FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — Organization and Significant Accounting Policies

Organization and Nature of Operations

Flotek Industries, Inc. ("Flotek" or the "Company") is a technology-driven, global developer and supplier of drilling, completion and production technologies and related services. With its acquisition of Florida Chemical Company, Inc. on May 10, 2013, the Company expanded its energy specialty chemical technologies and added consumer and industrial chemical technologies as a new segment and product line.

Flotek's strategic focus, and that of its diversified wholly-owned subsidiaries (collectively referred to as the "Company"), now includes energy-related chemical technologies, drilling technologies, production technologies (previously referred to as artificial lift technologies), and consumer and industrial chemical technologies. Within energy technologies, the Company provides oilfield specialty chemicals and logistics, down-hole drilling tools and production-related tools used in the energy and mining industries. Flotek's products and services enable customers to drill wells more efficiently, to realize increased production from both new and existing wells and to decrease future well operating costs. Major customers include leading oilfield service providers, pressure-pumping service companies, onshore and offshore drilling contractors, and major and independent oil and gas exploration and production companies. Within consumer and industrial chemical technologies, the Company provides products for the flavor and fragrance industry and the industrial chemical industry. Major customers include beverage and food companies, fragrance companies, and companies providing household and industrial cleaning products.

The Company is headquartered in Houston, Texas, with operating locations in Florida, Louisiana, New Mexico, North Dakota, Oklahoma, Pennsylvania, Texas, Utah, Wyoming, The Netherlands, and the Middle East. Flotek's products are marketed both domestically and internationally, with international presence and/or representation in over 20 countries.

Basis of Presentation

The accompanying Unaudited Consolidated Financial Statements and accompanying footnotes (collectively the "Financial Statements") reflect all adjustments, in the opinion of management, necessary for fair presentation of the financial condition and results of operations for the periods presented. All such adjustments are normal and recurring in nature. The Financial Statements, including selected notes, have been prepared in accordance with applicable rules and regulations of the Securities and Exchange Commission (the "SEC") regarding interim financial reporting and do not include all information and disclosures required by accounting principles generally accepted in the United States of America ("GAAP") for comprehensive financial statement reporting. These interim Financial Statements should be read in conjunction with the audited consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013 (the "Annual Report"). A copy of the Annual Report is available on the SEC's website, www.sec.gov, under the Company's ticker symbol ("FTK") or on Flotek's website, www.flotekind.com. The results of operations for the three months ended March 31, 2014 are not necessarily indicative of the results to be expected for the year ending December 31, 2014.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities and reported amounts of revenue and expenses. Actual results could differ from these estimates.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation. The reclassifications did not impact net income.

Note 2 — Recent Accounting Pronouncements

Application of New Accounting Standards

Effective January 1, 2014, the Company adopted the accounting guidance in Accounting Standards Update ("ASU") No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists," which provides guidance for reporting unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. The

guidance requires an unrecognized tax benefit to be presented as a decrease in a deferred tax asset where a net operating loss, a similar tax loss, or a tax credit carryforward exists and certain criteria are met. Implementation of this standard did not have a material effect on the consolidated financial statements.

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 3 — Acquisitions

On January 1, 2014, the Company acquired 100% of the membership interests in Eclipse IOR Services, LLC ("EOGA"), a leading Enhanced Oil Recovery ("EOR") design and injection firm, for \$6.4 million in cash consideration and 94,354 shares of the Company's Common Stock. EOGA's enhanced oil recovery processes and its use of polymers to improve the performance of EOR projects has been combined with the Company's existing EOR products and services.

As discussed in more detail in the Company's Annual Report on Form 10-K for the year ended December 31, 2013, the Company acquired Florida Chemical Company, Inc. ("Florida Chemical") on May 10, 2013 for a total purchase price of \$106.4 million. Florida Chemical is one of the world's largest processors of citrus oils and a pioneer in solvent, chemical synthesis, and flavor and fragrance applications from citrus oils. Florida Chemical has been an innovator in creating high performance, bio-based products for a variety of industries, including applications in the oil and gas industry. The acquisition brings a portfolio of high performance renewable and sustainable chemistries that perform well in the oil and gas industry as well as non-energy related markets. This expands the Company's business into consumer and industrial chemical technologies which provide products for the flavor and fragrance industry and the specialty chemical industry. These technologies are used by beverage and food companies, fragrance companies, and companies providing household and industrial cleaning products.

Note 4 — Supplemental Cash Flow Information

Supplemental cash flow information is as follows (in thousands):

	Three months ended March 31,	
	2014	2013
Supplemental non-cash investing and financing activities:		
Value of common stock issued in acquisition of EOGA	\$1,750	\$—
Value of common stock issued in payment of accrued liability	600	—

Furniture and fixtures	2,350	2,400
Transportation equipment	6,441	6,340
Computer equipment and software	8,005	7,617
Property and equipment	134,744	129,388
Less accumulated depreciation	(53,067) (50,274
Property and equipment, net	\$81,677	\$79,114

Depreciation expense, including expense recorded in cost of revenue, totaled \$3.0 million and \$2.5 million for the three months ended March 31, 2014 and 2013, respectively.

Note 8 — Goodwill and Other Intangible Assets

In January 2014, in connection with the EOGA acquisition, the Company recognized \$5.3 million of goodwill within the Energy Chemical Technologies reporting unit. There were no impairments of goodwill recognized during the three months ended March 31, 2014.

Changes in the carrying value of goodwill for each reporting unit are as follows (in thousands):

	Energy Chemical Technologies	Consumer and Industrial Chemical Technologies	Teledrift™	Total
Balance at December 31, 2013	\$30,296	\$20,642	\$15,333	\$66,271
Addition upon acquisition of EOGA	5,312	—	—	5,312
Balance at March 31, 2014	\$35,608	\$20,642	\$15,333	\$71,583

Finite lived intangible assets acquired are amortized on a straight-line basis over two to 20 years. Amortization of finite lived intangible assets acquired totaled \$1.2 million and \$0.5 million for the three months ended March 31, 2014 and 2013, respectively. Amortization of deferred financing costs was \$0.1 million for the three months ended March 31, 2014 and was not significant for the three months ended March 31, 2013.

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 9 — Long-Term Debt and Credit Facility

Long-term debt is as follows (in thousands):

	March 31, 2014	December 31, 2013
Long-term debt:		
Term loan	\$41,048	\$45,833
Borrowings under revolving credit facility	13,925	16,272
Total long-term debt	54,973	62,105
Less current portion of long-term debt	(24,068) (26,415
Long-term debt, less current portion	\$30,905	\$35,690

Credit Facility

On May 10, 2013, the Company and certain of its subsidiaries (the “Borrowers”) entered into an Amended and Restated Revolving Credit, Term Loan and Security Agreement (the “Credit Facility”) with PNC Bank, National Association (“PNC Bank”). The Company may borrow under the Credit Facility for working capital, permitted acquisitions, capital expenditures and other corporate purposes. Under terms of the Credit Facility, as amended on December 31, 2013, the Company (a) may borrow up to \$75 million under a revolving credit facility and (b) has borrowed \$50 million under a term loan.

The Credit Facility is secured by substantially all of the Company's domestic real and personal property, including accounts receivable, inventory, land, buildings, equipment and other intangible assets. The Credit Facility contains customary representations, warranties, and both affirmative and negative covenants, including a financial covenant to maintain a consolidated earnings before interest, taxes, depreciation and amortization (“EBITDA”) to debt ratio of 1.10 to 1.00, a financial covenant to maintain a ratio of funded debt to adjusted EBITDA of not greater than 4.0 to 1.0, and an annual limit on capital expenditures of approximately \$36 million. The Credit Facility restricts the payment of cash dividends on common stock. In the event of default, PNC Bank may accelerate the maturity date of any outstanding amounts borrowed under the Credit Facility.

The Credit Facility includes a provision that 25% of EBITDA minus cash paid for taxes, dividends, debt payments and unfunded capital expenditures, not to exceed \$3.0 million for any year, be paid within 60 days of the fiscal year end. For the year ended December 31, 2013, the excess cash flow exceeded \$3.0 million. Consequently, the Company paid \$3.0 million on its term loan balance to PNC Bank on March 3, 2014. This amount is classified as current debt at December 31, 2013.

Each of the Company's domestic subsidiaries is fully obligated for Credit Facility indebtedness as a Borrower or as a guarantor.

(a) Revolving Credit Facility

Under the revolving credit facility, the Company may borrow up to \$75 million through May 10, 2013. This includes a sublimit of \$10 million that may be used for letters of credit. The revolving credit facility is secured by substantially all the Company's domestic accounts receivable and inventory.

At March 31, 2014, eligible accounts receivable and inventory securing the revolving credit facility provided availability of approximately \$74.8 million under the revolving credit facility. Available borrowing capacity, net of outstanding borrowings, was \$60.9 million at March 31, 2014.

The interest rate on advances under the revolving credit facility varies based on the level of borrowing. Rates range (a) between PNC Bank's base lending rate plus 0.5% to 1.0% or (b) between the London Interbank Offered Rate (LIBOR) plus 1.5% to 2.0%. PNC Bank's base lending rate was 3.25% at March 31, 2014. The Company is required to pay a monthly facility fee of 0.25% on any unused amount under the commitment based on daily averages. At March 31, 2014, \$13.9 million was outstanding under the revolving credit facility borrowed as LIBOR loans at an interest rate of 1.65%.

Borrowing under the revolving credit agreement is classified as current debt as a result of the required lockbox arrangement and subjective acceleration clause.

(b) Term Loan

The Company increased borrowing to \$50 million under the term loan on May 10, 2013. Monthly principal payments of \$0.6 million are required. The unpaid balance of the term loan is due May 10, 2018. Prepayments are permitted, and may be required in certain circumstances. Amounts repaid under the term loan may not be reborrowed. The term loan is secured by substantially all of the Company's domestic land, buildings, equipment and other intangible assets.

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

The interest rate on the term loan varies based on the level of borrowing under the revolving credit facility. Rates range (a) between PNC Bank's base lending rate plus 1.25% to 1.75% or (b) between LIBOR plus 2.25% to 2.75%. At March 31, 2014, \$41.0 million was outstanding under the term loan, with less than \$0.1 million borrowed as base rate loans at an interest rate of 4.50% and \$41.0 million borrowed as LIBOR loans at an interest rate of 2.41%.

Convertible Notes

The Company's convertible notes have consisted of Convertible Senior Unsecured Notes ("2008 Notes") and Convertible Senior Secured Notes ("2010 Notes"). On February 15, 2013, the Company repurchased the remaining \$5.2 million of outstanding 2008 Notes for cash equal to the original principal amount, plus accrued and unpaid interest. These 2008 Notes were either tendered by the holder pursuant to the Company's tender offer or were redeemed by the Company pursuant to provisions of the indenture for the 2008 Notes. Following this repurchase, the Company no longer has any outstanding convertible senior notes.

Share Lending Agreement

Concurrent with the offering of the 2008 Notes, the Company entered into a share lending agreement (the "Share Lending Agreement") with Bear, Stearns International Limited which was subsequently acquired and became an indirect, wholly owned subsidiary of JPMorgan Chase & Company (the "Borrower"). In accordance with the Share Lending Agreement, the Company loaned 3.8 million shares of its common stock (the "Borrowed Shares") to the Borrower for a period commencing February 11, 2008 and ending on the earlier of February 15, 2028 or the date the 2008 Notes were paid. The Borrower was permitted to use the Borrowed Shares only for the purpose of directly or indirectly facilitating the sale of the 2008 Notes and for the establishment of hedge positions by holders of the 2008 Notes. The Company did not require collateral to mitigate any inherent or associated risk of the Share Lending Agreement.

The Company did not receive any proceeds for the Borrowed Shares, but did receive a nominal loan fee of \$0.0001 for each share loaned. The Borrower retained all proceeds from sales of Borrowed Shares pursuant to the Share Lending Agreement. Upon conversion or replacement of the 2008 Notes, the number of Borrowed Shares proportionate to the converted or repaid notes were to be returned to the Company. The Borrowed Shares were issued and outstanding for corporate law purposes. Accordingly, holders of Borrowed Shares possessed all of the rights of a holder of the Company's outstanding shares, including the right to vote the shares on all matters submitted to a vote of stockholders and the right to receive any dividends or other distributions declared or paid on outstanding shares of common stock. Under the Share Lending Agreement, the Borrower agreed to pay to the Company, within one business day after a payment date, an amount equal to any cash dividends that the Company paid on the Borrowed Shares, and to pay or deliver to the Company, upon termination of the loan of Borrowed Shares, any other distribution, in liquidation or otherwise, that the Company made on the Borrowed Shares.

To the extent the Borrowed Shares loaned under the Share Lending Agreement were not sold or returned to the Company, the Borrower agreed to not vote any borrowed shares of which the Borrower was the owner of record. The Borrower also agreed, under the Share Lending Agreement, to not transfer or dispose of any borrowed shares unless such transfer or disposition was pursuant to a registration statement that was effective under the Securities Act. Investors that purchased shares from the Borrower, and all subsequent transferees of such purchasers, were entitled to the same voting rights, with respect to owned shares, as any other holder of common stock.

During 2011 and 2012, the Borrower returned shares 1,360,442 shares of the Company's borrowed common stock. On January 22, 2013, the remaining 2,439,558 shares of the Company's common stock held by J.P. Morgan Markets Limited were returned to the Company. No consideration was paid by the Company for the return of the Borrowed Shares. The Share Lending Agreement has been terminated.

Shares that had been loaned under the Share Lending Agreement were not considered outstanding for the purpose of computing and reporting earnings per share.

Note 10 — Earnings Per Share

Basic earnings per common share is calculated by dividing net income by the weighted average number of common shares outstanding for the period. Diluted earnings per common share is calculated by dividing net income, adjusted

for the effect of assumed conversion of convertible notes, by the weighted average number of common shares outstanding combined with dilutive common share equivalents outstanding, if the effect is dilutive.

In connection with the sale of the 2008 Notes, the Company entered into a Share Lending Agreement for 3.8 million shares of the Company's common stock (see Note 9). Contractual undertakings of the Borrower had the effect of substantially eliminating the economic dilution that otherwise would result from the issuance of the Borrowed Shares, and all shares outstanding under the

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Share Lending Agreement were contractually obligated to be returned to the Company. As a result, shares loaned under the Share Lending Agreement were not considered outstanding for the purpose of computing and reporting earnings per share. The Share Lending Agreement was terminated on January 22, 2013 upon the return of all Borrowed Shares to the Company.

On February 15, 2013, the Company repurchased the remaining \$5.2 million of outstanding 2008 Notes for cash. Following this repurchase, the Company no longer has any outstanding convertible senior notes. For the three months ended March 31, 2013, the Company's convertible notes were excluded from the calculation of diluted earnings per common share, as inclusion was anti-dilutive. In addition, for the three months ended March 31, 2013, approximately 0.1 million stock options with an exercise price in excess of the average market price of the Company's common stock were excluded from the calculation of diluted earnings per common share.

Basic and diluted earnings per common share are as follows (in thousands, except per share data):

	Three months ended March 31,	
	2014	2013
Net income - Basic and Diluted	\$12,018	\$7,765
Weighted average common shares outstanding - Basic	53,948	48,582
Assumed conversions:		
Incremental common shares from warrants	486	1,411
Incremental common shares from stock options	949	1,142
Incremental common shares from restricted stock units	15	87
Weighted average common shares outstanding - Diluted	55,398	51,222
Basic earnings per common share	\$0.22	\$0.16
Diluted earnings per common share	\$0.22	\$0.15

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 11 — Fair Value Measurements

Fair value is defined as the amount that would be received for selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company categorizes financial assets and liabilities into the three levels of the fair value hierarchy. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value and bases categorization within the hierarchy on the lowest level of input that is available and significant to the fair value measurement.

Level 1 — Quoted prices in active markets for identical assets or liabilities;

Level 2 — Observable inputs other than Level 1, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3 — Significant unobservable inputs that are supported by little or no market activity or that are based on the reporting entity's assumptions about the inputs.

Fair Value of Other Financial Instruments

The carrying amounts of certain financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and accrued expenses, approximate fair value due to the short-term nature of these accounts. The Company had no cash equivalents at March 31, 2014 or December 31, 2013.

The carrying value and estimated fair value of the Company's long-term debt are as follows (in thousands):

	March 31, 2014		December 31, 2013	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Term loan	\$41,048	\$41,048	\$45,833	\$45,833
Borrowings under revolving credit facility	13,925	13,925	16,272	16,272

The carrying value of the term loan and borrowings under the revolving credit facility approximate their fair value because the interest rates are variable.

Assets Measured at Fair Value on a Nonrecurring Basis

The Company's non-financial assets, including property and equipment, goodwill and other intangible assets are measured at fair value on a non-recurring basis and are subject to fair value adjustment in certain circumstances. No impairment of any of these assets was recognized during the three months ended March 31, 2014 and 2013.

Liabilities Measured at Fair Value on a Recurring Basis

At March 31, 2014 and December 31, 2013, no liabilities were required to be measured at fair value on a recurring basis. There were no transfers in or out of either Level 1 or Level 2 fair value measurements during the three months ended March 31, 2014 and the year ended December 31, 2013. During the three months ended March 31, 2014 and the year ended December 31, 2013, there were no transfers in or out of the Level 3 hierarchy.

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 12 — Income Taxes

The Company's corporate organizational structure requires the filing of two separate consolidated U.S. Federal income tax returns. Taxable income of one group cannot be offset by tax attributes, including net operating losses, of the other group.

A reconciliation of the effective tax rate to the U.S. federal statutory tax rate is as follows:

	Three months ended March 31,			
	2014		2013	
Federal statutory tax rate	35.0	%	35.0	%
State income taxes, net of federal benefit	2.3		2.6	
Change in valuation allowance	—		(0.1)
Domestic production activities deduction	(2.7)	(2.4)
Other	0.1		0.2	
Effective income tax rate	34.7	%	35.3	%

Fluctuations in effective tax rates were historically impacted by permanent tax differences with no associated income tax impact and existing deferred tax asset valuation allowances.

Deferred taxes are presented in the balance sheets as follows (in thousands):

	March 31, 2014		December 31, 2013	
Current deferred tax assets	\$2,500		\$2,522	
Non-current deferred tax assets	15,100		15,012	
Non-current deferred tax liabilities	(27,351)	(27,575)
Net deferred tax assets (liabilities)	\$(9,751)	\$(10,041)

Note 13 — Convertible Preferred Stock and Stock Warrants

In August 2009, the Company sold 16,000 units (the "Units"), consisting of preferred stock and warrants for \$1,000 per Unit. Each Unit consisted of one share of Series A cumulative convertible preferred stock ("Convertible Preferred Stock"), detachable warrants to purchase up to 155 shares of the Company's common stock at an exercise price of \$2.31 per share ("Exercisable Warrants") and detachable contingent warrants to purchase up to 500 shares of the Company's common stock at an exercise price of \$2.45 per share ("Contingent Warrants").

Preferred Stock

Each share of Convertible Preferred Stock was convertible at any time, at the holder's option, into 434.782 shares of the Company's common stock. The conversion rate represented an equivalent conversion price of approximately \$2.30 per share of common stock.

Each share of Convertible Preferred Stock had a liquidation preference of \$1,000. Dividends accrued at a rate of 15% of the liquidation preference per year and accumulated, if not paid quarterly. Subsequent to February 11, 2010, the Company had the ability to convert the preferred shares into common shares if the closing price of the common stock met certain price criteria. In the event any Convertible Preferred Stock was converted, the Company was obligated to pay an amount, in cash or common stock, equal to eight quarterly dividend payments less any dividends previously paid.

In February 2011, the Company exercised its contractual right to mandatorily convert all outstanding shares of Convertible Preferred Stock into shares of common stock at the prevailing conversion rate of 434.782 shares of common stock for each share of preferred stock. Currently, the Company has no issued or outstanding shares of preferred stock.

Stock Warrants

Exercisable Warrants were exercisable upon issuance and expire August 12, 2014, if not exercised. Contingent Warrants became exercisable on November 9, 2009, and expire November 9, 2014, if not exercised. Prior to June 14, 2012, the warrants contained anti-dilution price protection in the event the Company issued shares of common stock or securities exercisable for, or convertible into, common stock at a price per share less than the warrants' exercise price. In accordance with these contractual anti-dilution

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

price adjustment provisions, the warrants were re-priced as a result of a payment of a portion of the initial and deferred commitment fees related to the Company's term loan with common stock on March 31, 2010 and September 30, 2010.

Due to the anti-dilution price adjustment provisions established at the issuance date, the warrants were deemed to be a liability and were recorded at fair value at the date of issuance. The warrant liability was adjusted to fair value at the end of each reporting period through the statement of operations during the period the anti-dilution price adjustment provisions were in effect. On June 14, 2012, contractual provisions within the Company's Exercisable and Contingent Warrant agreements were modified to eliminate the anti-dilution price adjustment provisions of the warrants and remove the cash settlement provisions in the event of a change of control. The amended warrants then qualified to be classified as equity. Accordingly, the Company revalued the warrants as of June 14, 2012, the date of contractual amendment. The change in fair value of the warrant liability compared to the fair value on December 31, 2011, \$2.6 million, was recognized in income during 2012. The revalued warrant liability of \$14.0 million was reclassified to additional-paid-in-capital on June 14, 2012. There were no longer fair value adjustments because the warrants continued to meet the criteria for equity classification.

The Company used the Black-Scholes option-pricing model to estimate the fair value of the warrant liability for each reporting period. On June 14, 2012, the date the warrants were amended, inputs into the fair value calculation included the actual remaining term of the warrants, a volatility rate of 58.1%, a risk-free rate of return of 0.36%, and an assumed dividend rate of zero.

On February 7, 2014, warrants were exercised to purchase 1,277,250 shares of the Company's common stock at \$1.21 per share. The Company received cash proceeds of \$1.5 million in connection with the warrants exercised. Following the exercise, the Company no longer had any outstanding warrants from its sale of preferred stock and warrants in August 2009.

Note 14 — Business Segment, Geographic and Major Customer Information
Segment Information

Operating segments are defined as components of an enterprise for which separate financial information is available that is regularly evaluated by chief operating decision-makers in deciding how to allocate resources and assess performance. With its acquisition of Florida Chemical Company, Inc. on May 10, 2013, the Company added operations in a new segment, Consumer and Industrial Chemical Technologies. The operations of the Company are now categorized into four reportable segments: Energy Chemical Technologies, Consumer and Industrial Chemical Technologies, Drilling Technologies and Production Technologies.

Energy Chemical Technologies designs, develops, manufactures, packages and markets specialty chemicals, some of which hold patent protection, used in oil and gas well cementing, stimulation, acidizing, drilling and production. Activities in this segment also include construction and management of automated material handling facilities and management of loading facilities and blending operations for oilfield services companies.

Consumer and Industrial Chemical Technologies designs, develops and manufactures products that are sold to companies in the flavor and fragrance industry and the specialty chemical industry. These technologies are used by beverage and food companies, fragrance companies, and companies providing household and industrial cleaning products.

Drilling Technologies rents, sells, inspects, manufactures and markets down-hole drilling equipment used in energy, mining, water well and industrial drilling activities.

Production Technologies assembles and markets production-related equipment, including the Petrovalve™ product line of rod pump components, electric submersible pumps, gas separators, valves and services that support natural gas, oil and coal bed methane production activities.

The Company evaluates performance based upon a variety of criteria. The primary financial measure is segment operating income. Various functions, including certain sales and marketing activities and general and administrative activities, are provided centrally by the corporate office. Costs associated with corporate office functions, other

corporate income and expense items, and income taxes, are not allocated to reportable segments.

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Summarized financial information of the reportable segments is as follows (in thousands):

As of and for the three months ended March 31,	Energy Chemical Technologies	Consumer and Industrial Chemical Technologies	Drilling Technologies	Production Technologies	Corporate and Other	Total
2014						
Net revenue from external customers	\$ 62,377	\$ 13,030	\$ 24,901	\$ 2,267	\$—	\$102,575
Gross margin	29,220	4,033	9,788	640	—	43,681
Income (loss) from operations	21,623	2,335	3,317	(79)	(8,398)	18,798
Depreciation and amortization	1,067	433	2,437	70	212	4,219
Total assets	137,638	93,217	136,141	14,864	8,656	390,516
Capital expenditures	1,386	14	3,296	61	233	4,990
2013						
Net revenue from external customers	\$ 44,650	\$ —	\$ 28,914	\$ 4,679	\$—	\$78,243
Gross margin	19,113	—	11,346	2,171	—	32,630
Income (loss) from operations	14,324	—	5,419	1,613	(8,808)	12,548
Depreciation and amortization	460	—	2,362	61	150	3,033
Total assets	59,301	—	120,015	12,280	26,887	218,483
Capital expenditures	1,025	—	861	997	1,500	4,383

Geographic Information

Revenue by country is based on the location where services are provided and products are sold. No individual country other than the United States (“U.S.”) accounted for more than 10% of revenue. Revenue by geographic location is as follows (in thousands):

	Three months ended March 31,	
	2014	2013
U.S.	\$87,331	\$66,023
Other countries	15,244	12,220
Total	\$102,575	\$78,243

Long-lived assets held in countries other than the U.S. are not considered material to the consolidated financial statements.

Major Customers

One customer accounted for 15.4% and 17.5% of consolidated revenue for the three months ended March 31, 2014 and 2013, respectively. Over 98% of the revenue from this customer was in the Energy Chemical Technologies segment.

Note 15 — Commitments and Contingencies

Litigation

The Company is subject to routine litigation and other claims that arise in the normal course of business. Management is not aware of any pending or threatened lawsuits or proceedings that are expected to have a material effect on the Company’s financial position, results of operations or liquidity.

Representation Agreements

In February 2011, the Company entered into two separate representation agreements with Basin Supply Corporation (“Basin Supply”), a multinational, energy industry-focused supply chain management company, to market certain of the

Company's specialty chemicals and down-hole drilling products and services within various international markets, including the Middle East, Africa, Latin America and the former Soviet Union. Both agreements are effective through December 31, 2015. Under each agreement, Basin Supply is eligible to receive warrants to purchase Flotek common stock (at an exercise price of 125% of the

Table of contents

FLOTEK INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

price of Flotek's common stock on the grant date) upon exceeding contractually defined annual base and "stretch" sales targets. The number of warrants that could be issued under the terms of each of the agreements is 100,000 during 2014.

Concentrations and Credit Risk

The majority of the Company's revenue is derived from the oil and gas industry. Customers include major oilfield services companies, major integrated oil and natural gas companies, independent oil and natural gas companies, pressure pumping service companies and state-owned national oil companies. This concentration of customers in one industry increases credit and business risks.

The Company is subject to concentrations of credit risk within trade accounts receivable as the Company does not generally require collateral as support for trade receivables. In addition, the majority of the Company's cash is maintained at one major financial institution and balances often exceed insurable amounts.

Note 16 — Subsequent Event

Acquisition of SiteLark, LLC ("SiteLark")

Effective April 1, 2014, the Company acquired 100% of the membership interests in SiteLark for \$0.4 million and 5,327 shares of the Company's common stock. SiteLark provides reservoir engineering and modeling services for a variety of hydrocarbon applications. Its services include proprietary software which assists engineers with reservoir simulation, reservoir engineering and waterflood optimization.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q (the "Quarterly Report"), and in particular, Part I, Item 2 - "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains "forward-looking statements" within the meaning of the safe harbor provisions, 15 U.S.C. § 78u-5, of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). Forward-looking statements are not historical facts, but instead represent the Company's current assumptions and beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside the Company's control. Such statements include estimates, projections, and statements related to Flotek Industries, Inc.'s ("Flotek" or the "Company") business plan, objectives, expected operating results and assumptions upon which those statements are based. The forward-looking statements contained in this Quarterly Report are based on information available as of the date of this Quarterly Report.

The forward-looking statements relate to future industry trends and economic conditions, forecast performance or results of current and future initiatives and the outcome of contingencies and other uncertainties that may have a significant impact on the Company's business, future operating results and liquidity. These forward-looking statements generally are identified by words including, but not limited to, "anticipate," "believe," "estimate," "continue," "intend," "expect," "plan," "forecast," "project" and similar expressions, or future-tense or conditional constructions such as "will," "may," "should," "could," etc. The Company cautions that these statements are merely predictions, and are not to be considered guarantees of future performance. Forward-looking statements are based upon current expectations and assumptions that are subject to risks and uncertainties that can cause actual results to differ materially from those projected, anticipated or implied.

A detailed discussion of potential risks and uncertainties that could cause actual results and events to differ materially from forward-looking statements is included in Part I, Item 1A - "Risk Factors" of the Annual Report on Form 10-K for the year ended December 31, 2013 (the "Annual Report") and periodically in subsequent reports filed with the Securities and Exchange Commission (the "SEC"). The Company has no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events, except as required by law.

Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") should be read in conjunction with the unaudited consolidated condensed financial statements and the related notes thereto, as well as our Annual Report on Form 10-K for the year ended December 31, 2013 ("2013 Annual Report"). Phrases such as

“Company,” “we,” “our” and “us” refer to Flotek Industries, Inc. and its subsidiaries.

Executive Summary

Flotek is a global diversified, technology-driven company that develops and supplies oilfield products, services and equipment to the oil, gas and mining industries, and high value compounds to companies that make cleaning products, cosmetics, food and beverages, and other products that are sold in the consumer and industrial markets.

Table of Contents

The Company's oilfield businesses include specialty chemicals and logistics, down-hole drilling tools and production-related tools. Flotek's technologies enable customers to drill wells more efficiently, increase well production and decrease well operating costs. The Company also provides automated bulk material handling, loading facilities and blending capabilities. Through its acquisition of Florida Chemical in May 2013, the Company sources citrus oil domestically and internationally and is one of the largest processors of citrus oil in the world. Products produced from processed citrus oil include (1) high value compounds used as additives by companies in the flavors and fragrances markets and (2) environmentally friendly chemicals for use in numerous industries around the world, specifically the oil and gas ("O&G") industry. The Company has combined the research efforts of the newly acquired business with its previously existing research and development ("R&D") effort to strengthen its focus on developing environmentally responsible products for the oil and gas industry and other markets.

Flotek operates in over 20 domestic and international markets, including the Gulf Coast, Southwest, Rocky Mountains, Northeastern and Mid-Continental regions of the United States (the "U.S."), Canada, Mexico, Central America, South America, Europe, Africa, Middle East, Australia and Asia-Pacific. Customers include major integrated O&G companies, oilfield services companies, independent O&G companies, pressure-pumping service companies, national and state-owned oil companies, and international supply chain management companies. As a result of its Florida Chemical acquisition, customers now also include non-energy-related citrus oil users, including household and commercial cleaning product companies, fragrance and cosmetic companies, and food manufacturing companies.

The operations of the Company are categorized into four reportable segments: Energy Chemical Technologies, Consumer and Industrial Chemical Technologies, Drilling Technologies and Production Technologies (previously referred to as Artificial Lift Technologies).

Energy Chemical Technologies designs, develops, manufactures, packages and markets specialty chemicals used in O&G well drilling, cementing, completion, stimulation and production. Activities in this segment also include construction and management of automated material handling facilities and management of loading facilities and blending operations for oilfield services companies.

Consumer and Industrial Chemical Technologies designs, develops and manufactures products that are sold to companies in the flavor and fragrance industries and specialty chemical industry. These technologies are used by beverage and food companies, fragrance companies, and companies providing household and industrial cleaning products.

Drilling Technologies rents, sells, inspects, manufactures and markets down-hole drilling equipment used in energy, mining, water well and industrial drilling activities.

Production Technologies assembles and markets production-related equipment, including the Petrovalve product line of rod pump components, electric submersible pumps, gas separators, valves and services that support natural gas, oil and coal bed methane production activities.

Market Conditions

The Company's success is sensitive to a number of factors, which include, but are not limited to, drilling activity, customer demand for its advanced technology products, market prices for raw materials and governmental actions. Drilling activity levels are influenced by a number of factors, including the number of rigs in operation, the geographical areas of rig activity, and drill rig efficiency (rig days required per well). Additional factors that influence the level of drilling activity include:

Historical, current, and anticipated future O&G prices,

- Federal, State and local governmental actions that may encourage or discourage drilling activity,
- Customers' strategies relative to capital funds allocations,
- Weather conditions, and
- Technological changes to drilling methods and economics.

Table of Contents

Historical North American drilling activity is reflected in “TABLE A” below:

Customers’ demand for advanced technology products and services provided by the Company are dependent on their recognition of the value of:

• Chemistries that improve the economics of their O&G operations,

• Drilling products that improve drilling operations and efficiencies, and

• Chemistries that are economically viable, socially responsible and ecologically sound.

Market prices for citrus oils can be influenced by:

• Historical, current, and anticipated future production levels of the global citrus (primarily orange) crop,

• Weather related risks,

• and

• Health and condition of citrus trees (e.g., disease and pests).

Governmental actions may restrict the future use of hazardous chemicals, including but not limited to, the following industrial applications:

• O&G drilling and completion operations,

• O&G production operations, and

• Non-O&G industrial solvents.

TABLE A

	Three months ended March 31,		
	2014	2013	% Change
North American Average Active Drilling Rigs			
U.S.	1,779	1,758	1.2 %
Canada	525	531	(1.1) %
Total Average North American Drilling Rigs	2,304	2,289	0.7 %
U.S. Average Active Drilling Rigs by Type			
Vertical	387	440	(12.0) %
Horizontal	1,182	1,127	4.9 %
Directional	210	191	9.9 %
Total Average U.S. Drilling Rigs by Type	1,779	1,758	1.2 %
Oil vs. Natural Gas Average North American Drilling Rigs			
Oil	1,766	1,724	2.4 %
Natural Gas	538	565	(4.8) %
Total North America	2,304	2,289	0.7 %
U.S. Average Wells Drilled per Quarter per Rig	5.14	5.00	2.8 %

Source: Rig and well counts are per Baker Hughes, Inc. (www.bakerhughes.com). Rig counts are the averages of the weekly rig count activity. Average wells drilled per quarter per rig is the number of wells drilled in the reporting period divided by the average weekly rig count. Current quarter well count data from Baker Hughes, Inc. is preliminary and is subject to revision.

During the three months ended March 31, 2014, total North American active drilling rig count saw an increase when compared to the comparable period of 2013, primarily in oil drilling rigs. Overall U.S. rig activity increased 1.2% for the three months ended March 31, 2014 compared to the same period in 2013 and the number of wells drilled per rig per quarter increased 2.8% for the three months ending March 31, 2014 to 5.14 compared to 5.00 for the same period in 2013 as improvements in drilling technologies continue to allow rigs to become more efficient.

U.S. drilling rigs by type continued to show a shift toward directional and horizontal wells and away from vertical wells. Average North American oil drilling rig activity increased by 2.4% for the three months ended March 31, 2014 when compared to the same period of 2013. North American natural gas drilling rigs have decreased by 4.8% for the three months ended March 31, 2014 compared to the same period of 2013.

Company Outlook

Future economic conditions are expected to remain consistent with recent market conditions. Increases in drilling rig operating efficiencies noted above are resulting in pricing pressure on rig-based operations. To some extent, those pressures impact drilling

Table of Contents

suppliers such as Flotek, especially in our Drilling Technologies segment. Our tools are being leased for a smaller amount of time per well drilled, which is partially offset by the expansion in the number of wells being drilled per quarter per rig.

The Company is expanding its Energy Chemical Technologies and Drilling Technologies businesses by expanding its production capacity, developing innovative new products and pursuing and developing new market opportunities. The Company is also restructuring its Production Technologies segment to focus on unconventional oil markets. As a result of this restructuring and market shift, the Company plans to increase capital and operational spending in this segment.

Capital expenditures, exclusive of acquisitions, totaled \$5.0 million and \$4.4 million for the three months ended March 31, 2014 and 2013, respectively. The Company continues to pursue selected strategic acquisitions and relationships, both domestically and internationally when opportunities arise.

In November 2013, the Company signed a shareholder agreement with Tasneea Oil and Gas Technologies, LLC (“Tasneea”) an Omani Limited Liability Company, to form Omani based Flotek Gulf, LLC (“Flotek Gulf”) and Flotek Gulf Research, LLC (“Flotek Gulf Research”). Upon official approval by the Omani government, Flotek and Tasneea will begin the transfer of assets into Flotek Gulf and Flotek Gulf Research. Flotek Gulf and Flotek Gulf Research will develop and market specialty chemistries for the oil and gas industry throughout the Middle East and North Africa. During 2014 Flotek Gulf expects to construct a manufacturing facility designed to produce Flotek's patented and proprietary products for distribution throughout the region.

Effective January 1, 2014, the Company acquired Eclipse IOR Services, LLC (“EOGA”), a leading enhanced oil recovery (EOR) design and injection firm. EOGA's expertise in enhanced oil recovery processes and the use of polymers to improve the performance of EOR projects will be combined with the Company's existing EOR products and services. The combined product and service offerings will be well positioned to serve the growing market for EOR products and services.

Effective April 1, 2014, the Company acquired 100% of the membership interests in SiteLark for \$0.4 million and 5327 shares of the Company's common stock. SiteLark provides reservoir engineering and modeling services for a variety of hydrocarbon applications. Its services include proprietary software which assists engineers with reservoir simulation, reservoir engineering and waterflood optimization.

The Company believes governmental reaction to constituents' environmental concerns regarding the hydraulic fracturing process and the use of hazardous chemicals in O&G operations could work to its advantage. These environmental concerns favor the Company's chemistries as economical replacements for more hazardous chemicals currently in use in many drilling and producing operations. Several states and countries have grass-roots, citizen movements that are aimed specifically at “greening” the hydraulic fracturing process, and management believes it is likely these environmental concerns/reactions will broaden to other states in the quarters to come.

The outlook for the Company's consumer and industrial chemistries will be driven by availability and demand for citrus oils and other bio-based raw materials. Current inventory and crop expectations for 2014 are sufficient to meet the Company's needs to supply its flavor and fragrance business as well as the industrial markets. However, market price volatility will likely result in revenue and margin fluctuations from quarter to quarter.

The Company works to maintain a portfolio of products which are adaptable to meet our customers' demands for customized products for the various drilling and producing environments in which they operate. The Company's commitment to R&D permits the Company to remain responsive to increased demand and continued growth. The Company remains committed to continued development of its product technologies and believes the new growth of its business through the acquisition of Florida Chemical will strategically advance its existing assets and technologies to better serve its customers' needs. The Company believes that it is well-positioned to respond to increased demand for the Company's suite of hydrocarbon stimulation and completion products, particularly the Company's patented Complex nano-Fluid™ Chemistries. In addition, the Company anticipates continued strong demand for its Teledrift Pro-series tool product lines and its recently introduced Stimulator™ tool.

Changes to global geo-political and economic events could have an impact, either positive or negative, on the Company's business. In the event of significant adverse changes to the demand for O&G production, the market conditions affecting the Company could change quickly and materially. Should such adverse changes to market conditions occur, management believes the Company has adequate liquidity to withstand the impact of such changes. In addition, management believes the Company is well-positioned to take advantage of significant increases in demand for its products should market conditions improve in the near term.

The Company expects that competition for contracts and margins will remain intense in the future but believes that product innovation and service improvements will enable the Company to realize market share gains in 2014.

Consolidated Results of Operations: Three Months Ended March 31, 2014 Compared to the Three Months Ended March 31, 2013

Consolidated revenue for the three months ended March 31, 2014 increased \$24.3 million, or 31.1%, relative to the comparable period of 2013. The increase in revenue was primarily due to the acquisition of Florida Chemical and EOGA, contributing incremental revenue of \$16.8 million during the quarter. Excluding the impact of acquisitions, revenue for the quarter ended March 31, 2014, increased by \$7.5 million, or 9.6%. Revenue increases in the Energy Chemical Technologies segment were partially offset by revenue declines in the Drilling Technologies and Production Technologies segments.

Consolidated gross margin for the three months ended March 31, 2014 increased \$11.1 million, or 33.9%, relative to the comparable period of 2013. The increase in gross margin was primarily due to the increase in revenue. Gross margin percentage increased to 42.6% in the first quarter of 2014 from 41.7% in the same period of 2013. The increase in gross margin percentage was primarily attributable to proportionately higher sales of proprietary products in the Energy Chemical Technologies segment and supply chain benefits from the Florida Chemical acquisition, partially offset by the change in portfolio mix resulting from the inclusion of Florida Chemical in the consolidated results for the three months ended March 31, 2014.

Selling, general and administrative expenses ("SG&A") are not directly attributable to products sold or services provided. SG&A for the three months ended March 31, 2014 increased by \$3.6 million, or 19.7%, compared to the same period of 2013. Excluding the incremental SG&A costs of acquired companies, SG&A costs increased \$1.2 million, or 6.9%, compared to the same period of 2013. SG&A costs as a percentage of revenue declined from 23.0% to 21.0% in the three months ended March 31, 2014 compared to the same period of 2013 as revenues grew faster than SG&A costs.

Depreciation and amortization expense for the three months ended March 31, 2014 increased by \$1.1 million, or 92.0%, relative to the comparable period of 2013, primarily due to incremental depreciation and amortization of \$0.7 million for assets recognized as part of the acquisition of Florida Chemical in 2013.

Research and Development expense increased \$0.2 million, or 17.3%, for the three months ended March 31, 2014, as compared to the same period in 2013. The increase in R&D is primarily attributable to new product development and Flotek's commitment to remaining responsive to increased demand and continued growth of our existing product lines. Interest and other expense for the three months ended March 31, 2014 was essentially flat relative to the comparable period of 2013.

Table of Contents

The Company recorded an income tax provision of \$6.4 million, yielding an effective tax rate of 34.7% for the three months ended March 31, 2014, compared to an income tax provision of \$4.2 million reflecting an effective tax rate of 35.3% for the comparable period in 2013.

Results by Segment

Energy Chemical Technologies (dollars in thousands)

	Three months ended March 31,		
	2014	2013	
Revenue	\$62,377	\$44,650	
Gross margin	29,220	19,113	
Gross margin %	46.8	% 42.8	%
Income from operations	21,623	14,324	
Income from operations %	34.7	% 32.1	%

Energy Chemical Technologies Results of Operations: Three Months Ended March 31, 2014 Compared to the Three Months Ended March 31, 2013

Energy Chemical Technologies revenue for the three months ended March 31, 2014 increased \$17.7 million, or 39.7%, relative to the comparable period of 2013. Excluding the incremental revenue impact of \$3.8 million related to acquisitions, revenue increased \$13.9 million, or 31.0%, for the quarter ended March 31, 2014 compared to the same period of 2013. Increased sales of stimulation chemical additives accounted for the majority of the revenue increase for the quarter ended March 31, 2014 relative to the comparable period of 2013.

Energy Chemical Technologies' gross margin increased \$10.1 million, or 52.9% for the three months ended March 31, 2014. The increase in gross margin for the first quarter was primarily due to the increase in product sales revenue. The increase in gross margin percentage for the three months ended March 31, 2014 was primarily attributable to product portfolio mix resulting from proportionately higher sales of patented and proprietary products and the supply chain benefits of the Florida Chemical acquisition.

Income from operations for the Energy Chemical Technologies segment increased \$7.3 million, or 51.0%, for the three months ended March 31, 2014. The quarterly increase in income from operations is primarily attributable to the increase in revenue over the periods, partially offset by an increase in headcount, travel and insurance costs incurred in pursuit of growth opportunities. The increase in income from operations percentage of revenue in the quarter comparison is primarily due to increases in gross margin percentages resulting from product portfolio mix.

CICT Results of Operations: Three Months Ended March 31, 2014 Compared to the Three Months Ended March 31, 2013

The CICT segment was formed in the second quarter of 2013 with the acquisition of Florida Chemical. For the three months ended March 31, 2014 the segment contributed revenue of \$13.0 million. CICT revenue is primarily driven by demand for d-Limonene and other bio-based chemistries as well as from citrus isolates produced for the flavor and fragrance industry. Revenue for CICT is subject to market seasonality and availability of raw materials.

Table of Contents

CICT gross margin for the three months ended March 31, 2014 contributed \$4.0 million. Gross margin for the quarter was favorably impacted by proportionally higher sales of high margin flavor and fragrance isolates.

Income from operations for the three months ended March 31, 2014 contributed \$2.3 million to the company's consolidated income from operations.

Drilling Technologies (dollars in thousands)

	Three months ended March 31,		
	2014	2013	
Revenue	\$24,901	\$28,914

Gross margin %	39.3	% 39.2	%
Income from operations	3,317	5,419	
Income from operations %	13.3	% 18.7	%

Drilling Technologies Results of Operations: Three Months Ended March 31, 2014 Compared to the Three Months Ended March 31, 2013

Drilling Technologies revenue for the three months ended March 31, 2014 decreased \$4.0 million, or 13.9%, relative to the same period in 2013. Revenue declines can be primarily attributed to a decline in oilfield and mining product sales along with rental revenue declines for actuated tool rentals and Teledrift® tools.

Product revenue for the first quarter of 2014 compared to the same quarter of 2013 decreased by \$2.2 million, or 22.4%, due to decreased sales of centralizers and float equipment in the oilfield services market and drill pipe in the mining industry.

Rental revenue for the first quarter of 2014 decreased \$1.9 million, or 11.9% in relation to the first quarter of 2013. Actuated tool rental revenue (motors, jars and shocks) declined by \$1.2 million or 25.6% in 2014 due to increased competition, competitive pricing pressure, and strategic selection of higher margin rental jobs for these tools. Teledrift® tool rentals decreased by \$0.8 million due to declines domestically in the Mid-Continent and Southern regions from seasonal weather, transient employment and logistics issues, and declines internationally in Argentina. The domestic regions regained momentum in the later part of the first quarter of 2014 and are continuing to accelerate. Partially offsetting these decreases was an increase of \$0.6 million in Stimulator™ extended reach tool revenue year over year with March of 2014 showing the strongest revenue yet for the product line.

Service revenue for the three months ended March 31, 2014 was relatively flat as compared to the same period of 2013. Service revenue remains stable for Drilling Technologies as the segment maintains complimentary oilfield services and continues to add additional services along with increased service pricing.

Drilling Technologies gross margin for the three months ended March 31, 2014 decreased by \$1.6 million, or 13.7%, over the comparable period of 2013, but remained relatively flat as a percentage of revenue. Gross margin declined due to decreased revenue, partially offset by an increase in gross margin percentage due to direct cost control including lower employee, supplies, and travel expenses in the first quarter of 2014.

Drilling Technologies income from operations for the quarter ended March 31, 2014 decreased by \$2.1 million, or 38.8%, over the same period in 2013 primarily due to decreased sales volume.

Table of Contents

Production Technologies (dollars in thousands)

	Three months ended March 31,			
	2014		2013	
Revenue	\$2,267		\$4,679	
Gross margin	640		2,171	
Gross margin %	28.2	%	46.4	%
Income from operations	(79)	1,613	
Income from operations %	(3.5)%	34.5	%

Production Technologies Results of Operations: Three Months Ended March 31, 2014 Compared to the Three Months Ended March 31, 2013

Production Technologies (previously referred to as Artificial Lift Technologies) revenue has historically been derived primarily from coal bed methane (“CBM”) drilling activity, and was highly impacted by the price of natural gas. The segment is now shifting focus to the unconventional oil markets and the related equipment sales and service. Revenue for the Production Technologies segment for the quarter ended March 31, 2014 decreased by \$2.4 million, or 51.5% from the same quarter in 2013. International valve sales decreased year over year due to a contract fulfilled in the first quarter of 2013. Electrical submersible pump sales have also decreased as a result of continued declines in CBM activity. These decreases were partially offset by increases in revenue with linear lift systems and rod valve sales in the Powder River and Williston Basins unconventional oil markets.

Production Technologies gross margin decreased by \$1.5 million, or 70.5%, for the three months ended March 31, 2014 compared to the same period in 2013. Decreased sales volume coupled with the higher margin revenue from the 2013 international valve sales led to the decreased gross margin for the quarter.

Income from operations for the quarter ended March 31, 2014 decreased by \$1.7 million, or 104.9%, compared to the same period in 2013 primarily due to the volume and margin changes and increases in SG&A costs due to employment related expenses as the segment continues to refocus and reposition in the market.

Off-Balance Sheet Arrangements

There have been no transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as “structured finance” or “special purpose entities” (“SPEs”), established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of March 31, 2014, the Company was not involved in any unconsolidated SPEs.

The Company has not made any guarantees to customers or vendors nor does the Company have any off-balance sheet arrangements or commitments that have, or are reasonably likely to have, a current or future effect on the Company’s financial condition, change in financial condition, revenue, expenses, results of operations, liquidity, capital expenditures or capital resources that would be material to investors.

Critical Accounting Policies and Estimates

The Company’s Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). Preparation of these statements requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and accompanying footnotes.

Part II, Item 8, Financial Statements and Supplementary Data, Note 2 of “Notes to Unaudited Consolidated Financial Statements” and Part II, Item 7, Management’s Discussion and Analysis of Financial Conditions and Results of Operations, “Critical Accounting Policies and Estimates” of the Company’s Annual Report on Form 10-K for the year ended December 31, 2013, and the “Notes to Unaudited Consolidated Financial Statements” of this Quarterly Report describe the significant accounting policies and critical accounting estimates used to prepare the consolidated financial statements. Critical accounting policies and estimates are defined as those that are both most important to the portrayal of the Company’s financial condition and results of operations and require management’s most subjective judgments. The Company regularly reviews and challenges judgments, assumptions and estimates related to critical accounting policies. The Company’s estimates and assumptions are based on historical experience and expected changes in the business environment; however, actual results may materially differ from the estimates.

As part of the acquisition process the Company reaffirmed policies and estimates surrounding business combination in accordance with accounting principles generally accepted in the United States of America (“GAAP”), specifically,

utilizing the guidance of Accounting Standards Codification ("ASC") Topic 805, formerly Statement of Financial Accounting Standards ("SFAS") No.

Table of Contents

141R, as amended by FSP SAFAS No. 141(R)-1 which became effective on January 1, 2009. ASC Topic 805 requires an acquiring entity in a transaction to recognize all of the identifiable assets acquired and liabilities assumed at fair value at the acquisition date at their estimated fair values on the acquisition date, to recognize and measure pre-acquisition contingencies, including contingent consideration, at fair value (if possible), to remeasure liabilities related to contingent consideration at fair value in each subsequent reporting period and to expense all acquisition related costs. Though the Company has implemented business combination accounting guidance, there have been no significant changes in the Company's critical accounting estimates during the three months ended March 31, 2014.

Application of New Accounting Standards

Effective January 1, 2014, the Company adopted the accounting guidance in ASU No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists," which updated the guidance in ASC Topic 740, Income Taxes. The amendments in ASU 2013-11 provide guidance for the presentation of unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. The guidance requires an unrecognized tax benefit to be presented as a decrease in a deferred tax asset where a net operating loss, a similar tax loss, or a tax credit carryforward exists and certain criteria are met. Implementation of this standard did not have a material effect on the consolidated financial statement.

Capital Resources and LiquidityOverview

Ongoing capital requirements arise from the Company's need to service debt, acquire and maintain equipment, and fund working capital requirements. During the first half of 2014, the Company funded capital requirements primarily with operating cash flows.

The Company's primary source of debt financing is its Revolving Credit Facility with PNC Bank. This credit facility contains provisions for revolving debt of up to \$75.0 million, based on a borrowing base supported by accounts receivable and inventory, and a term loan of \$50.0 million. As of March 31, 2014, the Company had \$13.9 million in outstanding borrowings under the revolving debt portion of the credit facility and \$41.0 million outstanding under the term loan. At March 31, 2014, the Company was in compliance with all debt covenants. Significant terms of the Company's credit facility are discussed in Part I, Item 1 — "Financial Statements" in Note 9 of "Notes to Unaudited Consolidated Financial Statements" in this Quarterly Report.

Cash and cash equivalents totaled \$1.7 million at March 31, 2014. During the first three months of 2014, the Company generated \$15.5 million of cash inflows from operations, net of \$1.0 million expended in working capital. The Company used \$8.7 million of net cash in investing activities, including \$4.1 million for capital expenditures, \$5.3 million, net of cash acquired, for the purchase of EOGA, partially offset by proceeds of \$0.8 million from the sale of assets. Net cash used in financing activities totaled \$7.7 million. The Company repaid net draws and term loans on the amended Credit Facility of \$2.3 million and \$4.8 million, respectively. Additionally, the Company paid \$4.0 million in purchases of treasury stock for tax withholding purposes related to vesting of restricted stock awards.

Cash Flows

Consolidated cash flows by type of activity are noted below (in thousands):

	Three months ended March 31,	
	2014	2013
Net cash provided by operating activities	\$15,505	\$8,009
Net cash used in investing activities	(8,704)	(2,995)
Net cash provided by financing activities	(7,718)	(7,446)
Effect of changes in exchange rates on cash and cash equivalents	(149)	(20)
Net decrease in cash and cash equivalents	\$(1,066)	\$(2,452)

Operating Activities

Net cash provided by operating activities was \$15.5 million and \$8.0 million during the three months ended March 31, 2014 and 2013, respectively. Consolidated net income for the three months ended March 31, 2014 totaled \$12.0 million, compared to consolidated net income of \$7.8 million for the three months ended March 31, 2013.

Table of Contents

During the three months ended March 31, 2014, net non-cash contributions to net income totaled \$4.5 million. Contributory non-cash items consisted of \$4.2 million for depreciation and amortization and \$2.3 million for stock-based compensation expense. Non-cash reductions to net income included \$0.6 million for net gains on asset disposals, \$1.3 million for recognized incremental tax benefits related to the Company's share based awards and \$0.3 million for net increases in deferred income taxes.

During the three months ended March 31, 2013, net non-cash contributions to net income totaled \$3.9 million, primarily consisting of \$2.2 million for stock compensation expense, \$3.0 million for asset depreciation and amortization and \$0.3 million for deferred income taxes, partially offset by \$1.1 million for net gain on sale of assets and \$0.6 million recognized incremental tax benefits related to the Company's share based awards.

During the three months ended March 31, 2014, net working capital was reduced by \$1.0 million. Working capital was used to decrease accrued liabilities by \$2.5 million, increase inventory by \$9.9 million and increase accounts receivable by \$0.5 million. Offsetting the reductions to working capital were increased income taxes payable of \$4.3 million, increased accounts payable of \$6.7 million and decreased other current assets of \$0.9 million.

During the three months ended March 31, 2013, net working capital was reduced by \$3.7 million. Working capital was primarily used to increase accounts receivable by \$3.9 million and decrease accounts payable by \$2.4 million, partially offset by decreases in other current assets of \$1.8 million, decreases in inventories of \$0.3 million, increases in accrued liabilities of \$0.2 million and increases in income taxes payable of \$0.2 million.

Investing Activities

Net cash used in investing activities was \$8.7 million and \$3.0 million for the three months ended March 31, 2014 and 2013, respectively. The change in investing activities during the three months ended March 31, 2014 was largely due to net cash paid for EOGA of \$5.3 million. Capital expenditures of \$4.1 million and \$4.4 million were incurred for the three months ended March 31, 2014 and 2013, respectively. Cash flows used in investing activities during the three months ended March 31, 2014 and 2013 were partially offset by \$0.8 million and \$1.4 million of proceeds received from the sale of fixed assets, respectively.

Financing Activities

Net cash used by financing activities was \$7.7 million for the three months ended March 31, 2014. Cash used by financing activities was primarily due to \$7.1 million for the repayments of debt, net of borrowings, purchases of treasury stock for tax withholding purposes related to vesting of restricted stock awards of \$4.0 million and debt issuance costs of \$0.1 million. Cash used by financing activities was partially offset by proceeds from the exercise of stock warrants of \$1.5 million, proceeds from the excess tax benefit related to stock-based compensation of \$1.3 million, proceeds from the sale of common stock of \$0.2 million and proceeds from the exercise of stock options of \$0.4 million.

During the three months ended March 31, 2013, financing activities used net cash of \$7.4 million. Financing activities included \$5.3 million for repayments of debt, net of borrowings, and purchases of treasury stock of \$2.7 million, partially offset by the excess tax benefit related to stock-based compensation of \$0.6 million.

Although the Company has no immediate intention to access the capital markets, the Company intends to file a "universal" shelf registration with the Securities and Exchange Commission in the coming weeks. This shelf registration statement will register the issuance and sale from time to time of various securities by the Company, including but not limited to senior notes, subordinated notes, preferred stock, common stock, and warrants. Once this shelf registration statement is filed with the Securities and Exchange Commission and becomes effective, the Company will have the financial flexibility to access the capital markets quickly and efficiently from time to time as the need may arise.

Contractual Obligations

Cash flows from operations are dependent on a variety of factors, including fluctuations in operating results, accounts receivable collections, inventory management, and the timing of payments for goods and services. Correspondingly, the impact of contractual obligations on the Company's liquidity and capital resources in future periods is analyzed in conjunction with such factors.

Table of Contents

Material contractual obligations consist of repayment of amounts borrowed on the Company's Credit Facility with PNC Bank and payment of operating lease obligations. Contractual obligations at March 31, 2014 are as follows (in thousands):

	Payments Due by Period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Term loan	\$41,048	\$10,143	\$20,286	\$10,619	\$—
Interest expense on term loan ⁽¹⁾	4,781	1,476	2,436	869	—
Borrowings under revolving credit facility ⁽²⁾	13,925	13,925	—	—	—
Operating lease obligations	9,124	1,629	2,590	1,654	3,251
Total	\$68,878	\$27,173	\$25,312	\$13,142	\$3,251

(1) Interest expense amounts assume interest rates on this variable rate obligation remain unchanged from March 31, 2014 rates.

(2) The borrowing is classified as current debt. The weighted-average interest rate is 2.41% at March 31, 2014.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk from changes in interest rates and, to a limited extent, commodity prices and foreign currency exchange rates. There have been no material changes to the quantitative or qualitative disclosures about market risk set forth in Part II, Item 7A of the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in reports filed or submitted under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. The Company's disclosure controls and procedures are also designed to ensure such information is accumulated and communicated to management, including the principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance that control objectives are attained. The Company's disclosure controls and procedures are designed to provide such reasonable assurance.

The Company's management, with the participation of the principal executive and principal financial officers, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures as of March 31, 2014, as required by Rule 13a-15(e) of the Exchange Act. Based upon that evaluation, the principal executive and principal financial officers have concluded that the Company's disclosure controls and procedures were effective as of March 31, 2014.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's system of internal control over financial reporting during the three months ended March 31, 2014 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is subject to routine litigation and other claims that arise in the normal course of business. Management is not aware of any pending or threatened lawsuits or proceedings that are expected to have a material effect on the Company's financial position, results of operations or liquidity.

Item 1A. Risk Factors

There have been no material changes to the risk factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Repurchases of the Company's equity securities during the three months ended March 31, 2014 are as follows:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs (2)
January 1, 2014 to January 31, 2014	698	\$ 19.68	—	\$25,000,000
February 1, 2014 to February 28, 2014	79,115	\$ 19.04	—	\$25,000,000
March 1, 2014 to March 31, 2014	121,331	\$ 24.95	—	\$25,000,000
Total	201,144	\$ 22.61	—	

(1) The Company purchased shares of its common stock (a) to satisfy tax withholding requirements and payment remittance obligations related to period vesting of restricted shares and exercise of non-qualified stock options, and (b) to satisfy payments required for common stock upon the exercise of stock options.

(2) In November 2012, the Company's Board of Directors authorized the repurchase of up to \$25 million of the Company's common stock. Repurchases may be made in open market or privately negotiated transactions. Through March 31, 2014, the Company has not repurchased any of its common stock and \$25 million may yet be used to purchase shares.
