If "Yes" is marked, indicate below the file number assigned  
to the registrant in connection with Rule 12g3-2(b): 82- \_\_\_\_\_

**PRESS RELEASE**

**TELECOM ITALIA: 400 MILLION EURO FROM ORDERS FOR 2.5 MILLION INNOVATIVE  
TERMINALS**

*At the dealers convention in Barcelona, after the presentation of new convergent offers and devices, over 2.5 million innovative terminals were ordered, including UNICO the first fixed-mobile telephone in Europe which will be on the market from July*

*Milan, 30 May 2006* The first company in Europe to launch **UNICO**, Telecom Italia in Barcelona presented its new convergent offers for the summer, gathering orders for 2.5 million innovative terminals worth approximately 400 million euro.

**UNICO** is the fixed-mobile telephone, based on UMA technology, which functions as a multimedia cordless in the home, using the IP network, and as a GSM mobile phone outside. **UNICO** is one of the new convergent offers which integrate the most innovative technologies (voice, Internet and Mobile TV) and which Telecom Italia will offer beginning from June.

As well as **UNICO**, Telecom Italia will launch **TIM TV**, digital TV via mobile phones, with an offering of programmes that will initially include Canale 5, Italia 1, Retequattro, La7 and MTV, to which other content will be added in future.

Along with mobile TV and also beginning June, TIM will launch super-fast UMTS which, using HSDPA technology, will allow internet navigation and video, music and image downloads in quick time.

***UNICO : Telecom Italia s new fixed-mobile telephone***

With **15 euro a month** and an available ADSL line, UNICO permits calls from home to all fixed-line phones and TIM mobile phones without additional costs; outside the home, UNICO permits calls **at 0 cost** to two TIM number and one fixed-line number. In this way the customer is always assured of the most convenient tariff, while maintaining separate TIM and Telecom Italia billing. With UNICO, further, it is possible to receive and send email to wherever you happen to be. The first model, which will be on the market in July, will be the **Samsung SGH P200**.

***TIM TV : Telecom Italia launches digital TV on TIM mobile phones; from September the games of the football Serie A TIM championship and the Champions League***

Beginning from June, the free promotion for the entire summer TIM TV, the mobile digital television in DVB-H technology, with initial programming including Canale 5, Italia 1, Retequattro, La7 and MTV, with additional content to follow. As well, from September, it will include the football games of the Serie A TIM football championship and the Champions League. TIM TV will be available for a convenient monthly subscription beginning from the autumn.

The first digital mobile TV handset will be the **Samsung SGH P920**, equipped with a SIM Card which receives and unscrambles the digital television signal, also runs the Umts network, has a moveable screen to better watch TV and includes advanced multimedia functions (1.3 megapixel camera, mp3 music player, recorder, video player and Bluetooth technology).

Initially, the DVB-H signal will cover the main Italian cities, including Milan, and Lombardy, Turin and Rome, and will reach 70-75% of the population by the end of 2006. As already announced, Telecom Italia expects to have at least one million customers for its DVB-H television services by 2008.

***Super Umts: broadband reaches mobile phones with speeds up to 3 Megabits***

Beginning this summer, Umts will become super-fast: travelling at 1.8 Megabit per second, with the new mobile phones it will be possible to navigate on the internet and download videos, images and music in very quick time. Replaying a sequence from a football match, for example, will take only a few seconds. Further, from TIM's portal, it will be possible to obtain the main contents of Rosso Alice (news, sport, music, cinema and reality TV) with a single entry token of 20 euro cents (including VAT). The Super Umts, based on HSDPA (High Speed Downlink Packet Access) technology, will reach the main Italian cities and tourist destinations by the summer, with the aim of reaching 48% of the population by end year. By 2006, the network's speed will increase further, climbing from 1.8 to 3 Megabit per second.

Cautionary Statement for Purposes of the "Safe Harbor" Provision of the United States Private Securities Litigation Reform Act of 1995.

The Private Securities Litigation reform Act of 1995 provides a "safe harbor" for forward-looking statements. The Press Release included in this Form 6-K contains certain forward looking statements and forecasts reflecting management's current views with respect to certain future events. The ability of the Telecom Italia Group to achieve its projected results is dependant on many factors which are outside of management's control. Actual results may differ materially from those projected or implied in the forward-looking statements. Such forward-looking information involves risks and uncertainties that could significantly affect expected results and are based on certain key assumptions.

The following important factors could cause the Telecom Italia Group's actual results to differ materially from those projected or implied in any forward-looking statements:

- the continuing impact of increased competition in a liberalized market, including competition from global and regional alliances formed by other telecommunications operators in the core domestic fixed-line and wireless markets of the Telecom Italia Group;
- the ability of the Telecom Italia Group to introduce new services to stimulate increased usage of its fixed and wireless networks to offset declines in its fixed-line business due to the continuing impact of regulatory required price reductions, market share loss and pricing pressures generally;
- the ability of the Telecom Italia Group to achieve cost-reduction targets in the time frame established or to continue the process of rationalizing its non-core assets;
- the impact of regulatory decisions and changes in the regulatory environment;
- the impact of the slowdown in Latin American economies and the slow recovery of economies generally on the international business of the Telecom Italia Group focused on Latin America and on its foreign investments and capital expenditures;

## Edgar Filing: TELECOM ITALIA S P A - Form 6-K

- the continuing impact of rapid changes in technologies;
- the impact of political and economic developments in Italy and other countries in which the Telecom Italia Group operates;
- the impact of fluctuations in currency exchange and interest rates;
- Telecom Italia's ability to continue the implementation of its 2002-2004 Industrial Plan, including the rationalization of its corporate structure and the disposition of Telecom Italia's interests in various companies;
- the ability of the Telecom Italia Group to successfully achieve its debt reduction targets;
- Telecom Italia's ability to successfully roll out its UMTS networks and services and to realize the benefits of its investment in UMTS licenses and related capital expenditures;
- Telecom Italia's ability to successfully implement its internet strategy;
- the ability of the Telecom Italia Group to achieve the expected return on the significant investments and capital expenditures it has made in Latin America and in Europe;
- the amount and timing of any future impairment charges for Telecom Italia's licences, goodwill or other assets; and
- the impact of litigation or decreased mobile communications usage arising from actual or perceived health risks or other problems relating to mobile handsets or transmission masts.

The foregoing factors should not be construed as exhaustive. Due to such uncertainties and risks, readers are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof. Accordingly, there can be no assurance that the group will achieve its projected results.
