A Letter to Shareholders

THIS PAGE NOT PART OF YOUR FUND REPORT

Dear Shareholder

Over the past several months, financial markets have been buffeted by the housing recession, the credit market unraveling and related liquidity freeze and steadily rising commodity prices. Counterbalancing these difficulties were booming export activity, a robust non-financial corporate sector and, notably, aggressive and timely monetary and fiscal policy actions.

Amid the market tumult, the Federal Reserve Board (the Fed) intervened with a series of moves to bolster liquidity and ensure financial market stability. Since September 2007, the central bank slashed the target federal funds rate 325 basis points (3.25%), bringing the rate to 2.0% as of period-end. Of greater magnitude, however, were the Fed s other policy decisions, which included opening the discount window directly to broker dealers and investment banks and backstopping the unprecedented rescue of Bear Stearns.

The Fed s response to the financial crisis helped to improve credit conditions and investor mood. After hitting a low point on March 17 (coinciding with the collapse of Bear Stearns), equity markets found a welcome respite in April, when the S&P 500 Index of U.S. stocks posted positive monthly performance for the first time since October 2007. International markets, which outpaced those of the U.S. for much of 2007, saw a reversal in that trend, as effects of the credit crisis and downward pressures on growth were far-reaching.

In contrast to equity markets, Treasury securities rallied (yields fell as prices correspondingly rose), as a broad flight-to quality theme persisted. The yield on 10-year Treasury issues, which touched 5.30% in June 2007 (its highest level in five years), fell to 4.04% by year-end and to 3.77% by April 30. Treasury issues relinquished some of their gains in April, however, as investor appetite for risk returned and other high-quality fixed income sectors outperformed.

Problems within the monoline insurance industry and the failure of auctions for auction rate securities plagued the municipal bond market, driving yields higher and prices lower across the curve. However, in conjunction with the more recent shift in sentiment, the sector delivered strong performance in the final month of the reporting period.

Overall, the major benchmark indexes generated results that generally reflected heightened investor risk aversion:

Total Returns as of April 30, 2008	6-month	12-month
U.S. equities (S&P 500 Index)	-9.64%	-4.68%
Small cap U.S. equities (Russell 2000 Index)	-12.92	-10.96
International equities (MSCI Europe, Australasia, Far East Index)	-9.21	-1.78
Fixed income (Lehman Brothers U.S. Aggregate Index)	+4.08	+6.87
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+1.47	+2.79
High yield bonds (Lehman Brothers U.S. Corporate High Yield 2% Issuer Capped Index)	-0.73	-0.80

BlackRock High Yield Trust

Investment Objective

BlackRock High Yield Trust (BHY) (the Trust) seeks to provide high current income and, to a lesser extent, capital appreciation.

Performance

For the six months ended April 30, 2008, the Trust returned +3.40% based on market price, with dividends reinvested. The Trust s return based on NAV was -4.11%, with dividends reinvested. For the same period, the Lipper High Current Yield Funds (Leveraged) category of closed-end funds posted an average return of -9.95% on a NAV basis. In a difficult market for high yield securities, the Trust maintained a low leverage position (averaging less than 20% of net assets) relative to its Lipper peer group, which aided performance. Conversely, a small allocation to bank loans, which underperformed high yield issues, detracted from the relative return.

Investment Objective

Performance

For the six months ended April 30, 2008, the Trust returned +2.07% based on market price, with dividends reinvested. The Trust s return based on NAV was +0.74%, with dividends reinvested. For the same period, the Lipper Corporate Debt Funds BBB-Rated category of closed-end funds posted an average return of -1.04% on a NAV basis. The Trust s comparative performance benefited from its relatively high credit quality and a significant allocation to mortgages, which outperformed corporate issues during the period. BlackRock Strategic Bond Trust

Investment Objective

BlackRock Strategic Bond Trust (BHD) (the Trust) seeks total return through high current income and capital appreciation.

Performance

For the six months ended April 30, 2008, the Trust returned +2.25% based on market price, with dividends reinvested. The Trust is return based on NAV was +0.31%, with dividends reinvested. For the same period, the Lipper General Bond Funds (closed-end) category posted an average return of +1.06% on a NAV basis. The Benefits and Risks of Leveraging

The Trusts may utilize leverage through borrowings or issuance of short-term debt securities or Preferred Shares. The concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates on borrowings or dividend rates on the Preferred Shares, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s Common Shareholders will be the beneficiaries of the incremental yield.

As of April 30, 2008, the Trusts had the following leverage amounts of managed assets:

	Percent of Leverage
Core Bond	30%
High Yield	10%
Income Opportunity	30%
Income Trust	15%
Limited Duration	17%
Preferred and Equity	33%

Leverage creates risks for holders of Common Shares including the likelihood of greater net asset value and market price volatility. In addition, there is the risk that fluctuations in interest rates on borrowings or in the dividend rates on any Preferred Shares may reduce the Common Shares—yield and negatively impact its net asset value and market price. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, each Trust—s net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust—s net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced.

Swap Agreements

The Trusts may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom the Trust has entered into the swap will default on its obligation to pay the Trust and the risk that the Trust will not be able to meet its obligations to pay the other party to the agreement.
