MO 63901
(Address of principal executive offices) (Zip code)

(573) 778-1800
Registrant's telephone number, including area code

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer," and "smaller reporting

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10-Q

company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12 b-2 of the Exchange Act)

Yes No

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

Class	Outstanding at November 8, 2016
Common Stock, Par Value \$.01	7,436,266 Shares

SOUTHERN MISSOURI BANCORP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1: Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Securities and Exchange Commission (SEC) Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all material adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. The consolidated balance sheet of the Company as of June 30, 2016, has been derived from the audited consolidated balance sheet of the Company as of that date. Operating results for the three-month period ended September 30, 2016, are not necessarily indicative of the results that may be expected for the entire fiscal year. For additional information, refer to the audited consolidated financial statements included in the Company's June 30, 2016, Form 10-K, which was filed with the SEC.

The accompanying consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Southern Bank. All significant intercompany accounts and transactions have been eliminated in consolidation.

Note 2: Organization and Summary of Significant Accounting Policies

Organization. Southern Missouri Bancorp, Inc., a Missouri corporation (the Company) was organized in 1994 and is the parent company of Southern Bank (the Bank). Substantially all of the Company's consolidated revenues are derived from the operations of the Bank, and the Bank represents substantially all of the Company's consolidated assets and liabilities. SB Real Estate Investments, LLC is a wholly-owned subsidiary of the Bank formed to hold Southern Bank Real Estate Investments, LLC. Southern Bank Real Estate Investments, LLC is a REIT which is controlled by the investment subsidiary, but which has other preferred shareholders in order to meet the requirements to be a REIT. At September 30, 2016, assets of the REIT were approximately \$406 million, and consisted primarily of loan participations acquired from the Bank.

The Bank is primarily engaged in providing a full range of banking and financial services to individuals and corporate customers in its market areas. The Bank and Company are subject to competition from other financial institutions. The Bank and Company are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities.

Basis of Financial Statement Presentation. The financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the United States of America and general practices within the banking industry. In the normal course of business, the Company encounters two significant types of risk: economic and regulatory. Economic risk is comprised of interest rate risk, credit risk, and market risk. The Company is subject to interest rate risk to the degree that its interest-bearing liabilities reprice on a different basis than its interest-earning assets. Credit risk is the risk of default on the Company's investment or loan portfolios resulting from the borrowers' inability or unwillingness to make contractually required payments. Market risk reflects changes in the value of the investment portfolio, collateral underlying loans receivable, and the value of the Company's investments in real estate.

Principles of Consolidation. The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, the Bank. All significant intercompany accounts and transactions have been eliminated.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses, estimated fair values of purchased loans, other-than-temporary impairments (OTTI), and fair value of financial instruments.

7

Cash and Cash Equivalents. For purposes of reporting cash flows, cash and cash equivalents includes cash, due from depository institutions and interest-bearing deposits in other depository institutions with original maturities of three months or less. Interest-bearing deposits in other depository institutions were \$3.0 million and \$10.5 million at September 30 and June 30, 2016, respectively. The deposits are held in various commercial banks in amounts not exceeding the FDIC's deposit insurance limits, as well as at the Federal Reserve and the Federal Home Loan Bank of Des Moines.

Interest-bearing Time Deposits. Interest bearing deposits in banks mature within seven years and are carried at cost.

Available for Sale Securities. Available for sale securities, which include any security for which the Company has no immediate plan to sell but which may be sold in the future, are carried at fair value. Unrealized gains and losses, net of tax, are reported in accumulated other comprehensive income, a component of stockholders' equity. All securities have been classified as available for sale.

Premiums and discounts on debt securities are amortized or accreted as adjustments to income over the estimated life of the security using the level yield method. Realized gains or losses on the sale of securities is based on the specific identification method. The fair value of securities is based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

The Company does not invest in collateralized mortgage obligations that are considered high risk.

When the Company does not intend to sell a debt security, and it is more likely than not the Company will not have to sell the security before recovery of its cost basis, it recognizes the credit component of an other-than-temporary impairment of a debt security in earnings and the remaining portion in other comprehensive income. As a result of this guidance, the Company's consolidated balance sheet as of the dates presented reflects the full impairment (that is, the difference between the security's amortized cost basis and fair value) on debt securities that the Company intends to sell or would more likely than not be required to sell before the expected recovery of the amortized cost basis. For available-for-sale debt securities that management has no intent to sell and believes that it more likely than not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the noncredit loss is recognized in accumulated other comprehensive loss. The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected based on cash flow projections.

Federal Home Loan Bank and Federal Reserve Bank Stock. The Bank is a member of the Federal Home Loan Bank (FHLB) system, and the Federal Reserve Bank of St. Louis. Capital stock of the FHLB and the Federal Reserve is a required investment based upon a predetermined formula and is carried at cost.

Loans. Loans are generally stated at unpaid principal balances, less the allowance for loan losses and net deferred loan origination fees.

Interest on loans is accrued based upon the principal amount outstanding. The accrual of interest on loans is discontinued when, in management's judgment, the collectability of interest or principal in the normal course of business is doubtful. The Company complies with regulatory guidance which indicates that loans should be placed in nonaccrual status when 90 days past due, unless the loan is both well-secured and in the process of collection. A loan that is "in the process of collection" may be subject to legal action or, in appropriate circumstances, through other collection efforts reasonably expected to result in repayment or restoration to current status in the near future. A loan is considered delinquent when a payment has not been made by the contractual due date. Interest income previously accrued but not collected at the date a loan is placed on nonaccrual status is reversed against interest income. Cash

receipts on a nonaccrual loan are applied to principal and interest in accordance with its contractual terms unless full payment of principal is not expected, in which case cash receipts, whether designated as principal or interest, are applied as a reduction of the carrying value of the loan. A nonaccrual loan is generally returned to accrual status when principal and interest payments are current, full collectability of principal and interest is reasonably assured, and a consistent record of performance has been demonstrated.

The allowance for losses on loans represents management's best estimate of losses probable in the existing loan portfolio. The allowance for losses on loans is increased by the provision for losses on loans charged to expense and reduced by loans charged off, net of recoveries. Loans are charged off in the period deemed uncollectible, based on management's analysis of expected cash flows (for non-collateral dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries of loans previously charged off, if any, are credited to the allowance when received. The provision for losses on loans is determined based on management's assessment of several factors: reviews and evaluations of specific loans, changes in the nature and volume of the loan portfolio, current economic conditions and the related impact on specific borrowers and industry groups, historical loan loss experience, the level of classified and nonperforming loans and the results of regulatory examinations.

Loans are considered impaired if, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Depending on a particular loan's circumstances, we measure impairment of a loan based upon either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral less estimated costs to sell if the loan is collateral dependent. Valuation allowances are established for collateral-dependent impaired loans for the difference between the loan amount and fair value of collateral less estimated selling costs. For impaired loans that are not collateral dependent, a valuation allowance is established for the difference between the loan amount and the present value of expected future cash flows discounted at the historical effective interest rate or the observable market price of the loan. Impairment losses are recognized through an increase in the required allowance for loan losses. Cash receipts on loans deemed impaired are recorded based on the loan's separate status as a nonaccrual loan or an accrual status loan.

Some loans are accounted for in accordance with ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. For these loans ("purchased credit impaired loans"), the Company recorded a fair value discount and began carrying them at book value less their face amount (see Note 4). For these loans, we determined the contractual amount and timing of undiscounted principal and interest payments (the "undiscounted contractual cash flows"), and estimated the amount and timing of undiscounted expected principal and interest payments, including expected prepayments (the "undiscounted expected cash flows"). Under acquired impaired loan accounting, the difference between the undiscounted contractual cash flows and the undiscounted expected cash flows is the nonaccretable difference. The nonaccretable difference is an estimate of the loss exposure of principal and interest related to the purchased credit impaired loans, and the amount is subject to change over time based on the performance of the loans. The carrying value of purchased credit impaired loans is initially determined as the discounted expected cash flows. The excess of expected cash flows at acquisition over the initial fair value of the purchased credit impaired loans is referred to as the "accretable yield" and is recorded as interest income over the estimated life of the acquired loans using the level-yield method, if the timing and amount of the future cash flows is reasonably estimable. The carrying value of purchased credit impaired loans is reduced by payments received, both principal and interest, and increased by the portion of the accretable yield recognized as interest income. Subsequent to acquisition, the Company evaluates the purchased credit impaired loans on a quarterly basis. Increases in expected cash flows compared to those previously estimated increase the accretable yield and are recognized as interest income prospectively. Decreases in expected cash flows compared to those previously estimated decrease the accretable yield and may result in the establishment of an allowance for loan losses and a provision for loan losses. Purchased credit impaired loans are generally considered accruing and performing loans, as the loans accrete interest income over the estimated life of the loan when expected cash flows are reasonably estimable. Accordingly, purchased credit impaired loans that are contractually past due are still considered to be accruing and performing as long as there is an expectation that the estimated cash flows will be received. If the timing and amount of cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans.

Loan fees and certain direct loan origination costs are deferred, and the net fee or cost is recognized as an adjustment to interest income using the interest method over the contractual life of the loans.

Foreclosed Real Estate. Real estate acquired by foreclosure or by deed in lieu of foreclosure is initially recorded at fair value less estimated selling costs. Costs for development and improvement of the property are capitalized.

Valuations are periodically performed by management, and an allowance for losses is established by a charge to operations if the carrying value of a property exceeds its estimated fair value, less estimated selling costs.

Loans to facilitate the sale of real estate acquired in foreclosure are discounted if made at less than market rates. Discounts are amortized over the fixed interest period of each loan using the interest method.

Premises and Equipment. Premises and equipment are stated at cost less accumulated depreciation and include expenditures for major betterments and renewals. Maintenance, repairs, and minor renewals are expensed as incurred. When property is retired or sold, the retired asset and related accumulated depreciation are removed from the accounts and the resulting gain or loss taken into income. The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If such assets are considered to be impaired, the impairment loss recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets.

Depreciation is computed by use of straight-line and accelerated methods over the estimated useful lives of the assets. Estimated lives are generally seven to forty years for premises, three to seven years for equipment, and three years for software.

Bank Owned Life Insurance. Bank owned life insurance policies are reflected in the consolidated balance sheets at the estimated cash surrender value. Changes in the cash surrender value of these policies, as well as a portion of the insurance proceeds received, are recorded in noninterest income in the consolidated statements of income.

Goodwill. The Company's goodwill is evaluated annually for impairment or more frequently if impairment indicators are present. A qualitative assessment is performed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not the fair value is less than the carrying amount, including goodwill. If, based on the evaluation, it is determined to be more likely than not that the fair value is less than the carrying value, then goodwill is tested further for impairment. If the implied fair value of goodwill is lower than its carrying amount, a goodwill impairment is indicated and goodwill is written down to its implied fair value. Subsequent increases in goodwill value are not recognized in the financial statements.

Intangible Assets. The Company's intangible assets at September 30, 2016 included gross core deposit intangibles of \$5.9 million with \$3.1 million accumulated amortization, gross other identifiable intangibles of \$3.8 million with accumulated amortization of \$3.8 million, and FHLB mortgage servicing rights of \$310,000. At June 30, 2016, the Company's intangible assets included gross core deposit intangibles of \$5.9 million with \$3.0 million accumulated amortization, and gross other identifiable intangibles of \$3.8 million with accumulated amortization of \$3.8 million, and FHLB mortgage servicing rights of \$275,000. The Company's core deposit intangible assets are being amortized using the straight line method, over periods ranging from five to six years, with amortization expense expected to be approximately \$684,000 in the remainder of fiscal 2017, \$911,000 in fiscal 2018, \$655,000 in fiscal 2019, \$500,000 in fiscal 2020, and \$42,000 in fiscal 2021.

Income Taxes. The Company accounts for income taxes in accordance with income tax accounting guidance (ASC 740, Income Taxes). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Company determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

The Company recognizes interest and penalties on income taxes as a component of income tax expense.

The Company files consolidated income tax returns with its subsidiaries.

Incentive Plan. The Company accounts for its Management and Recognition Plan (MRP) and Equity Incentive Plan (EIP) in accordance with ASC 718, "Share-Based Payment." Compensation expense is based on the market price of the Company's stock on the date the shares are granted and is recorded over the vesting period. The difference between the aggregate purchase price and the fair value on the date the shares are considered earned represents a tax benefit to the Company that is recorded as an adjustment to additional paid in capital

Outside Directors' Retirement. The Bank adopted a directors' retirement plan in April 1994 for outside directors. The directors' retirement plan provides that each non-employee director (participant) shall receive, upon termination of service on the Board on or after age 60, other than termination for cause, a benefit in equal annual installments over a five year period. The benefit will be based upon the product of the participant's vesting percentage and the total Board fees paid to the participant during the calendar year preceding termination of service on the Board. The vesting percentage shall be determined based upon the participant's years of service on the Board.

In the event that the participant dies before collecting any or all of the benefits, the Bank shall pay the participant's beneficiary. No benefits shall be payable to anyone other than the beneficiary, and benefits shall terminate on the death of the beneficiary.

Stock Options. Compensation cost is measured based on the grant-date fair value of the equity instruments issued, and recognized over the vesting period during which an employee provides service in exchange for the award.

Earnings Per Share. Basic earnings per share available to common stockholders is computed using the weighted-average number of common shares outstanding. Diluted earnings per share available to common stockholders includes the effect of all weighted-average dilutive potential common shares (stock options and warrants) outstanding during each period. All per share data has been restated to reflect the two-for-one common stock split in the form of a 100% common stock dividend paid on January 30, 2015.

Comprehensive Income. Comprehensive income consists of net income and other comprehensive income, net of applicable income taxes. Other comprehensive income includes unrealized appreciation (depreciation) on available-for-sale securities, unrealized appreciation (depreciation) on available-for-sale securities for which a portion of an other-than-temporary impairment has been recognized in income, and changes in the funded status of defined benefit pension plans.

Transfers Between Fair Value Hierarchy Levels. Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs) and Level 3 (significant unobservable inputs) are recognized on the period ending date.

The following paragraphs summarize the impact of new accounting pronouncements:

In June 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-13, Financial Instruments – Credit Losses (Topic 326). The Update amends guidance on reporting credit losses for assets held at amortized cost basis and available for sale debt securities. For assets held at amortized cost basis, Topic 326 eliminates the probable initial recognition threshold in current GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses. The update affects loans, debt securities, trade receivables, net investments in leases, off balance sheet credit exposures, and any other financial assets not excluded from the scope that have the contractual right to receive cash. For public companies, the ASU is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Management is evaluating the impact that this new guidance will have on the Company's consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, "Leases," to revise the accounting related to lease accounting. Under the new guidance, a lessee is required to record a right-of-use (ROU) asset and a lease liability on the balance

sheet for all leases with terms longer than 12 months. The ASU is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Adoption of the standard requires the use of a modified retrospective transition approach for all periods presented at the time of adoption. Management is evaluating the impact of the new guidance, but does not expect the adoption of this guidance to have a material impact on the Company's consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities," to generally require equity investments be measured at fair value with changes in fair value recognized in net income, simplify the impairment assessment of equity investments without readily-determinable fair value, and change disclosure and presentation requirements regarding financial instruments and other comprehensive income, and clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. For public entities, the guidance is effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Management is evaluating the new guidance, but does not expect the adoption of this guidance to have a material impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). The update provides a five-step revenue recognition model for all revenue arising from contracts with customers and affects all entities that enter into contracts to provide goods or services to their customers (unless the contracts are included in the scope of other standards). The guidance requires an entity to recognize the revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. For public entities, the guidance is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period, and must be

applied either retrospectively or using the modified retrospective approach. In April 2015, the FASB voted to propose a one-year deferral of the effective date of ASU 2014-09 and issued an exposure draft. Management is evaluating the new guidance, but does not expect the adoption of this guidance to have a material impact on the Company's consolidated financial statements. Early adoption would be permitted, but not before the original public entity effective date.

Note 3: Securities

The amortized cost, gross unrealized gains, gross unrealized losses, and approximate fair value of securities available for sale consisted of the following:

(dollars in thousands)	September 30, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Investment and mortgage backed securities:				
U.S. government-sponsored enterprises (GSEs)	\$6,465	\$ 51	\$ -	\$6,516
State and political subdivisions	42,966	1,607	(20)	44,553

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10-Q

Mortgage-backed securities	65,592	66,884
Total investments and mortgage-backed securities	\$ 121,868	\$ 124,249

The carrying value of investment and mortgage-backed securities pledged as collateral to secure public deposits and securities sold under agreements to repurchase amounted to \$97.6 million at September 30, 2016 and \$106.7 million at June 30, 2016. The securities pledged consist of marketable securities, including \$5.5 million and \$5.5 million of U.S. Government and Federal Agency Obligations, \$47.9 million and \$52.2 million of Mortgage-Backed Securities, \$10.1 million and \$13.6 million of Collateralized Mortgage Obligations, \$33.5 million and \$34.8 million of State and Political Subdivisions Obligations, and \$600,000 and \$600,000 of Other Securities at September 30, 2016 and June 30, 2016, respectively.

The following tables show our investments' gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at September 30 and June 30, 2016:

12

	September 30, 2016

Mortgage-backed securities	2,912	4	-	-	2,912	4
Total investments and mortgage-backed securities	\$3,632	\$ 7	\$1,080	\$ 776	\$4,712	\$ 783

Other securities. At September 30, 2016, there were three pooled trust preferred securities with an estimated fair value of \$702,000 and unrealized losses of \$740,000 in a continuous unrealized loss position for twelve months or more. These unrealized losses were primarily due to the long-term nature of the pooled trust preferred securities and a reduced demand for these securities, and concerns regarding the financial institutions that issued the underlying trust preferred securities. Rules adopted by the federal banking agencies in December 2013 to implement Section 619 of the Dodd-Frank Act (the "Volcker Rule") generally prohibit banking entities from engaging in proprietary trading and from investing in, sponsoring, or having certain relationships with a hedge fund or private equity fund. All pooled trust preferred securities owned by the Company were included in a January 2014 listing of securities which the agencies considered to be grandfathered with regard to these prohibitions; as such, banking entities are permitted to retain their interest in these securities, provided the interest was acquired on or before December 10, 2013, unless acquired pursuant to a merger or acquisition.

The September 30, 2016, cash flow analysis for these three securities indicated it is probable the Company will receive all contracted principal and related interest projected. The cash flow analysis used in making this determination was based on anticipated default, recovery, and prepayment rates, and the resulting cash flows were discounted based on the yield anticipated at the time the securities were purchased. Other inputs include the actual collateral attributes, which include credit ratings and other performance indicators of the underlying financial institutions, including profitability, capital ratios, and asset quality. Assumptions for these three securities included annualized prepayments of 1.5 to 1.7 percent; recoveries of 35 percent on currently deferred issuers within the next two years; new deferrals of 47 to 64 basis points annually; and eventual recoveries of six to nine percent of new deferrals.

One of these three securities has continued to receive cash interest payments in full since our purchase; the second of the three securities received principal-in-kind (PIK), in lieu of cash interest, for a period of time following the

recession and financial crisis which began in 2008, but resumed interest payments during fiscal 2014. Our cash flow analysis indicates that interest payments are expected to continue for these two securities. Because the Company does not intend to sell these securities and it is not more-likely-than-not that the Company will be required to sell these securities prior to recovery of their amortized cost basis, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at September 30, 2016.

For the last of these three securities, with an estimated fair value of \$234,000 and unrealized losses of \$239,000, the Company has been receiving PIK in lieu of cash interest since June 2009. Pooled trust preferred securities generally allow, under the terms of the issue, for issuers included in the pool to defer interest for up to five consecutive years. After five years, if not cured, the issuer is considered to be in default and the trustee may demand payment in full of principal and accrued interest. Issuers are also considered to be in default in the event of the failure of the issuer or a subsidiary bank. Both deferred and defaulted issuers are considered non-performing, and the trustee calculates, on a quarterly or semi-annual basis, certain coverage tests prior to the payment of cash interest to owners of the various tranches of the securities. The tests must show that performing collateral is sufficient to meet requirements for senior tranches, both in terms of cash flow and collateral value, before cash interest can be paid to subordinate tranches. If the tests are not met, available cash flow is diverted to pay down the principal balance of senior tranches until the coverage tests are met, before cash interest payments to subordinate tranches may resume. The Company is receiving PIK for this security due to failure of the required coverage tests described above at senior tranche levels

of the security. The risk to holders of a tranche of a security in PIK status is that the pool's total cash flow will not be sufficient to repay all principal and accrued interest related to the investment. The impact of payment of PIK to subordinate tranches is to strengthen the position of senior tranches, by reducing the senior tranches' principal balances relative to available collateral and cash flow, while increasing principal balances, decreasing cash flow, and increasing credit risk to the tranches receiving PIK. For this security in receipt of PIK, the principal balance is increasing, cash flow has stopped, and, as a result, credit risk is increasing. The Company expects this security to remain in PIK status for a period of less than one year. Despite these facts, because the Company does not intend to sell this security and it is not more-likely-than-not that the Company will be required to sell this security prior to recovery of its amortized cost basis, which may be maturity, the Company does not consider this investment to be other-than-temporarily impaired at September 30, 2016.

At December 31, 2008, analysis of a fourth pooled trust preferred security indicated other-than-temporary impairment (OTTI). The loss recognized at that time reduced the amortized cost basis for the security, and as of September 30, 2016, the estimated fair value of the security exceeds the new, lower amortized cost basis.

The Company does not believe any other individual unrealized loss as of September 30, 2016, represents OTTI. However, the Company could be required to recognize OTTI losses in future periods with respect to its available for sale investment securities portfolio. The amount and timing of any additional OTTI will depend on the decline in the underlying cash flows of the securities. Should the impairment of any of these securities become other-than-temporary, the cost basis of the investment will be reduced and the resulting loss recognized in the period the other-than-temporary impairment is identified.

Credit losses recognized on investments. As described above, one of the Company's investments in trust preferred securities experienced fair value deterioration due to credit losses, but is not otherwise other-than-temporarily impaired. During fiscal 2009, the Company adopted ASC 820, formerly FASB Staff Position 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly." The following table provides information about the trust preferred security for which only a credit loss was recognized in income and other losses are recorded in other comprehensive income (loss) for the three-month periods ended September 30, 2016 and 2015.

(dollars in thousands)	Accumulated Credit Losses Three-Month Period Ended September 30, 2016 2015	
Credit losses on debt securities held		
Beginning of period	\$ 352	\$ 365
Additions related to OTTI losses not previously recognized	-	-
Reductions due to sales	-	-
Reductions due to change in intent or likelihood of sale	-	-
Additions related to increases in previously-recognized OTTI losses	-	-
Reductions due to increases in expected cash flows	(16)	(3)
End of period	\$ 336	\$ 362

Note 4: Loans and Allowance for Loan Losses

Classes of loans are summarized as follows:

(dollars in thousands)	September 30, 2016	June 30, 2016
Real Estate Loans:		
Residential	\$395,764	\$392,974
Construction	80,044	77,369
Commercial	500,032	452,052
Consumer loans	47,407	46,541
Commercial loans	214,834	202,045
	1,238,081	1,170,981
Loans in process	(19,889)	(21,779)
Deferred loan fees, net	36	42
Allowance for loan losses	(14,456)	(13,791)
Total loans	\$1,203,772	\$1,135,453

The Company's lending activities consist of origination of loans secured by mortgages on one- to four-family residences and commercial and agricultural real estate, construction loans on residential and commercial properties, commercial and agricultural business loans and consumer loans. The Company has also occasionally purchased loan participation interests originated by other lenders and secured by properties generally located in the states of Missouri and Arkansas.

Residential Mortgage Lending. The Company actively originates loans for the acquisition or refinance of one- to four-family residences. This category includes both fixed-rate and adjustable-rate mortgage ("ARM") loans amortizing over periods of up to 30 years, and the properties securing such loans may be owner-occupied or non-owner-occupied. Single-family residential loans do not generally exceed 90% of the lower of the appraised value or purchase price of the secured property. Substantially all of the one- to four-family residential mortgage originations in the Company's portfolio are located within the Company's primary lending area.

The Company also originates loans secured by multi-family residential properties that are often located outside the Company's primary lending area but made to borrowers who operate within the primary market area. The majority of the multi-family residential loans that are originated by the Bank are amortized over periods generally up to 25 years, with balloon maturities typically up to ten years. Both fixed and adjustable interest rates are offered and it is typical for the Company to include an interest rate "floor" and "ceiling" in the loan agreement. Generally, multi-family residential loans do not exceed 85% of the lower of the appraised value or purchase price of the secured property.

Commercial Real Estate Lending. The Company actively originates loans secured by commercial real estate including land (improved, unimproved, and farmland), strip shopping centers, retail establishments and other businesses. These properties are typically owned and operated by borrowers headquartered within the Company's primary lending area, however, the property may be located outside our primary lending area.

Most commercial real estate loans originated by the Company generally are based on amortization schedules of up to 25 years with monthly principal and interest payments. Generally, the interest rate received on these loans is fixed for a maturity for up to seven years, with a balloon payment due at maturity. Alternatively, for some loans, the interest rate adjusts at least annually after an initial period up to seven years. The Company typically includes an interest rate "floor" in the loan agreement. Generally, improved commercial real estate loan amounts do not exceed 80% of the lower of the appraised value or the purchase price of the secured property. Agricultural real estate terms offered differ slightly, with amortization schedules of up to 25 years with an 80% loan-to-value ratio, or 30 years with a 75% loan-to-value ratio.

Construction Lending. The Company originates real estate loans secured by property or land that is under construction or development. Construction loans originated by the Company are generally secured by mortgage loans for the construction of owner occupied residential real estate or to finance speculative construction secured by residential real estate, land development, or owner-operated or non-owner occupied commercial real estate. During construction, these loans typically require monthly interest-only payments and have maturities ranging from six to twelve months. Once construction is completed, loans may be converted to permanent status with monthly payments using amortization schedules of up to 30 years on residential and generally up to 20 years on commercial real estate.

While the Company typically utilizes maturity periods ranging from 6 to 12 months to closely monitor the inherent risks associated with construction loans for these loans, weather conditions, change orders, availability of materials and/or labor, and other factors may contribute to the lengthening of a project, thus necessitating the need to renew the construction loan at the balloon maturity. Such extensions are typically executed in incremental three month periods to facilitate project completion. The Company's average term of construction loans is approximately eight months. During construction, loans typically require monthly interest only payments which may allow the Company an

opportunity to monitor for early signs of financial difficulty should the borrower fail to make a required monthly payment. Additionally, during the construction phase, the Company typically obtains interim inspections completed by an independent third party. This monitoring further allows the Company opportunity to assess risk. At September 30, 2016, construction loans outstanding included 53 loans, totaling \$12.4 million, for which a modification had been agreed to. At June 30, 2016, construction loans outstanding included 42 loans, totaling \$10.3 million, for which a modification had been agreed to. All modifications were solely for the purpose of extending the maturity date due to conditions described above. None of these modifications were executed due to financial difficulty on the part of the borrower and, therefore, were not accounted for as TDRs.

Consumer Lending. The Company offers a variety of secured consumer loans, including home equity, direct and indirect automobile loans, second mortgages, mobile home loans and loans secured by deposits. The Company originates substantially all of its consumer loans in its primary lending area. Usually, consumer loans are originated with fixed rates for terms of up to five years, with the exception of home equity lines of credit, which are variable, tied to the prime rate of interest and are for a period of ten years.

Home equity lines of credit (HELOCs) are secured with a deed of trust and are issued up to 100% of the appraised or assessed value of the property securing the line of credit, less the outstanding balance on the first mortgage and are typically issued for a term of ten years. Interest rates on the HELOCs are generally adjustable. Interest rates are based upon the loan-to-value ratio of the property with better rates given to borrowers with more equity.

Automobile loans originated by the Company include both direct loans and a smaller amount of loans originated by auto dealers. The Company generally pays a negotiated fee back to the dealer for indirect loans. Typically, automobile loans are made for terms of up to 60 months for new and used vehicles. Loans secured by automobiles have fixed rates and are generally made in amounts up to 100% of the purchase price of the vehicle.

Commercial Business Lending. The Company's commercial business lending activities encompass loans with a variety of purposes and security, including loans to finance accounts receivable, inventory, equipment and operating lines of credit, including agricultural production and equipment loans. The Company offers both fixed and adjustable rate commercial business loans. Generally, commercial loans secured by fixed assets are amortized over periods up to five years, while commercial operating lines of credit or agricultural production lines are generally for a one year period.

The following tables present the balance in the allowance for loan losses and the recorded investment in loans (excluding loans in process and deferred loan fees) based on portfolio segment and impairment methods as of September 30 and June 30, 2016, and activity in the allowance for loan losses for the three-month periods ended September 30, 2016 and 2015:

Management's opinion as to the ultimate collectability of loans is subject to estimates regarding future cash flows from operations and the value of property, real and personal, pledged as collateral. These estimates are affected by changing economic conditions and the economic prospects of borrowers.

The allowance for loan losses is maintained at a level that, in management's judgment, is adequate to cover probable credit losses inherent in the loan portfolio at the balance sheet date. The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when an amount is determined to be uncollectible, based on management's analysis of expected cash flow (for non-collateral-dependent loans) or collateral value (for collateral-dependent loans). Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

The allowance consists of allocated and general components. The allocated component relates to loans that are classified as impaired. For those loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan.

Under the Company's methodology, loans are first segmented into 1) those comprising large groups of smaller-balance homogeneous loans, including single-family mortgages and installment loans, which are collectively evaluated for impairment, and 2) all other loans which are individually evaluated. Those loans in the second category are further segmented utilizing a defined grading system which involves categorizing loans by severity of risk based on conditions that may affect the ability of the borrowers to repay their debt, such as current financial information, collateral valuations, historical payment experience, credit documentation, public information, and current trends. The loans subject to credit classification represent the portion of the portfolio subject to the greatest credit risk and where adjustments to the allowance for losses on loans as a result of provision and charge offs are most likely to have a significant impact on operations.

A periodic review of selected credits (based on loan size and type) is conducted to identify loans with heightened risk or probable losses and to assign risk grades. The primary responsibility for this review rests with loan administration personnel. This review is supplemented with periodic examinations of both selected credits and the credit review process by the Company's internal audit function and applicable regulatory agencies. The information from these reviews assists management in the timely identification of problems and potential problems and provides a basis for deciding whether the credit represents a probable loss or risk that should be recognized.

A loan is considered impaired when, based on current information and events, it is probable that the scheduled payments of principal or interest will not be able to be collected when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and agricultural loans by either the present value of

expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent.

Groups of loans with similar risk characteristics are collectively evaluated for impairment based on the group's historical loss experience adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans. Accordingly, individual consumer and residential loans are not separately identified for impairment measurements, unless such loans are the subject of a restructuring agreement due to financial difficulties of the borrower.

The general component covers non-impaired loans and is based on quantitative and qualitative factors. The loan portfolio is stratified into homogeneous groups of loans that possess similar loss characteristics and an appropriate loss ratio adjusted for qualitative factors is applied to the homogeneous pools of loans to estimate the incurred losses in the loan portfolio.

Included in the Company's loan portfolio are certain loans accounted for in accordance with ASC 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. These loans were written down at acquisition to an amount estimated to be collectible. As a result, certain ratios regarding the Company's loan portfolio and credit quality cannot be used to compare the Company to peer companies or to compare the Company's current credit quality to prior periods. The ratios particularly affected by accounting under ASC 310-30 include the allowance for loan losses as a percentage of loans, nonaccrual loans, and nonperforming assets, and nonaccrual loans and nonperforming loans as a percentage of total loans.

The following tables present the credit risk profile of the Company's loan portfolio (excluding loans in process and deferred loan fees) based on rating category and payment activity as of September 30, 2016 and June 30, 2016. These tables include purchased credit impaired loans, which are reported according to risk categorization after acquisition based on the Company's standards for such classification:

	September 30, 2016				
	Residential		Construction	Commercial	
	Real				
(dollars in thousands)	Estate	Real Estate	Real Estate	Consumer	Commercial
Pass	\$ 392,246	\$ 59,782	\$ 491,780	\$ 47,207	\$ 212,925
Watch	369	128	3,063	-	-
Special Mention	-	-	-	-	-
Substandard	3,149	245	5,189	200	1,909
Doubtful	-	-	-	-	-
Total	\$ 395,764	\$ 60,155	\$ 500,032	\$ 47,407	\$ 214,834

	June 30, 2016				
	Residential		Construction	Commercial	
	Real				
(dollars in thousands)	Estate	Real Estate	Real Estate	Consumer	Commercial
Pass	\$ 388,733	\$ 55,202	\$ 443,933	\$ 46,341	\$ 200,252
Watch	583	-	3,095	24	16
Special Mention	-	-	-	-	-
Substandard	3,658	388	5,024	176	1,777
Doubtful	-	-	-	-	-
Total	\$ 392,974	\$ 55,590	\$ 452,052	\$ 46,541	\$ 202,045

The above amounts include purchased credit impaired loans. At September 30, 2016, purchased credited impaired loans comprised \$9.0 million of credits rated "Pass"; \$3.0 million of credits rated "Watch"; none rated "Special Mention"; \$3.1 million of credits rated "Substandard"; and none rated "Doubtful". At June 30, 2016, purchased credit impaired loans accounted for \$9.2 million of credits rated "Pass"; \$3.0 million of credits rated "Watch"; none rated "Special Mention"; \$3.1 million of credits rated "Substandard"; and none rated "Doubtful".

Credit Quality Indicators. The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on all loans at origination, and is updated on a quarterly basis for loans risk rated Special Mention, Substandard, or Doubtful. In addition, lending relationships of \$1 million or more, exclusive of any consumer or owner-occupied residential loan, are subject to an annual credit analysis which is prepared by the loan administration department and presented to a loan committee with appropriate lending authority. A sample of lending relationships in excess of \$2.5 million are subject to an independent loan review annually, in order to verify risk ratings. The Company uses the following definitions for risk ratings:

Watch – Loans classified as watch exhibit weaknesses that require more than usual monitoring. Issues may include deteriorating financial condition, payments made after due date but within 30 days, adverse industry conditions or management problems.

Special Mention – Loans classified as special mention exhibit signs of further deterioration but still generally make payments within 30 days. This is a transitional rating and loans should typically not be rated Special Mention for more than 12 months

Substandard – Loans classified as substandard possess weaknesses that jeopardize the ultimate collection of the principal and interest outstanding. These loans exhibit continued financial losses, ongoing delinquency, overall poor financial condition, and insufficient collateral. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful – Loans classified as doubtful have all the weaknesses of substandard loans, and have deteriorated to the level that there is a high probability of substantial loss.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans.

The following tables present the Company's loan portfolio aging analysis (excluding loans in process and deferred loan fees) as of September 30 and June 30, 2016. These tables include purchased credit impaired loans, which are reported according to aging analysis after acquisition based on the Company's standards for such classification:

September 30, 2016

(dollars in thousands)	September 30, 2016			Total Past Due	Current	Total Loans Receivable	Greater Than 90 Days Past Due and Accruing
	30-59 Days Past Due	60-89 Days Past Due	Greater Than 90 Days Past Due

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10-Q

Commercial loans	209	138	623	970	201,075	202,045	31
Total loans	\$1,700	\$ 694	\$2,872	\$5,266	\$1,143,936	\$1,149,202	\$ 38

At September 30, 2016, there was one purchased credit impaired loan with a net fair value of \$24,000 that was greater than 90 days past due, and there were three at June 30, 2016 with a net fair value of \$1.4 million.

A loan is considered impaired, in accordance with the impairment accounting guidance (ASC 310-10-35-16), when based on current information and events, it is probable the Company will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming loans, as well as performing loans modified in troubled debt restructurings where concessions have been granted to borrowers experiencing financial difficulties. These concessions could include a reduction in the interest rate on the loan, payment extensions, forgiveness of principal, forbearance or other actions intended to maximize collection.

The tables below present impaired loans (excluding loans in process and deferred loan fees) as of September 30 and June 30, 2016. These tables include purchased credit impaired loans. Purchased credit impaired loans are those for which it was deemed probable, at acquisition, that the Company would be unable to collect all contractually required payments receivable. In an

instance where, subsequent to the acquisition, the Company determines it is probable, for a specific loan, that cash flows received will exceed the amount previously expected, the Company will recalculate the amount of accretable yield in order to recognize the improved cash flow expectation as additional interest income over the remaining life of the loan. These loans, however, will continue to be reported as impaired loans. In an instance where, subsequent to the acquisition, the Company determines it is probable, for a specific loan, that cash flows received will be less than the amount previously expected, the Company will allocate a specific allowance under the terms of ASC 310-10-35.

(dollars in thousands)	September 30, 2016		
	Recorded Balance	Unpaid Principal Balance	Specific Allowance
Loans without a specific valuation allowance:

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10-Q

Construction real estate	\$1,404	\$ 1,777	\$	-
Commercial real estate	\$11,681	\$ 13,326	\$	-
Consumer loans	\$36	\$ 36	\$	-
Commercial loans	\$1,461	\$ 1,532	\$	-

The above amounts include purchased credit impaired loans. At September 30, 2016, purchased credit impaired loans comprised \$15.1 million of impaired loans without a specific valuation allowance; none with a specific valuation allowance; and \$15.1 million of total impaired loans. At June 30, 2016, purchased credit impaired loans comprised \$15.3 million of impaired loans without a specific valuation allowance; none with a specific valuation allowance; and \$15.3 million of total impaired loans.

The following tables present information regarding interest income recognized on impaired loans:

(dollars in thousands)	For the three-month period ended September 30, 2016	
	Average Investment in Impaired Loans	Interest Income Recognized
Residential Real Estate	\$2,929	\$ 30
Construction Real Estate	1,395	34
Commercial Real Estate	9,849	181
Consumer Loans	-	-
Commercial Loans	1,026	19
Total Loans	\$15,199	\$ 264

(dollars in thousands)	For the three-month period ended September 30, 2015	
	Average Investment in Impaired Loans	Interest Income Recognized
Residential Real Estate	\$3,210	\$ 28
Construction Real Estate	1,847	37
Commercial Real Estate	10,655	184
Consumer Loans	105	2
Commercial Loans	1,077	19
Total Loans	\$16,894	\$ 270

Interest income on impaired loans recognized on a cash basis in the three-month periods ended September 30, 2016 and 2015, was immaterial.

For the three-month period ended September 30, 2016, the amount of interest income recorded for impaired loans that represented a change in the present value of cash flows attributable to the passage of time was approximately \$82,000, as compared to \$49,000, for the three-month period ended September 30, 2015.

The following table presents the Company's nonaccrual loans at September 30 and June 30, 2016. The table excludes performing troubled debt restructurings.

(dollars in thousands)	September 30, 2016	June 30, 2016
Residential real estate	\$ 2,073	\$2,676
Construction real estate	245	388

Commercial real estate	1,779	1,797
Consumer loans	184	160
Commercial loans	689	603
Total loans	\$ 4,970	\$5,624

The above amounts include purchased credit impaired loans. At September 30 and June 30, 2016, these loans comprised \$2.5 million and \$2.6 million of nonaccrual loans, respectively.

Included in certain loan categories in the impaired loans are troubled debt restructurings (TDRs), where economic concessions have been granted to borrowers who have experienced financial difficulties. These concessions typically result from our loss mitigation activities, and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance, or other actions. Certain TDRs are classified as nonperforming at the time of restructuring and typically are returned to performing status after considering the borrower's sustained repayment performance for a reasonable period of at least six months.

When loans and leases are modified into a TDR, the Company evaluates any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan or lease agreement, and uses the current fair value of the collateral, less selling costs, for collateral dependent loans. If the Company determines that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs, and unamortized premium or discount), impairment is recognized through an allowance estimate or a charge-off to the allowance. In periods subsequent to modification, the Company evaluates all TDRs, including those that have payment defaults, for possible impairment and recognizes impairment through the allowance.

During the three-month periods ended September 30, 2016 and 2015, certain loans were classified as TDRs. They are shown, segregated by class, in the table below:

(dollars in thousands)	For the three-month period ended			
	September 30, 2016		September 30, 2015	
	Number	of Recorded	Number	of Recorded
		modifications		modifications
		of Investments		of Investments
Residential real estate	-	\$ -	2	\$ 49
Construction real estate	1	37	-	-
Commercial real estate	3	1,970	-	-
Consumer loans	-	-	-	-
Commercial loans	1	2	2	564
Total	5	\$ 2,009	4	\$ 613

Performing loans classified as TDRs and outstanding at September 30 and June 30, 2016, segregated by class, are shown in the table below. Nonperforming TDRs are shown as nonaccrual loans.

(dollars in thousands)	September 30, 2016		June 30, 2016	
	Number	of Recorded	Number	of Recorded
		modifications		modifications
		of Investments		of Investments
Residential real estate	7	\$ 474	7	\$ 479
Construction real estate	-	-	-	-
Commercial real estate	13	5,799	12	4,134
Consumer loans	1	35	1	36
Commercial loans	6	1,544	5	1,429
Total	27	\$ 7,852	25	\$ 6,078

Note 5: Accounting for Certain Loans Acquired in a Transfer

The Company acquired loans in transfers during the fiscal years ended June 30, 2011 and June 30, 2015. At acquisition, certain transferred loans evidenced deterioration of credit quality since origination and it was probable, at acquisition, that all contractually required payments would not be collected.

Loans purchased with evidence of credit deterioration since origination and for which it is probable that all contractually required payments will not be collected are considered to be credit impaired. Evidence of credit quality deterioration as of the purchase date may include information such as past-due and nonaccrual status, borrower credit scores and recent loan to value percentages. Purchased credit-impaired loans are accounted for under the accounting guidance for loans and debt securities acquired with deteriorated credit quality (ASC 310-30) and initially measured at fair value, which includes estimated future credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for credit losses related to these loans is not carried over and recorded at the acquisition date. Management estimated the cash flows expected to be collected at acquisition using our internal risk models, which incorporate the estimate of current key assumptions, such as default rates, severity and prepayment speeds.

The carrying amount of those loans is included in the balance sheet amounts of loans receivable at September 30 and June 30, 2016. The amount of these loans is shown below:

(dollars in thousands)	September 30, 2016	June 30, 2016
Residential real estate	\$ 3,108	\$3,254
Construction real estate	1,623	1,777
Commercial real estate	11,408	11,523
Consumer loans	127	-
Commercial loans	1,084	1,103
Outstanding balance	\$ 17,350	\$17,657
Carrying amount, net of fair value adjustment of \$2,265 and \$2,347 at September 30, 2016 and June 30, 2016, respectively	\$ 15,085	\$15,310

Accretable yield, or income expected to be collected, is as follows:

(dollars in thousands)	Three-month period ending September	
	30 2016	September 30, 2015
Balance at beginning of period	\$656	\$ 547
Additions	-	-
Accretion	(82)	(49)
Reclassification from nonaccretable difference	66	84
Disposals	-	-
Balance at end of period	\$640	\$ 582

During the three-month periods ended September 30, 2016 and September 30, 2015, the Company did not increase or reverse the allowance for loan losses related to these purchased credit impaired loans.

Note 6: Deposits

Deposits are summarized as follows:

(dollars in thousands)	September 30, 2016	June 30, 2016
Non-interest bearing accounts	\$134,540	\$131,997
NOW accounts	400,724	396,104
Money market deposit accounts	78,907	78,155
Savings accounts	116,579	115,714
Certificates	436,600	398,723
Total Deposit Accounts	\$1,167,350	\$1,120,693

Note 7: Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share:

(dollars in thousands except per share data)	Three months ended September 30,	
	2016	2015
Net income	\$3,709	\$3,635
Dividend on preferred stock	-	50
Net income available to common shareholders	\$3,709	\$3,585
Average Common shares – outstanding basic	7,436,914	7,422,354
Stock options under treasury stock method	30,556	31,503
Average Common shares – outstanding diluted	7,467,470	7,453,857

Basic earnings per common share	\$0.50	\$0.48
Diluted earnings per common share	\$0.50	\$0.48

At September 30, 2016 and 2015, no options outstanding had an exercise price exceeding the market price.

Note 8: Income Taxes

The Company and its subsidiary files income tax returns in the U.S. Federal jurisdiction and various states. The Company is no longer subject to U.S. federal and state examinations by tax authorities for fiscal years before 2011. The Company recognized no interest or penalties related to income taxes.

The Company's income tax provision is comprised of the following components:

(dollars in thousands)	For the three-month period ended September	
	30, 2016	September 30, 2015
Income taxes		
Current	\$117	\$ 2,203
Deferred	1,241	(538)
Total income tax provision	\$1,358	\$ 1,665

The components of net deferred tax assets are summarized as follows:

(dollars in thousands)	September 30, 2016	June 30, 2016
Deferred tax assets:		
Provision for losses on loans	\$ 5,055	\$4,760
Accrued compensation and benefits	682	885
Other-than-temporary impairment on available for sale securities	133	139
NOL carry forwards acquired	609	631
Minimum Tax Credit	130	130
Unrealized loss on other real estate	182	183
Other	-	-
Total deferred tax assets	6,791	6,728
Deferred tax liabilities:		
Purchase accounting adjustments	1,147	1,132
Depreciation	1,664	1,781
FHLB stock dividends	194	194
Prepaid expenses	145	177
Unrealized gain on available for sale securities	881	977
Other	506	82
Total deferred tax liabilities	4,537	4,343
Net deferred tax (liability) asset	\$ 2,254	\$2,385

As of September 30 and June 30, 2016, the Company had approximately \$1.8 and \$3.9 million in federal and state net operating loss carryforwards, which were acquired in the July 2009 acquisition of Southern Bank of Commerce, the February 2014 acquisition of Citizens State Bankshares of Bald Knob, Inc. and the August 2014 acquisition of Peoples Service Company. The amount reported is net of the IRC Sec. 382 limitation, or state equivalent, related to utilization of net operating loss carryforwards of acquired corporations. Unless otherwise utilized, the net operating losses will begin to expire in 2027.

A reconciliation of income tax expense at the statutory rate to the Company's actual income tax is shown below:

(dollars in thousands)	For the three-month period ended September	
	30, 2016	September 30, 2015
Tax at statutory rate	\$1,773	\$ 1,855
Increase (reduction) in taxes resulting from:		
Nontaxable municipal income	(132)	(143)
State tax, net of Federal benefit	47	150
Cash surrender value of		
Bank-owned life insurance	(74)	(51)
Tax credit benefits	(93)	(63)
Tax benefits realized on acquisition	-	-
Acquisition costs	-	-
Other, net	(163)	(83)
Actual provision	\$1,358	\$ 1,665

Tax credit benefits are recognized under the flow-through method of accounting for investments in tax credits.

Note 9: 401(k) Retirement Plan

The Bank has a 401(k) retirement plan that covers substantially all eligible employees. The Bank makes "safe harbor" matching contributions of up to 4% of eligible compensation, depending upon the percentage of eligible pay deferred into the plan by the employee. Additional profit-sharing contributions of 4% of eligible salary were accrued for the plan year ended June 30, 2016, based on the financial performance for fiscal 2015. During the three-month period ended September 30, 2016, retirement plan expenses recognized for the Plan totaled approximately \$243,000, as compared to \$213,000 for the same period of the prior fiscal year.

Note 10: Subordinated Debt

Southern Missouri Statutory Trust I issued \$7.0 million of Floating Rate Capital Securities (the "Trust Preferred Securities") with a liquidation value of \$1,000 per share in March 2004. The securities are due in 30 years, redeemable after five years and bear interest at a floating rate based on LIBOR. At September 30, 2016, the current rate was 3.61%. The securities represent undivided beneficial interests in the trust, which was established by the Company for the purpose of issuing the securities. The Trust Preferred Securities were sold in a private transaction exempt from registration under the Securities Act of 1933, as amended (the "Act") and have not been registered under the Act. The securities may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.

Southern Missouri Statutory Trust I used the proceeds from the sale of the Trust Preferred Securities to purchase Junior Subordinated Debentures of the Company. The Company used its net proceeds for working capital and investment in its subsidiaries.

In connection with its October 2013 acquisition of Ozarks Legacy Community Financial, Inc. (OLCF), the Company assumed \$3.1 million in floating rate junior subordinated debt securities. The debt securities had been issued in June 2005 by OLCF in connection with the sale of trust preferred securities, bear interest at a floating rate based on LIBOR, are now redeemable at par, and mature in 2035. The carrying value of the debt securities was approximately \$2.6 million at September 30, 2016, and \$2.6 million at June 30, 2016.

In connection with its August 2014 acquisition of Peoples Service Company, Inc. (PSC), the Company assumed \$6.5 million in floating rate junior subordinated debt securities. The debt securities had been issued in 2005 by PSC's subsidiary bank holding company, Peoples Banking Company, in connection with the sale of trust preferred securities, bear interest at a floating rate based on LIBOR, are now redeemable at par, and mature in 2035. The carrying value of the debt securities was approximately \$5.0 million at September 30, 2016, and \$5.0 million at June 30, 2016.

Note 11: Fair Value Measurements

ASC Topic 820, Fair Value Measurements, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Topic 820 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities

Level 3 Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities

Recurring Measurements. The following table presents the fair value measurements of assets recognized in the accompanying balance sheets measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at September 30, 2016 and June 30, 2015:

Fair Value Measurements at September 30, 2016,
Using:

	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(dollars in thousands)				
U.S. government sponsored enterprises (GSEs)	\$6,516	\$ -	\$ 6,516	\$ -
State and political subdivisions	44,553	-	44,553	-
Other securities	6,296	-	6,296	-
Mortgage-backed GSE residential	66,884	-	66,884	-

Fair Value Measurements at June 30, 2016,
Using:

	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(dollars in thousands)				
U.S. government sponsored enterprises (GSEs)	\$6,517	\$ -	\$ 6,517	\$ -
State and political subdivisions	46,185	-	46,185	-
Other securities	5,291	-	5,291	-
Mortgage-backed GSE residential	71,231	-	71,231	-

Following is a description of the valuation methodologies and inputs used for assets measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such assets pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the period ended September 30, 2016.

Available-for-sale Securities. When quoted market prices are available in an active market, securities are classified within Level 1. The Company does not have Level 1 securities. If quoted market prices are not available, then fair values are estimated using pricing models, or quoted prices of securities with similar characteristics. For these securities, our Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things. Level 2 securities include U.S. Government-sponsored enterprises, state and political subdivisions, other securities, mortgage-backed GSE residential securities and mortgage-backed other U.S. Government agencies. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy.

During fiscal 2011, a pooled trust preferred security was reclassified from Level 2 to Level 3 due to the unavailability of third-party vendor valuations determined by observable inputs – either quoted prices for similar assets; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full terms of the assets. During the three months ended September 30, 2015, the third party vendor began providing valuations for this pooled trust preferred security again, so it was reclassified from Level 3 back to Level 2. The following table presents a reconciliation of activity for available for sale securities measured at fair value based on significant unobservable (Level 3) information for the three month periods ended September 30, 2016 and 2015:

(dollars in thousands)	For the three months ended September 30, September 2016, 2015
Available-for-sale securities, beginning of period	\$- \$ 226
Total unrealized gain (loss) included in comprehensive income	- 26
Transfer from Level 2 to Level 3	- (252)
Available-for-sale securities, end of period	\$- \$ -

Nonrecurring Measurements. The following tables present the fair value measurement of assets measured at fair value on a nonrecurring basis and the level within the ASC 820 fair value hierarchy in which the fair value measurements fell at September 30 and June 30, 2016:

Fair Value Measurements at September 30, 2016, Using:

(dollars in thousands)	Fair Value	Quoted	Significant	Significant
		Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Impaired loans (collateral dependent)	\$-	\$ -	\$ -	\$ -
Foreclosed and repossessed assets held for sale	3,227	-	-	3,227

Fair Value Measurements at June 30, 2016, Using:

(dollars in thousands)	Fair Value	Quoted	Significant	Significant
		Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Impaired loans (collateral dependent)	\$-	\$ -	\$ -	\$ -
Foreclosed and repossessed assets held for sale	3,366	-	-	3,366

The following table presents gains and (losses) recognized on assets measured on a non-recurring basis for the three-month periods ended September 30, 2016 and 2015:

(dollars in thousands)	For the three months ended September 30,	
	2016	September 30, 2015
Impaired loans (collateral dependent)	\$-	\$ (144)
Foreclosed and repossessed assets held for sale	(143)	(37)
Total (losses) gains on assets measured on a non-recurring basis	\$(143)	\$ (181)

The following is a description of valuation methodologies and inputs used for assets measured at fair value on a nonrecurring basis and recognized in the accompanying consolidated balance sheets, as well as the general classification of such assets and liabilities pursuant to the valuation hierarchy. For assets classified within Level 3 of

fair value hierarchy, the process used to develop the reported fair value process is described below.

Impaired Loans (Collateral Dependent). A collateral dependent loan is considered to be impaired when it is probable that all of the principal and interest due may not be collected according to its contractual terms. Generally, when a collateral dependent loan is considered impaired, the amount of reserve required is measured based on the fair value of the underlying collateral. The Company makes such measurements on all material collateral dependent loans deemed impaired using the fair value of the collateral for collateral dependent loans. The fair value of collateral used by the Company is determined by obtaining an observable market price or by obtaining an appraised value from an independent, licensed or certified appraiser, using observable market data. This data includes information such as selling price of similar properties and capitalization rates of similar properties sold within the market, expected future cash flows or earnings of the subject property based on current market expectations, and other relevant factors. In addition, management applies selling and other discounts to the underlying collateral value to determine the fair value. If an appraised value is not available, the fair value of the collateral dependent impaired loan is determined by an adjusted appraised value including unobservable cash flows.

On a quarterly basis, loans classified as special mention, substandard, doubtful, or loss are evaluated including the loan officer's review of the collateral and its current condition, the Company's knowledge of the current economic environment in the market where the collateral is located, and the Company's recent experience with real estate in the area. The date of the appraisal is also considered in conjunction with the economic environment and any decline in the real estate market since the appraisal was obtained. For all loan types, updated appraisals are obtained if considered necessary. Of the Company's \$15.1 million (carrying value) in impaired loans (collateral-dependent and purchased credit-impaired), excluding TDR's at September 30, 2016, the Company utilized a real estate appraisal more than 12 months old to serve as the primary basis of our valuation for impaired loans with a carrying value of approximately \$14.1 million. The remaining \$1.0 million was secured by machinery, equipment and accounts receivable. In instances where the economic environment has worsened and/or the real estate market declined since the last appraisal, a higher distressed sale discount would be applied to the appraised value.

The Company records collateral dependent impaired loans based on nonrecurring Level 3 inputs. If a collateral dependent loan's fair value, as estimated by the Company, is less than its carrying value, the Company either records a charge-off of the portion of the loan that exceeds the fair value or establishes a specific reserve as part of the allowance for loan losses.

Foreclosed and Repossessed Assets Held for Sale. Foreclosed and repossessed assets held for sale are valued at the time the loan is foreclosed upon or collateral is repossessed and the asset is transferred to foreclosed or repossessed assets held for sale. The value of the asset is based on third party or internal appraisals, less estimated costs to sell and appropriate discounts, if any. The appraisals are generally discounted based on current and expected market conditions that may impact the sale or value of the asset and management's knowledge and experience with similar assets. Such discounts typically may be significant and result in a Level 3 classification of the inputs for determining fair value of these assets. Foreclosed and repossessed assets held for sale are continually evaluated for additional impairment and are adjusted accordingly if impairment is identified.

Unobservable (Level 3) Inputs. The following table presents quantitative information about unobservable inputs used in recurring and nonrecurring Level 3 fair value measurements.

(dollars in thousands)	Fair value at September 30, 2016	Valuation technique	Unobservable inputs	Range of inputs applied	Weighted-average inputs applied
Nonrecurring Measurements					
Foreclosed and repossessed assets	3,227	Third party appraisal	Marketability discount	0.0% - 76.0 %	34.4 %

(dollars in thousands)	Fair value at June 30, 2016	Valuation technique	Unobservable inputs	Range of inputs applied	Weighted-average inputs applied
Nonrecurring Measurements					
Foreclosed and repossessed assets	3,366	Third party appraisal	Marketability discount	0.0% - 76.0 %	35.6 %

Fair Value of Financial Instruments. The following table presents estimated fair values of the Company's financial instruments not reported at fair value and the level within the fair value hierarchy in which the fair value measurements fell at September 30 and June 30, 2016.

(dollars in thousands)	September 30, 2016	Carrying Amount	Quoted	Significant	Significant
			Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Unobservable Inputs (Level 3)

The following methods and assumptions were used in estimating the fair values of financial instruments:

Cash and cash equivalents and interest-bearing time deposits are valued at their carrying amounts, which approximates book value. Stock in FHLB and the Federal Reserve Bank of St. Louis is valued at cost, which approximates fair value. Fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics are aggregated for purposes of the calculations. The carrying amounts of accrued interest approximate their fair values.

The fair value of fixed-maturity time deposits is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities. Non-maturity deposits and securities sold under agreements are valued at their carrying value, which approximates fair value. Fair value of advances from the FHLB is estimated by discounting maturities using an estimate of the current market for similar instruments. The fair value of subordinated debt is estimated using rates currently available to the Company for debt with similar terms and maturities. The fair value of commitments to originate loans is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and committed rates. The fair value of letters of credit and lines of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate or otherwise settle the obligations with the counterparties at the reporting date.

PART I: Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

SOUTHERN MISSOURI BANCORP, INC.

General

Southern Missouri Bancorp, Inc. (Southern Missouri or Company) is a Missouri corporation and owns all of the outstanding stock of Southern Bank (the Bank). The Company's earnings are primarily dependent on the operations of the Bank. As a result, the following discussion relates primarily to the operations of the Bank. The Bank's deposit accounts are generally insured up to a maximum of \$250,000 by the Deposit Insurance Fund (DIF), which is administered by the Federal Deposit Insurance Corporation (FDIC). At September 30, 2016, the Bank operated from its headquarters, 32 full-service branch offices, and three limited-service branch offices. The Bank owns the office building and related land in which its headquarters are located, and 30 of its other branch offices. The remaining five branches are either leased or partially owned.

The significant accounting policies followed by Southern Missouri Bancorp, Inc. and its wholly owned subsidiaries for interim financial reporting are consistent with the accounting policies followed for annual financial reporting. All adjustments, which are of a normal recurring nature and are in the opinion of management necessary for a fair statement of the results for the periods reported, have been included in the accompanying consolidated condensed financial statements.

The consolidated balance sheet of the Company as of June 30, 2016, has been derived from the audited consolidated balance sheet of the Company as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Form 10-K annual report filed with the Securities and Exchange Commission.

Management's discussion and analysis of financial condition and results of operations is intended to assist in understanding the financial condition and results of operations of the Company. The information contained in this section should be read in conjunction with the unaudited consolidated financial statements and accompanying notes. The following discussion reviews the Company's condensed consolidated financial condition at September 30, 2016, and results of operations for the three-month periods ended September 30, 2016 and 2015.

Forward Looking Statements

This document contains statements about the Company and its subsidiaries which we believe are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may include, without limitation, statements with respect to anticipated future operating and financial performance, growth opportunities, interest rates, cost savings and funding advantages expected or anticipated to be realized by management. Words such as "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" and similar expressions are intended to identify these forward looking statements. Forward-looking statements by the Company and its management are based on beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions of management and are not guarantees of future performance. The important factors we discuss below, as well as other factors discussed under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" and identified in this filing and in our other filings with the SEC and those presented elsewhere by our management from time to time, could cause actual results to differ

materially from those indicated by the forward-looking statements made in this document:

- the strength of the United States economy in general and the strength of the local economies in which we conduct operations;
- fluctuations in interest rates and in real estate values;
- monetary and fiscal policies of the Board of Governors of the Federal Reserve System (the "Federal Reserve Board") and the U.S. Government and other governmental initiatives affecting the financial services industry;
- the risks of lending and investing activities, including changes in the level and direction of loan delinquencies and write-offs and changes in estimates of the adequacy of the allowance for loan losses;
- our ability to access cost-effective funding;

the timely development of and acceptance of our new products and services and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors' products and services;

expected cost savings, synergies and other benefits from our merger and acquisition activities, including our recently completed acquisitions, might not be realized within the anticipated time frames or at all, and costs or difficulties relating to integration matters, including but not limited to customer and employee retention, might be greater than expected;

fluctuations in real estate values and both residential and commercial real estate market conditions;

demand for loans and deposits in our market area;

legislative or regulatory changes that adversely affect our business;

results of examinations of us by our regulators, including the possibility that our regulators may, among other things, require us to increase our reserve for loan losses or to write-down assets;

the impact of technological changes; and

our success at managing the risks involved in the foregoing.

The Company disclaims any obligation to update or revise any forward-looking statements based on the occurrence of future events, the receipt of new information, or otherwise.

Critical Accounting Policies

Accounting principles generally accepted in the United States of America are complex and require management to apply significant judgments to various accounting, reporting and disclosure matters. Management of the Company must use assumptions and estimates to apply these principles where actual measurement is not possible or practical. For a complete discussion of the Company's significant accounting policies, see "Notes to the Consolidated Financial Statements" in the Company's 2016 Annual Report. Certain policies are considered critical because they are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements. Management has reviewed the application of these policies with the Audit Committee of the Company's Board of Directors. For a discussion of applying critical accounting policies, see "Critical Accounting Policies" beginning on page 54 in the Company's 2016 Annual Report.

Executive Summary

Our results of operations depend primarily on our net interest margin, which is directly impacted by the interest rate environment. The net interest margin represents interest income earned on interest-earning assets (primarily real estate loans, commercial and agricultural loans, and the investment portfolio), less interest expense paid on interest-bearing liabilities (primarily interest-bearing transaction accounts, certificates of deposit, savings and money market deposit accounts, repurchase agreements, and borrowed funds), as a percentage of average interest-earning assets. Net interest margin is directly impacted by the spread between long-term interest rates and short-term interest rates, as our interest-earning assets, particularly those with initial terms to maturity or repricing greater than one year, generally price off longer term rates while our interest-bearing liabilities generally price off shorter term interest rates. This difference in longer term and shorter term interest rates is often referred to as the steepness of the yield curve. A steep yield curve – in which the difference in interest rates between short term and long term periods is relatively large – could be beneficial to our net interest income, as the interest rate spread between our interest-earning assets and interest-bearing liabilities would be larger. Conversely, a flat or flattening yield curve, in which the difference in rates between short term and long term periods is relatively small or shrinking, or an inverted yield curve, in which short term rates exceed long term rates, could have an adverse impact on our net interest income, as our interest rate spread could decrease.

Our results of operations may also be affected significantly by general and local economic and competitive conditions, particularly those with respect to changes in market interest rates, government policies and actions of regulatory authorities.

During the first three months of fiscal 2017, we grew our balance sheet by \$65.9 million. Balance sheet growth was primarily attributable to loan growth. Loans, net of the allowance for loan losses, increased \$68.3 million. Available-for-sale investments decreased \$5.0 million, and cash equivalents and time deposits decreased a combined \$1.3 million. Deposits increased \$46.7 million, including \$38.2 million in new brokered funding. Securities sold under agreements to repurchase decreased \$1.6 million, and advances from the Federal Home Loan Bank (FHLB) increased \$19.0 million, as the Company increased overnight borrowings and prepaid some term advances during the quarter. Equity increased \$2.9 million, primarily as a result of retention of net income.

Net income for the first three months of fiscal 2017 was \$3.7 million, an increase of \$74,000, or 2.0% as compared to the same period of the prior fiscal year. The current period included no dividends on preferred stock, while the same period of the prior fiscal year included preferred dividends of \$50,000, resulting in net earnings available to common shareholders of \$3.7 million in the current fiscal year period, an increase of \$124,000, or 3.5%, as compared to the same period of the prior fiscal year. Compared to the year-ago period, the Company's increase in net income was the result of an increase in net interest income and noninterest income, and a decrease in provision for income taxes, partially offset by increases in non-interest expense and provision for loan losses. Diluted net income available to common shareholders was \$0.50 per share for the first three months of fiscal 2017, as compared to \$0.48 per share for the same period of the prior fiscal year. For the first three months of fiscal 2017, net interest income increased \$872,000, or 7.5%; noninterest income increased \$373,000, or 16.9%; provision for income taxes decreased \$307,000, or 18.4%; noninterest expense increased \$1.2 million, or 14.7%; and provision for loan losses increased \$307,000, or 49.7%, as compared to the same period of the prior fiscal year. For more information see "Results of Operations."

Interest rates during the first three months of fiscal 2017 began at quite low yields, but generally trended higher throughout the quarter. Maturities most sensitive to the Federal Reserve's Open Market Committee (FOMC) moved the most, with the curve flattening somewhat. The yield on two-year treasuries moved up from 0.58% to 0.77%; the yield on five-year treasuries moved up from 1.01% to 1.14%; the yield on ten-year treasuries moved up from 1.49% to 1.60%; and the yield on 30-year treasuries moved up from 2.30% to 2.32%. Our average yield on earning assets decreased by five basis points, as reinvestment at relatively low market rates was partially offset by an increase in accretion of the fair value discount recorded on the Company's 2014 acquisition of Peoples Service Company and its subsidiary, Peoples Bank of the Ozarks (the "Peoples Acquisition") and by a shift in the earning asset mix towards higher-yielding investment types (see "Results of Operations: Comparison of the three-month periods ended September 30, 2016 and 2015 – Net Interest Income"). A flat or flattening yield curve is generally detrimental to the Company, but the movement higher of these short and medium-term rates was considered somewhat of a relief. Since the December 2015 increase in the Federal Funds rate by the FOMC, the market has been focused on whether or how soon the rate could again be moved higher, with the market currently expecting an increase at the December 2016 meeting. Further increases projected for calendar year 2017 by many members of the FOMC are viewed by the market as less certain.

Our net interest margin decreased when comparing the first three months of fiscal 2017 to the same period of the prior fiscal year. The deterioration was attributable primarily to lower loan yields, partially offset by an increase in accretion of the fair value discount recorded on the Peoples Acquisition, and by a shift in the earning asset mix, as we held an increased percentage of our earning assets in loans, versus securities and cash equivalents. Net interest income resulting from the accretion of the Peoples Acquisition discount (and a smaller premium on acquired time deposits) in the first three months of fiscal 2017 increased to \$601,000, as compared to \$412,000 in the first three months of fiscal 2016. In the current period, this component of net interest income contributed 18 basis points to the net interest margin, an increase from a contribution of 14 basis points in the year-ago period. The dollar impact of this component of net interest income has generally been declining each sequential quarter as assets from the Peoples Acquisition mature or prepay; however, the increases noted in the three-month periods ended September 30, 2016; June 30, 2016; and December 31, 2015, were the result of inclusion in those quarters' results of principal payments received on purchased credit-impaired loans which exceeded the carrying value of such loans.

The Company's net income is also affected by the level of its noninterest income and noninterest expenses. Non-interest income generally consists primarily of deposit account service charges, bank card interchange income, loan-related fees, increases in the cash value of bank-owned life insurance, gains on sales of loans, and other general operating income. Noninterest expenses consist primarily of compensation and employee benefits, occupancy-related expenses, deposit insurance assessments, professional fees, advertising, postage and office expenses, insurance, bank card network expenses, the amortization of intangible assets, and other general operating expenses. During the

three-month period ended September 30, 2016, noninterest income increased \$373,000, or 16.9%, as compared to the same period of the prior fiscal year, attributable primarily to gains realized on the sale of residential loans originated for that purpose; increased loan origination fees; increased earnings on bank-owned life insurance resulting from additional investments made in that asset; and increased bank card interchange income. Noninterest expense for the three-month period ended September 30, 2016, increased \$1.2 million, or 14.7%, as compared to the same period of the prior fiscal year. The increase was attributable in part to \$335,000 in prepayment penalties incurred due to early repayment of \$16.5 million in term FHLB advances. Other items contributing to the increase include higher compensation expenses, occupancy expenses, and legal expenses, partially offset by a reduction in charges to amortize core deposit and other intangibles.

We expect, over time, to continue to grow our assets through the origination and occasional purchase of loans, and purchases of investment securities. The primary funding for this asset growth is expected to come from retail deposits, brokered funding, and short- and long-term FHLB borrowings. We have grown and intend to continue to grow deposits by offering desirable deposit products for our current customers and by attracting new depository relationships. We will also continue to explore strategic expansion opportunities in market areas that we believe will be attractive to our business model.

Comparison of Financial Condition at September 30 and June 30, 2016

The Company experienced balance sheet growth in the first three months of fiscal 2017, with total assets of \$1.5 billion at September 30, 2016, reflecting an increase of \$65.9 million, or 4.7%, as compared to June 30, 2016. Balance sheet growth was funded through deposit growth and FHLB advances.

Available-for-sale (AFS) securities were \$124.2 million at September 30, 2016, a decrease of \$5.0 million, or 3.8%, as compared to June 30, 2016. The decrease was attributable to reductions in mortgage-backed securities and municipal securities, as the Company did not reinvest some principal repayments given strong loan demand. Cash equivalents and time deposits were \$22.0 million, a decrease of \$1.3 million, or 5.6%, as compared to June 30, 2016.

Loans, net of the allowance for loan losses, were \$1.2 billion at September 30, 2016, an increase of \$68.3 million, or 6.0%, as compared to June 30, 2016. The increase was primarily attributable to growth in commercial real estate, commercial, residential real estate, and construction loan balances. The increase in commercial real estate loans was attributable primarily to nonresidential loan originations, the increase in commercial balances was attributable primarily to agricultural loan funding, and the increase in residential loan balances was attributable to multifamily real estate loan originations.

Deposits were \$1.2 billion at September 30, 2016, an increase of \$46.7 million, or 4.2%, as compared to June 30, 2016. The increase was primarily attributable to growth in certificates of deposit. Specifically, the Company originated \$38.2 million in brokered certificates of deposit for the purpose of funding FHLB term advance repayments and loan growth. Other deposit account types also grew, including interest-bearing transaction accounts, noninterest-bearing transaction accounts, savings accounts, and money market deposit accounts. The average loan-to-deposit ratio for the first quarter of fiscal 2017 was 104.4%, as compared to 100.8% for the same period of the prior fiscal year.

FHLB advances were \$129.2 million at September 30, 2016, an increase of \$19.0 million, or 17.2%, as compared to June 30, 2016, as overnight funding increased by \$35.5 million, partially offset by the prepayment of \$16.5 million in term advances. The increase was attributable to continued strong loan demand in the first quarter of fiscal 2017, some of which is seasonal, partially offset by the increase in deposit balances, including brokered certificates of deposit. Securities sold under agreements to repurchase totaled \$25.5 million at September 30, 2016, a decrease of \$1.6 million, or 6.0%, as compared to June 30, 2016. At both dates, the full balance of repurchase agreements was due to local small business and government counterparties.

The Company's stockholders' equity was \$128.9 million at September 30, 2016, an increase of \$2.9 million, or 2.3%, as compared to June 30, 2016. The increase was attributable primarily to the retention of net income, partially offset by payment of dividends on common stock and a decrease in accumulated other comprehensive income.

Average Balance Sheet, Interest, and Average Yields and Rates for the Three-Month Periods Ended September 30, 2016 and 2015

The tables below present certain information regarding our financial condition and net interest income for the three-month periods ended September 30, 2016 and 2015. The tables present the annualized average yield on interest-earning assets and the annualized average cost of interest-bearing liabilities. We derived the yields and costs by dividing annualized income or expense by the average balance of interest-earning assets and interest-bearing liabilities, respectively, for the periods shown. Yields on tax-exempt obligations were not computed on a tax equivalent basis.

(dollars in thousands)	Three-month period ended September 30, 2016			Three-month period ended September 30, 2015

---	----------	----------

- (1) Calculated net of deferred loan fees, loan discounts and loans-in-process. Non-accrual loans are not included in average loans.
- (2) Includes FHLB and Federal Reserve Bank of St. Louis membership stock and related cash dividends.
Includes average balances for fixed assets and BOLI of \$46.8 million and \$30.1 million, respectively, for the
- (3) three-month period ended September 30, 2016, as compared to \$38.7 million and \$19.7 million, respectively, for the same period of the prior fiscal year.
- (4) Interest rate spread represents the difference between the average rate on interest-earning assets and the average cost of interest-bearing liabilities.
- (5) Net interest margin represents net interest income divided by average interest-earning assets.

Rate/Volume Analysis

The following table sets forth the effects of changing rates and volumes on the Company's net interest income for the three-month period ended September 30, 2016, compared to the three-month period ended September 30, 2015. Information is provided with respect to (i) effects on interest income and expense attributable to changes in volume (changes in volume multiplied by the prior rate), (ii) effects on interest income and expense attributable to change in rate (changes in rate multiplied by prior volume), and (iii) changes in rate/volume (change in rate multiplied by change in volume).

(1) Does not include interest on loans placed on nonaccrual status.

(2) Does not include dividends earned on equity securities.

Results of Operations – Comparison of the three-month periods ended September 30, 2016 and 2015

General. Net income available to common shareholders for the three-month period ended September 30, 2016, was \$3.7 million, an increase of \$124,000, or 3.5%, as compared to the same period of the prior fiscal year. The increase was attributable to increased net interest income and noninterest income, a reduction in provision for income taxes, and the elimination of preferred dividends as a result of the October 2015 preferred share repurchase, partially offset by higher noninterest expenses and higher provision for loan losses.

For the three-month period ended September 30, 2016, both basic and fully-diluted net income per share available to common shareholders was \$0.50, as compared to \$0.48 under both measures for the same period of the prior fiscal year, which represented an increase of \$0.02, or 4.2%. Our annualized return on average assets for the three-month period ended September 30, 2016, was 1.03%, as compared to 1.12% for the same period of the prior fiscal year. Accretion of fair value discount on acquired loans and amortization of fair value premium on assumed time deposits related to the Peoples Acquisition increased return on average assets by ten basis points, net of tax, in the current period, as compared to eight basis points in the same period of the prior fiscal year. Our return on average common stockholders' equity for the three-month period ended September 30, 2016, was 11.6%, as compared to 12.6% in the same period of the prior fiscal year.

Net Interest Income. Net interest income for the three-month period ended September 30, 2016, was \$12.6 million, an increase of \$872,000, or 7.5%, as compared to the same period of the prior fiscal year. The increase was attributable to a 9.3% increase in the average balance of interest-earning assets, partially offset by a decrease in net interest margin to 3.81% in the current three-month period, as compared to 3.87% in the three-month period ended September 30, 2015. Our net interest margin is determined by dividing annualized net interest income by total average interest-earning assets.

Accretion of fair value discount on acquired loans and amortization of fair value premiums on assumed time deposits related to the Peoples Acquisition increased to \$601,000 for the three-month period ended September 30, 2016, as compared to \$412,000 in the same period of the prior fiscal year. This component of net interest income contributed 18 basis points to net interest margin in the three-month period ended September 30, 2016, as compared to a contribution of 14 basis points for the same period of the prior fiscal year. The dollar impact of this component of net interest income has generally been declining each sequential quarter as assets from the Peoples Acquisition mature or prepay; however, the increase noted was the result of inclusion in the current quarter's results of principal payments received on purchased credit-impaired loans which exceeded the carrying value of such loans.

For the three-month period ended September 30, 2016, the deterioration in net interest rate spread, compared to the same period a year ago, resulted from a five basis point decrease in the average yield on interest-earning assets, while the average cost of interest-bearing liabilities was unchanged. The general decline in yields earned was attributable to the continued low rate environment, partially offset by a shift in the average earning asset mix towards loans and away from cash equivalents and securities. The cost of funds was unchanged as a result of an increase in the average balance of relatively low-cost overnight FHLB borrowings, partially offset by an increase in the average rate on subordinated debt and interest bearing deposits. Our average balance of interest-earning assets increased \$111.9 million, or 9.3%, when comparing the three-month period ended September 30, 2016, with the same period of the prior fiscal year, attributable to growth in the loan portfolio.

Interest Income. Total interest income for the three-month period ended September 30, 2016, was \$15.1 million, an increase of \$1.1 million, or 8.1%, as compared to the same period of the prior fiscal year. The increase was attributed to a 9.3% increase in the average balance of interest-earning assets, partially offset by a five basis point decline in the average yield earned on interest-earning assets, as compared to the same period of the prior fiscal year. Increased average balances were attributable to growth in the loan portfolio, while the decline in the average yield on interest-earning assets was attributable to the continued low rate environment, partially offset by a shift in the earning asset mix toward loans and away from cash equivalents and securities.

Interest Expense. Total interest expense for the three-month period ended September 30, 2016, was \$2.5 million, an increase of \$263,000, or 11.6%, as compared to the same period of the prior fiscal year, attributable to the \$123.6 million, or 11.8%, increase in the average balance of interest-bearing liabilities, while the average cost of interest-bearing liabilities was roughly unchanged, as compared to the same period of the prior fiscal year. Increased average balances were attributable to higher average FHLB borrowings and higher average interest-bearing deposit balances (primarily, higher average balances in transaction accounts, money market deposit accounts, and certificates of deposit, partially offset by lower average balances in statement and passbook savings accounts).

Provision for Loan Losses. The provision for loan losses for the three-month period ended September 30, 2016, was \$925,000, as compared to \$618,000 in the same period of the prior fiscal year. Increased provisioning was attributed primarily to increased balances within the loan portfolio. As a percentage of average loans outstanding, provision for loan losses in the current three-month period represented a charge of .31% (annualized), while the Company recorded net charge offs during the period of .09% (annualized). During the same period of the prior fiscal year, provision for loan losses as a percentage of average loans outstanding represented a charge of .23% (annualized), while the Company recorded net charge offs of .04% (annualized). (See "Critical Accounting Policies", "Allowance for Loan Loss Activity" and "Nonperforming Assets").

Noninterest Income. The Company's noninterest income for the three-month period ended September 30, 2016, was \$2.6 million, an increase of \$373,000, or 16.9%, as compared to the same period of the prior fiscal year. The increase was attributable primarily to gains realized on the sale of residential loans originated for that purpose; increased loan origination fees; increased earnings on bank-owned life insurance resulting from additional investments made in that

asset; and increased bank card interchange income.

Noninterest Expense. Noninterest expense for the three-month period ended September 30, 2016, was \$9.2 million, an increase of \$1.2 million, or 14.7%, as compared to the same period of the prior fiscal year. The increase was attributable in part to \$335,000 in prepayment penalties incurred due to early repayment of \$16.5 million in term FHLB advances. The prepaid advances carried a weighted average rate of 3.95% and would have had a weighted average maturity of 8.8 months at September 30, 2016, while new brokered funding utilized to prepay those advances and also fund loan growth carried a weighted average rate of 0.92% with a weighted average maturity of 13.2 months at September 30, 2016. Other items contributing to the increase include higher compensation expenses,

occupancy expenses, and legal expenses, partially offset by a reduction in charges to amortize core deposit and other intangibles. The efficiency ratio for the three-month period ended September 30, 2016, was 60.5%, as compared to 57.4% in the same period of the prior fiscal year.

Income Taxes. Provision for income taxes for the three-month period ended September 30, 2016, was \$1.4 million, a decrease of \$307,000, or 18.4%, as compared to the same period of the prior fiscal year, attributable primarily to a decrease in the effective tax rate, to 26.8% from 31.4%, combined with a decrease in pre-tax income. The lower effective tax rate was attributed primarily to formation by the Company's bank subsidiary of a Real Estate Investment Trust (REIT) to hold certain qualified assets in order to minimize state tax liability.

Allowance for Loan Loss Activity

The Company regularly reviews its allowance for loan losses and makes adjustments to its balance based on management's analysis of the loan portfolio, the amount of non-performing and classified loans, as well as general economic conditions. Although the Company maintains its allowance for loan losses at a level that it considers sufficient to provide for losses, there can be no assurance that future losses will not exceed internal estimates. In addition, the amount of the allowance for loan losses is subject to review by regulatory agencies, which can order the establishment of additional loss provision. The following table summarizes changes in the allowance for loan losses over the three-month periods ended September 30, 2016 and 2015:

(dollars in thousands)	For the three months ended September 30,	
	2016	2015
Balance, beginning of period	\$13,791	\$12,298
Loans charged off:		
Residential real estate	(97)	(64)
Construction	-	-
Commercial business	(168)	(12)
Commercial real estate	-	(21)
Consumer	(4)	(10)
Gross charged off loans	(269)	(107)
Recoveries of loans previously charged off:		
Residential real estate	3	1
Construction	-	-
Commercial business	2	1
Commercial real estate	-	-
Consumer	4	1
Gross recoveries of charged off loans	9	3
Net (charge offs) recoveries	(260)	(104)
Provision charged to expense	925	618
Balance, end of period	\$14,456	\$12,812

The allowance for loan losses has been calculated based upon an evaluation of pertinent factors underlying the various types and quality of the Company's loans. Management considers such factors as the repayment status of a loan, the estimated net fair value of the underlying collateral, the borrower's intent and ability to repay the loan, local economic conditions, and the Company's historical loss ratios. We maintain the allowance for loan losses through the provision

for loan losses that we charge to income. We charge losses on loans against the allowance for loan losses when we believe the collection of loan principal is unlikely. The allowance for loan losses increased \$665,000 to \$14.5 million at September 30, 2016, from \$13.8 million at June 30, 2016. The increase was deemed appropriate in order to bring the allowance for loan losses to a level that reflects management's estimate of the incurred loss in the Company's loan portfolio at September 30, 2016.

At September 30, 2016, the Company had loans of \$10.7 million, or 0.88% of total loans, adversely classified (\$10.7 million classified "substandard"; none classified "doubtful" or "loss"), as compared to loans of \$11.0 million, or 0.96% of total loans, adversely classified (\$11.0 million classified "substandard"; none classified "doubtful" or "loss") at June 30, 2016, and \$14.6 million, or 1.35% of total loans, adversely classified (\$14.6 million classified "substandard"; none classified "doubtful" or "loss") at September 30, 2015. Classified loans were generally comprised of loans secured by commercial and residential real estate loans, while a smaller amount of commercial operating loans and consumer loans were also classified. All loans were classified due to concerns as to the borrowers' ability to continue to generate sufficient cash flows to service the debt. Of our classified loans, the Company had ceased recognition of

interest on loans with a carrying value of \$5.0 million at September 30, 2016. As noted in Note 4 to the condensed consolidated financial statements, the Company's total past due loans increased from \$5.3 million at June 30, 2016, to \$5.8 million at September 30, 2016.

In its quarterly evaluation of the adequacy of its allowance for loan losses, the Company employs historical data including past due percentages, charge offs, and recoveries for the previous five years for each loan category. The Company's allowance methodology considers the most recent twelve-month period's average net charge offs and uses this information as one of the primary factors for evaluation of allowance adequacy. Average net charge offs are calculated as net charge offs by portfolio type for the period as a percentage of the average balance of respective portfolio type over the same period.

The following table sets forth the Company's historical net charge offs as of September 30 and June 30, 2016:

Portfolio segment	September 30, 2016 Net charge offs – 12-month historical	June 30, 2016 Net charge offs – 12-month historical
Real estate loans:		
Residential	0.05%	0.04%
Construction	0.00%	0.00%
Commercial	0.01%	0.01%
Consumer loans	0.23%	0.25%
Commercial loans	0.13%	0.14%

Additionally, in its quarterly evaluation of the adequacy of the allowance for loan losses, the Company evaluates changes in the financial condition of individual borrowers; changes in local, regional, and national economic conditions; the Company's historical loss experience; and changes in market conditions for property pledged to the Company as collateral. The Company has identified specific qualitative factors that address these issues and subjectively assigns a percentage to each factor. Qualitative factors are reviewed quarterly and may be adjusted as necessary to reflect improving or declining trends. At September 30, 2016, these qualitative factors included:

- Changes in lending policies
- National, regional, and local economic conditions
- Changes in mix and volume of portfolio
- Experience, ability, and depth of lending management and staff
- Entry to new markets
- Levels and trends of delinquent, nonaccrual, special mention and Classified loans
- Concentrations of credit
- Changes in collateral values
- Agricultural economic conditions
- Regulatory risk

The qualitative factors are applied to the allowance for loan losses based upon the following percentages by loan type:

	Qualitative factor applied at interim period ended September 30, 2016	Qualitative factor applied at fiscal year ended June 30, 2016
Portfolio segment		
Real estate loans:		
Residential	0.73%	0.75%
Construction	1.81%	1.85%
Commercial	1.33%	1.32%
Consumer loans	1.37%	1.40%
Commercial loans	1.33%	1.35%

At September 30, 2016, the amount of our allowance for loan losses attributable to these qualitative factors was approximately \$13.2 million, as compared to \$12.3 million at June 30, 2016, primarily due to loan growth. The relatively small change in qualitative factors applied was attributable to management's assessment that risks represented by the qualitative factors were stable to slightly improving, based on national, regional and local economic conditions, as well as experience, ability and depth of lending management and staff. Higher levels of net charge offs requiring additional provision for loan losses could result. Although management uses the best information available, the level of the allowance for loan losses remains an estimate that is subject to significant judgment and short-term change.

Nonperforming Assets

The ratio of nonperforming assets to total assets and nonperforming loans to net loans receivable is another measure of asset quality. Nonperforming assets of the Company include nonaccruing loans, accruing loans delinquent/past maturity 90 days or more, and assets which have been acquired as a result of foreclosure or deed-in-lieu of foreclosure. The table below summarizes changes in the Company's level of nonperforming assets over selected time periods:

(dollars in thousands)	September 30, 2016	June 30, 2016	September 30, 2015
Nonaccruing loans:			
Residential real estate	\$ 2,073	\$2,676	\$ 2,109
Construction	245	388	133
Commercial real estate	1,779	1,797	1,664
Consumer	184	160	96
Commercial business	689	603	20
Total	4,970	5,624	4,022
Loans 90 days past due accruing interest:			
Residential real estate	60	-	-
Construction	-	-	-
Commercial real estate	-	-	-
Consumer	-	7	50
Commercial business	-	31	-
Total	60	38	50
Total nonperforming loans	5,030	5,662	4,072
Foreclosed assets held for sale:			
Real estate owned	3,182	3,305	4,392
Other nonperforming assets	45	61	109
Total nonperforming assets	\$ 8,257	\$9,028	\$ 8,573

At September 30, 2016, troubled debt restructurings (TDRs) totaled \$10.4 million, of which \$2.5 million was considered nonperforming and is included in the nonaccrual loan total above. The remaining \$7.9 million in TDRs have complied with the modified terms for a reasonable period of time and are therefore considered by the Company to be accrual status loans. In general, these loans were subject to classification as TDRs at September 30, 2016, on the basis of guidance under ASU No. 2011-02, which indicates that the Company may not consider the borrower's effective borrowing rate on the old debt immediately before the restructuring in determining whether a concession has been granted. At June 30, 2016, TDRs totaled \$8.4 million, of which \$2.3 million was considered nonperforming and is included in the nonaccrual loan total above. The remaining \$6.1 million in TDRs at June 30, 2016, had complied with the modified terms for a reasonable period of time and were therefore considered by the Company to be accrual status loans.

At September 30, 2016, nonperforming assets totaled \$8.3 million, as compared to \$9.0 million at June 30, 2016, and \$8.6 million at September 30, 2015. The decrease in nonperforming assets from fiscal year end was attributable primarily to a decrease in nonaccrual residential real estate loans and foreclosed real estate owned, partially offset by

increases in nonaccrual commercial loans and other nonperforming assets.

Liquidity Resources

The term "liquidity" refers to our ability to generate adequate amounts of cash to fund loan originations, loans purchases, deposit withdrawals and operating expenses. Our primary sources of funds include deposit growth, securities sold under agreements to repurchase, FHLB advances, brokered deposits, amortization and prepayment of loan principal and interest, investment maturities and sales, and funds provided by our operations. While the scheduled loan repayments and maturing investments are relatively predictable, deposit flows, FHLB advance redemptions, and loan and security prepayment rates are significantly influenced by factors outside of the Bank's control, including interest rates, general and local economic conditions and competition in the marketplace. The Bank relies on FHLB advances and brokered deposits as additional sources for funding cash or liquidity needs.

The Company uses its liquid resources principally to satisfy its ongoing cash requirements, which include funding loan commitments, funding maturing certificates of deposit and deposit withdrawals, maintaining liquidity, funding maturing or called FHLB advances, purchasing investments, and meeting operating expenses.

At September 30, 2016, the Company had outstanding commitments and approvals to extend credit of approximately \$159.7 million (including \$97.2 million in unused lines of credit) in mortgage and non-mortgage loans. These commitments and approvals are expected to be funded through existing cash balances, cash flow from normal operations and, if needed, advances from the FHLB or the Federal Reserve's discount window. At September 30, 2016, the Bank had pledged residential real estate loan portfolios and a significant portion of their commercial real estate loan portfolios with the FHLB for available credit of approximately \$274.2 million, of which \$128.8 million had been advanced. The Bank has the ability to pledge several of their other loan portfolios, including, for example, their commercial and home equity loans, which could provide additional collateral for additional borrowings; in total, FHLB borrowings are generally limited to 35% of bank assets, or \$490.0 million, subject to available collateral. Also, at September 30, 2016, the Bank had pledged a total of \$188.3 million in loans secured by farmland and agricultural production loans to the Federal Reserve, providing access to \$126.2 million in primary credit borrowings from the Federal Reserve's discount window. Management believes its liquid resources will be sufficient to meet the Company's liquidity needs.

Regulatory Capital

The Company and Bank are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory—and possibly additional discretionary – actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and Bank must meet specific capital guidelines that involve quantitative measures of the Company and the Bank's assets, liabilities, and certain off-balance sheet items as calculated under U.S. GAAP, regulatory reporting requirements and regulatory capital standards. The Company and Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. Furthermore, the Company and Bank's regulators could require adjustments to regulatory capital not reflected in the condensed consolidated financial statements.

Quantitative measures established by regulatory capital standards to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the table below) of total capital, Tier 1 capital (as defined), and common equity Tier 1 capital (as defined) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average total assets (as defined). Management believes, as of September 30 and June 30, 2016, that the Company and the Bank met all capital adequacy requirements to which they are subject.

In July 2013, the Federal banking agencies announced their approval of the final rule to implement the Basel III regulatory reforms, among other changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The approved rule included a new minimum ratio of common equity Tier 1 (CET1) capital of 4.5%, raised the minimum ratio of Tier 1 capital to risk-weighted assets from 4.0% to 6.0%, and included a minimum leverage ratio of 4.0% for all banking institutions. Additionally, the rule created a capital conservation buffer of 2.5% of risk-weighted assets, and prohibited banking organizations from making distributions or discretionary bonus payments during any quarter if its eligible retained income is negative, if the capital conservation buffer is not maintained. This new capital conservation buffer requirement began phasing in beginning in January 2016 at 0.625% of risk-weighted assets and increases each year until fully implemented in January 2019. The phase-in of the enhanced capital requirements for banking organizations such as the Company and the Bank began January 1, 2015. Other changes included revised risk-weighting of some assets, stricter limitations on mortgage servicing assets and deferred tax assets, and replacement of the ratings-based approach to risk weight securities.

As of September 30, 2016, the most recent notification from the Federal banking agencies categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized

the Bank must maintain minimum total risk-based, Tier 1 risk-based, common equity Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the Bank's category.

The tables below summarize the Company and Bank's actual and required regulatory capital:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of September 30, 2016 (dollars in thousands)						
Total Capital (to Risk-Weighted Assets)

PART I: Item 3: Quantitative and Qualitative Disclosures About Market Risk
SOUTHERN MISSOURI BANCORP, INC.

Asset and Liability Management and Market Risk

The goal of the Company's asset/liability management strategy is to manage the interest rate sensitivity of both interest-earning assets and interest-bearing liabilities in order to maximize net interest income without exposing the Bank to an excessive level of interest rate risk. The Company employs various strategies intended to manage the potential effect that changing interest rates may have on future operating results. The primary asset/liability management strategy has been to focus on matching the anticipated re-pricing intervals of interest-earning assets and interest-bearing liabilities. At times, however, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, the Company may determine to increase its interest rate risk position somewhat in order to maintain its net interest margin.

In an effort to manage the interest rate risk resulting from fixed rate lending, the Bank has utilized longer term FHLB advances (with maturities up to ten years), subject to early redemptions and fixed terms. Other elements of the Company's current asset/liability strategy include (i) increasing originations of commercial business, commercial real estate, agricultural operating lines, and agricultural real estate loans, which typically provide higher yields and shorter repricing periods, but inherently increase credit risk; (ii) actively soliciting less rate-sensitive deposits, including aggressive use of the Company's "rewards checking" product, and (iii) offering competitively-priced money market accounts and CDs with maturities of up to five years. The degree to which each segment of the strategy is achieved will affect profitability and exposure to interest rate risk.

The Company continues to originate long-term, fixed-rate residential loans. During the first three months of fiscal year 2017, fixed rate 1- to 4-family residential loan production totaled \$14.4 million, as compared to \$11.5 million during the same period of the prior fiscal year. At September 30, 2016, the fixed rate residential loan portfolio was \$139.4 million with a weighted average maturity of 117 months, as compared to \$135.6 million at September 30, 2015, with a weighted average maturity of 122 months. The Company originated \$6.5 million in adjustable-rate 1- to 4-family residential loans during the three-month period ended September 30, 2016, as compared to \$7.3 million during the same period of the prior fiscal year. At September 30, 2016, fixed rate loans with remaining maturities in excess of 10 years totaled \$35.6 million, or 3.0% of net loans receivable, as compared to \$39.3 million, or 3.7% of net loans receivable at September 30, 2015. The Company originated \$76.7 million in fixed rate commercial and commercial real estate loans during the three-month period ended September 30, 2016, as compared to \$39.0 million during the same period of the prior fiscal year. The Company also originated \$14.2 million in adjustable rate commercial and commercial real estate loans during the three-month period ended September 30, 2016, as compared to \$4.0 million during the same period of the prior fiscal year. At September 30, 2016, adjustable-rate home equity lines of credit increased to \$25.5 million, as compared to \$23.3 million at September 30, 2015. At September 30, 2016, the Company's investment portfolio had an expected weighted-average life of 3.5 years, compared to 3.8 years at September 30, 2015. Management continues to focus on customer retention, customer satisfaction, and offering new products to customers in order to increase the Company's amount of less rate-sensitive deposit accounts.

Interest Rate Sensitivity Analysis

The following table sets forth as of September 30, 2016, management's estimates of the projected changes in net portfolio value ("NPV") in the event of 100, 200, and 300 basis point ("bp") instantaneous and permanent increases, and 100, 200, and 300 basis point instantaneous and permanent decreases in market interest rates. Dollar amounts are expressed in thousands.

September 30, 2016

Change in Rates	Net Portfolio			NPV as Percentage of PV of Assets NPV	
	Value	Change	% Change	Ratio	Change
+300 bp	\$117,090	\$(16,719)	-12	% 8.02	% -1.06
+200 bp	123,055	(10,754)	-8	% 8.40	% -0.68
+100 bp	128,160	(5,649)	-4	% 8.72	% -0.35
0 bp	133,809	-	-	9.08	0.00
-100 bp	142,683	8,874	7	% 9.62	% 0.55
-200 bp	150,634	16,825	13	% 10.10	% 1.02
-300 bp	158,350	24,541	18	% 10.56	% 1.48

June 30, 2016

Change in Rates	Net Portfolio			NPV as Percentage of PV of Assets NPV	
	Value	Change	% Change	Ratio	Change
+300 bp	\$112,689	\$(15,234)	-12	% 8.14	% -0.95
+200 bp	118,137	(9,785)	-8	% 8.49	% -0.61
+100 bp	122,921	(5,001)	-4	% 8.79	% -0.31
0 bp	127,922	-	-	9.10	0.00
-100 bp	135,662	7,740	6	% 9.58	% 0.48
-200 bp	142,772	14,850	12	% 10.03	% 0.93
-300 bp	149,773	21,850	17	% 10.46	% 1.36

Computations of prospective effects of hypothetical interest rate changes are based on an internally generated model using actual maturity and repricing schedules for the Bank's loans and deposits, and are based on numerous assumptions, including relative levels of market interest rates, loan repayments and deposit run-offs, and should not be relied upon as indicative of actual results. Further, the computations do not contemplate any actions the Bank may undertake in response to changes in interest rates.

Management cannot predict future interest rates or their effect on the Bank's NPV in the future. Certain shortcomings are inherent in the method of analysis presented in the computation of NPV. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in differing degrees to changes in market interest rates. Additionally, certain assets, such as adjustable-rate loans, have an initial fixed rate period typically from

one to seven years and over the remaining life of the asset changes in the interest rate are restricted. In addition, the proportion of adjustable-rate loans in the Bank's portfolios could decrease in future periods due to refinancing activity if market interest rates remain steady in the future. Further, in the event of a change in interest rates, prepayment and early withdrawal levels could deviate significantly from those assumed in the table. Finally, the ability of many borrowers to service their adjustable-rate debt may decrease in the event of an interest rate increase.

The Bank's Board of Directors (the "Board") is responsible for reviewing the Bank's asset and liability policies. The Board's Asset/Liability Committees meets monthly to review interest rate risk and trends, as well as liquidity and capital ratios and requirements. The Bank's management is responsible for administering the policies and determinations of the Boards with respect to the Bank's asset and liability goals and strategies.

PART I: Item 4: Controls and Procedures
SOUTHERN MISSOURI BANCORP, INC.

An evaluation of Southern Missouri Bancorp's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended, (the "Act")) as of September 30, 2016, was carried out under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, and several other members of our senior management. The Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2016, the Company's disclosure controls and procedures were effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to management (including the Chief Executive and Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended September 30, 2016, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

The Company does not expect that its disclosures and procedures will prevent all errors and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II: Other Information

SOUTHERN MISSOURI BANCORP, INC.

Item 1: Legal Proceedings

In the opinion of management, the Company is not a party to any pending claims or lawsuits that are expected to have a material effect on the Company's financial condition or operations. Periodically, there have been various claims and lawsuits involving the Company mainly as a defendant, such as claims to enforce liens, condemnation proceedings on properties in which the Company holds security interests, claims involving the making and servicing of real property loans and other issues incident to the Bank's business. Aside from such pending claims and lawsuits, which are incident to the conduct of the Company's ordinary business, the Company is not a party to any material pending legal proceedings that would have a material effect on the financial condition or operations of the Company.

Item 1a: Risk Factors

There have been no material changes to the risk factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended June 30, 2016.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds
