Securities registered or to be registered pursuant to Section 12(b) of the Act.

Edgar Filing: CNOOC LTD - Form 20-F

Title of each class	Name of each exchange on which registered
American depositary shares, each representing 100 shares of par value HK\$0.02 per share	New York Stock Exchange, Inc.
Shares of par value HK\$0.02 per share	New York Stock Exchange, Inc.(1)

Securities registered or to be registered pursuant to Section 12(g) of the Act. None  
(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act. None  
(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

Shares, par value HK\$0.02 per share	44,659,180,984
--------------------------------------	----------------

Edgar Filing: CNOOC LTD - Form 20-F

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes  No

Note – Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant is required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of “accelerated filer and large accelerated filer” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board

Other

If “Other” has been checked in response to the previous question, indicate by check mark which financial statement item the Registrant has elected to follow.

Item 17  Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

---

(1) Not for trading, but only in connection with the registration of American depositary shares.

TERMS AND CONVENTIONS

Definitions

Unless the context otherwise requires, references in this annual report to:

- “CNOOC” are to our controlling shareholder, China National Offshore Oil Corporation, a PRC state-owned enterprise, and its affiliates, excluding us and our subsidiaries;
- “CNOOC Limited” are to CNOOC Limited, a Hong Kong limited liability company and the registrant of this annual report;
  - “Our company”, “Company”, “we”, “our” or “us” are to CNOOC Limited and its subsidiaries;
  - “ADRs” are to the American depositary receipts that evidence our ADSs;
- “ADSs” are to our American depositary shares, each of which represents 100 shares of par value HK\$0.02 per share;
- “China” or “PRC” are to the People’s Republic of China, excluding for purposes of geographical reference in this annual report, the Hong Kong Special Administrative Region, the Macau Special Administrative Region and Taiwan;
  - “Hong Kong” are to the Hong Kong Special Administrative Region of the People’s Republic of China;
  - “Hong Kong Stock Exchange” or “HKSE” are to The Stock Exchange of Hong Kong Limited;
  - “HK\$” are to the Hong Kong dollar, the legal currency of the Hong Kong Special Administrative Region;
    - “HKICPA” are to the Hong Kong Institute of Certified Public Accountants;
- “HKFRS” are to all Hong Kong Financial Reporting Standards and Hong Kong Accounting Standards and Interpretations approved by the Council of the HKICPA;
  - “IASB” are to the International Accounting Standards Board;
- “IFRS” are to all International Financial Reporting Standards, including International Accounting Standards and Interpretations, as issued by the International Accounting Standards Board;
  - “NYSE” are to the New York Stock Exchange;
  - “Rmb” are to Renminbi, the legal currency of the PRC; and
  - “US\$” are to U.S. dollar, the legal currency of the United States of America.

Conventions

We publish our financial statements in Renminbi. Unless otherwise indicated, we have translated amounts from Renminbi into U.S. dollars solely for the convenience of the reader at the noon buying rate for cable transfers of Renminbi per U.S. dollar certified for customs purposes by the Federal Reserve Bank of New York, as set forth in the

H.10 weekly statistical release of the Federal Reserve Board on December 30, 2011 of US\$1.00=Rmb 6.2939. We have also translated amounts in Hong Kong dollars

## Table of Contents

solely for the convenience of the reader at the noon buying rate for cable transfers of Hong Kong dollars per U.S. dollar certified for customs purposes by the Federal Reserve Bank of New York, as set forth in the H.10 weekly statistical release of the Federal Reserve Board on December 30, 2011 of US\$1.00=HK\$7.7663. We make no representation that the Renminbi amounts or Hong Kong dollar amounts could have been, or could be, converted into U.S. dollars at those rates on December 30, 2011, or at all. For further information on exchange rates, see “Item 3—Key Information—Selected Financial Data.”

Totals presented in this annual report may not add correctly due to rounding of numbers.

For the year 2009 and before, all information relating to our oil and natural gas reserves under our consolidated subsidiaries was based upon estimates prepared by independent petroleum engineering consulting companies and reviewed by us. For the years 2010 and 2011, approximately 11% and 25%, respectively, of our reserves under our consolidated subsidiaries were evaluated by us independently, and the remaining were based upon estimates prepared by independent petroleum engineering consulting companies and reviewed by us. Our reserve data for 2009, 2010 and 2011 were prepared in accordance with the SEC’s final rules on “Modernization of Oil and Gas Reporting”, which became effective for accounting periods ended on or after December 31, 2009.

In calculating barrels-of-oil equivalent amounts, for reserves, we have assumed that 6,000 cubic feet of natural gas equals one BOE, with the exception of natural gas from NWS LNG project in Australia and an equity method investee in South America, for which we have assumed that 5,102 and 5,800 cubic feet of natural gas, respectively, equals one BOE. For production, we have used actual thermal unit of each oil and gas field for such conversion purpose.

## Glossary of Technical Terms

Unless otherwise indicated in the context, references to:

- “API gravity” means the American Petroleum Institute’s scale for specific gravity for liquid hydrocarbons, measured in degrees.
- “appraisal well” means an exploratory well drilled after a successful wildcat well to gain more information on a newly discovered oil or gas reserve.
- “condensate” means a mixture of hydrocarbons that exists in the gaseous phase at original reservoir temperature and pressure and exists in the liquid phase at surface pressure and temperature when produced.
- “crude oil” means crude oil and liquids, including condensate, natural gas liquids and liquefied petroleum gas.
- “developed oil and gas reserves” are reserves of any category that can be expected to be recovered:

(i) through existing wells with existing equipment and operating methods or in which the cost of the required equipment is relatively minor compared to the cost of a new well; and

(ii) through installed extraction equipment and infrastructure operational at the time of the reserves estimate if the extraction is by means not involving any well.

- “exploratory well” means a well drilled to find either a new field or a new reservoir in a field previously found to be productive of oil or gas in another reservoir. Generally, an exploratory well is any well that is not a development well, an extension well, a service well, or a stratigraphic test well.

- “LNG” means liquefied natural gas.

Table of Contents

- “natural gas liquids” means light hydrocarbons that can be extracted in liquid form from natural gas through special separation plants.
  - “net wells” means a party’s working interest in wells.
- “proved oil and gas reserves” means those quantities of oil and gas, which, by analysis of geoscience and engineering data, can be estimated with reasonable certainty to be economically producible—from a given date forward, from known reservoirs, and under existing economic conditions, operating methods, and government regulations— prior to the time at which contracts providing the right to operate expire, unless evidence indicates that renewal is reasonably certain, regardless of whether deterministic or probabilistic methods are used for the estimation. The project to extract the hydrocarbons must have commenced or the operator must be reasonably certain that it will commence the project within a reasonable time.
  - (i) The area of the reservoir considered as proved includes: (A) The area identified by drilling and limited by fluid contacts, if any, and (B) Adjacent undrilled portions of the reservoir that can, with reasonable certainty, be judged to be continuous with it and to contain economically producible oil or gas on the basis of available geosciences and engineering data.
  - (ii) In the absence of data on fluid contacts, proved quantities in a reservoir are limited by the lowest known hydrocarbons (LKH) as seen in a well penetration unless geosciences, engineering, or performance data and reliable technology establishes a lower contact with reasonable certainty.
  - (iii) Where direct observation from well penetrations has defined a highest known oil (HKO) elevation and the potential exists for an associated gas cap, proved oil reserves may be assigned in the structurally higher portions of the reservoir only if geosciences, engineering, or performance data and reliable technology establish the higher contact with reasonable certainty.
  - (iv) Reserves which can be produced economically through application of improved recovery techniques (including, but not limited to, fluid injection) are included in the proved classification when: (A) Successful testing by a pilot project in an area of the reservoir with properties no more favorable than in the reservoir as a whole, the operation of an installed program in the reservoir or an analogous reservoir, or other evidence using reliable technology establishes the reasonable certainty of the engineering analysis on which the project or program was based; and (B) The project has been approved for development by all necessary parties and entities, including governmental entities.
  - (v) Existing economic conditions include prices and costs at which economic producibility from a reservoir is to be determined. The price shall be the average price during the 12-month period prior to the ending date of the period covered by the report, determined as an unweighted arithmetic average of the first-day-of-the-month price for each month within such period, unless prices are defined by contractual arrangements, excluding escalations based upon future conditions.
- “PSC” means production sharing contract. For more information about PSC, see “Item 4—Information on the Company—Business Overview—Regulatory Framework in the PRC.”
  - “share oil” means the portion of production that must be allocated to the relevant government entity under our PSCs in the PRC.
- “undeveloped oil and gas reserves” means reserves of any category that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion.

## Table of Contents

(i) Reserves on undrilled acreage shall be limited to those directly offsetting development spacing areas that are reasonably certain of production when drilled, unless evidence using reliable technology exists that establishes reasonable certainty of economic producibility at greater distances.

(ii) Undrilled locations can be classified as having undeveloped reserves only if a development plan has been adopted indicating that they are scheduled to be drilled within five years, unless the specific circumstances, justify a longer time.

(iii) Under no circumstances shall estimates for undeveloped reserves be attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual projects in the same reservoir or an analogous reservoir, or by other evidence using reliable technology establishing reasonable certainty.

For further definitions relating to reserves:

- “reserve replacement ratio” means, for a given year, total additions to proved reserves, which consist of additions from purchases, discoveries and extensions and revisions of prior reserve estimates, divided by production during the year. Reserve additions used in this calculation are proved developed and proved undeveloped reserves; unproved reserve additions are not used. Data used in the calculation of reserve replacement ratio is derived directly from the reserve quantity reconciliation prepared in accordance with U.S. Accounting Standards Codification 932-235-50, which reconciliation is included in “Supplementary Information on Oil and Gas Producing Activities” beginning on page F-76 of this annual report.

Our reserve replacement ratio reflects our ability to replace proved reserves. A rate higher than 100% indicates that more reserves were added than produced in the period. However, this measure has limitations, including its predictive and comparative value. Reserve replacement ratio measures past performance only and fluctuates from year to year due to differences in the extent and timing of new discoveries and acquisitions. It is also not an indicator of profitability because it does not reflect the cost or timing of future production of reserve additions. It does not distinguish between reserve additions that are developed and those that will require additional time and funding to develop. As such, reserve replacement ratio is only one of the indices used by our management in formulating its acquisition, exploration and development plans.

- “reserve life” means the ratio of proved reserves to annual production of crude oil or, with respect to natural gas, to wellhead production excluding flared gas, also known as reserve-to-production ratio.
- “seismic data” means data recorded in either two-dimensional (2D) or three-dimensional (3D) form from sound wave reflections off of subsurface geology.
- “success” means a discovery of oil or gas by an exploratory well. Such an exploratory well is a successful well and is also known as a discovery. A successful well is commercial, which means there are enough hydrocarbon deposits discovered for economical recovery.
- “wildcat well” means an exploratory well drilled on any rock formation for the purpose of searching for petroleum accumulations in an area or rock formation that has no known reserves or previous discoveries.

References to:

- bbls means barrels, which is equivalent to approximately 0.134 tons of oil (33 degrees API);

Table of Contents

- mmbbls means million barrels;
- BOE means barrels-of-oil equivalent;
- mcf means thousand cubic feet;
- mmcf means million cubic feet;
- bcf means billion cubic feet, which is equivalent to approximately 28.32 million cubic meters; and
  - BTU means British Thermal Unit, a universal measurement of energy.

Table of Contents

FORWARD-LOOKING STATEMENTS

This annual report includes “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995. The words “believe”, “intend”, “expect”, “anticipate”, “project”, “estimate”, “plan”, “predict” and similar expressions are also intended to identify such forward-looking statements.

These forward-looking statements address, among others, such issues as:

- the amount and nature of future exploration, development and other capital expenditures,
  - wells to be drilled or reworked,
  - development projects,
  - exploration prospects,
- estimates of proved oil and gas reserves,
  - development and drilling potential,
- expansion and other development trends of the oil and gas industry,
  - business strategy,
  - production of oil and gas,
- development of undeveloped reserves,
- expansion and growth of our business and operations,
  - oil and gas prices and demand,
  - future earnings and cash flow, and
  - our estimated financial information.

These statements are based on assumptions and analysis made by us in light of our experience and our perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. However, whether actual results and developments will meet our expectations and predictions depend on a number of risks and uncertainties which could cause our actual results, performance and financial condition to differ materially from our expectations, including those associated with fluctuations in crude oil and natural gas prices, our exploration or development activities, our capital expenditure requirements, our business strategy, the highly competitive nature of the oil and natural gas industry, our foreign operations, environmental liabilities and compliance requirements, and economic and political conditions in the PRC and overseas. For a description of these and other risks and uncertainties, see “Item 3—Key Information—Risk Factors.”

Consequently, all of the forward-looking statements made in this annual report are qualified by these cautionary statements. We cannot assure that the results or developments anticipated by us will be realized or, even if

substantially realized, that they will have the expected effect on us, our business or our operations.

Table of Contents

SPECIAL NOTE ON THE FINANCIAL INFORMATION AND CERTAIN STATISTICAL INFORMATION  
PRESENTED IN THIS ANNUAL REPORT

Our consolidated financial statements for the years ended December 31, 2009, 2010 and 2011 included in this annual report on Form 20-F have been prepared in accordance with International Financial Reporting Standards, or IFRSs, as issued by the International Accounting Standards Board.

In accordance with rule amendments adopted by the U.S. Securities and Exchange Commission, or the SEC, which became effective on March 4, 2008, we are not required to provide reconciliation to Generally Accepted Accounting Principles in the United States.

The statistical information set forth in this annual report on Form 20-F relating to China is taken or derived from various publicly available government publications that have not been prepared or independently verified by us. This statistical information may not be consistent with other statistical information from other sources within or outside China.

## A. SELECTED FINANCIAL DATA

The following tables present selected historical financial data of our company as of and for the years ended December 31, 2007, 2008, 2009, 2010 and 2011. Except for amounts presented in U.S. dollars, the selected historical consolidated statement of financial position data and consolidated statement of comprehensive income data as of and for the years ended December 31, 2007, 2008, 2009, 2010 and 2011 set forth below are derived from, should be read in conjunction with, and are qualified in their entirety by reference to, our consolidated financial statements and their notes under “Item 18—Financial Statements” and “Item 5—Operating and Financial Review and Prospects” in this annual report. As disclosed above under Special Note on the Financial Information and Certain Statistical Information Presented in this annual report, our consolidated financial statements as of and for the years ended December 31, 2007, 2008, 2009, 2010 and 2011 have been prepared and presented in accordance with IFRS.

(1) After the early adoption of IFRS 10-Consolidated Financial Statements, IFRS 11-Joint Arrangements, IFRS 12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

(2)

Earnings per share (basic) and earnings per ADS (basic) for each year from 2007 to 2011 have been computed, without considering the dilutive effect of the shares underlying our share option schemes and, as applicable, convertible bonds, by dividing profit by the weighted average number of shares and the weighted average number of ADSs of 43,605,437,212 and 436,054,372, respectively, for 2007, 44,623,856,311 and 446,238,563, respectively, for 2008, 44,669,199,984 and 446,692,000, respectively, for 2009, 44,669,199,984 and 446,692,000, respectively, for 2010 and 44,668,570,359 and 446,685,704, respectively, for 2011, in each case based on a ratio of 100 shares to one ADS.

(3) Earnings per share (diluted) and earnings per ADS (diluted) for each year from 2007 to 2011 have been computed, after considering the dilutive effect of the shares underlying our share option schemes and, as applicable, convertible bonds, by using 43,731,936,869 shares and 437,319,369 ADSs for 2007, 44,786,097,516 shares and 447,860,975 ADSs for 2008, 44,771,714,329 shares and 447,717,143 ADSs for 2009, 44,821,187,466 shares and 448,211,875 ADSs for 2010 and 44,853,615,010 shares and 448,536,150 ADSs for 2011.

December 2011	7.7663	—	7.7851	7.7663
January 2012	7.7555	—	7.7674	7.7538
February 2012	7.7551	—	7.7559	7.7532
March 2012	7.7638	—	7.7678	7.7551

(1) Determined by averaging the noon buying rates on the last business day of each month during the relevant period.

On March 30, 2012, the noon buying rate between U.S. dollars and Hong Kong dollars as set forth in the H.10 weekly statistical release of the Federal Reserve Board was HK\$7.7638 to US\$1.00.

B. CAPITALIZATION AND INDEBTEDNESS

Not applicable.

C. REASONS FOR THE OFFER AND USE OF PROCEEDS

Not applicable.

D. RISK FACTORS

We urge you to consider carefully the risks described below. Although we have established the Enterprise Risk Management system to identify, evaluate and manage risks, our business activities are subject to the following risks, each of which could have a material adverse effect on our operations and financial condition.

## Table of Contents

### Risks Relating to Our Operations

Our business, revenues and profits fluctuate with changes in oil and gas prices

Prices for crude oil may fluctuate widely in response to relatively minor changes in the supply and demand for oil, market uncertainty and various other factors that are beyond our control, including, but not limited to overall economic conditions, consumer demand for oil, political developments, the ability of petroleum producing nations to set and maintain production levels and prices, the price and availability of other energy sources, domestic and foreign government regulations, and weather conditions.

In addition, our typical contracts with gas buyers include provisions for periodic resets and adjustment formulas that depend on a basket of crude oil prices and inflation as well as various other factors. These resets and adjustment formulas can result in natural gas price fluctuations.

Even relatively modest declines in crude oil and/or natural gas prices may adversely affect our business, revenues and profits. Lower oil and gas prices may result in the write-off of higher cost reserves and other assets and may lower our earnings or cause losses. Lower oil and gas prices may also reduce the amount of oil and natural gas we can produce economically and render existing contracts that we have entered into uneconomical.

The oil and gas reserve estimates in this annual report may require substantial revision as a result of future drilling, testing, production and oil and gas price changes

The reliability of reserve estimates depends on a number of factors, including the quality and quantity of technical and economic data, the prevailing oil and gas prices for our production, the production performance of reservoirs, extensive engineering judgments, and the fiscal regime in the PRC and overseas where we have operations or assets.

Many of the factors, assumptions and variables involved in estimating reserves are beyond our control and may prove to be incorrect over time. In addition, many of the factors involved in estimating reserves over which we do have control, such as the recovery factor estimates and the projected production decline rates, may also prove to be incorrect over time. Consequently, the results of drilling, testing and production and oil and gas price changes may require substantial upward or downward revisions in our initial reserve data.

Any failure to replace reserves and develop our proved undeveloped reserves could adversely affect our business and our financial position

Exploring for, developing and acquiring reserves is highly risky and capital intensive. Our exploration and development activities involve inherent risks, including the risk that we will not encounter commercially productive oil or gas reservoirs. In addition, approximately 56.1% of our proved reserves were undeveloped as of December 31, 2011. Our future success will depend on our ability to develop these reserves in a timely and cost-effective manner. There are various risks in developing reserves, including construction, operational, geophysical, geological and regulatory risks.

Our future prospects largely depend on our capital expenditures, which are subject to various risks

Our ability to maintain and increase our revenues, profit and cash flows depends upon continuous capital spending, which is subject to a number of contingencies, some of which are beyond our control. These variables include: cash flows from operations, the availability and terms of external financing, our ability to execute our project plans and commence production on time, weather conditions, the availability of services and facilities, approvals required from the PRC and foreign governments for certain capital expenditures and investments, and economic, political and other

conditions in the PRC and overseas where we have operations or assets.

## Table of Contents

Therefore, our actual capital expenditures and investments in the future may differ significantly from our current planned amounts. If we are unable to obtain sufficient funding for our operations or development plans, our business, revenues, profit and cash flows could be adversely affected.

Any failure to implement our natural gas business strategy may adversely affect our business and financial position

As part of our business strategy and to meet increasing market demand in China, we continue to expand our natural gas business. In addition to the risks that affect our business generally, this strategy involves certain risks and uncertainties, including our limited market share compared to PetroChina Company Limited, or PetroChina, and China Petroleum & Chemical Corporation, or Sinopec, and the underdeveloped natural gas transportation and supply infrastructure and market in China. We are evaluating the options to invest in CNOOC's LNG projects in China. However, we have not decided whether to exercise these options. The options are subject to various conditions including certain governmental approvals, the prospects of such projects and, if applicable, independent shareholders' approval.

Mergers and acquisitions may expose us to additional risks and uncertainties

In the past few years, we expanded our operations into Argentina, the U.S., Canada, Uganda and certain other countries through mergers and acquisitions. We may continue to pursue opportunities for mergers and acquisitions to expand our business in the future.

In light of political instability, unexpected changes to fiscal regime and various other factors, there may be uncertainties with respect to the operations of those merged and acquired overseas assets. Therefore, we may not be able to achieve the anticipated economic return. Also, the increase in the scale of our operations may increase our operational risks.

CNOOC largely controls us and we regularly enter into related party transactions with CNOOC and its affiliates

CNOOC indirectly owned or controlled 64.45% of our shares as of March 31, 2012. As a result, CNOOC is able to control the composition of the board of directors of our company, or our Board, determine the timing and amount of our dividend payments and otherwise control us. If CNOOC takes actions that favor its interests over ours, our results of operations and financial position may be adversely affected.

In addition, we regularly enter into transactions with CNOOC and its affiliates, such as China Oilfield Services Limited, or COSL, Offshore Oil Engineering Co., Ltd, or COOEC, and China BlueChemical Ltd. Some of our transactions with CNOOC and its affiliates constitute connected transactions under The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, or the Hong Kong Stock Exchange Listing Rules. Furthermore, these connected transactions are subject to review by the Hong Kong Stock Exchange and may also be subject to the prior approval of our independent shareholders. For example, we have obtained the independent shareholders' approval in respect of certain continuing connected transactions under a comprehensive framework agreement with the CNOOC on November 24, 2010. If we do not obtain these approvals, we will not be allowed to effect these transactions and our business operations and financial condition could be adversely affected.

Under current PRC law, CNOOC has the exclusive right to enter into PSCs with foreign oil and gas companies for the petroleum resources exploitation in offshore China. Although CNOOC has undertaken to us that it will transfer all of its rights and obligations under any new PSCs to us, except those relating to its administrative functions, the interests of CNOOC in entering into PSCs with international oil and gas companies may differ from our interests, especially with respect to the criteria for determining whether, and on what terms, to enter into PSCs. Our future business development may be adversely affected if CNOOC does not enter into new PSCs on terms that are acceptable to us.

Our business performance relies heavily on our sales to large domestic customers and a substantial drop in such sales could have a material adverse effect on our results of operations

## Table of Contents

We sell a significant proportion of our production to CNOOC-affiliated companies, Sinopec, and PetroChina. However, we currently do not have long-term crude oil sales contracts with these customers. Our business, results of operations and financial condition could be adversely affected if any of them significantly reduced their crude oil purchases from us.

We may have limited control over our investments in joint ventures and our operations with partners

A quite few of our operations are conducted with partners or in joint ventures in which we may have limited ability to influence or control their operation or future development. Our limited ability to influence or control the operation or future development of such joint ventures could materially and adversely affect the realization of our target returns on capital and lead to unexpected future costs.

Blowout or other incidents may result in platform explosions, fire accidents and oil spills

Our operations are mainly conducted in challenging or environmentally sensitive locations, in which the consequences of a blowout, spill, explosion, fire or other incidents could be more severe than in other locations. Although we have adopted standard workflow procedures and various measures to control the risks of blowout or other incidents, we cannot assure you that we could avoid the potential losses caused by blowout or other incidents. If one or more blowout or other incidents occur, platform explosions and fire accidents caused by such incidents may result in casualties, property losses and environmental damages, which may have a material adverse effect on our business, financial condition and results of operation.

We maintain various insurance coverage for our operations against certain types of potential losses. For detailed information on our insurance coverage, see “Item 4. Information on the Company—B. Business Overview— Operating Hazards and Uninsured Risks.” However, our ability to insure against our risks is limited by the availability of relevant insurance products in the market. In addition, we cannot assure you that our insurance coverage is sufficient to cover any losses that we may incur, or that we will be able to successfully claim our losses under our existing insurance policies timely or at all. If any of our losses is not covered by our insurance policies, or if the insurance compensation is less than our losses or not paid timely, our business, financial condition and results of operations could be materially and adversely affected.

We conduct exploration and development in deepwater areas in both offshore China and overseas by cooperating with our partners and by ourselves. We expect to conduct independent exploration and development in deepwater areas in South China Sea and the Republic of Congo in 2012.

Operations in deepwater are more difficult, risky and costly than in shallower water. Operations in deepwater may require a significant amount of time between the discovery and the initial production, thus increasing the risks involved in these operations.

Extreme weather conditions may have a material adverse impact on us and could result in losses that are not covered by insurance

Our exploration, development and production activities can be adversely affected by extreme weather conditions, which could result in loss of hydrocarbons, environmental pollution, damage to our properties, cessation of activities, delay of project plans, shareholders lawsuits, government penalty, and increases in costs of drilling, completing and operating wells.

We maintain insurance coverage against some, but not all, potential losses. We do not maintain business interruption insurance for all of our oil and gas fields. We may suffer material losses resulting from uninsurable or uninsured risks

or insufficient insurance coverage.

Our controlling shareholder, CNOOC, or its affiliates' current or future activities in certain countries that are the subject of U.S. sanctions could result in negative media and investor attention to us and possible imposition of sanctions on CNOOC, which could materially and adversely affect our shareholders

## Table of Contents

We cannot predict the interpretation or implementation of government policy at the U.S. federal, state or local levels with respect to any current or future activities by CNOOC or its affiliates in countries or with individuals or entities that are the subject of U.S. sanctions. Similarly, we cannot predict whether U.S. sanctions will be further tightened, or the impact that such actions may have on CNOOC. It is possible that the United States could subject CNOOC to sanctions due to these activities. Certain U.S. state and local governments and colleges have restrictions on the investment of public funds or endowment funds, respectively, in companies that are members of corporate groups with activities in certain countries that are the subject of U.S. sanctions, such as Iran and Sudan. It is possible that the activities of CNOOC or its affiliates may affect the investment in our shares by such U.S. state and local governments and colleges.

It is possible that, as a result of activities by CNOOC or its affiliates in countries that are the subject of U.S. sanctions, we may be subject to negative media or investor attention, which may distract management, consume internal resources and affect investors' perception of our company.

Further, the Iran Sanctions Act, as amended in July 2010, or ISA, and Executive Order ("E.O.") 13590 of November 20, 2011, authorize the imposition of sanctions on companies that export certain levels of refined petroleum products to Iran; make certain investments in Iran relating to the development of petroleum resources; or provide, sell, or lease goods, services or technology to Iran that could significantly assist Iran in developing petroleum resources, producing refined petroleum or petrochemical products, or importing refined petroleum products. It is possible that CNOOC could engage in activities targeted by ISA or E.O. 13590. If the U.S. President determined that CNOOC in fact engaged in the prohibited activities, he could select from among nine sanctions options available under ISA or E.O. 13590, which range from restrictions on U.S. exports or bank financing to outright blocking of CNOOC's property within U.S. jurisdiction. If the most extreme sanction, blocking, were applied to CNOOC's property, including controlled subsidiaries, CNOOC Limited could be prohibited from engaging in business activities in the United States or with U.S. individuals or entities, and U.S. transactions in our securities and distributions to U.S. individuals and entities with respect to our securities could also be prohibited.

Our business and financial condition may be adversely affected by a severe and prolonged global economic downturn and deteriorating economic conditions

Recent global market and economic conditions have been unprecedented with recession in most major economies. Continued concerns about the systemic impact of a potentially long-term and widespread recession, downgrade of the U.S. credit rating and the sovereign debt crisis in Europe, energy costs, geopolitical issues and the availability and cost of credit have contributed to increased market volatility and diminished expectations for economic growth around the world. The difficult economic outlook has negatively affected business and consumer confidence and contributed to unprecedented volatility levels. We cannot predict the short- and long-term impacts of these events on our business and financial condition, which could be materially and adversely affected.

### Risks Relating to the Petroleum Industry

The oil and natural gas industries are very competitive

We compete in the PRC and international markets with integrated and independent oil and gas companies for oil and gas properties or leases, customers, capital financing and business opportunities, including desirable oil and gas prospects. We also compete for the equipment and personnel required to explore, develop and operate oil and gas properties.

Changes in laws and regulations could have an adverse effect on our operation in overseas

We currently have operations and assets in various foreign countries and regions, including Indonesia, Myanmar, Iraq, Australia, Nigeria, Uganda, Argentina, the United States, Canada and certain other countries, and may expand our operations into other countries to further enhance our reserve base and diversify our geographic risk profile.

## Table of Contents

Our interests may be adversely affected by changes in governmental policies or social instability or other political, economic or diplomatic developments in or affecting these foreign nations which are not within our control, including, among other things, a change in crude oil or natural gas pricing policy, expropriation, nationalization, renegotiation or nullification of existing concessions and contracts, taxation policies, foreign exchange and repatriation restrictions, changing political conditions and currency controls.

Our operations are subject to laws and regulations in countries in which we operate. Changes in such laws and regulations could change environmental protection requirements and increase taxes, royalties and other amounts payable to governments or governmental agencies. Such changes may increase our cost of compliance or tax burden, which could materially and adversely affect our net income and result of operations.

In addition, the operations and assets that we currently have or in the future may have in foreign countries and regions may be materially and adversely affected by trade or economic sanctions that may be imposed by other countries due to their deteriorated relations with each other.

War and acts of terrorism could materially and adversely affect us

We have operations and assets in various countries and regions, including Indonesia, Myanmar, Iraq, Australia, Nigeria, Uganda, Argentina, the United States, Canada and certain other countries, some of which are deemed to be with a high degree of political risk. We face the risks of kidnapping, damage to property and business interruption caused by terrorism activities and strikes. Acts of terrorism and strikes could materially and adversely affect our business, financial condition and results of operations.

We may be penalized if we fail to comply with existing or future environmental laws and regulations

Our business is subject to environmental protection laws and regulations in the PRC, as well as other jurisdictions where we operate. The environmental laws and regulations to which we are subject may become increasingly strict and have an increasing impact on our operations. Our compliance with such laws or regulations may require us to incur significant capital expenditures or other obligations or liabilities, which could create a substantial financial burden on us. Furthermore, these jurisdictions may impose fees and fines for the discharge of waste substances or serious environmental pollution, and authorize a government, at its discretion, to close or suspend any facility which fails to comply with orders requiring it to cease or cure operations causing environmental damage.

We have established an enterprise risk management system to identify, evaluate and manage the risks that we face. In addition, to help address various health, safety, security, environmental and operational risks, we have established a comprehensive management system to improve our employees' awareness of our health, safety and environmental policies in our business operations and strengthen their skills of risk identification and risk management. We also continuously focus on workplace safety and prevention of oil spills or other adverse environmental events. However, there can be no assurance that our management systems and controls will function as intended at all times. Substantial liabilities and other adverse impacts could result if our management systems and controls cannot adequately identify all process safety, personal safety and environmental risks or provide effective mitigations, or that our operations will be able to conform with our management systems and controls at all times.

### Risks Relating to the PRC

Changes in PRC laws and regulations could have an adverse effect on our operation

Our operations and assets are mainly in the People's Republic of China. The PRC government exercises control over the PRC petroleum industry, including licensing, exploring, producing, distributing, pricing, taxing, importing,

exporting and allocating of various resources. We have benefited from various favorable PRC government policies, laws and regulations that have been enacted to encourage the development of the offshore petroleum industry. We cannot guarantee that the legal and fiscal regimes affecting our businesses will remain substantially unchanged or that we will continue to benefit from favorable PRC government policies.

## Table of Contents

For instance, in 2011, the State Council of the PRC amended the Provisional Regulation of PRC Resource Tax and as a result, since November 1, 2011, the royalties payable to the PRC government have been replaced by resource tax, currently at 5% of the sales revenues from crude oil and natural gas. For detailed information on the resource tax, see “Item 4. Information on the Company—B. Business Overview—Regulatory Framework in the PRC.”

In addition, existing PRC regulations require us to obtain various PRC government licenses and other approvals, including in some cases approvals for amendments and extensions of existing licenses and approvals to conduct exploration and development activities off the shores of China. If we are unable to obtain any necessary approvals, our reserves and production would be adversely affected.

Government control of currency conversion and future movements in exchange rates may adversely affect our operations and financial condition

A portion of our Renminbi revenue may need to be converted into other currencies by our wholly owned subsidiary in the PRC, CNOOC China Limited, to meet our substantial requirements for foreign currencies, including: debt service on foreign currency denominated debt, overseas acquisitions of oil and gas properties, purchases of imported equipment, and payment of dividends declared in respect of shares held by international investors.

Foreign exchange transactions under the capital account, including principal payments with respect to foreign currency denominated obligations, are subject to the approval requirements of the State Administration for Foreign Exchange.

The value of Renminbi against U.S. dollar and other currencies may fluctuate and is affected by, among other things, changes in China’s political and economic conditions. The appreciation of Renminbi against U.S. dollar may cause a decrease in our oil sales, since the benchmark oil prices are usually in U.S. dollars.

Certain legal restrictions on dividend distribution may have a material adverse effect on our cash flows

We are a holding company. Our businesses are owned and conducted through various wholly owned subsidiaries, including CNOOC China Limited, our wholly owned subsidiary in the PRC. Accordingly, our future cash flows will consist principally of dividends and other distributions from our subsidiaries. Our PRC subsidiary’s ability to pay dividends and other distributions to us is subject to PRC laws and regulations. For example, legal restrictions in the PRC permit payment of dividends only out of profits determined in accordance with PRC accounting standards and regulations. Substantially all our dividend payments result from dividends paid to us as a holding company by CNOOC China Limited. CNOOC China Limited must follow the laws and regulations of the PRC and its articles of association in determining its dividends. As a wholly foreign owned enterprise in China, CNOOC China Limited has to provide for a reserve fund and staff and workers’ bonus and welfare fund, each of which is appropriated from net profit after taxation but before dividend distributions according to the prevailing accounting rules and regulations in the PRC. Therefore, there is a risk that we may not be able to maintain sufficient cash flows due to these restrictions on dividend distribution.

## ITEM 4. INFORMATION ON THE COMPANY

### A. HISTORY AND DEVELOPMENT

Our legal and commercial name is CNOOC Limited. We were incorporated with limited liability on August 20, 1999 in Hong Kong under the Hong Kong Companies Ordinance. Our business registration number in Hong Kong is 685974. Under our memorandum of association, we may do anything which we are permitted to do by any enactment

or rule of law. Our registered office is located at 65th Floor, Bank of China Tower, One Garden Road, Central, Hong Kong, and our telephone number is 852-2213-2500.

Table of Contents

The PRC government established CNOOC, our controlling shareholder, as a state-owned offshore petroleum company in 1982 under the Regulation of the PRC on the Exploitation of Offshore Petroleum Resources in Cooperation with Foreign Enterprises. CNOOC assumed certain responsibility for the administration and development of PRC offshore petroleum operations with foreign oil and gas companies.

Prior to CNOOC's reorganization in 1999, CNOOC and its various affiliates performed both commercial and administrative functions relating to oil and natural gas exploration and development in offshore China.

In 1999, CNOOC transferred all of its then current operational and commercial interests in its offshore petroleum business, including the related assets and liabilities, to us. As a result, we and our subsidiaries are the only vehicles through which CNOOC engages in oil and gas exploration, development, production and sales activities both in and outside the PRC.

CNOOC retained its commercial interests in operations and projects not related to oil and gas exploration and production, as well as all of the administrative functions it performed prior to the reorganization.

CNOOC has undertaken to us that:

- we will enjoy the exclusive right to exercise all of CNOOC's commercial and operational rights under PRC laws and regulations relating to the exploration, development, production and sales of oil and natural gas in offshore China;
- it will transfer to us all of its rights and obligations under any new PSCs and geophysical exploration operations, except those relating to its administrative functions;
- it will not engage or be interested, directly or indirectly, in oil and natural gas exploration, development, production and sales in or outside the PRC;
- we will be able to participate jointly with CNOOC in negotiating new PSCs and to set out our views to CNOOC on the proposed terms of new PSCs;
- we will have unlimited and unrestricted access to all data, records, samples and other original data owned by CNOOC relating to oil and natural gas resources;
- we will have an option to invest in LNG projects in which CNOOC invested or proposed to invest, and CNOOC will at its own expense help us to procure all necessary government approvals needed for our participation in these projects; and
- we will have an option to participate in other businesses related to natural gas in which CNOOC invested or proposed to invest, and CNOOC will procure all necessary government approvals needed for our participation in such business.

The undertakings from CNOOC will cease to have any effect:

- if we become a wholly owned subsidiary of CNOOC;
- if our securities cease to be listed on any stock exchange or automated trading system; or

- 12 months after CNOOC or any other PRC government-controlled entity ceases to be our controlling shareholder.

- For information on our capital expenditures, see “Item 5—Operating and Financial Review and Prospects—Liquidity and Capital Resources—Cash Used in Investing Activities.”

## B. BUSINESS OVERVIEW

### Overview

We are an upstream company specializing in the exploration, development and production of oil and natural gas. We are the dominant oil and natural gas producer in offshore China and, in terms of reserves and production, we are also one of the largest independent oil and natural gas exploration and production companies in the world. As of the end of 2011, we had net proved reserves of approximately 3.19 billion BOE, including approximately 0.27 billion BOE under our equity method investees. In 2011, we had a total net oil and gas production of 909,000 BOE per day, including 49,270 BOE per day under our equity method investees (except as otherwise stated, all amounts of reserve and production in this report include our interests in equity method investees).

### Competitive Strengths

We believe that our historical success and future prospects are directly related to a combination of our strengths, including the following:

- large and diversified asset base with significant exploitation opportunities;
- sizable operating areas in offshore China with demonstrated exploration potential;
- successful independent exploration and development track record;
- access to capital and technology and reduced risks through PSCs in offshore China;
- competitive cost structure with strong margins; and
- experienced management team and a high level of corporate governance standard.

### Large and diversified asset base with significant exploitation opportunities

We have a large net proved reserve base spread across offshore China and globally. As of December 31, 2011, we had approximately 2.9 billion BOE of net proved reserves under our consolidated subsidiaries. Our core operating area, offshore China, contributed to approximately 2.3 billion BOE, or 77.9%, of our net proved reserves, while overseas contributed to the balance of 22.1%.

In addition to offshore China, we have a diversified global portfolio which provides us with further exploration and exploitation potential. We have a strong track record of successfully acquiring and operating many quality overseas upstream assets worldwide. Currently, we have assets in resource rich countries such as Indonesia, Australia, Nigeria, Uganda, the United States, and Canada.

As of December 31, 2011, approximately 56.1% of our net proved reserves under our consolidated subsidiaries were classified as net proved undeveloped. Our large proved reserve base gives us the opportunity to achieve substantial production growth.

### Sizable operating areas in offshore China with demonstrated exploration potential

We are the dominant oil and gas producer in offshore China, a region that we believe has substantial exploration upside. As of December 31, 2011, our total major exploration areas acreage in offshore China was approximately 256 thousand km<sup>2</sup>. We believe that offshore China is relatively underexplored, compared to other prolific offshore exploration areas such as the shallow water of the U.S. Gulf of Mexico, providing us with substantial exploration upside.

## Table of Contents

We have maintained an active drilling exploration program, which continues to demonstrate the exploration potential of offshore China. During 2011, we and our foreign partners have together drilled a total of 93 exploratory wells in offshore China, of which 47 were wildcat wells. During the same year, we and our foreign partners made 13 new discoveries in offshore China.

### Successful independent exploration and development track record

We have a strong record of growing our reserves base for oil and natural gas, both independently and with our foreign partners through PSCs. In recent years, we have been adding reserves and production mainly through independent exploration and development. As of the end of 2011, in offshore China, approximately 77.7% of our net proved reserves were independent and approximately 71.8% of our production came from independent projects.

In 2011, in offshore China, our independent exploration resulted in 13 new discoveries. We also successfully drilled 29 appraisal wells. On the development front, in 2011, our major new development projects progressed smoothly with 2 new projects on stream.

### Access to capital and technology and reduced risks through PSCs in offshore China

Our parent, CNOOC, holds exclusive right from the PRC government to enter into PSCs with foreign partners relating to the petroleum resources exploitation in offshore China. CNOOC assigned us all of its rights and obligations under then-existing PSCs in 1999 and has undertaken to assign to us its future PSCs except for those relating to its administrative functions. PSCs help us minimize our offshore China finding costs, exploration risks and capital requirements because our foreign partners are responsible for all costs associated with exploration under the usual case. Our foreign partners recover their exploration costs only when a commercially viable discovery is made and production begins.

For more information about PSC, see “Item 4—Information on the Company—Business Overview—Regulatory Framework in the PRC.”

### Competitive cost structure with strong margins

Despite cost escalation in global oil field services and raw materials, we have managed to maintain a competitive cost structure. During 2011, our production cost, not including ad valorem and severance taxes, increased to US\$9.25 per BOE from US\$7.47 per BOE in 2010 mainly due to higher material prices and service fees.

### Experienced management team and a high level of corporate governance standard

Our senior management team has extensive experience in the oil and gas industry. Most of our executives have been with CNOOC, our controlling shareholder, since its inception in 1982. Many of our management team and staff members have worked closely with international partners both within and outside China through numerous joint operations.

We have a proven track record of complying with a high level of corporate governance standard, which was recognized by the industry. For example, we were awarded the “Corporate Governance Asia Recognition Awards – One of the Best Companies in China” by Corporate Governance Asia in 2011.

### Business Strategy

We intend to continue expanding our oil and gas exploration and production activities. The principal components of our strategy are as follows:

- focus on reserve and production growth;
- develop natural gas business; and
- maintain prudent financial policy.

Table of Contents

Focus on reserve and production growth

As an upstream company specializing in the exploration, development, production and sales of oil and natural gas, we consider reserve and production growth as top priority. We plan to increase our reserves through drill bits and value-driven acquisitions. We plan to concentrate independent exploration efforts on major existing operating areas, especially in major areas of offshore China. In the meantime, we plan to continue to enter into joint arrangements with foreign partners to lower capital requirements and exploration risks. In 2011, we achieved a reserve replacement ratio of 158%.

We plan to increase production primarily through the development of proved undeveloped reserves. As of December 31, 2011, approximately 56.1% of our proved reserves were classified as proved undeveloped, which gives us the opportunity to achieve future production growth.

Develop natural gas business

We plan to capitalize on the growth potential of the PRC natural gas market, and continue to explore and develop natural gas fields. To the extent we invest in businesses and geographic areas where we have limited experience and expertise, we plan to structure our investments as alliances or partnerships with parties possessing the relevant experience and expertise.

Since 2006, our partners made several gas discoveries in deepwater South China Sea, including Liwan 3-1, Liuhua 34-2 and Liuhua 29-1. We expect that our natural gas production would increase with these gas fields on stream.

Maintain prudent financial policy

We will continue to maintain our prudent financial policy. As an essential part of our corporate culture, we continue to promote the cost consciousness among both our management team and other employees. Also, in our performance evaluation system, cost control is always one of the most important key performance indicators.

Aiming to reduce production cost, we plan to actively promote the regional planning and development of oil and gas field groups and to apply up-to-date drilling, production and offshore engineering technology to our operations.

Currently, we have a strong financial profile with a low gearing ratio. We intend to maintain our financial strength by managing key measures such as capital expenditures, cash flows and fixed charge coverage. We also intend to actively manage our working capital to enhance liquidity and improve profitability. We will continue to monitor our foreign currency denominated assets and debts to minimize exposure to foreign exchange rate fluctuations.

Table of Contents

## Selected Operating and Reserves Data

The following table sets forth our operating data and our net proved reserves as of the date and for the periods indicated.

Our reserve data for 2009, 2010 and 2011 were prepared in accordance with the SEC's final rules on "Modernization of Oil and Gas Reporting", which became effective for accounting periods ended on or after December 31, 2009.

	Year ended December 31,		
	2009	2010(1)	2011
Net Production(3):			
Oil (daily average bbls/day)	510,303	722,086	708,286
Gas (daily average mmcf/day)	665.8	1,050.1	1,171.7
Oil equivalent (BOE/day)	626,552	902,932	909,000
Net Proved Reserves (end of period):			
Oil (mmbbls)	1,667.7	1,719.1	1,873.3
Gas (bcf)	5,944.0	5,944.9	5,627.4
Synthetic Oil (mmbbls)	—	—	87.4
Bitumen (mmbbls)	—	—	8.6
Total (million BOE)	2,658.5	2,710.0	2,921.1
Total with equity method investees (million BOE) (3)	2,662.9	2,998.3	3,190.1
Annual reserve replacement ratio(2)	163	% 116	% 167
Annual reserve replacement ratio(3)	162	% 202	% 158
Estimated reserve life (years)	11.7	8.5	9.3
Estimated reserve life (years) (3)	11.6	9.1	9.6
Standardized measure of discounted future net cash flow (million Rmb)	226,663	293,768	339,234

- (1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.
- (2) For information on the calculation of this ratio, see "Terms and Conventions—Glossary of Technical Terms—reserve replacement ratio."
- (3) Including our interest in equity method investees.

For the year 2009 and before, all information relating to our oil and natural gas reserves under our consolidated subsidiaries was based upon estimates prepared by independent petroleum engineering consulting companies and reviewed by us. For the years 2010 and 2011, approximately 11% and 25%, respectively, of our reserves under our consolidated subsidiaries were evaluated by us independently and the remaining were based upon estimates prepared by independent petroleum engineering consulting companies and reviewed by us. For further information regarding our reserves, see "Item 3—Key Information—Risk Factors—Risks Relating to Our Operations—The oil and gas reserve estimates in this annual report may require substantial revision as a result of future drilling, testing, production and oil and gas price changes" and "Item 4—Information on the Company—Business Overview—Exploration, Development and Production."

## Summary of Oil and Gas Reserves

Table of Contents

The following table sets forth summary information with respect to our estimated net proved reserves of crude oil and natural gas as of the dates indicated.

For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

## Proved Undeveloped Reserves

As of December 31, 2011, we had proved undeveloped reserves of 1,639.8 million BOE under our consolidated subsidiaries, including 978.9 million barrels of crude oil, 62.3 million barrels of synthetic oil, 7.6 million barrels of bitumen and 3,488.8 bcf of natural gas, representing an increase of 299.7 million BOE as compared to proved undeveloped reserves of 1,340.1 million BOE as of December 31, 2010.

The changes in our proved undeveloped reserves mainly include:

- An increase of 264.3 million BOE due to new discoveries and expansions;
  - An increase of 184.2 million BOE due to acquisitions;
- A decrease of 148.7 million BOE due to proved undeveloped reserves being developed into proved developed reserves;
  - A decrease of 19.1 million BOE due to output.

## Table of Contents

In 2011, we spent approximately US\$1.3 billion on developing proved undeveloped reserves into proved developed reserves. US\$1.1 billion, or 84.5%, were spent on 15 major development projects in Bohai East China Sea and Eastern South China Sea in offshore China and the Akpo oilfield in Nigeria. The remaining 15.5% was spent on our domestic infill drilling programs in Bohai and Eastern South China Sea.

As of December 31, 2011, 182.8 million BOE of our proved undeveloped reserves were first booked before 2007. These proved undeveloped reserves were mainly located in East China Sea, Eastern South China Sea and Western South China Sea, including (i) 40.8 million BOE in East China Sea, more than half of which is planned to be developed together with certain new discoveries; (ii) 39.0 million BOE in Eastern South China Sea, including Panyu 34-1 gas field associated with Liwan 3-1 gas field located in the same area that is currently under construction; and (iii) 103.0 million BOE in Western South China Sea, including Yacheng 13-4 gas field associated with Yacheng 13-1 gas field located in the same area that has been supplying gas to Hong Kong for several years. Yacheng 13-4 gas field is expected to commence production in 2012.

### Qualifications of Reserve Technical Oversight Group and Internal Controls over Proved Reserves

Since 2001, we have engaged independent third party consulting firms, including Ryder Scott Company, L.P., Gaffney, Cline & Associates (Consultants) Pte Ltd., Lee Keeling and Associates, Inc., and McDaniel & Associates Consultants Ltd. to perform annual estimates for our proved oil and gas reserves under our consolidated subsidiaries. In 2011, the reserves of East China Sea and certain fields, including Suizhong 36-1, Jinzhou 25-1S, Bozhong 28-2S and OML130 were evaluated by us independently, which accounted for approximately 25% of our total net proved reserves.

The reserve data that we disclosed were all based on the definitions and disclosure guidelines contained in the SEC Title 17: “Code of Federal Regulations—Modernization of Oil and Gas Reporting—Final Rule” in the Federal Register (SEC regulations) that was released on January 14, 2009 and related accounting standards.

While we engage third parties to conduct our annual estimates for most of our reserves, we continue to enhance the supervision over our procedures to ensure the quality control of our reserve evaluation process.

As part of our efforts to improve the evaluation and oversight of our reserves, we established the Reserve Management Group, or RMG, which is led by one of our Executive Vice Presidents and comprises the general managers of the relevant departments.

The RMG’s main responsibilities are to:

- review our reserve policies;
- review our proved reserves and other categories of reserves; and
- select our reserve estimators and auditors.

The RMG follows certain procedures to appoint our internal reserve estimators and reserve auditors, who are required to have undergraduate degrees and at least five years and ten years of experience related to reserves estimation, respectively.

The reserves estimators and auditors are required to be members of China Petroleum Society, or CPS, and are required to take the professional trainings and examinations provided by CPS and us.

The RMG delegates its daily operation to our Reserves Office, which is led by our Chief Reserves Supervisor. The Reserves Office is mainly responsible for supervising reserves estimates and auditing. It reports to the RMG periodically and is independent from operating divisions such as the exploration, development and production departments. Our Chief Reserve Supervisor has 29 years' experience in oil and gas industry.

## Table of Contents

Besides engaging third parties to perform annual estimates for most of our reserves, we also implement rigorous internal control system that monitors the entire reserves estimation procedure and certain key metrics in order to ensure that the process and results of reserves estimates fully comply with the relevant SEC rules.

### Exploration, Development and Production

#### Summary

In offshore China, the Company engages in oil and natural gas exploration, development and production in Bohai, Western South China Sea, Eastern South China Sea and East China Sea, either independently or through cooperation with foreign partners by PSCs. As of the end of 2011, approximately 71.4% of the Company's net proved reserves and approximately 78.9% of its production were located in offshore China.

For independent operations, in recent years, the Company has been adding more reserves and production mainly through independent exploration and development in offshore China. As of the end of 2011, approximately 77.7% of the Company's net proved reserves and approximately 71.8% of its production in offshore China were derived from the independent projects.

For PSC operations, CNOOC, the Company's controlling shareholder, has the exclusive right to explore and develop oil and natural gas in offshore China with foreign partners through PSCs. CNOOC has transferred to the Company all its rights and obligations under all the PSCs (except those relating to its administrative functions), including new PSCs that will be signed in the future. As of the end of 2011, the Company had 24 PSCs with 22 partners in force.

Overseas, the Company holds interests in oil and natural gas blocks in Indonesia, Iraq, Australia, Nigeria, Uganda, Argentina, the U.S., Canada and various other countries. As of December 31, 2011, the Company's overseas net proved reserves and net production accounted for approximately 28.6% and 21.1%, respectively, of the Company's total net proved reserves and total net production.

#### Exploration

As the Company's leading business, the Company has considered exploration work as top priority over the years. In 2011, the Company continued its efforts in exploration and achieved a high record in the amount of investments in exploration, drilling and 3D seismic data collection work. The Company's exploration work has produced fruitful results as we did in recent years, with a reserve replacement ratio reaching 158%.

In 2011, the Company's independent exploration made an aggregate of 13 new discoveries and successfully appraised 18 oil and gas structures in offshore China, achieving a success rate of 51-71%. The Company's PSC partners' exploration efforts resulted in one successfully appraised oil and gas structure, Liuhua 29-1. Overseas, the Company also achieved remarkable results of 3 new discoveries and 2 successfully appraised oil and gas structures.

To ensure resource replacement, the Company conducted exploration in core areas while continuing to explore new areas and new exploration targets. Rich in oil and gas resources, the core areas are the major fields for exploration work. Benefiting from in-depth knowledge in the geological conditions and reservoir formation mechanism, the Company has recorded a higher success rate in exploration in these areas which are the major sources for its new reserves. During the year of 2011, the new discoveries made in core areas mainly included Kenli 9-1, Bozhong 34-3 and Bozhong 34-4 in Bohai as well as Weizhou 12-1S and Weizhou 11-7N in Western South China Sea.

Regarding exploration activities in new areas and new exploration targets, the Company strengthened regional research and basic research activities during the year of 2011. We focused on certain key technologies, and achieved

major breakthroughs in new areas such as shallow lithologic traps with large coverage and high-temperature and high-pressure natural gas.

Table of Contents

First, drilling works were carried out in Bohai around the Shijiutuo uplift area and lithologic trap structures with successful appraisals for Qinhuangdao 33-2 and Qinhuangdao 33-3, further expanding the scale of this type of oil and gas reservoirs. Through regional development, the area is expected to grow into a large oilfield group and become an important source of the Company's future production growth.

This is where the Company achieved a major breakthrough in the exploration of lithologic traps, which changed the direction of the exploration work in Bohai, which used to emphasize on structural traps, and expanded the scope of the exploration area in Bohai.

Secondly, the drilling works of Panyu 10-4W oil and gas structures in Eastern South China Sea revealed significant potential from the shallow formation of the Pearl River Basin. Previous exploration works in the Pearl River Mouth Basin were primarily concentrated on deep formation. Since shallow oil reservoir requires lower drilling costs and has higher economic efficiency, it may become a new breakthrough in the development of the Pearl River Mouth Basin.

Thirdly, the Dongfang 13-1 middle formation of Yinggehai Basin in Western South China Sea was successfully appraised and resulted in higher trial production. The breakthrough in high-temperature and high-pressure natural gas, in particular, is expected to bring a new chapter of exploration of natural gas to the area.

Fourthly, fracturing tests were conducted successfully in the gas reservoir which has low porosity and permeability in East China Sea, creating opportunities for oil and gas reservoirs with low porosity and permeability by bringing a new age of exploration to the area.

These achievements have demonstrated the potentials in offshore China and serve as examples for future exploration work in the area. After getting a better understanding of the geological structure in offshore China, the Company expects the area to continue to be a major source for the Company's sustainable growth in the future.

In addition, the Company made its first commercial discovery, Wushi 17-2 of Wushi sag, in Western South China Sea, and the area may be developed into a new oil zone. The Company's successful discovery and appraisal of the oil and gas structures of Enping 23-1 resulted in expansion of Enping sag in Eastern South China Sea. In the deepwater area of the Qiongdongnan Basin, the Company's partner BG, carried out further appraisals and researches in the area subsequent to the Lingshui 22-1-1 well in 2010.

In 2011, the Company's major exploratory activities are shown in the table below:

	Exploration Wells				New Discoveries		Successful Appraisal Wells		Seismic Data			
	Independent		PSC		Independent	PSC	Independent	PSC	2D		3D	
	Wildcat	Appraisal	Wildcat	Appraisal					Independent	PSC	Independent	PSC

## Table of Contents

### Engineering Construction, Development and Production

The Company had a heavy-loaded engineering construction program with over 10 new projects under construction in 2011. The Company has carefully allocated its operational resources and created synergy among various parties to ensure smooth progress of the projects.

Currently, the Company's major projects expected to commence production in 2012 include Panyu 4-2/5-1 adjustment project, Weizhou 6-9/6-10, Yacheng 13-4 and Liuhua 4-1. The Company's other new projects under construction, including Suizhong 36-1 phase II adjustment and Kenli 3-2 regional development, are expected to commence production after 2012 and would support the Company's medium to long term production growth.

In 2011, the Company faced unprecedented challenges in development and production. Unfavourable factors, such as the suspension of Penglai 19-3 oilfield, the failure of the "Haiyangshiyou 102" single-point mooring system and the impact of typhoons, which occurred more frequently in 2011 than in the previous years, have created significant pressure on the Company's production. Under such circumstances, the Company has been focusing on the following areas to offset the production shortfall and accomplished its adjusted annual production target:

First, fully maximizing the production capacity of producing oil and gas fields mainly through: keeping the decline rate of matured oilfields at a low level by tracking and conducting research on oil reservoirs as well as applying measures such as infill drilling and stratified water injection accordingly; appointing daily management and oil wells management and increasing production time efficiency; and strengthening communication to secure the gas demand of downstream users and the normal production of gas fields;

Secondly, managing the production of new projects. The Company had two new projects in offshore China that successfully commenced production in 2011, namely Jinzhou 25-1 and Lufeng 13-2 adjustment project. Overseas, the Company's newly acquired Eagle Ford shale oil and gas project in the U.S. has contributed to the Company's production output;

Thirdly, actively responding to emergencies and collaborating with various parties to resume production as soon as possible. Given the failure of the "Haiyangshiyou 102" single-point mooring system, the Company overcame difficulties in technology, resources and construction through detailed rectification programs to promptly resume production of the oilfield; and

Fourthly, minimizing the impact of typhoons. Although the oil and gas fields of the Company were repeatedly impacted by typhoons, the Company's proactive warning systems and proper deployment of resources ensured the safety of the Company's oil and gas fields and prevented the typhoons from causing severe harms to the oil and gas fields affected.

In 2011, the Company's net oil and gas production amounted to 331.8 million BOE. The Company's growth in production has remained steady in recent years.

In 2011, the Company further identified its strategies for future development and planned to focus on the following key tasks in the next few years:

First, integrating resources so that oil and gas fields can commence production on schedule. From 2012 to 2015, over 30 new oil and gas fields of the Company in offshore China are expected to commence production successfully. To ensure timely commencement of the new projects, the Company strives to coordinate its resources more effectively and to formulate plans for procuring equipment in advance in order to ensure steady progress of the projects;

Secondly, continuing the comprehensive adjustment works on large-scale development of producing oil and gas fields based on oil reservoir research results. Over the next few years, with the commencement of production of the Suizhong 36-1 phase II adjustment, Jinzhou 9-3 adjustment and Qinhuangdao 32-6 adjustment projects, comprehensive adjustment projects are expected to become a major driving force for the Company's future production growth;

## Table of Contents

Thirdly, capitalizing on the Company's concentrated distribution of oil and gas fields in offshore China to promote development in the area so as to share production facilities and enhance economic efficiency. In 2012, the Weizhou 6-9/6-10 project is expected to commence production and become an example to illustrate the success of the Company's regional development in the area; and

Fourthly, researching and developing technology to improve recovery factor of producing oilfields through application of heavy oil thermal production and fracturing technology on oilfields with low permeability;

Fifthly, strengthening the management of overseas projects and actively coordinating with local partners to ensure the safety and stable production of each project.

The Company will strive to achieve a compound annual growth rate of 6-10% for 2011-2015 and lay a solid foundation for its long-term growth.

### Overseas Development

Having secured a foothold in offshore China, the Company has been exploring opportunities overseas by considering resources, returns and risks based on a value-driven acquisition strategy.

In recent years, the Company has made significant progress in overseas development and raised its degree of internationalization to a new high level. From a geographic perspective, the Company's operations are located in Asia, Africa, Oceania, North America and South America; as for the Company's resource types, it has shifted from the traditional oil and gas resources to unconventional oil and gas resources such as shale oil and gas as well as oil sands. Overseas reserves, production and oil and gas sales revenue account for 28.6%, 21.1% and 13.7% of the Company's total reserves, production and oil and gas sales revenue, respectively, thereby becoming an integral part of the Company's assets.

To address the needs for its overseas business development, the Company focused on strengthening overseas operation management, improving the management structure and increasing human resources in 2011, so as to strengthen the management of overseas assets.

In 2011, the Company's overseas development achieved the following:

First, expansion of the shale oil and gas business in the U.S. Subsequent to the acquisition of the Eagle Ford project in the U.S. in 2010, the Company purchased a 33.3% undivided interest in the Niobrara project from Chesapeake Energy Corporation at a total consideration of US\$1.267 billion. The block has 800,000 net acres.

Secondly, expansion of the oil sands business in Canada. In November 2011, the Company completed the deal of acquiring OPTI Canada Inc., or OPTI, at a consideration of approximately US\$2.1 billion. This transaction enables the Company to expand its investment in oil sands which has abundant resource. Through cooperation with the operator Nexen, the Company is able to explore the growth potential of the Long Lake project and three other oil sands leases, which contributes to the reserves and production of the Company in mid to long term.

Thirdly, tapping into the Alberta Basin, a major basin to be developed in East Africa. In March 2011, the Company entered into agreements with Tullow Oil plc to acquire a one-third interest in each of Exploration Areas 1, 2 and 3A in Uganda for approximately US\$1.467 billion in cash. The project is expected to become one of Africa's largest onshore oil and gas development projects in recent years. The deal was closed in February 2012.

In addition, the Company announced in December 2011 the sale of CNOOC ONWJ Ltd., a subsidiary of the Company, for approximately US\$212 million to EMP International (BVI) Limited. CNOOC ONWJ Ltd. holds a 36.72% working interest in the Offshore Northwest Java PSC in Indonesia.

## Table of Contents

In sum, the Company has been actively managing its overseas assets as part of its overseas development. Through flexible strategy, the Company balances and optimizes overseas asset portfolio, having taken the resources, returns and risks into consideration, resulting in a more balanced distribution of overseas assets with reserves and production continuing to increase. Meanwhile, the Company has been tapping into the unconventional oil and gas industry of shale oil and gas as well as oil sands on an appropriate scale, which provides a basis of rich resource to sustain future development and helps the Company seize growth opportunities in the future and enhance its development potential.

### Regional Overview

#### Offshore China

##### Bohai

Bohai is the most important crude oil producing area for the Company. The crude oil produced in this region is mainly heavy oil. As of the end of 2011, the reserve and daily production volume in Bohai were 1,099.8 million BOE and 426,190 BOE/day, respectively, representing approximately 34.5% and 46.9%, respectively, of the Company's total reserves and daily production. The operation area in Bohai is mainly shallow water with a depth of 10 to 30 meters.

Bohai is rich in oil and gas resources and has been one of the Company's primary areas for exploration and development. In recent years, the Company made several commercial discoveries in this region every year. In 2011, the Company made four successful discoveries in Bohai, namely Qinhuangdao 33-2, Qinhuangdao 33-3, Bozhong 34-3 and Kenli 9-1, all being independent new oil discoveries. In addition, 10 oil and gas structures were successfully appraised, namely Qinhuangdao 33-1 S, Qinhuangdao 33-2, Qinhuangdao 33-3, Kenli 10-1, Bozhong 34-3, Bozhong 34-4, Bozhong 2-1, Jinzhou 20-5, Kenli 6-4 and Qikou 18-2. In 2011, the Company's significant accomplishments in Bohai included:

First, progress has been made in the exploration of lithologic traps surrounding the Shijiutuo uplift area. After successfully discovering Qinhuangdao 33-1S in 2010, the Company drilled two oil and gas structures at shallow formation, namely Qinhuangdao 33-2 and Qinhuangdao 33-3. These discoveries are all lithologic traps, bringing the exploration in Bohai, which had been focusing on structural traps originally, into a new phase. The area may be developed into a new large-scale oilfield group and become another major hotspot for the Company's future growth in production.

Secondly, the exploration of the slopes to the south of the Yellow River Mouth sag was successful with a new discovery of Kenli 9-1.

Thirdly, exploration in proximity to the oilfield of Yellow River Mouth sag achieved satisfactory results with a new discovery of Bozhong 34-3.

Benefiting from these new discoveries and successful appraisals coupled with the increase in reserves from rolling exploration and development of existing oil and gas fields, Bohai's reserve replacement ratio of crude oil was 101.8%, which demonstrates the potential of Bohai as the Company's core exploration area.

On top of overcoming difficulties including inexorable sea ice at the beginning of the year, malfunction of the "Haiyangshiyou 102" single-point mooring system, oilfield suspension across the whole area due to damaging typhoon "Plum" in the second half of the year, and shutdown of the Penglai 19-3 oilfield, the Company's production in Bohai remained steady, which was mainly attributable to:

First, the Company explored the potential of producing oil and gas fields to ensure a steady production. As for the Suizhong 36-1 oilfield, the Company continued the implementation of other adjustment measures such as infill drilling to sustain the production growth of this largest independent oilfield in offshore China. By optimizing water injection and increasing the production time efficiency, the Company maintained steady production at Jinzhou 25-1S and Bozhong 34-1 oilfields.

## Table of Contents

Secondly, through careful integration and coordination of resources, the Company's new oilfields and new development wells continued to commence production. New development wells at Jinzhou 25-1S oilfield commenced production successfully with increased production; Jinzhou 25-1 oilfield commenced production on time and contributed to its production growth.

### Western South China Sea

Western South China Sea is one of the most important natural gas producing areas for the Company. Currently, the typical water depth of the Company's operation area in this region ranges from 40 to 120 meters. As of the end of 2011, the reserves and daily production volume in Western South China Sea reached 586.7 million BOE and 138,712 BOE/day, respectively, representing approximately 18.4% and 15.3%, respectively, of the Company's total reserves and daily production.

In 2011, the Company had 3 independent new discoveries in Western South China Sea, including Weizhou 12-1S, Weizhou 11-7N and Wushi 17-2 and successfully appraised 5 oil and gas structures.

For the Yinggehai Basin, the Company successfully appraised Dongfang 13-1 middle formation, which had been discovered in 2010, assuring the exploration of natural gas under the high temperature and high pressure environment of Yinggehai, which indicates the existence of large-scale gas field under the high temperature and high pressure condition in Yinggehai. The successful appraisal is expected to bring the exploration of natural gas in the Yinggehai Basin into a new phase.

In addition, the discovery of Wushi 17-2 demonstrated the exploration potential of east Wushi, which may be developed into a new oil zone.

As for development and production, typhoons and the natural decline in certain oil and gas fields have affected the Company's production, resulting in a slight decrease in the annual production volume. In this case, the Company continued to implement streamlined management, optimization and improved the production processes of all oil and gas fields. Meanwhile, the Company reduced the impact of typhoons and maintenance downtime on its production activities through detailed planning. In addition, through the key offshore facility checks and the integrated management of marine operations, the Company ensured the normal operation of equipment and maintain high production time efficiency.

During the development of the Yacheng 13-4 gas field, the Company applied a series of deepwater gas field development techniques designed for deepwater oil and gas fields by trials and practice and accumulated technologies and experience that are suitable for future deepwater development.

### Eastern South China Sea

Eastern South China Sea is one of the Company's most important crude oil producing areas. Currently, the typical water depth of the Company's operation area in this region ranges from 100 to 300 meters. The crude oil produced is mostly of light to medium gravity. As of the end of 2011, the reserves and daily production volume in Eastern South China Sea reached 519.9 million BOE and 146,864 BOE/day, respectively, representing approximately 16.3% and 16.2%, respectively, of the Company's total reserves and daily production.

In 2011, the Company continued to achieve positive results from the rolling exploratory activities in Eastern South China Sea with two new independent discoveries, namely Enping 23-1 and Enping 23-2. In addition, the Company

successfully appraised two oil and gas structures, namely Lihua 16-2 and Enping 23-1. These new discoveries and successful appraisals increased the reserves in Enping area and enhanced the economic benefits of development in the area.

In addition, the oil and gas structures of Panyu 10-4W drilled in Eastern South China Sea unveiled that the discovery of Yuehai shallow oil formation may be a breakthrough for development in the Pearl River Mouth Basin, which may bring the oil exploration in Eastern South China Sea into a new phase.

## Table of Contents

In 2011, the Company overcame adverse conditions such as typhoons. The Company's net oil and gas production derived from Eastern South China Sea rose steadily, which was attributable to the Company's active implementation of infill drilling in mature oilfields. The full deployment of enhanced recovery measures helped to increase production. For example, investment in infill drilling of Xijiang 30-2 oilfield has increased the production of the oilfield. In addition, increased gas supply of the Panyu 30-1 gas field to Zhuhai terminal has also contributed to production growth.

Lufeng 13-2 adjustment project commenced production at the end of 2011 and its peak production is expected to reach 33,000 barrels per day. In addition, the Company actively engaged in the development of Panyu 4-2/5-1 adjustment project, which is expected to commence production in 2012. Demonstrating the Company's large-scale comprehensive adjustment for producing oil and gas fields, these comprehensive adjustment projects commenced production successfully and are expected to become a major driver for future growth in production.

In addition, the Company will actively coordinate with its partners to promote the development and construction of the first large-scale deepwater natural gas project Liwan 3-1 in offshore China.

### East China Sea

East China Sea is the least explored area among the Company's four principal producing regions in offshore China. The typical water depth of the Company's operation area in this region is approximately 90 meters. As of the end of 2011, approximately 2.2% of the Company's reserves and 0.6% of the Company's production were derived from East China Sea.

In 2011, the Company continued to focus on natural gas exploration surrounding the core areas, having four new discoveries and establishing a foundation for future growth in production. The Company has also conducted fracturing test of exploration wells for gas-bearing sands with low porosity and permeability, which achieved positive results and laid a foundation for the exploration of oil and gas reservoirs with low porosity and permeability, bringing the exploration of the area into a new phase.

In 2011, with increasing gas delivery quantity of downstream users, the Company's production volume in East China Sea increased steadily.

### Overseas

#### Asia

Asia was the first overseas region that the Company entered into and has become one of its major overseas oil and gas producing areas. Currently, the Company holds oil and gas assets in Asia mainly in Indonesia and Iraq. As of the end of 2011, the reserves and daily production volume derived from Asia (excluding China) reached 223.2 million BOE and 53,872 BOE/day, respectively, representing approximately 7.0% and 5.9%, respectively, of the Company's total reserves and daily production.

#### Indonesia

In Indonesia, the Company mainly owns interests in the following contracts: the SES PSC, the Malacca Strait PSC and Poleng Technical Assistance Contract. Among these, the Company is the operator of the SES block and owns approximately 65.54% of its interests. All contracts mentioned above are currently at the production stage.

The Company also owns approximately 13.90% interests in the Tangguh LNG Project in Indonesia. Located in West Papua and comprising three blocks, namely Berau, Muturi and Wiriagar, this project commenced production in 2009.

## Table of Contents

In addition, the Company owns interests in the following PSCs: the South East Palung Aru PSC, the Batanghari PSC and the Madura Strait PSC.

In May 2011, the West Madura PSC expired and the Company had not entered into the new PSCs thereafter.

In December 2011, the Company announced the sale of CNOOC ONWJ Ltd., a subsidiary of the Company, for approximately US\$212 million to EMP International (BVI) Limited, which has a 36.7205% working interest in Offshore Northwest Java PSC in Indonesia. This was an important step for the Company to actively manage overseas assets and optimize its asset portfolio.

In 2011, the Company had 3 new discoveries in Indonesia. All of these discoveries are located in core areas, which can share production facilities with existing oil and gas fields and benefit from economies of scale.

In 2011, considering that most producing oil and gas fields in Indonesia had become mature, as the operator of the SES, the Company adopted various measures to maintain and increase production such as water flooding and infill drilling, in order to keep the decline rate of these mature oilfields at a low level.

### Iraq

In 2010, the Company entered into a technical service contract for the development and production of the Missan oilfields in Iraq, according to which the Company acts as the lead contractor and holds 63.75% participating interest.

In 2011, the Company took over the operation of the Missan oilfield group. Scheduled to commence drilling in 2012, the project has been making steady progress with drilling rigs readily available on site. Cost recovery is expected to begin in 2012 and the project is expected to contribute to the Company's production growth.

For a technical service contract, the cost of operation for the Missan Project is relatively high. Nevertheless, major oil and gas companies in the world have all entered into the exploration and development industry in the Middle East through technical service contracts, demonstrating the common view of the industry in this area.

### Other Regions in Asia

The Company owns interests in several blocks in Myanmar, Cambodia and Qatar. These blocks are still under exploration.

### Oceania

Currently, the Company's oil and gas resources in Oceania are all located in Australia. As of the end of 2011, the reserves and daily production volume derived from Oceania reached 110.7 million BOE and 25,195 BOE/day, respectively, representing approximately 3.5% and 2.8%, respectively, of the Company's total reserves and daily production.

### Australia

The Company owns 5.3% of the interests in Australia's North West Shelf Project. The project has commenced production and is currently supplying gas to customers such as the Dapeng LNG Terminal in Guangdong, China.

In 2011, the North West Shelf Project generated stable production volumes with economic efficiency.

## Table of Contents

### Africa

Africa is one of the Company's overseas areas with a large reserve base. The Company's assets in Africa are primarily located in Nigeria and Uganda. As of the end of 2011, the reserves and daily production volume derived from Africa reached 133.7 million BOE and 56,348 BOE/day, respectively, representing approximately 4.2% and 6.2%, respectively, of the Company's total reserves and daily production.

### Nigeria

The Company owns a 45% interest in the OML 130 block in Nigeria, which is a deepwater project and comprises four oilfields, namely Akpo, Egina, Egina South and Preowei. The Akpo oilfield commenced production in March 2009 and has reached its designed peak production capacity.

In 2011, the Company conducted preliminary development work on the other three oilfields including the Egina oilfield together with the operator.

### Uganda

In 2011, the Company signed the sale and purchase agreement to acquire one-third interests of Tullow Oil plc in each of Exploration Areas 1, 2 and 3A in Uganda. Exploration Areas 1, 2 and 3A are located at the Lake Albert Basin in Uganda, which is one of the most promising basins with oil and gas resources in Africa.

In February 2012, the Company and Tullow Oil Plc closed the deal. The Company will operate the new Kanywataba exploration license in the former EA 3A, and the Kingfisher production license which was converted due to the discovery in the former EA 3A. Tullow and TOTAL S.A. will operate EA 2 and EA 1, respectively.

### Other Regions in Africa

Besides Nigeria and Uganda, the Company also owns interests in several blocks in Equatorial Guinea, the Republic of Congo and Algeria. These blocks are currently under exploration.

### North America

The Company holds interests in oil and gas blocks in the U.S., Canada as well as Trinidad and Tobago in North America. In addition, the Company also holds interests in MEG Energy Corporation ("MEG") in Canada. As of the end of 2011, the Company's reserve and daily production volume derived from North America reached 178.7 million BOE and 9,096 BOE/day, respectively, representing approximately 5.6% and 1.0%, respectively, of the Company's total reserves and daily production.

### The U.S.

The Company has acquired a 33.3% interest in each of the two shale projects in the U.S., namely the Eagle Ford project, which is located in South Texas with 600,000 net acres, and the Niobrara project, which is located in northeast Colorado and southeast Wyoming with 800,000 net acres. The operator of these projects is Chesapeake.

The Eagle Ford project commenced production in 2011 and achieved a steady increase in production volume. The Company plans to work with the operators to fine tune various operations, including drilling, fracturing as well as midstream and downstream construction in order to increase production. Meanwhile, the Niobrara project is being actively developed.

The development of shale oil and gas has become one of the growth areas for the world's oil and gas exploration and development. The Company expects that participation in such business could help it to achieve sustainable growth and create value for its shareholders.

## Table of Contents

In addition, the Company participates in the drilling of four deepwater exploration wells at the Gulf of Mexico, and owns several exploration blocks in Alaska.

### Canada

In 2005, the Company acquired part of the shares of MEG in Canada. In August 2010, MEG's shares started trading on the Toronto Stock Exchange in Canada, resulting in a large appreciation of the value of the Company's interest in MEG. Currently, the Company owns 14.2% of the shares of MEG.

In 2011, the Company completed the acquisition of equity interest in OPTI, an oil sands producer in Canada. The major assets acquired included a 35% working interest in Long Lake and three other oil sands projects located in the Athabasca region of northeastern Alberta.

The Long Lake project is currently at the production stage and is expected to contribute to the Company's production with approximately 10,000 barrels per day in 2012. Currently, the Company has deployed engineers and managers to participate in the development and management of the project.

Canada is a prime location in the world with rich oil sands resources. Since oil sands are expected to become one of the new growth areas of oil and gas exploration and development in the future, the Company expects that making a foothold in the region could help to achieve sustainable growth of the Company.

In addition, the Company also owns a 60% interest in the Northern Cross (Yukon) Ltd., which owns oil and gas blocks in the Yukon area in Canada.

### Trinidad and Tobago

In 2009, the Company acquired a 12.5% interest in the 2C block and a 12.75% interest in the 3A block in Trinidad and Tobago. The 2C block commenced production of crude oil in 2005. The natural gas field commenced production in 2011, leading to a significant increase in the production volume.

### South America

The Company mainly holds a 50% interest in Bidas Corporation. The Company's interest in this project is accounted by the equity method. As of the end of 2011, the Company's reserves and daily production volume derived from South America reached 266.4 million BOE and 46,877 BOE/day, respectively, representing approximately 8.4% and 5.2%, respectively, of the Company's total reserves and daily production.

### Argentina

In March 2010, the Company announced to reorganize Bidas into a 50-50 joint venture with BEH for approximately US\$3.1 billion in cash. With the completion of the transaction, each of the Company and BEH holds a 50% interest in Bidas, and makes management decisions jointly. Bidas holds a 40% interest in Pan American Energy in Argentina, or PAE.

Through its affiliates (including the interest in PAE), Bidas maintains oil and gas exploration and production activities in Argentina. Following the acquisition, the Company has deployed senior management staff to participate in the daily management of Bidas. In 2011, the enhanced recovery measures of Bidas' major producing blocks took effect and kept production stable, making a significant contribution to the production growth of the Company.

In November 2010, Bidas and BP PLC (“BP”) entered into a share purchase agreement under which Bidas proposed to acquire the 60% interests in PAE held by BP. In November 2011, Bidas sent to BP a letter to terminate the agreement. As a result of the termination, the Company would continue its participating interest in PAE through Bidas in accordance with the original co-management arrangement with BEH.

East China Sea	—	—	15	7.5	—	—	85,413	85,413
Subtotal	1,967	1,669.4	129	110.7	5,523	5,523	256,286	256,286
Overseas								
Asia	516	298.4	19	6.3	19,297	7,720	61,353	55,500
Oceania	—	—	48	2.5	3,950	209	—	—
Africa	18	8.1	—	—	1,295	583	8,445	2,947
North America	1,573	523.7	4	0.5	1,529	511	7,702	3,429
Subtotal	2,107	830.2	71	9.3	26,071	9,023	77,500	61,876
Total	4,074	2,500	200	120	31,594	14,546	333,786	318,316

The gross acreage disclosed above includes the total number of acres in major blocks that we own an interest. The net acreage includes our wholly owned interests and the sum of our fractional interests in gross acreage.

## Delivery Commitment

We have certain delivery commitments under the take-or-pay contracts for sales of natural gas. In 2011, the annual sales from our largest gas contract contributed to only approximately 1.1% of our total oil and gas sales. Moreover, total revenues from gas sales account for less than 5.2% of our total revenues in 2011. Therefore, we believe that we did not have any material delivery commitment as of the end of 2011.

## Sales and Marketing

### Sales of Crude Oil

The Company sells its crude oil produced in offshore China to the PRC market through CNOOC China Limited, its wholly owned subsidiary. The Company sells its crude oil produced overseas to international and domestic markets through China Offshore Oil (Singapore) International Pte Ltd, also its wholly owned subsidiary.

The Company's crude oil sale prices are mainly determined by the prices of international benchmark crude oil of similar quality, with certain premiums or discounts subject to prevailing market conditions. Although the prices are quoted in U.S. dollars, customers in China usually pay Renminbi. The Company currently sells three types of crude oil in China, namely light crude, medium crude and heavy crude which are benchmarked by Tapis, Daqing, and Duri, respectively. The Company's major customers in China are CNOOC, Sinopec and PetroChina.

Table of Contents

In 2011, the international crude oil market continued to be affected by contingencies and geopolitical tensions, with the international oil prices (Brent) staying at high levels most of the time. Meanwhile, the upgrading of refineries in Asia in recent years increased the refining capacity of heavy oil; the earthquake and tsunami in Japan, coupled with the escalation of conflicts in the Middle East and North Africa regions, further boosted the benchmark crude oil prices in the Far East. Overall, the demand for crude oil, product oil and fuel oil in Asia remained strong and further pushed up the oil prices in the Far East in 2011.

Capturing the opportunities of strong demand for crude oil in China and the higher benchmark oil prices in the Far East, the Company has been closely monitoring market movements and meeting the customers' demand to keep the Company's average realized oil price at a higher level. In 2011, the Company's average realized oil price was US\$109.75/barrel, representing an increase of 40.8% year over year.

The table below sets forth the sales and marketing volumes in offshore China for each of these types of crude oil for the periods indicated.

Sales and Marketing Volumes (mmbbls)(1)	Benchmark Prices	Year ended December 31,		
		2009	2010	2011
Light Crude	APPI(2)			
	Tapis(3)	12.6	11.3	12.4
Medium Crude	Daqing			
	OSP(4)	94.9	121.8	114.4
Heavy Crude	ICP Duri(5)	109.3	148.6	136.6

(1) Includes the sales volumes of us and our foreign partners under production sharing contracts.

(2) Asia Petroleum Price Index.

(3) Tapis is a light crude oil produced in Malaysia.

(4) Daqing official selling price. Daqing is a medium crude oil produced in northeast China.

(5) Duri is a heavy crude oil produced in Indonesia. The Indonesian crude price ("ICP") Duri has been the sole benchmark price for heavy crude since 2006.

#### Sales of Natural Gas

The Company's natural gas sales prices are determined by the Company's negotiations with its customers. The Company's natural gas sales agreements are generally long-term contracts, which normally provide the periodic price adjustment mechanism. The Company's natural gas customers are primarily located on the southeastern coast of China, including Hong Kong Castle Peak Power Company Limited, CNOOC Gas and Power Group, and China BlueChemical Ltd.

The LNG sourced by the Company from the North West Shelf Project in Australia and the Tangguh LNG Project in Indonesia is mainly based on long-term supply contracts and is sold to various customers in the Asia-Pacific region, including LNG Terminals in Guangdong Dapeng and Fujian Putian, China.

In 2011, the Company's average realized gas price was US\$5.15/Mcf, representing a 14.7% increase over the previous year, which is mainly benefitted from: (i) the Company's negotiation with major customers that increased the sales price after the PRC government raised the onshore natural gas benchmark price in the first half of 2010; (ii) higher price for natural gas from oil and gas fields that have commenced production recently; (iii) higher sales price for certain production of Tangguh LNG in Indonesia in the spot market.

Table of Contents

The table below sets forth the average realized prices for our crude oil and natural gas for the periods indicated.

	Year ended December 31,		
	2009	2010	2011
Average Realized Prices			
Crude Oil (US\$/bbl)	60.61	77.93	109.75
Natural Gas (US\$/mcf)	4.01	4.49	5.15
West Texas Intermediate (US\$/bbl)	61.99	79.49	95.08

The international benchmark crude oil price, West Texas Intermediate, was US\$98.83 per barrel as of December 31, 2011 and US\$103.02 per barrel as of March 31, 2012.

The following table presents, for the periods indicated, our revenues sourced in and outside the PRC:

	Year ended December 31,		
	2009	2010(1)	2011
	(Rmb in millions, except percentages)		
Revenues sourced in the PRC	80,198	133,631	185,671
Revenues sourced outside the PRC	24,997	46,405	55,273
Total revenues	105,195	180,036	240,944
% of revenues sourced outside the PRC	23.8%	25.8%	22.9%

(1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

#### Procurement of Services

We usually outsource work in connection with the acquisition and processing of seismic data, well drilling, well logging and perforating services and well control and completion service to independent third parties, or CNOOC and its affiliates.

Besides building floating production storage and offloading, or FPSO, with our partners, we employ independent third parties or CNOOC and/or its affiliates for FPSO services and other services.

We conduct a bidding process to determine who we employ to construct platforms, terminals and pipelines, to drill production wells and to install offshore production facilities. Both independent third parties and CNOOC affiliates participate in the bidding process. We are closely involved in the design and management of services by contractors and exercise extensive control over their performance, including their costs, schedule, quality and health, safety, and environment measures.

#### Research and Development

In 2011, the Company continued to focus on the R&D of exploration, development and engineering of offshore oil and gas to secure stable growth in reserves and production. The Company has applied certain research findings to the

operations and generated positive results, and one of the exploration research findings was honored with the Second-Class State Technological Progress Award of China in 2011.

#### Major Scientific Project Development

With a view to strengthening the Company's key technologies and proactively developing technologies for the Company's sustainable development in the mid to long term, the Company has established a number of major projects on key technologies in 2011, mainly focusing on major technology aspects including: new areas and technologies for offshore oil exploration, efficient development and enhancement of oil recovery of offshore oilfield, deepwater oilfield development projects and exploration and development for low porosity and low permeability oil and gas fields.

In addition, the Company has been engaged for a number of Chinese national research projects such as "Formation and exploration technologies of large and medium-sized offshore oil and gas fields", and has made steady progress in 2011.

#### Innovative Development of Key Technologies

## Table of Contents

To provide strong technical support for new discoveries of oil and gas reserves and to maintain and increase oil and gas production, the Company increased the research and application of its exploration development technology in 2011. By using the new technology combined with exploration, drilling and testing, the Company successfully conducted drilling at the Bozhong 21-2-1 wildcat, the deepest exploratory well in Bohai, at a depth of 5,141 meters with the discovery of natural gas, which substantially expanded the exploration territory of Buried Hill Structure in Bohai.

Oil pipeline acidizing technology was first applied to the horizontal wells in the Bohai oilfield, which effectively reduced pollution and improved the production capacity. In the Suizhong 36-1 oilfield, blockage removal technology for horizontal wells has been successfully applied to six production wells, enhancing the osmotic pressure of oil pay with increased yield.

In addition, the Company's drilling and construction works achieved innovative technology breakthroughs. The Yacheng 13-1 gas field achieved a success in well completion technology of high temperature and ultra-low pressure drilling, ensuring safe drilling operations with significant difference in drilling pressure.

### Health, Safety and Environmental Protection, or HSE

As an offshore exploration and production company, the Company faces significant operational risks and always emphasizes on HSE. The Company promotes the philosophy and culture of HSE among its employees. The Company strives to establish a comprehensive management system to improve the employees' awareness of HSE during operations and strengthen their risk identification and risk management skills.

Facing the complex situation of safety and environmental protection, the Company continued to improve the management system and promote intrinsic safety management while strengthening inspection and training as well as improving emergency response in 2011.

In 2011, the Company continued to enhance the risk identification and control on HSE and tried to identify and prevent key risks. The Company conducted investigations on four branches in China and timely rectified the potential risks identified in respect of certain safety and environmental protection issues. The Company prepared a report to summarize the self-examination results of all business units.

The Company conducted safety inspections on all oil and gas fields as well as the production facilities to prevent the potential risks identified. In addition, the Company has further improved the stipulations on the operational safety and environmental protection on well drilling and completion.

The Company has also imposed HSE standards on its service contractors. To further regulate the safety management of helicopters, the Company renewed the engagement of professional assessment companies to conduct safety checks on helicopter contractors. The contractors were required to rectify all problems identified.

In order to improve the emergency response capability, the Company's headquarters conducted numerous professional trainings in areas such as safety certifications and safety supervision in 2011. More than 400 person-times of employees participated in these trainings. Further, over 30,000 person-times of staff members and contractors attended the professional trainings conducted by various branches of the Company.

In 2011, there was no accident causing critical casualties. The Company's Occupational Safety and Health Administration ("OSHA") statistics maintained at a good level, and the Company's performance continued to improve.

Review on oil spill accidents of Penglai 19-3 oilfield

Penglai 19-3 oilfield, located in Bohai, is an oilfield operated under a PSC, pursuant to which COPC is the operator and responsible for the daily operations of the oilfield.

## Table of Contents

According to the report from the operator, a seepage of oil from the seabed was found near Platform B in early June 2011. It was also observed in mid June that a small-scale influx occurred in one of the wells being drilled in Platform C, resulting in another oil spill.

After the accident occurred, the Company, in accordance with the provisions provided in related contracts and agreements and upon the request of the operator, initiated the emergency response plan and deployed numerous personnel and resources to assist and support the operator on the oil spill follow-up work.

On July 13, 2011, the operator informed the Company that the State Oceanic Administration of the PRC (“SOA”) requested the operator to suspend production from Platforms B and C until the risk of oil spill has been eliminated.

On September 2, 2011, the SOA ordered the operator to suspend water injection, drilling and oil and gas production operations (the “Three Suspensions”) at the entire Penglai 19-3 oilfield; to take effective measures to continue screening out the potential oil spill risks, seal all sources of oil spillage and complete the cleanup work in a timely manner; to recompose the Oceanic Environmental Impact Assessment (“EIA”) for the development of Penglai 19-3 oilfield and, upon further approval on the EIA, to resume the operations gradually; to revise the Overall Development Plan (“ODP”), and the “Three Suspensions” will only be lifted after the approval of the ODP.

On September 12, 2011, CNOOC announced that it approved the Depressurization Plan and Sealing Plan of the operator.

On November 11, 2011, the SOA announced the investigation conclusion made by the joint investigation team of the government that, “ConocoPhillips China Inc. violated the Overall Development Plan during the production operation on Penglai 19-3 oilfield, had defects in its procedures and management, and did not take necessary measures after obvious accident signs emerged, which altogether eventually resulted in an accident involving liabilities, causing significant oceanic pollution by oil spill.”

### Operating Hazards and Uninsured Risks

Our operations are subject to hazards and risks inherent in the drilling, production and transportation of crude oil and natural gas, including pipeline ruptures and spills, fires, explosions, encountering formations with abnormal pressures, blowouts, cratering and natural disasters, any of which can result in loss of hydrocarbons, environmental pollution and other damage to our properties and the properties of operators under PSCs. In addition, certain of our crude oil and natural gas operations are located in areas that are subject to tropical weather disturbances such as typhoons, some of which can be severe enough to cause substantial damage to facilities and interrupt production.

As part of the protection against operating hazards, we maintain insurance coverage against some, but not all, potential losses, including the loss of wells, blowouts, pipeline leakage or other damage, certain costs of pollution control and physical damages on certain assets. Our insurance coverage includes offshore oil and gas field properties all risks insurance and construction insurance, protection and indemnity insurance, operator extra expenses insurance, marine cargo insurance and third party liabilities and comprehensive general liability insurance. The operators of the projects in which we participate overseas are required by local law to purchase insurance policies customarily taken out by international oil and gas companies.

We also carry third-party liability insurance policies to cover (i) claims made against us by or on behalf of individuals who are not our employees in the event of personal injury or death and (ii) legal liabilities for environmental damages resulting from our onshore and offshore activities, including oil spills. In addition, we impose contractual requirements upon our contractors to purchase insurance policies that cover their liabilities for the personal injuries of their own employees. Our contractors are obligated to indemnify us against such claims.

As of December 31, 2011, we paid an annual insurance premium of approximately US\$85 million and US\$52 million for operational insurance and all risk construction insurance, respectively, to maintain our insurance coverage. We believe that our level of insurance is adequate and customary for the PRC petroleum industry and international practices. However, we may not have sufficient coverage for some of the risks we face, either because insurance is not available or because of high premium costs. See “Item 3—Key Information—Risk Factors—Risks Relating to Our Operations—Extreme weather conditions may have a material adverse impact on us and could result in losses that are not covered by insurance.”

## Table of Contents

We have purchased a number of insurance policies with varying policy limits to meet our risk management requirements and cover our potential liabilities in the event that any of our rigs is involved in an explosion or similar event at any of our offshore locations. The policy limits and other terms and conditions of these insurance policies comply with all applicable laws and regulations in the PRC and other relevant jurisdictions. We currently have 70 insurance policies in effect in 2011, including 56 for operational insurance and 14 for construction insurance. The coverage under operational insurance policies and construction insurance policies are subject to policy limits of US\$18.9 billion in aggregate and US\$3.2 billion in aggregate, respectively. The coverage under operator's extra-expense and third-party liabilities insurance policies are mainly subject to policy limits of US\$20 million to US\$40 million for each and every occurrence. The deductible for each insurance policy mainly ranges from US\$2 million to US\$5 million for different types of insurance policies.

For all of our offshore operations, we have conducted comprehensive environmental impact evaluations and adopted emergency plans to deal with potential oil spills. Pursuant to the requirements of the PRC government, the evaluations and plans for our offshore operations in the PRC have been reviewed and approved by the industry experts and have been filed with the PRC government. The evaluations and plans for our offshore operations overseas have complied with the legal and regulatory requirements of the relevant local jurisdictions.

In addition, we currently have seven oil spill emergency handling bases, to which we have contributed land and funds for construction, separately located in seven cities in the PRC, namely Suizhong, Tanggu, Longkou, Huizhou, Shenzhen, Zhuhai and Weizhou. All the oil spill emergency handling bases are close to our workplaces of operations, and in the event of any oil spill, explosion or other similar events, they would react promptly and assist us in coping with such accidents effectively. We also cooperate with Oil Spill Response Limited, an industry-funded company specializing in oil spill response with operating bases in the United Kingdom, Singapore and Bahrain, to deal with the environmental impact that would occur in the event of oil spills or leakage resulting from our offshore operations. We have entered into contracts with Oil Spill Response Limited for certain of our exploration projects, including our project in Equatorial Guinea.

## Competition

### Domestic Competition

The oil and gas industry is very competitive. We compete in the PRC and in international markets for customers as well as capital to finance our exploration, development and production activities. Our principal competitors in the PRC are PetroChina and Sinopec.

We price our crude oil on the basis of comparable crude oil prices in the international market. The majority of our customers for crude oil are refineries affiliated with CNOOC, Sinopec and PetroChina to which we have been selling crude oil, from time to time. Based on our past experiences with these refineries, we believe that we have established stable business relationships with them.

We are the dominant player in the oil and gas industry in offshore China and, through CNOOC, are the only company permitted to engage in oil and gas exploration and production in offshore China with foreign parties under PSCs. We may face increasing competition in the future from other oil and gas companies in obtaining new PRC offshore oil and gas properties, or, as a result of changes in current PRC laws or regulations permitting an expansion of existing companies' activities or new entrants into the industry.

Table of Contents

As part of our business strategy, we intend to expand our natural gas business to meet rapidly increasing domestic demand. Our principal competitors in the PRC natural gas market are PetroChina and Sinopec.

## Foreign Competition

Imports of crude oil are subject to import licenses, handling fees and other restrictions. The PRC government also restricts the availability of foreign exchange with which the imports must be purchased. The combination of licenses and restrictions on foreign exchange has, to some extent, limited the competition from imported crude oil.

As a result of China joining the World Trade Organization as a full member on December 11, 2001, it is required to further reduce its import tariffs and other trade barriers over time, including with respect to certain categories of petroleum and crude oil. At present, CNOOC, Sinopec, PetroChina and several other domestic state-owned enterprises have received permission to import crude oil on their own. Foreign owned or foreign invested entities and other non-state-owned enterprises are subject to certain import quotas.

## Segment Information

The following table shows the breakdown of our total consolidated operating revenues for each of the periods indicated and the percentage contribution of each revenue component to our total operating revenues:

	2009		Year ended December 31, 2010(1)		2011	
	Rmb in millions	%	Rmb in millions	%	Rmb in millions	%
Independent operations	44,657	42.5	85,916	47.7	114,630	47.6
Joint-arrangements	48,598	46.2	79,183	44.0	97,006	40.3
Trading businesses	20,752	19.7	32,446	18.0	50,469	20.9
Unallocated and elimination	(8,812 )	(8.4 )	(17,509 )	(9.7 )	(21,161 )	(8.8 )
Total operating revenues	105,195	100.0	180,036	100.0	240,944	100.0

(1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

We are mainly engaged in the exploration, development, production and sales of crude oil and natural gas primarily in offshore China. For the year ended December 31, 2011, approximately 77.1% of our total revenue was sourced in the PRC. Our overseas activities are mainly conducted in Indonesia, Myanmar, Iraq, Australia, Nigeria, Uganda, Argentina, the United States, Canada and other countries.

## Regulatory Framework in the PRC

## Government Control

The PRC government owns all of China's petroleum resources and exercises regulatory control over oil exploration and production activities in China. We are required to obtain various governmental approvals, including those from the Ministry of Land and Resources, the State Oceanic Administration, the National Development and Reform Commission and the Ministry of Commerce before we are permitted to conduct production activities. Our sales are

coordinated by the National Development and Reform Commission. For independent operations and joint exploration and production with foreign enterprises, we are required to obtain various governmental approvals, through CNOOC, including permit for exploration blocks, approval of a reserve report, the PSCs between CNOOC and the foreign enterprises, environmental impact report submitted through CNOOC, overall development plan, and extraction permit.

## Table of Contents

We explore and develop our offshore China reserves under exploration and production licenses granted by the PRC government. Exploration licenses, which are generally granted for individual blocks, require holders to make an annual minimum exploration investment and pay an annual exploration license fee. The annual minimum investment and license fees are based on the area under license and increase over the life of the exploration license. Production licenses, which are generally granted for individual fields, require holders to pay an annual production right usage fee based on the area under license. All of our proved reserves in offshore China are under production licenses granted by the PRC government.

Since the early 1980s, the PRC government has adopted policies and measures to encourage the development of the offshore petroleum industry. These policies and measures, which were applicable to CNOOC's operations prior to the reorganization, became applicable to our operations in accordance with an undertaking agreement between us and CNOOC. As approved by the PRC government, these policies and measures have provided us with benefits mainly including the exclusive right to explore for, develop and produce petroleum in designated areas in offshore China in cooperation with international oil and gas companies and to sell petroleum in China, and the flexibility to set our prices in accordance with international market prices and determine where to sell our crude oil, with only minimal supervision from the PRC government.

Although we historically have benefited from the foregoing special policies, we cannot assure that such policies will continue in the future.

### Fiscal Regimes for Independent Operations

#### Taxation

We are subject to income taxes on an entity basis on income arising in or derived from the tax jurisdictions in which we and each of our subsidiaries are domiciled and operate. Our profits arising in or derived from Hong Kong are subject to tax at a rate of 16.5%, which is qualified as a foreign tax credit to offset the PRC corporate income tax starting from January 1, 2008.

We received a formal approval from the State Administration of Taxation of the PRC on October 19, 2010, confirming that we are regarded as a Chinese Resident Enterprise, or CRE, pursuant to the provisions of the "Notice regarding Matters on Determination of Tax Residence Status of Chinese-controlled Offshore Incorporated Enterprises under Rules of Effective Management", the "Enterprise Income Tax Law of the People's Republic of China" and the "Detailed Rules for the Implementation of the Enterprise Income Tax Law of the People's Republic of China". According to the formal approval, we are subject to the PRC enterprise income tax at a rate of 25% starting from January 1, 2008.

Pursuant to the above laws and regulations, we are required to withhold 10% corporate income tax when we make dividend distributions to our non-Chinese resident enterprise shareholders.

Our PRC subsidiary, CNOOC China Limited, as a wholly foreign-owned enterprise, is subject to an enterprise income tax rate of 25% under the prevailing tax rules and regulations.

The PRC corporate income tax is levied based on taxable income, including income from both operations and other components of earnings, as determined in accordance with the generally accepted accounting principles in the PRC, or PRC GAAP.

Besides income taxes, our PRC subsidiary also pays certain other taxes, including:

Edgar Filing: CNOOC LTD - Form 20-F

- production taxes at the rate of 5% on independent production and production under PSCs;
  - export tariffs at the rate of 5% on the export value of petroleum oil;
  - business tax at the rates of 3% to 5% on other income;
- city construction tax at the rates of 1% or 7% on the actual paid production taxes and business tax;

Table of Contents

- educational surcharge at the rate of 3% on the actual paid production taxes and business tax;
- local educational surcharge at the rate of 2% on the actual paid production taxes and business tax; and
- Resource taxes at the rate of 5% (reduced tax rates may apply to specific products and fields) on the oil and gas sales revenue (excluding production taxes) derived from oil and gas fields under production sharing contracts signed after November 1, 2011 and independent offshore oil and gas fields starting from November 1, 2011, which replaced the royalties for oil and gas fields except for those under production sharing contracts signed before November 1, 2011.

We calculate our deferred tax to account for the temporary differences between our tax base, which is used for income tax reporting and prepared in accordance with applicable tax guidelines, and our accounting base, which is prepared in accordance with applicable financial reporting requirements. The temporary differences include accelerated amortization allowances for oil and gas properties, which are partially offset by provisions for dismantlement and for impairment of property, plant and equipment and write-off of unsuccessful exploratory drilling. As of December 31, 2009, 2010 and 2011, we had Rmb 7,439.6 million, Rmb 6,841 million and Rmb 5,488 million (US\$871 million), respectively, in net deferred tax liabilities. See note 12 to our consolidated financial statements included elsewhere in this annual report.

Royalty

Royalties paid to the PRC government are based on our gross production from both independent operations and oil and gas fields under PSCs. The amount of the royalties varies up to 12.5% based on the annual production of the relevant property. The PRC government has provided us, among other companies, with a royalty exemption in each field for up to one million tons, or approximately seven million BOE, per year for our crude oil production and for up to 2 billion cubic meters (approximately 70.6 billion cubic feet or 11.8 million BOE) per year for our natural gas production. The limits in these exemptions apply to our total production from both independent properties and properties under PSCs.

In 2011, the State Council of the PRC amended the Provisional Regulation of PRC Resource Tax. As a result, since November 1, 2011, the royalties payable to the PRC government have been replaced by resource tax, currently at 5% of the sales revenues from crude oil and natural gas. The PSCs which are signed before November 1, 2011 are not affected by the amendment of the Provisional Regulation of PRC Resource Tax and we continue to pay royalties to the PRC government for these PSCs.

Special Oil Gain Levy

In March 2006, the PRC government imposed a special oil gain levy at progressive rates from 20% to 40% on any income derived from sales of locally produced crude oil by an oil exploration and production company at a price which exceeds US\$40 per barrel. In December 2011, the PRC government increased the threshold of the special oil gain levy from US\$40 per barrel to US\$55 per barrel, with effect from November 1, 2011. The special oil gain levy is collected on a quarterly basis. For the years ended December 31, 2009, 2010 and 2011 we incurred approximately Rmb 6.4 billion, Rmb 17.7 billion and Rmb 32.0 billion (US\$5.08 billion) for the Special Oil Gain Levy. As international oil prices, the exchange rate of Renminbi and our crude oil production fluctuate, we cannot ascertain the full impact of the Special Oil Gain Levy going forward.

The current rates of the special oil gain levy are shown in the table below:

Edgar Filing: CNOOC LTD - Form 20-F

Realized Oil Price (US\$/bbl)	Rate of the Levy
55-60 (Include 60)	20%
60-65 (Include 65)	25%
65-70 (Include 70)	30%
70-75 (Include 75)	35%
Above 75	40%

## Table of Contents

In addition, the PRC government imposed an export tariff of 5% on crude oil in November 2006.

### Fiscal Regimes for PSC Operations

The PRC government encourages foreign participation in offshore oil and gas exploitation. Currently, international oil and gas companies can only undertake offshore oil and gas exploitation activities in China after they have entered into a PSC with CNOOC.

Under our PSCs, production of crude oil and gas is allocated among us, the foreign partners and the PRC government according to a formula contained in the contracts. Under this formula, a percentage of production under our PSCs is allocated to the PRC government as its share oil.

When exploitation operations in offshore China are conducted through a PSC, the operator of the oil or gas field must submit a detailed evaluation report and an overall development plan to a joint management committee established under the PSC upon the discovery of commercially viable oil and gas reserves. The plan must be subsequently confirmed by CNOOC and approved by the PRC government before the parties to the PSC begin the commercial development of the oil and gas field.

Under PRC law, only a state-owned company, such as CNOOC, may negotiate a PSC with foreign partners. CNOOC assigned to us all of its rights and obligations under then-existing PSCs in 1999 and has undertaken to assign to us its future PSCs except for those relating to CNOOC's administrative functions.

### Bidding Process

CNOOC and foreign partners enter into new PSCs primarily through bidding organized by CNOOC and direct negotiation. During a typical bidding process, CNOOC determines which blocks are open for bidding and invites foreign enterprises to bid. Potential bidders are required to provide information, including minimum work commitments, exploration expenditures and percentages of share oil payable to the PRC government; and CNOOC evaluates each bid and negotiates a PSC with the successful bidder. CNOOC has agreed to allow us to participate in all negotiations for new PSCs.

### Terms of PSCs

**Term of Length.** PSCs typically last for 30 years: (1) the exploration period is generally divided into three phases, with three years, two years and two years, respectively. During the exploration period, exploratory and appraisal work is conducted in order to discover petroleum and to enable the parties to determine the commercial viability of any petroleum discovery; (2) the development period begins when the relevant PRC regulatory authorities have approved the overall development plan and ends when the design, construction, installation, drilling and related research work for the realization of petroleum production as planned have been completed; and (3) the production period begins when commercial production commences and usually lasts for 15 years.

**Minimum Work Commitment.** The foreign partners must complete a minimum amount of work during the exploration period, generally including: drilling a minimum number of wildcat(s); acquiring a fixed amount of seismic data; and incurring a minimum amount of exploration expenditures. Foreign partners are required to pay all exploration costs, which can be recovered according to the production sharing formula after commercial discoveries are made and production begins. Foreign partners are required to relinquish 25% of the contract area, excluding the development and production areas, to CNOOC at the end of each phase of the exploration period and to relinquish all areas, excluding the development areas, production areas and areas under evaluation, to CNOOC at the end of the

exploration period.

Participating Interests. We have the right to take participating interests up to 51% in any oil or gas field discovered in the contract area and may exercise this right after the foreign partners have made commercially viable discoveries. The foreign partners retain the remaining participating interests.

51

---

Table of Contents

Production Sharing Formula. A chart illustrating the production sharing formula under our PSCs is shown below.

Percentage of annual gross production	Allocation
5.0%	Production tax payable to the PRC government(1)
0.0% — 12.5%(2)	Royalty oil payable to the PRC government(3)
5.0%	Resource tax payable to the PRC government(3)
50.0% — 62.5%(2)	Cost recovery oil allocated according to the following priority: <ol style="list-style-type: none"> <li>1. recovery of current year operating costs by us and foreign partner(s);</li> <li>2. recovery of earlier exploration costs by foreign partner(s);</li> <li>3. recovery of development costs and deemed interest by us and foreign partner(s) based on participating interests; and</li> <li>4. any excess, allocated to the remainder oil.</li> </ol>
32.5%(4)	Remainder oil allocated according to the following formula: <ol style="list-style-type: none"> <li>1. (1-X) multiplied by 32.5% represents share oil payable to the PRC government; and</li> <li>2. X multiplied by 32.5% represents remainder oil distributed according to each partner's participating interest.</li> </ol>

(1) In this annual report and in our consolidated financial statements included elsewhere in this annual report, references to production tax on oil and gas produced offshore China are the value-added tax set out in our PSCs offshore China.

(2) Assumes annual gross production of more than four million metric tons, approximately 30 million BOE. For lower amounts of production, the royalty rate will be lower and the cost recovery will be greater than 50.0% by the amount that the royalty rate is less than 12.5%.

(3) As a result of the amendment to the Provisional Regulation of PRC Resource Tax by the State Council of the PRC, effective November 1, 2011, the royalties payable to the PRC government have been replaced by resource tax for new PSCs. Pre-existing PSCs are not affected.

(4) The ratio "X" is agreed in each PSC based on commercial considerations and ranges from 8% to 100%.

We calculate and pay oil and gas production tax and royalty to the PRC government on a monthly basis and make adjustments for any overpayment or underpayment at the end of the year. The foreign partners have the right to either take possession of their allocable remainder oil for sale in the international market, or sell such crude oil to us in the PRC market.

Management and Operator. A party will be designated as the operator to undertake the execution of the petroleum operations which includes preparing work programs and budgets, procuring equipment and materials relating to operations, establishing insurance programs, and issuing cash-call notices to the parties to the PSC to raise funds.

A joint management committee will be set up to perform supervisory functions. Each of us and the foreign partners has the right to appoint an equal number of representatives to form the joint management committee. We designate the chairman of the committee and the foreign partners as a group designate the vice chairman. The joint management committee has the authority to make decisions on matters including reviewing and approving operational and budgetary plans, determining the commercial viability of each petroleum discovery, reviewing and adopting the overall development plan; and approving significant procurements and expenditures as well as insurance coverage.

After the foreign partner has fully recovered its exploration and development costs under PSCs in which the foreign partner is the operator, we have the right to take over the operation of the particular oil or gas field. With the consent of the foreign partner, we may also take over the operation before the foreign partner has fully recovered its exploration and development costs.

**Ownership of Data and Assets.** All data, records, samples, vouchers and other original information obtained by foreign partners in the process of exploring, developing and producing offshore petroleum become the property of CNOOC as a state-owned oil company under PRC law. Through CNOOC, we have unlimited and unrestricted access to such information.

## Table of Contents

We and our foreign partners have joint ownership in all of the assets purchased, installed or constructed under the PSCs until either the foreign partners have fully recovered their development costs, or upon the expiration of the production period under the PSCs. After that, CNOOC will assume ownership of all of the assets under the PSCs, and our foreign partners and we retain the exclusive right to use the assets during the production period.

**Abandonment Costs.** Any party to our PSCs shall pay its share of the abandonment cost when such party either abandons the production of an oil field or gas field during a production period or when the production period of the oil field or gas field expires.

### Regulatory Framework in Overseas

We are subject to other fiscal regimes in the foreign countries and regions where we conduct operations, including Indonesia, Myanmar, Iraq, Australia, Nigeria, Uganda, Argentina, the United States, Canada and certain other countries. See “Item 4—Information on the Company—Business Overview—Overseas.”

In countries including Indonesia, Nigeria and Trinidad and Tobago, we conduct our operations through PSCs. For example, the OML130 block in Nigeria involves a production sharing arrangement. We and the other partners to overseas PSCs are required to bear all exploration, development and operating costs according to our respective participating interests. Exploration, development and operating costs which qualify for recovery can be recovered according to the production sharing formula after commercial discoveries are made and production begins.

Our net interest in the PSCs overseas consists of our participating interest in the properties covered under the relevant PSCs, less oil and gas distributed to the local government and/or the domestic market obligation, as applicable.

In Australia, the U.S., Canada and Argentina, we conduct our operations through exploration and production permits, licenses or leases. We, as one of the title owners under these permits, licenses or leases, are required to bear all exploration, development and operating costs together with other co-owners. Once production occurs, a certain percentage of the annual production or revenue will first be distributed to the landowner, in most of cases in the form of royalty, severance tax and other payments, and the rest of the annual production or revenue will be allocated among the co-owners. Exploration, development and operating costs are deductible for the purpose of income tax calculation in accordance with local tax regulations.

### Taxation

Taxes paid and payable by our non-PRC subsidiaries and jointly controlled entities include royalties, duties and export tariffs, as well as taxes levied on petroleum related income, profits and budgeted operating and capital expenditures.

Our subsidiaries domiciled outside of the PRC are subject to income tax rates ranging from 10% to 56%.

Some of our oil and gas interests in Indonesia are held through Labuan-incorporated companies. According to an amendment to the tax rules enacted by the Indonesian government in December 2009, Labuan-incorporated companies no longer enjoy the tax rates under the previous tax treaty between Indonesia and Malaysia. Therefore, the applicable tax rates would increase from the range between 43.125% and 51.875% to the range between 44% and 56%. The amendment became effective on January 1, 2010.

### Environmental Regulation

Our operations are required to comply with various applicable environmental laws and regulations, including PRC laws and regulations administered by the national and local government environmental protection bureaus for our

operations in China. We are also subject to the environmental rules introduced by governments in whose jurisdictions our logistical support facilities are located.

## Table of Contents

Government agencies set national or local environmental protection standards. The relevant environment protection bureau must approve or review each stage of a project. We must file an environmental impact statement or, in some cases, an environmental impact assessment outline before an approval can be issued. The filing must demonstrate that the project conforms to applicable environmental standards. The relevant environmental protection bureau generally issues approvals and permits for projects using modern pollution control measurement technology.

The PRC national and local environmental laws and regulations impose fees for the discharge of waste substances above prescribed levels, require the payment of fines for serious violations and provide that the PRC national and local governments may at their own discretion close or suspend any facility which fails to comply with orders requiring it to cease or cure operations causing environmental damage.

The PRC environmental laws require offshore petroleum developers to pay abandonment costs. Our financial statements include provisions for costs associated with the dismantlement of oil and gas fields as of December 31, 2009, 2010 and 2011 of approximately Rmb 11,281.1 million, Rmb 15,825.3 million and Rmb 24,964.3 million (US\$3,966.4 million), respectively.

According to the interpretation made by the Legal Affairs Office of the State Council, investors of the offshore oil and gas fields shall take responsibility for abandonment of the offshore oil and gas production facilities and perform the obligation in relation to environmental protection and ecological restoration, and shall provide and allocate special fund for the aforesaid purpose in accordance with the relevant laws and regulations. The investors include us and the foreign parties to our PSCs.

Environmental protection and prevention costs and expenses in connection with the operation of offshore petroleum exploitation are covered either under PSCs, or by us for independent operations. Each platform has its own environmental protection and safety staff responsible for monitoring and operating the environmental protection equipment. However, no assurance can be given that the PRC government will not impose new or stricter regulations which would require additional environmental protection expenditures.

We believe that our environmental protection systems and facilities comply with applicable national and local environmental protection regulations.

### Patents and Trademarks

We own or have licenses to use two trademarks which are of value in the conduct of our business. CNOOC is the owner of the two trademarks. Under two non-exclusive license agreements between CNOOC and us, we have obtained the right to use the two trademarks for a nominal consideration.

### Real Properties

Our corporate headquarters is located in Hong Kong. We lease several other properties from CNOOC in China and Singapore. The rental payments under these lease agreements are determined with reference to market rates. See “Item 7—Major Shareholders and Related Party Transactions—Related Party Transactions.”

We own the following main property interests in the PRC:

- 51% interest in land, various buildings and structures at Yacheng 13-1 Processing Plants, Hainan Province and Hong Kong;

- land, various buildings and structures at Xingcheng JZ 20-2 Natural Gas Separating Plant, Liaoning Province;
  - land, various buildings and structures located at Boxi Processing Plant, Tianjin;

## Table of Contents

- land, various buildings and structures at Weizhou Terminal Processing Plant, Guangxi Zhuang Autonomous Region;
  - land, various buildings and structures at Suizhong 36-1 Base, Liaoning Province;
  - land, various buildings and structures located at Bonan Processing Plant, Shandong Province;
  - land, various buildings and structures located at Dongfang 1-1 Processing Plant, Hainan Province;
- land, various buildings and structures located at Panyu Huizhou Gas Processing Plant, Guangdong Province; and
  - land, various buildings and structures located at a Gas Processing Plant, Ningbo, Zhejiang Province.

## Employees and Employee Benefits

During the years ended December 31, 2009, 2010 and 2011, we employed 4,019 persons, 4,650 persons and 5,377 persons, respectively. Of the 5,377 employees we employed as of December 31, 2011, approximately 71.7% were involved in oil exploration, development and production activities, approximately 5.5% were involved in accounts and finance work and the remainder were senior management, coordinators of PSCs, safety and environmental supervisors and others. Workers for the operation of the oil and gas fields, maintenance personnel and ancillary service workers are hired on a contract basis.

We have a union that protects employees' rights, organizes educational programs, assists in the fulfillment of economic objectives, encourages employee participation in management decisions, and assists in mediating disputes between us and individual employees.

We have not been subject to any strikes or other labor disturbances and believe that relations with our employees are good.

The total remuneration of employees includes salary, bonuses and allowances. Bonus for any given period is based primarily on individual and our performance. Employees also receive health benefits and other miscellaneous subsidies.

We have implemented an occupational health and safety program similar to that employed by other international oil and gas companies. Under this program, we closely monitor and record health and safety incidents and promptly report them to government agencies and organizations. We believe this program is broadly in line with the United States government's Occupational Safety & Health Administration guidelines.

All full-time employees in the PRC are covered by a government-regulated pension and are entitled to an annual pension at their retirement dates. The PRC government is responsible for the pension liabilities to these retired employees under this government pension plan. The actual pension payable to each retiree is subject to a formula based on the status of the individual pension account, general salary and inflation movements. We are required to make monthly contributions to the government pension plan at rates ranging from 11% to 22% of our employees' salaries, with each employee contributing 8% of his or her salary for retirement. The contributions vary from region to region.

We are required to make contributions to a mandatory provident fund at a rate of 5% of the base salaries for full-time employees in Hong Kong.

Table of Contents

As of December 31, 2011, our Indonesian subsidiaries employed 797 employees, including 41 expatriates. We provide benefits to expatriates that we believe to be in line with customary international practices. Our local staffs in Indonesia enjoy welfare benefits mandated by Indonesian labor laws.

For further details regarding retirement benefits, see note 30 to our consolidated financial statements included elsewhere in this annual report.

As an oil and gas exploration and production company operating in highly competitive markets, we depend in large part on our employees for effective and efficient operations. We devote significant resources to train our employees. During 2011, we held approximately 6,492 training workshops, which were attended by approximately 72,782 participants. To ensure smooth implementation of our overseas strategy, we have established an international human resources system to attract and retain talent in the international market. In order to enhance the planning and budget control of our labor costs, we have installed target benchmarks in performance appraisals to guide various business units to cut their labor costs and to increase the accuracy of their budgets.

C. ORGANIZATIONAL STRUCTURE

CNOOC indirectly owned or controlled an aggregate of approximately 64.45% of our shares as of March 31, 2012. Accordingly, CNOOC continues to be able to exercise all the rights of a controlling shareholder, including electing our directors and voting to amend our articles of association. Although CNOOC has retained a controlling interest in us, the management of our business will be our directors' responsibility.

The following chart sets forth our controlling entities and our directly-held subsidiaries as of March 31, 2012 and notes our significant indirectly-held subsidiaries.

- 
- (1) Overseas Oil & Gas Corporation, Ltd. also directly owns five shares of our company.
  - (2) Owner of our overseas interests in oil exploration and production businesses and operations, including our indirect wholly-owned subsidiaries CNOOC Southeast Asia Limited (Bermuda), CNOOC Exploration & Production Nigeria Limited (Nigeria) and CNOOC NWS Private Limited, and our joint venture, Brijdas Corporation.
  - (3) Owner of substantially all of our PRC oil exploration and production businesses, operations and properties.
  - (4) Business vehicle through which we engage in sales and marketing activities in the international markets.

Table of Contents

(5) Includes CNOOC Finance (2002) Limited, CNOOC Finance (2003) Limited and CNOOC Finance (2011) Limited, all of which are our financing vehicles. These finance companies are our wholly owned subsidiaries with our company as their sole corporate director.

(6) CNOOC International Limited transferred its shares in OOGC America, Inc. to CNOOC Limited on November 22, 2011.

D. PROPERTY, PLANTS AND EQUIPMENT

See “Item 4—Information on the Company—Business Overview.”

ITEM 4A. UNRESOLVED STAFF COMMENTS

None.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

A. OPERATING RESULTS

You should read the following discussion and analysis in conjunction with our consolidated financial statements, selected historical consolidated financial data and operating and reserves data, in each case together with the accompanying notes, contained in this annual report. Certain statements set forth below constitute “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995. See “Forward-Looking Statements.”

Overview

Our revenues and profitability are largely determined by our production volume and the prices we realize on our crude oil and natural gas, as well as the costs of our exploration and development activities. Although crude oil prices depend on various market factors and have been volatile historically, our total net production volume has increased over the past few years.

Factors Affecting Our Results of Operations

There are many factors that affect our results of operations and financial condition, mainly including the following:

Oil and Gas Prices

Substantially all of our revenues are from the sales of oil and natural gas. Therefore, one of the primary factors affecting our revenues is the prices for crude oil and natural gas. Crude oil prices are subject to fluctuations due to market uncertainty and various other factors that are beyond our control, including, but not limited to overall economic conditions, supply and demand dynamics for crude oil and natural gas, political developments, the ability of petroleum producing nations to set and maintain production levels and prices, the price and availability of other energy sources and weather conditions.

In addition, our typical contracts with natural gas buyers include provisions for periodic resets and adjustment formulas which may result in selling price fluctuations.

In addition to directly affecting our revenues and earnings, declines in crude oil and/or natural gas prices may also result in the write-off of higher cost reserves and other assets. Furthermore, lower crude oil and natural gas prices may

reduce the amount of crude oil and natural gas we can produce economically and render existing contracts that we have entered into uneconomical.

The following table sets forth our average net realized prices for crude oil and natural gas for the periods indicated:

	Year ended December 31,		
	2009	2010(1)	2011
Average net realized prices:			
Crude oil (US\$ per bbl)	60.61	77.93	109.75
Natural gas (US\$ per mcf)	4.01	4.49	5.15

Table of Contents

(1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

## Production and Sales Volumes

Our revenues are also greatly affected by our production and sales volume as well as our product mix. Our crude oil and natural gas production volumes depend primarily on our ability to keep a high reserve replacement ratio and to develop currently undeveloped reserves in a timely and cost-effective manner.

We produce and sell different mixes of crude oil and natural gas, each having different market prices. Therefore, in any given period, our product mix is subject to change, which will also affect our results of operations.

The following table sets forth our average daily net production of crude oil and natural gas for the periods indicated.

	Year ended December 31,		
	2009	2010	2011
Net production of crude oil (bbl/day) (1)	509,696	722,086	708,286
Net production of natural gas (mmcf/day) (1)	653.5	1,050.1	1,171.7

(1) Including our interest in equity method investees.

For a description of other factors affecting our results of operations, see "Item 3—Key Information—Risk Factors."

## Critical Accounting Policies

We prepare our consolidated financial statements in accordance with IFRS issued by the IASB, HKFRS issued by the HKICPA, accounting principles generally accepted in Hong Kong, and the Hong Kong Companies Ordinance. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of our assets and liabilities, the disclosure of our contingent assets and liabilities as of the date of our financial statements, if any, and the reported amounts of our revenues and expenses during the periods reported. Management makes these estimates and judgments based on historical experience and other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. We believe that the following significant accounting policies may involve a higher degree of judgment in the preparation of our consolidated financial statements. For additional discussion of our significant accounting policies, see note 3 to our consolidated financial statements included elsewhere in this annual report.

## Oil and Gas Properties

For oil and gas exploration, we have adopted the successful efforts method of accounting. As a result, we capitalize initial acquisition costs of oil and gas properties. Impairment of initial acquisition costs is recognized based on exploratory experience and management judgment which includes, but is not limited to, that any dry hole has been drilled on the property; that any drilling activity has commenced on the property or on other properties nearby and is still under way or has been firmly planned or determined; that the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale; and that the period during which we have the right to explore in the specific area has expired or will expire in the near future and is not expected to be

renewed. Upon discovery of commercial reserves, we transfer acquisition costs to proved properties and capitalize the costs of drilling and equipping successful exploratory wells, all development expenditure on construction, installation or completion of infrastructure facilities such as platforms, pipelines, processing plants and the drilling of development wells, and the building of enhanced recovery facilities, including those renewals and betterments that extend the economic lives of the assets, and the related borrowing costs.

## Table of Contents

The costs incurred in installing enhanced recovery facilities are capitalized together with the development costs of the relevant oil and gas properties. We treat the costs of unsuccessful exploratory wells and all other related exploration costs as expenses when incurred. Productive oil and gas properties and other tangible and intangible costs of producing properties are amortized using the unit-of-production method on a property-by-property basis under which the ratio of produced oil and gas to the estimated remaining proved developed reserves is used to determine the provision of depreciation, depletion and amortization. Common facilities that are built specifically to service production directly attributed to designated oil and gas properties are amortized based on the proved developed reserves of the respective oil and gas properties on a pro-rata basis. Generally, common facilities that are not built specifically to service identified oil and gas properties are depreciated using the straight-line method over their estimated useful lives. Costs associated with significant development projects are not depreciated until commercial production commences and the reserves related to those costs are excluded from the calculation of depreciation. We amortize capitalized acquisition costs of proved properties by the unit-of-production method on a property-by-property basis based on the total estimated units of proved reserves.

We recognized the amount of the estimated cost of dismantlement and discounted the amount to its present value using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Changes in the estimated timing of dismantlement cost estimates are dealt with prospectively by recording an adjustment to the provision, and a corresponding adjustment to property, plant and equipment. We included the unwinding of the discount on the dismantlement provision as a finance cost.

### Reserves Estimation

Oil and gas properties are depreciated on a unit-of-production basis at a rate calculated by reference to proved reserves. Commercial reserves are determined using estimates of oil in place, recovery factors and future oil prices, the latter having an impact on the proportion of the gross reserves which are attributable to the host government under the terms of the production sharing contracts. The level of estimated commercial reserves is also a key determinant in assessing whether the carrying value of any of the Company's oil and gas properties has been impaired.

Pursuant to the oil and gas reserve estimation requirements under US Securities and Exchange Commission's rules, the Company uses the average, first-day-of-the-month oil price during the 12-month period before the ending date of the period covered by the consolidated financial statements to estimate its proved oil and gas reserves.

### Impairment of Non-Financial Assets other than Goodwill

We make an assessment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, or when there is any indication that an impairment loss previously recognized for an asset in prior years may no longer exist or may have decreased. In any event, we would make an estimate of the asset's recoverable amount, which is calculated as the higher of the asset's value in use or its net selling price. We recognize an impairment loss only if the carrying amount of an asset exceeds its recoverable amount. We charge an impairment loss to the consolidated statement of comprehensive income in the period in which it arises. A reversal of an impairment loss is credited to the consolidated statement of comprehensive income in the period in which it arises.

The calculations of recoverable amount of assets require the use of estimates and assumptions. It is reasonably possible that the oil price assumption may change, which may then impact the estimated life of the field and may then require a material adjustment to the carrying value of tangible assets. The Company monitors internal and external indicators of impairment relating to its tangible and intangible assets.

### Business Combinations and Goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Company, liabilities assumed by the Company to the former owners of the acquiree and the equity interests issued by the Company in exchange for control of the acquiree. For each business combination, the Company elects whether it measures the non-controlling interests in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition costs incurred are expensed and included in administrative expenses.

## Table of Contents

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Company's previously held equity interests in the acquiree over the identifiable net assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets of the subsidiary acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

### Joint Arrangements

Certain of the Company's activities are conducted through joint arrangements. Joint arrangements are classified as either a joint operation or joint venture, based on the rights and obligations arising from the contractual obligations between the parties to the arrangement.

### Joint Operations

Some arrangements have been assessed by the Company as joint operations as both parties to the contract are responsible for the assets and obligations in proportion to their respective interest, whether or not the arrangement is structured through a separate vehicle. This evaluation applies to both the Company's interests in production sharing arrangements and certain jointly-controlled entities.

### Joint Venture

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

The Company's investments in joint ventures are stated in the consolidated statement of financial position at the Company's share of net assets under the equity method of accounting, less any impairment losses.

### Fair Value

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations, without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; a discounted cash flow analysis or other valuation models.

### Provisions

We recognize a provision when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation provided that a reliable estimate can be made of the amount of the obligation. When the effect of discounting is material, the amount recognized for a provision is the present value at the reporting date of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the consolidated statement of comprehensive income.

## Table of Contents

We make provisions for dismantlement based on the present value of our future costs expected to be incurred, on a property-by-property basis, in respect of our expected dismantlement and abandonment costs at the end of the related oil exploration and recovery activities.

The ultimate dismantlement costs are uncertain and cost estimates can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques or experience at other production sites. The expected timing and amount of expenditure can also change, for example, in response to changes in reserves or changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

### Deferred Tax

Deferred tax is provided, using the liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting profit or loss nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in a joint venture, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

A typical example of transactions that are not business combinations and, at the time of the transaction, affect neither accounting profit or loss nor taxable profit or loss is the acquisition of an asset, such as an exploration license or concession, where no previous activity has taken place, whereby the consideration paid is higher than its tax base. The facts and circumstances of each transaction need to be considered in order to determine whether the definition of “business” under the relevant accounting standard has been met.

### Recognition of Revenue from Oil and Gas Sales and Marketing

We recognize revenue when it is probable that the economic benefits will flow to us and when the revenue can be measured reliably. For oil and gas sales, our revenues represent the invoiced value of sales of oil and gas attributable to our interests, net of royalties and any government share oil that is lifted and sold on behalf of the government. We have adopted a net basis of reporting for royalties and government share oil when we have no legal rights to the underlying reserves. As such, we act as an agent for the relevant governments or royalty holders when we sell the portion of oil and gas on their behalves. Sales are recognized when the significant risks and rewards of ownership of oil and gas have been transferred to customers. Oil and gas lifted and sold by us above or below our participating interests in any PSC result in overlifts and underlifts. We record these transactions in accordance with the entitlement method under which overlifts are recorded as liabilities and underlifts are recorded as assets at year-end oil prices. Settlement will be in kind or in cash when the liftings are equalized or in cash when production ceases. We enter into gas sales contracts with customers which often contain take-or-pay clauses. Under these contracts, we make a long term supply commitment in return for a commitment from the buyer to pay for minimum quantities, whether or not it takes delivery. These commitments contain protective provisions, such as force majeure provision, and adjustment provisions. If a buyer has a right to get a “make up” delivery at a later date, revenue recognition is deferred. If no such option exists according to the contract terms, revenue is recognized when the take-or-pay penalty is triggered.

Our marketing revenues principally represent sales of oil purchased from the foreign partners under our PSCs and revenues from the trading of oil through our subsidiaries. The title, together with the risks and rewards of the ownership of such oil purchased from the foreign partners, are transferred to us from the foreign partners and other unrelated oil and gas companies before we sell such oil to our customers. The cost of the oil sold is included in crude oil and product purchases.

(1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

## Calculation of Revenues

## China

We report total revenues, which consist of oil and gas sales, marketing revenues and other income, in our consolidated financial statements included elsewhere in this annual report. With respect to revenues derived from our offshore China operations, oil and gas sales represent gross oil and gas sales less royalties and share oil payable to the PRC government.

The gross oil and gas sales consist of our percentage interest in total oil and gas sales, comprised of (i) a 100% interest in our independent oil and gas properties and (ii) our participating interest in the properties covered under our PSCs, less an adjustment for production allocable to foreign partners under our PSCs as reimbursement for exploration costs attributable to our participating interest.

Marketing revenues represent our sales of our foreign partners' oil and gas produced under our PSCs and purchased by us from our foreign partners under such contracts as well as from international oil and gas companies through our wholly owned subsidiary in Singapore. Net marketing revenues represent the marketing revenues net of the cost of purchasing oil and gas from foreign partners and from international oil and gas companies. Our foreign partners have the right to either take possession of their oil and gas for sale in the international market or to sell their oil and gas to us for resale in the PRC market.

Other income mainly represents project management fees charged to our foreign partners and handling fees charged to end customers—both fees are recognized when the services are rendered. Reimbursement of insurance claims is recognized when the compensation becomes receivable.

Our share of the oil and gas sales of unconsolidated investees is not included in our revenues, but our share of the profit or loss of this investee is included as part of our share of profits of associates and a joint venture as shown in our consolidated statements of comprehensive income.

#### Indonesia

The oil and gas sales from our subsidiaries in Indonesia consist of our participating interest in the properties covered under the relevant PSCs, less adjustments for oil and gas distributable to the Indonesian government under our Indonesian PSCs and for a domestic market obligation under which the contractor must sell a specified percentage of its crude oil to the local Indonesian market at a reduced price.

#### Australia

The oil and gas sales from our subsidiaries in Australia consist of our participating interest in the properties of the North West Shelf project.

Table of Contents

## Nigeria

The oil and gas sales from our subsidiaries in Nigeria consist of our participating interest in the properties covered under the relevant PSCs. We record revenue from oil sales in accordance with the entitlement method. The revenue is calculated based on our participating interest less the rental concession, royalty, and oil and gas distributable to the host country. The royalty rates applicable to deepwater properties are zero.

## Trinidad and Tobago

The oil and gas sales from our subsidiaries in Trinidad and Tobago consist of our participating interest in the properties covered under the relevant PSCs.

## The U.S. and Canada

The oil and gas sales from the U.S. consist of our participating interest in the properties of the Eagle Ford project and the Niobrara project.

In respect of oil and gas products derived from Canada, our share of sales is recognized when the ownership of products is transferred at the plant gate. The revenue is calculated net of royalties. In respect of power generated, our share of sales is recognized when the excess power starts to leave the plant gate.

## 2011 versus 2010

## Consolidated net profit

Our consolidated net profit increased 29.1% to Rmb 70,255 million (US\$11,162.4 million) in 2011 from Rmb 54,410 million in 2010. The primary driving factor for the profit increase was higher realized prices. However, this positive factor was partially offset by higher special oil gain levy, higher income tax payments due to higher realized prices, and higher operating expenses and depreciation.

## Revenues

	Year ended December 31,			Change	
	2011	2010(1)	Change	(%)	
Oil and gas sales (Rmb million)	189,279	146,134	43,145	29.5	%
Crude oil	176,703	135,558	41,145	30.4	%
Natural gas	12,576	10,576	2,000	18.9	%
Sales volume (million BOE)	314.0	316.6	(2.6 )	(0.8	%)
Crude oil (million barrels)	249.3	256.7	(7.4 )	(2.9	%)
Natural gas (bcf)	378	347	31	8.8	%
Realized prices					
Crude oil (US\$/barrel)	109.75	77.93	31.82	40.8	%
Natural gas (US\$/mcf)	5.15	4.49	0.66	14.7	%
Net production (million BOE)	331.8	329.6	2.2	0.7	%
China	261.9	263.6	(1.7 )	(0.6	%)
Overseas	69.9	66.0	3.9	5.9	%

(1)

After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

The increase of our oil sales was primarily due to higher oil prices achieved by adopting adaptive marketing policies in the circumstance of higher benchmark oil prices affected by worldwide political conditions and strong domestic demand for crude oil in China. Although our production and sales of crude oil were affected by the Penglai 19-3 oil spill accidents and suspension of production of the OML130 project, we still achieved our production and sales goals set at the beginning of 2011 by expanding capacity of other oilfields and managing the production of new projects.

Table of Contents

The increase of our gas sales was primarily due to increase of gas prices. Having seized the opportunities from the increase of spot market prices for gas in Southeast Asia due to the earthquake in Japan, we increased our gas sales in the spot market in 2011. In addition, in consideration of the development of domestic natural gas market, we have been adjusting our natural gas prices for customers through negotiations since the second half of 2010.

In 2011, our oil and gas production was 331.8 million BOE (including our interest in equity-accounted investees), of which offshore China and overseas operations contributed 261.9 million BOE and 69.9 million BOE, respectively. The overseas production accounted for 21.1% of our total net production in 2011, compared with 20.0% in 2010.

In 2011, our net marketing profit, which is marketing revenues less costs of purchases, decreased 22.9% to Rmb 162 million (US\$25.7 million) from Rmb 210 million in 2010, mainly because we had no trading activities in Indonesia in 2011 as the gas production in Indonesia already met the need for the year. Our realized marketing profit margin, which is our marketing profit calculated as a percentage of marketing revenues, decreased from 0.7% in 2010 to 0.3% in 2011, primarily due to a lower profit margin of fixed premium trading, which was caused by the increase in sales volume when oil price was higher in 2011.

## Operating expenses

Our operating expenses increased 16.7% to Rmb 18,264 million (US\$2,901.9 million) in 2011 from Rmb 15,647 million in 2010. Operating expenses per BOE increased 18.0% to Rmb 58.2 (US\$9.25) per BOE in 2011 from Rmb 49.3 (US\$7.47) per BOE in 2010. Operating expenses per BOE offshore China increased 19.7% to Rmb 53.5 (US\$8.50) per BOE in 2011 from Rmb 44.7 (US\$6.77) per BOE in 2010. These increases were mainly attributable to the increase in raw material prices and supplier service fees as well as the increased operation workload on workover. In addition, due to the extreme weather and other exceptional events, our HSE and maintenance costs also increased accordingly. Overseas operating expenses per BOE increased 13.6% to Rmb 81.7 (US\$12.98) per BOE in 2011 from Rmb 72.0 (US\$10.91) per BOE in 2010, primarily contributed by higher operating cost of newly acquired oil sands projects, increased prices of fuel and other resources in Southeast Asia, as well as increased repair cost and reduced production as a result of the equipment failure of OML130 AKPO oilfield.

## Taxes other than income tax

Our taxes other than income tax increased 45.3% to Rmb 10,332 million (US\$1,641.6 million) in 2011 from Rmb 7,109 million in 2010, primarily as a result of increased tax payments due to the increase in higher realized oil and gas prices, as well as payment of resource tax for operations in offshore China since November 2011.

## Exploration expenses

Our exploration expenses decreased 4.8% to Rmb 5,220 million (US\$829.4 million) in 2011 from Rmb 5,483 million in 2010, primarily as a result of our continuously enhancing exploratory activities including more wells being drilled and more seismic data being acquired. In 2011, we acquired 18,914 km<sup>2</sup> 2D seismic data, as well as 15,822 km<sup>2</sup> 3D seismic data, representing an increase of 4,935 km<sup>2</sup> from 2010. Our continuing efforts in exploration has led to a series of important discoveries on reserves. In addition, the discovery rate maintained at a high level. Our independent exploration activities consisted of 82 exploration wells, relatively the same as in 2010. Dry hole expenses decreased 33.5% to Rmb 1,986 million (US\$315.5 million) in 2011 from Rmb 2,985 million in 2010.

## Depreciation, depletion and amortization

Our depreciation, depletion and amortization increased 14.1% to Rmb 30,521 million (US\$4,849.3 million) in 2011 from Rmb 26,756 million in 2010. Our average depreciation, depletion and amortization per barrel, excluding the

dismantlement-related depreciation, depletion and amortization, increased 9.8% to Rmb 86.9 (US\$13.81) per BOE in 2011 from Rmb 79.1 (US\$11.98) per BOE in 2010, mainly attributable to the commencement of production on new oil and gas fields as well as comprehensive adjustment projects in recent years, which were developed under the environment of increasing prices of raw materials and services over the past few years. Meanwhile, we conducted comprehensive inspections on production safety conditions of the oil and gas fields offshore China, increased preventive maintenance, and put off some workload on stabilization and improvement of production performance, which led to dynamic variations of the production of some oil and gas fields in offshore China and the resulting downward adjustment of related proved reserve estimates.

## Table of Contents

The dismantlement-related depreciation, depletion and amortization costs increased 96.0% to Rmb 3,258 million (US\$517.6 million) in 2011 from Rmb 1,662 million in 2010. Our average dismantling costs per barrel increased 98.1% to Rmb 10.38 (US\$1.65) per BOE in 2011 from Rmb 5.24 (US\$0.77) per BOE in 2010. The main reason for these increases was because, according to the PRC government's filing requirement for domestic oil and gas fields abandonment schemes, the estimation methods for the abandonment of oil and gas fields were comprehensively adjusted in 2011, and projected service fees and raw material prices were raised further.

### Special Oil Gain Levy

Our Special Oil Gain Levy increased 80.6% to Rmb 31,982 million (US\$5,081.4 million) in 2011 from Rmb 17,706 million in 2010, primarily as a result of our increased sales volume and higher realized oil prices in offshore China. Benefiting from the PRC government's increase in the levy threshold from US\$40 to US\$55 (effective November 2011), our Special Oil Gain Levy is expected to decrease in the future.

### Impairment and provision

Our impairment and provision decreased 18.4% to Rmb 22 million (US\$3.5 million) in 2011 from Rmb 27 million in 2010, primarily due to the inventory provision during the year.

### Selling and administrative expenses

Our selling and administrative expenses decreased 6.1% to Rmb 2,854 million (US\$453.5 million) in 2011 from Rmb 3,039 million in 2010 mainly due to the decrease of commission expenses for acquisition projects. Our selling and administrative expenses per barrel decreased 5.1% to Rmb 9.10 (US\$1.45) per BOE in 2011 from Rmb 9.58 (US\$1.41) per BOE in 2010.

### Finance costs/Interest income

Our finance costs increased 52.1% to Rmb 1,707 million (US\$271.2 million) in 2011 from Rmb 1,122 million in 2010, primarily due to the increase in unwinding of discount on provision for dismantlement in 2011. Our interest income increased 93.5% to Rmb 1,196 million (US\$190.0 million) in 2011 from Rmb 618 million in 2010, mainly as a result of more interest earned from the enlarged scale of banking deposits and the increased effective interest rates.

### Exchange gains, net

Our net exchange gains decreased 35.9% to Rmb 637 million (US\$101.2 million) in 2011 from Rmb 995 million in 2010, primarily as a result of the decrease in the size of dividends receivable from a subsidiary.

### Investment income

Our investment income increased 328.2% to Rmb 1,828 million (US\$290.4 million) in 2011 from Rmb 427 million in 2010, primarily attributable to the increase in investments on corporate wealth management products and the optimization of investment portfolios under the condition that the products and portfolios are of good liquidity and low risk.

## Table of Contents

### Share of profits of associates/a joint venture

Contributed by good performance of our associated companies/joint venture, our share of profits of associates/a joint venture increased 42.4% to Rmb 567 million (US\$90.1 million) in 2011 from Rmb 398 million in 2010.

### Income tax expense

Our income tax expense increased 22.6% to Rmb 22,310 million (US\$3,544.7 million) in 2011 from Rmb 18,193 million in 2010, primarily as a result of the increase in revenues and profit due to the increase of average realized oil and gas prices. Our effective tax rate decreased to 24.1% in 2011 from 25.1% in 2010, mainly attributable to the tax benefit obtained in the mechanism of investment tax credit applied to OML130 project in Nigeria, which had better profitability this year.

### 2010 versus 2009

#### Consolidated net profit

Our consolidated net profit increased 84.5% to Rmb 54,410 million in 2010 from Rmb 29,486 million in 2009. The primary driving factors for the profit increase were higher production and sales volume, higher realized prices, and effective operating cost control. However, these positive factors were partially offset by higher special oil gain levy, higher income tax payments due to production volume and higher realized prices, and higher depreciation.

#### Revenues

Our oil and gas sales increased 74.1% to Rmb 146,134 million in 2010 from Rmb 83,914 million in 2009, mainly due to the substantial increase in oil and gas production and higher realized oil prices. We sold 256.7 million barrels of crude oil in 2010, representing an increase of 37.3% from 186.9 million barrels in 2009. Sales volume of our natural gas increased 43.6% to 59.8 million BOE (347 bcf) in 2010 from 41.7 million BOE (238 bcf) in 2009. In 2010, our oil and gas production was 329.6 million BOE, of which offshore China and overseas operations contributed 263.6 million BOE and 66.0 million BOE, respectively. The overseas production accounted for 20.0% of our total net production in 2010, compared with 17.3% in 2009.

The average realized crude oil price increased by US\$17.32 per barrel, or 28.6%, to US\$77.93 per barrel in 2010 from US\$60.61 per barrel in 2009. The average realized natural gas price increased by US\$0.48/mcf, or 12.0%, to US\$4.49/mcf, in 2010 from US\$4.01/mcf, in 2009. In 2010, having taken the opportunities arising from strong domestic demand for crude oil in China and the higher benchmark oil price in the Far East, we have achieved higher realized oil prices by closely monitoring the market movements and understanding the customers' needs. On the other hand, based on the development of the domestic natural gas market, we raised the natural gas sales prices for certain customers through negotiations, which improved the overall natural gas prices.

In 2010, our net marketing profit, which is marketing revenues less costs of purchases, decreased 29.3% to Rmb 210 million from Rmb 297 million in 2009. Our realized marketing profit margin, which is our net marketing profit calculated as a percentage of marketing revenues, decreased from 1.4% in 2009 to 0.7% in 2010, primarily due to less willingness to purchase oil at increasing prices by our major customers.

#### Operating expenses

Our operating expenses increased 25.3% to Rmb 15,647 million in 2010 from Rmb 12,490 million in 2009. Apart from the commencement of production of new oil and gas fields, the increase of operating expenses is also mainly

attributable to the intensive operation workload of the existing producing fields. Operating expenses per BOE decreased 10.0% to Rmb 49.3 per BOE in 2010 from Rmb 54.8 per BOE in 2009. Operating expenses per BOE offshore China decreased 9.5% to Rmb 44.7 per BOE in 2010 from Rmb 49.4 per BOE in 2009. The decrease is attributable to the economies of scale resulted from the increase in oil and gas production. Overseas operating expenses per BOE decreased 11.0% to Rmb 72.0 per BOE in 2010 from Rmb 80.9 per BOE in 2009, primarily contributed by increased production percentage from low-cost oil and gas fields, such as Akpo oilfield in OML130.

## Table of Contents

### Taxes other than income tax

Our taxes other than income tax increased 82.8% to Rmb 7,109 million in 2010 from Rmb 3,888 million in 2009, primarily as a result of increased tax payments due to the increase in oil and gas production and higher realized oil and gas prices.

### Exploration expenses

Our exploration expenses increased 69.5% to Rmb 5,483 million in 2010 from Rmb 3,234 million in 2009, primarily as a result of our continuously enhancing exploratory activities including more wells being drilled and more seismic data being acquired. In 2010, our independent exploration activities consisted of 48 wildcat wells and 33 appraisal wells. Meanwhile, we acquired 22,598 km<sup>2</sup> 2D and 10,887 km<sup>2</sup> 3D seismic data in 2010. The continuing efforts made on the above mentioned items brought up a series of important discoveries on reserves.

### Depreciation, depletion and amortization

Our depreciation, depletion and amortization increased 67.8% to Rmb 26,756 million in 2010 from Rmb 15,943 million in 2009. Our average depreciation, depletion and amortization per barrel increased by 20.6% to Rmb 84.4 per BOE in 2010 from Rmb 70.0 per BOE in 2009, mainly attributable to the commencement of production on new oil and gas fields in 2009 and 2010, which were developed under the environment of increasing prices of raw materials and services over the past few years.

The dismantlement provisions related depreciation, depletion and amortization costs increased 78.9% to Rmb 1,662 million in 2010 from Rmb 929 million in 2009. Our average dismantling costs per barrel increased 28.4% to Rmb 5.24 per BOE in 2010 from Rmb 4.08 per BOE in 2009. In addition to the new oil and gas fields and higher projected service fees and raw material prices, the increase in dismantlement cost is also attributable to the increased dismantlement obligations as a result of re-evaluation of expected work commitments.

### Special Oil Gain Levy

Our Special Oil Gain Levy increased 178.5% to Rmb 17,706 million in 2010 from Rmb 6,357 million in 2009, primarily as a result of our increased sales volume and higher realized oil prices offshore China.

### Impairment and provision

Our impairment and provision increased 285.7% to Rmb 27 million in 2010 from Rmb 7 million in 2009, primarily due to the inventory provision during the year.

### Selling and administrative expenses

Our selling and administrative expenses increased 34.2% to Rmb 3,039 million in 2010 from Rmb 2,264 million in 2009, mainly due to the increased selling expenses resulting from the higher sales volume, and the commission expenses incurred in 2010 for the acquisitions of new projects. Our selling and administrative expenses per barrel decreased 3.6% to Rmb 9.58 per BOE in 2010 from Rmb 9.94 per BOE in 2009, primarily as a result of the economies of scale from increased production.

### Finance costs/Interest income

Our finance costs increased 109.7% to Rmb 1,122 million in 2010 from Rmb 535 million in 2009, primarily due to the interest payment from additional debt obligations as well as the increase in unwinding of discount on provision for dismantlement in 2010. Our interest income slightly decreased 3.1% to Rmb 618 million in 2010 from Rmb 638 million in 2009.

Table of Contents

## Exchange gains, net

Our net exchange gains increased 1,742.6% to Rmb 995 million in 2010 from Rmb 54 million in 2009, primarily as a result of the exchange rate fluctuation in Renminbi during the year. In 2010, the exchange rates of Renminbi against U.S. dollar and Hong Kong dollar increased 3.1% and 3.5%, respectively.

## Investment income

Our investment income increased 113.5% to Rmb 427 million in 2010 from Rmb 200 million in 2009, primarily attributable to the increased investments on corporate wealth management products under the condition that the products are of good liquidity and low risk.

## Share of profits of associates/a joint venture

Contributed by good performance of our associated companies and acquisition of Bidas, our share of profits of associates/a joint venture increased 130.1% to Rmb 398 million in 2010 from Rmb 173 million in 2009.

## Income tax expense

Our income tax expense increased 60.5% to Rmb 18,193 million in 2010 from Rmb 11,335 million in 2009, primarily as a result of the increase in revenues and profit due to the increase of sales volume and average realized oil and gas prices. Our effective tax rate decreased to 25.1% in 2010 from 27.7% in 2009, primarily as a result of the tax benefit obtained in 2010 of OML130 project in Nigeria.

## B. LIQUIDITY AND CAPITAL RESOURCES

Our primary source of cash during 2011 was cash flow from operating activities. We used cash primarily to fund capital spending program and dividends. The following table summarizes our cash flows for the periods presented:

	Year ended December 31,		
	2009	2010(1)	2011
	(Rmb in millions)		
Cash generated from (used for):			
Operating activities	49,624	70,883	116,171
Investing activities	(37,307 )	(64,203 )	(99,036 )
Financing activities	(9,403 )	(1,610 )	(20,246 )
Net increase/(decrease) in cash and cash equivalents	2,914	5,070	(3,111 )

(1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

## Cash Generated from Operating Activities

In 2011, the increase in cash inflow from operating activities was mainly attributable to higher realized oil and gas prices.

#### Cash Used in Investing Activities

In 2011, the increase in cash outflow from investing activities was mainly due to the payments of (1) Rmb 6,896 million for the acquisition of OPTI Canada Inc., (2) Rmb 4,838 million for the acquisition of a 33.3% undivided interest in the Denver-Julesburg and Powder River Basins, and (3) Rmb 6,758 million to fund 75% of Chesapeake's share of development costs pursuant to a commitment made at the acquisition of the Eagle Ford Shale project.

Table of Contents

In 2011, our capital expenditures (other than for the acquisitions mentioned above) increased 30.0% to Rmb 36,823 million (US\$5,850.6 million), primarily as a result of the increase in exploration activities and the continuous development of projects under construction. Our development expenditures in 2011 primarily related to the development of the Eagle Ford Shale project, the OML130 project, Lufeng 13-2, Jinzhou 25-1S, Yacheng13-4 and Liuhua 4-1, as well as the expenses incurred for improving recovery factors of the oilfields in production.

In addition, our cash used in investing activities was also attributable to purchase of available-for-sale and held-to-maturity financial assets of Rmb 206,266 million (US\$32,772.4 million). Our cash generated from investing activities was mainly from the proceeds from the sales of available-for-sale and held-to-maturity financial assets in the amount of Rmb 177,467 million (US\$28,196.7 million), and from the increase of Rmb 12,500 million (US\$1,986.0 million) in time deposits with maturity of more than three months.

For 2012, we have budgeted approximately US\$10.9 billion for capital expenditures for exploration and development. The following table sets forth actual or budgeted capital expenditures on an accrual basis for our key operating areas for the periods indicated.

	Year ended December 31,				
	2009(1)	2010(1) (3) (Rmb million)	2011(1)	2011(1) (US\$ million)	2012(2)
Offshore China					
Bohai					
Development	23,425.2	14,802.1	8,400.9	1,334.8	2,003.3
Exploration	2,919.7	2,480.1	3,120.7	495.8	563.1
Western South China Sea					
Development	4,675.4	2,337.6	2,847.5	452.4	703.3
Exploration	1,388.1	1,774.2	2,060.4	327.4	326.6
Eastern South China Sea					
Development	2,874.6	4,484.5	11,474.7	1,823.1	2,511.4
Exploration	1,146.1	1,634.1	1,934.0	307.3	377.3
East China Sea					
Development	81.5	137.0	362.9	57.7	148.3
Exploration	264.0	512.8	716.1	113.8	146.1
Others					
Development	—	—	-	-	455.2
Exploration	130.4	137.8	180.1	28.6	40.8
Subtotal	36,905.0	28,300.2	31,097.2	4,940.8	7,275.4
Overseas					
Development	4,373.5	3,620.6	8,061.9	1,280.9	3,170.6
Exploration	1,435.8	865.4	1,351.4	214.7	436.4
Subtotal	5,809.3	4,486.0	9,692.3	1,495.6	3,607.0
Total	42,714.3	32,786.2	40,510.5	6,436.5	10,882.4

(1) Figures for 2009, 2010, and 2011 represent our actual spending for capital expenditure purposes, including expensed exploration costs.

(2) Figures for 2012 represent our budgeted capital expenditures.

(3) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28

(Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

In addition to the budgeted development and exploration expenditures relating to the oil and gas properties described above, we may make additional capital expenditures and investments consistent with our business strategy. See "Item 4—Information on the Company—Business Overview—Business Strategy." We expect to fund our capital expenditures with our cash flows from operations and external financing.

Table of Contents

Our ability to maintain and grow our revenues, profit and cash flows depends upon continued capital spending. Generally, we adjust our capital expenditure and investment budget on an annual basis. Our capital expenditure plans are subject to a number of risks, contingencies and other factors, some of which are beyond our control. Therefore, our actual future capital expenditures and investments will likely be different from our current planned amounts, and such differences may be significant. See “Item 3—Key Information—Risk Factors—Risks Relating to Our Operations—Our future prospects largely depend on our capital expenditures, which are subject to various risks.”

## Cash Used in Financing Activities

In 2011, the increase in net cash outflow from financing activities was mainly due to the distribution of dividends of Rmb 20,877 million (US\$3,317.0 million), the repayment of bank loans of Rmb 10,259 million (US\$1,630.0 million) and the redemption of OPTI First Lien notes of Rmb 5,321 million (US\$845.4 million). It was partially offset by the cash inflow of Rmb 18,132 million (US\$2,880.9 million) from the proceeds of issuance of financial notes and from the bank borrowings.

At the end of 2011, our total outstanding debt was Rmb 37,995 million (US\$6,036.8 million), compared to Rmb 31,053 million at the end of 2010. The increase in debt in 2011 was primarily attributable to the issuance of guaranteed notes of US\$2 billion. Our gearing ratio, which is defined as interest bearing debt divided by the sum of interest-bearing debt plus equity, was 12.6%.

We have debt service obligations consisting of principal and interest payments on our outstanding indebtedness. The following table summarizes the maturities of our long-term debt (including the current portion) outstanding as of December 31, 2011.

Due by December 31,	Debt maturities (principal only)			
	Original currency US\$ (in millions, except percentages)	Total Rmb equivalents	Total US\$ equivalents	
2012	592.0	3,726.1	592.0	
2013-2015	319.9	2,013.4	319.9	
2016-2017	102.7	646.7	102.7	
2018 and beyond	2,487.2	15,654.4	2,487.2	
Total	3,501.8	22,040.6	3,501.8	
Percentage of total debt	58.0	%	58.0	%

In January 2011, we, through CNOOC Finance (2011) Limited, our wholly owned subsidiary, issued US\$1,500 million 4.25% guaranteed notes due 2021 and US\$500 million 5.75% guaranteed notes due 2041. The obligations of CNOOC Finance (2011) Limited in respect of the notes are unconditionally and irrevocably guaranteed by us.

As of March 31, 2012, we had total foreign currency debt of US\$7,509.5 million, all of which is in U.S. dollars.

As of December 31, 2011, we had unutilized banking facilities amounting to approximately Rmb 160,579.8 million (US\$25,513.6 million) as compared to Rmb 179,029.5 million as of December 31, 2010.

In 2009, 2010 and 2011, we paid dividends totaling Rmb 15,747.1 million, Rmb 15,893.8 million and Rmb 18,392.4 million (US\$2,922.3 million) (before PRC withholding tax deducted), respectively. The payment and the amount of any dividends in the future will depend on our results of operations, cash flows, financial condition, the payment by our subsidiaries of cash dividends to us, future prospects and other factors which our directors may consider

relevant. The amount of dividends we paid historically is not indicative of the dividends that we will pay in the future.

We believe our future cash flows from operations, borrowing capacity and funds raised from our debt offerings will be sufficient to fund planned capital expenditures and investments, debt maturities and working capital requirements through at least 2012. However, our ability to obtain adequate financing to satisfy our capital expenditures and debt service requirements may be limited by our financial condition and results of operations and the liquidity of international and domestic financial markets. See “Item 3—Key Information—Risk Factors—Risks Relating to Our Operations—Our future prospects largely depend on our capital expenditures, which are subject to various risks.”

## Table of Contents

### Holding Company Structure

We are a holding company. Our entire oil and gas exploration, development, production and sales business in the PRC is owned and conducted by CNOOC China Limited, our wholly owned subsidiary in the PRC. Our entire oil and gas exploration, development and production business outside the PRC is owned and conducted by CNOOC International Limited, our wholly owned subsidiary incorporated in the British Virgin Islands, or directly owned by our company itself. International sales of crude oil and natural gas are conducted by China Offshore Oil (Singapore) International Pte Ltd, our wholly owned subsidiary incorporated in Singapore. Accordingly, our future cash flows will consist principally of dividends from our subsidiaries. The subsidiaries' ability to pay dividends to us is subject to various restrictions, including legal restrictions in their jurisdictions of incorporation. For example, legal restrictions in the PRC permit payment of dividends only out of profit determined in accordance with PRC accounting standards and regulations. In addition, under PRC law, CNOOC China Limited is required to set aside a portion of its profit each year to fund certain reserve funds. These reserves are not distributable as cash dividends.

### Inflation/Deflation

According to the China Statistical Bureau, as represented by the general consumer price index, China experienced an overall inflation rate of -0.7%, 3.3% and 5.4% in 2009, 2010 and 2011, respectively. Neither deflation nor inflation has had a significant impact on our results of operations in the respective years.

### Impact of Recently Issued Accounting Standards

#### IFRS and HKFRS

We have adopted the IFRS as issued by the IASB since January 1, 2008. Therefore, our consolidated financial statements for 2011 have been prepared in due compliance with both IFRS and HKFRS.

The IASB has issued a number of new and revised IFRSs and IFRIC Interpretations that, are first effective for the current accounting year commencing January 1, 2011 or later, but available for early adoption. The equivalent new and revised HKFRSs and HKFRS Interpretations consequently issued by the HKICPA have the same effective dates as those issued by the IASB and are in all material aspects identical to the pronouncements issued by the IASB. There have been no other material changes to HKFRSs.

Standards, revisions and amendments to IFRSs and HKFRSs which are applicable to the Company, and have been adopted for the first time for the current year's financial statements are summarized as following:

Mandatorily adopted as of January 1, 2011:

IAS 24 (Revised) /HKAS 24 (Revised) – Related Party Disclosures, clarifies and simplifies the definition of related parties. The revised standard also introduces an exemption from the general related party disclosure requirements for transactions with a government and entities that are controlled, jointly controlled or significantly influenced by the same government as the reporting entity. IAS24 (Revised)/HKAS 24 (Revised) are effective for annual periods beginning on or after January 1, 2011.

Other than the impact of IAS 24 (Revised)/HKAS 24 (Revised) as discussed above, the mandatory adoption of effective IFRS and HKFRS has had no significant financial effect on the consolidated financial statements.

Table of Contents

Early adopted before the mandatory effective dates:

IFRS 10/HKFRS 10 – Consolidated Financial Statements, which replaces the portion of IAS 27/HKAS 27 that addresses the accounting for consolidated financial statements. It establishes a single control model that applies to all entities. It requires management to exercise significant judgement to determine which entities are controlled, and therefore are required to be consolidated by a parent. The adoption of IFRS 10/HKFRS 10 does not have significant impact on the Company's consolidated financial statements.

IFRS 11/HKFRS 11 – Joint Arrangements, which replaces IAS 31/HKAS 31 Interests in Joint Ventures and Standing Interpretation Committee-13 Jointly-controlled Entities — Non-monetary Contributions by Ventures. IFRS 11/HKFRS 11 addresses only two forms of joint arrangements (joint operations and joint ventures) where there is joint control. In determining the type of arrangements, IFRS 11/HKFRS 11 requires parties to the arrangement to assess: 1) the legal form of the separate vehicle; 2) the terms of the contractual arrangement; and 3) other facts and circumstances that give them right to the assets and obligations for the liabilities or right to the net assets of the vehicle. A joint arrangement that meets the definition of a joint venture must be accounted for using the equity method. For a joint operation, an entity recognizes its assets, liabilities, revenues and expenses relating to its relative shares thereof. The application of this new standard impacts the financial position and presentation of statement of income of the Company. This is due to the cessation of proportionately consolidating a joint venture Bridas Corporation and the adoption of equity accounting for this investment.

The following presents the effect of adopting IFRS 11/HKFRS 11 on the consolidated statement of financial position comparing the retrospectively adjusted 2010 balances to the balances previously reported, and the 2011 recorded balances to what would have been reported had the Company continued to proportionately consolidate Bridas Corporation:

Increase/(decrease)	2010	2011
<b>Assets:</b>		
Property, plant and equipment	(25,653 )	(24,440 )
Intangible assets and goodwill	(1,874 )	(1,783 )
Investment in a joint venture	20,823	20,175
Other non-current assets	(1,523 )	(1,487 )
Trade receivables	(555 )	(676 )
Cash and cash equivalents	(12,284 )	(1,205 )
Other current assets	11,570	(73 )
	(9,496 )	(9,489 )
<b>Liabilities:</b>		
Loans and borrowings	(2,294 )	(2,206 )
Other non-current liabilities	(371 )	(477 )
Deferred tax liabilities	(6,281 )	(5,679 )
Trade payables	(494 )	(674 )
Other current liabilities	(56 )	(453 )
	(9,496 )	(9,489 )

The following presents the effect of adopting IFRS 11/HKFRS 11 on the consolidated statement of comprehensive income comparing the retrospectively adjusted 2010 amounts to the amounts previously reported, and the 2011 recorded amounts to what would have been reported had the Company continued to proportionately consolidate Bridas Corporation:

Table of Contents

	2010	2011
(Decrease) in revenue	(3,017 )	(4,941 )
Decrease in operating expenses	557	1,031
Decrease in taxes other than income tax	1,095	1,330
Decrease in depreciation, depletion and amortization	931	1,470
Decrease in other expenses	188	579
Decrease in income tax expense	47	284
Increase in share of profit of a joint venture	199	247
Total increase in net profit	-	-

The adoption of IFRS 11/HKFRS 11 has no material impact on basic and diluted earnings per share for the year ended December 31, 2011 and 2010.

IFRS 12/HKFRS 12 – Disclosure of Interests in Other Entities, which establishes the disclosure objectives for an entity to disclose information concerning its interest in a subsidiary, a joint arrangement, and associate or an unconsolidated structured entity. It also requires an entity to disclose the significant judgments and assumptions it has made in determining the nature of its interest in another entity or arrangement, also in determining the type of joint arrangement in which it has an interest. Additional disclosures are made in the Company’s consolidated financial statements.

IAS 27 (Revised)/HKAS 27 (Revised) – Separate Financial Statements, in which revisions are made resulting from the issuance of IFRS 10/HKFRS 10 and Consolidated Financial Statements are now addressed by IFRS 10/HKFRS 10. Therefore, IAS 27/HKAS 27 are revised to only address separate financial statements, including how to prepare separate financial statements of an investor and what disclosures should be made in the separate financial statements. The adoption of IAS27 (Revised)/HKAS 27 (Revised) does not have significant impact on the Company’s consolidated financial statements.

IAS 28 (Revised)/HKAS 28 (Revised) – Investments in Associates and Joint Ventures, in which revisions are made resulting from the issuance of IFRS 11/HKFRS 11. An entity applies IFRS 11/HKFRS 11 to determine the type of a joint arrangement in which it is involved. Once it has determined that it has an interest in a joint venture, the entity recognizes an investment and accounts for it using the equity method.

The five new or revised standards are required to be adopted for annual periods beginning on or after January 1, 2013 with early application permitted so long as all of the five new or revised standards are applied early. As discussed above, the Company has adopted these five new or revised standards on January 1, 2011.

For details, please refer to notes 2.1 and 2.2 to our consolidated financial statements included elsewhere in this annual report.

#### C. RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES, ETC.

See “Item 4—Information on the Company—Business Overview—Research and Development”, “Item 4—Information on the Company—Business Overview—Patents and Trademarks”.

#### D. TREND INFORMATION

Crude oil prices are a major driver of our results of operations. We price our crude oil with reference to the international crude oil prices, which have fluctuated considerably over the years. For more information about crude oil

prices, see “Item 3—Key Information—Risk Factors—Risks Relating to Our Operations—Our business, revenues and profits fluctuate with changes in oil and gas prices,” “Item 4—Information on the Company—Business Overview—Sales and Marketing—Sales of Crude Oil,” and “Item 5—Operating and Financial Review and Prospects—Operating Results—Results of Operations—2011 versus 2010.”

In addition to crude oil, natural gas is becoming an increasingly important part of our business. The Chinese government promotes the use of natural gas as a clean and efficient fuel. Demand for natural gas in the PRC is likely to increase significantly. We have expanded and will continue to expand our natural gas business and intend to exploit our natural gas reserves to meet growing demand for natural gas. For more information about our natural gas business, see “Item 3—Key Information—Risk Factors—Risks Relating to Our Operations—Any failure to implement our natural gas business strategy may adversely affect our business and financial position.”

Table of Contents

Other than as disclosed above and elsewhere in this annual report, we are not aware of any trends that are likely to have a material effect on our net sales or revenues, income from continuing operations, profitability, liquidity or capital resources, or that would cause reported financial information not necessarily to be indicative of future operating results or financial conditions.

## E. OFF-BALANCE SHEET ARRANGEMENTS

None.

## F. TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

The following table sets forth information regarding our contractual obligations for the periods indicated.

Contractual Obligations	Total Rmb million	Payments due by period			
		Less than 1 year Rmb million	1-3 years Rmb million	3-5 years Rmb million	More than 5 years Rmb million
Long-term debt obligations	22,040	3,726	1,732	593	15,989
Operating lease obligations	2,387	975	720	377	315
Provision for dismantlement(1)	24,995	31	—	—	24,964
Total	49,422	4,732	2,452	970	41,268

(1) Provision for dismantlement represents the discounted present value of retirement obligations in connection with upstream assets, which primarily relate to asset removal costs at the completion date of the relevant project.

As of December 31, 2009, 2010 and 2011 we had the following capital commitments, principally for the construction and purchase of property, plant and equipment:

Capital Commitments	2009 Rmb million	2010(1) Rmb million	2011 Rmb million
Contracted, but not provided for	5,650	9,030	15,219
Authorized, but not contracted for	48,908	45,973	59,584

(1) After the early adoption of IFRS10-Consolidated Financial Statements, IFRS11-Joint Arrangements, IFRS12-Disclosure of Interest in Other Entities, IAS 27 (Revised)-Separated Financial Statements and IAS 28 (Revised)-Investments in Associates and Joint Ventures from January 1, 2011, certain comparative figures have been adjusted to conform with the current period's presentation. For additional information, please refer to note 2.2 to the audited financial statements on page F-13.

The capital commitments do not include investment commitments for acquisitions of equity interest or working interest, which have been disclosed in note 4 to our consolidated financial statements included elsewhere in this annual report.

## G. SAFE HARBOR

The safe harbor provided in Section 27A of the Securities Act and Section 21E of the Exchange Act, or the statutory safe harbors, shall apply to forward-looking information provided pursuant to Item 5.F above. For our cautionary statement on the forward looking statement in this annual report, see the section “Forward-Looking Statements” on page 9 of this annual report.

## ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

## A. DIRECTORS AND SENIOR MANAGEMENT

In accordance with Hong Kong law and our Articles of Association, our affairs are managed by our Board, which has 10 members, including two executive directors, four non-executive directors and four independent non-executive directors as of December 31, 2011.

The table below sets forth information about our directors and senior officers:

Name	Year of Birth	Position
Yilin Wang	1956	Chairman of our Board and Non-executive Director (effective April 15, 2011)
Chengyu Fu	1951	Former Chairman of our Board and Non-executive Director (resigned, effective April 15, 2011)
Hua Yang	1961	Vice Chairman of our Board and Non-executive Director (resigned as Chief Executive Officer and re-designated from Executive Director to Non-executive Director, effective November 23, 2011)
Fanrong Li	1963	Executive Director, Chief Executive Officer (since November 23, 2011) and President
Guangqi Wu	1957	Executive Director and Compliance Officer
Shouwei Zhou	1950	Non-executive Director
Zhenfang Wu	1952	Non-executive Director
Edgar W. K. Cheng	1943	Independent Non-executive Director (resigned, effective November 3, 2011)
Sung Hong Chiu	1947	Independent Non-executive Director
Lawrence J. Lau	1944	Independent Non-executive Director
Aloysius Hau Yin Tse	1948	Independent Non-executive Director
Tao Wang	1931	Independent Non-executive Director
Guangyu Yuan	1959	Executive Vice President
Weilin Zhu	1956	Executive Vice President
Liguo Zhao	1953	General Counsel
Bi Chen	1961	Executive Vice President and General Manager of CNOOC China Limited Tianjin Branch

Edgar Filing: CNOOC LTD - Form 20-F

Wei Chen	1958	Senior Vice President and General Director of CNOOC Research Institute
Guohua Zhang	1960	Senior Vice President and General Manager of CNOOC China Limited Shanghai Branch

Table of Contents

Hua Zhong	1960	Chief Financial Officer (since September 16, 2010) and Joint Company Secretary (since March 22, 2012)
Zhi Fang	1962	Vice President and President of CNOOC International Limited
Yongzhi Jiang	1973	Former Joint Company Secretary (resigned on March 22, 2012)
May Sik Yu Tsue	1973	Joint Company Secretary

We have a management team with extensive experience in the oil and gas industry. As a result of our cooperation with international oil and gas companies, the management team and staff have had the opportunity to work closely with foreign partners both within and outside China. Such opportunities, in conjunction with management exchange programs with foreign partners, have provided valuable training to our personnel in international management practices. A description of the business experience and present position of each director and senior officer is provided below. Our registered office is located at 65th Floor, Bank of China Tower, One Garden Road, Central, Hong Kong.

## Executive Directors

Fanrong Li Born in 1963, Mr. Li is a professor-level senior engineer. He obtained a B.S. degree majoring in oil production from Jiang Han Petroleum Institute (now Yangtze University) in China in 1984, and received an MBA degree from the Business School of Cardiff University in United Kingdom in July 2003. Mr. Li has been working in the oil and gas industry in China for more than 28 years. He joined China National Offshore Oil Corporation (the "CNOOC") in 1984. From 1984 to 1989, he was a Petroleum Engineer in Nanhai East Oil Corporation of CNOOC. From 1989 to 2001, he worked as Offshore Platform Supervisor in Huizhou Oil Field for ACT (AGIP-Chevron-Texaco) Operators Group, later as Production Manager in Liuhua Oil Field Joint Operating Group with Amoco Orient Company, and Assistant to President of CNOOC China Limited Shenzhen Branch and Managing Director of Lufeng 22-1 Oil Field Joint Operating Group with Statoil (Orient) Inc. From January 2002 to November 2005, Mr. Li worked as Vice President of CNOOC China Limited Shenzhen Branch and Chief Representative of Joint Management Committee in CACT (CNOOC-AGIP-Chevron-Texaco) Operators Group. From November 2005 to February 2007, he worked as General Manager of Development and Production Department of the Company. From February 2007 to January 2009, he worked as President of CNOOC China Limited Shenzhen Branch. From January 2009 to April 2010, he served as an Assistant President of CNOOC. Mr. Li has worked as President of CNOOC Energy Technology & Services Limited since February 2009, and has served as Vice President of CNOOC since May 2010. Mr. Li was appointed as President of the Company with effect from September 16, 2010. He also serves as a Director of CNOOC China Limited and CNOOC International Limited, and Chairman and Director of CNOOC Southeast Asia Limited and CNOOC Deepwater Development Limited, all being subsidiaries of the Company. Mr. Li was appointed as a Non-executive Director of the Company with effect from May 24, 2010 and was re-designated from Non-executive Director to Executive Director with effect from September 16, 2010. He was appointed as Chief Executive Officer of the Company with effect from November 23, 2011.

Guangqi Wu Born in 1957, Mr. Wu is a geologist, professor-level senior economist and Certified Senior Enterprise Risk Manager and graduated with a B.S. degree from the Ocean University of China, majoring in Marine Geology. He also holds a master degree in Management from China University of Petroleum and a doctor degree in Management from Huazhong University of Science and Technology. Mr. Wu joined CNOOC in 1982. From 1994 to 2001, he served as the Deputy General Manager of CNOOC Oil Technical Services Company, a subsidiary of CNOOC, the Director of the Administration Department of CNOOC and the Director of the Ideology Affairs Department of CNOOC successively. Mr. Wu was appointed as an Assistant President of CNOOC in 2003, and has been the Vice President of CNOOC since 2004. Mr. Wu also served as an Independent Non-executive Director of China Yangtze

Power Limited, a company listed on the Shanghai Stock Exchange, from May 2003 to July 2010, and the Compliance Officer of the Company since June 1, 2005. Mr. Wu also serves as a Director of CNOOC China Limited, CNOOC International Limited and CNOOC Deepwater Development Limited, all being the subsidiaries of the Company. Mr. Wu was appointed as an Executive Director of the Company with effect from June 1, 2005.

Table of Contents

## Non-executive Directors

Yilin Wang Born in 1956, Mr Wang is a professor-level senior engineer. He graduated from China University of Petroleum majoring in petroleum geology and exploration and received a doctorate degree. He has nearly 30 years of working experience in China's oil and gas industry. From June 1996 to September 1999, Mr. Wang served as the deputy director and chief exploration geologist of Xinjiang Petroleum Administration Bureau. From September 1999 to May 2004, he served as the general manager of Xinjiang Oilfield Company. From June 2001 to May 2004, he served as the senior executive of Xinjiang Petroleum Administration Bureau. From July to December 2003, he served as the Assistant to General Manager of China National Petroleum Corporation ("CNPC"). From December 2003 to April 2011, he served as the Deputy General Manager of CNPC. From July 2004 to July 2007, he also served as the safety director of CNPC. From November 2005 to April 14, 2011, he served as a Director of PetroChina Company Limited, a company listed on the New York Stock Exchange, The Stock Exchange of Hong Kong Limited and Shanghai Stock Exchange respectively. Since April 8, 2011, Mr. Wang serves as Chairman of China National Offshore Oil Corporation. Mr. Wang was appointed as Chairman and Non-executive Director of the Company with effect from April 15, 2011.

Chengyu Fu Born in 1951, Mr. Fu received a B.S. degree in geology from the Northeast Petroleum Institute in China and a master degree in petroleum engineering from the University of Southern California in the United States. He has over 31 years of experience in the oil industry in the China. He previously worked in China's Daqing, Liaohe and Huabei oil fields. He joined CNOOC in 1982 and served as the Chinese Deputy Chief Representative, Chief Representative, Secretary to the Management Committees and Chairman of the Management Committees formed through joint ventures between CNOOC and Amoco, Chevron, Texaco, Phillips Petroleum, Shell and Agip, and later as the Deputy General Manager of CNOOC Nanhai East Corporation, a subsidiary of CNOOC, Vice President of Phillips Asia Inc., General Manager of the Xijiang Development Project, General Manager of CNOOC Nanhai East Corporation and Vice President of CNOOC. Subsequently, he became Executive Vice President, President and Chief Operating Officer of the Company in 2001. From September 2002 to August 2010, he served as Chairman of China Oilfield Services Limited ("COSL"), a company listed on The Stock Exchange of Hong Kong Limited and Shanghai Stock Exchange, a subsidiary of CNOOC. Mr. Fu served as Chief Executive Officer of the Company from October 2003 to September 2010, the Chairman of the Board of Directors of CNOOC China Limited from October 2003 to September 2010 and Chairman of the Board of Directors of CNOOC International Limited from August 1999 to September 2010, both being subsidiaries of the Company. Mr. Fu was appointed as Chairman of the Board of the Company in October 2003. He became the President of CNOOC in October 2003. He also served as Chairman of CNOOC Finance Corporation Limited and Zhonghai Trust Co. Ltd. Mr. Fu is also a Chairman of the Presidium of China Federation of Industrial Economics and the Vice-chairman of China Chamber of International Commerce. Mr. Fu was appointed as an Executive Director of the Company with effect from August 23, 1999 and was re-designated from Executive Director to Non-executive Director with effect from September 16, 2010. Mr. Fu resigned as Chairman of the Board of Directors and Non-executive Director of the Company on April 15, 2011.

Hua Yang Born in 1961, Mr. Yang is a professor-level senior engineer and graduated from China University of Petroleum with a B.S. degree in petroleum engineering. He also received an MBA degree from the Sloan School of Management at MIT as a Sloan Fellow. Mr. Yang joined CNOOC in 1982 and has over 30 years of experience in petroleum exploration and production. From 1982 to 1992, Mr. Yang served in a number of positions in CNOOC Research Center including the Director of Field Development Department, the Manager of Reservoir Engineering Department and the Project Manager. Thereafter, Mr. Yang was mainly involved in international business, M&A, corporate finance and capital market operations in the Company and its subsidiaries. From 1993 to 1999, he served as the Deputy Chief Geologist, the Deputy Director and the Acting Director for Overseas Development Department of the Company and the Vice President of CNOOC International Limited, a subsidiary of the Company. In 1999, Mr. Yang became a Senior Vice President of the Company and served as Chief Financial Officer of the Company from January 2005 to September 2010, Executive Vice President of the Company from October 2005 to March 2009,

President of the Company from March 2009 to September 2010, and was appointed as Vice Chairman of the Board and Chief Executive Officer of the Company with effect from 16 September 2010. Mr. Yang also served as an Assistant President of CNOOC from November 2006 to April 2010 and as Vice President of CNOOC from April 2010 to August 2011. Mr. Yang was appointed as Director and President of CNOOC in August 2011. In addition, he serves as Chairman and Director of CNOOC China Limited and CNOOC International Limited, both being subsidiaries of the Company. He was Director and President of CNOOC Southeast Asia Limited, a subsidiary of the Company, from 2002 to 2003, General Manager of CNOOC China Limited, a subsidiary of the Company, from February 2009 to July 2011, Chairman and Director of CNOOC Southeast Asia Limited, a subsidiary of the Company, from July 2009 to September 2010, Chairman and Director of CNOOC Deepwater Development Limited from January 2010 to September 2010 and a Director of CNOOC Finance Corporation Limited, a subsidiary of CNOOC, from May 2005 to December 2010. Mr. Yang was appointed as an Executive Director of the Company with effect from August 31, 2005. He resigned as Chief Executive Officer of the Company and was re-designated from an Executive Director to a Non-Executive Director of the Company with effect from November 23, 2011.

Table of Contents

Shouwei Zhou Born in 1950, Mr. Zhou, a member of Chinese Academy of Engineering, received a doctorate degree from the Southwest Petroleum Institute in China majoring in petroleum and natural gas engineering. He joined CNOOC in 1982. Mr. Zhou served as the Deputy General Manager of CNOOC Bohai Corporation, a subsidiary of CNOOC and the General Manager of CNOOC China Limited Tianjin Branch. He was appointed as an Executive Vice President of the Company in September 1999 and served as the President of the Company from July 2002 to March 2009. Since 2000, Mr. Zhou has been a Vice President of CNOOC. He also served as a Director and the General Manager of CNOOC China Limited, a subsidiary of the Company. From October 2004 to July 2009, Mr. Zhou served as a Director of CNOOC International Limited, a subsidiary of the Company. From April 2003 to July 2009, Mr. Zhou also served as the Chairman of CNOOC Southeast Asia Limited, a subsidiary of the Company. From December 2003 to December 2010, Mr. Zhou served as the Chairman of Offshore Oil Engineering Co., Ltd., a listed company on the Shanghai Stock Exchange and a subsidiary of CNOOC. Mr. Zhou was appointed as an Executive Director of the Company with effect from August 23, 1999 and was re-designated from Executive Director to Non-executive Director with effect from March 31, 2009.

Zhenfang Wu Born in 1952, Mr. Wu is a professor-level senior engineer and graduated with a bachelor degree from Dalian University of Technology, majoring in Offshore Petroleum Engineering and Construction. He later received an EMBA degree from Shanghai Jiao Tong University. Mr. Wu joined the petroleum industry in 1971. He joined CNOOC in 1980 when it was still in the pre-establishment stage. From 1993 to 2000, he was Deputy General Manager of CNOOC Nanhai West Corporation, a subsidiary of CNOOC and the President of CNOOC Chemical Limited, a subsidiary of CNOOC. He was also the Chairman of the Board of Directors of Fudao Fertilizer Limited and CNOOC Chemical Limited, both being subsidiaries of CNOOC, from 2001 to 2003 and from 2003 to 2005 respectively. From 2003 to 2004, Mr. Wu was an Assistant President of CNOOC and then was appointed as Vice President of CNOOC in August 2004. Mr. Wu also served as the Chairman and President of CNOOC Gas and Power Group, the General Manager of CNOOC Oil & Petrochemicals Co., Ltd., both being subsidiaries of CNOOC, as well as the Chairman of a number of subsidiaries of CNOOC. Mr. Wu also serves as Chairman of CNOOC Oil & Petrochemicals Co., Ltd., CNOOC and Shell Petrochemical Co. Ltd and a number of subsidiaries of CNOOC. Mr. Wu was appointed as an Executive Director of the Company with effect from August 31, 2005 and was re-designated from Executive Director to Non-executive Director with effect from September 1, 2006.

## Independent Non-executive Directors

He was Clinical Associate Professor of Medicine at Cornell University Medical College and practiced medicine and conducted clinical research at the Memorial Sloan-Kettering Cancer Centre in New York. Dr. Cheng was a former Chairman of the University Grants Commission in Hong Kong, a former member of the Education Commission and former Chairman of the Council of The Chinese University of Hong Kong. In addition to his academic experience, Dr. Cheng is currently the Chairman of the World-Wide Investment Co. Ltd. and had been in many other financial market positions such as Chairman of the Stock Exchange of Hong Kong, Vice-Chairman and non-executive director of the Hang Seng Bank Ltd., Vice President of the International Federation of Stock Exchange, Founding Chairman of the Hong Kong Securities Institute, Chairman of the Steering Committee on the Feasibility Study on the Financial Services Institute, Member of the Board of Directors of the Hong Kong Futures Exchange Ltd., Member of the Conference Board's Global Advisory Council, an independent non-executive director of the Standard Chartered Bank (Hong Kong) Ltd., a member of the Board of Directors of the Hong Kong Institute for Monetary Research and an independent non-executive director of American International Assurance Co. Ltd. He was an independent non-executive director of Shui On Land Limited. In his other public service capacity, Dr. Cheng served as the Head of the Central Policy Unit of the Government of Hong Kong Special Administrative Region from 1999 to 2001. He was a member of the Greater Pearl River Delta Business Council, a member of the Commission on Strategic Development and Chairman of the Council for Sustainable Development. He is currently a member of the Judicial

Officers Recommendation Commission. Dr. Cheng also plays an active role in Hong Kong-China affairs. He was appointed by the Chinese Government as a Hong Kong Affairs Advisor (1991–1997). He became a Member of the Preparatory Committee and also the Selection Committee for the Hong Kong Special Administrative Region of the National People's Congress (1996-1997). At present, he is a member of the 11th Chinese People's Political Consultative Conference National Committee. Dr. Cheng was appointed as an Independent Non-executive Director of the Company with effect from May 24, 2006. Dr. Cheng resigned as independent non-executive director and a member of the nomination committee of the Company and the independent non-executive director of Shui On Land Limited due to personal health reason on November 3, 2011.

Table of Contents

Sung Hong Chiu Born in 1947, Mr. Chiu received an LL.B. degree from the University of Sydney. He was admitted as a solicitor of the Supreme Court of New South Wales and the High Court of Australia. He has over 30 years' experience in legal practice and had been a director of a listed company in Australia. Mr. Chiu was the founding member of the Board of Trustees of the Australian Nursing Home Foundation and served as the General Secretary of the Australian Chinese Community Association of New South Wales. Mr. Chiu is also an Independent Non-executive Director of Tianda Holdings Limited (formerly Yunnan Enterprises Holdings Limited) since April 2008, a company listed on The Stock Exchange of Hong Kong Limited. Mr. Chiu was appointed as an Independent Non-executive Director of the Company with effect from September 7, 1999.

Lawrence J. Lau Born in 1944, Professor Lau graduated with a B.S. (with Great Distinction) in Physics and Economics from Stanford University in 1964, and received his M.A. and Ph.D. degrees in Economics from the University of California at Berkeley in 1966 and 1969 respectively. He joined the faculty of the Department of Economics at Stanford University in 1966, becoming Professor of Economics in 1976, the first Kwoh-Ting Li Professor in Economic Development in 1992, and Kwoh-Ting Li Professor in Economic Development, Emeritus in 2006. From 2004 to 2010, Professor Lau served as Vice-chancellor (President) of The Chinese University of Hong Kong. He is also concurrently Ralph and Claire Landau Professor of Economics at The Chinese University of Hong Kong. Professor Lau specializes in economic development, economic growth, and the economies of East Asia, including that of China. He has authored, co-authored, or edited five books and published more than 170 articles and notes in professional journals. A member of the 11th National Committee of the Chinese People's Political Consultative Conference and a Vice-Chairman of its Subcommittee of Population, Resources and Environment. Professor Lau also serves as a non-official member of the HKSAR Government's Executive Council, as a member of the Commission on Strategic Development, the Exchange Fund Advisory Committee and its Currency Board and Governance Sub-Committees, the Greater Pearl River Delta Business Council and the Honours Committee, 2011 and 2012 Non-Official Justices of the Peace (JP) Selection Committee and as an adviser to the Hong Kong-Taiwan Economic and Cultural Cooperation and Promotion Council. He was appointed a Justice of the Peace in Hong Kong in July 2007. He currently serves as Chairman of CIC International (Hong Kong) Co., Limited, Vice-Chairman of CITIC Capital Holdings Limited, Hong Kong, an Independent Non-executive Director of Semiconductor Manufacturing International Corporation, Hong Kong and Far Eastone Telecommunications Company Limited, Taipei. Professor Lau was appointed as an Independent Non-executive Director of the Company with effect from August 31, 2005.

Aloysius Hau Yin Tse Born in 1948, Mr. Tse is a fellow of The Institute of Chartered Accountants in England and Wales, and the Hong Kong Institute of Certified Public Accountants ("HKICPA"). Mr. Tse is a past president and the current member of the Audit Committee of the HKICPA. He joined KPMG in 1976, became a partner in 1984 and retired in March 2003. Mr. Tse was a non-executive Chairman of KPMG's operations in the PRC and a member of the KPMG China advisory board from 1997 to 2000. Mr. Tse is currently an independent non-executive director of China Telecom Corporation Limited, Wing Hang Bank Limited, Linmark Group Limited, SJM Holdings Limited and Sinofert Holdings Limited, companies listed on The Stock Exchange of Hong Kong Limited. He was an independent non-executive director of China Construction Bank Corporation, which is listed on the HKSE Main Board from 2004 to 2010. Mr. Tse is also a member of the International Advisory Council of the People's Municipal Government of Wuhan. Mr. Tse was appointed as an Independent Non-executive Director of the Company with effect from June 8, 2005.

Table of Contents

Tao Wang Born in 1931, Mr. Wang studied at the Moscow Institute of Oil in the former Soviet Union from 1954 to 1963, where he obtained his deputy doctoral degree in Geological Mineralogy. Mr. Wang is the Chairman of the Chinese National Committee for World Petroleum Council and the Chairman of Chinese-Saudi Arabia Friendship Association. He also serves as adjunct professor and/or doctoral advisor in several institutions, including China University of Petroleum. Mr. Wang has been working in the oil and gas sector for more than 50 years, and served as the Chief Geologist in Beijing Research Institute of Petroleum Science, the Deputy Commander and Chief Geologist of the North China Oil Exploration Command Office, the Deputy Director-General and Chief Geologist of Liao River Petroleum Exploration Bureau and the Principal of the Preparation and Construction Office for the Pearl River Mouth Project in the Command Office of South China Sea Oil Exploration. He became the General Manager of CNOOC Nanhai East Corporation in June 1983, the Minister and Secretary of the Party Leadership Group of the Ministry of Petroleum Industry in June 1985 and the General Manager and Secretary of the Party Leadership Group of China National Petroleum Corporation in May 1988 successively. He was also a Member of the 12th, 13th and 14th Central Committees of the Communist Party of China, a Member of the Standing Committee of the 9th National People's Congress and the Vice-chairman of the Environmental Protection and Resources Conservation Committee of the National People's Congress. He also served successively as the Vice Chairman and Senior Vice Chairman of the World Petroleum Council from 1994 to 2005. Mr. Wang served as the Honorary Chairman and an Executive Director of Sino Union Energy Investment Group Limited (Formerly Sino Union Petroleum & Chemical International Limited), a company listed on The Stock Exchange of Hong Kong Limited. Mr. Wang was appointed as Independent Non-executive Director of the Company with effect from May 29, 2008.

## Other Members of Senior Management

From August 1998 to March 1999, Ms. Tsue worked in LG International (HK) Ltd. as a senior accounts clerk. Ms. Tsue joined China Ocean Oilfield Services (HK) Limited in 1999 as an accountant. She helped to manage the finance of the CNOOC Insurance Limited since 2000 and became its employee in 2004 as a manager of finance department. She serves as company secretary of CNOOC Insurance Limited since March 2007. Ms. Tsue was appointed as Joint Company Secretary of the Company with effect from November 25, 2008.

Table of Contents

## B. COMPENSATION

The aggregate amount of fees, salaries, bonus, housing allowances, other allowances and benefits in kind paid to our directors for the year ended December 31, 2011 was approximately Rmb 8.9 million (US\$1.4 million), while the amount paid to our other senior management for the same period was approximately Rmb 6.6 million (US\$1.0 million). In addition, under our pension plan for 2011, we set aside an aggregate amount of Rmb 804,368 (US\$127,801) for pension and similar benefits for our directors (other than independent non-executive directors) and senior management. Our directors (other than independent non-executive directors) and senior management contributed an additional Rmb 505,051 (US\$80,245) to the pension plan for 2011. Each director's annual compensation, including fees, salaries, allowances, benefits in kind, pension benefits and share option benefits, is disclosed in note 10 to our consolidated financial statements included elsewhere in this annual report. Note 11 to our consolidated financial statements included elsewhere in this annual report discloses our five highest paid employees or directors during 2011. For further details regarding share options granted to our directors, officers and employees, see "Item 6—Directors, Senior Management and Employees—Share Ownership". For further details regarding our employee compensation, see "Item 4—Information on the Company—Business Overview—Employees and Employee Benefits."

## C. BOARD PRACTICE

## Committees

We have established an audit committee, a remuneration committee and a nomination committee. Our audit committee meets at least twice a year and is responsible for reviewing the completeness, accuracy and fairness of our accounts, evaluating our auditing scope (both internal and external) and procedures, as well as its internal control systems. Our audit committee is also responsible for overseeing the operation of the internal monitoring systems, so as to ensure our Board is able to monitor our overall financial position, to protect our assets, and to prevent major errors or omissions resulting from financial reporting. In addition, our audit committee reviews our Company's business ethics and compliance policies, related reports and performs other corporate governance functions. Our Board is responsible for these systems and appropriate delegations and guidance have been made. Our audit committee regularly reports to our Board. Our audit committee consists of Mr. Aloysius Hau Yin Tse as the audit committee financial expert for the purposes of U.S. securities laws and chairman of the audit committee, Mr. Sung Hong Chiu and Professor Lawrence J. Lau.

The main responsibilities and authorities of our remuneration committee include making recommendations to our Board on our policy and structure of the remuneration of our directors and senior management, determining the service contracts and specific remuneration packages for all executive directors and senior management, such as benefits in kind, pension rights and compensation payments, including any compensation payable for loss or termination of their office or appointment, and making recommendations to our Board on the remuneration of non-executive directors and independent non-executive directors. In 2011, our remuneration committee consisted of two independent non-executive directors (Mr. Sung Hong Chiu as chairman and Mr. Aloysius Hau Yin Tse) and one non-executive director (Mr. Zhenfang Wu).

The main authorities and responsibilities of our nomination committee include nominating candidates to serve as our directors and senior management for approval by our Board, reviewing the structure and composition of our Board, and evaluating the leadership abilities of our executive directors so as to ensure our competitive position. Our nomination committee is also responsible for reviewing and monitoring the training and continuous professional development of directors and senior management and make recommendations to our Board in this regard. In 2011, our nomination committee consisted of Mr. Shouwei Zhou as chairman, Professor Lawrence J. Lau and Mr. Tao Wang. Dr. Edgar W. K. Cheng resigned as our Independent Non-executive Director and a member of our nomination

committee due to personal health reason with effect from November 3, 2011. Mr. Yilin Wang, the Chairman of our Board, was appointed as the Chairman of our nomination committee with effect from March 28, 2012. Mr. Shouwei Zhou ceased acting as the Chairman and a member of our nomination committee with effect from the same day.

### Directors Service Contracts

Our executive directors and non-executive directors have entered into directors service contracts with us and the terms of appointment of our independent non-executive directors are governed by appointment letters. There is no severance pay arrangements for our directors.

### Summary of Significant Differences in Corporate Governance Practices for Purposes of Section 303A.11 of the New York Stock Exchange Listed Company Manual

We are incorporated under the laws of Hong Kong. The principal trading market for our shares is the Hong Kong Stock Exchange. In addition, because our shares are registered with the United States Securities and Exchange Commission and are listed on the New York Stock Exchange, or the NYSE, we are subject to certain corporate governance requirements. However, many of the corporate governance rules in the NYSE Listed Company Manual, or the NYSE Standards, do not apply to us as a “foreign private issuer” and we are permitted to follow the corporate governance practices in Hong Kong in lieu of most corporate governance standards contained in the NYSE Standards. Section 303A.11 of the NYSE Standards requires NYSE-listed foreign private issuers to describe the significant differences between their corporate governance practices and the corporate governance standards applicable to U.S. domestic companies listed on the NYSE, or U.S. domestic issuers. We set forth below a brief summary of such significant differences.

#### 1. Board and Committee Independence

While NYSE Standards require U.S. domestic issuers to have a majority of independent directors, we are not subject to this requirement. Four of our ten directors are independent non-executive directors.

NYSE Standards require U.S. domestic issuers to schedule regular executive sessions of non-management directors, or regular executive sessions of independent directors only. NYSE Standards also require that, if a U.S. domestic issuer chooses to hold regular meetings of all non-management directors, it should hold an executive session at least once a year to be attended by only independent directors. We are not subject to such requirements and our independent directors attend all board meetings where possible. We also schedule meetings between our chairman and our independent non-executive directors.

NYSE Standards require U.S. domestic issuers to disclose a method for interested parties to communicate directly with the presiding director of the executive sessions, or with the non-management or independent directors as a group. We are not subject to such requirement and we have not adopted such a method yet.

#### 2. Audit Committee

If an audit committee member simultaneously serves on the audit committees of more than three public companies, and the listed company does not limit the number of audit committees on which its audit committee members serve to three or less, then in each case, the board of directors of the U.S. domestic issuer is required to determine that such simultaneous service would not impair the ability of such member to effectively serve on its audit committee and disclose such determination on or through the U.S. domestic issuer’s website or in its annual proxy statement or annual report. We are not subject to such requirement and we have not addressed this in our audit committee charter.

NYSE Standards require audit committees of U.S. domestic issuers to discuss guidelines and policies that govern the process by which risk assessment and risk management are handled and include such responsibilities in their audit committee charters. We are not subject to such requirement and our audit committee charter does not have such provision. Our audit committee charter only provides that our audit committee shall review with our external auditors and the general managers of internal audit and risk management departments the scope, adequacy and effectiveness of our corporate accounting and financial controls, internal control and risk management systems, and any related significant findings regarding risks or exposures and consider recommendations for improvement of such controls.

Table of Contents

NYSE Standards require audit committees of U.S. domestic issuers to produce an audit committee report annually and include such report in their annual proxy statements. We are not subject to such requirement and we have not addressed this in our audit committee charter.

3. Remuneration Committee

NYSE Standards require U.S. domestic issuers to have a compensation committee composed entirely of independent directors. We are not subject to such requirement and have a remuneration committee that consists of two independent non-executive directors and one non-executive director.

NYSE Standards require U.S. domestic issuers to address in their remuneration committee charters matters regarding committee member removal and committee structure and operations (including authority to delegate to subcommittees). We are not subject to such requirement and we have not addressed this in our remuneration committee charter.

NYSE Standards require remuneration committees of U.S. domestic issuers to produce a remuneration committee report annually and include such report in their annual proxy statements or annual reports on Form 10-K. We are not subject to such requirement and we have not addressed this in our remuneration committee charter. We disclose the amounts of compensation of our directors on a named basis, senior management by band and the five highest paid employees in our annual reports according to the requirements of Hong Kong Stock Exchange Listing Rules.

4. Nomination Committee

While NYSE Standards require U.S. domestic issuers to have only independent directors on their nomination committee, we are not subject to such requirement and our nomination committee consists of two independent non-executive directors and one non-executive director.

NYSE Standards require U.S. domestic issuers to address in their nomination committee charters matters regarding committee member removal and committee structure and operations (including authority to delegate to subcommittees). We are not subject to such requirement and we have not addressed this in our nomination committee charter.

NYSE Standards require U.S. domestic issuers to adopt and disclose corporate governance guidelines. They must state in their annual proxy statements or annual reports that such corporate governance guidelines are available on their websites and provide the website addresses. We are not subject to such requirement. We have adopted a set of corporate governance guidelines in accordance with the Hong Kong Stock Exchange Listing Rules, including the CNOOC Limited Code of Ethics for Directors and Senior Officers (the “Code of Ethics”), to govern various aspects of our corporate governance. We have posted the Code of Ethics on our website. See “Item 16B—Code of Ethics.”

D. EMPLOYEES

See “Item 4—Information on the Company—Business Overview—Employees and Employee Benefits.”

(1) Except for share options granted under the Pre-Global Offering Share Option Scheme, all share options granted are subject to a vesting schedule pursuant to which one third of the options granted vest on the first, second and third anniversaries of the date of grant, respectively, such that the options granted are fully vested on the third anniversary of the date of grant.

(2) 50% of the share options granted are vested 18 months after the date of grant, the remaining 50% are vested 30 months after the date of grant.

(3) Mr. Chengyu Fu resigned as Chairman of the Board and Non-executive Director of the Company on April 15, 2011.

(4) Mr. Hua Yang was re-designated to Non-executive Director of the Company on November 23, 2011.

For the year ended December 31, 2011, no share options granted under our share option schemes were exercised. For the period from January 1, 2012 to March 31, 2012, no share options were exercised.

As of December 31, 2011, we had 420,960,900 share options outstanding under our share option schemes, which represented approximately 0.94% of our shares in issue as of that date.

For further details about our share option schemes, see notes 10 and 27 to our consolidated financial statements included elsewhere in this annual report.

As of March 31, 2012, none of our directors or employees owned 1% or more of our shares including the shares underlying the share options granted as of that date.

## ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS

### A. MAJOR SHAREHOLDERS

The following table sets forth information regarding the ownership of our outstanding shares by major shareholders as of March 31, 2012.

Shareholder	Number of Shares Owned	Percentage
<u>CNOOC(1)</u>	28,772,727,273	64.45%(2)

(1) CNOOC owns our shares indirectly through its wholly owned subsidiaries, CNOOC (BVI) Limited and Overseas Oil & Gas Corporation, Ltd.

(2) The number of our total issued and outstanding shares was 44,646,305,984 as of March 31, 2012, which reflects the cancellation of shares repurchased by us in 2011.

Our major shareholder listed above does not have voting rights different from our other shareholders. Except as set forth in the above table, we are not aware of any shareholders that hold more than 5% of our shares. Except as disclosed above, we are not aware of any significant changes in the percentage ownership of our major shareholder over the course of the past three years. To our knowledge, no arrangements are currently in place that could lead to a change of control of our company.

As of March 31, 2012, 13,346,202 ADSs were outstanding in the United States, representing approximately 3.0% of our then outstanding shares. At such date, the number of registered ADS holders in the United States was 45.

## B. RELATED PARTY TRANSACTIONS

## Overview

We regularly enter into transactions with related parties, including CNOOC and its associates, as defined under the Hong Kong Stock Exchange Listing Rules. Since CNOOC indirectly owns an aggregate of approximately 64.45% of our issued share capital, some of these transactions constitute connected transactions under the Hong Kong Stock Exchange Listing Rules, and are regulated by the Hong Kong Stock Exchange.

Apart from transactions with CNOOC and its associates, we have transactions with other state-owned enterprises, including, but not limited to, the following:

- Sales and purchase of goods and services;
- Purchases of assets, goods and services;
  - Leases of assets; and
- Bank deposits and borrowings.

These transactions are conducted in the ordinary course of business.

## Categories of Continuing Connected Transactions

We entered into four comprehensive framework agreements with each of CNOOC, COSL, COOEC and China BlueChemical Ltd., on November 8, 2007, for the provision of a range of products and services which may be required and requested from time to time by either party and/or its associates in respect of the continuing connected transactions. The term of each of the comprehensive framework agreements is for a period of three years from January 1, 2008. The continuing connected transactions and relevant annual caps were approved by our independent shareholders on December 6, 2007. The approved continuing connected transactions and annual caps for the period from January 1, 2008 to December 31, 2010 are specified as follows:

Category of continuing connected transactions	Relevant Annual Caps
Provision of exploration, oil and gas development, oil and gas production as well as marketing, management and ancillary services by CNOOC and/or its associates to us	
(a) Provision of exploration and support services	For the three years ending December 31, 2010, Rmb 6,296 million, Rmb 7,555 million and Rmb 9,066 million, respectively
(b) Provision of oil and gas development and support services	For the three years ending December 31, 2010, Rmb 18,608 million, Rmb 22,879 million and Rmb 26,759 million, respectively
(c) Provision of oil and gas production and support services	For the three years ending December 31, 2010, Rmb 5,124 million, Rmb 6,147 million and Rmb 7,253 million, respectively

(d) Provision of marketing, management and ancillary services	For the three years ending December 31, 2010, Rmb 789 million, Rmb 854 million and Rmb 967 million, respectively
---	---

(e) FPSO vessel leases	For the three years ending December 31, 2010, Rmb 1,908 million, Rmb 3,182 million and Rmb 3,250 million, respectively
------------------------	---

Table of Contents

Provision of management, technical, facilities and ancillary services, including the supply of materials from us to CNOOC and/or its associates

Provision of management, technical, facilities and ancillary services, including the supply of materials to CNOOC and/or its associates	For the three years ending December 31, 2010, Rmb 100 million, Rmb 100 million and Rmb 100 million, respectively
---	--

Sales of petroleum and natural gas products by us to CNOOC and/or its associates

(a) Sales of petroleum and natural gas products (other than long-term sales of natural gas and liquefied natural gas)	For the three years ending December 31, 2010, Rmb 94,440 million, Rmb 156,692 million and Rmb 181,782 million, respectively
---	---

(b) Long-term sales of natural gas and liquefied natural gas	For the three years ending December 31, 2010, Rmb 4,844 million, Rmb 7,118 million and Rmb 8,763 million, respectively
--	--

As the framework agreements dated November 8, 2007 expired on December 31, 2010, we entered into a new comprehensive framework agreement with CNOOC on November 1, 2010 for the provision (1) by us to CNOOC and/or its associates and (2) by CNOOC and/or its associates to us of a range of products and services which may be required and requested from time to time by either party and/or its associates in respect of the continuing connected transactions. The new comprehensive framework agreement is substantially on the same terms as the terms contained in the comprehensive framework agreements we entered into on November 8, 2007. The term of the new comprehensive framework agreement is for a period of three years from January 1, 2011. The continuing connected transactions and relevant annual caps under the new comprehensive framework agreement were approved by our independent shareholders on November 24, 2010.

The approved continuing connected transactions under the new comprehensive framework agreement are set out below:

1. Provision of exploration, oil and gas development, oil and gas production as well as marketing, management and ancillary services by CNOOC and/or its associates to us
  - (a) Provision of exploration and support services
  - (b) Provision of oil and gas development and support services
  - (c) Provision of oil and gas production and support services
  - (d) Provision of marketing, management and ancillary services
  - (e) FPSO vessel leases
  
2. Provision of management, technical, facilities and ancillary services, including the supply of materials by us to CNOOC and/or its associates
  
3. Sales of petroleum and natural gas products by us to CNOOC and/or its associates
  - (a) Sales of petroleum and natural gas products (other than long term sales of natural gas and LNG)
  - (b) Long term sales of natural gas and LNG

Pricing principles

The continuing connected transactions referred to in paragraphs 1(a) to 1(d) provided by CNOOC and/or its associates to us and in paragraph 2 above provided by us to CNOOC and/or its associates are based on negotiations with CNOOC and/or its associates on normal commercial terms, or on terms no less favorable than those available to us from independent third parties, under prevailing local market conditions, including considerations such as volume of sales, length of contracts, package of services, overall customer relationship and other market factors.

Table of Contents

For the continuing connected transactions described above, on the basis of the above pricing principle, such services must be charged in accordance with the following pricing mechanism and in the following sequential order:

- (i) state-prescribed prices; or
- (ii) where there is no state-prescribed price, market prices, including the local, national or international market prices; or
- (iii) when neither (i) nor (ii) is applicable, the cost for providing the relevant services (including the cost of sourcing or purchasing from third parties) plus a margin of not more than 10%, before any applicable taxes.

The continuing connected transactions referred to in paragraph 1(e) above provided by CNOOC and/or its associates to us are at market prices on normal commercial terms which are calculated on a daily basis.

The continuing connected transactions referred to in paragraphs 3(a) above provided by us to CNOOC and/or its associates are at state-prescribed prices or local, national or international market prices and on normal commercial terms.

The continuing connected transactions referred to in paragraphs 3(b) above provided by us to CNOOC and/or its associates are at state-prescribed prices or local, national or international market prices and on normal commercial terms, which is subject to adjustment in accordance with movements in international oil prices as well as other factors such as the term of the sales agreement and the length of the relevant pipeline.

A detailed discussion of significant connected transactions entered into in the ordinary course of business between us and our related parties during 2011 and the balances arising from connected transactions at the end of 2011 is included in note 29 to our consolidated financial statements included elsewhere in this annual report.

Disclosure and/or Independent Shareholders' approval requirements

Under the Hong Kong Stock Exchange Listing Rules, the following categories of continuing connected transactions are exempted from the independent shareholders' approval requirement but are subject to the reporting and announcement requirements set out in Rules 14A.45 to 14A.47 of the Hong Kong Stock Exchange Listing Rules, because each of the percentage ratios for these categories under the Hong Kong Stock Exchange Listing Rules (other than the profits ratio), where applicable, is expected to be less than 5% on an annual basis:

- Provision of marketing, management and ancillary services by CNOOC and/or its associates to us; and
- Provision of management, technical, facilities and ancillary services, including the supply of materials from us to CNOOC and/or its associates.

Under the Hong Kong Stock Exchange Listing Rules, the following categories of continuing connected transactions, or the non-exempt continuing connected transactions, are subject to the reporting, announcement and independent shareholders' approval requirements:

- Provision of exploration, oil and gas development, oil and gas production as well as marketing, management and ancillary services by CNOOC and/or its associates to us
  - (a) Provision of exploration and support services;
  - (b) Provision of oil and gas development and support services;
  - (c) Provision of oil and gas production and support services; and
  - (d) FPSO vessel leases.
- Sales of petroleum and natural gas products by us to CNOOC and/or its associates

Table of Contents

- (a) Sales of petroleum and natural gas products (other than long-term sales of natural gas and LNG); and  
 (b) Long term sales of natural gas and LNG.

We obtained independent shareholders' approval at the extraordinary general meetings held on November 24, 2010 for our continuing connected transactions and the annual caps with CNOOC and/or its associates for the period from January 1, 2011 to December 31, 2013, respectively. The annual caps and the conditions are specified as follows:

Category of continuing connected transactions	Relevant Annual Caps
Provision of exploration, oil and gas development, oil and gas production as well as marketing, management and ancillary services by CNOOC and/or its associates to us	
(a) Provision of exploration and support services	For the three years ending December 31, 2013, Rmb 6,676 million, Rmb 7,431 million and Rmb 7,737 million, respectively
(b) Provision of oil and gas development and support services	For the three years ending December 31, 2013, Rmb 24,067 million, Rmb 37,906 million and Rmb 38,822 million, respectively
(c) Provision of oil and gas production and support services	For the three years ending December 31, 2013, Rmb 8,228 million, Rmb 9,051 million and Rmb 9,956 million, respectively
(d) Provision of marketing, management and ancillary services	For the three years ending December 31, 2013, Rmb 820.98 million, Rmb 856.52 million and Rmb 905.09 million, respectively
(e) FPSO vessel leases	For the three years ending December 31, 2013, Rmb 1,401 million, Rmb 1,390 million and Rmb 1,546 million, respectively
Provision of management, technical, facilities and ancillary services, including the supply of materials from us to CNOOC and/or its associates	
Provision of management, technical, facilities and ancillary services, including the supply of materials to CNOOC and/or its associates	For the three years ending December 31, 2013, Rmb 100 million, Rmb 100 million and Rmb 100 million, respectively
Sales of petroleum and natural gas products by us to CNOOC and/or its associates	
(a) Sales of petroleum and natural gas products (other than long-term sales of natural gas and liquefied natural	For the three years ending December 31, 2013, Rmb 152,315 million,

gas)	Rmb 158,163 million and Rmb 165,561 million, respectively
------	--

(b) Long-term sales of natural gas and liquefied natural gas	For the three years ending December 31, 2013, Rmb 8,034 million, Rmb 9,146 million and Rmb 21,155 million, respectively
--	--

The non-exempt continuing connected transactions for the year ended December 31, 2011 to which any member of us was a party were entered into by us:

Table of Contents

- (i) in the ordinary and usual course of our business;
- (ii) either (a) on normal commercial terms, or (b) if there is no available comparison, on terms no less favorable to us than terms available from independent third parties; and
- (iii) in accordance with the relevant agreements governing them on terms that were fair and reasonable so far as our shareholders were concerned and in the interests of our company and shareholders as a whole.

We confirmed that the annual amount of each category of the non-exempt continuing connected transactions for the year ended December 31, 2011 did not exceed the applicable annual caps; and we have complied with other relevant provisions of the Hong Kong Stock Exchange Listing Rules in relation to each category of the non-exempt continuing connected transactions.

Transactions with CNOOC Finance Corporation Limited

On October 14, 2008, we entered into a financial services framework agreement with CNOOC Finance Corporation Limited, our 31.8% owned associate and a subsidiary of CNOOC, pursuant to which CNOOC Finance Corporation Limited provides us with settlement, depository, discounting, loans and entrustment loans services.

For the period from October 14, 2008 to August 19, 2010, the maximum daily outstanding balance of deposits (including accrued interest) we placed with CNOOC Finance Corporation Limited (excluding funds placed for the purpose of extending entrustment loans pursuant to the entrustment loan services), did not exceed Rmb 4,480 million. During such period, the maximum daily outstanding balance of deposits did not exceed 2.5% of the relevant percentage ratios under the Hong Kong Stock Exchange Listing Rules. Pursuant to the amendment to the Listing Rules in June 2010, we announced on August 20, 2010 to revise the maximum daily outstanding balance (including accrued interest) placed by us with CNOOC Finance Corporation Limited (excluding funds placed for the purpose of extending entrustment loans pursuant to the entrustment loan services) not to exceed Rmb 9,800 million. For the period from August 20, 2010 to December 31, 2010, the maximum daily outstanding balance we placed with CNOOC Finance Corporation Limited (excluding funds placed for the purpose of extending entrustment loans pursuant to the entrustment loan services) did not exceed Rmb 9,800 million. During such period, the maximum daily outstanding balance of deposits did not exceed 5% of the relevant percentage ratios under the Hong Kong Stock Exchange Listing Rules.

On August 20, 2010, we also entered into a renewal agreement with CNOOC Finance Corporation Limited to renew the financial services framework agreement entered into by us and CNOOC Finance Corporation Limited dated October 14, 2008. The renewal agreement is effective from January 1, 2011 to December 31, 2013. According to the renewal agreement, the maximum daily outstanding balance should not exceed Rmb 9,800 million for the period from January 1, 2011 (being the effective date of the renewal agreement) to December 31, 2013. The depository services were exempted from independent shareholders' approval requirements and the settlement, discounting, loans and entrustment loans services were exempted from the reporting, announcement, annual review and independent shareholders' approval requirements under the Hong Kong Stock Exchange Listing Rules.

We confirmed that the maximum daily outstanding balance of deposits (including accrued interest) we placed with CNOOC Finance Corporation Limited (excluding funds placed for the purpose of extending entrustment loans pursuant to the entrustment loan services) during the year ended December 31, 2011, did not exceed Rmb 9,800 million.

C. INTERESTS OF EXPERTS AND COUNSEL

ITEM 8. FINANCIAL INFORMATION

A. CONSOLIDATED STATEMENTS AND OTHER FINANCIAL INFORMATION

See pages beginning on page F-1 following Item 19.

Legal Proceedings

As at December 31, 2011, the Company was not involved in any material litigation or arbitration and no material litigation or arbitration were pending or threatened or made against the Company so far as the Company is aware.

Since early March 2012, the Company has noted media articles reporting that a law firm has filed a purported class action complaint in the U.S. against the Company and certain of its officers and/or directors, and has been publicly soliciting all relevant persons to participate in such class action as plaintiffs. The complaint alleged that the statements made by the Company during certain period in 2011 regarding its financial results and the oil spill accidents occurred at the Penglai 19-3 oilfield were materially false and misleading. The Company has also noted press releases reporting a number of law firms announcing their own investigations into the legal claims against the Company and certain of its officers and/or directors for the potential securities violations in relation to the allegations. To the Company's best knowledge, it has not been served with any legal documents or notices relating to the class action complaint. To the extent these claims are pursued by the plaintiffs, the Company intends to defend vigorously against such claims.

Dividend Distribution Policy

The payment of any future dividends will be determined by our Board, subject to shareholders' approval for all dividends other than interim dividends, based upon, among other things, our future earnings, capital requirements, financial conditions, future prospects and other factors which our Board may consider relevant. Our ability to pay dividends will also depend on the cash flows determined by the dividends, if any, received by us from our subsidiaries and associates. Holders of our shares will be entitled to receive such dividends declared by our Board pro rata according to the amounts paid up or credited as paid up on the shares. Subject to the factors described above, we currently intend to pursue a dividend policy consistent with other international oil and gas exploration and production companies.

Dividends may be paid only out of our distributable profits as permitted under Hong Kong law, which does not restrict the payment of dividends to nonresident holders of our securities. To the extent profits are distributed as dividends, such portion of profits will not be available to be reinvested in our operations.

Holders of our ADSs will be entitled to receive dividends, subject to the terms of the deposit agreement, to the same extent as holders of our shares, less the fees and expenses payable under the deposit agreement and withholding taxes of 10%. Cash dividends will be paid to the depositary in Hong Kong dollars and will be converted by the depositary into U.S. dollars and paid to holders of ADSs. Stock dividends, if any, will be distributed to the depositary and will be distributed by the depositary, in the form of additional ADSs, to holders of the ADSs.

In 2009, we declared and paid dividends totaling Rmb 15,747.1 million. In 2010, we declared and paid dividends totaling Rmb 15,893.8 million. In 2011, we declared and paid dividends totaling Rmb 18,392.4 million (US\$2,922.3 million). The amount of dividends we paid historically is not indicative of the dividends that we will pay in the future.

Substantially all our dividend payments result from dividends paid to us by CNOOC China Limited. CNOOC China Limited must follow the laws and regulations of the PRC and its articles of association in determining its dividends. As a wholly foreign owned enterprise in China, CNOOC China Limited has to provide for a reserve fund

and staff and workers' bonus and welfare fund, each of which is appropriated from net profit after taxation but before dividend distribution according to the prevailing accounting rules and regulations in the PRC. CNOOC China Limited is required to allocate at least 10% of its net profit to the reserve fund until the balance of this fund has reached 50% of its registered capital, which amount was reached in 2009. Appropriations to the staff and workers' bonus and welfare fund, which are determined at the discretion of the directors of CNOOC China Limited, are charged to expense as incurred in our consolidated financial statements, which were prepared under IFRS. In accordance with the "Temporary Regulation for Safety Expense Financial Management of High Risk Industry" and the implementation guidance issued by the Ministry of Finance of the PRC, a safety fund has been accrued for our oil and gas exploration and production activities within the PRC. The accrued safety fund will be utilized for improving the safety conditions of our production. Included in other reserves was a provision for safety fund under the PRC regulation amounting to nil in 2011, which was Rmb 13.5 million in 2010. None of the contributions of CNOOC China Limited to these statutory funds may be used for dividend purposes.

Table of Contents

For the years ended December 31, 2009, 2010 and 2011, CNOOC China Limited made the following appropriations to the statutory reserves:

	For the year ended December 31, 2009		For the year ended December 31, 2010		For the year ended December 31, 2011	
	Percentage of Net Profits	Rmb (in millions)	Percentage of Net Profits	Rmb (in millions)	Percentage of Net Profits	Rmb (in millions)
Reserve fund	0.0%	—	0.0%	—	0.0%	—
Staff and workers' bonus and welfare fund	0.0%	—	0.3%	154.3	0.2%	121.8
Safety fund	1.4%	407.3	1.2%	628.6	0.8%	595.1

## Contingencies

(a) On January 8, 2006, the Company signed a definitive agreement with South Atlantic Petroleum Limited (“SAPETRO”) to acquire a 45% working interest in the Offshore Oil Mining Lease 130 (“OML130”) in Nigeria (the “OML130 Transaction”) and the OML130 Transaction was completed on April 20, 2006.

In 2007, a local tax office in Nigeria (the “Nigerian Local Tax Office”) conducted a tax audit on SAPETRO. According to the preliminary tax audit results, the Nigerian Local Tax Office has raised a disagreement with the tax filings made for the OML130 Transaction.

The tax audit assessment made by the Nigerian Local Tax Office has been contested by the Company in accordance with Nigerian laws. The Company then filed a suit in the Nigerian Federal High Court. In March 2011, the Nigeria Federal High Court delivered a binding judgement in favour of the Company, agreeing that the Company is not subject to Value Added Tax for the OML130 Transaction. The judgement was appealed by counterparties to the High Court. After seeking legal advice, the Company's management believes that the Company has reasonable grounds in defending for such an appeal. Consequently, no provision has been made for any expenses which might arise as a result of the dispute.

(b) On October 26, 2011, the Company received notice of assessment from Federal Inland Revenue Service (“FIRS”), confirming that the effective Petroleum Profit Tax (“PPT”) and related tax for the year of 2010 shall be calculated and payable on the basis of the PPT Tax Return prepared by Nigerian National Petroleum Corporation. The Company contested the notice of assessment. On January 13, 2012, the Company, together with South Atlantic Petroleum Limited, has filed an appeal in relation thereto to the local Tax Appeal Tribunal. No verdict has been issued to date, and the result of the appeal is still uncertain.

(c) The Company has extended interest-free intercompany loans to CNOOC International, a wholly-owned subsidiary, to provide onward funding to its subsidiaries domiciled outside the PRC. Upon receipt of the Chinese Resident Enterprise Approval, the Company may be liable to pay taxes on the deemed interest income for the intercompany loan to CNOOC International starting from January 1, 2008. The Company is currently applying to, and awaiting confirmation from its in-charge tax authority for an exemption on this possible deemed interest income. In July 2011, the Company completed the transfer of the interest-free intercompany loans to the share capital account of CNOOC International, in order to reduce the future tax exposure arising from any deemed interest income for the intercompany loans.

Table of Contents

(d) Two oil spill accidents occurred on June 4 and June 17, 2011 respectively at Platforms B and C of Penglai 19-3 oilfield, which is being operated under a production sharing contract (“PSC”) among CNOOC China Limited, the subsidiary of the Company, and two subsidiaries of ConocoPhillips (“ConocoPhillips”), the US based oil company, among which ConocoPhillips China Inc. (“COPC”) is the operator and responsible for the daily operations of the oilfield. Under the PSC, ConocoPhillips and the Company have 49% and 51% of participating interests, respectively, in respect of development and production. On November 11, 2011, the State Oceanic Administration of the PRC announced the investigation conclusion made by the joint investigation team of the government that, “ConocoPhillips China Inc. violated the Overall Development Plan during the production operation on Penglai 19-3 oilfield, had defects in its procedures and management, and did not take necessary measures after obvious accident signs emerged, which altogether eventually resulted in an accident involving liabilities, causing significant oceanic pollution by oil spill.”

On January 25, 2012, the Company released that COPC had reached an agreement with Ministry of Agriculture of the PRC and China National Offshore Oil Corporation, the Company’s parent company, to resolve fishery indemnification and compensation issues for the oil spill accidents of Penglai 19-3 oilfield. Under this agreement, COPC will put up Rmb 1 billion to settle the indemnification and compensation for damages to the aquatic organisms in part of the affected areas of the Hebei Province and Liaoning Province as well as damages to the natural fishery resources in Bohai.

The Company is of the view that the Company’s obligations, if any, arising from the above mentioned accidents shall be determined in accordance with relevant laws and regulations, the PSC and related agreements, among others. Based on evaluations performed as of the date of these financial statements, the Company believes that it is not possible to determine provisions, if any, for the above mentioned accidents in these financial statements. The financial impact of such oil spill accidents on the Company is still uncertain, and the Company has not made any provision for the accidents in these financial statements.

## B. Significant Changes

The Company has no other subsequent events needed to be disclosed except those disclosed in note 4(iii) and note 25 to our consolidated financial statements included elsewhere in this annual report.

## ITEM 9. THE OFFER AND LISTING

Not applicable, except for Item 9.A.4 and Item 9.C.

We listed our shares on the Hong Kong Stock Exchange and our ADSs on the New York Stock Exchange in February 2001. Our shares are listed on the Hong Kong Stock Exchange under the stock code “00883” and our ADSs are listed on the New York Stock Exchange under the symbol “CEO.” The following table sets forth, for the periods indicated, the high and low closing prices per share, as reported on the Hong Kong Stock Exchange and adjusted retroactively to reflect the stock split, and per ADS, as reported on the New York Stock Exchange.

Period	Hong Kong Stock Exchange		New York Stock Exchange	
	High	Low	High	Low
	(HK\$ per share)		(US\$ per ADS)	
2007	16.92	6.16	216.49	78.18
2008	15.90	4.24	203.00	56.04

ITEM 10. ADDITIONAL INFORMATION

A. SHARE CAPITAL

Not applicable.

B. MEMORANDUM AND ARTICLES OF ASSOCIATION

We were incorporated with limited liability on August 20, 1999 in Hong Kong under the Companies Ordinance (Chapter 32 of the Laws of Hong Kong), or the Hong Kong Companies Ordinance. Our company registration number in Hong Kong is 685974. Under section three of our memorandum of association, we have the capacity and the rights, powers and privileges of a natural person and we may also do anything which we are permitted or required to do by any enactment or rule of law. The following are summaries of provisions of our memorandum and articles of association and the Hong Kong Companies Ordinance. For further details, you should read our memorandum of association, which was filed as an exhibit to our registration statement on Form F-1 (Registration No.333-10862) and our articles of association, as amended, which was filed as an exhibit to our annual report on Form 20-F for the fiscal year of 2010. Due to the recent changes in the Hong Kong Stock Exchange Listing Rules, we are required to upload, among other things, our memorandum and articles of association on our website and on the website of the Hong Kong Stock Exchange. We have complied with such requirement and as such, our memorandum and articles of association were further filed as an exhibit to the Form 6-K filed with the SEC on March 30, 2012 (File Number: 1-14966).

Issue of Shares

Under the Hong Kong Companies Ordinance our directors may, without obtaining the prior approval of our shareholders, offer to allot new shares in our company to existing shareholders on a pro rata basis. Our directors may not allot new shares of our company in any other manner without the prior approval of our shareholders at a general meeting. Any approval given at a general meeting granting our directors power to allot shares or securities convertible into shares generally shall continue in force from the date of the passing of the resolution until the earlier of:

- the conclusion of the next annual general meeting following the passing of the resolution; and
- the date on which the authority given under the resolution is revoked or varied by an ordinary resolution of the shareholders of the Company in a general meeting.

If such an approval for a general mandate to issue shares is given, the unissued shares of our company shall be at the disposal of our Board. Our directors may offer, allot, grant options over or otherwise dispose of the unissued shares to persons at such times and for such consideration and upon such terms and conditions as our directors may determine, subject to the restrictions under the Hong Kong Stock Exchange Listing Rules.

In accordance with Hong Kong Stock Exchange Listing Rules, any such approval of the shareholders must be limited to shares not exceeding 20% of our share capital in issue as of the date of granting such approval plus the share capital repurchased by us since the granting of such approval.

## Table of Contents

### Dividends

Subject to the Hong Kong Companies Ordinance, the shareholders at a general meeting may declare dividends to be paid to shareholders. However, under our articles of association, dividends cannot be declared in excess of the amount recommended by our Board.

In addition to dividends declared at a general meeting, our Board may declare and pay to the shareholders interim dividends as our Board deems justified by our financial position. Our Board may also pay any fixed dividend on any shares of our company semi-annually or at other suitable intervals, whenever our financial position, in their opinion, justifies such payment.

### Winding Up

If we are wound up, the surplus assets remaining after payment to all creditors are to be divided among our shareholders in proportion to the capital paid up on the shares held by them respectively, and if such surplus assets are insufficient to repay the whole of the paid-up capital, they are to be distributed so that the losses are borne by our shareholders in proportion to the capital paid up on the shares held by them respectively. The liquidator may, with the sanction of a special resolution, divide among our shareholders in specie or in kind the whole or any part of our assets or vest any part of our assets in trustees upon such trusts for the benefit of our shareholders or any of them as the resolution shall provide.

### Voting Rights

Under the Hong Kong Companies Ordinance, any action to be taken by the shareholders at a general meeting requires the affirmative vote of either an ordinary or a special resolution passed at such meeting.

- An ordinary resolution is a resolution passed by the majority of shareholders that are entitled to, and do, vote in person or by proxy at a general meeting;
- A special resolution is a resolution passed by not less than 75% of shareholders that are entitled to, and do, vote in person or by proxy at a general meeting.

Generally, resolutions of shareholders are passed by ordinary resolution. However, the Hong Kong Companies Ordinance provides that certain specified matters may only approved by shareholders by way of special resolutions. These matters include, for example:

- alteration of the object clause;
- alteration of the articles;
- change of a company's name;
- reduction of share capital; and
- voluntary winding up.

Subject to the requirement of the Hong Kong Stock Exchange Listing Rules, voting at any general meeting is by a show of hands unless a poll is demanded. If voting is by a show of hands, every shareholder who is present at the meeting in person or by proxy has one vote. On a poll, every shareholder who is present in person or by proxy has

one vote for every share held or represented by him. A poll may be demanded by:

- the chairman of the meeting;
- at least three members present in person (or in the case of a member being a corporation, by its duly authorized representative) or by proxy and entitled to vote at the meeting;

## Table of Contents

- any member or members present in person (or in the case of a member being a corporation, by its duly authorized representative) or by proxy and representing in the aggregate not less than 10% of the total voting rights of all members having the right to attend and vote at the meeting; or
- any member or members present in person (or in the case of a member being a corporation, by its duly authorized representative) or by proxy and holding shares conferring a right to attend and vote at the meeting on which there have been paid up sums in the aggregate equal to not less than 10% of the total sum paid up on all shares conferring that right.

Any action to be taken by the shareholders requires the affirmative vote of the requisite majority of the shares at a general meeting. There are no cumulative voting rights. Accordingly, the holders of a majority of the shares voting for the election of directors can elect all the directors if they choose to do so.

Under Hong Kong law and our memorandum and articles of association, shareholders who are not residents of Hong Kong may hold, vote and transfer their shares in our company in the same manner as our shareholders who are Hong Kong residents.

## General Meetings

We are required to hold an annual general meeting each year within fifteen months from the date of our last annual general meeting. We may also hold extraordinary general meetings from time to time. Our Board may convene an extraordinary general meeting at will, and shall on requisition in accordance with the Hong Kong Companies Ordinance, proceed to convene an extraordinary general meeting. Our annual general meeting and a meeting called for the purpose of passing a special resolution require at least twenty-one days' prior notice, and any other general meeting requires at least fourteen days' prior notice. The notice must specify the place, day and time of the meeting and, in the case of special business, the general nature of that business. The quorum for a general meeting is two shareholders present in person or by proxy. If within thirty minutes from the time appointed for the meeting a quorum is not present, the meeting, if convened upon requisition in accordance with the Hong Kong Companies Ordinance, must be dissolved; but in any other case it must stand adjourned to the same day in the next week at the same time and place, or to such other day, time and place as the chairman of the meeting may determine. If at such adjourned meeting a quorum is not present within thirty minutes from the time appointed for the meeting, the member or members present in person or by proxy shall be a quorum and may transact the business for which the meeting is called.

At each annual general meeting one third of our directors are to retire from office by rotation, save any director holding office as chairman or chief executive officer. The directors to retire every year are to be those who have been longest in office since their last election and the retiring directors will be eligible for re-election.

## Modification of Rights

Subject to the Hong Kong Companies Ordinance, any of the rights attaching to any class of shares, unless otherwise provided for by the terms of issue of the shares of that class, may be varied or abrogated with the written consent of the holders of not less than 75% of the issued shares of that class or with the sanction of a special resolution passed at a separate general meeting of the holders of shares of that class.

## Borrowing Powers

Our Board may exercise all the powers of our company to borrow money and to mortgage or charge all or any part of our undertaking, property and assets, whether present or future, and uncalled capital. Our Board may issue

debentures, debenture stock, bonds or other securities of our company, whether outright or as collateral security for any debt, liability or obligation of our company or of any third party. These borrowing powers are subject to variation by a special resolution of our company.

## Table of Contents

### Interested Transactions

Subject to the exceptions described below, none of our directors may vote on any contract, arrangement or proposal in which the director or any of his or her associates is materially interested. For this purpose, existence of material interest is presumed if a company, in which the director and/or his or her associates beneficially own 5% or more of any class of its shares or voting rights, is materially interested in the transaction. Our directors may, however, vote on the following matters:

- any contract or arrangement to give security or indemnity to the director or his or her associates for money lent or obligations undertaken by such director or his or her associates at the request of or for the benefit of our company or subsidiaries;
- any contract or arrangement to give security or indemnity to a third party for our debts or debts of our subsidiaries for which such director or his or her associates assumed responsibility by giving guarantee or security;
- any contract or arrangement concerning offering of securities by us (or any company which we may promote or be interested in purchasing) for which the director or his or her associates participate in the underwriting or sub-underwriting;
- any contract or arrangement in which the director or his or her associates are interested only by virtue of their interest in our securities;
  - any contract or arrangement concerning any other company in which the director or his or her associates are interested as an officer or executive or a shareholder in which the director or his or her associates are beneficially interested in shares of that company other than a company in which they in aggregate beneficially own more than 5% of the issued shares of any class or voting rights;
- any proposal or arrangement concerning employee benefits that do not provide privileges to our directors or their associates not generally accorded to the class of persons to whom such scheme or fund relates, including pension fund or retirement, death or disability benefits schemes; and
- any proposal or arrangement concerning the adoption, modification or operation of any employees' share scheme involving the issue or grant of options over shares or other securities by us to, or for the benefit of, our employees or employees of our subsidiaries under which the director or his or her associates may benefit.

### C. MATERIAL CONTRACTS

We have not entered into any material contracts in the last two years other than in the ordinary course of business and other than those described in "Item 7 Major Shareholders and Related Party Transactions Related Party Transactions."

### D. EXCHANGE CONTROLS

For information on foreign exchange controls in the PRC, foreign exchange rates, hedging activities and related foreign exchange risks, see "Item 3—Key Information—Selected Financial Data," "Item 3—Key Information—Risk Factors—Relating to the PRC—Government control of currency conversion and future movements in exchange rates may adversely affect our operations and financial condition" and "Item 11—Qualitative and Quantitative Disclosure about Market Risk."

### E. TAXATION

The taxation of income and capital gains of holders of our shares or ADSs is subject to the laws and practices of the PRC, Hong Kong and the jurisdictions in which holders of our shares or ADSs are resident or otherwise subject to tax. The following is a summary of taxation provisions that are anticipated to be material based on current law and practice. This summary is subject to change and does not constitute legal or tax advice. The discussion does not deal with all possible tax consequences relating to an investment in our shares or ADSs. In particular, the discussion does not address the tax consequences under state, local or other laws, such as non-PRC, non-Hong Kong or non-U.S. federal laws. Accordingly, we urge you to consult your tax adviser regarding the tax consequences of owning our shares and ADSs. The discussion is based upon laws and relevant interpretations in effect as of the date of this annual report, all of which are subject to change. There is no reciprocal tax treaty in effect between Hong Kong and the United States.

Table of Contents

The PRC

In 2007, the PRC National People's Congress passed the Enterprise Income Tax Law, and the PRC State Council subsequently issued the Implementation Regulations of the Enterprise Income Tax Law (together, the "New EIT Law"). On April 22, 2009, the State Administration of Taxation of the PRC (the "SAT") issued the "Notice regarding Matters on Determination of Tax Residence Status of Chinese-controlled Offshore Incorporated Enterprises under Rules of Effective Management" (the "Notice").

Pursuant to the New EIT Law and the Notice, enterprises established outside of China whose "de facto management bodies" are located in China are considered Chinese Resident Enterprises, or CREs. According to the formal approval from the SAT in October 2010, we are regarded as a CRE pursuant to the provisions of the New EIT Law and the Notice. Accordingly, we are required to withhold 10% corporate income tax when we make dividend distributions to our non-Chinese resident enterprise shareholders or ADS holders. The 10% dividend withholding tax rate will not be reduced under the 1984 Agreement between the United States and the People's Republic of China for the Avoidance of Double Taxation, or the PRC Treaty. We distributed the final dividend for the years ended December 31, 2008, 2009 and 2010 and the interim dividend for the periods ended June 30, 2009 and 2010, or the Dividends, after withholding a 10% enterprise income tax in respect of all shareholders whose names appeared on our register of members on the relevant record dates who are not individual natural persons. We did not withhold any tax in respect of Dividends payable to any natural person shareholders whose names appeared on our register of members on the relevant record dates.

Currently, gains realized by foreign individual investors upon the sale of overseas-listed shares or American depositary shares are not subject to tax on capital gains. In accordance with the New EIT Law, capital gains realized by foreign enterprises which are non-resident enterprises in China upon the sale of overseas-listed shares or American depositary shares are generally subject to a PRC enterprise income tax levied at a rate of 10%, unless exempted or reduced pursuant to an applicable double-taxation treaty or other exemption.

Hong Kong

Tax on Dividends

Under the current practices of the Hong Kong Inland Revenue Department, no tax is payable in Hong Kong on dividends paid by us.

Profits Tax

No tax is imposed in Hong Kong in respect of capital gains from the sale of property, such as the shares and ADSs. Trading gains from the sale of property by persons carrying on a trade, profession or business in Hong Kong where such gains are derived from or arise in Hong Kong from such trade, profession or business will be subject to Hong Kong profits tax which is currently imposed at a rate of 16.5% on corporations and at a maximum rate of 15% on individuals. Gains from sales of shares effected on the Hong Kong Stock Exchange will be considered to be derived from or arise in Hong Kong. Liability for Hong Kong profits tax will therefore arise in respect of trading gains from sales of shares realized by persons carrying on a business of trading or dealing in securities in Hong Kong.

Table of Contents

## Stamp Duty

Hong Kong stamp duty, currently charged at the rate of HK\$1.00 per HK\$1,000 or part thereof on the higher of the consideration for, or the value of, the shares, will be payable by the purchaser on every purchase and by the seller on every sale of shares. A total of HK\$2.00 per HK\$1,000 or part thereof is currently payable on a typical sale and purchase transaction involving shares. In addition, a fixed duty of HK\$5.00 is currently payable on any instrument of transfer of shares. The withdrawal of shares upon the surrender of ADSs, and the issuance of ADSs upon the deposit of shares, will also attract stamp duty at the rate described above for sale and purchase transactions unless the withdrawal or deposit does not result in a change in the beneficial ownership of the shares under Hong Kong law. The issuance of the ADSs upon the deposit of shares issued directly to the depository or for the account of the depository does not incur stamp duty if it does not involve a change of beneficial ownership in the shares. No Hong Kong stamp duty is payable upon the transfer of ADSs outside Hong Kong.

## United States

## U.S. Federal Income Tax Considerations

The following is a discussion of the material U.S. federal income tax consequences of owning and disposing of ADSs or shares by U.S. Holders (as defined below), but it does not purport to be a comprehensive description of all the tax considerations that may be relevant to a particular person's decision to hold such ADSs or shares. This discussion does not address U.S. state, local and non-U.S. tax consequences. The discussion applies only to U.S. Holders who hold ADSs or shares as capital assets for U.S. federal income tax purposes and does not address special classes of holders, such as:

- certain financial institutions;
- dealers or traders in securities who use a mark-to-market method of tax accounting;
- persons holding ADSs or shares as part of a hedge, straddle, conversion, integrated transaction or similar transaction;
  - persons whose functional currency for U.S. federal income tax purposes is not the U.S. dollar;
  - partnerships or other entities classified as partnerships for U.S. federal income tax purposes;
    - persons liable for the alternative minimum tax;
    - tax-exempt entities, including "individual retirement accounts" or "Roth IRAs";
    - persons that own or are deemed to own 10% or more of our voting stock;
- persons who acquired our ADSs or shares pursuant to the exercise of an employee stock option or otherwise as compensation; or
  - persons holding shares in connection with a trade or business conducted outside of the United States.

If an entity that is classified as a partnership for U.S. federal income tax purposes holds ADSs or shares, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the activities of the partnership. Partnerships holding ADSs or shares and partners in such partnerships should consult their tax advisers as to the particular U.S. federal income tax consequences of holding and disposing of the ADSs or shares.

This discussion is based on the Internal Revenue Code of 1986, as amended, administrative pronouncements, judicial decisions, final, temporary and proposed U.S. Treasury regulations and the PRC Treaty, all as of the date hereof. These laws are subject to change, possibly on a retroactive basis. It is also based in part on representations by the Depository and assumes that each obligation under the Deposit Agreement and any related agreement will be performed in accordance with its terms. U.S. Holders should consult their tax advisers concerning the U.S. federal, state, local and non-U.S. tax consequences of holding and disposing of ADSs or shares in their particular circumstances.

As used herein, a “U.S. Holder” is a beneficial owner of ADSs or shares that is, for U.S. federal income tax purposes: (i) an individual citizen or resident of the United States; (ii) a corporation, or other entity taxable as a corporation, created or organized in or under the laws of the United States or any political subdivision thereof; or (iii) an estate or trust the income of which is subject to U.S. federal income taxation regardless of its source.

## Table of Contents

In general, a U.S. Holder who owns ADSs should be treated as the owner of the underlying shares represented by those ADSs for U.S. federal income tax purposes. Accordingly, no gain or loss should be recognized if a U.S. Holder exchanges ADSs for the underlying shares represented by those ADSs.

The U.S. Treasury has expressed concerns that parties to whom American depository shares are released before delivery of shares to the depository, or pre-release, or intermediaries in the chain of ownership between holders and the issuer of the securities underlying the American depository shares, may be taking actions that are inconsistent with the claiming of foreign tax credits by holders of American depository shares. Such actions would also be inconsistent with the claiming of the reduced rate of tax, described below, applicable to dividends received by certain non-corporate holders. Accordingly, the creditability of foreign taxes and the availability of the reduced tax rate for dividends received by certain non-corporate holders, described below, could be affected by actions taken by such parties or intermediaries.

This discussion assumes that we were not a passive foreign investment company, or PFIC, for the taxable year ended December 31, 2011, as described below, and that we will not become a PFIC.

### Taxation of Distributions

Distributions received by a U.S. Holder on ADSs or shares, other than certain pro rata distributions of common shares to all shareholders, will constitute foreign-source dividend income to the extent paid out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes). Because we do not maintain calculations of our earnings and profits under U.S. federal income tax principles, it is expected that distributions generally will be reported to U.S. Holders as dividends. Dividends will be included in a U.S. Holder's income on the date of the U.S. Holder's or, in the case of ADSs, the Depository's receipt of the dividend. The amount of the dividend will equal the U.S. dollar value of the Hong Kong dollar distribution, calculated by reference to the exchange rate in effect on the date of receipt, regardless of whether the payment is converted into U.S. dollars on the date of receipt. If the dividend is converted into U.S. dollars on the date of receipt, a U.S. Holder should not be required to recognize foreign currency gain or loss in respect of the dividend income. A U.S. Holder may have foreign currency gain or loss if the dividend is converted into U.S. dollars after the date of receipt. Corporate U.S. Holders will not be entitled to claim the dividends-received deduction with respect to dividends paid by us.

Subject to applicable limitations and the discussion above regarding concerns expressed by the U.S. Treasury, dividends paid by "qualified foreign corporations" to certain non-corporate U.S. Holders in taxable years beginning before January 1, 2013, are taxable at a maximum rate of 15%. A foreign corporation is treated as a qualified foreign corporation with respect to dividends paid on stock that is readily tradable on an established securities market in the United States, such as the New York Stock Exchange where our ADSs are traded. Non-corporate U.S. Holders should consult their own tax advisers to determine whether these favorable rates may apply to dividends they receive from us and whether they are subject to any special rules that limit their ability to be taxed at this favorable rate.

As described in "—Taxation—The PRC," we are regarded as a CRE pursuant to the provisions of the New EIT Law and the Notice. Accordingly, dividends paid with respect to our ordinary shares or ADSs may be subject to PRC withholding taxes. For U.S. federal income tax purposes, the amount of a dividend would include any amounts withheld by us in respect of PRC taxes. Subject to applicable limitations, any PRC income taxes withheld from dividends on ADSs or shares at a rate not exceeding the rate provided by the PRC Treaty may be creditable against the U.S. Holder's U.S. federal income tax liability. PRC taxes withheld in excess of the rate applicable under the PRC Treaty will not be eligible for credit against a U.S. Holder's federal income tax liability. The rules governing foreign tax credits are complex, and U.S. Holders should consult their tax advisers regarding the creditability of foreign taxes in their particular circumstances. Instead of claiming a credit, a U.S. Holder may, at the U.S. Holder's election, deduct such

PRC taxes, if any, in computing taxable income, subject to applicable limitations. An election to deduct foreign taxes instead of claiming foreign tax credits must apply to all taxes paid or accrued in the taxable year to foreign countries and possessions of the United States.

## Table of Contents

### Sale or Other Disposition of ADSs or Shares

A U.S. Holder will generally recognize capital gain or loss on the sale or other disposition of ADSs or shares, which will be long-term capital gain or loss if the holder has held such ADSs or shares for more than one year. The amount of the U.S. Holder's gain or loss will be equal to the difference between the amount realized on the sale or other disposition (as determined in U.S. dollars) and such holder's tax basis in the ADSs or shares (as determined in U.S. dollars). Any gain or loss will generally be U.S.-source gain or loss for foreign tax credit purposes.

As described in "Taxation —The PRC," gains from dispositions of our ADSs or shares may be subject to PRC tax. A U.S. Holder's amount realized would include the gross amount of the disposition proceeds before any withholding or deduction of PRC tax. Although any such gain of a U.S. Holder would generally be characterized as U.S.-source income, a U.S. Holder that is eligible for the benefits of the PRC Treaty may be able to elect to treat the gain as foreign-source gain for foreign tax credit purposes. U.S. Holders should consult their tax advisers regarding their eligibility for benefits under the PRC Treaty and the creditability of any PRC tax paid with respect to dispositions in their particular circumstances.

### Passive Foreign Investment Company Considerations

We believe that we were not a PFIC for U.S. federal income tax purposes for our taxable year ended December 31, 2011. In general, a non-U.S. company will be considered a PFIC for U.S. federal income tax purposes for any taxable year in which (i) 75% or more of its gross income consists of passive income or (ii) 50% or more of the average quarterly value of its assets consists of assets that produce, or are held for the production of, passive income. As PFIC status depends upon the composition of our income and assets and the market value of our assets (including, among other things, any equity investments in less than 25%-owned entities) from time to time, and since there are uncertainties in the manner of application of the PFIC rules, there can be no assurance that we will not be considered a PFIC for any taxable year.

If we were to be treated as a PFIC for any taxable year during which a U.S. Holder held ADSs or shares, certain adverse U.S. federal income tax rules would apply on a disposition (including certain pledges) of ADSs or shares by the U.S. Holder. In general, under those rules, gain recognized by the U.S. Holder on a sale or other disposition of ADSs or shares would be allocated ratably over the U.S. Holder's holding period for the ADSs or shares. The amounts allocated to the taxable year of the sale or other disposition and to any year before we became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for individuals or corporations, as appropriate, for such taxable year, and an interest charge would be imposed on the resulting tax liability for each such taxable year. Further, any distribution in respect of ADSs or shares in excess of 125% of the average of the annual distributions on ADSs or shares received by the U.S. Holder during the preceding three years or the U.S. Holder's holding period, whichever is shorter, would be subject to taxation in the same manner as gain, described immediately above. Certain elections may be available (including a mark-to-market election) to U.S. Holders that may mitigate the adverse tax consequences resulting from PFIC status.

In addition, if we were to be treated as a PFIC in a taxable year in which we pay a dividend or the prior taxable year, the favorable rate discussed above with respect to dividends received by certain non-corporate U.S. Holders would not apply.

If we are a PFIC for any taxable year, a U.S. Holder may be required to file a report with the Internal Revenue Service containing such information as the Treasury Department may require.

Table of Contents

Information Reporting and Backup Withholding

Payments of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting, and may be subject to backup withholding, unless the U.S. Holder is an exempt recipient or, in the case of backup withholding, the U.S. Holder provides a correct taxpayer identification number and certifies that it is not subject to backup withholding. The amount of any backup withholding from a payment to a U.S. Holder will be allowed as a credit against the holder's U.S. federal income tax liability and may entitle such holder to a refund, provided that the required information is timely furnished to the Internal Revenue Service.

H. DOCUMENTS ON DISPLAY

We are subject to the informational requirements of the Exchange Act and accordingly file reports and other information with the Securities and Exchange Commission. You may inspect and copy our reports and other information we file with the Securities and Exchange Commission at the public reference facilities maintained by the Securities and Exchange Commission. Copies of such material may also be obtained at prescribed rates by writing to the Public Reference Section of the Securities and Exchange Commission at 100 F Street, NE, Washington, D.C. 20549. Please call 1-800-SEC-0330 for information on the location and operation of the Securities and Exchange Commission's public reference facilities. Our filings with the Securities and Exchange Commission are also available to the public over the internet at its website at <http://www.sec.gov>.

I. SUBSIDIARY INFORMATION

Not applicable.

ITEM 11. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk exposures primarily consist of fluctuations in oil and gas prices, exchange rates and interest rates.

Commodity Price Risks

We are exposed to fluctuations in prices of crude oil. International oil prices are volatile and this volatility has a significant effect on our net sales and profit. We do not hedge market risk resulting from fluctuations in oil prices. See "Item 4—Information on the Company—Business Overview—Overview" and "Item 3—Key Information—Risk Factors—Risk Relating to Our Operations—Our business, revenues and profits fluctuate with changes in oil and gas prices."

Currency Risk

Our foreign exchange exposure gives rise to market risk associated with exchange rate movements.

Substantially all of our oil and gas sales are denominated in Renminbi and U.S. dollars. During the ten years prior to 2005, the PRC government's policy of maintaining a stable exchange rate and China's ample foreign reserves had contributed to the stability of Renminbi. On July 21, 2005, China reformed its exchange rate regime by adopting a managed floating exchange rate approach based on market supply and demand and with reference to a basket of currencies. Renminbi was no longer pegged to U.S. dollars. From January 1, 2011 to March 31, 2012, Renminbi appreciated approximately 5.2% against U.S. dollar. However, the Chinese government has not yet determined if or when the exchange rate will be deregulated.

Table of Contents

Our management has assessed our exposure to foreign currency risk using a sensitivity analysis. Based on a five percent change in the value of the U.S. dollar occurring on December 31, 2011, the exposure of our results of operations, monetary assets and liabilities and investments in foreign subsidiaries would each be less than 0.72% of our profit for the year.

The appreciation of Renminbi against U.S. dollar may have the following impact on us:

- Our oil and gas sales may decrease, because the benchmark oil and gas prices are usually in U.S. dollars;
- Our cost for imported equipment and materials will decrease, because most of these costs are denominated in U.S. dollars; and
  - Our debt repayment burden will decrease, since all of our debt is denominated in U.S. dollars.

For further information on our currency risk, see “Item 3—Key Information—Risk Factors—Risks Relating to the PRC—Government control of currency conversion and future movements in exchange rates may adversely affect our operations and financial condition.”

## Interest Rate Risk

We are exposed to interest rate risk arising from our debts. An upward fluctuation in interest rates increases the cost of new debt and the cost of servicing our floating rate debt. We may use interest rate swap transactions, from time to time, to hedge our interest rate exposure when considered appropriate, based on existing and anticipated market conditions.

As of December 31, 2011, the interest rates for 49.4% of our outstanding debts were fixed. The term of the weighted average balance was approximately 6.45 years. A fixed interest rate can reduce the volatility of finance costs in uncertain markets. We do not currently engage in any interest rate hedging activities.

As of December 31, 2011, the interest rates for 85.8% of our total outstanding long-term debts were fixed. The following table sets forth additional information about the expected maturity dates of our outstanding long-term debt (including the current portion) as of December 31, 2011.

	2012	2013	2014	2015	2016	2017 and after	Total	Fair value as of December 31, 2011
(Rmb in millions, except percentages)								
Long-term loans, including current portion								
Floating rate	575.7	220.6	251.1	281.5	311.9	1,497.1	3,138.0	4,063.5
Interest rate	Libor + 0.23%~0.40%	Libor + 0.23%~0.38%	Libor + 0.23%~0.38%	Libor + 0.23%~0.38%	Libor + 0.23%~0.38%	Libor + 0.23%~0.38%		
Long-term guaranteed notes, including current portion								

Edgar Filing: CNOOC LTD - Form 20-F

Fixed rate	3,150.5	1,260.2	-	-	-	14,492.1	18,902.7	20,097.2
Average interest rate	4.75%	4.72%	4.74%	4.74%	4.74%	4.74%

## ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

## A. DEBT SECURITIES

Not applicable.

## B. WARRANTS AND RIGHTS

Not applicable.

## C. OTHER SECURITIES

Not applicable.

## D. AMERICAN DEPOSITARY SHARES

JPMorgan Chase Bank, N.A. is our Depositary. The depositary's office is located at 4 New York Plaza, New York, NY 10004. Each of our ADSs represents 100 shares of par value HK\$0.02 per share.

## ADR Fees Payable by Investors

The Depositary may charge each person to whom ADRs are issued against deposits of shares, including deposits in respect of share distributions, rights and other distributions, and each person surrendering ADRs for withdrawal of deposited securities (including, without limitation, on the termination of the deposit agreement), US\$5.00 for each 100 ADSs (or portion thereof) evidenced by the ADRs delivered or surrendered.

The charges of the Depositary payable by investors are as follows:

Category (as defined by SEC)	Depositary Actions	Associated Fee
(a) Depositing or substituting the underlying shares	Each person to whom ADRs are issued against deposits of Shares, including deposits and issuances in respect of: <ul style="list-style-type: none"> <li>· Share distributions, stock split, rights, merger</li> <li>· Exchange of securities or any other transaction or event or other distribution affecting the ADSs or the Deposited Securities</li> </ul>	US\$5.00 for each 100 ADSs (or portion thereof) evidenced by the new ADRs delivered
(b) Withdrawing an underlying security	Acceptance of ADRs surrendered for withdrawal of deposited securities	US\$5.00 for each 100 ADSs (or portion thereof) evidenced by the ADRs surrendered

## Payments Received by Foreign Private Issuer

The Depositary has agreed to reimburse certain company expenses related to our ADS program and incurred by us in connection with the program. The Depositary reimbursed us, or paid amounts on our behalf to third parties, or waived

its fees and expenses, of US\$414,200.33 for the year ended December 31, 2011.

107

Table of Contents

## Direct Payments

The table below sets forth the types of expenses that the Depositary has agreed to reimburse, and the invoices relating to the year ended December 31, 2011 that were reimbursed:

Category of Expenses	Amount Reimbursed for Fiscal Year Ended December 31, 2011 (US\$)(3)
Investor relations(1)	154,435.52
Broker reimbursements(2)	109,764.81
<b>Total</b>	<b>264,200.33</b>

(1)Includes investor relation service fees, shareholder identification fees and investor relations expenses for road show in 2011.

(2)Broker reimbursements are fees payable to Broadridge and other service providers for the distribution of hard copy material to beneficial ADR holders in the Depositary Trust Company. Corporate material includes information related to shareholders' meetings and related voting instruction cards. These fees are SEC approved.

(3) Includes the 30% withholding tax paid to the U.S. government.

## Indirect Payments

The Depositary has also agreed to waive fees for standard costs associated with the administration of the ADS program and has paid certain expenses directly to third parties on our behalf. The table below sets forth those expenses that the Depositary waived or paid directly to third parties relating to the year ended December 31, 2011:

Category of Expenses	Amount Reimbursed for Fiscal Year Ended December 31, 2011 (US\$)
Fees waived	150,000

ITEM 15. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

An evaluation was carried out under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness, as of December 31, 2011, of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act).

Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2011, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported as and when required by the SEC's rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's annual report on internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2011 using the criteria set forth in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, our management has concluded that our internal control over financial reporting as of December 31, 2011 was effective.

(c) Attestation Report of the Registered Public Accounting Firm

Our independent auditors have issued an audit report on the effectiveness of our internal control over financial reporting. This report appears on page F-5.

(d) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the year ended December 31, 2011 that have materially affected, or that were reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT

Mr. Aloysius Hau Yin Tse has been designated by our Board as an audit committee financial expert. Mr. Tse is independent as defined in the listing standards of the New York Stock Exchange.

109

---

Table of Contents

ITEM 16B. CODE OF ETHICS

Our Board adopted a code of ethics to provide guidelines to our senior management and directors in legal and ethical matters as well as the sensitivities involved in reporting illegal and unethical matters. Such code of ethics covers such areas as supervisory rules, insider dealing, market malpractices, conflict of interests, company opportunities, protection and proper use of our assets as well as reporting requirements. As part of the continued efforts to improve our corporate governance standards, our Board conducted an annual review of the code of ethics since 2009, and the current version of the code of ethics was reviewed and adopted in August 2011.

We have provided all our directors and senior officers with a copy of the New Code of Ethics and require them to comply with it in order to ensure our operations are proper and lawful. We will take disciplinary actions against any act which is in breach of the New Code of Ethics. Any change or waiver, explicit or implicit, with respect to our New Code of Ethics, must be disclosed to our shareholders either in our annual report or on our internet website, [www.cnooc ltd.com](http://www.cnooc ltd.com).

We have posted our code of ethics on our website. To request a copy of our code of ethics free of charge, please contact Mr. Cao Yan, our investor relations manager, by email to [caoyan@cnooc.com.cn](mailto:caoyan@cnooc.com.cn).

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Audit Fees

The aggregate fees billed for professional services rendered by our principal accountant for the audit of our annual financial statements or services that are normally provided by the accountants in connection with statutory and regulatory filings or engagements were Rmb 17.7 million for 2010 and Rmb 19.3 million (US\$3.1 million) for 2011.

Audit-Related Fees

The aggregate fees billed for assurance and related services by our principal accountant that are reasonably related to the performance of the audit or review of financial statements and are not reported under "Audit Fees" were Rmb 1.6 million for 2010 and Rmb 0.7 million (US\$0.1 million) for 2011.

Tax Fees

The aggregate fees billed for professional service rendered by the principal accountant for tax compliance, tax advice and tax planning were approximately Rmb 0.4 million for 2010 and Rmb 0.7 million (US\$0.1 million) for 2011.

All Other Fees

The aggregate fees billed for professional services rendered by our principal accountant for risk management advisory services and information systems reviews were Rmb 0.42 million for 2010 and Rmb 1.3 million (US\$0.2 million) for 2011.

The aggregate fees billed for products and services provided by our principal accountant, other than the services reported above, were nil for fiscal years 2010 and 2011.

Audit Committee's pre-approval policies and procedures

Our audit committee under our Board is responsible for the appointment, compensation and oversight of the work of our principal accountant. Our audit committee adopted a policy calling for the audit committee's pre-approval for the engagement of our principal accountant for audit and permitted non-audit services. Our Board has also ratified the policy and procedures. Under this audit committee policy, proposed services may be pre-approved by our audit committee either on an annual basis or on a case-by-case basis. Appendices to the audit committee policy set forth (1) the audit, audit-related, tax and other services that may be subject to the general annual pre-approval of the audit committee; and (2) a list of prohibited non-audit services. Our audit committee will periodically review and revise these appendices based on its subsequent determinations. The audit committee policy also provides for procedures to establish annual fee levels or budgets for pre-approved services and ratios between different categories of pre-approved services. In addition, the audit committee policy contains provisions that deal with compliance, monitoring, reporting and other related matters.

Table of Contents

During 2011, all fees for audit-related services, tax services and all other services paid to our principal accountant were approved by our audit committee.

## ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

## ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

The following table sets forth purchases of our Shares by us and our affiliated purchasers during the fiscal year ended December 31, 2011:

Period	Total Number of Shares Purchased	Average Price Paid per Share (in HK\$)	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that May Yet Be Purchased Under the Program
November 1 to 30, 2011	1,119,000	13.98	N/A	N/A
December 1 to 31, 2011	21,775,000	13.75	N/A	N/A
<b>Total</b>	<b>22,894,000</b>	<b>13.76</b>	<b>N/A</b>	<b>N/A</b>

(1) On the annual general meeting of the Company held on May 27, 2011, we were authorized to purchase of up to 10% of the issued share capital on the Hong Kong Stock Exchange in conformity with relevant regulatory conditions.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON FINANCIAL STATEMENTS

To the Board of Directors and Shareholders of CNOOC Limited  
(Incorporated in Hong Kong with limited liability)

We have audited the accompanying consolidated statements of financial position of CNOOC Limited (the “Company”) and its subsidiaries (the “Group”) as at December 31, 2011 and 2010, and the related consolidated statements of comprehensive income, statements of changes in equity and statements of cash flows for each of the years in the three-year period ended December 31, 2011, and a summary of significant accounting policies and other explanatory information.

Management’s responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board, and Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group at December 31, 2011 and 2010 and the consolidated results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board and Hong Kong Financial Reporting Standards as issued by the Hong Kong Institute of Certified Public Accountants.

Emphasis of matter

We draw attention to Note 2.2 to the consolidated financial statements which describes the early adoption of the accounting method for consolidation and joint arrangements by the Group during 2011. Our opinion is not qualified in respect of this matter.

Other matter

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Group's internal control over financial reporting as of December 31, 2011, based on criteria established on Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 28, 2012 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The Board of Directors and Shareholders of CNOOC Limited  
(Incorporated in Hong Kong with limited liability)

We have audited CNOOC Limited's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). CNOOC Limited's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying "Management's annual report on internal control over financial reporting". Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, CNOOC Limited maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial position of CNOOC Limited as of December 31, 2011 and 2010, and the related consolidated statements of comprehensive income, statements of changes in equity and statements of cash flows for each of the three years in the period ended December 31, 2011 of CNOOC Limited and our report dated March 28, 2012 expressed an unqualified opinion thereon.

CNOOC LIMITED  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (All amounts expressed in millions of Renminbi unless otherwise stated)

## 1. CORPORATE INFORMATION

CNOOC Limited (the “Company”) was incorporated in the Hong Kong Special Administrative Region (“Hong Kong”) of the People’s Republic of China (the “PRC”) on August 20, 1999 to hold the interests in certain entities thereby creating a group comprising the Company and its subsidiaries (hereinafter collectively referred to as the “Group”). During the year, the Group was principally engaged in the exploration, development, production and sales of crude oil, natural gas and other petroleum products.

The registered office address of the Company is 65/F, Bank of China Tower, 1 Garden Road, Hong Kong.

In the opinion of the directors of the Company (the “Directors”), the parent and the ultimate holding company of the Company is China National Offshore Oil Corporation (“CNOOC”), a company established in the PRC.

Particulars of the principal subsidiaries are as follows:

Name of entity	Place and date of establishment	Nominal value of issued and paid-up/ registered ordinary share capital	Percentage of equity attributable to the Group	Principal activities
Directly held subsidiaries:				
CNOOC China Limited	Tianjin, PRC September 15, 1999	RMB20 billion	100%	Offshore petroleum exploration, development, production and sales in the PRC
CNOOC International Limited**	British Virgin Islands August 23, 1999	US\$20,000,000,002	100%	Investment holding
China Offshore Oil (Singapore) International Pte Ltd	Singapore May 14, 1993	SG\$3 million	100%	Sale and marketing of petroleum products outside the PRC
CNOOC Finance (2002) Limited	British Virgin Islands January 24, 2002	US\$1,000	100%	Bond issuance
CNOOC Finance (2003) Limited	British Virgin Islands April 2, 2003	US\$1,000	100%	Bond issuance
CNOOC Finance (2011) Limited	British Virgin Islands December 31, 2010	US\$1,000	100%	Bond issuance

Edgar Filing: CNOOC LTD - Form 20-F

OOGC America, Inc.	State of Delaware, United States of America August 28, 1997	US\$1,000	100%	Investment holding
Indirectly held subsidiaries*:				
CNOOC Deepwater Development Limited	Zhuhai, PRC March 1, 2010	RMB 1 billion	100%	Deepwater and low-grade oil and gas fields exploration, development, and oil and gas production sales in the PRC
CNOOC Southeast Asia Limited	Bermuda May 16, 1997	US\$12,000	100%	Investment holding
CNOOC ONWJ Ltd.***	Labuan, F.T., Malaysia March 27, 2002	US\$1	100%	Petroleum exploration, development and production in Indonesia
CNOOC SES Ltd.	Labuan, F.T., Malaysia March 27, 2002	US\$1	100%	Petroleum exploration, development and production in Indonesia

## 1. CORPORATE INFORMATION (CONTINUED)

Name of entity	Place and date of establishment	Nominal value of issued and paid-up/ registered ordinary share capital	Percentage of equity attributable to the Group	Principal activities
Indirectly held subsidiaries*:				
CNOOC NWS Private Limited	Singapore October 8, 2002	SG\$2	100%	Offshore petroleum exploration, development and production in Australia
CNOOC Muturi Limited	Isle of Man February 8, 1996	US\$7,780,770	100%	Petroleum exploration, development and production in Indonesia
CNOOC Exploration & Production Nigeria Limited	Nigeria January 6, 2006	Naira10 million	100%	Petroleum exploration, development and production in Africa
CNOOC Iraq Limited	British Virgin Islands October 15, 2010	US\$1	100%	Providing services of petroleum exploration and development in oilfield of the Republic of Iraq
CNOOC Canada Inc. (note 4 (iv))	Canada January 15, 1999	281,749,526 common shares without a par value	100%	Oil sands exploration, development and production in Canada

\*All subsidiaries are indirectly held through CNOOC International Limited, except CNOOC Deepwater Development Limited which is indirectly held through CNOOC China Limited.

\*\*CNOOC International Limited is a 100% owned subsidiary of the Company. The Company applied for the subscription of 10,000 redeemable shares of a par value each of US\$1.00 in CNOOC International Limited at a consideration of US\$20,000,000,000, and the first instalment in the amount of US\$8,361,283,568.40, comprising US\$10,000 as to par and US\$8,361,273,568.40 as to share premium was paid on June 15, 2011. The Company became the registered holder of 10,000 Redeemable Shares in CNOOC International Limited on July 8, 2011.

\*\*\*CNOOC ONWJ Ltd. was divested on December 22, 2011, as CNOOC Southeast Asia Limited sold it to EMP International (BVI) Limited.

The above table lists the subsidiaries of the Company which, in the opinion of the Directors, principally affected the results for the year or formed a substantial portion of the net assets of the Group. To give details of other subsidiaries would, in the opinion of the Directors, result in particulars of excessive length.

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

2.1 STATEMENT OF COMPLIANCE

These financial statements have been prepared in accordance with International Financial Reporting Standards “IFRSs” (which also include International Accounting Standards (“IASs”) and Interpretations) issued by the International Accounting Standards Board (the “IASB”), Hong Kong Financial Reporting Standards “HKFRSs” (which also include Hong Kong Accounting Standards (“HKASs”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants (the “HKICPA”), accounting principles generally accepted in Hong Kong and the Hong Kong Companies Ordinance. A summary of the significant accounting policies adopted by the Group is set out below.

2.2 CHANGES IN ACCOUNTING POLICY AND DISCLOSURES

The IASB has issued a number of new and revised IFRSs and IFRIC Interpretations that are first effective for the current accounting year commencing January 1, 2011 or later but available for early adoption. The equivalent new and revised HKFRSs and HKFRS Interpretations consequently issued by the HKICPA have the same effective dates as those issued by the IASB and are in all material aspects identical to the pronouncements issued by the IASB. There have been no other material changes to HKFRSs.

- (a) Standards, revisions and amendments to IFRSs and HKFRSs which are applicable to the Group, and have been adopted for the first time for the current year’s financial statements:

Mandatorily adopted as of January 1, 2011:

IAS 24 (Revised)/HKAS 24 (Revised) – Related Party Disclosures

IAS 24 (Revised)/HKAS 24 (Revised) clarifies and simplifies the definition of related parties. The new definitions emphasize a symmetrical view of related party relationships and clarify the circumstances in which persons and key management personnel affect related party relationships of an entity. The revised standard also introduces an exemption from the general related party disclosure requirements for transactions with a government and entities that are controlled, jointly controlled or significantly influenced by the same government as the reporting entity. The accounting policy for related parties has been revised to reflect the changes in the definitions of related parties under the revised standard. IAS24 (Revised)/HKAS 24 (Revised) are effective for annual periods beginning on or after January 1, 2011. The adoption of the revised standard did not have any impact on the financial position or performance of the Group. Details of the related party transactions, including the related comparative information, are included in note 29 to the consolidated financial statements.

Other than the impact of IAS 24 (Revised)/HKAS 24 (Revised) as discussed above, the mandatory adoption of effective IFRS and HKFRS has had no significant financial effect on the consolidated financial statements.

Early adopted before the mandatory effective dates:

IFRS 10/HKFRS 10 – Consolidated Financial Statements

IFRS 10/HKFRS 10 replaces the portion of IAS 27/HKAS 27 that addresses the accounting for consolidated financial statements. It establishes a single control model that applies to all entities. It requires management to exercise significant judgment to determine which entities are controlled, and therefore are required to be consolidated by a parent.

The standard introduces a new definition of control under which control of investee requires an investor to possess all the following three elements: 1) the power over the investee; 2) the exposure or rights to variable returns from its involvement with the investee; and 3) the ability to use its power over the investee to affect the amount of the investor's returns. The adoption of IFRS 10/HKFRS 10 does not have significant impact on the Group's consolidated financial statements.

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

2.2 CHANGES IN ACCOUNTING POLICY AND DISCLOSURES (continued)

(a)(continued)

IFRS 11/HKFRS 11 – Joint Arrangements

IFRS 11/HKFRS 11 replaces IAS 31/HKAS 31 Interests in Joint Ventures and Standing Interpretation Committee-13 Jointly-controlled Entities — Non-monetary Contributions by Venturers. IFRS 11/HKFRS 11 addresses only two forms of joint arrangements (joint operations and joint ventures) where there is joint control. In determining the type of arrangements, IFRS 11/HKFRS 11 requires parties to the arrangement to assess: 1) the legal form of the separate vehicle; 2) the terms of the contractual arrangement; and 3) other facts and circumstances that give them right to the assets and obligations for the liabilities or right to the net assets of the vehicle. A joint arrangement that meets the definition of a joint venture must be accounted for using the equity method. For a joint operation, an entity recognizes its assets, liabilities, revenues and expenses relating to its relative shares thereof.

The application of this new standard impacts the financial position and presentation of statement of income of the Group. This is due to the cessation of proportionate consolidating a joint venture Bridas Corporation and the adoption of equity accounting for this investment.

Bridas Corporation is a separate legal entity that controls its own assets, earns its own income and incurs its own expenses and liabilities. The Group's rights as a shareholder of Bridas Corporation are limited to dividends or distributions of the net assets of Bridas Corporation, rather than having direct rights to any operating assets, production output and obligations for any operating liabilities. Accordingly, the Group has evaluated its interest in Bridas Corporation as an investment in joint venture under IFRS 11/HKFRS 11.

Upon the adoption of IFRS 11/HKFRS 11, the Group changed the accounting for its investment in Bridas Corporation from proportionate consolidation to the equity method. The comparative period has been retrospectively adjusted with the investments in Bridas Corporation being equity accounted since the date of acquisition on May 4, 2010, hence the earlier adoption has no impact on the consolidated statement of financial position as at January 1, 2010. The effect on the consolidated statement of financial position as at December 31, 2010 and the consolidated statement of comprehensive income for the year ended December 31, 2011 and 2010 is summarized below.

IFRS 12/HKFRS 12 – Disclosure of Interests in Other Entities

IFRS 12/HKFRS 12 establishes the disclosure objectives for an entity to disclose information concerning its interest in a subsidiary, a joint arrangement, and associate or an unconsolidated structured entity. It also requires an entity to disclose the significant judgments and assumptions it has made in determining the nature of its interest in another entity or arrangement, also in determining the type of joint arrangement in which it has an interest. Additional disclosures are made in the Group's consolidated financial statements.

IAS 27 (Revised)/HKAS 27 (Revised) – Separate Financial Statements

Revisions are made resulting from the issuance of IFRS 10/HKFRS 10 and Consolidated Financial Statements are now addressed by IFRS 10/HKFRS 10. Therefore, IAS 27/HKAS 27 are revised to only address separate financial

statements, including how to prepare separate financial statements of an investor and what disclosures should be made in the separate financial statements. The adoption of IAS27 (Revised)/HKAS 27 (Revised) does not have significant impact on the Group's consolidated financial statements.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (All amounts expressed in millions of Renminbi unless otherwise stated)

## 2.2 CHANGES IN ACCOUNTING POLICY AND DISCLOSURES (continued)

(a)(continued)

## IAS 28 (Revised)/HKAS 28 (Revised) – Investments in Associates and Joint Ventures

Revisions are made resulting from the issuance of IFRS 11/HKFRS 11. An entity applies IFRS 11/HKFRS 11 to determine the type of a joint arrangement in which it is involved. Once it has determined that it has an interest in a joint venture, the entity recognizes an investment and accounts for it using the equity method.

The five new or revised standards above are required to be adopted for annual periods beginning on or after January 1, 2013 with early application permitted so long as all of the five new or revised standards are applied early. As discussed above, the Group has adopted these five new or revised standards on January 1, 2011.

The following presents the effect of adopting IFRS 11/HKFRS 11 on the consolidated statement of financial position comparing the retrospectively adjusted 2010 balances to the balances previously reported, and the 2011 recorded balances to what would have been reported had the Group continued to proportionately consolidate Bridas Corporation:

Increase/(decrease)	2010	2011
<b>Assets:</b>		
Property, plant and equipment	(25,653 )	(24,440 )
Intangible assets and goodwill	(1,874 )	(1,783 )
Investment in a joint venture	20,823	20,175
Other non-current assets	(1,523 )	(1,487 )
Trade receivables	(555 )	(676 )
Cash and cash equivalents	(12,284 )	(1,205 )
Other current assets	11,570	(73 )
	(9,496 )	(9,489 )
<b>Liabilities:</b>		
Loans and borrowings	(2,294 )	(2,206 )
Other non-current liabilities	(371 )	(477 )
Deferred tax liabilities	(6,281 )	(5,679 )
Trade payables	(494 )	(674 )
Other current liabilities	(56 )	(453 )
	(9,496 )	(9,489 )

The following presents the effect of adopting IFRS 11/HKFRS 11 on the consolidated statement of comprehensive income comparing the retrospectively adjusted 2010 amounts to the amounts previously reported, and the 2011 recorded amounts to what would have been reported had the Group continued to proportionately consolidate Bridas Corporation:

2010                      2011

(Decrease) in revenue	(3,017 )	(4,941 )
Decrease in operating expenses	557	1,031
Decrease in taxes other than income tax	1,095	1,330
Decrease in depreciation, depletion and amortization	931	1,470
Decrease in other expenses	188	579
Decrease in income tax expense	47	284
Increase in share of profits of a joint venture	199	247
Total increase in net profit	-	-

The adoption of IFRS 11/HKFRS 11 has no material impact on basic and diluted earnings per share for the year ended December 31, 2011 and 2010.

2.2 CHANGES IN ACCOUNTING POLICY AND DISCLOSURES (continued)

(b)

(continued)

Further information about those changes that are expected to significantly affect the Group is as follows:

IFRS 9/HKFRS 9 issued in November 2009 is the first part of phase 1 of a comprehensive project to entirely replace IAS 39/HKAS 39 Financial Instruments: Recognition and Measurement. This phase focuses on the classification and measurement of financial assets. Instead of classifying financial assets into four categories, an entity shall classify financial assets as subsequently measured at either amortised cost or fair value, on the basis of both the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. This aims to improve and simplify the approach for the classification and measurement of financial assets compared with the requirements of IFRS 39/HKAS 39.

In November 2010, the IASB/HKICPA issued additions to IFRS 9/HKFRS 9 to address financial liabilities (the "Additions") and incorporated in IFRS 9/HKFRS 9 the current derecognition principles of financial instruments of IAS 39/HKAS 39. Most of the Additions were carried forward unchanged from IAS 39/HKAS 39, while changes were made to the measurement of financial liabilities designated at fair value through profit or loss using the fair value option ("FVO"). For these FVO liabilities, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in other comprehensive income ("OCI"). The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change in respect of the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss. However, loan commitments and financial guarantee contracts which have been designated under the FVO are scoped out of the Additions.

IAS 39/HKAS 39 is aimed to be replaced by IFRS 9/HKFRS 9 in its entirety. Before this entire replacement, the guidance in IAS 39/HKAS 39 on hedge accounting and impairment of financial assets continues to apply. The Group expects to adopt IFRS 9/HKFRS 9 from January 1, 2015.

Improvements to IFRSs/HKFRSs

Apart from the above, the IASB/HKICPA has also issued improvements to IFRSs/HKFRSs which set out amendments to a number of IFRSs/HKFRSs primarily with a view to remove inconsistencies and clarify wording. The adoption of those amendments upon their effective dates did not have any material impact on the accounting policies, financial position or performance of the Group. While the adoption of some of the amendments when they will become effective after January 1, 2012 may result in changes in accounting policy, none of them are expected to have a material financial impact on the Group. Besides, the Group has also considered all other IFRICs/HKFRICs issued and they are unlikely to have any financial impact on the Group.

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

These financial statements have been prepared under the historical cost convention, except for available-for-sale financial assets and derivative financial instruments, which have been measured at fair value. These financial statements are presented in Renminbi (“RMB”) and all values are rounded to the nearest million except when otherwise indicated.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries for the year ended December 31, 2011.

The results of subsidiaries are consolidated from the date of acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies.

The results of subsidiaries are included in the Company’s statement of comprehensive income to the extent of dividends received and receivable. The Company’s interests in subsidiaries are stated at cost less any impairment losses.

All intra-group balances, income and expenses and unrealised gains and losses and dividends resulting from intra-group transactions are eliminated in full.

Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether it measures the non-controlling interests in the acquiree either at fair value or at the proportionate share of the acquiree’s identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition costs incurred are expensed and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer’s previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration which is deemed to be an asset or liability will be recognised in accordance with IAS 39/HKAS 39 either in profit or loss or as a change to other comprehensive income. If the contingent consideration is classified as equity, it will not be remeasured. Subsequent settlement is accounted for within equity. In instances where the contingent consideration does not fall within the scope of IAS 39/HKAS 39, it is measured in accordance with the appropriate IFRS/HKFRS.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Group's previously held equity interests in the acquiree over the identifiable net assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets of the subsidiary acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Business combinations and goodwill (continued)

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its impairment test of goodwill at each reporting date. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the cash-generating unit (group of cash-generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit (group of cash-generating units) is less than the carrying amount, an impairment loss is recognized. An impairment loss recognized for goodwill is not reversed in a subsequent period.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Subsidiaries

Subsidiaries are all those entities over which the Group has power over the investee such that the Group is able to direct the relevant activities, has exposure or rights to variable returns from its involvement with the investee and has the ability to use its power over the investee to affect the amount of the investor's returns.

Associates

Based on the Group's ownership percentage (considering its direct ownership as well as potentially exercisable or convertible shares) and other contractual rights, the Group has significant influence over its associates, rather than the power to control.

The Group's investments in associates are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist. The Group's share of the post-acquisition results and reserves of associates is included in the consolidated statement of comprehensive income and consolidated reserves, respectively. Unrealized gains and losses resulting from transactions between the Group and its associates are eliminated to the extent of the Group's investments in the associates, except where unrealized losses provide evidence of an impairment of the asset transferred. Goodwill arising from the acquisition of associates is included as part of the Group's investments in associates and is not individually tested for impairment.

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Associates (continued)

The results of associates are included in the Company's comprehensive income statement to the extent of dividends received and receivable. The Company's investments in associates are treated as non-current assets and are stated at cost less any impairment losses.

When an investment in an associate is classified as held for sale, it is accounted for in accordance with IFRS 5/ HKFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

Joint arrangements

Certain of the Group's activities are conducted through joint arrangements. Joint arrangements are classified as either a joint operation or joint venture, based on the rights and obligations arising from the contractual obligations between the parties to the arrangement.

Joint operations

Some arrangements have been assessed by the Group as joint operations as both parties to the contract are responsible for the assets and obligations in proportion to their respective interest, whether or not the arrangement is structured through a separate vehicle. This evaluation applies to both the Group's interests in production sharing arrangements and certain jointly-controlled entities.

The Group entered into numerous production sharing arrangements or similar agreements in China and overseas countries. The Group's participating interest may vary in each arrangement. The Group, as one of the title owners under certain exploration and/or production licenses or permits, is required to bear exploration (with some exceptions in China), development and operating costs together with other co-owners based on each owner's participating interest. Once production occurs, a certain percentage of the annual production or revenue will first be distributed to the local government, which, in most of cases, with the nature of royalty and other taxes or expenses, and the rest of the annual production or revenue will be allocated among the co-owners.

Joint venture

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

The Group's investments in joint ventures are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist. The Group's share of the post acquisition results and reserves of joint ventures is included in the consolidated statement of comprehensive income and consolidated reserves, respectively. Where the profit sharing ratios is different to the Group's equity interest, the share of post-acquisition results of the joint ventures is determined based on the agreed profit sharing ratio. Unrealized gains and losses resulting from transactions between the Group and its joint ventures are eliminated to the extent of the Groups investments in the joint ventures, except where unrealized losses provide evidence of an impairment of the asset transferred. Goodwill arising from the acquisition of joint ventures is included as part of the Group's investments in joint ventures and is not individually tested for impairment.

The results of joint ventures are included in the Company's comprehensive income statement to the extent of dividend received and receivable. The Company's investments in joint ventures are treated as non-current assets and are stated at

cost less any impairment losses.

When an investment in a joint venture is classified as held for sale, it is accounted for in accordance with IFRS 5/HKFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Related parties

A party is considered to be related to the Group if:

(a) the party is a person or a close member of that person's family and that person

(i) has control or joint control over the Group;

(ii) has significant influence over the Group; or

(iii) is a member of the key management personnel of the Group or of a parent of the Group;

(b) the party is an entity where any of the following conditions applies:

(i) the entity and the Group are members of the same group;

(ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);

(iii) the entity and the Group are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;

(vi) the entity is controlled or jointly controlled by a person identified in (a); and

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Impairment of non-financial assets other than goodwill

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, deferred tax assets, financial assets and goodwill), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs to sell, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognized only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each reporting period as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognized impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortization) had no impairment loss been recognized for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Property, plant and equipment

Property, plant and equipment comprise oil and gas properties, and vehicles and office equipment and others.

(a) Oil and gas properties

For oil and gas properties, the successful efforts method of accounting is adopted. The Group capitalizes the initial acquisition costs of oil and gas properties. Impairment of initial acquisition costs is recognized based on exploratory experience and management judgment. Upon discovery of commercial reserves, acquisition costs are transferred to proved properties. The costs of drilling and equipping successful exploratory wells, all development expenditures on construction, installation or completion of infrastructure facilities such as platforms, pipelines, processing plants and the drilling of development wells and the building of enhanced recovery facilities, including those renewals and betterments that extend the economic lives of the assets, and the related borrowing costs are capitalized. The costs of unsuccessful exploratory wells and all other exploration costs are expensed as incurred.

The Group carries exploratory well costs as an asset when the well has found a sufficient quantity of reserves to justify its completion as a producing well and where the Group is making sufficient progress assessing the reserves and the economic and operating viability of the project. Exploratory well costs not meeting these criteria are charged to expenses. Exploratory wells that discover potentially economic reserves in areas where major capital expenditure will be required before production would begin and when the major capital expenditure depends upon the successful completion of further exploratory work remain capitalized and are reviewed periodically for impairment.

Productive oil and gas properties are depreciated on a unit-of-production basis over the proved developed reserves. Common facilities that are built specifically to service production directly attributed to designated oil and gas properties are depreciated based on the proved developed reserves of the respective oil and gas properties on a pro-rata basis. Common facilities that are not built specifically to service identified oil and gas properties are depreciated using the straight-line method over their estimated useful lives. Costs associated with significant development projects are not depreciated until commercial production commences and the reserves related to those costs are excluded from the calculation of depreciation.

Capitalized acquisition costs of proved properties are depreciated on a unit-of-production method over the total proved reserves of the relevant oil and gas properties.

(b) Vehicles, office equipment and others

Vehicles, office equipment and others are stated at cost less accumulated depreciation and impairment losses. The straight-line method is adopted to depreciate the cost less any estimated residual value of these assets over their expected useful lives. The Group estimates the useful lives of vehicles and office equipment to be five years; and the useful lives of other assets is in line with their beneficial periods.

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a recoverable basis among the parts and each part is depreciated separately.

Residual values, useful lives and the depreciation method are reviewed and, adjusted if appropriate, at each reporting date.

Any gains and losses on disposals of property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) are recognised in profit or loss.

F-22

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Intangible assets (other than goodwill)

Intangible assets with finite lives are carried at cost, less accumulated amortisation and accumulated impairment losses. The cost of intangible assets acquired in a business combination is the fair value as at the date of acquisition. Intangible assets with finite lives except for gas processing rights, are amortised on the straight-line basis over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

The intangible asset regarding the gas processing rights has been amortised upon the commercial production of the liquefied natural gas on a unit-of-production basis over the total proved reserves of the relevant asset. The intangible assets regarding software have been amortised on the straight-line basis over three to five years.

Major maintenance and repairs

Expenditure on major maintenance refits or repairs comprises the cost of replacement assets or parts of assets and overhaul costs. Where an asset or part of an asset that was separately depreciated and is now written off is replaced and it is probable that future economic benefits associated with the item will flow to the Group, the replacement expenditure is capitalized. Where part of the asset was not separately considered as a component, the replacement value is used to estimate the carrying amount of the replaced assets which is immediately written off. All other maintenance costs are expensed as incurred.

Research and development costs

All research costs are expensed as incurred.

Expenditure (other than that relating to oil and gas properties discussed above) incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred. No development costs were capitalized during the year.

Investments and other financial assets

Initial recognition and measurement

Financial assets within the scope of IAS 39/HKAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, and available-for-sale financial assets, as appropriate. The Group determines the classification of its financial assets at initial recognition. When financial assets are recognized initially, they are measured at fair value plus transaction costs, except in the case of financial assets recorded at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way purchases or sales) are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

The Group's financial assets include cash and bank balances, trade and other receivables, quoted and unquoted financial instruments, and derivative financial instruments.

F-23

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Subsequent measurement

The subsequent measurement of financial assets depends on their classifications as follows:

(a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets designated upon initial recognition at fair value through profit or loss. Financial assets at fair value through profit and loss are carried in the statement of financial position at fair value with net changes in fair value recognised in other income and gains or finance costs in profit or loss in the period. These net fair value changes do not include any dividends or interest earned on these financial assets, which are recognized in accordance with the policies set out for “Revenue recognition” below.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such assets are subsequently carried at amortized cost using the effective interest method less any allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and includes fees or costs that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process.

(c) Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity are classified as held to maturity when the Group has the positive intention and ability to hold them to maturity. Held-to-maturity investments are subsequently measured at amortized cost using the effective interest rate method less any allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the investments are derecognized or impaired, as well as through the amortization process.

(d) Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets in listed and unlisted equity investments and debt securities. Equity investments classified as available for sale are those which are neither classified as held for trading nor designated at fair value through profit or loss. Debt securities in this category are those which are intended to be held for an indefinite period of time and which may be sold in response to needs for liquidity or in response to changes in market conditions.

After initial recognition, available-for-sale financial assets are measured at fair value, with unrealized gains or losses recognized as other comprehensive income in the available-for-sale investment revaluation reserve until the investment is derecognized, at which time the cumulative gain or loss is recognized in profit or loss, or until the investment is determined to be impaired, when the cumulative gain or loss is reclassified from the available-for-sale investment revaluation reserve to profit or loss. Interest and dividends earned whilst holding the available-for-sale financial investments are reported as interest income and dividend income, respectively and are recognized in profit or loss in accordance with the policies set out for “Revenue recognition” below.

When the fair value of unlisted equity investments cannot be reliably measured because (a) the variability in the range of reasonable fair value estimates is significant for that investment or (b) the probabilities of the various estimates within the range cannot be reasonably assessed and used in estimating fair value, such investments are stated at cost

less any impairment losses.

F-24

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations, without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; a discounted cash flow analysis or other valuation models.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in note 33.

Impairment of financial assets

The Group assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired.

(a) Assets carried at amortized cost

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortized cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (the effective interest rate computed at initial recognition). The carrying amount of the asset is reduced either directly or through the use of an allowance account. The amount of the impairment loss is recognized in profit or loss.

If, in a subsequent year, the amount of the estimated impairment loss increases or decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. Any subsequent reversal of an impairment loss is recognized in profit or loss, to the extent that the carrying value of the asset does not exceed amortized cost at the reversal date.

In relation to trade and other receivables, a provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor and significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor) that the Group will not be able to collect all of the amounts due under the original terms of an invoice.

(b) Assets carried at cost

If there is objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Impairment losses on these assets are not reversed.

(c) Available-for-sale financial assets

If an available-for-sale asset is impaired, an amount comprising the difference between its cost (net of any principal payment and amortization) and its current fair value, less any impairment loss previously recognized in the profit or

loss, is removed from other comprehensive income and recognized in profit or loss.

Equity investments are impaired if there is a significant or prolonged decline in fair value of the investment below its cost or where other objective evidence of impairment exists. Impairment of debt instruments is assessed based on the same criteria as assets carried at amortised cost. Impairment losses on equity instruments are not reversed through profit or loss; increases in their fair value after impairments are recognised directly in equity. Impairment losses on debt instruments are reversed through the profit or loss, if the increase in fair value of the instruments can be objectively related to an event occurring after the impairment loss was recognized in profit or loss.

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized where:

- i) the rights to receive cash flows from the asset have expired;
- ii) the Group retains the rights to receive cash flows from the asset, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; or
- iii) the Group has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group’s continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities at amortized cost (including interest-bearing loans and borrowings)

Financial liabilities including trade and other payables and interest-bearing loans and borrowings are initially stated at fair value less directly attributable transaction costs and are subsequently measured at amortized cost, using the effective interest method. The related interest expense is recognized within “Finance costs” in profit or loss.

Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the amortization process.

Financial guarantee contracts

A financial guarantee contract is recognized initially at its fair value including transaction costs that are directly attributable to the issue of the guarantee. Subsequent to initial recognition, the liability is measured at the higher of the best estimate of the expenditure required to settle the present obligation at the reporting date and the amount recognized less cumulative amortization.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognized in profit or loss.

Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position, if and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an

intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

**Inventories and supplies**

Inventories primarily consist of oil and supplies, including items for repairs and maintenance of oil and gas properties. Inventories are stated at the lower of cost and net unrealizable value. Costs of inventories and supplies represent purchase or production cost of goods and are determined on a weighted average basis.

F-26

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Cash and cash equivalents

Cash and cash equivalents comprise cash at banks and on hand and short term deposits with an original maturity of three months or less.

Provisions

(a) General

A provision is recognized when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation. When the effect of discounting is material, the amount recognized for a provision is the present value at the reporting date of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in "Finance costs" in the statement of comprehensive income.

(b) Dismantlement liability

Dismantlement liability is recognized when the Group has a present legal or constructive obligation as a result of the past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. A corresponding amount equivalent to the provision is also recognized as part of the cost of the related property, plant and equipment. The amount recognized is the estimated cost of dismantlement, discounted to its present value using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Changes in the estimated timing of dismantlement or dismantlement cost estimates are dealt with prospectively by recording an adjustment to the provision, and a corresponding adjustment to property, plant and equipment. The unwinding of the discount on the dismantlement provision is included as a finance cost.

The Group recognizes a deferred tax asset and deferred tax liability regarding the temporary difference on the dismantlement liability and the dismantlement asset respectively.

Income tax

Income tax comprises current and deferred tax. Income tax is recognised in the consolidated statement of comprehensive income, either as an expense as it relates to operating activities or as a component of the applicable categories of other comprehensive income or loss.

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantially enacted, by the reporting date, in the countries where the Group operates and generates taxable income.

Deferred tax is provided, using the liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

1 when the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or

loss; and

in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

F-27

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Income tax (continued)

As at December 31, 2011, deferred tax liabilities related to undistributed earnings of certain of the Company's subsidiaries have not been recognized, since the timing of the reversal of the taxable temporary difference can be controlled by the Company and it is probable that the temporary difference would not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, the carryforward of unused tax credits and unused tax losses can be utilized, except:

l when the deferred tax assets relating to the deductible temporary differences arise from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and

l in respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are only recognized to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Revenue recognition

Revenue is recognized when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably, on the following bases:

(a) Oil and gas sales

Oil and gas sales represent the invoiced value of sales of oil and gas attributable to the interests of the Group, net of royalties and the government share oil that is lifted and sold on behalf of the government. Revenue from the sale of oil is recognized when the significant risks and rewards of ownership have been transferred, which is when title passes to the customer. This generally occurs when product is physically transferred into a vessel, pipe or other delivery mechanism. Revenue from the production of oil in which the Group has an interest with other producers is recognized based on the Group's working interest and the terms of the relevant production sharing contracts. Differences between production sold and the Group's share of production are not significant.

Oil and gas lifted and sold by the Group above or below the Group's participating interests in the production sharing contracts results in overlifts and underlifts. The Group records these transactions in accordance with the entitlement method under which overlifts are recorded as liabilities and underlifts are recorded as assets at year-end oil prices. Settlement will be in kind or in cash when the liftings are equalized or in cash when production ceases.

F-28

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Revenue recognition (continued)

(a) Oil and gas sales (continued)

The Group has entered into gas sale contracts with customers, which contain take-or-pay clauses. Under these contracts, the Group makes a long term supply commitment in return for a commitment from the buyer to pay for minimum quantities, whether or not it takes delivery. These commitments contain protective (force majeure) and adjustment provisions. If a buyer has a right to get a 'make up' delivery at a later date, revenue recognition is deferred. If no such option exists according to the contract terms, revenue is recognized when the take-or-pay penalty is triggered.

(b) Marketing revenues

Marketing revenues principally represent the sale of oil and gas purchased from the foreign partners under the production sharing contracts and revenues from the trading of oil and gas through the Company's subsidiaries. The title, together with the risks and rewards of the ownership of such oil purchased from the foreign partners, is transferred to the Group from the foreign partners and other unrelated oil and gas companies before the Group sells such oil to its customers. The cost of the oil and gas sold is included in "Crude oil and product purchases".

(c) Other income

Other income mainly represents project management fees charged to foreign partners, handling fees charged to customers and income from disposal of oil and gas properties and is recognized when the services have been rendered or the properties has been disposed. Reimbursement of insurance claims is recognized when the compensation becomes receivable.

(d) Dividend income

Dividend income is recognized when the Group's right to receive payment is established.

(e) Interest income

Interest income is recognized as it accrues using the effective interest method.

The Group presents taxes collected from customers in the consolidated statement of comprehensive income on a net basis.

Share-based payment transactions

Employees (including directors) of the Group receive remuneration in the form of share-based payment transactions, whereby employees render services as consideration for equity instruments ("equity-settled transactions").

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by using the Black-Scholes option pricing model, further details of which are given in note 27.

The cost of equity-settled transactions is recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognized for equity-settled transactions at the end of the each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or

credit to profit or loss for a period represents the movement in the cumulative expense recognized as at the beginning and end of that period.

No expense is recognized for awards that do not ultimately vest for the Group.

No equity-settled award was modified or cancelled during the years ended December 31, 2011 and 2010.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share.

F-29

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Retirement and termination benefits

The Group participates in defined contribution plans in accordance with local laws and regulations for full-time employees in the PRC and other countries in which it operates. The plans provide for contributions ranging from 11% to 22% of the employees' basic salaries. The Group's contributions to these defined contribution plans are charged to the profit or loss in the year to which they relate.

Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs directly relating to the acquisition, construction or production of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period in which they are incurred.

Foreign currencies

These financial statements are presented in RMB. Each entity in the Group maintains its books and records in its own functional currency. Foreign currency transactions recorded by the entities of the Group are initially recorded using their respective functional currency rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rates of exchange ruling at the end of the reporting period. All differences arising on settlement or translation of monetary items are taken to profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. The gain or loss arising on retranslation of a non-monetary item is treated in line with the recognition of the gain or loss on change in fair value of the item.

The functional currencies of certain entities within the Group are currencies other than RMB. As at the end of the reporting period, the assets and liabilities of these entities are translated into the presentation currency of the Group at the exchange rates ruling at the reporting date, and their statement of comprehensive income are translated into RMB at the weighted average exchange rates for the year. The resulting exchange differences are included in the cumulative translation reserve. On disposal of a foreign operation, the deferred cumulative amount recognized in equity relating to that particular foreign operation is recognized in profit or loss.

Operating leases

Leases where substantially all the rewards and risks of ownership of assets remain with the lessor are accounted for as operating leases. Where the Group is the lessee, rentals payable under operating leases are charged to the profit or loss on the straight-line basis over the lease terms.

Prepaid land lease payments under operating leases are initially stated at cost and subsequently recognized on the straight-line basis over the lease terms.

Contingencies

A contingent liability is disclosed when the existence of an obligation will only be confirmed by future events or when the amount of the obligation cannot be measured reliably.

A contingent asset is not recognized in the financial statements, but is disclosed when an inflow of economic benefits is probable.

F-30

---

Table of Contents

CNOOC LIMITED  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Significant accounting judgments, estimates and assumptions

The preparation of the consolidated financial statements in conformity with IFRSs and HKFRSs requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

In the process of applying the Group's accounting policies, the directors have made the following judgments, estimates and assumptions, which have the most significant effect on the amounts recognized in the consolidated financial statements.

(a) Reserve base

Oil and gas properties are depreciated on a unit-of-production basis at a rate calculated by reference to proved reserves. Commercial reserves are determined using estimates of oil in place, recovery factors and future oil prices, the latter having an impact on the proportion of the gross reserves which are attributable to the host government under the terms of the production sharing contracts. The level of estimated commercial reserves is also a key determinant in assessing whether the carrying value of any of the Group's oil and gas properties has been impaired.

Pursuant to the oil and gas reserve estimation requirements under US Securities and Exchange Commission's rules, the Group uses the average, first-day-of-the-month oil price during the 12-month period before the ending date of the period covered by the consolidated financial statements to estimate its proved oil and gas reserves.

(b) Carrying value of oil and gas assets

The calculation of the unit-of-production rate for oil and gas properties amortization could be impacted to the extent that actual production in the future is different from current forecast production based on proved reserves. This would generally result from significant changes in any of the factors or assumptions used in estimating reserves. These factors could include changes in proved reserves, the effect on proved reserves of differences between actual commodity prices and commodity price assumptions and unforeseen operational issues.

(c) Impairment indicators

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value in use and fair value less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the oil price assumption may change which may then impact the estimated life of the field and may then require a material adjustment to the carrying value of tangible assets. The Group monitors internal and external indicators of impairment relating to its tangible and intangible assets.

(d) Dismantlement costs

Dismantlement costs will be incurred by the Group at the end of the operating life of certain of the Group's facilities and properties. The ultimate dismantlement costs are uncertain and cost estimates can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques or experience at other production sites. The expected timing and amount of expenditure can also change, for example, in response to changes in reserves or changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Significant accounting judgments, estimates and assumptions (continued)

(e) Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations (including those applicable to tax credits) and the amount and timing of future taxable income. Given the wide range of international business relationships and the long term nature and complexity of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Group establishes provisions, based on best estimates, for possible consequences of audits by the tax authorities of the respective countries in which it operates. The amount of such provisions is based on various factors, such as the Group's experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective Group company's domicile.

4. ACQUISITIONS AND OTHER VENTURES

2011

- (i) The Company and Bidas Energy Holdings Ltd. ("BEH"), through Bidas Corporation, a 50% owned joint venture, entered into a share purchase agreement with BP PLC ("BP") on November 28, 2010, pursuant to which Bidas Corporation would acquire a 60% equity interest in Pan America Energy LLC ("PAE") from BP for a consideration of approximately US\$7.06 billion. On November 5, 2011, Bidas Corporation sent to BP a letter to terminate the above mentioned transaction to acquire 60% equity interest in PAE from BP.
- (ii) On January 29, 2011, CNOOC International Limited ("CNOOC International") through its wholly-owned subsidiary, OOGC America, Inc., signed a purchase agreement with Chesapeake Exploration LLC, a subsidiary of Chesapeake Energy Corporation to purchase a 33.3% undivided interest in the Denver-Julesburg and Powder River Basins in northeast Colorado and southeast Wyoming (the "Niobrara Project") with a cash consideration of US\$570 million. In addition, CNOOC International has agreed to fund 66.7% of Chesapeake's share of drilling and completion costs in the project until an additional US\$697 million has been paid. US\$180 million was paid in 2011. The deal was closed on February 11, 2011.
- (iii) On March 29, 2011, CNOOC Uganda Ltd, a wholly-owned subsidiary of CNOOC International, entered into a sales and purchase agreement with Tullow Uganda Limited and Tullow Uganda Operation Pty. Limited, wholly-owned subsidiaries of Tullow Oil Plc., to acquire a one-third working interest in Uganda Exploration Areas 1, 2 and 3A (the "Uganda Assets") for an initial cash consideration of US\$1.467 billion, out of which US\$251 million was paid in 2011. The acquisition of the Uganda Assets was subsequently completed on February 21, 2012 and the remaining US\$1.216 billion was paid accordingly.
- (iv) On July 20, 2011, the Company entered into an Arrangement Agreement, through its indirect wholly-owned subsidiary, CNOOC Luxembourg S.à r.l, to acquire OPTI Canada Inc. ("OPTI"), a public company listed on the Toronto Stock Exchange ("TSX") with a total consideration of approximately US\$2.1 billion, which included an

aggregate cash consideration of US\$1.25 billion paid to the OPTI shareholders (US\$34 million or approximately RMB214 million) and the Second Lien Noteholders (US\$1.216 billion or approximately RMB7.69 billion). In addition, due to a change in control of OPTI as a result of the transaction, OPTI must redeem all of its outstanding First Lien Notes in December 2011 at a price equal to 102% of the principal amount of the First Lien Notes plus accrued interest (totaling US\$878 million) pursuant to the indentures thereof. The acquisition was completed on November 28, 2011. In connection with the acquisition, the OPTI shares have been delisted from the TSX. OPTI Canada Inc. subsequently changed its name to CNOOC Canada Inc. on December 15, 2011.

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (All amounts expressed in millions of Renminbi unless otherwise stated)

## 4. ACQUISITIONS AND OTHER VENTURES (continued)

2011 (continued)

(iv)

(continued)

The fair values of the identifiable assets and liabilities of OPTI as at the date of acquisition are as follows:

	Fair value recognized on acquisition
Property, plant and equipment	14,600
Cash and cash equivalents	1,008
Trade receivables	326
Other current assets	105
Trade payables	(560 )
Other current liabilities	(659 )
Loans and borrowings	(14,262 )
Other non-current liabilities	(344 )
Goodwill on acquisition	-
Satisfied by cash	214

The fair values disclosed above are provisional subject to finalization of valuation for the identifiable assets and liabilities. The review of the fair value of the assets and liabilities acquired will be completed within 12 months after the acquisition date.

An analysis of the net outflow of cash and cash equivalents in respect of the acquisition is as follows:

Cash consideration	214
Purchase of Second Lien Notes	7,690
Cash and cash equivalents acquired	(1,008 )
Net outflow of cash and cash equivalents in respect of the acquisition	6,896

Since the acquisition, CNOOC Canada Inc. contributed approximately RMB255 million to the Group's turnover and approximately RMB15 million to the consolidated profit for the year.

If the acquisition had taken place at the beginning of the year, CNOOC Canada Inc. would have contributed approximately RMB2,418 million to the Group's turnover and reduced the consolidated profit for the year by approximately RMB268 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
(All amounts expressed in millions of Renminbi unless otherwise stated)

4. ACQUISITIONS AND OTHER VENTURES (continued)

2010

(i) On March 13, 2010, CNOOC International, a wholly-owned subsidiary of the Company, entered into agreements with BEH to form a 50:50 joint venture in Bidas Corporation, formerly a wholly-owned subsidiary of BEH, for cash consideration of approximately US\$3.1 billion. This transaction is aligned with the Company's growth strategy by expanding its reach into Latin America and establishes a foundation for future growth in the region and other countries. Bidas Corporation, through its affiliates (including a 40% interest in PAE) has oil and gas exploration and production activities in Argentina, Bolivia and Chile. On May 4, 2010, the Company completed its acquisition at a total consideration of US\$3.1 billion.

The Group accounts for its investment in Bidas Corporation using the equity method.

(ii) On April 30, 2010, CNOOC China Limited, a wholly-owned subsidiary of the Company, signed a sales and purchase agreement to acquire an additional 24.5% participating interest in Block 15/34 from Devon Energy Corporation ("Devon") for a cash consideration of US\$515 million. On June 18, 2010, the Company completed its acquisition. Block 15/34 is located in the Pearl River Mouth Basin of South China Sea.

The Company is the operator of the block. Upon completion, the Company increased its participating interest to 75.5%.

(iii) On May 17, 2010, CNOOC International, Türkiye Petrolleri A.O. ("TPAO") and Iraqi Drilling Company ("IDC") (collectively, the "Contractors") entered into a Technical Service Contract ("TSC") for the Missan oil fields in Iraq. The Contractors are engaged to achieve stipulated production targets through improved and enhanced recovery measures. The TSC provides for a cost recovery mechanism and remuneration fee on incremental production. The TSC has a contract term of 20 years, with an option to extend for additional five years with relevant approval.

CNOOC International will act as the lead contractor and hold a 63.75% participating interest while TPAO will hold 11.25%. IDC will hold the remaining 25% participating interest. As a state partner, IDC will be entitled to receive a 25% participating interest of remuneration fee without paying any expenditure.

(iv) On October 10, 2010, CNOOC International through its wholly-owned subsidiary, OOGC America, Inc., signed a purchase agreement with Chesapeake Exploration, LLC, a subsidiary of Chesapeake Energy Corporation ("Chesapeake"), to purchase a 33.3% undivided interest in Chesapeake's Eagle Ford Shale project in Texas with a cash consideration of US\$1.08 billion plus an upward adjustment of US\$40 million paid on closing. In addition, CNOOC International has agreed to fund 75% of Chesapeake's share of development costs in the project until an additional US\$1.08 billion has been paid. The deal was closed on November 15, 2010.

## 5.SEGMENT INFORMATION

## (a)Operating segments

The Group is organized on a worldwide basis into three major operating segments. The Group is involved in the upstream operating activities of the petroleum industry that comprise independent operations, operations under joint arrangements and trading business. These segments are determined primarily because the Group's chief operating decision maker makes key operating decisions and assesses performance of the segments separately. The Group evaluates the performance of each segment based on profit or loss from operations before income tax.

The following table presents the segment financial information for the Group's operating segments for the years ended December 31, 2009, 2010 and 2011.

	Independent operations			Joint arrangements			Trading business			2009	Co
	2009	2010	2011	2009	2010	2011	2009	2010	2011

## 5. SEGMENT INFORMATION (continued)

## (b) Geographical information

The Group mainly engages in the exploration, development, production and sale of crude oil, natural gas and other petroleum products in offshore China. Activities outside the PRC are mainly conducted in Indonesia, Australia, Nigeria, Argentina, the United States of America, Canada and Singapore.

In presenting the Group's geographical information, revenues from external customers are based on the location of the Group's customers, and non-current assets are attributed to the segments based on the location of the Group's assets. No further analysis of geographical information is presented for revenues from external customers as over 77% of the Group's revenues are generated from PRC customers, and revenues generated from customers in other locations are individually less than 10%.

The following table presents certain non-current assets and capital expenditure information for the Group's geographical information for the years ended December 31, 2009, 2010 and 2011.

	PRC			Asia excluding PRC			Oceania			Africa		
	2009	2010	2011	2009	2010	2011	2009	2010	2011	2009	2010	2011
Non-current assets	115,498	126,562	191,262	14,472	33,754	33,086	3,118	2,782	2,423	33,901	30,818	26,441
Capital expenditures	36,881	31,938	31,932	1,891	1,789	2,450	444	-	1	3,164	2,540	2,142

The information on non-current assets above is based on the location of assets and excludes financial instruments.

## (c) Information about major customers

The current year's revenue of approximately RMB52,026 million (2010: RMB34,384 million, 2009: RMB 24,333 million) and RMB33,591 million (2010: RMB13,218 million, 2009: 7,721 million) was derived from sales by the independent operations and joint arrangements segments to China Petroleum & Chemical Corporation and PetroChina Company Limited respectively.

Table of Contents

## 6. OIL AND GAS SALES

	2009	2010	2011
Gross sales	87,763	152,887	195,759
Less: Royalties	(1,464 )	(3,523 )	(3,134 )
PRC government's share of oil	(2,385 )	(3,230 )	(3,346 )
Oil and gas sales	83,914	146,134	189,279

## 7. SPECIAL OIL GAIN LEVY

In 2006, a Special Oil Gain Levy (“SOG Levy”) was imposed by the Ministry of Finance of the PRC (“MOF”) at the progressive rates from 20% to 40% on the portion of the monthly weighted average sales price of the crude oil lifted in the PRC exceeding US\$40 per barrel. MOF has decided to increase the threshold of the SOG Levy to US\$55, with effect from November 1, 2011. Notwithstanding this adjustment, the SOG Levy will continue to have five levels and will be calculated and charged according to the progressive and valorem rates on the excess amounts. The SOG Levy paid can be claimed as a deductible expense for corporate income tax purposes and is calculated based on the actual volume of the crude oil entitled.

## Notes:

- (1) Fees and salaries, allowances, and benefits in kind represent the gross amount (before applicable individual salary tax) paid/payable to individual directors. All the executive directors have voluntarily waived their salaries, allowances, benefits in kind and performance-related bonus in 2011.
- (2) Mr. Li Fanrong was appointed as a non-executive director with effect from May 24, 2010 and was re-designated to executive director with effect from September 16, 2010. On November 23, 2011, Mr. Li Fanrong was appointed as Chief Executive Officer of the Company.

- (3) On April 15, 2011, Mr. Wang Yilin was appointed as Chairman of the Board of Directors and Non-executive Director of the Company.
- (4) Mr. Fu Chengyu was re-designated from executive director to non-executive director with effect from September 16, 2010. On April 15, 2011, Mr. Fu Chengyu resigned as Chairman of the Board of Directors and Non-executive Director of the Company.
- (5) Mr. Yang Hua was appointed as the Vice Chairman of the Board of Directors and Chief Executive Officer of the Company with effect from September 16, 2010. On November 23, 2011, Mr. Yang Hua resigned as Chief Executive Officer of the Company and was re-designated from an Executive Director to a Non-executive Director of the Company and continually as the Vice Chairman of the Board of Directors.
- (6) On November 3, 2011, Dr. Edgar W. K. Cheng resigned as independent non-executive director and a member of the nomination committee of the Company. Dr. Edgar W. K. Cheng has voluntarily waived his remuneration as director in 2010.
- (7) Professor Lawrence J. Lau has voluntarily waived his remuneration as director from January to June in 2010.
  - (8) Mr. Wang Tao has voluntarily waived his remuneration as director in 2010.
  - (9) Mr. Cao Xinghe retired as a non-executive director of the Company with effect from May 24, 2010.
- (10) During the year, no new share options were granted to directors in respect of their services to the Group under the applicable share option schemes of the Company, further details of which are set out in note 27. No director exercised any share option in 2011 and 2010.

Save as disclosed above, there was no arrangement under which a director waived or agreed to waive any remuneration during the year.

The number of non-director, highest paid employees whose remuneration fell within the following bands is as follows:

	2009	2010	2011
Nil to RMB5,000,000	1	1	-
RMB5,000,001 to RMB5,500,000	-	1	1
RMB5,500,001 to RMB6,000,000	-	-	2
RMB6,000,001 to RMB6,500,000	-	-	-
RMB6,500,001 to RMB8,000,000	-	-	1
	1	2	4

## 12. TAX

## (i) Income tax

The Company and its subsidiaries are subject, on an entity basis, to income taxes on profits arising in or derived from the tax jurisdictions in which the entities of the Group are domiciled and operate. The Company is subject to profits tax at a rate of 16.5% (2010: 16.5%) on profits arising in or derived from Hong Kong, which is qualified as a foreign tax credit to offset the PRC corporate income tax starting from January 1, 2008.

The Company is regarded as a Chinese Resident Enterprise (as defined in the "Enterprise Income Tax Law of the People's Republic of China") by the State Administration of Taxation of the PRC. As a result, the Company is subject to the PRC corporate income tax at the rate of 25% starting from January 1, 2008.

The Company's subsidiary in Mainland China, CNOOC China Limited, is a wholly-owned foreign enterprise. It is subject to corporate income tax at the rate of 25% under the prevailing tax rules and regulations.

Subsidiaries of the Group domiciled outside the PRC are subject to income tax at rates ranging from 10% to 56%.

As of December 31, 2011, management of the Company has not provided any deferred tax liabilities related to earnings derived by the Company from its overseas subsidiaries since the timing of the reversal of the taxable temporary differences can be controlled by the Company and it is probable that the temporary differences would not reverse in the foreseeable future.

An analysis of the tax expense in the Group's consolidated statement of comprehensive income is as follows:

	2009	2010	2011
Overseas			
Current income tax	657	1,202	1,532
Deferred tax	1,363	976	906
PRC			
Current income tax	8,664	17,434	21,309

Edgar Filing: CNOOC LTD - Form 20-F

Deferred tax	651	(1,419 )	(1,437 )
Total tax charge for the year	11,335	18,193	22,310

12. TAX

(i) Income tax (continued)

A reconciliation of the statutory PRC corporate income tax rate to the effective income tax rate of the Group is as follows:

	2009 %	2010 %	2011 %
Statutory PRC enterprise income tax rate	25.0	25.0	25.0
Effect of different tax rates for the Company and overseas subsidiaries	3.0	0.3	(0.5 )
Tax credit from the government	(0.3 )	(0.1 )	(0.2 )
Profit attributable to a joint venture and associates	(0.1 )	(0.1 )	(0.2 )
Other permanent differences	0.1	-	-
<b>Group's effective income tax rate</b>	<b>27.7</b>	<b>25.1</b>	<b>24.1</b>

The movements of deferred tax liabilities are as follows:

	2009	2010	2011
At January 1	5,429	7,440	6,841
Credited to the consolidated statements of comprehensive income	2,014	(443 )	(531 )
Disposal of a subsidiary(note1)	-	-	(549 )
Exchange differences	(3 )	(156 )	(273 )
<b>At December 31</b>	<b>7,440</b>	<b>6,841</b>	<b>5,488</b>

Principal components of deferred tax balances are as follows:

	2010	2011
Deferred tax assets		
Provision for retirement and termination benefits	96	50
Provision for dismantlement	2,187	3,237
Impairment of property, plant and equipment	1,047	719
Losses available for offsetting against future taxable profit	-	4,002
Others	223	299
	<b>3,553</b>	<b>8,307</b>

Deferred tax liabilities		
Accelerated tax depreciation of oil and gas properties	(10,306 )	(13,526 )
Non-current liabilities	-	(88 )
Others	(88 )	(181 )
	(10,394 )	(13,795 )
Net deferred tax liabilities	(6,841 )	(5,488 )

As at December 31, 2011, the Group had approximately RMB25,829 million (2010: RMB775 million) of carry-forward tax losses, predominantly in North America, that would expire in sixteen to twenty years after generation, for offsetting against future taxable profits of the subsidiaries in which the losses arose.

Deferred tax assets have been recognized in respect of the above tax losses to the extent of the anticipated future taxable profits arising from the reversal of existing taxable temporary differences.

As at December 31, 2011, the Group's recognized tax losses amounted to RMB10,975 million (2010: nil). No deferred tax asset has been recognized in respect of RMB14,854 million tax losses (2010: RMB775 million).

 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 (All amounts expressed in millions of Renminbi unless otherwise stated)

## 12. TAX (continued)

## (ii) Other taxes

The Company's PRC subsidiaries pay the following other taxes:

- Production taxes at the rate of 5% on independent production and production under production sharing contracts;

- Export tariffs at the rate of 5% on the export value of petroleum oil;

- Business tax at rates of 3% to 5% on other income;

- City construction tax at the rate of 1% or 7% on the actual paid production taxes and business tax;

- Educational surcharge at the rate of 3% on the actual paid production taxes and business tax;

- Local Educational surcharge at the rate of 2% on the actual paid production taxes and business tax; and

- Resource taxes at the rate of 5% (reduced tax rates may apply to specific products and fields) on the oil and gas sales revenue (excluding production taxes) derived by oil and gas fields under production sharing contracts signed after November 1, 2011 and independent offshore oil and gas fields starting from November 1, 2011, which replaced the royalties for oil and gas fields except for those under production sharing contracts signed before November 1, 2011.

In addition, other taxes paid and payable by the Company's non-PRC subsidiaries include royalty as well as taxes levied on petroleum-related income, profit, budgeted operating and capital expenditures.

## 13. DIVIDENDS

	2009	2010	2011
Declared and paid during the year:			
Interim dividend	7,874	8,100	9,106
Final dividend	7,873	7,795	9,287
<b>Total dividends paid in the year</b>	<b>15,747</b>	<b>15,895</b>	<b>18,393</b>
Weighted average number of ordinary shares	44,669,199,984	44,669,199,984	44,668,570,359
Dividend per ordinary share	RMB0.35	RMB0.36	RMB0.41
Final dividend proposed for approval at annual general meeting at HK\$0.28 per ordinary share (2010: HK\$0.25 per ordinary share, 2009: HK\$0.20 per ordinary share) - not recognized as a liability as at the end of the reporting	7,856	9,421	10,142

period

Pursuant to the Enterprise Income Tax Law of the People's Republic of China and related laws and regulations, the Company is regarded as a Chinese resident enterprise, and thus is required to withhold corporate income tax at the rate of 10% when it distributes dividends to its non-resident enterprise (as defined in the “Enterprise Income Tax Law of the People's Republic of China”) shareholders, with effect from the distribution of the 2008 final dividend. In respect of all shareholders whose names appear on the Company’s register of members and who are not individuals (including HKSCC Nominees Limited, corporate nominees or trustees such as securities companies and banks, and other entities or organizations, which are all considered as non-resident enterprise shareholders), the Company will distribute the dividend after deducting corporate income tax of 10%.

## 18. INVESTMENT IN A JOINT VENTURE (continued)

Reconciliation of the summarized financial information of the joint venture to the carrying amount of the Group's investment in the joint venture is disclosed below:

	2010	2011
Group share of net assets of joint venture, excluding goodwill	18,949	18,392
Goodwill on acquisition less cumulative impairment	1,874	1,783
Carrying amount of investment in joint venture	20,823	20,175

No dividend received from the joint venture in 2010 and 2011 respectively.

## 19. AVAILABLE-FOR-SALE FINANCIAL ASSETS

	2010	2011
Current:		
Non-publicly traded investments, at fair value:		
Private equity funds	16	15
Corporate wealth management products (1)	13,000	18,500
Liquidity funds (2)	5,924	9,061
	18,940	27,576
Non-current:		
Publicly traded investments, at fair value:		
Equity investment in MEG (3)	8,616	7,365
	8,616	7,365

The fair values of publicly traded investments are based on quoted market prices. The fair values of non-publicly traded investments are based on fund managers' quotations. The directors believe that the estimated fair values quoted by fund managers are reasonable, and that they are the most appropriate values at the reporting date.

(1)The corporate wealth management products matured from February 17, 2012 to June 21, 2012.

(2)The liquidity funds have no fixed maturity date and no coupon rate.

(3)The equity investment represents investment in the equity securities of MEG Energy Corporation ("MEG"). As at December 31, 2011, the investment in MEG was stated at the quoted market price. MEG is principally engaged in the exploitation and production of oil sands.

During the year, the gross loss of the Group's available-for-sale investments recognised directly in other comprehensive loss amounted to RMB800 million (2010: other comprehensive income RMB5,590 million, and 2009 other comprehensive loss: RMB22 million).

In addition, there were no realized gains of the Group, transferred from other comprehensive income to the profit and loss for the year (2010: nil, and 2009: 52 million) upon the disposal of the related available-for-sale financial assets.

None of the financial assets above is either past due or impaired.

## 20. INVENTORIES AND SUPPLIES

	2010	2011
Materials and supplies	3,215	3,510
Oil in tanks	854	986
Less: Provision for inventory obsolescence	(94 )	(116 )
	3,975	4,380

The provision for inventory obsolescence during the year was approximately RMB22 million (2010: approximately RMB27 million).

## 21. TRADE RECEIVABLES

The Group's trading terms with its customers are mainly on credit, except for new customers, where payment in advance is normally required. The credit terms of the Group are generally within 30 days after the delivery of oil and gas. Trade receivables are non-interest-bearing.

As at December 31, 2011 and 2010, substantially all the trade receivables were aged within 30 days. All customers have a good repayment history and all receivables are not past due.

## 22. CASH AND CASH EQUIVALENTS AND TIME DEPOSITS WITH MATURITY OVER THREE MONTHS

The Group's cash and cash equivalents mainly consist of current deposits and time deposits with maturity within seven days. The bank balances are deposited with creditworthy banks with no recent history of default.

The weighted average effective interest rates of the Group's bank deposits were 2.7% per annum (2010: 2.4% per annum) for the year ended December 31, 2011.

CNOOC China Limited, a wholly-owned subsidiary of the Company, deposited RMB12.0 billion with Bank of China to secure loans of US\$1.77 billion (note 25) granted by Bank of China. The amount was recorded as time deposits with maturity over three months.

## 23. TRADE AND ACCRUED PAYABLES

As at December 31, 2011 and 2010, substantially all the trade and accrued payables were aged within six months. The trade and accrued payables are non-interest-bearing and are normally settled within six months.
