(1) ETN repurchase value performance figures reflect repurchase value, which would require investors to have a minimum number of shares (found in pricing supplement). Repurchase value is the current principal amount x applicable index factor x fee factor. See the prospectus for more complete information. Investors holding less than the minimum number of shares required to ef ect a repurchase would have to sel their shares at prevailing market prices, which may be at a discount to the repurchase value. See "ETN Market Price" in this table. Index history is for ill ustrative purposes only and does not represent

actual PowerShares DB Base Metals ETN performance. The inception date of the Deutsche Bank Liquid Commodity Index - Optimum Yield Industrial Metals[] is July 12, 2006. ETN repurchase value is based on a combination of the monthly returns from the Deutsche Bank Liquid Commodity Index -- Optimum Yield Industrial Metals Excess Return[] (the "Base Metals Index") plus the monthly returns from the DB 3-Month T-Bill Index (the "T-Bill Index"), resetting monthly as per the formula applied to the PowerShares DB Base Metals ETNs, less the investor fee. The T-Bill Index is intended to approximate the returns from investing in 3-month United States Treasury bill s on a rol ing basis.

PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS.

- (2) ETN market price performance is calculated using the change in the bid/ask midpoint at 4 p.m. ET expressed as a percentage change from the beginning to the end of the specified time period.
- (3) The SandP 500([R]) Index is an unmanaged index used as a measurement of change in stock market conditions based on the performance of a specified group of common stocks. The Barclays U.S. Aggregate Bond Index[] is an unmanaged index considered representative of the U.S. investment-grade, fixed-rate bond market. Index history does not reflect any transaction costs or expenses. Indexes are unmanaged, andlyou cannot invest directly in an index.

### Important Risk Considerations

The PowerShares DB Base Metals ETNs may not be suitable for investors with a term greater than the time remaining to the next monthly reset date and should be used only by knowledgeable investors who understand the potential adverse consequences of seeking longer term inverse or leveraged investment results by means of securities that reset their exposure monthly.

Investing in the ETNs is not equivalent to a direct investment in the index or index components because

2.

the current principal amount (the amountlyou invested) is reset each month, resulting in the compounding of monthly returns. The principal amount is also subject to the investor fee, which can adversely affect returns. The amountlyou receive at maturity (or upon an earlier repurchase) wil be contingent upon each monthly performance of the index during the term of the securities. There is no guarantee thatlyou wil receive at maturity, or upon an earlier repurchase, lyour initial investment back or any return on that investment. Significant adverse monthly performances forlyour securities may not be offset by any beneficial monthly performances.

The PowerShares DB Base Metals ETNs are senior unsecured obligations of Deutsche Bank AG, London Branch, and the amount due on the PowerShares DB Base Metals ETNs is dependent on Deutsche Bank AG, London Branch's ability to pay. The PowerShares DB Base Metals ETNs are riskier than ordinary unsecured debt securities and have no principal protection. Risks of investing in the PowerShares DB Base Metals ETNs include limited portfolio diversification, ful principal at risk, trade price fluctuations, illiquidity and leveraged losses. Investing in the PowerShares DB Base Metals ETNs is not equivalent to a direct investment in the Index or index components. The investor fee will reduce the amount oflyour return at maturity or upon redemption oflyour PowerShares DB Base Metals ETNs even if the value of the relevant index has increased. If at any time the redemption value of the PowerShares DB Base Metals ETNs is zero, your investment will expire worthless. Deutsche Bank may accelerate the PowerShares DB Base Metals ETNs upon the occurrence of a regulatory event as described in the pricing supplement. Ordinary brokerage commissions apply, and there are tax consequences in the event of sale, redemption or maturity of the PowerShares DB Base Metals ETNs. Sales in the secondary market may result in losses. An investment in the PowerShares DB Base Metals ETNs may not be suitable for al investors.

The PowerShares DB Base Metals ETNs provide concentrated exposure to notional positions in aluminum, copper and zinc futures contracts. The market value of the PowerShares DB Base Metals ETNs may be influenced by many unpredictable factors, including, among other things, volatile base metal prices, changes in supply and demand relationships, changes in interest rates, and monetary and other governmental actions. Because the ETNs provide concentrated exposure to notional positions in futures contracts of a single commodity sector, they are speculative and generally will exhibit higher volatility than commodity products linked to more than one commodity sector.

The PowerShares DB Base Metals Double Long ETN and PowerShares DB Base Metals Double Short ETN are both leveraged investments. As such, they are likely to be more volatile than an unleveraged investment. There is also a greater risk of loss of principal associated with a leveraged investment than with an unleveraged investment.

An investment in the PowerShares DB Base Metals ETNs involves risks, including possible loss of principal. For a description of the main risks, see "Risk Factors" in the applicable pricing supplement.
