PRESS RELEASE

MARCO TRONCHETTI PROVERA AND CARLO BUORA ILLUSTRATE THE COMPANY'S 2003-2005

Edgar Filing: TELECOM ITALIA S P A - Form 6-K

STRATEGIC OBJECTIVES TO THE FINANCIAL COMMUNITY

Milan, 14 February 2003 - Marco Tronchetti Provera and Carlo Buora, respectively the Telecom Italia Group Chairman and CEO, are today presenting the Group's strategic objectives for the next three years (2003-2005) to the financial community.

Under these new strategic objectives, investments over the three-year period are forecast to range between 14 and 16 billion euros, essentially matching the targets set for 2002-2004 (16 billion euros).

Net financial borrowings are projected to be around 13 billion euros by the end of 2005. This further extends the debt reduction policy announced last year, which set a 2004 debt level target of below 15 billion euros.

Annual average growth rates for revenues (4 - 4.5%) and the gross operating result (5 - 5.5%) over the three-year period 2003-2005 are expected to sustain their 2002-2004 levels. Operating income is forecast to rise on average by 8 - 8.5% annually.

Free cash flow (gross operating result - capex +/- change to working capital) will register an improvement of around 30 billion euros as profitability and efficiency both improve. This compares with the 25 billion euro figure forecast for the three-year period 2002-2004.

The 2 billion euro efficiency gains target established for the three-year period 2002-2004 has been increased by a further 600 million euros. This will be achieved through the strict control of operating costs, a selective investment policy, a tight focus on leveraging synergies at Group level, and centralized provisioning.

The presentation will be available on the Web at www.telecomitalia.it/investor_relation.

Cumulative Telecom Italia Domestic Wireline investment over the three years 2003-2005 is planned to correspond to around 6,200 million euros. Of this sum, 80% will be innovation-based. The 2002-2004 plan called for the allocation of around 6,700 million euros.

Residential market broadband access connections will exceed 1.9 million during 2004, an increase of 0.5 million over the existing 1.4 million forecast. The broadband access target for year-end 2005 (residential, business and wholesale) is 3.5 million.

- Breakeven for TIM Brasil (at free cash flow level) by 2005

The 2002 results, income and financial objectives, domestic market share and international operations: these were the principal themes that Marco De Benedetti's, Chief Executive Officer of TIM, discussed in his address during the meeting with the financial community in Milan.

Among the 2002-2005 objectives the accumulated 2003-2005 free cash flow (GOP-Capex) amounting to euro 12 billion was especially highlighted. Revenues will increase at a compounded average growth rate (CAGR) of 5 - 6% for the domestic market and 7 - 8% for the Group. GOP is expected to grow at a CAGR of 5 - 6% in Italy and 8 - 9% for the Group as a whole.

The domestic investment plan forecast for the next three year period will amount to euro 3.7 billion of which 55% will be specifically earmarked to innovation. Furthermore, in terms of innovation, the growth in VAS revenues is forecasted to reach a CAGR of 30 - 40% per annum in the period 2002-2005.

In terms of profitability, the GOP/revenues ratio is forecasted to remain stable for the domestic market in the period 2002-2005.

As regards the international activities of TIM, particular attention was given to Brazil where, from 2003 to 2005 the overall amount of investments is forecasted to reach euro 1.2 billion. The breakeven in the Brazilian operations at the level of free cash flow will be achieved in 2005. In the same year TIM aims to reinforce its operations in the country by increasing its market share to 26% from the present quota of 16% in relation to the penetration of mobile telephony in Brazil, which is expected to reach 26% (at present 19%).

In his address, Marco De Benedetti, referring to the preliminary results already disclosed, underlined the Company's leadership in terms of innovation and value-added services. - Telecom Italia's ability to successfully roll out its UMTS networks and services and to realize the benefits of its investment in UMTS licenses and related capital expenditures;
