(09/30/06)

Twenty five years ago I took over the role of Chief Executive Officer of Ultrapar, with a view to construct a group of solid companies, committed to their customers, with highly qualified professional staff. As a consolidation of this process, from January 1st, 2007 I will be leaving the post of Chief Executive Officer of Ultrapar, which will be taken over by Mr. Pedro Wongtschowski, in order to dedicate myself exclusively to the role of Chairman of the Board. The new CEO will have the responsibility to continue to grow our businesses on a sustainable basis. This movement reinforces our commitment with the continuous improvement of our Corporate Governance.

Paulo G. A. Cunha CEO

Highlights

- Ø **The succession of Ultrapar's Chief Executive Officer** □ In a market communiqué published on October 16th, Ultrapar announced that Paulo G. A. Cunha, the company's current Chief Executive Officer, will be succeeded by Pedro Wongtschowski from January 1st, 2007. The appointment of Pedro Wongtschowski to this post represents the final consolidation of the professionalization process of Ultrapar, begun in 1984 and which now focuses basically on the sustainable growth of the group's businesses. Pedro Wongtschowski began his professional career at Oxiteno, where he is currently the Chief Executive Officer. In addition, he has been a member of the Executive Board of Ultrapar since 1985. After this succession, Paulo G. A. Cunha will act solely as Ultrapar's Chairman of the Board of Directors, a position he occupies together with his role as Chief Executive Officer since 1998. For the position of Chief Executive Officer at Oxiteno, Ultrapar has nominated João Benjamin Parolin, currently the sales director of that company.
- Ø **New ethylene supply arrangement and investment in expansion projects** □ On August 17th, Ultrapar announced the signing of a "Memorandum of Understanding", altering the ethylene supply contract between Braskem and Oxiteno and ruling new ethylene supply conditions up to 2021. The □Memorandum of Understanding□ foresees a 265,000 tons/year ethylene volume, an increase of 68,000 tons/year in relation to the previous contracted volume, entirely available from 2009. Oxiteno will already have access to an additional 13 thousand ton/year of ethylene in 2007 and 2008. With this additional ethylene, Ultrapar plans to expand its ethylene oxide and specialty chemicals production capacity at Oxiteno's unit in Camaçari, in the state of Bahia, with investments estimated at US\$ 90 million and startup scheduled for 2009. This expansion shall produce additional revenues of approximately US\$ 150 million/year when running at full capacity. The investment in the Camaçari is part of Oxiteno's expansion plan, with investments of US\$ 320 million from 2006 to 2009. This investment plan is already being implemented and includes the new fatty alcohol plant, the ethylene oxide production capacity expansion at Mauá plant and the specialty chemicals production capacity expansion, previously announced. When running at full capacity, these investments should increase Oxiteno's revenues by US\$ 350 million.

Ultrapar in the Macroeconomic Scenario

During the third quarter of 2006, the Brazilian economy continued its trend of moderate growth, in relation to 2005, benefiting from the increase in the disposable income of the Brazilian population and exports. However, this moderate growth was not distributed evenly across Brazil's various regions. While the states in the South and Central West, heavily dependent on agriculture, suffered from the appreciation in the Real and the consequent drop in economic activity, states with a strong mineral extraction industry showed higher growth as a result of external demand. In the retail commerce segment, growth was concentrated principally in the North and Northeast, driven by social and income transfer programs.

At Ultragaz, capturing the benefits arising from its distribution structure review was the main reason for the continued recovery in profitability, expressed in EBITDA/ton, which rose 11% and 69%, compared to 2Q06 and 3Q05, respectively. EBITDA at Ultragaz in 3Q06 amounted to R\$ 89 million, up 15% compared to 2Q06, and up 68% compared to the same period in 2005.

At Oxiteno, commercial initiatives and the development of new products and applications resulted in market share gains and an improvement in the sales mix - with a higher proportion of specialty chemicals and sales to the domestic market. These initiatives neutralized the negative effects of the rise in the cost of ethylene □ due to the increase in the oil price □ and the appreciation of the Real between the two periods. EBITDA at Oxiteno amounted to R\$ 59 million, in line with the EBITDA of R\$ 60 million in 3Q05, and up 27% on 2Q06.

Edgar Filing: ULTRAPAR HOLDINGS INC - Form 6-K

Ultracargo continued to focus efforts on improving its customer portfolio in the transport segment, concentrating on services with a higher aggregate value and discontinuing some operations. Consequently, despite an increase in operations at the Santos Terminal, EBITDA - which amounted to R\$ 9 million in 3Q06 - was negatively impacted by the additional expense of discontinuing certain operations.

In this context, Ultrapar reported in the 3Q06 consolidated EBITDA of R\$ 158 million, up 25% and 16% on 3Q05 and 2Q06, respectively, largely as a result of the management initiatives by the company, consolidating the resumption in growth. Net earnings amounted to R\$ 89 million, 32% higher than the net earnings in 3Q05, and in line with the net earnings reported in 2Q06.

- 3 -

Operational Performance

Ultragaz □ The Brazilian LPG market in 3Q06 was practically unchanged compared to the same period in 2005, with the continuing improvement in the Brazilian population disposable income being offset by the anticipation of demand buildup in 2Q06, as a result of the uncertainties related to the natural gas supply from Bolivia. Compared to 2Q06, the market experienced a 3% growth, due to the seasonally stronger sales in 3Q06. For the first nine months of this year, market growth amounted to 1%.

Ultragaz's sales volume in the bottled gas segment amounted to 281,000 tons, flat compared to 3Q05 and in line with market performance. In the bulk segment, there was a drop of 1,500 tons in the volume sold, due to the loss of a large industrial client reported in 2Q06. Ultragaz's total sales volume in 3Q06 amounted to 408,000 tons, down 0.5% on 3Q05 □ slightly lower than the performance of the market, as a result of the loss of the above mentioned industrial client.

Compared to 2Q06, Ultragaz's sales volume was up 4%, basically due to the seasonal difference between the two periods. In the first nine months of this year, Ultragaz's sales volume totaled 1,156,000 tons, stable versus the same period in 2005.

Oxitenó - Total sales volume in 3Q06 amounted to 149,000 tons, up 1% on 3Q05. Despite the modest growth in total sales volume, specific commercial initiatives taken by Oxitenó and the improved performance in certain segments of the economy resulted in expansion of 8% in the domestic market, generating a better geographical sales mix as well as an improved product mix. Sales volume in the domestic market totaled 109,000 tons, with the improvements spread

across the various segments served by Oxiteno, however with particular emphasis on the building and agrochemical sectors. In the international market, the volume sold was 14% lower than in 3Q05, due to the reduced availability of products as a result of the increased sales in the domestic market.

Compared to 2Q06, Oxiteno recorded an 11% increase in total volume, due to the seasonally stronger sales and the commercial initiatives of the company, which resulted in sales growth in 3Q06 in the domestic market. In the first nine months of this year, accumulated sales volume amounted to 413,000 tons, up 2% on the volume sold in 9M05, with volume expanding by 7% in the domestic market and retracting by 8% in the international market.

Ultracargo □ Average storage volumes at Ultracargo in 3Q06, measured in cubic meters, were 9% higher than in 3Q05, and up 5% on 2Q06, basically due to the increased capacity utilization at the Santos Terminal, inaugurated in July 2005. In the transport segment, total kilometrage traveled was down 26% and 12% compared to 3Q05 and 2Q06, respectively, as a result of the decision to discontinue certain lower aggregate value operations.

In the first nine months of this year, Ultracargo's average storage volume measured in cubic meters was up 10% compared to the same period in 2005, while average kilometrage traveled was down 14%.

Economic - Financial Performance

Net Sales and Services □ Ultrapar's net consolidated sales and services in 3Q06 amounted to R\$ 1,295 million, up 5% and 8% over 3Q05 and 2Q06, respectively. In the first nine months of this year, Ultrapar's net sales and services amounted to R\$ 3,590 million, up 1% on the same period in 2005.

Ultragaz □ Net sales and services at Ultragaz amounted to R\$ 817 million in 3Q06, up 6% over 3Q05, principally as a result of the benefits arising from the company's distribution structure review and the improved sales mix in the bulk segment. Compared to 2Q06, there was a 5% increase, basically as a result of the seasonal increase in sales volume. In the first nine months of 2006, Ultragaz's net sales amounted to R\$ 2,292 million, up 5% on the same period in 2005.

Oxiteno □ Oxiteno reported net sales and services of R\$ 435 million in 3Q06, up 6% over 3Q05, due principally to (i) a better sales mix, with an increased proportion of specialty chemicals and sales to the domestic market, (ii) the improvement in the international price of glycols, resulting from delays in the startup of new plants in the Middle-East and (iii) extraordinary revenues of R\$ 3.3 million. In comparison with 2Q06, net sales and services were up 17%, basically as a result of a seasonal increase in sales volume. In the first nine months of this year, net sales and services amounted to R\$ 1,162 million, down 7% on 9M05, basically as a result of the appreciation in the Brazilian Real between the two periods.

Ultracargo □ Ultracargo reported net sales and services of R\$ 55 million in 3Q06, down 10% and 6% compared to 3Q05 and 2Q06, respectively. Despite the increase in sales due to the increased volume handled at the Santos Terminal, there was a reduction in transport sales, due to the lower kilometrage traveled in 3Q06. In the first nine

months of this year, Ultracargo's net sales and services amounted to R\$ 172 million, almost unchanged on the same period a year earlier.

Cost of Sales and Services □ Ultrapar's cost of sales and services amounted to R\$ 1,030 million in 3Q06, up 2% and 7% on 3Q05 and 2Q06, respectively. For September year-to-date, Ultrapar's cost of sales and services amounted to R\$ 2,889 million, a 2% increase compared to the same period in 2005.

Ultragaz □ Ultragaz's cost of sales and services amounted to R\$ 673 million in 3Q06. Despite the salary increase as a result of the annual collective wage agreements, cost of sales and services remained practically unchanged as a result of the slight drop in volume and cost reduction initiatives associated with the company's distribution structure review. Compared to 2Q06, the cost of sales and services was up by 3%, due basically to the 4% increase in volume sold. In the first nine months of this year, the company's cost of sales and services amounted to R\$ 1,919 million, up 2% on the same period in 2005.

Oxiteno □ The cost of sales and services at Oxiteno amounted to R\$ 333 million, up 8% on 3Q05, basically as a function of (i) a 21% increase in the unit cost of ethylene in dollar terms and (ii) the increased volume of specialty chemicals, raising the cost of other raw materials, both partially offset by the 7% appreciation in the Real. Compared to 2Q06, there was an increase of 17% in the company's cost of sales and services due to an 11% rise in volume sold,

added to the 14% increase in the unit cost of ethylene in dollars. The cost of sales and services at Oxiteno over the first nine months of this year amounted to R\$ 897 million, 2% higher than in the same period in 2005.

Ultracargo □ The cost of services provided by Ultracargo amounted to R\$ 36 million in 3Q06, down 11% and 2% compared to 3Q05 and 2Q06, respectively, due to a drop in costs in the transport segment driven by the lower kilometrage traveled, partially offset by the cost increase related to the increased storage operations. In the first nine months of this year, the company's total cost of services provided was down 3% on the same period in 2005.

Sales, General and Administrative Expenses □ Ultrapar's sales, general and administrative expenses amounted to R\$ 154 million, up 9% and 5% compared to 3Q05 and 2Q06, respectively. For the first nine months of this year, sales, general and administrative expenses amounted to R\$ 442 million, an increase of 8% over the same period in 2005.

Ultragaz □ Sales, general and administrative expenses at Ultragaz totaled R\$ 83 million in 3Q06, up 13% over 3Q05, basically as a result of (i) salary increases arising from annual collective wage agreements and (ii) a higher level of variable remuneration, in line with the improvement in earnings. Compared to 2Q06, sales, general and administrative expenses were up 4%, basically because of higher sales expenses driven by the 4% increase in volume sold, as well as higher variable remuneration expenses. For the first nine months of this year, sales, general administrative expenses were 9% higher than in the same period in 2005.

Oxiteno □ Sales, general and administrative expenses at Oxiteno totaled R\$ 55 million in 3Q06, up 5% and 7% on 3Q05 and 2Q06, respectively. Administrative expenses amounted to R\$ 31 million, up 14% and 7% on 3Q05 and 2Q06, respectively, basically due to: (i) R\$ 1.8 million in extraordinary expenses and (ii) increased personnel expenses compared to 3Q05, as a result of salary adjustments arising from the annual collective wage agreement. Sales expenses were down 6% on 3Q05, due to a reduction in international freight expenses, driven by lower exports. In relation to 2Q06, there was an 8% increase in sales expenses, basically due to the 11% rise in volume sold - partially offset by the lower proportion of exports, as a percentage of total volume. For the first nine months of the year, sales, general and administrative expenses were 1% higher than in the same period in 2005.

Ultracargo □ Ultracargo's sales, general and administrative expenses totaled R\$ 18 million in 3Q06, up 5% compared to 3Q05, as a result of the rise in administrative expenses, due to (i) the increase in personnel expenses, largely because of the salary adjustments arising from the annual collective wage agreements; and (ii) the extraordinary expenses related to the discontinuing of certain transport operations. Compared to 2Q06, SG&A expenses saw a slight drop of 1%. For the nine months ended in September 2006, Ultracargo's sales, general and administrative expenses amounted to R\$ 54 million, 22% up on the same period in 2005.

EBITDA □ Ultrapar reported consolidated Earnings Before Interest, Depreciation and Amortization (EBITDA) of R\$ 158 million in 3Q06, up 25% and 16% on 3Q05 and 2Q06, respectively. EBITDA accumulated in the first nine months of 2006 amounted to R\$ 401 million, 13% down on the same period in 2005.

- 7 -

Ultragaz □ Ultragaz reported EBITDA of R\$ 89 million in 3Q06, up 68% on 3Q05 - as a result of the benefits arising from the company's distribution structure review. Compared to 2Q06, EBITDA was up 15%, also reflecting seasonally stronger sales in 3Q06. In the first nine months of this year, Ultragaz's EBITDA amounted to R\$ 222 million, 38% higher than in the same period in 2005.

Oxiteno □ EBITDA at Oxiteno totaled R\$ 59 million in 3Q06, practically unchanged on 3Q05. Commercial initiatives and a better performance in some segments of the market resulted in market share gains and an improved sales mix -both in geographical and product terms, neutralizing the negative effects of the appreciation in the Brazilian Real and the behavior in the price of ethylene. Compared to 2Q06, EBITDA was up 27%, principally due to the higher seasonal sales in the domestic market and the improved price of glycol in the international market. EBITDA for the first nine months of this year totaled R\$ 146 million, down 44% compared to the same period in 2005.

Ultracargo □ Ultracargo reported EBITDA of R\$ 9 million, down 30% and 20%, compared to 3Q05 and 2Q06, respectively. Despite increased operations at TIS, extraordinary expenses arising from the discontinuation of some transport operations negatively impacted Ultracargo's EBITDA in 3Q06. In the first nine months of this year Ultracargo's EBITDA amounted to R\$ 29 million, 20% lower than the EBITDA for the same period in 2005.

Financial Result □ Ultrapar's financial result in 3Q06 amounted to expenses of R\$ 3 million, practically unchanged on 3Q05.

Net Earnings □ The Company's consolidated net earnings in 3Q06 amounted to R\$ 89 million, up 32% on 3Q05 and flat in relation to 2Q06. Net earnings in 2Q06 benefited from a positive non-recurring item of R\$ 27 million in the financial result, related to the winning of a lawsuit against the federal tax authorities related to the payment of PIS and COFINS. Excluding this non-recurring item, Ultrapar's net earnings were 45% higher compared to 2Q06. For the first nine months of the year, net earnings amounted to R\$ 234 million, down 9% on the net earnings reported in the same period in 2005.

Investments □ Total investments (CAPEX) in the quarter amounted to R\$ 77 million:

- At Ultragaz, investments were focused in the replacement and acquisition of cylinders and tanks for the bottled and small bulk segments (UltraSystem).
- At Oxiteno, investments were mainly focused on expanding production capacity, particularly the building of the new fatty alcohols plant, and expanding the production capacity of specialty chemicals and ethylene oxide at the plant in Mauá.
- Capital expenditures at Ultracargo were mainly on expanding the Suape terminal, the construction of an integrated rail and road storage facility for solid products at Camaçari and on the expansion of the Aratu terminal for the storage of palm kernel oil.

Ultrapar in the capital markets

During 3Q06, the shares of Ultrapar appreciated by 13%, while the Ibovespa and the IBX indexes remained practically unchanged. For the year-to-date, the shares of Ultrapar have appreciated by 18%, while the Ibovespa and the IBX have appreciated by 9% and 11%, respectively. Ultrapar's average daily trading volume in 3Q06 amounted to R\$ 3.9 million, down 27% compared to 3Q05, when the trading volume was still under the positive influence of the follow-on offering carried out in April 2005.

Outlook

The new ethylene supply agreements and the investments in production expansion at Oxiteno should result in a significant improvement in the company's earnings over the next few years, with the addition of approximately US\$ 350 million/year to current net sales. Additionally, the improvements forecasted as a result of the distribution structure review at Ultragas' remain unaltered, leading to growth in the next year. For Ultracargo, we have a bold growth plan ahead of us, with the definition of a new way of operating and the consolidation of the company's strategic position in the logistic market for special bulk cargo. As a result of these initiatives, the growth path ahead is drawn, and may be further leveraged through acquisitions.

Forthcoming Events

Conference call/ Webcast and APIMEC meeting for market analysts: November 13th & 14th, 2006

Ultrapar will be holding a meeting for market analysts (APIMEC) in São Paulo on November 13th, 2006, and an international conference call on November 14th, 2006. These events will comment on the company's performance in the third quarter of 2006 and its future outlook. The presentation will be available for download on the company's web site one hour before the start of the conference calls.
