FIRST TRUST/FIDUCIARY ASSET MANAGEMENT COVERED CALL FUND
MARCH 31, 2005

1. VALUATION AND INVESTMENT PRACTICES

PORTFOLIO VALUATION:

The First Trust/Fiduciary Asset Management Covered Call Fund (the "Fund") determines the net asset value ("NAV") of its shares daily, as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, every day on which the NYSE is open for trading. The NAV is computed by dividing the value of all assets of the Fund (including accrued interest and dividends), less all liabilities (including accrued expenses, the value of call options written (sold) and dividends declared but unpaid), by the total number of shares outstanding.

The Fund's investments are valued at market value or, in the absence of market value with respect to any portfolio securities, at fair value as determined according to procedures adopted by the Fund's Board of Trustees. Portfolio securities listed on any exchange other than the NASDAQ National Market ("NASDAQ") are valued at the last sale price on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the most recent bid and ask prices on such day. Securities traded on the NASDAQ are valued at the NASDAQ Official Closing Price as determined by NASDAQ. Portfolio securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities. Portfolio securities traded in the over-the-counter market, but excluding securities trading on the NASDAQ, are valued at the closing bid prices. Fixed income securities with a remaining maturity of 60 days or more will be valued by the Fund using a pricing service. When price quotes are not available, fair market value is based on prices of comparable securities. Short-term investments that mature in 60 days or less are valued at amortized cost.

The Fund values exchange-traded options and other derivative contracts at the closing price on the exchange on which it is principally traded, or if not traded, or no closing price is available, at the mean between the last bid and ask price.

OPTION CONTRACTS:

COVERED CALL OPTIONS. When the Fund purchases equity securities, it simultaneously writes (sells) covered call options on substantially all of such equity securities. The number of call options the Fund can write (sell) is limited by the amount of equity securities the Fund holds in its portfolio. The

Edgar Filing: First Trust/Fiduciary Asset Management Covered Call Fund - Form N-Q

Fund will not write (sell) "naked" or uncovered call options. By writing (selling) call options, the Fund seeks to generate additional income, in the form of premiums received for writing (selling) the options, and provide a partial hedge against a market decline in the underlying equity security. Call options are marked-to-market daily and their value will be affected by changes in the value and dividend rates of the underlying equity securities, an increase in interest rates, changes in the actual or perceived volatility of the securities markets and the underlying equity securities and the remaining time to the options' expiration. The value of call options may also be adversely affected if the market for the options becomes less liquid or smaller.

Call options the Fund writes (sells) will either be exercised, expire or be cancelled pursuant to a closing transaction. If the price of the underlying equity security exceeds the option's exercise price, it is likely that the option holder will exercise the option. If a call option written (sold) by the Fund is exercised, the Fund would be obligated to deliver the underlying equity security to the option holder upon payment of the exercise price. In this case, the call option premium received by the Fund will be added to the amount realized on the sale of the equity security for purposes of determining gain or loss. If the price of the underlying equity security is less than the call option's exercise price, the call option will likely expire without being exercised. The call option premium will be treated as short term capital gain on the expiration date of the call option. The Fund may also elect to close out its position in a call option prior to its expiration by purchasing a call option of the same option series as the call option written (sold) by the Fund.

The Fund writes (sells) call options on at least 80% of the Fund's Managed Assets ("Managed Assets" is gross assets of the Fund minus the sum of the Fund's accrued and unpaid dividends on Common Shares and accrued liabilities, including the value of call options written). These call options give the option holder the right, but not the obligation, to purchase a security from the Fund at the strike price on or prior to the option's expiration date. The ability to successfully implement the Fund's investment strategy depends on the Sub-Adviser's ability to predict pertinent market movements, which cannot be assured. Thus, the use of options may require the Fund to sell portfolio securities at inopportune times or for prices other than current market value, may limit the amount of appreciation the Fund can realize on an investment, or may cause the Fund to hold a security that it might otherwise sell. As the writer (seller) of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the strike price of the call option, but has retained the risk of loss should the price of the

underlying security decline. The writer (seller) of an option has no control over the time when it may be required to fulfill its obligation as a writer (seller) of the option. Once an option writer (seller) has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price.
