Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund

Common Shares

**Investment objectives and policies.** Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund (the “Fund”) is a diversified, closed-end management investment company, which commenced operations on September 30, 2005. The Fund’s primary investment objective is to provide current income and gains, with a secondary objective of capital appreciation. In pursuing its investment objectives, the Fund will evaluate returns on an after-tax basis, seeking to minimize and defer shareholder federal income taxes.

**Investment Adviser and Sub-Adviser.** The Fund’s investment adviser is Eaton Vance Management (“Eaton Vance” or the “Adviser”). As of January 31, 2018, Eaton Vance and its affiliates managed approximately \$449.2 billion of fund and separate account assets on behalf of clients, including approximately \$122.6 billion in equity assets. Eaton Vance has engaged its affiliate Parametric Portfolio Associates LLC (“Parametric” or the “Sub-Adviser”) as the sub-adviser to the Fund. Parametric managed approximately \$241.7 billion in assets as of January 31, 2018. Eaton Vance is responsible for managing the Fund’s overall investment program and executing the Fund’s options strategy. Eaton Vance is also responsible for providing research support to the Sub-Adviser and supervising the performance of the Sub-Adviser. Parametric is responsible for structuring and managing the Fund’s common stock portfolio, including tax-loss harvesting (i.e., periodically selling positions that have depreciated in value to realize capital losses that can be used to offset capital gains realized by the Fund) and other tax-management techniques, relying in part on the fundamental research and analytical judgments of the Adviser.

**The Offering.** The Fund may offer, from time to time, in one or more offerings (each, an “Offering”), the Fund’s common shares of beneficial interest, \$0.01 par value (“Common Shares”). Common Shares may be offered at prices and on terms to be set forth in one or more supplements to this Prospectus (each, a “Prospectus Supplement”). You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in Common Shares. Common Shares may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The Prospectus Supplement relating to the Offering will identify any agents, underwriters or dealers involved in the offer or sale of Common Shares, and will set forth any applicable offering price, sales load, fee, commission or discount arrangement between the Fund and its agents or underwriters, or among its underwriters, or the basis upon which such amount may be calculated, net proceeds and use of proceeds, and the terms of any sale. The Fund may not sell any Common Shares through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular Offering of the Common Shares. *(continued on inside cover page)*

**The Common Shares have traded both at a premium and a discount to net asset value (“NAV”). The Fund cannot predict whether Common Shares will trade in the future at a premium or discount to NAV. The provisions of the Investment Company Act of 1940, as amended (the “1940 Act”) generally require that the public offering price of common shares (less any underwriting commissions and discounts) must equal or exceed the NAV per share of a company’s common stock (calculated within 48 hours of pricing). The Fund’s issuance of Common Shares may have an adverse effect on prices in the secondary market for the Fund’s Common Shares by**

**increasing the number of Common Shares available, which may put downward pressure on the market price for the Fund's Common Shares. Shares of common stock of closed-end investment companies frequently trade at a discount from NAV, which may increase investors' risk of loss.**

**Investing in shares involves certain risks. See "Investment objectives, policies and risks" beginning at page 24.**

**Neither the Securities and Exchange Commission ("SEC") nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

(continued from previous page)

**Portfolio contents.** Under normal market conditions, the Fund's investment program consists primarily of (1) owning a diversified portfolio of common stocks, a segment of which (the "U.S. Segment") holds stocks of U.S. issuers and a segment of which (the "International Segment") holds stocks of non-U.S. issuers, and (2) selling on a continuous basis call options on broad-based domestic stock indices on at least 80% of the value of the U.S. Segment and call options on broad-based foreign country and/or regional stock indices on at least 80% of the value of the International Segment.

Under normal market conditions, the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers. The U.S. Segment is expected to represent approximately 50% to 60% of the value of the Fund's stock portfolio and the International Segment is expected to represent approximately 40% to 50% of the Fund's stock portfolio. These percentages may vary significantly over time depending upon the Adviser's evaluation of market circumstances and other factors. Under normal market conditions, the Fund invests a substantial portion of its total assets in the securities of non-U.S. issuers, including American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") and European Depositary Receipts ("EDRs"). An issuer will be considered to be located outside of the United States if it is domiciled in, derives a significant portion of its revenue from, or its primary trading venue is outside the U.S. Securities of an issuer domiciled outside of the United States may trade in the form of depositary receipts. The Fund may invest up to 15% of its total assets in securities in emerging markets issuers.

For the U.S. Segment, the Fund intends to write index call options on the Standard & Poor's 500 Composite Stock Price Index® (the "S&P 500") and the NASDAQ-100 Index® (the "NASDAQ-100"). For the International Segment, the Fund intends to write index call options on broad-based foreign country and/or regional stock indices that the Adviser believes are collectively representative of the International Segment. Over time, the indices on which the Fund writes call options may vary as a result of changes in the availability and liquidity of various listed index options, the Adviser's evaluation of equity market conditions and other factors. Due to tax considerations, the Fund intends to limit the overlap between its stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis.

The Fund seeks to generate current earnings from option premiums and, to a lesser extent, from dividends on stocks held. The Fund employs a variety of tax-management techniques and strategies as described herein, seeking in part to minimize the Fund's ordinary income and its net realized short-term capital gains in excess of net realized long-term capital losses. To the extent that the Fund's ordinary income and net realized short-term gains over net realized long-term losses exceed Fund expenses, dividends with respect to such amounts when paid to Common Shareholders will be taxable as ordinary income.

Under normal market conditions, at least 80% of the value of the Fund's total assets is subject to written index call options. Writing index call options involves a tradeoff between the option premiums received and reduced participation in potential future stock price appreciation of the Fund's portfolio of common stocks.

During unusual market conditions, the Fund may invest up to 100% of its assets in cash or cash equivalents temporarily, which may be inconsistent with its investment objectives, principal strategies and other policies.

**Exchange listing.** As of April 3, 2018, the Fund had 106,765,163 Common Shares outstanding. The Fund's Common Shares are traded on the New York Stock Exchange ("NYSE") under the symbol "ETW." As of April 3, 2018, the last reported sales price of a Common Share of the Fund on the NYSE was \$11.47. Common Shares offered and sold pursuant to this Registration Statement will also be listed on the NYSE and trade under this symbol.

Edgar Filing: Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund - Form N-2/A

The Fund's net asset value and distribution rate will vary and may be affected by numerous factors, including changes in stock prices, option premiums, market interest rates, dividend rates and other factors. An investment in the Fund may not be appropriate for all investors. There is no assurance that the Fund will achieve its investment objectives.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 2Prospectus dated [\_\_\_\_], 2018

This Prospectus, together with any applicable Prospectus Supplement, sets forth concisely information you should know before investing in the shares of the Fund. Please read and retain this Prospectus for future reference. A Statement of Additional Information dated April , 2018, has been filed with the SEC and can be obtained without charge by calling 1-800-262-1122 or by writing to the Fund. A table of contents to the Statement of Additional Information is located at page 55 of this Prospectus. This Prospectus incorporates by reference the entire Statement of Additional Information. The Statement of Additional Information is available along with shareholder reports and other Fund-related materials: at the SEC's public reference room in Washington, DC (call 1-202-551-8090 for information on the operation of the reference room); from the EDGAR database on the SEC's internet site (<http://www.sec.gov>); upon payment of copying fees by writing to the SEC's public reference section, Washington, DC 20549-1520; or by electronic mail at [publicinfo@sec.gov](mailto:publicinfo@sec.gov). The Fund's address is Two International Place, Boston, MA 02110, and its telephone number is 1-800-262-1122.

The Fund's shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference in this Prospectus. The Fund has not authorized anyone to provide you with different information. ## CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This Prospectus, any accompanying Prospectus Supplement and the Statement of Additional Information contain “forward-looking statements.” Forward-looking statements can be identified by the words “may,” “will,” “intend,” “expect,” “estimate,” “continue,” “plan,” “anticipate,” and similar terms and the negative of such terms. Such forward-looking statements may be contained in this Prospectus as well as in any accompanying Prospectus Supplement. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect our actual results are the performance of the portfolio of securities we hold, the price at which our shares will trade in the public markets and other factors discussed in our periodic filings with the SEC.

Although we believe that the expectations expressed in our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed in our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and are subject to inherent risks and uncertainties, such as those disclosed in the “Investment objectives, policies and risks” section of this Prospectus. All forward-looking statements contained or incorporated by reference in this Prospectus or any accompanying Prospectus Supplement are made as of the date of this Prospectus or the accompanying Prospectus Supplement, as the case may be. Except for our ongoing obligations under the federal securities laws, we do not intend, and we undertake no obligation, to update any forward-looking statement. The forward-looking statements contained in this Prospectus, any accompanying prospectus supplement and the statement of additional information are excluded from the safe harbor protection provided by section 27A of the Securities Act of 1933, as amended (the “1933 Act”).

Currently known risk factors that could cause actual results to differ materially from our expectations include, but are not limited to, the factors described in the “Investment objectives, policies and risks” section of this Prospectus. We urge you to review carefully that section for a more detailed discussion of the risks of an investment in our securities.

Prospectus dated [\_\_\_\_\_], 2018

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 5 Prospectus dated [\_\_\_\_\_], 2018

## Prospectus Summary

*The following summary is qualified in its entirety by reference to the more detailed information included elsewhere in this Prospectus, in any related Prospectus Supplement, and in the Statement of Additional Information.*

## THE FUND

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund (the “Fund”) is a diversified, closed-end management investment company, which commenced operations on September 30, 2005. The Fund seeks to provide current income and gains, with a secondary objective of capital appreciation. Investments are based on Eaton Vance Management’s (“Eaton Vance” or the “Adviser”) and Parametric Portfolio Associates LLC’s (“Parametric” or a “Sub-Adviser”) internal research and proprietary modeling techniques and software. An investment in the Fund may not be appropriate for all investors. There is no assurance that the Fund will achieve its investment objectives.

## THE OFFERING

The Fund may offer, from time to time, in one or more offerings (each, an “Offering”), up to 12,811,820 of the Fund’s common shares of beneficial interest, \$0.01 par value (“Common Shares”), on terms to be determined at the time of the Offering. The Common Shares may be offered at prices and on terms to be set forth in one or more Prospectus Supplements. You should read this Prospectus and the applicable Prospectus Supplement carefully before you invest in Common Shares. Common Shares may be offered directly to one or more purchasers, through agents designated from time to time by the Fund, or to or through underwriters or dealers. The Prospectus Supplement relating to the Offering will identify any agents, underwriters or dealers involved in the offer or sale of Common Shares, and will set forth any applicable offering price, sales load, fee, commission or discount arrangement between the Fund and its agents or underwriters, or among its underwriters, or the basis upon which such amount may be calculated, net proceeds and use of proceeds, and the terms of any sale. See “Plan of Distribution.” The Fund may not sell any of Common Shares through agents, underwriters or dealers without delivery of a Prospectus Supplement describing the method and terms of the particular Offering of Common Shares.

## INVESTMENT OBJECTIVES AND POLICIES

The Fund’s primary investment objective is to provide current income and gains, with a secondary objective of capital appreciation. In pursuing its investment objectives, the Fund will evaluate returns on an after-tax basis, seeking to minimize and defer shareholder federal income taxes. There can be no assurance that the Fund will achieve its investment objectives.

Under normal market conditions, the Fund’s investment program consists primarily of (1) owning a diversified portfolio of common stocks, a segment of which (the “U.S. Segment”) holds stocks of U.S. issuers and a segment of which (the “International Segment”) holds stocks of non-U.S. issuers, and (2) selling on a continuous basis call options on broad-based domestic stock indices on at least 80% of the value of the U.S. Segment and call options on broad-based foreign country and/or regional stock indices on at least 80% of the value of the International Segment.

Under normal market conditions, the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers. The U.S. Segment is expected to represent approximately 50% to 60% of the value of the Fund’s stock portfolio and the International Segment is expected to represent approximately 40% to 50% of the Fund’s stock portfolio. These percentages may vary significantly over time depending upon the Adviser’s evaluation of market circumstances and other factors. Under normal market conditions, the Fund invests a substantial portion of its total assets in the securities of non-U.S. issuers, including American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) and European Depositary Receipts (“EDRs”). An issuer will be considered to be located outside of the United States if it is domiciled in, derives a significant portion of its revenue from, or its

primary trading venue is outside the U.S. Securities of an issuer domiciled outside of the United States may trade in the form of depositary receipts. The Fund may invest up to 15% of its total assets in securities in emerging markets issuers.

For the U.S. Segment, the Fund intends to write index call options on the Standard & Poor's 500 Composite Stock Price Index® (the "S&P 500") and the NASDAQ-100 Index® (the "NASDAQ-100"). For the International Segment, the Fund intends to write index call options on broad-based foreign country and/or regional stock indices that the Adviser believes are collectively representative of the International Segment. Over time, the indices on which the Fund writes call options may vary as a result of changes in the availability and liquidity of various index options, the Adviser's evaluation of equity market conditions and other factors. Due to tax considerations, the Fund intends to limit the overlap between its stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis. The Fund normally expects that its assets will be invested across a broad range of industries and market sectors. The Fund may not invest 25% or more of its total assets in the securities of issuers in any single industry or group of industries. The Fund may invest a portion of its assets in stocks of mid-capitalization companies. Eaton Vance generally considers mid-capitalization companies to be those companies having market capitalizations within the range of

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 6Prospectus dated [\_\_\_\_], 2018

capitalizations for the S&P MidCap 400 Index (“S&P MidCap 400”). As of March 29, 2018, the median market capitalization of companies in the S&P MidCap 400 was approximately \$4.0 billion.

The Fund seeks to generate current earnings in part by employing an options strategy of writing (selling) index call options. Under normal market conditions, at least 80% of the value of the Fund’s total assets is subject to written index call options. Writing index call options involves a tradeoff between the option premiums received and reduced participation in potential future price appreciation of the Fund’s portfolio of common stocks. The Fund seeks to generate current earnings from option premiums and, to a lesser extent, from dividends on stocks held.

The Fund generally intends to sell stock index call options that are exchange-listed and “European style,” meaning that the options may be exercised only on the expiration date of the option. To implement its options program most effectively, the Fund may also sell index options that trade in over-the-counter (“OTC”) markets. Index options differ from options on individual securities in that index options (i) typically are settled in cash rather than by delivery of securities (meaning the exercise of an index option does not involve the actual purchase or sale of securities) and (ii) reflect price fluctuations in a group of securities or segments of the securities market rather than price fluctuations in a single security.

As the seller of index call options, the Fund will receive cash (the premiums) from option purchasers. The purchaser of an index call option has the right to any appreciation in the value of the applicable index over a fixed price (the exercise price) as of a specified date in the future (the option valuation date). Generally, the Fund intends to sell call options that are slightly “out-of-the-money” (i.e., the exercise price generally will be slightly above the current level of the applicable index when the option is sold). The Fund may also sell index options that are more substantially “out-of-the-money.” Such options that are more substantially “out-of-the-money” provide greater potential for the Fund to realize capital appreciation on its portfolio stocks, but generally would pay a lower premium than options that are slightly “out-of-the-money.” By selling index options, the Fund will, in effect, sell the potential appreciation in the value of the applicable index above the exercise price in exchange for the option premium received. If, at expiration, an index call option sold by the Fund is exercised, the Fund will pay the purchaser the difference between the cash value of the applicable index and the exercise price of the option. The premium, the exercise price and the market value of the applicable index will determine the gain or loss realized by the Fund as the seller of the index call option.

The Fund’s policies, under normal market conditions, that the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers and at least 80% of the value of the Fund’s total assets is subject to written index call options are non-fundamental policies and may be changed by the Fund’s Board of Trustees (the “Board”) without Common Shareholder approval following the provision of 60 days’ prior written notice to Common Shareholders.

In implementing the Fund’s investment strategy, the Adviser and Sub-Adviser intend to employ a variety of techniques and strategies designed to minimize and defer the federal income taxes incurred by shareholders in connection with their investment in the Fund as described below.

The S&P 500 is an unmanaged index of 500 stocks maintained and published by Standard & Poor’s that is market-capitalization weighted and generally representative of the performance of larger stocks traded in the United States. The NASDAQ-100 is an unmanaged index maintained by the Nasdaq Stock Market, Inc. (“Nasdaq”) that includes 100 of the largest domestic and international non-financial companies listed on the Nasdaq based upon market capitalization. The NASDAQ-100 reflects companies across a range of major industry groups, including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. Compared to the S&P 500, the NASDAQ-100 has a substantially higher weighting in technology-oriented industries. It is not possible to invest directly in an index.

During unusual market conditions, the Fund may invest up to 100% of its assets in cash or cash equivalents temporarily, which may be inconsistent with its investment objectives, principal strategies and other policies.

#### INVESTMENT SELECTION STRATEGIES

Eaton Vance is responsible for managing the Fund's overall investment program and executing the Fund's options strategy. Eaton Vance is also responsible for providing research support to the Sub-Adviser and supervising the performance of the Sub-Adviser. Parametric is responsible for structuring and managing the Fund's common stock portfolio, including tax-loss harvesting (i.e., periodically selling positions that have depreciated in value to realize capital losses that can be used to offset capital gains realized by the Fund) and other tax-management techniques, relying in part on the fundamental research and analytical judgments of the Adviser. Parametric has developed specialized programs and systems that are designed to provide for efficient implementation of the Fund's strategies. The Fund's investments are actively managed, and securities may be bought or sold on a daily basis.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 7Prospectus dated [\_\_\_\_], 2018

The Adviser believes that a strategy of owning a portfolio of common stocks and selling covered call options (a “buy-write strategy”) can provide current income and gains and attractive risk-adjusted returns. The Fund will sell only “covered” call options. An index call option is considered covered if the Fund maintains with its custodian assets determined to be liquid (in accordance with procedures established by the Board) in an amount at least equal to the contract value of the index. An index call option also is covered if the Fund holds a call on the same index as the call written where the exercise price of the call held is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written, provided the difference is maintained by the Fund in segregated assets determined to be liquid (in accordance with procedures established by the Board). Compared to selling call options on individual stocks, the Adviser believes that selling index call options can achieve better tax and transactional efficiency because exchange-listed options on broad-based securities indices may qualify as “section 1256 contracts” as defined in the Internal Revenue Code of 1986, as amended (the “Code”), subject to favorable tax treatment, and because the markets for index options may be deeper and more liquid than options on individual stocks.

Eaton Vance further believes that a strategy of owning a portfolio of domestic and foreign common stocks in conjunction with writing index call options should generally provide returns that are superior to owning the same stocks without an associated call option writing program under three different stock market scenarios: (1) down-trending equity markets; (2) flat market conditions; and (3) moderately rising equity markets. In the Adviser’s opinion, only in more strongly rising equity markets would the buy-write strategy generally be expected to underperform the stock-only portfolio. For these purposes, the Adviser considers more strongly rising equity market conditions to exist whenever the current annual rate of return of U.S. or non-U.S. common stocks exceeds the long-term historical average of global stock market returns. The Adviser considers moderately rising equity market conditions to exist whenever current annual returns on U.S. and non-U.S. common stocks are positive, but do not exceed the long-term historical average of global stock market returns.

To avoid being subject to the “straddle rules” under federal income tax law, the Fund intends to limit the overlap between its stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis. Under the “straddle rules,” “offsetting positions with respect to personal property” generally are considered to be straddles. In general, investment positions will be offsetting if there is a substantial diminution in the risk of loss from holding one position by reason of holding one or more other positions. The Fund expects that the index call options it writes will not be considered straddles because its stock holdings will be sufficiently dissimilar from the components of the indices on which it has outstanding options positions under applicable guidance established by the Internal Revenue Service (“IRS”). Under certain circumstances, however, the Fund may enter into options transactions or certain other investments that may constitute positions in a straddle. Parametric will consider a variety of factors in constructing and maintaining the Fund’s stock portfolio, including, but not limited to, stock performance ratings as determined by the Adviser, stock dividend yields, overlap between the Fund’s stock portfolio holdings and the indices on which it has outstanding options positions, projected tracking of the U.S. Segment and the International Segment versus their respective benchmarks, realization of loss harvesting opportunities and other tax management considerations. The Adviser’s evaluation of the future performance potential of individual stocks will be one among several considerations in portfolio construction and will not, on a standalone basis, be determinative of portfolio construction. The Adviser’s ratings of the stocks held by the Fund will be based primarily on fundamental research.

The Fund’s index option strategy is designed to produce current cash flow from options premiums and to moderate the volatility of the Fund’s returns. This index option strategy is of a hedging nature and is not designed to speculate on equity market performance. The Adviser believes that the Fund’s index option strategy will moderate the volatility of the Fund’s returns because the option premiums received will help to mitigate the impact of downward price movements in the stocks held by the Fund, while the Fund’s obligations under the index calls written will effectively limit the Fund’s ability to participate in upward price movements in portfolio stocks beyond certain levels.

The Fund expects to sell on a continuous basis call options on broad-based domestic stock indices on at least 80% of the value of the U.S. Segment and call options on broad-based foreign country and/or regional stock indices on at least 80% of the value of the International Segment. Under normal conditions, at least 80% of the value of the Fund's total assets is subject to written index call options. The Adviser does not intend to sell index call options representing amounts greater than the value of the Fund's common stock portfolio (i.e., take a "naked" position). The Adviser generally intends to sell index options that are exchange-listed and "European style," meaning that the options may be exercised only on the expiration date of the option. To implement its options program most effectively, the Fund may also sell index options that trade in OTC markets. Index options are typically settled in cash and provide that the holder of the option has the right to receive an amount of cash determined by the excess of the exercise-settlement value of the index over the exercise price of the option. The exercise-settlement value of the index is calculated based on opening sales prices of the component index stocks on the option valuation date, which is the last business day before the expiration date. Generally, the Adviser intends to sell index call options that are slightly "out-of-the-money," meaning that option exercise prices generally will be slightly above the current level of the index at the time the options are written. The Fund may also sell index options that

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 8Prospectus dated [\_\_\_\_], 2018

are more substantially “out-of-the-money.” Such options that are more substantially “out-of-the-money” provide greater potential for the Fund to realize capital appreciation on its portfolio stocks but generally would pay a lower premium than options that are slightly “out-of-the-money.” The Adviser expects to follow a primary options strategy of selling index call options with a remaining maturity of between approximately one and three months and maintaining its short call option positions until approximately their option valuation date, at which time replacement call option positions with a remaining maturity within this range are written.

In implementing the Fund’s investment strategy, the Adviser and Sub-Adviser intend to employ a variety of techniques and strategies designed to minimize and defer the federal income taxes incurred by Common Shareholders in connection with their investment in the Fund. These include: (1) selling index call options that qualify for treatment as “section 1256 contracts” as defined in the Code, on which capital gains and losses are generally treated as 60% long-term and 40% short-term, regardless of holding period; (2) limiting the overlap between the Fund’s stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis so that the Fund’s stock holdings and index call options are not subject to the “straddle rules;” (3) engaging in a systematic program of tax-loss harvesting in the Fund’s stock portfolio, periodically selling stock positions that have depreciated in value to realize capital losses that can be used to offset capital gains realized by the Fund; and (4) managing the sale of appreciated stock positions so as to minimize the Fund’s net realized short-term capital gains in excess of net realized long-term capital losses. When an appreciated security is sold, the Fund intends to select for sale the share lots resulting in the most favorable tax treatment, generally those with holding periods sufficient to qualify for long-term capital gains treatment that have the highest cost basis.

Options on broad-based equity indices that trade on a national securities exchange registered with the Securities and Exchange Commission (the “SEC”) or a domestic board of trade designated as a contract market by the Commodity Futures Trading Commission generally qualify for treatment as “section 1256 contracts.” Options on broad-based equity indices that trade on other exchanges, boards of trade or markets designated by the U.S. Secretary of Treasury also qualify for treatment as “section 1256 contracts.” Because only a small number of exchanges, boards and markets outside the U.S. have to date received the necessary designation, most foreign-traded stock index options do not currently qualify for treatment as “section 1256 contracts.” OTC options do not qualify for treatment as “section 1256 contracts.” With respect to the International Segment, the Fund generally intends to sell options on broad-based foreign country and/or regional stock indices that are listed for trading in the United States or which otherwise qualify as “section 1256 contracts.” Options on foreign indices that are listed for trading in the United States or which otherwise qualify as “section 1256 contracts” may trade in substantially lower volumes and with substantially wider bid-ask spreads than other options contracts on the same or similar indices that trade on other markets outside the United States or in OTC markets. To implement its options program most effectively, the Fund may sell index options that do not qualify as “section 1256 contracts,” including OTC options. Gain or loss on index options not qualifying as “section 1256 contracts” would be realized upon disposition, lapse or settlement of the positions, and would be treated as short-term gain or loss.

In addition, the Fund seeks to earn and distribute “qualified dividend income.” Qualified dividend income received by an individual is taxed at the rates applicable to long-term capital gain (currently at a maximum rate of 20% plus a 3.8% Medicare contribution tax). In order for a dividend received by Fund shareholders to be qualified dividend income, the Fund must meet holding period and other requirements with respect to the dividend-paying stock in its portfolio and the shareholder must meet holding period and other requirements with respect to the Fund’s shares. A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning at the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property, (3) if the recipient elects to have the dividend income treated as investment interest, or (4) if the dividend is received from a foreign corporation that is (a)

not eligible for the benefits of a comprehensive income tax treaty with the U.S. (with the exception of dividends paid on stock of such a foreign corporation readily tradable on an established securities market in the U.S.) or (b) treated as a passive foreign investment company. Payments in lieu of dividends, such as payments pursuant to securities lending arrangements, also do not qualify to be treated as qualified dividend income. In general, distributions of investment income reported by the Fund as derived from qualified dividend income will be treated as qualified dividend income by a shareholder taxed as an individual provided the shareholder meets the holding period and other requirements described above with respect to the Fund's shares.

The Fund may seek to enhance the level of tax-advantaged dividend income it receives by emphasizing higher-yielding stocks in its stock portfolio and by engaging in dividend capture trading. In a dividend capture trade, the Fund sells a stock on or shortly after the stock's ex-dividend date and uses the sale proceeds to purchase one or more other stocks that are expected to pay dividends before the next dividend payment on the stock being sold. Through this practice, the Fund may receive more dividend payments over a given time period than if it held a single stock. In order for dividends received by

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 9Prospectus dated [\_\_\_\_], 2018

the Fund to qualify for favorable tax treatment, the Fund must comply with the holding period and other requirements set forth in the preceding paragraph. By complying with applicable holding period and other requirements while engaging in dividend capture trading, the Fund may be able to enhance the level of tax-advantaged dividend income it receives because it will receive more dividend payments qualifying for favorable treatment during the same time period than if it simply held its portfolio stocks. The use of dividend capture trading strategies will expose the Fund to increased trading costs and potentially higher short-term gain or loss.

The foregoing policies relating to investments in common stocks and options writing are the Fund's primary investment policies. In addition to its primary investment policies, the Fund may invest to a limited extent in other types of securities and engage in certain other investment practices. In addition to writing index call options, the Fund may write call options on up to 20% of the value of its total assets on futures contracts based upon broad-based securities indices. The Fund's use of such options on index futures would be substantially similar to its use of options directly on indices. The Fund may also invest up to 20% of its total assets in other derivative instruments acquired for hedging, risk management and investment purposes (to gain exposure to securities, securities markets, markets indices and/or currencies consistent with its investment objectives and policies), provided that no more than 10% of the Fund's total assets may be invested in such derivative instruments acquired for non-hedging purposes. To seek to protect against price declines in securities holdings with large accumulated gains, the Fund may use various hedging techniques (such as the purchase and sale of futures contracts on stocks and stock indices and options thereon, equity swaps, covered short sales, forward sales of stocks and the purchase and sale of forward currency exchange contracts and currency futures). By using these techniques rather than selling appreciated securities, the Fund can, within certain limitations, reduce its exposure to price declines in the securities without realizing substantial capital gains under current tax law. Derivative instruments may also be used by the Fund to enhance returns or as a substitute for the purchase or sale of securities. As a general matter, dividends received on hedged stock positions are characterized as ordinary income and are not eligible for favorable tax treatment. Dividends received on securities with respect to which the Fund is obligated to make related payments (pursuant to short sales or otherwise) will be treated as fully taxable ordinary income (i.e., income other than tax-advantaged dividends). In addition, use of derivatives may give rise to short-term capital gains and other income that would not qualify for favorable tax treatment. See "Investment Objectives, Policies and Risks."

## LISTING

As of April 3, 2018, The Fund had 106,765,163 Common Shares outstanding. The Fund's Common Shares are traded on the New York Stock Exchange ("NYSE") under the symbol "ETW." As of April 3, 2018, the last reported sale price of a Common Share of the Fund on the NYSE was \$11.47. Common Shares offered and sold pursuant to this Registration Statement will also be listed on the NYSE and trade under this symbol.

## INVESTMENT ADVISER, ADMINISTRATOR AND SUB-ADVISER

Eaton Vance, a wholly-owned subsidiary of Eaton Vance Corp., is the Fund's investment adviser and administrator. As of January 31, 2018, Eaton Vance and its affiliates managed approximately \$449.2 billion of fund and separate account assets on behalf of clients, including approximately \$122.6 billion in equity assets. Eaton Vance has engaged Parametric, an indirect, majority-owned subsidiary of Eaton Vance Corp., as a sub-adviser to the Fund. Parametric managed approximately \$241.7 billion in assets as of January 31, 2018. Eaton Vance is responsible for managing the Fund's overall investment program and executing the Fund's options strategy. Eaton Vance is also responsible for providing research support to the Sub-Adviser and supervising the performance of the Sub-Adviser. Parametric is responsible for structuring and managing the Fund's common stock portfolio, including tax-loss harvesting (i.e., periodically selling positions that have depreciated in value to realize capital losses that can be used to offset capital gains realized by the Fund) and other tax-management techniques, relying in part on the fundamental research and analytical judgments of the Adviser. See "Management of the Fund."

## PLAN OF DISTRIBUTION

The Fund may sell the Common Shares being offered under this Prospectus in any one or more of the following ways: (i) directly to purchasers; (ii) through agents; (iii) to or through underwriters; or (iv) through dealers. The Prospectus Supplement relating to the Offering will identify any agents, underwriters or dealers involved in the offer or sale of Common Shares, and will set forth any applicable offering price, sales load, fee, commission or discount arrangement between the Fund and its agents or underwriters, or among its underwriters, or the basis upon which such amount may be calculated, net proceeds and use of proceeds, and the terms of any sale.

The Fund may distribute Common Shares from time to time in one or more transactions at: (i) a fixed price or prices that may be changed; (ii) market prices prevailing at the time of sale; (iii) prices related to prevailing market prices; or (iv) negotiated prices; provided, however, that in each case the offering price per Common Share (less any underwriting commission or discount) must equal or exceed the NAV per Common Share.

The Fund from time to time may offer its Common Shares through or to certain broker-dealers, including UBS Securities LLC, that have entered into selected dealer agreements relating to at-the-market offerings.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 10Prospectus dated [\_\_\_\_], 2018

The Fund may directly solicit offers to purchase Common Shares, or the Fund may designate agents to solicit such offers. The Fund will, in a Prospectus Supplement relating to such Offering, name any agent that could be viewed as an underwriter under the 1933 Act, and describe any commissions the Fund must pay to such agent(s). Any such agent will be acting on a reasonable best efforts basis for the period of its appointment or, if indicated in the applicable Prospectus Supplement or other offering materials, on a firm commitment basis. Agents, dealers and underwriters may be customers of, engage in transactions with, or perform services for the Fund in the ordinary course of business.

If any underwriters or agents are used in the sale of Common Shares in respect of which this Prospectus is delivered, the Fund will enter into an underwriting agreement or other agreement with them at the time of sale to them, and the Fund will set forth in the Prospectus Supplement relating to such Offering their names and the terms of the Fund's agreement with them.

If a dealer is utilized in the sale of Common Shares in respect of which this Prospectus is delivered, the Fund will sell such Common Shares to the dealer, as principal. The dealer may then resell such Common Shares to the public at varying prices to be determined by such dealer at the time of resale.

The Fund may engage in at-the-market offerings to or through a market maker or into an existing trading market, on an exchange or otherwise, in accordance with Rule 415(a)(4) under the 1933 Act. An at-the-market offering may be through an underwriter or underwriters acting as principal or agent for the Fund.

Agents, underwriters and dealers may be entitled under agreements which they may enter into with the Fund to indemnification by the Fund against certain civil liabilities, including liabilities under the 1933 Act, and may be customers of, engage in transactions with or perform services for the Fund in the ordinary course of business.

In order to facilitate the Offering of Common Shares, any underwriters may engage in transactions that stabilize, maintain or otherwise affect the price of Common Shares or any other Common Shares the prices of which may be used to determine payments on the Common Shares. Specifically, any underwriters may over-allot in connection with the Offering, creating a short position for their own accounts. In addition, to cover over-allotments or to stabilize the price of Common Shares or of any such other Common Shares, the underwriters may bid for, and purchase, Common Shares or any such other Common Shares in the open market. Finally, in any Offering of Common Shares through a syndicate of underwriters, the underwriting syndicate may reclaim selling concessions allowed to an underwriter or a dealer for distributing Common Shares in the Offering if the syndicate repurchases previously distributed Common Shares in transactions to cover syndicate short positions, in stabilization transactions or otherwise. Any of these activities may stabilize or maintain the market price of Common Shares above independent market levels. Any such underwriters are not required to engage in these activities and may end any of these activities at any time.

The Fund may enter into derivative transactions with third parties, or sell Common Shares not covered by this Prospectus to third parties in privately negotiated transactions. If the applicable Prospectus Supplement indicates, in connection with those derivatives, the third parties may sell Common Shares covered by this Prospectus and the applicable Prospectus Supplement or other offering materials, including in short sale transactions. If so, the third parties may use Common Shares pledged by the Fund or borrowed from the Fund or others to settle those sales or to close out any related open borrowings of securities, and may use Common Shares received from the Fund in settlement of those derivatives to close out any related open borrowings of securities. The third parties in such sale transactions will be underwriters and, if not identified in this Prospectus, will be identified in the applicable Prospectus Supplement or other offering materials (or a post-effective amendment).

The maximum amount of compensation to be received by any member of the Financial Industry Regulatory Authority, Inc. will not exceed 8% of the initial gross proceeds from the sale of any security being sold with respect to each particular Offering of Common Shares made under a single Prospectus Supplement.

Any underwriter, agent or dealer utilized in the initial Offering of Common Shares will not confirm sales to accounts over which it exercises discretionary authority without the prior specific written approval of its customer.

#### DISTRIBUTIONS

Pursuant to an exemptive order issued by the Securities and Exchange Commission (“Order”), the Fund is authorized to distribute long-term capital gains to shareholders more frequently than once per year. Pursuant to the Order, the Fund’s Board of Trustees approved a Managed Distribution Plan (“MDP”) pursuant to which the Fund makes monthly cash distributions to Common Shareholders, stated in terms of a fixed amount per common share. Shareholders should not draw any conclusions about the Fund’s investment performance from the amount of these distributions or from the terms of the MDP. The MDP is subject to regular periodic review by the Fund’s Board of Trustees and the Board may amend or terminate the MDP at any time without prior notice to Fund shareholders. However, at this time there are no reasonably foreseeable circumstances that might cause the termination of the MDP. The Fund may distribute more than its net investment income and net realized capital gains and, therefore, a distribution may include a return of capital. A return of

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 11 Prospectus dated [\_\_\_\_], 2018

capital is treated as a non-dividend distribution for tax purposes and is not subject to current tax. A return of capital reduces a shareholder's tax cost basis in fund shares. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income." With each distribution, the Fund will issue a notice to shareholders and a press release containing information about the amount and sources of the distribution and other related information. The amounts and sources of distributions contained in the notice and press release are only estimates and are not provided for tax purposes. The amounts and sources of the Fund's distributions for tax purposes will be reported to shareholders on Form 1099-DIV for each calendar year.

Subject to its MDP, the Fund makes monthly distributions to Common Shareholders sourced from the Fund's cash available for distribution. "Cash available for distribution" consists of the Fund's dividends and interest income after payment of Fund expenses, net option premiums and net realized and unrealized gains on stock investments. The Fund intends to distribute all or substantially all of its net realized capital gains. Distributions are recorded on the ex-dividend date. Distributions to shareholders are determined in accordance with income tax regulations, which may differ from U.S. GAAP. As required by U.S. GAAP, only distributions in excess of tax basis earnings and profits are reported in the financial statements as a return of capital. Permanent differences between book and tax accounting relating to distributions are reclassified to paid-in capital. For tax purposes, distributions from short-term capital gains are considered to be from ordinary income. Distributions in any year may include a substantial return of capital component. The Fund's distribution rate may be adjusted from time-to-time. The Board may modify this distribution policy at any time without obtaining the approval of Common Shareholders.

Common Shareholders may elect automatically to reinvest some or all of their distributions in additional Common Shares under the Fund's dividend reinvestment plan. See "Distributions" and "Dividend Reinvestment Plan."

#### DIVIDEND REINVESTMENT PLAN

The Fund has established a dividend reinvestment plan (the "Plan"). Under the Plan, a Common Shareholder may elect to have all dividend and capital gain distributions automatically reinvested in additional Common Shares either purchased in the open market or newly issued by the Fund if the Common Shares are trading at or above their net asset value. Common Shareholders may elect to participate in the Plan by completing the dividend reinvestment plan application form. Common Shareholders who do not elect to participate in the Plan will receive all distributions in cash paid by check mailed directly to them by American Stock Transfer & Trust Company, LLC, as dividend paying agent. Common Shareholders who intend to hold their Common Shares through a broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan. See "Dividend Reinvestment Plan."

#### CLOSED-END STRUCTURE

Closed-end funds differ from open-end management investment companies (commonly referred to as mutual funds) in that closed-end funds generally list their shares for trading on a securities exchange and do not redeem their shares at the option of the shareholder. By comparison, mutual funds issue securities that are redeemable at net asset value at the option of the shareholder and typically engage in a continuous offering of their shares. Mutual funds are subject to continuous asset in-flows and out-flows that can complicate portfolio management, whereas closed-end funds generally can stay more fully invested in securities consistent with the closed-end fund's investment objectives and policies. In addition, in comparison to open-end funds, closed-end funds have greater flexibility in the employment of financial leverage and in the ability to make certain types of investments, including investments in illiquid securities.

However, common shares of closed-end funds frequently trade at a discount from their net asset value. Since inception, the market price of the Common Shares has fluctuated and at times traded below the Fund's NAV, and at times has traded above NAV. In recognition of this possibility that the Common Shares might trade at a discount to net asset value and that any such discount may not be in the interest of Common Shareholders, the Fund's Board, in

consultation with Eaton Vance, from time to time may review possible actions to reduce any such discount. The Board might consider open market repurchases or tender offers for Common Shares at net asset value. There can be no assurance that the Board will decide to undertake any of these actions or that, if undertaken, such actions would result in the Common Shares trading at a price equal to or close to net asset value per Common Share. The Board might also consider the conversion of the Fund to an open-end mutual fund. The Board believes, however, that the closed-end structure is desirable, given the Fund's investment objectives and policies. Investors should assume, therefore, that it is highly unlikely that the Board would vote to convert the Fund to an open-end investment company.

#### SPECIAL RISK CONSIDERATIONS

Risk is inherent in all investing. Investing in any investment company security involves risk, including the risk that you may receive little or no return on your investment or you may lose part or all of your investment.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 12Prospectus dated [\_\_\_\_], 2018

#### Discount from or premium to NAV

The Offering will be conducted only when Common Shares of the Fund are trading at a price equal to or above the Fund's NAV per Common Share plus the per Common Share amount of commissions. As with any security, the market value of the Common Shares may increase or decrease from the amount initially paid for the Common Shares. The Fund's Common Shares have traded both at a premium and at a discount relative to NAV. The shares of closed-end management investment companies frequently trade at a discount from their NAV. This is a risk separate and distinct from the risk that the Fund's NAV may decrease.

#### Secondary market for the Common Shares

The issuance of Common Shares through the Offering may have an adverse effect on the secondary market for the Common Shares. The increase in the amount of the Fund's outstanding Common Shares resulting from the Offering may put downward pressure on the market price for the Common Shares of the Fund. Common Shares will not be issued pursuant to the Offering at any time when Common Shares are trading at a price lower than a price equal to the Fund's NAV per Common Share plus the per Common Share amount of commissions.

The Fund also issues Common Shares of the Fund through its dividend reinvestment plan. See "Dividend Reinvestment Plan." Common Shares may be issued under the plan at a discount to the market price for such Common Shares, which may put downward pressure on the market price for Common Shares of the Fund.

When the Common Shares are trading at a premium, the Fund may also issue Common Shares of the Fund that are sold through transactions effected on the NYSE. The increase in the amount of the Fund's outstanding Common Shares resulting from that offering may also put downward pressure on the market price for the Common Shares of the Fund.

The voting power of current shareholders will be diluted to the extent that such shareholders do not purchase shares in any future Common Share offerings or do not purchase sufficient shares to maintain their percentage interest. In addition, if the Adviser is unable to invest the proceeds of such offering as intended, the Fund's per share distribution may decrease (or may consist of return of capital) and the Fund may not participate in market advances to the same extent as if such proceeds were fully invested as planned.

#### **Investment and market risk**

An investment in Common Shares is subject to investment risk, including the possible loss of the entire principal amount invested. An investment in Common Shares represents an indirect investment in the securities owned by the Fund, which are generally traded on a securities exchange or in the over-the-counter markets. The value of these securities, like other market investments, may move up or down, sometimes rapidly and unpredictably. Because the Fund intends to sell index call options on a continuous basis on at least 80% of the value of its total assets, the Fund's appreciation potential from equity market performance will be limited. The Common Shares at any point in time may be worth less than the original investment, even after taking into account any reinvestment of distributions.

#### **Issuer risk**

The value of securities held by the Fund may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods and services.

#### **Equity risk**

Under normal market conditions, the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers. Therefore, a principal risk of investing in the Fund is equity risk. The value of equity investments and related instruments may decline in response to adverse changes in the economy or the economic outlook; deterioration in investor sentiment; interest rate, currency, and commodity price fluctuations; adverse geopolitical, social or environmental developments; issuer- and sector-specific considerations; and other factors. Market conditions may affect certain types of stocks to a greater extent than other types of stocks. If the stock market declines, the value of Fund shares will also likely decline. Although stock prices can rebound, there is no assurance that values will return to previous levels. Preferred stocks and other hybrid securities may also be sensitive to changes in interest rates; when interest rates rise, their value will generally fall.

**Foreign securities risk**

Investments in foreign issuers could be affected by factors not present in the United States, including expropriation, armed conflict, confiscatory taxation, lack of uniform accounting and auditing standards, less publicly available financial and other information, potential difficulties in enforcing contractual obligations and the imposition of economic sanctions. Because foreign issuers may not be subject to uniform accounting, auditing and financial reporting standards, practices and

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 13Prospectus dated [\_\_\_\_], 2018

requirements and regulatory measures comparable to those in the United States, there may be less publicly available information about such foreign issuers. Settlements of securities transactions in foreign countries are subject to risk of loss, may be delayed and are generally less frequent than in the United States, which could affect the liquidity of the Fund's assets.

As an alternative to holding foreign-traded securities, the Fund may invest in dollar-denominated securities of foreign companies that trade on U.S. exchanges or in the U.S. over-the-counter market (including depositary receipts, which evidence ownership in underlying foreign securities). Since the Fund may invest in securities denominated or quoted in currencies other than the U.S. dollar, the Fund may be affected by changes in foreign currency exchange rates (and exchange control regulations) which affect the value of investments held by the Fund and the accrued income and appreciation or depreciation of the investments in U.S. dollars. Changes in foreign currency exchange rates relative to the U.S. dollar will affect the U.S. dollar value of the Fund's assets denominated in that currency and the Fund's return on such assets as well as any temporary uninvested reserves in bank deposits in foreign currencies. In addition, the Fund will incur costs in connection with conversions between various currencies.

### **Emerging market security risk**

The Fund may invest up to 15% of its total assets in securities of issuers located in emerging markets. The risks described under "Foreign securities risk" herein generally are heightened in connection with investments in emerging markets. Also, investments in issuers domiciled in countries with emerging capital markets may involve certain additional risks that do not generally apply to investments in issuers in more developed capital markets, such as (i) low or non-existent trading volume, resulting in a lack of liquidity and increased volatility in prices for such investments, as compared to investments in comparable issuers in more developed capital markets; (ii) uncertain national policies and social, political and economic instability, increasing the potential for expropriation of assets, confiscatory taxation or high rates of inflation; (iii) possible significant fluctuations in exchange rates, differing legal systems and the existence or possible imposition of exchange controls, custodial restrictions or other foreign or U.S. governmental laws or restrictions applicable to such investments; (iv) national policies that may limit investment opportunities; and (v) the lack or relatively early development of legal structures governing private and foreign investments and private property. Trading practices in emerging markets also may be less developed, resulting in inefficiencies relative to trading in more developed markets, which may result in increased transaction costs.

### **Currency risk**

Since the Fund invests in securities denominated or quoted in currencies other than the U.S. dollar, the Fund will be affected by changes in foreign currency exchange rates (and exchange control regulations) which affect the value of investments in the Fund and the accrued income and appreciation or depreciation of the investments in U.S. dollars. Changes in foreign currency exchange rates relative to the U.S. dollar will affect the U.S. dollar value of the Fund's assets denominated in that currency and the Fund's return on such assets as well as any temporary uninvested reserves in bank deposits in foreign currencies. In addition, the Fund will incur costs in connection with conversions between various currencies.

The Fund may attempt to protect against adverse changes in the value of the U.S. dollar in relation to a foreign currency by entering into a forward contract for the purchase or sale of the amount of foreign currency invested or to be invested, or by buying or selling a foreign currency option or futures contract for such amount. Such strategies may be employed before the Fund purchases a foreign security traded in the currency which the Fund anticipates acquiring or between the date the foreign security is purchased or sold and the date on which payment therefor is made or received. Seeking to protect against a change in the value of a foreign currency in the foregoing manner does not eliminate fluctuations in the prices of portfolio securities or prevent losses if the prices of such securities decline. Furthermore, such transactions reduce or preclude the opportunity for gain if the value of the currency should move in the direction opposite to the position taken. Unanticipated changes in currency prices may result in poorer overall

Edgar Filing: Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund - Form N-2/A  
performance for the Fund than if it had not entered into such contracts.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 14Prospectus dated [\_\_\_\_], 2018

### **Risks of investing in mid-cap companies**

The Fund may make investments in stocks of companies whose market capitalization is considered middle sized or “mid-cap.” Mid-cap companies often are newer or less established companies than larger companies. Investments in mid-cap companies carry additional risks because earnings of these companies tend to be less predictable; they often have limited product lines, markets, distribution channels or financial resources; and the management of such companies may be dependent upon one or a few key people. The market movements of equity securities of mid-cap companies may be more abrupt or erratic than the market movements of equity securities of larger, more established companies or the stock market in general. Historically, mid-cap companies have sometimes gone through extended periods when they did not perform as well as larger companies. In addition, equity securities of mid-cap companies generally are less liquid than those of larger companies. This means that the Fund could have greater difficulty selling such securities at the time and price that the Fund would like.

### **Risks of “growth” stock investing**

The Fund expects to invest substantially in stocks with “growth” characteristics. Growth stocks can react differently to issuer, political, market and economic developments than the market as a whole and other types of stocks. Growth stocks tend to be more expensive relative to their earnings or assets compared to other types of stocks. As a result, growth stocks tend to be sensitive to changes in their earnings and more volatile than other types of stocks.

### **Risk of selling index call options**

Under normal market conditions, at least 80% of the value of the Fund’s total assets is subject to written index call options. The purchaser of an index call option has the right to any appreciation in the value of the index over the exercise price of the call option as of the valuation date of the option. Because their exercise is settled in cash, sellers of index call options such as the Fund cannot provide in advance for their potential settlement obligations by acquiring and holding the underlying securities. The Fund intends to mitigate the risks of its written index call positions by holding a diversified portfolio of domestic and foreign stocks similar to those of the indices on which it writes call options. However, the Fund does not intend to acquire and hold a portfolio of exactly the same stocks as the indices on which it writes call options. Due to tax considerations, the Fund intends to limit the overlap between its stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis.

Consequently, the Fund bears the risk that the performance of the Fund’s stock portfolio will vary from the performance of the indices on which it writes call options. For example, the Fund will suffer a loss if the S&P 500 appreciates substantially above the exercise price of S&P 500 call options written by the Fund while the securities held by the Fund in the U.S. Segment in the aggregate fail to appreciate as much or decline in value of the life of the written option. Index options written by the Fund will be priced on a daily basis. Their value will be affected primarily by changes in the price and dividend rates of the underlying common stocks in such index, changes in actual or perceived volatility of such index and the remaining time to the options’ expiration. The trading price of index call options will also be affected by liquidity considerations and the balance of purchase and sale orders.

A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived and well-executed options program may be adversely affected by market behavior or unexpected events. As the writer of index call options, the Fund will forgo, during the option’s life, the opportunity to profit from increases in the value of the applicable index above the sum of the option premium received and the exercise price of the call option, but retains the risk of loss, minus the option premium received, should the value of the applicable index decline. When a call option is exercised, the Fund will be required to deliver an amount of cash determined by

the excess of the value of the applicable index at contract termination over the exercise price of the option. Thus, the exercise of index call options sold by the Fund may require the Fund to sell portfolio securities to generate cash at inopportune times or for unattractive prices.

With respect to the International Segment, the Fund generally intends to sell options on broad-based foreign country and/or regional stock indices that are listed for trading in the United States or which otherwise qualify as “section 1256 contracts.” Options on foreign indices that are listed for trading in the United States or which otherwise qualify as “section 1256 contracts” may trade in substantially lower volumes and with substantially wider bid-ask spreads than other options contracts on the same or similar indices that trade on other markets outside the U.S. or in OTC markets. To implement its options program most effectively, the Fund may sell index options that do not qualify as “section 1256 contracts,” including OTC options. Gain or loss on index options not qualifying as “section 1256 contracts” would be realized upon disposition, lapse or settlement of the positions and would be treated as short-term gain or loss.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 15 Prospectus dated [\_\_\_\_], 2018

The trading price of options may be adversely affected if the market for such options becomes less liquid or smaller. The Fund may close out a call option by buying the option instead of letting it expire or be exercised. There can be no assurance that a liquid market will exist when the Fund seeks to close out a call option position by buying the option. Reasons for the absence of a liquid secondary market on an exchange include the following: (i) there may be insufficient trading interest in certain options; (ii) restrictions may be imposed by an exchange on opening transactions or closing transactions or both; (iii) trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options; (iv) unusual or unforeseen circumstances may interrupt normal operations on an exchange; (v) the facilities of an exchange or the Options Clearing Corporation (the “OCC”) may not at all times be adequate to handle current trading volume; or (vi) one or more exchanges could, for economic or other reasons, decide or be compelled to discontinue the trading of options (or a particular class or series of options) at some future date. If trading were discontinued, the secondary market on that exchange (or in that class or series of options) would cease to exist. However, outstanding options on that exchange that had been issued by the OCC as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

The hours of trading for options may not conform to the hours during which common stocks held by the Fund are traded. To the extent that the options markets close before the markets for securities, significant price and rate movements can take place in the securities markets that would not be reflected concurrently in the options markets. Index call options are marked to market daily and their value is affected by changes in the value and dividend rates of the securities represented in the underlying index, changes in interest rates, changes in the actual or perceived volatility of the associated index and the remaining time to the options’ expiration, as well as trading conditions in the options market.

To implement its options program most effectively, the Fund may sell index options that trade in OTC markets. Participants in these markets are typically not subject to credit evaluation and regulatory oversight as are members of “exchange based” markets. By engaging in index option transactions in these markets, the Fund may take a credit risk with regard to parties with which it trades and also may bear the risk of settlement default. These risks may differ materially from those involved in exchange-traded transactions, which generally are characterized by clearing organization guarantees, daily marking-to-market and settlement, and segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from these protections, which in turn may subject the Fund to the risk that a counterparty will not settle a transaction in accordance with agreed terms and conditions because of a dispute over the terms of the contract or because of a credit or liquidity problem. Such “counterparty risk” is increased for contracts with longer maturities when events may intervene to prevent settlement. The ability of the Fund to transact business with any one or any number of counterparties, the lack of any independent evaluation of the counterparties or their financial capabilities, and the absence of a regulated market to facilitate a settlement, may increase the potential for losses to the Fund.

### **Tax risk**

Reference is made to “Federal Income Tax Matters” for an explanation of the federal income tax consequences and attendant risks of investing in the Fund. Although the Fund seeks to minimize and defer the federal income taxes incurred by Common Shareholders in connection with their investment in the Fund, there can be no assurance that it will be successful in this regard. Market conditions may limit the Fund’s ability to generate tax losses or to generate dividend income taxed at favorable tax rates. The Fund’s tax-managed strategy may cause the Fund to hold a security in order to achieve more favorable tax-treatment or to sell a security in order to create tax losses. The Fund’s ability to utilize various tax-management techniques may be curtailed or eliminated in the future by tax legislation or regulation. Distributions paid on the Common Shares may be characterized variously as net investment income (taxable at ordinary income rates), qualified dividends and capital gains dividends (each taxable at long-term capital gains rates) or return of capital (not currently taxable). The ultimate tax characterization of the Fund’s distributions made in a calendar year may not finally be determined until after the end of that calendar year. Distributions to a Common Shareholder that are return of capital will be tax free to the amount of the Common Shareholder’s current tax basis in

his or her Common Shares, with any distribution amounts exceeding such basis treated as capital gain on a deemed sale of Common Shares. Common Shareholders are required to reduce their tax basis in Common Shares by the amount of tax-free return of capital distributions received, thereby increasing the amount of capital gain (or decreasing the amount of capital loss) to be recognized upon a later disposition of the Common Shares. In order for Fund distributions of qualified dividend income to be taxable at favorable long-term capital gains rates, a Common Shareholder must meet certain prescribed holding period and other requirements with respect to his or her Common Shares. If positions held by the Fund were treated as “straddles” for federal income tax purposes, dividends on such positions would not constitute qualified dividend income subject to favorable income tax treatment. Gain or loss on positions in a straddle are subject to special (and generally disadvantageous) rules as described under “Federal Income Tax Matters.”

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 16Prospectus dated [\_\_\_\_], 2018

### **Distribution risk**

The monthly distributions Common Shareholders will receive from the Fund will be sourced from the Fund's net option premiums, net realized and unrealized gains on stock investments, and dividends and interest income, after payment of Fund expenses. The Fund's cash available for distribution may vary widely over the short- and long-term. If stock market volatility declines or stock prices decline, the level of premiums from writing index call options and the amounts available for distribution from options activity will likely decrease as well. Payments to close written call options will reduce amounts available for distribution from call option premiums received. Net realized and unrealized gains on the Fund's stock investments will be determined primarily by the direction and movement of the stock markets (and the particular stocks held). Dividends on common stocks are not fixed but are declared at the discretion of the issuer's board of directors. There can be no assurance that monthly distributions paid by the Fund to the Common Shareholders will be maintained at initial levels or increase over time.

### **Interest rate risk**

The premiums from writing index call options and amounts available for distribution from the Fund's options activity may decrease in declining interest rate environments. The value of the Fund's common stock investments may also be influenced by changes in interest rates. Higher yielding stocks and stocks of issuers whose businesses are substantially affected by changes in interest rates may be particularly sensitive to interest rate risk.

### **Derivatives risk**

In addition to writing index call options, the risks of which are described above, the Fund may invest up to 20% of its total assets in other derivative investments acquired for hedging, risk management and investment purposes, provided that no more than 10% of the Fund's total assets may be invested in such derivative instruments acquired for non-hedging purposes. The use of derivatives can lead to losses because of adverse movements in the price or value of the asset, index, rate or instrument underlying a derivative, due to failure of a counterparty or due to tax or regulatory constraints. Derivatives may create investment leverage in the Fund, which magnifies the Fund's exposure to the underlying investment. Derivative risks may be more significant when they are used to enhance return or as a substitute for a position or security, rather than solely to hedge the risk of a position or security held by the Fund. Derivatives for hedging purposes may not reduce risk if they are not sufficiently correlated to the position being hedged. A decision as to whether, when and how to use derivatives involves the exercise of specialized skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events. Changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund could lose more than the principal amount invested in derivatives. Derivative instruments traded in over-the-counter markets may be difficult to value, may be illiquid, and may be subject to wide swings in valuation caused by changes in the value of the underlying instrument. The loss on derivative transactions may substantially exceed the initial investment.

### **Liquidity risk**

The Fund may invest up to 15% of its total assets in securities for which there is no readily available trading market or which are otherwise illiquid. The Fund may not be able readily to dispose of such securities at prices that approximate those at which the Fund could sell such securities if they were more widely traded and, as a result of such illiquidity, the Fund may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. In addition, the limited liquidity could affect the market price of the securities, thereby adversely affecting the Fund's net asset value, and at times may make the disposition of securities impracticable.

**Inflation risk**

Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions thereon can decline.

**Market discount risk**

As with any security, the market value of the Common Shares may increase or decrease from the amount initially paid for the Common Shares. The Fund's Common Shares have traded both at a premium and at a discount relative to NAV. The shares of closed-end management investment companies frequently trade at a discount from their NAV. This is a risk separate and distinct from the risk that the Fund's NAV may decrease.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 17Prospectus dated [\_\_\_\_], 2018

### **Financial leverage risk**

Although the Fund has no current intention to do so, the Fund is authorized and reserves the flexibility to utilize leverage through the issuance of preferred shares and/or borrowings, including the issuance of debt securities. In the event that the Fund determines in the future to utilize investment leverage, there can be no assurance that such a leveraging strategy will be successful during any period in which it is employed. Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of net asset value and market price of the Common Shares and the risk that fluctuations in distribution rates on any preferred shares and costs of borrowings may affect the return to Common Shareholders. To the extent the income derived from investments purchased with funds received from leverage exceeds the cost of leverage, the Fund's distributions may be greater than if leverage had not been used. Conversely, if the income from the investments purchased with such funds is not sufficient to cover the cost of leverage, the amount available for distribution to Common Shareholders will be less than if leverage had not been used. In the latter case, Eaton Vance, in its best judgment, may nevertheless determine to maintain the Fund's leveraged position if it deems such action to be appropriate. The costs of an offering of preferred shares and/or a borrowing program would be borne by Common Shareholders and consequently would result in a reduction of the net asset value of Common Shares. In addition, as discussed under "Management of the Fund," the fee paid to Eaton Vance is calculated on the basis of the Fund's average daily gross assets, including proceeds from the issuance of preferred shares and/or borrowings, so the fees will be higher when leverage is utilized. In this regard, holders of preferred shares do not bear the investment advisory fee. Rather, Common Shareholders bear the portion of the investment advisory fee attributable to the assets purchased with the proceeds of the preferred shares offering, which means that Common Shareholders effectively bear the entire advisory fee.

Financial leverage may also be achieved through the purchase of certain derivative instruments. The Fund's use of derivative instruments exposes the Fund to special risks. See "Investment Objectives, Policies and Risks—Additional Investment Practices" and "Investment Objectives, Policies, and Risks—Risk Considerations."

### **Technology risk**

The technology industries can be significantly affected by obsolescence of existing technology, short product cycles, falling prices and profits, competition from new market entrants, and general economic conditions.

### **Management risk**

The Fund is subject to management risk because it is an actively managed portfolio. Eaton Vance, Parametric and the individual portfolio managers will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

### **Market disruption**

Instability in the Middle East, the wars in Afghanistan, Iraq and Libya, geopolitical tensions elsewhere and terrorist attacks in the U.S. and around the world have resulted in market volatility and may have long-term effects on the U.S. and worldwide financial markets and may cause further economic uncertainties in the U.S. and worldwide. The Fund cannot predict the effects of significant future events on the global economy and securities markets. A similar disruption of the financial markets could impact interest rates, auctions, secondary trading, ratings, credit risk, inflation and other factors relating to the Common Shares.

### **Anti-takeover provisions**

Edgar Filing: Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund - Form N-2/A

The Fund's Agreement and Declaration of Trust includes provisions that could have the effect of limiting the ability of other persons or entities to acquire control of the Fund or to change the composition of its Board. See "Description of Capital Structure -- Anti-Takeover Provisions in the Declaration of Trust."

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 18Prospectus dated [\_\_\_\_], 2018

Summary of Fund Expenses

The purpose of the table below is to help you understand all fees and expenses that you, as a holder of Common Shares (“Common Shareholder”), would bear directly or indirectly. The table shows Fund expenses as a percentage of net assets attributable to Common Shares<sup>(1)</sup> for the year ended December 31, 2017.

Common Shareholder transaction expenses	
Sales load paid by you (as a percentage of offering price)	-- <sup>(1)</sup>
Offering expenses (as a percentage of offering price)	None <sup>(2)</sup>
Dividend reinvestment plan fees	\$5.00 <sup>(3)</sup>
	Percentage of net assets attributable to Common Shares <sup>(4)</sup>
Annual expenses	
Investment adviser fee	1.00% <sup>(5)</sup>
Other expenses	<u>0.09%</u>
Total annual Fund operating expenses	1.09%

<sup>(1)</sup> If Common Shares are sold to or through underwriters, the Prospectus Supplement will set forth any applicable sales load.

The Adviser will pay the expenses of the Offering (other than the applicable commissions); therefore, Offering expenses are not included in the Summary of Fund Expenses. Offering expenses generally include, but are not limited to, the preparation, review and filing with the SEC of the Fund’s registration statement (including this

<sup>(2)</sup> Prospectus and the Statement of Additional Information), the preparation, review and filing of any associated marketing or similar materials, costs associated with the printing, mailing or other distribution of the Prospectus, Statement of Additional Information and/or marketing materials, associated filing fees, NYSE listing fees, and legal and auditing fees associated with the Offering.

<sup>(3)</sup> You will be charged a \$5.00 service charge and pay brokerage charges if you direct the plan agent to sell your Common Shares held in a dividend reinvestment account.

<sup>(4)</sup> Stated as a percentage of average net assets attributable to Common Shares for the year ended December 31, 2017.

The adviser fee paid by the Fund to the Adviser is based on the average daily gross assets of the Fund, including all

<sup>(5)</sup> assets attributable to any form of investment leverage that the Fund may utilize. Accordingly, if the Fund were to utilize investment leverage in the future, the adviser fee will increase as a percentage of net assets.

EXAMPLE

The following Example illustrates the expenses that Common Shareholders would pay on a \$1,000 investment in Common Shares, assuming (i) total annual expenses of 1.09% of net assets attributable to Common Shares in years 1 through 10; (ii) a 5% annual return; and (iii) all distributions are reinvested at NAV:

1 Year	3 Years	5 Years	10 Years
\$11	\$35	\$60	\$133

The above table and example and the assumption in the example of a 5% annual return are required by regulations of the SEC that are applicable to all investment companies; the assumed 5% annual return is not a prediction of, and does not represent, the projected or actual performance of the Fund’s Common Shares. For more complete descriptions of certain of the Fund’s costs and expenses, see “Management of the Fund.” In addition, while the example assumes reinvestment of all dividends and distributions at NAV, participants in the Fund’s dividend reinvestment plan may receive Common Shares purchased or issued at a price or value different from NAV. See “Distributions” and “Dividend Reinvestment Plan.” The example does not include sales load or estimated offering costs, which would cause the expenses shown in the example to increase.

**The example should not be considered a representation of past or future expenses, and the Fund's actual expenses may be greater or less than those shown. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.**

(1) Computed using average shares outstanding.

Returns are historical and are calculated by determining the percentage change in net asset value or market value (2) with all distributions reinvested. Distributions are assumed to be reinvested at prices obtained under the Fund's dividend reinvestment plan.

(3) Excludes the effect of custody fee credits, if any, of less than 0.005%. Effective September 1, 2015, custody fee credits, which were earned on cash deposit balances, were discontinued by the custodian.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 21 Prospectus dated [\_\_\_\_], 2018

TRADING AND NAV INFORMATION

The Fund’s common shares have traded both at a premium and a discount to NAV. The Fund cannot predict whether its shares will trade in the future at a premium or discount to NAV. The provisions of the 1940 Act generally require that the public offering price of common shares (less any underwriting commissions and discounts) must equal or exceed the NAV per share of a company’s common stock (calculated within 48 hours of pricing). The issuance of common shares may have an adverse effect on prices in the secondary market for the Fund’s common shares by increasing the number of common shares available, which may put downward pressure on the market price for the Fund’s common shares. Shares of common stock of closed-end investment companies frequently trade at a discount from NAV. See “Risk Considerations - Discount from or Premium to NAV.”

In addition, the Fund’s Board of Trustees has authorized the Fund to repurchase up to 10% of its outstanding common shares (as of the date of such authorization) in open-market transactions at a discount to NAV. The repurchase program does not obligate the Fund to purchase a specific amount of shares. The results of the repurchase program are disclosed in the Fund’s annual and semi-annual reports to shareholders. See “Description of Capital Structure – Repurchase of Common Shares and Other Discount Measures.”

The following table sets forth for each of the periods indicated the high and low closing market prices for Common Shares on the NYSE, and the corresponding NAV per share and the premium or discount to NAV per share at which the Fund’s Common Shares were trading as of such date.

Fiscal Quarter Ended	Market Price		NAV per Share on Date of Market Price High and Low		NAV Premium/(Discount) on Date of Market Price High and Low	
	High	Low	High	Low	High	Low
3/31/2018	12.50	11.36	12.00	10.95	4.17%	3.74%
12/31/2017	12.03	11.67	11.67	11.44	3.08%	2.01%
9/30/2017	11.92	11.37	11.59	11.36	2.85%	0.09%
6/30/2017	11.67	10.88	11.42	11.05	2.19%	(1.54)%
3/31/2017	11.02	10.20	11.02	10.75	0.00%	(5.12)%
12/31/2016	11.01	10.07	11.04	10.71	(0.27)%	(5.98)%
9/30/2016	11.15	10.30	11.18	10.77	(0.27)%	(4.36)%
6/30/2016	10.71	10.03	11.23	10.37	(4.63)%	(3.28)%
3/31/2016	11.21	9.28	11.40	10.47	(1.67)%	(11.37)%

The last reported sale price, NAV per share and percentage premium/(discount) to NAV per share of the Common Shares as of April 3, 2018 were \$11.47, \$11.10 and 3.33%, respectively. As of April 3, 2018, the Fund had 106,765,163 Common Shares outstanding and net assets of the Fund were \$1,184,855,004.

The following table provides information about our outstanding Common Shares as of April 3, 2018:

Title of Class	Amount Authorized	Amount Held by the Fund for its Account	Amount Outstanding
Common Shares Unlimited		0	106,765,163
The Fund			

The Fund is a diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on March 30, 2005 pursuant to an Agreement and Declaration of Trust governed by the laws of The Commonwealth of Massachusetts. The Fund’s principal office is located at Two

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 22Prospectus dated [\_\_\_\_], 2018

## Use of Proceeds

Subject to the remainder of this section, and unless otherwise specified in a Prospectus Supplement, the Fund currently intends to invest substantially all of the net proceeds of any sales of Common Shares pursuant to this Prospectus in accordance with the Fund's investment objectives and policies. The Fund anticipates that it will be possible to invest the proceeds of the Offering consistent with the Fund's investment objective and policies as soon as practicable, but in no event, assuming normal market conditions, later than three months after the receipt thereof. Pending such investment, the proceeds may be invested in short-term money market instruments, securities with remaining maturities of less than one year, cash and/or cash equivalents. A delay in the anticipated use of proceeds could lower returns and reduce the Fund's distribution to Common Shareholders or result in a distribution consisting principally of a return of capital.

## INVESTMENT OBJECTIVES, POLICIES AND RISKS

### INVESTMENT OBJECTIVES

The Fund's primary investment objective is to provide current income and gains, with a secondary objective of capital appreciation. In pursuing its investment objectives, the Fund will evaluate returns on an after-tax basis, seeking to minimize and defer shareholder federal income taxes.

Under normal market conditions, the Fund's investment program consists primarily of (1) owning a diversified portfolio of common stocks, a segment of which (the "U.S. Segment") holds stocks of U.S. issuers and a segment of which (the "International Segment") holds stocks of non-U.S. issuers, and (2) selling on a continuous basis call options on broad-based domestic stock indices on at least 80% of the value of the U.S. Segment and call options on broad-based foreign country and/or regional stock indices on at least 80% of the value of the International Segment.

### PRIMARY INVESTMENT POLICIES

#### General composition of the Fund

Under normal market conditions, the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers. The U.S. Segment is expected to represent approximately 50% to 60% of the value of the Fund's stock portfolio and the International Segment is expected to represent approximately 40% to 50% of the Fund's stock portfolio. These percentages may vary significantly over time depending upon the Adviser's evaluation of market circumstances and other factors. Under normal market conditions, the Fund invests a substantial portion of its total assets in the securities of non-U.S. issuers, including American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") and European Depositary Receipts ("EDRs"). An issuer will be considered to be located outside of the United States if it is domiciled in, derives a significant portion of its revenue from, or its primary trading venue is outside the U.S. Securities of an issuer domiciled outside of the United States may trade in the form of depositary receipts. The Fund may invest up to 15% of its total assets in securities in emerging markets issuers.

For the U.S. Segment, the Fund intends to write index call options on the Standard & Poor's 500 Composite Stock Price Index® (the "S&P 500") and the NASDAQ-100 Index® (the "NASDAQ-100"). For the International Segment, the Fund intends to write index call options on broad-based foreign country and/or regional stock indices that the Adviser believes are collectively representative of the International Segment. Over time, the indices on which the Fund writes call options may vary as a result of changes in the availability and liquidity of various index options, the Adviser's evaluation of equity market conditions and other factors. Due to tax considerations, the Fund intends to limit the overlap between its stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis. The Fund normally expects that its assets will be invested

across a broad range of industries and market sectors. The Fund may not invest 25% or more of its total assets in the securities of issuers in any single industry or group of industries. The Fund may invest a portion of its assets in stocks of mid-capitalization companies. Eaton Vance generally considers mid-capitalization companies to be those companies having market capitalizations within the range of capitalizations for the S&P MidCap 400 Index (“S&P MidCap 400”). As of March 29, 2018, the median market capitalization of companies in the S&P MidCap 400 was approximately \$4.0 billion.

The Fund seeks to generate current earnings in part by employing an options strategy of writing (selling) index call options. Under normal market conditions, at least 80% of the value of the Fund’s total assets is subject to written index call options. Writing index call options involves a tradeoff between the option premiums received and reduced participation in potential future price appreciation of the Fund’s portfolio of common stocks. The Fund seeks to generate current earnings from option premiums and, to a lesser extent, from dividends on stocks held.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 23 Prospectus dated [\_\_\_\_], 2018

The Fund generally intends to sell stock index call options that are exchange-listed and “European style,” meaning that the options may be exercised only on the expiration date of the option. To implement its options program most effectively, the Fund may also sell index options that trade in over-the-counter (“OTC”) markets. Index options differ from options on individual securities in that index options (i) typically are settled in cash rather than by delivery of securities (meaning the exercise of an index option does not involve the actual purchase or sale of securities) and (ii) reflect price fluctuations in a group of securities or segments of the securities market rather than price fluctuations in a single security. Generally, the Fund intends to sell call options that are slightly “out-of-the-money” (i.e., the exercise price generally will be slightly above the current level of the applicable index when the option is sold). The Fund may also sell index options that are more substantially “out-of-the-money.” Such options that are more substantially “out-of-the-money” provide greater potential for the Fund to realize capital appreciation on its portfolio stocks but generally would pay a lower premium than options that are slightly “out-of-the-money.”

As the seller of index call options, the Fund will receive cash (the premium) from options purchasers. The purchaser of an index option has the right to receive from the option seller any appreciation in the value of the applicable index over a fixed price (the exercise price) as of a specified date in the future (the option valuation date). The exercise-settlement value of the applicable index is generally calculated based on opening sales prices of the component index stocks on the option valuation date, which is the last business day before the expiration date. By writing index call options, the Fund will, in effect, sell the potential appreciation in the value of the applicable index above the exercise price in exchange for the option premium received. If, at expiration, an index call option sold by the Fund is exercised, the Fund will pay the purchaser the difference between the cash value of the applicable index and the exercise price of the option. The premium, the exercise price and the market value of the applicable index will determine the gain or loss realized by the Fund as the seller of the index call option.

The Fund expects to maintain high turnover in index call options, based on the Adviser’s intent to sell index call options on at least 80% of the value of its total assets and the Fund’s initial expectation to roll forward its options positions approximately every one to three months. For its stock holdings, the Fund’s annual portfolio turnover rate is expected to exceed that of the indices on which the Fund writes call options due to turnover in connection with the Fund’s tax loss harvesting, gain matching, dividend capture and other strategies. On an overall basis, the Fund’s annual turnover rate may exceed 100%. A high turnover rate (100% or more) necessarily involves greater trading costs to the Fund.

The Fund’s policies, under normal market conditions, that the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers and that at least 80% of the value of the Fund’s total assets is subject to written index call options are non-fundamental policies and may, be changed by the Fund’s Board of Trustees (the “Board”) without Common Shareholder approval following the provision of 60 days’ prior written notice to Common Shareholders.

In implementing the Fund’s investment strategy, the Adviser and Sub-Adviser intend to employ a variety of techniques and strategies designed to minimize and defer the federal income taxes incurred by shareholders in connection with their investment in the Fund as described below.

During unusual market conditions, the Fund may invest up to 100% of its assets in cash or cash equivalents temporarily, which may be inconsistent with its investment objectives, principal strategies and other policies.

The S&P 500 is an unmanaged index of 500 stocks maintained and published by Standard & Poor’s that is market-capitalization weighted and generally representative of the performance of larger stocks traded in the United States. The NASDAQ-100 is an unmanaged index maintained by the Nasdaq Stock Market, Inc. (“Nasdaq”) that includes 100 of the largest domestic and international non-financial companies listed on the Nasdaq based upon market capitalization. The NASDAQ-100 reflects companies across a range of major industry groups, including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. Compared to the

S&P 500, the NASDAQ-100 has a substantially higher weighting in technology oriented industries. It is not possible to invest directly in an index.

**Investment strategy**

Eaton Vance is responsible for managing the Fund’s overall investment program and executing the Fund’s options strategy. Eaton Vance is also responsible for providing research support to the Sub-Adviser and supervising the performance of the Sub-Adviser. Parametric is responsible for structuring and managing the Fund’s common stock portfolio, including tax-loss harvesting (i.e., periodically selling positions that have depreciated in value to realize capital losses that can be used to offset capital gains realized by the Fund) and other tax-management techniques, relying in part on the fundamental research and analytical judgments of the Adviser. Parametric has developed specialized programs and systems that are designed to provide for efficient implementation of the Fund’s strategies. The Fund’s investments are actively managed, and securities may be bought or sold on a daily basis. See “Management of the Fund.”

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 24Prospectus dated [\_\_\_\_], 2018

The Adviser believes that a strategy of owning a portfolio of common stocks and selling covered call options (a “buy-write strategy”) can provide current income and gains and attractive risk-adjusted returns. Compared to selling call options on individual stocks, the Adviser believes that selling index call options can achieve better tax and transactional efficiency because exchange-listed options on broad-based securities indices may qualify as “section 1256 contracts” as defined in the Internal Revenue Code of 1986, as amended (the “Code”), subject to favorable tax treatment and because the markets for index options may be deeper and more liquid than options on individual stocks.

Eaton Vance further believes that a strategy of owning a portfolio of domestic and foreign common stocks in conjunction with writing index call options should generally provide returns that are superior to owning the same stocks without an associated call option writing program under three different stock market scenarios: (1) down-trending equity markets; (2) flat market conditions; and (3) moderately rising equity markets. In the Adviser’s opinion, only in more strongly rising equity markets would the buy-write strategy generally be expected to underperform the stock-only portfolio. For these purposes, the Adviser considers more strongly rising equity market conditions to exist whenever the current annual rate of return of U.S. or non-U.S. common stocks exceeds the long-term historical average of global stock market returns. The Adviser considers moderately rising equity market conditions to exist whenever current annual returns on U.S. and non-U.S. common stocks are positive, but do not exceed the long-term historical average of global stock market returns.

To avoid being subject to the “straddle rules” under federal income tax law, the Fund intends to limit the overlap between its stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis. Under the “straddle rules,” “offsetting positions with respect to personal property” generally are considered to be straddles. In general, investment positions will be offsetting if there is a substantial diminution in the risk of loss from holding one position by reason of holding one or more other positions. The Fund expects that the index call options it writes will not be considered straddles because its stock holdings will be sufficiently dissimilar from the components of the indices on which it has outstanding options positions under applicable guidance established by the IRS. Under certain circumstances, however, the Fund may enter into options transactions or certain other investments that may constitute positions in a straddle. Parametric will consider a variety of factors in constructing and maintaining the Fund’s stock portfolio, including, but not limited to, stock performance ratings as determined by the Adviser, stock dividend yields, overlap between the Fund’s stock holdings and the indices on which it has outstanding options positions, projected tracking of the U.S. Segment and the International Segment versus their respective benchmarks, realization of loss harvesting opportunities and other tax management considerations. The Adviser’s evaluation of the future performance potential of individual stocks will be one among several considerations in portfolio construction and will not, on a standalone basis, be determinative of portfolio construction. The Adviser’s stock ratings will be based primarily on fundamental research.

The Fund’s index option strategy is designed to produce current cash flow from option premiums and to moderate the volatility of the Fund’s returns. This index option strategy is of a hedging nature and is not designed to speculate on equity market performance. The Adviser believes that the Fund’s index option strategy will moderate the volatility of the Fund’s returns because the option premiums received will help to mitigate the impact of downward price movements in the stocks held by the Fund, while the Fund’s obligations under index calls written will effectively limit the Fund’s ability to participate in upward price movements in portfolio stocks beyond certain levels. The Adviser expects to follow a primary options strategy of selling index call options with a remaining maturity of between approximately one and three months and maintaining its short call options positions until approximately their expiration date, at which time replacement call option positions with a remaining maturity within this range are written. The Adviser does not intend to sell index call options representing amounts greater than the value of the Fund’s common stock portfolio (i.e., take a ‘naked’ position).

The foregoing policies relating to investment in common stocks and index options writing are the Fund’s primary investment policies. In addition to its primary investment policies, the Fund may invest to a limited extent in other types of securities and engage in certain other investment practices.

In addition to writing index call options, the Fund may write call options on up to 20% of the value of its total assets on futures contracts based upon broad-based securities indices. The Fund's use of such options on index futures would be substantially similar to its use of options directly on indices. The Fund may also invest up to 20% of its total assets in other derivative instruments acquired for hedging, risk management and investment purposes (to gain exposure to securities, securities markets, markets indices and/or currencies consistent with its investment objectives and policies), provided that no more than 10% of the Fund's total assets may be invested in such derivative instruments acquired for non-hedging purposes. Derivative instruments may be used in order to help protect against a decline in the value of its portfolio securities. Derivative instruments may also be used by the Fund to enhance returns or as a substitute for the purchase or sale of securities.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 25 Prospectus dated [\_\_\_\_], 2018

## **Tax-managed investing**

Taxes are a major influence on the net after-tax returns that investors receive on their taxable investments. There are five potential sources of returns for a Common Shareholder: (1) appreciation or depreciation in the value of the Common Shares; (2) distributions of qualified dividend income; (3) distributions of other investment income and net short-term capital gains; (4) distributions of long-term capital gains (and long-term capital gains retained by the Fund); and (5) distributions of return of capital. These different sources of investment returns are subject to widely varying federal income tax treatment. Distributions of other investment income (i.e., non-qualified dividend income) and net realized short-term gains are taxed currently as ordinary income, at rates as high as 39.6%. Distributions of qualified dividend income and net realized long-term gains (whether distributed or retained by the Fund) are taxed at the rates applicable to long-term capital gain (currently at a maximum rate of 20% plus a 3.8% Medicare contribution tax for individuals and other noncorporate taxpayers). Generally, return from appreciation and depreciation in the value of Common Shares and distributions characterized as return of capital result in adjustment of a Common Shareholder's federal income tax basis in his or her Common Shares and accordingly are not taxable until the Common Shareholder sells his or her Common Shares. Upon sale, a capital gain or loss equal to the difference between the net proceeds of such sale and the Common Shareholder's adjusted tax basis is realized. Capital gain is considered long-term and is taxed at the rates applicable to long-term capital gain if the Common Shareholder has held his or her shares more than one year. Otherwise, capital gain is considered short-term gain and is taxed accordingly. The after-tax returns achieved by a Common Shareholder will be substantially influenced by the mix of different types of returns subject to varying federal income tax treatment.

In implementing the Fund's investment strategy, the Adviser and Sub-Adviser intend to employ a variety of techniques and strategies designed to skew the mix of Fund returns to the types of returns that are most advantageously taxed, thereby seeking to minimize and defer the federal income taxes incurred by Common Shareholders in connection with their investment in the Fund. Such techniques and strategies are expected to include: (1) employing a call options strategy consisting primarily of selling index call options that qualify for treatment as "section 1256 contracts", on which capital gains and losses are generally treated as 60% long-term and 40% short-term, regardless of holding period; (2) limiting the overlap between the Fund's stock portfolio holdings (and any subset thereof) and each index on which it has outstanding options positions to less than 70% on an ongoing basis so that the Fund's stock portfolio holdings and index call options are not subject to the "straddle rules;" (3) engaging in a systematic program of tax-loss harvesting in the Fund's stock portfolio, periodically selling stock positions that have depreciated in value to realize capital losses that can be used to offset capital gains realized by the Fund; and (4) managing the sale of appreciated stock positions so as to minimize the Fund's net realized short-term capital gains in excess of net realized long-term capital losses. The Fund seeks to offset the 40% of gains on index options treated as short-term against Fund expenses and realized losses on other investments allocable against short-term gains. When an appreciated security is sold, the Fund intends to select for sale the share lots resulting in the most favorable tax treatment, generally those with holding periods sufficient to qualify for long-term capital gains treatment that have the highest cost basis.

In addition, the Fund seeks to earn and distribute "qualified dividend income." Qualified dividend income received by an individual is taxed at the rates applicable to long-term capital gain (currently at a maximum rate of 20% plus a 3.8% Medicare contribution tax). In order for a dividend received by Fund shareholders to be qualified dividend income, the Fund must meet holding period and other requirements with respect to the dividend-paying stock in its portfolio and the shareholder must meet holding period and other requirements with respect to the Fund's shares. A dividend will not be treated as qualified dividend income (at either the Fund or shareholder level) (1) if the dividend is received with respect to any share of stock held for fewer than 61 days during the 121-day period beginning at the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend (or, in the case of certain preferred stock, 91 days during the 181-day period beginning 90 days before such date), (2) to the extent that the recipient is under an obligation (whether pursuant to a short sale or otherwise) to make related

payments with respect to positions in substantially similar or related property, (3) if the recipient elects to have the dividend income treated as investment interest, or (4) if the dividend is received from a foreign corporation that is (a) not eligible for the benefits of a comprehensive income tax treaty with the U.S. (with the exception of dividends paid on stock of such a foreign corporation readily tradable on an established securities market in the U.S.) or (b) treated as a passive foreign investment company. Payments in lieu of dividends, such as payments pursuant to securities lending arrangements, also do not qualify to be treated as qualified dividend income. In general, distributions of investment income reported by the Fund as derived from qualified dividend income will be treated as qualified dividend income by a shareholder taxed as an individual provided the shareholder meets the holding period and other requirements described above with respect to the Fund's shares.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 26Prospectus dated [\_\_\_\_], 2018

The Fund may seek to enhance the level of tax-advantaged dividend income it receives by emphasizing higher-yielding stocks in its stock portfolio and by engaging in dividend capture trading. In a dividend capture trade, the Fund sells a stock on or shortly after the stock's ex-dividend date and uses the sale proceeds to purchase one or more other stocks that are expected to pay dividends before the next dividend payment on the stock being sold. Through this practice, the Fund may receive more dividend payments over a given time period than if it held a single stock. In order for dividends received by the Fund to qualify for favorable tax treatment, the Fund must comply with the holding period and other requirements set forth in the preceding paragraph. By complying with applicable holding period and other requirements while engaging in dividend capture trading, the Fund may be able to enhance the level of tax-advantaged dividend income it receives because it will receive more dividend payments qualifying for favorable treatment during the same time period than if it simply held portfolio stocks. The use of dividend capture trading strategies will expose the Fund to increased trading costs and potentially higher short-term gain or loss.

To seek to protect against price declines in securities holdings with large accumulated gains, the Fund may use various hedging techniques (such as the sale of futures contracts on stocks and stock indices and options thereon, equity swaps, covered short sales and forward sales of stocks). By using these techniques rather than selling appreciated securities, the Fund can, within certain limitations, reduce its exposure to price declines in the securities without realizing substantial capital gains under current tax law. Derivative instruments may also be used by the Fund to enhance returns or as a substitute for the purchase or sale of securities. As a general matter, dividends received on hedged stock positions are characterized as ordinary income and are not eligible for favorable tax treatment. Dividends received on securities with respect to which the Fund is obligated to make related payments (pursuant to short sales or otherwise) will be treated as fully taxable ordinary income (i.e., income other than tax-advantaged qualified dividend income). In addition, use of derivatives may give rise to short-term capital gains and other income that would not qualify for favorable tax treatment. As indicated above, in addition to writing index call options, the Fund may write call options on up to 20% of the value of its total assets on futures contracts based upon broad-based securities indices. The Fund's use of such options on index futures would be substantially similar to its use of options directly on indices. The Fund may also invest up to 20% of its total assets in other derivative instruments acquired for hedging, risk management and investment purposes (to gain exposure to securities, securities markets, markets indices and/or currencies consistent with its investment objectives and policies), provided that no more than 10% of the Fund's total assets may be invested in such derivative instruments acquired for non-hedging purposes.

Options on broad-based equity indices that trade on a national securities exchange registered with the Securities and Exchange Commission (the "SEC") or a domestic board of trade designated as a contract market by the Commodity Futures Trading Commission (the "CFTC") generally qualify for treatment as "section 1256 contracts." Options on broad-based equity indices that trade on other exchanges, boards of trade or markets designated by the U.S. Secretary of Treasury also qualify for treatment as "section 1256 contracts." Because only a small number of exchanges, boards and markets outside the United States have to date received the necessary designation, most foreign-traded stock index options do not currently qualify for treatment as "section 1256 contracts." With respect to the International Segment, the Fund generally intends to sell options on broad-based foreign country and/or regional stock indices that are listed for trading in the United States or which otherwise qualify as "section 1256 contracts." Options on foreign indices that are listed for trading in the United States or which otherwise qualify as "section 1256 contracts" may trade in substantially lower volumes and with substantially wider bid-ask spreads than other options contracts on the same or similar indices that trade on other markets outside the United States. To implement its options program most effectively, the Fund may sell index options that do not qualify as "section 1256 contracts." Gain or loss on index options not qualifying as "section 1256 contracts" would be realized upon disposition, lapse or settlement of the positions and would be treated as short-term gain or loss.

### **Common stocks**

Under normal market conditions, the Fund invests at least 80% of its total assets in a diversified portfolio of common stocks of domestic and foreign issuers. Common stock represents an equity ownership interest in the issuing

corporation. Holders of common stock generally have voting rights in the issuer and are entitled to receive common stock dividends when, as and if declared by the corporation's board of directors. Common stock normally occupies the most subordinated position in an issuer's capital structure. Returns on common stock investments consist of any dividends received plus the amount of appreciation or depreciation in the value of the stock.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 27 Prospectus dated [\_\_\_\_], 2018

Although common stocks have historically generated higher average returns than fixed-income securities over the long term and particularly during periods of high or rising concerns about inflation, common stocks also have experienced significantly more volatility in returns and may not maintain their real value during inflationary periods. An adverse event, such as an unfavorable earnings report, may depress the value of a particular common stock held by the Fund. Also, the prices of common stocks are sensitive to general movements in the stock market and a drop in the stock market may depress the price of common stocks to which the Fund has exposure. Common stock prices fluctuate for many reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant stock market, or when political or economic events affecting the issuers occur. In addition, common stock prices may be sensitive to rising interest rates, as the costs of capital rise and borrowing costs increase.

### **Foreign securities**

The Fund will have substantial exposure to foreign securities. The value of foreign securities is affected by changes in currency rates, foreign tax laws (including withholding tax), government policies (in this country or abroad), relations between nations and trading, settlement, custodial and other operational risks. In addition, the costs of investing abroad are generally higher than in the United States, and foreign securities markets may be less liquid, more volatile and less subject to governmental supervision than markets in the United States. Foreign investments also could be affected by other factors not present in the United States, including expropriation, armed conflict, confiscatory taxation, lack of uniform accounting and auditing standards, less publicly available financial and other information and potential difficulties in enforcing contractual obligations. As an alternative to holding foreign-traded securities, the Fund may invest in dollar-denominated securities of foreign companies that trade on U.S. exchanges or in the U.S. over-the-counter market (including depositary receipts, which evidence ownership in underlying foreign securities). Dividends received with respect to stock of a foreign corporation may qualify for the reduced rates of federal income taxation applicable to qualified dividend income only if such corporation satisfies the requirements to be a "qualified foreign corporation."

Because foreign companies are not subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to U.S. companies, there may be less publicly available information about a foreign company than about a domestic company. Volume and liquidity in most foreign debt markets are less than in the United States and securities of some foreign companies are less liquid and more volatile than securities of comparable U.S. companies. There is generally less government supervision and regulation of securities exchanges, broker-dealers and listed companies than in the United States. Mail service between the United States and foreign countries may be slower or less reliable than within the United States, thus increasing the risk of delayed settlements of portfolio transactions or loss of certificates for portfolio securities. Payment for securities before delivery may be required. In addition, with respect to certain foreign countries, there is the possibility of expropriation or confiscatory taxation, political or social instability, or diplomatic developments, which could affect investments in those countries. Moreover, individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position. Foreign securities markets, while growing in volume and sophistication, are generally not as developed as those in the United States, and securities of some foreign issuers (particularly those located in developing countries) may be less liquid and more volatile than securities of comparable U.S. companies.

American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs") may be purchased. ADRs, EDRs and GDRs are certificates evidencing ownership of shares of foreign issuers and are alternatives to purchasing directly the underlying foreign securities in their national markets and currencies. However, they continue to be subject to many of the risks associated with investing directly in foreign securities. These risks include foreign exchange risk as well as the political and economic risks of the underlying issuer's country.

ADRs, EDRs and GDRs may be sponsored or unsponsored. Unsponsored receipts are established without the participation of the issuer. Unsponsored receipts may involve higher expenses, they may not pass-through voting or other shareholder rights, and they may be less liquid.

### **Emerging markets**

The Fund may invest up to 15% of its total assets in securities of issuers located in emerging markets. The risks of foreign investments described above apply to an even greater extent to investments in emerging markets. The securities markets of emerging market countries are generally smaller, less developed, less liquid and more volatile than the securities markets of the United States and developed foreign markets. Disclosure and regulatory standards in many respects are less stringent than in the United States and developed foreign markets. There also may be a lower level of monitoring and regulation of securities markets in emerging market countries, and enforcement of existing regulations may be extremely limited. Many emerging market countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates have had and may continue to have very negative effects on the economies and securities markets of certain emerging market countries. Economies in emerging markets

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 28Prospectus dated [\_\_\_\_], 2018

generally are heavily dependent upon international trade and, accordingly, have been and may continue to be affected adversely by trade barriers, exchange controls, managed adjustments in relative currency values, and other protectionist measures imposed or negotiated by the countries with which they trade. The economies of these countries also have been and may continue to be adversely affected by economic conditions in the countries in which they trade. The economies of countries with emerging markets may also be predominantly based on only a few industries or dependent on revenues from particular commodities. In addition, custodial services and other costs relating to investment in foreign markets may be more expensive in emerging markets than in many developed foreign markets, which could reduce the Fund's income from such securities.

### **Index options generally**

The Fund will pursue its objectives in part by selling on a continuous basis index options on at least 80% of each of the U.S. Segment and the International Segment. Under normal market circumstances, at least 80% of the value of the Fund's total assets is subject to written index call options.

The Fund generally intends to sell index options that are exchange-listed and "European style," meaning that the options may be exercised only on the expiration date of the option. To implement its options program most effectively, the Fund may also sell index options that trade in OTC markets. Index options differ from options on individual securities in that index options (i) typically are settled in cash rather than by delivery of securities (meaning the exercise of an index option does not involve the actual purchase or sale of securities) and (ii) reflect price fluctuations in a group of securities or segments of the securities market rather than price fluctuations in a single security.

U.S. listed options contracts are originated and standardized by the OCC. Currently, United States listed index options are available on approximately 89 indexes, with new listings added periodically. In the United States, the Fund generally intends to sell index call options that are issued, guaranteed and cleared by the OCC. The Fund may also sell index call options in the U.S. and outside the U.S. that are not issued, guaranteed or cleared by the OCC, including OTC options. The Adviser believes that there exists sufficient liquidity in the index options markets to fulfill the Fund's requirements to implement its strategy.

To implement its options program most effectively, the Fund may sell index options that trade in OTC markets. Participants in these markets are typically not subject to credit evaluation and regulatory oversight as are members of "exchanged based" markets. By engaging in index option transactions in these markets, the Fund may take a credit risk with regard to parties with which it trades and also may bear the risk of settlement default. These risks may differ materially from those involved in exchange-traded transactions, which generally are characterized by clearing organization guarantees, daily marking-to-market and settlement, and segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from these protections, which in turn may subject the Fund to the risk that a counterparty will not settle a transaction in accordance with agreed terms and conditions because of a dispute over the terms of the contract or because of a credit or liquidity problem. Such "counterparty risk" is increased for contracts with longer maturities when events may intervene to prevent settlement. The ability of the Fund to transact business with any one or any number of counterparties, the lack of any independent evaluation of the counterparties or their financial capabilities, and the absence of a regulated market to facilitate settlement, may increase the potential for losses to the Fund.

### **Selling index call options**

The Fund's index option strategy is designed to produce current cash flow from options premiums and to moderate the volatility of the Fund's returns. This index option strategy is of a hedging nature, and is not designed to speculate on equity market performance.

As the seller of index call options, the Fund will receive cash (the premium) from the purchasers thereof. The purchaser of an index option has the right to any appreciation in the value of the applicable index over a fixed price (the exercise price) as of a specified date in the future (the option valuation date). Generally, the Fund intends to sell index call options that are slightly “out-of-the-money” (i.e., the exercise price generally will be slightly above the current level of the applicable index when the option is sold). The Fund may also sell index options that are more substantially “out-of-the-money.” Such options that are more substantially “out-of-the-money” provide greater potential for the Fund to realize capital appreciation on its portfolio stocks but generally would pay a lower premium than options that are slightly “out-of-the-money.” The Fund will, in effect, sell the potential appreciation in the value of the applicable index above the exercise price in exchange for the option premium received. If, at expiration, an index call option sold by the Fund is exercised, the Fund will pay the purchaser the difference between the cash value of the applicable index and the exercise price of the option. The premium, the exercise price and the market value of the applicable index will determine the gain or loss realized by the Fund as the seller of the index call option.

Eaton Vance Tax-Managed Global Buy-Write Opportunities Fund 29Prospectus dated [\_\_\_\_], 2018
