1. General information

1.1 The Group's business and general information

Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria ("Cresud" or the "Company") was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier's shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

In 2002, Cresud acquired a 19.85% interest in IRSA Inversiones y Representaciones Sociedad Anónima ("IRSA"), a real estate company related to certain shareholders of Cresud. In 2009, Cresud increased its ownership percentage in IRSA to 55.64% and IRSA became Cresud's principal subsidiary.

Cresud and its subsidiaries are collectively referred to hereinafter as the Group. See Note 2.3 to the Consolidated Financial Statements as of June 30, 2013 and 2012 for a description of the Group's companies.

As of December 31, 2013, the Group operates in two major lines of business: (i) Agricultural business, (ii) Investment and Development Properties business. See Note 7 to the Unaudited Condensed Interim Consolidated Financial Statements as of June 30, 2013 and 2012 for a description of the Group's segments.

The Group's Agricultural business operations are comprised of crop production, cattle feeding, raising and fattening, milk production, sugarcane production and brokerage activities. The Group's Agro-industrial business operations are conducted through its subsidiary, Cactus Argentina S.A., and are engaged in cattle feeding services in specialized feedlots primarily for third parties. Feedlots provide accommodation, health care and animal feeding services based on specialized diets. The Group currently has agricultural operations and investments in Argentina, Brazil, Uruguay, Paraguay and Bolivia.

The business line known as urban property and investments also includes the Group's financial transactions. The Group's Investment and Development Properties business operations are conducted primarily through its subsidiary IRSA and IRSA's principal subsidiary, Alto Palermo S.A. ("APSA"). Through APSA, the Group primarily owns, manages and develops shopping centers across Argentina. APSA has also a direct 20% stake in a credit card company. Through IRSA, the Group primarily owns, manages and develops a portfolio of office and other rental properties in Buenos Aires, the capital of Argentina. Through IRSA or APSA, the Group also develops residential properties for sale. The Group, through IRSA, is also involved in the operation of branded hotels. The Group uses the term "real estate" indistinctively in these consolidated financial statements to denote investment, development and/or trading properties activities.

1. General information (Continued)

In 2009, IRSA entered into the US real estate market, mainly through the acquisition of non-controlling interests in US assets, primarily office properties and hotel investments.

The Group's financial transactions and transactions in other businesses are carried out mainly through its subsidiary IRSA and through APSA, which is IRSA's main subsidiary. IRSA has also a 29.77% interest (without considering treasury shares) in Banco Hipotecario S.A. ("BHSA"). BHSA is a commercial bank offering a wide variety of banking activities and related financial services to individuals, small and medium-sized companies and large corporations, including the provision of mortgaged loans. BHSA's shares are listed on the Buenos Aires Stock Exchange. Additionally, APSA holds a participating interest of 20 % in Tarshop S.A. ("Tarshop"), whose main business comprises extending loans and credit cards.

Cresud's and APSA's shares are listed and traded on both the Buenos Aires Stock Exchange ("BASE") and the National Association of Securities Dealers Automated Quotation ("NASDAQ"). IRSA's shares are listed and traded on both the BASE and the New York Stock Exchange ("NYSE").

Cresud is the ultimate parent company and is a corporation incorporated and domiciled in the Republic of Argentina. The address of its registered office is Moreno 877, 23rd Floor, Buenos Aires, Argentina.

These consolidated financial statements have been approved for issue by the Board of Directors on February 11, 2014.

2. Basis of preparation of the Unaudited Condensed Interim Consolidated Financial Statements

2.1. Basis of preparation

The present Unaudited Condensed Interim Consolidated Financial Statements for the six-month periods ended December 31, 2013 and 2012 (the "Unaudited Condensed Interim Consolidated Financial Statements") have been prepared in accordance with IAS 34 "Interim Financial Reporting".

Furthermore, some additional questions were included as required by the Business Companies Act and/or regulations of the CNV, including supplementary information provided in the last paragraph of section 1, Chapter III, Title IV of General Ruling 622/13 of the CNV. This information is included in the Notes to these Unaudited Condensed Interim Consolidated Financial Statements, as admitted by IFRS.

These Unaudited Condensed Interim Consolidated Financial Statements should be read together with the annual consolidated financial statements of the Company as of June 30, 2013. These Unaudited Condensed Interim Consolidated Financial Statements are expressed in thousands of Argentine Pesos.

2. Basis of preparation of the Unaudited Condensed Interim Consolidated Financial Statements (Continued)

The Condensed Interim Consolidated Financial Statements corresponding to the six-month periods ended as of December 31, 2013 and 2012 have not been audited. The Company's management believes they include all necessary adjustments to fairly present the results of each period. Results for the six-month periods ended December 31, 2013 and 2012 do not necessarily reflect proportionally the Company's results for the complete fiscal year.

2.2 Significant Accounting Policies

The accounting policies applied in the preparation of these Unaudited Condensed Interim Consolidated Financial Statements are consistent with those applied in the preparation of the information under IFRS as of June 30, 2013. Most significant accounting policies are described in note 2 included in the Consolidated Financial Statements as of June 30, 2013 and 2012.

2.3 Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Consolidated Financial Statements, the significant judgments made by Management in applying the Group's accounting policies and the main sources of uncertainty were the same applied by the Group in the preparation of the annual consolidated financial statements for the year ended as of June 30, 2013, save for changes in accrued income tax, provision for legal claims and allowance for doubtful accounts.

3. Seasonal effects on operations

The operations of the Group's agricultural business are also subject to seasonal effects. The harvests and sale of grains (corn, soybean and sunflower) generally take place between February and June every year. In Argentina, wheat is generally harvested between November and January. In Bolivia, weather conditions make it possible to have two soybeans, corn and barley seasons and, therefore, these crops are harvested in April and October, whereas wheat and sunflower are harvested in August and September, respectively. Other segments of the agricultural business, such as beef cattle and milk production tend to be more stable. However, beef cattle and milk production is generally larger during the second quarter, when conditions are more favorable. In case of sugar cane, harvest and sale take place between May and November of each year. As a result, there may be material fluctuations in the agricultural business results across quarters.

3. Seasonal effects on operations (Continued)

The operations of the Group's shopping centers are also subject to seasonal effects, which affect the level of sales recorded by lessees. During summer time (January and February), the lessees of shopping centers experience the lowest sales levels in comparison with the winter holidays (July) and December (Christmas) when they tend to record peaks of sales. Apparel stores generally change their collections during the spring and the fall, which impacts positively on shopping mall sales. Sale discounts at the end of each season also affect the business. As a consequence, a higher level of revenues is generally expected in the second half of the year rather than the first in shopping center operations.

5. Financial risk management

The group's diverse activities are exposed to a variety of financial risk: market risk (including foreign currency risk, interest rate risk and price risk) credit risk, liquidity risk and capital risk.

The Condensed Interim Consolidated Financial Statements do not include all the information and disclosures of the risk management, so they should be read together with the annual consolidate financial statements as of June 30, 2013. There have been no changes in the risk management or risk management policies applied by the Group since the fiscal year-end. See Note 41 for the effects of subsequent events.

Since June 30, 2013 at the date of these financial statements, there have been no significant changes in business or economic circumstances affecting the fair value of the Company's financial assets or liabilities (either measured at fair value or amortized cost), except for our investment in Supertel Hospitality Inc. ("Supertel"), which fair value was affected by the decrease in the market value of its common shares, because of the suspension of dividends' payment. This had been decided in order to fortify its financial situation. Neither have been transfers between the several tiers used in estimating the fair value of the Company's financial instruments. See Note 41 for the effects of subsequent events.

6. Segment information (Continued)

At the time of assessing the performance of business segments and deciding upon the allocation of resources, the Executive Committee uses information on operating income assets and liabilities of each such segment. In the Unaudited Condensed Consolidated Financial Statements, the transactions and balances between related parties which may affect more than one segment are eliminated. In order to obtain clear information that may be useful for Management's decision making, the Group has defined that, as from the six month period ending December 31, 2013, such transactions will not be eliminated for segment reporting purposes.

The comparative information presented as from such period has been adjusted retrospectively for the sake of comparability.

The following tables present reconciliation between the total results of segment operations and the results of operations as per the statement of income. The adjustments relate to the presentation of the results of operations of joint ventures accounted for under the equity method under IFRS and the non-elimination of the inter-segment transactions as explained in the preceding paragraph.

16. Financial instruments by category

Determining fair values

IFRS 9 defines the fair value of a financial instrument as the amount for which a financial asset could be exchanged, or a financial liability settled, between knowledgeable, willing parties in an arm's length transaction. All financial instruments recognized at fair value are allocated to one of the valuation hierarchy levels of IFRS 7. This valuation hierarchy provides for three levels. The initial basis for the allocation is the "economic investment class". Only if this does not result in an appropriate allocation the Company deviates from such an approach in individual cases. The allocation reflects which of the fair values derive from transactions in the market and where valuation is based on models because market transactions are lacking.

In the case of Level 1, valuation is based on non-adjusted quoted prices in active markets for identical financial assets or liabilities that the Group can refer to at the date of the statement of financial position. A market is deemed active if transactions take place with sufficient frequency and in sufficient quantity for price information to be available on an ongoing basis. Since a quoted price in an active market is the most reliable indicator of fair value, this should always be used if available. The financial instruments the Group has allocated to this level mainly comprise equity investments, mutual funds, government bonds and corporate bonds for which quoted prices in active markets are available. In the case of shares, the Group allocates them to this level when either a stock market price is available or prices are provided by a price quotation on the basis of actual market transactions.

16. Financial instruments by category (Continued)

In the case of Level 2, fair value is determined by using valuation methods based on inputs directly or indirectly observable in the market. If the financial instrument concerned has a fixed contract period, the inputs for valuation must be observable for the whole of this period. The financial instruments the Group has allocated to this level mainly comprise interest rate swaps and foreign currency future contracts.

In the case of Level 3, the Group uses valuation techniques not based on inputs observable in the market. This is only permissible insofar as no observable market data are available. The inputs used reflect the Group's assumptions regarding the factors which market players would consider in their pricing. The Group uses the best available information for this, including internal company data. The financial instruments that the Group has allocated to this level mainly comprise shares and warrants of Supertel.

As of December 31, 2013, the Group has determined that Arcos del Gourmet S.A.'s stock option is a Level 3 financial instrument and its fair value at the end of the period is zero.

Since June 30, 2013, there have been no transfers between the several tiers used in estimating the fair value of the Group's financial instruments, or reclassifications among their respective categories.

The Group's Finance Division has a team in place in charge of estimating valuation of financial assets required to be reported in the financial statements, including the fair value of Level 3 instruments. The team directly reports to the Chief Financial Officer (CFO).

The CFO and the valuation team discuss the valuation methods and results upon the acquisition of an asset and, if necessary, on a quarterly basis, in line with the Group's quarterly reports.

According to the Group's policy, transfers among the several categories of valuation tiers are recognized when occurred, or when there are changes in the prevailing circumstances requiring the transfer.

16. Financial instruments by category (Continued)

The following table presents the changes in Level 3 instruments for the years ended December 31, 2013:

	Call option for the shares of Arcos	Warrants of Supertel	Shares of Supertel	Total
Balance as of June 30, 2013	-	16,949	139,120	156,069
Acquisition	-	-	-	-
Total losses for the period (i)	-	(16,949)	(81,712)	(98,661)
Balance at December 31, 2013	-	-	57,408	57,408

(i) The gain / (loss) is not realized as of December 31, 2013 and is accounted for under “Other financial results” in the Statement of Income (Note 33)

Upon initial recognition (January, 2012), the consideration paid for the Shares and Warrants was assigned to both instruments based on the relative fair values of those instruments upon acquisition. The fair value of these instruments exceeded the transaction price and were determined using a valuation technique that uses inputs not observable in the market. As a result of the use of this technique, the Group has not recognized a gain at the time of initial recognition in the amount of US\$ 7.9 million.

On December 31, 2013, the fair value of warrants of Supertel as determined pursuant to the indicated method was lower than the gain not recognized upon initial recording; therefore, warrants are valued at zero.

According to Group estimates, all factors being constant, a 10% decline in the price of the underlying assets of Level 3 shares and warrants of Supertel (data observed in the market) as of December 31, 2013, would reduce pre-tax income by Ps. 3.7 million.

According to Group estimates, all factors being constant, a 10% increase in the credit spread (data which is not observable in the market) of shares and warrants of Supertel used in the valuation model applied to Level 3 financial instruments as of December 31, 2013, would reduce pre-tax income by Ps. 5.5 million. The rate used as of December 31, 2013 was 14.08%.

16. Financial instruments by category (Continued)

When no quoted prices in an active market are available, fair values (particularly with derivatives) are based on recognized valuation methods. The Company uses a range of valuation models for the measurement of Level 2 and Level 3 instruments, details of which may be obtained from the following table:

26. Taxation (Continued)

The Group did not recognize deferred income tax assets of Ps. 34.1 million and Ps. 70.1 million as of December 31, 2013 and June 30, 2013, respectively. Although management believes that it will become profitable in the foreseeable future, as a result of the history of recent losses incurred during the development phase of the different Group's business operations and the lack of verifiable and objective evidence due to the limited operating history of the Group itself, the Board of Directors has determined that there is sufficient uncertainty as to the generation of sufficient income to utilize the losses within a reasonable timeframe, therefore, no deferred tax asset is recognized in relation to these losses.

The tax on the Group's profit before tax differs from the theoretical amount that would arise using the weighted average tax rate applicable to profits of the consolidated entities as follows:

	December 31, 2013	December 31, 2012
Tax calculated at the tax rates applicable to profits in the respective countries	(166,397)	67,755
Permanent differences:		
Share of loss of associates and joint ventures	(8,006)	1,729
Unrecognized tax losses	385	(18,904)
Non-taxable income	2,301	(14,431)
Difference between the tax return and provision	(6,081)	(6,332)
Others	7,694	3,718

27. Shareholders' Equity

Special Reserve

Pursuant to CNV General Ruling No. 609/12, the Company set up a special reserve, to reflect the positive difference between the balance at the beginning of retained earnings disclosed in the first financial statements prepared according to IFRS and the balance at closing of retained earnings disclosed in the last financial statements prepared in accordance with previously effective accounting standards. This reserve may not be used to make distributions in kind or in cash, and may only be reversed to be capitalized, or otherwise to absorb potential negative balances in Retained Earnings.

Dividends

41. Subsequent events

• On January 9, 2014, RES entered into a credit facility of up to US\$ 2,000,000 with Supertel Hospitality Inc. (SPPR). In the event SPPR successfully carries out an initial public offering not later than April 15, 2014, RES agrees to swap (capitalize) the balance of the loan at such time for shares of SPPR. In the event that SPPR fails to make an initial public offering within the term agreed, RES is entitled to a debt-for-equity swap until July 9, 2015 (subject to any limitation on shareholding that may apply). In such a case, the price at which debt will be swapped by equity shall be the higher of (a) the weighted average price of common shares of the company within a term of 5 days prior to the date RES decides to exercise the debt-for-equity swap option or (b) the higher of market price and book value.

• During the six-month period ended December 31, 2013 the Group has subscribed shares of Dolphin Fund Ltd. ("Dolphin") for the amount of Ps. 105 million. On November 3, 2013, Dolphin together with other investors, has made an offer to purchase shares of IDB Development Corporation ("IDBD"), an Israeli Company, within the framework of a debt restructuring process that its controlling company, IDBH, is currently negotiating with creditors, pursuant to Israel's applicable laws.

41. Subsequent events (Continued)

On January 5, 2014, the competent court in dealing with IDBH debt restructuring has approved the offer made by Dolphin together with E.T.H.M.B.M. Extra Holdings Limited (“ETH”), a company incorporated under the laws of Israel, controlled by Mordechay Ben Moshé, in order to acquire approximately 53.3% of IDBD (the “Offer”). Such percentage may be increased subject to the sale of certain assets by IDBD over the year.

In the abovementioned offer, Dolphin together with other investors, have a 50% interest while ETH holds the remaining 50% of a total investment amount of US\$ 272 million (NIS 950 million). As described above, the Group disbursed funds in Dolphin the amount of approximately US\$ 105 million, which may partially be reimbursed, depending on the final composition of the investor group.

IDBD is one of the Israeli biggest and most diversified investment groups, which is involved, through its subsidiaries, in several markets and industry, including real estate, retail, agribusiness, oil & gas production, insurance, telecommunications, etc.; controlling companies as: Clal Insurance (Insurance Company), Cellcom (Mobile phone services), Koor Industries (owner of 40% of Makhteshim Agan Industries (Agrochemicals), Super-Sol (supermarket), PBC (Real Estate), among others.

The transaction will be closed over the following months, while Dolphin has appointed Mr. Eduardo Sergio Elsztain to the board of IDBD.

- On January 14, 2014, IRSA signed the transfer deed for the sale of the 11th floor and seven parking units of the Building Maipú 1300. The total price of the transaction was Ps. 9.6 million (US\$ 1.4 million). The mentioned transaction generated a gain of Ps. 7.9 million.

- On January 24, 2014, IRSA signed the transfer deed for the sale of the 7th floor and 28 parking units of the Building Bouchard 551. The total price of the transaction was Ps. 124.6 million equivalent to US\$ 16.0 million. Such transaction generated a gain before tax of approximately Ps. 104.5 million.

- Following the end of the period, the Argentine Peso devalued against the US\$ and other currencies by around 20%, which had a negative impact on the financial position and results of operations of the Company due mainly to the currency exposure of our net assets and liabilities in foreign currency as detailed in note 40 and net investments in subsidiaries, associates and joint ventures made in a functional currency other than the Argentine Peso.

41. Subsequent events (Continued)

According to the Company's estimates, this leads to a pre-tax loss of Ps. 513 million, a gain under Other Comprehensive Income in the amount of Ps. 404 million and a reduction in Shareholders' Equity by Ps. 109 million, all based on the Company's position in foreign currency as of December 31, 2013, which has not been recognized in these financial statements.

The main assets of the Company— including fields, offices and other income-generating real property, land reserves and property for sale—are valued for accounting purposes at historic cost, and thus the Company will not recognize any gain/loss as a result of such devaluation.

- On February 5, 2014 there was a widely known fire in Iron Mountain's warehouse, which company is a supplier of the Group and where Group's documentation was being kept. The Company is now assessing and identifying the content of information that may have sent to the site where the fire took place.

1. General information

1.1 The Company's business and general information

Cresud Sociedad Anónima, Comercial, Inmobiliaria, Financiera y Agropecuaria ("Cresud" or the "Company") was founded in 1936 as a subsidiary of Credit Foncier, a Belgian company primarily engaged in providing rural and urban loans in Argentina and administering real estate holdings foreclosed by Credit Foncier. Credit Foncier was liquidated in 1959, and as part of such liquidation, the shares of Cresud were distributed to Credit Foncier's shareholders. From the 1960s through the end of the 1970s, the business of Cresud shifted exclusively to agricultural activities.

Cresud is a company organized and domiciled in the Republic of Argentina. The address of its registered office is Moreno 877, 23rd Floor, Buenos Aires, Argentina.

These Unaudited Condensed Interim Separate Financial Statements have been approved for issue by the Board of Directors on February 11, 2014.

2. Basis of preparation of the Unaudited Condensed Interim Separate Financial Statement

2.1. Basis of preparation

These Unaudited Condensed Interim Separate Financial Statements of the Company have been prepared in accordance with Technical Resolutions No. 26 (RT 26) of Argentine Federation of Professional Councils of Economic Sciences ("F.A.C.P.C.E.", as per its Spanish acronym) and IAS 34 "Interim Financial Reporting".

Furthermore, some additional questions were included as required by the Business Companies Act and/or regulations of the CNV, including supplementary information provided in the last paragraph of section 1, Chapter III, Title IV of General Ruling 622/13 of the CNV. Such information is included in the Notes to the Unaudited Condensed Interim Separate Financial Statements according to IFRS.

These Unaudited Condensed Interim Separate Financial Statements should be read together with the annual Separate Financial Statements of the Company as of June 30, 2013. These Unaudited Condensed Interim Separate Financial Statements are expressed in thousands of Argentine Pesos.

The Unaudited Condensed Interim Separate Financial Statements for the six-month periods ended December 31, 2013 and 2012 have not been audited. The Company's management believes they include all necessary adjustments to fairly present the results of each period. Results for the six-month periods ended December 31, 2013 and 2012 do not necessarily reflect proportionally the Company's results for the complete fiscal years.

2.2. Significant accounting policies

The accounting policies applied in the preparation of these Unaudited Condensed Interim Separate Financial Statements are consistent with those applied in the preparation of the information under RT 26 as of June 30, 2013. Most significant accounting policies are described in Note 2 to the annual Consolidated Financial Statements.

2.3. Use of estimates

The preparation of financial statements at a certain date requires the Management to make estimations and evaluations affecting the amount of assets and liabilities recorded and contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual results might differ from the estimates and evaluations made at the date of preparation of these financial statements.

In the preparation of these Unaudited Condensed Interim Separate Financial Statements, the significant judgments made by Management in applying the Company's accounting policies and the main sources of uncertainty were the same applied by the Company in the preparation of the annual financial statements relative to the year ended June 30, 2013, except for changes in accrued income tax, provision for legal claims and allowance for doubtful accounts.

3. Seasonal effects on operations

The operations of the Company are also subject to seasonal effects. The harvests and sale of grains (corn, soybean and sunflower) generally take place between February and June every year. Wheat is generally harvested between November and January. However, milk production is generally larger during the second quarter, when conditions are more favorable. As a result, there may be material fluctuations in the agricultural business results across quarters.

4. Acquisitions and disposals

Sale of receivables with subsidiaries

On September 30, 2013, the Company sold receivables due from Agropecuaria Acres de Sud S.A., Yuchán Agropecuaria S.A., Yatay Agropecuaria S.A. and Ombú Agropecuaria S.A. to Doneldon, for a total amount of US\$ 12.4 million, which were capitalized on that same date.

35. Subsequent events

- Following the end of the period, the Argentine Peso devalued against the US\$ and other currencies by around 20%, which had a negative impact on the financial position and results of operations of the Company due mainly to the currency exposure of our net assets and liabilities in foreign currency as detailed in note 34 and net investments in subsidiaries, associates and joint ventures made in a functional currency other than the Argentine Peso.

According to the Company's estimates, this leads to a pre-tax loss of Ps. 383 million, a gain under Other Comprehensive Income in the amount of Ps. 207 million and a reduction in Shareholders' Equity by Ps. 176 million, all based on the Company's position in foreign currency as of December 31, 2013, which has not been recognized in these financial statements.

The main assets of the Company— including fields, offices and other income-generating real property, land reserves and property for sale—are valued for accounting purposes at historic cost, and thus the Company will not recognize any gain/loss as a result of such devaluation.

During this period our revenues were 32.9% higher than in the same period of the previous fiscal year. This was mainly due to a 48.2% increase in the agricultural segment, explained by higher sales of grains, sugarcane, beef cattle and milk, along with a 21.0% increase in revenues from the urban segment.

Gross income rose 21.3% due to an increase of 31.7% increase in the urban segment, offset by a drop of 45.9% in gross income from the agricultural segment, mainly grains, sugarcane and beef cattle, which recorded a decrease in the fair value of biological assets. The decrease in gross income, coupled with the higher selling and administrative expenses, led to an operating loss equal to ARS 178.1 million attributable to the agricultural segment for the six-month period of fiscal year 2014, while the urban segment showed slightly lower operating results (-6.4%).

The strong depreciation of the Argentine Peso against the U.S Dollar experienced during the past year had a negative impact on our net financial results, which went down from a loss of ARS 359.2 million in 6M 2013 to a loss of ARS 957.9 million during this period.

Therefore, a net loss of ARS 354.8 million was recorded, out of which a loss of ARS 332.0 million is attributable to Cresud's shareholders.

Grains and Sugarcane

We have ended a season that was severely affected by the summer drought experienced in the regions where most of the farms in our portfolio are located, causing production volumes to be lower than expected. Fortunately, weather conditions improved at the beginning of the season, allowing us to expect a 2013/2014 season with good results. To date, we have completed wheat harvesting and soybean and corn planting activities in Argentina. In our farms of Bolivia, where we are able to carry out two planting and harvesting cycles per year, we have completed harvesting of our winter crops, including soybean, corn and wheat. Planting activities in our farms of Paraguay have made progress over 50% of the forecast, whereas in Brazil, where we operate through our subsidiary Brasilagro, planting of soybean and corn has been completed and sugarcane crops are developing.

During this six-month period higher revenues are recorded in the grain segment, mainly due to higher prices than those for the same period of the previous year (wheat, sorghum and sunflower) and a rise in soybean sales (additional 32,000 tons).

Gross income from the Grains segment for this period shows a decrease compared to the same six-month period of the previous fiscal year. This is explained mainly by the lower fair value of the assets after harvest as a result of lower prices of our products.

On the other hand, the fair value of biological assets is slightly higher since despite the lower yield of our soybean production in Bolivia, there were higher volumes of wheat and corn production throughout the entire portfolio and a rise in the estimates of soybean, cotton and corn production in Brazil.

Higher administrative expenses are recorded due to an increase in salaries and in the proportional allocation to the grain segment compared to other segments.

The decline in Gross income was offset by an increase in Other operating results, net, originated in derivative transactions which, despite their adverse impact, generated lower losses in the segment.

Due to the lower gross income and administrative expenses, loss from this segment totaled ARS 59.6 million.

The drop in Gross income in the sugarcane segment reflected the fact that in the production of both Bolivia and Brazil, we changed our output estimations, recognizing lower values in biological assets. This led to a loss from this segment of ARS 28.0 million.

Total Area Assigned to Grain Production	220,638	214,896	2.7	%

The area in operation for the Crops segment increased by 2.7%, reaching 220,638 hectares. This was mainly due to a reduction in the area in operation in our own farms, close to 4.0%, and the smaller area consisting of farms leased to third parties (58.4%) while the area in operation in leased farms grew by 26.3% accompanied by an increase in the area in operation in farms under concession (96.1%).

The area of own farms decreased mainly due to the sale of farms during the past year, offset by an expansion in productive areas in Argentina.

During this season we have expanded the area of leased farms assigned to agricultural production in Argentina and Brazil. We expect a regular season, and for such reason we increased the area by over 12,000 hectares.

We have increased the area assigned to agricultural production in the farms under the long term concession granted to Cresud in the Province of Salta, where we will operate more than 21,500 hectares. This is offset by a reduction in the area of farms leased to third parties.

During this six-month period, beef cattle production was lower than in the same six-month period of the previous year (-2.3%), while cattle sales grew by 66.7%.

The higher number of tons sold caused sales from this segment to rise by 75.7%; however, costs grew at a higher rate, generating gross losses of ARS 10.1 million. The increase in costs was motivated by the drought in the region of Salta, which led us to increase the amount of cattle fed in feed lots.

Therefore, the levels of more than 20 liters by milking cow per day still exceed the targets set by us following the consolidation of our operations in our state-of-the-art milking facility.

There has been an increase in revenues from sales of this segment compared to the same quarter of the previous fiscal year, thanks to an increase in production and higher sales of milk, along with better prices. On the other hand, due to an increase in costs, the segment shows gross income for ARS 2.5 million.

In addition, higher selling and administrative expenses have led to a deterioration in this segment, which posted a loss of ARS 1.6 million for the 6M 2014.

Evolution of Exchange Rate

During the last months, the depreciation of the Argentine Peso to the U.S. Dollar accelerated as compared to the previous months. Whereas in the first six-month period of fiscal year 2013 the Argentine currency depreciated 8.6%, during 6M 2014 it depreciated 21.0%. In addition, the Argentine Peso depreciated 22.8% only in January 2014. Given that a significant portion of our debt is denominated in USD, this process had an adverse impact on our Financial Results. However, our assets are mostly valued at historical cost, and are not affected by any kind of revaluation due to the fluctuation of market prices.

On December 12, 2013 Cresud sold its operation in Paraguay, through Cresca, to Brasilagro. The transaction price was USD 18.5 million. Brasilagro has paid USD 5.0 million so far; the remaining balance will be paid in December 2014 plus 7% interest rate.

The agreement provides for a price adjustment in the event that Cresca should sell assets: in the event of a potential sale of up to 24,000 hectares of undeveloped land, within one year, Brasilagro shall pay Cresud an amount equivalent to 25% of the price in excess of USD 350 per hectare.

Summary as of December 31, 2013

Prospects for the next fiscal year

After two years of experiencing severe droughts in the region, the 2014 season shows a better outlook. While at the start of the planting season there were signs of drought, in the last months rains started to fall in Salta (north of Argentina) and Paraguay, hence the planting season went back to normal. If this level of rainfall continues, the harvest will generate regular yields and higher production levels than in the past fiscal year. On the other hand, in view of the evolution of the exchange rate in Argentina in the last months, we expect better results in our agricultural segments. We expect to sow approximately 220,000 hectares in the group of countries of the region where we have operations. In terms of prices, the sector is withstanding the juncture of a great U.S. harvest; therefore, prices continue to be depressed but stable. We will keep track of the evolution of commodity prices in calendar year 2014, in light of the seeding estimations in the USA.

As concerns our beef cattle business in Argentina, during this season we stabilized production as weather conditions in Salta improved, whereas cattle prices stay on upward trend. On the other hand, we expect sound prices for the milk business and a competitive margin from our “El Tigre” dairy facility. In addition, we will continue to roll out our strategy of supplementing agriculture in our own farms with agriculture in leased farms and farms under concession. We have increased the area of leased farms by 10%, relocating part of our portfolio in better areas. We expect to obtain good results from this business if the weather continues to be favorable throughout the second part of the 2014 season. Our feedlot and meat packing businesses, which we hold through Cactus Argentina, have started to show positive results, after several months of losses. We hope that market conditions will further improve in the short or medium term, so that the segment becomes as profitable as it was.

As concerns land transformation and value-adding activities, we will make progress in the development of our farms in Argentina, Paraguay and Brazil, where we plan to transform approximately 21,000 hectares that will be placed into production during this fiscal year and in 2015. We remain watchful of sale opportunities that may arise, by disposing of those farms that have reached their highest degree of appreciation. In addition, we will continue to analyze opportunities in other countries of the region, as we plan to form a regional portfolio with high potential for development and value enhancement.
