PIMCO Municipal Income Funds II Letter to Shareholders

January 15, 2009

Dear Shareholder:

We are pleased to provide you with the semi-annual report for PIMCO Municipal Income Fund II, PIMCO California Municipal Income Fund II and PIMCO New York Municipal Income Fund II (collectively, the Funds) for the six-month period ended November 30, 2008.

Tight credit conditions and a global economic slowdown caused municipal bond prices to fall during the period. The Barclays Capital Municipal Bond Index returned (4.98)% while the Barclays Capital U.S. Aggregate Bond Index, a broad credit market measure of government and corporate securities, posted a positive 0.24% return. Stocks fared worse in the downturn. The Standard & Poor's 500 Index returned (35.20)% for the period, among the worst periods on record for equities. The Federal Reserve (the Fed) sought to inject liquidity into the economy through multiple initiatives, including reducing the Federal Funds rate twice during the reporting period. The Fed moves lowered the key target rate on loans between banks from 2.00% to 1.00%.

In the coming weeks or months, we would expect the de-leveraging of the private sector to meet its counterpart in the leveraging of the federal government as it seeks to inject more than a trillion dollars of liquidity into the nation's financial system. This initiative holds potential to restore stability and some relative safety to debt securities outside of the shortest-term government issues.

Subsequent to the six month period ended November 30, 2008, a decision to redeem a portion of each Fund's Auction Rate Preferred Shares (ARPS) was made at the recommendation of the Fund's investment manager and approved by the Board of Trustees. These redemptions were intended to increase and maintain asset coverage for each Fund's ARPS above the 200% level, permitting the Funds to pay previously declared common share dividends and to declare and pay future common share dividends. Depending on market conditions, coverage ratios may increase or decrease further. With respect to each of the Funds, as of the date of this letter, all dividend payments which were postponed have been paid and all dividend declarations which were postponed have subsequently been declared.

For specific information on the Funds and their performance, please review the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Funds' shareholder servicing agent at (800) 331-1710. In addition, a wide range of information and resources is available on our Web site, www.allianzinvestors.com/closedendfunds.

Together with Allianz Global Investors Fund Management LLC, the Funds' investment manager, and Pacific Investment Management Company LLC (PIMCO), the Funds' sub-adviser, we thank you for investing with us.

Sincerely,

Hans W. Kertess
Chairman

Brian S. Shlissel
President & Chief Executive Officer

11.30.08 | PIMCO Municipal Income Funds II Semi-Annual Report 1

PIMCO Municipal Income Fund II Fund Insights/Performance & Statistics

November 30, 2008 (unaudited)

For the six-month period ended November 30, 2008, PIMCO Municipal Income Fund II returned (38.16)% on net asset value and (41.34)% on market price, compared to (19.82)% and (27.73)%, respectively for the Lipper Analytical General Municipal Debt Funds Leveraged (the Benchmark) average.

Municipal bond yields increased across the curve in all but the shortest maturities during the six-month period ended November 30, 2008.

Duration hedging strategies significantly detracted from performance during the period. Thirty-year Treasury and London Interbank Offered Rate (LIBOR) swaps rallied significantly, while municipal rates increased as investors moved away from risky assets.

Municipal to Treasury yield ratios moved higher during the reporting period crossing all time high levels in September, while continuing higher in October and November, continually setting new records along the way. The 10-year ratio increased to 138% and 30-year ratio increased to 156%.

Exposure to corporate backed munis detracted from performance as this sector underperformed during the period due to continued stress in the corporate sector.

Tobacco securitization sector holdings detracted from performance as muni investors continue to focus demand on the highest quality sectors of the market while avoiding lower quality higher yielding securities such as tobacco bonds.

Exposure to zero coupon municipals detracted from performance as their longer durations caused underperformance as rates moved higher during the reporting period, especially in the longer maturity portion of the yield curve. The Barclays Capital Zero Coupon Index returned (15.16)% for the six-month period ended November 30, 2008.

The Fund was generally positioned with a significant portion of its exposure in longer dated maturities due to the attractiveness of that portion of the curve. This detracted from performance as the muni curve steepened significantly during the period with longer rates increasing and most investors buying in the shorter maturity portion of the curve. The 15-, 20-, and 30-year maturity AAA General Obligation yields increased by 72, 80, and 87 basis points respectively while the two-year yield decreased by 13 basis points.

Long Municipals significantly underperformed Long Treasuries and also underperformed the taxable debt sector during the period as investors moved out of risky assets into Treasuries due to market volatility and continued uncertainty. The Barclays Capital Long Municipal Bond Index returned (14.77)% while the Long Government/Credit and the Long Barclays Capital Treasury Indices returned (1.36)% and 13.61%, respectively.

Municipal bond issuance remains at increased levels; although there has been a slow down in the furious pace of the first half of the year beginning in September. Although issuance has been stalled somewhat, municipalities have picked up their issuance again in order to meet upcoming funding needs. During the six-month period, issuance totaled over \$367.7 billion compared to \$400.42 billion for the same period a year ago.

Total Return⁽¹⁾:	Market Price	Net Asset Value (NAV)

Discount to NAV		(3.61)%
Market Price Yield ⁽²⁾		9.75%

Moody's Ratings (as a % of total investments)

(1) **Past performance is no guarantee of future results.** Returns are calculated by determining the percentage change in net asset value or market share price (as applicable) in the period covered. The calculation assumes that all of the Fund's income dividends and capital gain distributions have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

The Fund's performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund's shares, or changes in Fund distributions.

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market price yield and net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering, and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly per share dividend (comprised from net investment income) payable to common shareholders by the market price per common share at November 30, 2008.

PIMCO California Municipal Income Fund II Fund Insights/Performance & Statistics

November 30, 2008 (unaudited)

For the six-month period ended November 30, 2008, PIMCO California Municipal Income Fund II returned (42.32)% on net asset value and (52.98)% on market price, compared to (52.96)% and (30.07)%, respectively for the Lipper California Municipal Debt Funds Leveraged (the Benchmark) average.

Municipal bond yields increased across the curve in all but the shortest maturities during the six-month period ended November 30, 2008.

Duration hedging strategies significantly detracted from performance during the reporting period. Thirty-year Treasury and London Interbank Offered Rate (LIBOR) swaps rallied significantly, while municipal rates increased as investors moved away from risky assets.

Municipal to Treasury yield ratios moved higher during the period crossing all time high levels in September, while continuing higher in October and November, continually setting new records along the way. The 10-year ratio increased to 138% and 30-year ratio increased to 156%.

Exposure to hospital related munis detracted from performance as this sector underperformed the national market during the period.

Tobacco securitization sector holdings detracted from Fund performance as muni investors continue to focus demand on the highest quality sectors of the market while avoiding lower quality higher yielding securities such as tobacco bonds.

Exposure to zero coupon municipals detracted from Fund performance as their longer durations caused underperformance as rates moved higher during the period, especially in the longer maturity portion of the yield curve. The Barclays Capital Zero Coupon Index returned (15.16)% for the six-month period ended November 30, 2008.

Long Municipals significantly underperformed Long Treasuries and also underperformed the taxable debt sector during the period as investors moved out of risky assets into Treasuries due to market volatility and continued uncertainty. The Barclays Capital Long Municipal Bond Index returned (14.17)% while the Long Government/Credit and the Long Barclays Capital Treasury Indices returned (1.36)% and 13.61%, respectively.

Municipal bond issuance remains at increased levels; although we have seen a slow down in the furious pace of the first half of the year beginning in September. Although issuance has been stalled somewhat, municipalities have picked up their issuance again in order to meet upcoming funding needs. During the six-month period, issuance totaled over \$367.7 billion compared to \$400.42 billion for the same period a year ago.

Municipal bonds within California underperformed the Barclays Capital Municipal Bond Index returning (6.33)% and (4.98)%, respectively for the period. Year-to-date, California continues to lead all other states in new issue volume. The state s issuance has decreased 20% from the same period last year to \$51.6 billion.

The Fund was generally positioned with a significant portion of its exposure in longer dated maturities due to the attractiveness of that portion of the curve. This detracted from performance as long muni rates increased during this period. The shape of the California State AAA insured municipal yield curve steepened during the reporting period. Five-year maturity yields increased 26 basis points, 10-year yields increased 75 basis points, and 30-year yields increased 140 basis points.

Total Return⁽¹⁾:	Market Price	Net Asset Value (NAV)

PIMCO New York Municipal Income Fund II Fund Insights/Performance & Statistics

November 30, 2008 (unaudited)

For the six-month period ended November 30, 2008, PIMCO New York Municipal Income Fund II returned (32.61)% on net asset value and (41.51)% on market price, compared to (41.54)% and (32.08)%, respectively for the Lipper New York Municipal Debt Funds Leveraged (the Benchmark) average.

Municipal bond yields increased across the curve in all but the shortest maturities during the six-month reporting period ended November 30, 2008.

Duration hedging strategies significantly detracted from performance during the period. Thirty-year Treasury and London Interbank Offered Rate (LIBOR) swaps rallied significantly, while municipal rates increased as investors moved away from risky assets.

Municipal to Treasury yield ratios moved higher during the period crossing all time high levels in September, while continuing higher in October and November, continually setting new records along the way. The 10-year ratio increased to 138% and 30-year ratio increased to 156%.

Exposure to hospital related munis detracted from performance as this sector underperformed the national market during the period.

Tobacco securitization sector holdings detracted from performance as muni investors continue to focus demand on the highest quality sectors of the market while avoiding lower quality higher yielding securities such as tobacco bonds.

Exposure to zero coupon municipals detracted from performance as their longer durations caused underperformance as rates moved higher during the period, especially in the longer maturity portion of the yield curve. The Barclays Capital Zero Coupon Index returned (15.16)% for the six-month period ended November 30, 2008.

Long Municipals significantly underperformed Long Treasuries and also underperformed the taxable debt sector during the period as investors moved out of risky assets into Treasuries due to market volatility and continued uncertainty. The Barclays Capital Long Municipal Bond Index returned (14.77)% while the Long Government/Credit and the Long Barclays Capital Treasury Indices returned (1.36)% and 13.61%, respectively.

Municipal bond issuance remains at increased levels; although we have seen a slow down in the furious pace of the first half of the year beginning in September. Although issuance has been stalled somewhat, municipalities have picked up their issuance again in order to meet upcoming funding needs. During the six-month period, issuance totaled over \$367.7 billion compared to \$400.42 billion for the same period a year ago.

Municipal bonds within New York performed in-line with the Barclays Capital Municipal Bond Index returning (4.94)% and (4.98)%, respectively for the period. Year-to-date, issuers in New York State have issued \$38.1 billion in bonds, 37.5% higher than the same period last year. New York now ranks second among states in terms of issuance.

The Fund was generally positioned with a significant portion of its exposure in longer dated maturities due to the attractiveness of that portion of the curve. This detracted from performance as long muni rates increased over this period. The shape of the New York Insured AAA municipal yield curve steepened during the period. Five-year maturity AAA credits increased 17 basis points, 10-year maturities increased 57 basis points, and 30-year maturities increased 105 basis points.

PIMCO Municipal Income Funds II **Notes to Schedule of Investments**

November 30, 2008 (unaudited)

Notes to Schedules of Investments:

- (a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$21,194,686, representing 1.81% of total investments in Municipal Income II. Securities with an aggregate value of \$5,012,465, representing 0.78% of total investments in California Municipal Income II. Securities with an aggregate value of \$1,752,520, representing 0.82% of total investments in New York Municipal II.
- (b) Illiquid security.
- (c) Pre-refunded bonds are collateralized by U.S. Government or other eligible securities which are held in escrow and used to pay principal and interest and retire the bonds at the earliest refunding date (payment date) and/or whose interest rates vary with changes in a designated base rate (such as the prime interest rate).
- (d) 144A Security Security exempt from registration, under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (e) Inverse Floater The interest rate shown bears an inverse relationship to the interest rate on another security or the value of an index. The interest rate disclosed reflects the rate in effect on November 30, 2008.
- (f) Variable Rate Notes Instruments whose interest rates change on specified date (such as a coupon date or interest payment date) and/or whose interest rates vary with changes in a designated base rate (such as the prime interest rate). The interest rate disclosed reflects the rate in effect on November 30, 2008.
- (g) All or partial amount segregated as collateral for swaps.
- (h) Residual Interest Bonds Held in Trust Securities represent underlying bonds transferred to a separate securitization trust established in a tender option bond transaction in which the Funds acquired the residual interest certificates. These securities serve as collateral in a financing transaction.
