#### **Bond Ratings** (unaudited)

AAA

The definitions of the applicable rating symbols are set forth below:

Standard & Poor $\square$ s Ratings Service ( $\square$ Standard & Poor $\square$ s $\square$ ) $\square$ Ratings from  $\square$ AA $\square$  to  $\square$ CCC $\square$  may be modified by the addition of a plus (+) or minus ( $\square$ ) sign to show relative standings within the major rating categories.

□Bonds rated □AAA□ have the highest rating assigned by Standard & Poor□s. Capacity to pay interest and

repay principal is extremely strong. ☐ Bonds rated ☐AA☐ have a very strong capacity to pay interest and repay principal and differ from the highest AA rated issues only in a small degree. ☐ Bonds rated ☐A☐ have a strong capacity to pay interest and repay principal although they are somewhat Α more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories. **BBB**  $\sqcap$  Bonds rated  $\sqcap$ BBB $\sqcap$  are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for bonds in this category than in higher rated categories. BB, B, CCC, CC  $\square$  Bonds rated  $\square BB\square$ ,  $\square B\square$ ,  $\square CCC\square$ ,  $\square CC\square$  and  $\square C\square$  are regarded, on balance, as predominantly speculative with response to capacity to pay interest and repay principal in accordance with the terms of the obligation. | BB| and C represents the lowest degree of speculation and [C[] the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions.  $\sqcap$  Bonds rated  $\sqcap D \sqcap$  are in default and payment of interest and/or repayment of principal is in arrears.  $Moody \land S$  Investors Service ( $\sqcap Moody \land S \cap S$ ) \( \dagger Numerical modifiers 1, 2 and 3 may be applied to each generic rating from ||Aa|| to ||Caa|| where 1 is the highest and 3 the lowest ranking within its generic category. ☐ Bonds rated ☐Aaa☐ are judged to be of the best quality. They carry the smallest degree of investment risk Aaa and are generally referred to as ∏gilt edge. ☐ Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues. Bonds rated [Aa] are judged to be of high quality by all standards. Together with the [Aaa] group they Aa comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in ∏Aaa∏ securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in  $\square Aaa \square$  securities. Bonds rated \( \backslash A \backslash \) possess many favorable investment attributes and are to be considered as upper medium A grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment some time in the future. Baa Bonds rated \( \precipe Baa \) are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well. Bonds rated \(\pa\) are judged to have speculative elements; their future cannot be considered as well Ba assured. Often the protection of interest and principal payments may be very moderate and therefore

|             |    | not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.   |
|-------------|----|---|
| В           |    | Bonds rated $\square B \square$ are generally lack characteristics of desirable investments. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small. |
| Caa         |    | Bonds rated $\Box$ Caa $\Box$ are of poor standing. These may be in default, or present elements of danger may exist with respect to principal or interest.   |
| Ca          |    | Bonds rated [Ca] represent obligations which are speculative in a high degree. Such issues are often in default or have other marked short-comings.   |

#### **Notes to Schedule of Investments (unaudited)**

#### 1. Organization and Significant Accounting Policies

The Salomon Brothers Municipal Partners Fund II Inc. (the [Fund]) was incorporated in Maryland on June 21, 1993 and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended, (the "1940 Act").

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles ( $\lceil GAAP \rceil$ ).

- (a) Investment Valuation. Securities are valued at the mean between the bid and ask prices provided by an independent pricing service that are based on transactions in municipal obligations, quotations from municipal bond dealers, market transactions in comparable securities and various relationships between securities. Securities for which market quotations are not readily available or are determined not to reflect fair value, will be valued in good faith by or under the direction of the Fund □s Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates value.
- **(b) Security Transactions.** Security transactions are accounted for on a trade date basis.

#### 2. Investments

At March 31, 2006, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

| Net unrealized appreciation \$ | 2,334,958 |
|--------------------------------|-----------|

#### ITEM 2. CONTROLS AND PROCEDURES.

- The registrant□s principal executive officer and principal financial officer have concluded that the registrant□s disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the □1940 Act□)) are effective as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the disclosure controls and procedures required by Rule 30a-3(b) under the 1940 Act and 15d-15(b) under the Securities Exchange Act of 1934.
- (b) There were no changes in the registrant□s internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant□s last fiscal quarter that have materially affected, or are likely to materially affect the registrant□s internal control over financial reporting.

#### ITEM 3. EXHIBITS.

Certifications pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are attached hereto.

#### **SIGNATURES**
