LETTER TO SHAREHOLDERS

LETTER TO SHAREHOLDERS
June 28, 2002

Dear Shareholder:

This shareholder report reviews municipal market activity and investment results for Alliance National Municipal Income Fund's (the "Fund") semi-annual reporting period ended April 30, 2002.

Investment Objective and Policies

The Fund is a closed-end management investment company designed for investors who seek high current income exempt from regular federal income tax. The Fund normally invests at least 75% of its net assets in investment grade municipal securities.

INVESTMENT RESULTS*
Periods Ended April 30, 2002

Total Returns

Since

Edgar Filing: ALLIANCE NATIONAL MUNICIPAL INCOME FUND - Form N-30D

	Inception**
Alliance National Municipal Income Fund (NAV)	0.31%
Lehman Brothers Municipal Bond Index	1.16%

* The Fund's investment results are total returns for the period shown and is based on the Fund's net asset value (NAV) as of April 30, 2002. All fees and expenses related to the operation of the Fund have been deducted. Returns for the Fund include the reinvestment of any distributions paid during the period. Past performance is no guarantee of future results.

The Lehman Brothers Municipal Bond Index is a total return performance benchmark for the long-term, investment grade tax-exempt bond market. An investor cannot invest directly in an index, and its results are not indicative of any specific investment, including Alliance National Municipal Income Fund.

** Inception date: 1/29/02.

Additional investment results appear on page 5.

Investment Results

The accompanying table compares the Fund's return at net asset value (NAV) for the since inception period ended April 30, 2002 to the Fund's benchmark, the Lehman Brothers Municipal Bond Index (the "Index"). The Index is a total return performance benchmark for the long-term, investment-grade, tax-exempt bond market.

The Fund somewhat underperformed the Index for the three months ended April 30, 2002. Since the Fund's inception on January 29, 2002, investment activity has been focused on the orderly investment of the proceeds of the Fund's common stock and preferred stock initial public offerings. During this process, assets awaiting investment in municipal bonds were invested in short-term cash-equivalent securities that pay lower rates of interest than long-term bonds. The performance differential between the Fund and the benchmark is the result of the temporary investment in short-term bonds. Currently, the Fund is approximately mostly invested in long-term, fixed-rate municipal bonds.

ALLIANCE NATIONAL MUNICIPAL INCOME FUND o 1

LETTER TO SHAREHOLDERS

Investment Strategy

The Fund is an actively managed, leveraged fund. Although the Fund is mostly invested, we continue to review its holdings looking for opportunities to improve its structure and/or income. Bonds purchased by the Fund are evaluated based on their relative value and credit quality merits.

As market conditions change, we will change the Fund's portfolio structure in keeping with its investment objective. In each shareholder report, we will describe recent, current and expected near-term future market conditions, as well as changes in the strategies that we employ to achieve the Fund's objective of high current income.

Edgar Filing: ALLIANCE NATIONAL MUNICIPAL INCOME FUND - Form N-30D

Market Overview

Recent performance for municipal bonds has been quite attractive. On an after-tax basis, the municipal bond market outperformed the taxable fixed income market by over 100 basis points during the past 12 months. The municipal bond market's outperformance over this time period resulted from a strong demand for municipal bonds by investors seeking shelter from market volatility and taxes.

Over the last six months, the markets have undergone a number of transitions. The economy, however, appears to be recovering. The current military campaign against terrorism has led to higher government expenditures. The U.S. Federal Reserve appears to have completed its series of 11 interest rate cuts and is expected to raise the Fed Funds rate target sometime later this year in response to evidence of a stronger economy. The combination of these events has resulted in a higher level of market volatility.

Although the market consensus is that the U.S. Federal Reserve will reverse direction, there is a wide range of opinion as to its timing. As the economy rebounds, investors are reducing their expected rates of return on equities to more rational levels reflective of longer-term historic averages. Investors have rediscovered the benefits of diversification and are reallocating assets in favor of fixed income, specifically tax-exempt, securities. This has led to a strong demand for municipal bond investments.

The U.S. economic conditions have had a mixed effect on the credit profile of municipalities. Cities, counties and school district credits have remained stable despite the slowdown. These local governments have benefited from steady property tax receipts due to the ongoing strength of the housing market. States, however, experienced greater budgetary shortfalls as sales and income tax receipts have been below projections and spending on health care and social services has continued to rise. Given these widespread budget problems, several states were placed on negative outlook by the rating agencies during the first quarter of this year. If the U.S. economic recovery remains slow, local governments' finances may come under pressure as states are forced to reduce outlays in order to

2 o ALLIANCE NATIONAL MUNICIPAL INCOME FUND

LETTER TO SHAREHOLDERS

balance their own budgets. Currently, the Fund has minimal exposure to general obligation debt.

Despite the credit concerns listed above, the overall credit quality of the municipal bond market is very strong and, for the most part, unaffected by many of the excesses currently impacting the corporate bond market. Among all municipal issuers, credit rating upgrades exceeded downgrades during the quarter. Health care remains the weakest sector within the municipal bond market, with industry-wide financial pressure leading to more downgrades than upgrades for the sector.

Outlook

Market volatility should continue to provide attractive investment opportunities. The sources of this volatility will continue to include the uncertainty of the economy's turnaround, the timing of a tightening by the U.S.

Edgar Filing: ALLIANCE NATIONAL MUNICIPAL INCOME FUND - Form N-30D

Federal Reserve, the spillover of volatility from the equity market and geopolitical event risk. We expect the economy to continue to recover and, therefore, consider current U.S. Federal Reserve policy to be unsustainably accommodative. Nonetheless, any initial increases in the Fed Funds target rate should be incremental and analogous more to taking one's foot off the accelerator rather than putting it on the brake.

We remain confident that the U.S. Federal Reserve will adjust policy sufficiently to temper growth. The U.S. Federal Reserve's actions should result in a flatter yield curve (a decline in the difference between short-term and long-term rates), although short-term municipal bond yields are not expected to rise basis point for basis point with the Fed Funds rate. Most of this decline will result from rising yields on short-term bonds. Currently, the Fund is mostly invested in long-term bonds. However, the current volatility should continue to provide opportunities for repositioning the Fund. Market volatility, particularly in equities, will also influence individual investment preferences, in favor of municipal bonds, going forward.

We expect more investors to embrace an asset allocation-based approach to investing. We further anticipate that investors will select municipal bonds for the conservative portion of their fixed income allocation. The historically strong credit quality of the municipal bond market and the obvious benefit of tax-free income should cause municipal bonds to be a major part of individual investors' portfolios. Therefore, demand for municipal securities should continue to outpace supply, and tax-free investments should remain attractive on a relative value basis.

ALLIANCE NATIONAL MUNICIPAL INCOME FUND o 3

LETTER TO SHAREHOLDERS

The Alliance Municipal Income team thanks you for your support in launching this new Fund. We look forward to the opportunity to serve our shareholders over the next year.

Sincerely,

 PORTFOLIO OF INVESTMENTS

- (a) Moody's or Fitch Rating.
- (b) Variable Rate Demand Notes (VRDN) are instruments whose interest rates change on a specific date (such as coupon date or interest payment date) or whose interest rates vary with changes in a designated base rate (such as the prime interest rate). This instrument is payable on demand and is secured by letters of credit or other credit support agreements from major banks.
- (c) Portfolio percentages are calculated based on net assets applicable to common shareholders.

NOTES TO FINANCIAL STATEMENTS

NOTES TO FINANCIAL STATEMENTS
April 30, 2002 (unaudited)

NOTE A

Significant Accounting Policies

Alliance National Municipal Income Fund, Inc. (the "Fund"), was incorporated in the state of Maryland on November 9, 2001 and is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. Prior to commencement of operations on January 29, 2002, the Fund had no operations other than the sale to Alliance Capital Management L.P. of 6,667 shares for the amount of \$100,005 on January 23, 2002. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States, which require management to make certain estimates and assumptions that affect the reporting amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities traded on a national securities exchange are generally valued at the last reported sale price or if there was no sale on such a day, the last bid price quoted on such day. If no bid prices are quoted, then the security is valued at the mean of the bid and asked prices as obtained on that day from one or more dealers regularly making a market in that security. Securities traded on the over-the-counter market are valued at the mean of the closing bid and ask prices provided by two or more dealers regularly making a market in such securities. U.S. government securities and other debt securities which mature in 60 days or less are valued at amortized cost unless this method does not represent fair value. Securities for which market quotations are not readily available are valued at fair value as determined in good faith by, or in accordance with procedures approved by, the Board of Directors. Fixed income securities may be valued on the basis of prices provided by a pricing service when such prices are believed to reflect the fair market value of such securities.

2. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its

Edgar Filing: ALLIANCE NATIONAL MUNICIPAL INCOME FUND - Form N-30D

investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required.

3. Organization Expenses and Offering Costs

The Fund has incurred \$614,150, an amount equal to \$.03 per share of common shares issued, for offering costs of which were charged to paid-in capital. As of April 30, 2002, the Fund has paid an amount equal to \$352,146 of these expenses and an amount equal to \$262,004 remains outstanding. Alliance Capital Management L.P., the Fund's investment adviser, has agreed to pay any additional organization expenses and offering costs that exceed the \$.03 per share amount.

4. Investment Income and Investment Transactions

Interest income is accrued daily. Invest-

18 o ALLIANCE NATIONAL MUNICIPAL INCOME FUND

NOTES TO FINANCIAL STATEMENTS

ment transactions are accounted for on the date the securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes original issue discounts and market discounts as adjustments to interest income.

5. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with accounting principles generally accepted in the United States. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory Fee

Under the terms of an investment advisory agreement, the Fund pays Alliance Capital Management L.P. (the "Adviser") an advisory fee payable monthly, in a maximum amount equal to .65% of the Fund's average daily net assets. The Adviser has agreed to waive a portion of its fees or reimburse the Fund for expenses in the amount of .25% of average daily net assets for the first 5 full years of the Fund's operations, .20% of average daily net assets in year 6, .15% in year 7, .10% in year 8, and .05% in year 9. For the period ended April 30, 2002, the amount of such fee waived was \$223,533.

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short term investments and U.S. government securities) aggregated \$481,031,132 and \$30,069,715, respectively, for the period ended April 30, 2002. There were no purchases or sales of U.S. government and government agency obligations for the period ended

Edgar Filing: ALLIANCE NATIONAL MUNICIPAL INCOME FUND - Form N-30D

April 30, 2002.

At April 30, 2002, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation of investments was \$2,848,029 and gross unrealized depreciation of investments was \$2,035,387 resulting in net unrealized appreciation of \$812,642.

NOTE D

Common Stock

There are 1,999,992,200 shares of \$.001 par value common stock authorized. Of the 20,471,667 shares outstanding at April 30, 2002, the Adviser owned 6,667 shares. In addition to the shares issued to the Adviser, an initial public offering of the Fund's shares resulted in the issuance of 18,900,000 shares. Also, the Fund issued an additional 1,565,000 shares in connection with the exercise by the underwriters of the over-allotments option.

ALLIANCE NATIONAL MUNICIPAL INCOME FUND o 19

NOTES TO FINANCIAL STATEMENTS

NOTE E

Preferred Stock

The Fund has issued and outstanding 7,800 shares of Auction Preferred Stock, consisting of 1,950 shares each of Series M, Series T, Series W and Series TH, with a liquidation value of \$25,000 per share. The dividend rate on the Auction Preferred Stock may change generally every 7 days as set by the auction agent. The dividend rate on the Series M is 1.60% effective through May 7, 2002. The dividend rate on the Series T is 1.55% effective through May 1, 2002. The dividend rate on the Series W is 1.55% effective through May 2, 2002. The dividend rate on the Series TH is 1.50% effective through May 3, 2002.

- (a) Commencement of operations.
- (b) Net of offering costs of \$.03.
- (c) Based on average shares outstanding.
- (d) Net of fees waived by the Adviser.
- (e) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of the period. Total investment return calculated for a period of less than one year is not annualized.
- (f) Annualized.

Edgar Filing: ALLIANCE NATIONAL MUNICIPAL INCOME FUND - Form N-30D

GLOSSARY OF INVESTMENT TERMS

GLOSSARY OF INVESTMENT TERMS

basis point

One basis point equals 0.01%.

benchmark

A standard by which a fund's performance can be measured. A benchmark is usually an unmanaged index, such as the Standard & Poor's 500 Stock Index or the Lehman Brothers Aggregate Bond Index.

bond

Bonds are issued by governments or corporations when they need to raise cash. Bonds are sold, or issued, to investors and have a maturity date, which is the date the issuer is obligated to repay the investor for the principal, or face amount, of the bond. Bonds also pay interest until maturity. Bonds are also called fixed-income securities.

credit rating

Credit ratings are issued by independent organizations, such as the Standard & Poor's Ratings group or Moody's Investors Service. These groups attempt to assess the likelihood that the issuer of the bond will be able to make timely payments of principal and interest on the bond, based on such factors as the issuer's financial condition and any collateral securing these obligations. Ratings typically range from AAA, which is the highest rating, to D, which is the lowest.

index

A compilation of securities of similar types of companies that is used to measure the investment performance of securities within that specific market. An index is often used as a benchmark for a mutual fund. An investor cannot invest directly in an index.

net asset value (NAV)

The value of a mutual fund's total assets, minus its liabilities, divided by the number of shares outstanding.

portfolio

The collection of securities that make up a fund's or an investor's investments.

yield

The rate of return on an asset, usually referring to dividend or interest payments, expressed as a percentage of current market price.
