Notes to the Schedule of Investments

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. In order to value the securities, the Fund uses the following valuation techniques: Equity securities held by the Fund are valued at the last sale price or official closing price on the principal securities exchange on which they trade. In the event there were no sales during the day or closing prices are not available, then the securities are valued using the last quoted bid or evaluated price. Debt obligations are valued based on the evaluated prices provided by an independent pricing service, which utilizes both dealer-supplied and electronic data processing techniques, taking into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data. Certain securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Certain short-term securities are valued at amortized cost. Other portfolio securities and assets, where market quotations are not available, are valued at fair value as determined in good faith by the Fund's Pricing Committee following procedures established by the Board of Trustees, which include price verification procedures. The frequency with which these fair valuation procedures are used cannot be predicted.

The Fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the Fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends,

Edgar Filing: JOHN HANCOCK FINANCIAL OPPORTUNITIES FUND - Form N-Q

changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the Fund's investments as of January 31, 2013, by major security category or type:

Change in unrealized at period end*	\$ 815,409	\$ (117,520)	\$ 57,500	\$ 755,389

The valuation techniques and significant amounts of unobservable inputs used in the fair value measurement of the Fund's Level 3 securities are outlined in the table below:

	Fair Value at 1/31/2013	Valuation Technique	Unobservable Inputs	Range
Common Stocks	\$16,133,712	Market Approach	Book value multiple Discount for lack of marketability	0.84x - 1.16x (weighted average: 1.11x) 10%
Preferred Securities	\$4,712,664	Market Approach	Offered quotes	\$925.00 - \$2,426.60 (weighted average: \$1,076.35)
Convertible Bonds	\$4,310,000	Market Approach	Offered Quotes	\$74.00 - \$102.00 (weighted average: \$97.19)

Increases/decreases in offered quotes or book value multiples may result in increases/decreases in security valuation. Increases/decreases in discounts for lack of marketability may result in decreases/increases in security

valuation.

Repurchase agreements. The Fund may enter into repurchase agreements. When the Fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the Fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline.
