

DEUTSCHE BANK AKTIENGESELLSCHAFT

Form FWP

October 28, 2015

Fact Sheet for Term Sheet No. 2579B
Filed Pursuant to Rule 433

Registration Statement No. 333-206013

Dated October 27, 2015

**Annual Review Notes Linked to the
S&P 500® Index due November 2,
2017**

Premium payment upon automatic call;
return of initial investment if downside
barrier is not breached; full downside
exposure if downside barrier is breached

Calculating the Payment at Maturity

If the notes are not automatically called prior to the final Review Date, for every \$1,000 Face Amount of notes, investors will receive at maturity an amount based on the performance of the Underlying, determined as follows. Any payment on the notes is subject to the credit of the Issuer.

Hypothetical Payment Upon an Automatic Call or at Maturity

The hypothetical returns set forth below reflect a Trigger Level equal to 90.00% of the Initial Level and assume call premiums applicable to the first and the final Review Dates of 9.90% and 19.80%, respectively. **The actual Initial Level, Trigger Level and call premiums will be determined on the Trade Date.**

Underlying Appreciation/

Depreciation of the Underlying on each Review Date	Return at First Review Date	Return at Final Review Date
100.00%	9.90%	19.80%
80.00%	9.90%	19.80%
50.00%	9.90%	19.80%
20.00%	9.90%	19.80%
10.00%	9.90%	19.80%
0.00%	9.90%	19.80%
-5.00%	N/A	0.00%
-10.00%	N/A	0.00%
-15.00%	N/A	-15.00%
-20.00%	N/A	-20.00%
-30.00%	N/A	-30.00%
-50.00%	N/A	-50.00%
-80.00%	N/A	-80.00%
-100.00%	N/A	-100.00%

Selected Risk Factors

YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS

The notes do not pay any coupons and do not guarantee any return of your investment. The return on the notes at maturity is linked to the performance of the Underlying and will depend on whether the notes are automatically called and whether the Final Level is less than the Trigger Level. If the notes are not automatically called and the Final Level is less than the Trigger Level, you will be fully exposed to the negative Underlying Return and, for each \$1,000 Face Amount of notes, you will lose 1.00% of the Face Amount for every 1.00% by which the Final Level is less than the Initial Level, with a maximum loss of 100.00% of your initial investment in the notes. In this circumstance, you will lose a significant portion or all of your investment. Any payment on the notes is subject to our ability to satisfy our obligations as they become due.

YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE APPLICABLE CALL PREMIUM

If the closing level of the Underlying on the first Review Date or the Final Level on the final Review Date is greater than or equal to the Initial Level, the notes will be automatically called and you will receive on the applicable Call Settlement Date a payment per \$1,000 Face Amount of notes equal to the Face Amount plus the product of the Face Amount and the applicable call premium, regardless of the increase in the level of the Underlying, which may be significant. The actual call premiums applicable to the first and the final Review Dates will be determined on the Trade Date, but will not be less than 9.90% and 19.80%, respectively. Accordingly, the maximum return on the notes will be limited to the call premium of 19.80% for the final Review Date. The level of the Underlying at various times during the term of the notes could be higher than the closing levels of the Underlying on the annual Review Dates and/or the Averaging Dates. Because the call premiums are fixed amounts, you may receive a lower payment upon an Automatic Call or at maturity than you would if you had invested directly in the Underlying.

REINVESTMENT RISK If the notes are automatically called, the term of the notes may be as short as

Single Resolution Mechanism and a Single Resolution Fund (commonly referred to as the “SRM Regulation”) becomes effective on January 1, 2016. On May 26, 2015, the German Federal Government published a draft bill of a Resolution Mechanism Act. One of this law’s primary purposes would be to conform German law to the SRM Regulation. In addition, the draft bill proposes that in the event of an insolvency proceeding, senior unsecured debt instruments would by operation of law rank junior to all other outstanding unsecured unsubordinated obligations, but in priority to all contractually subordinated instruments. The proposed subordination would not apply if the terms of the senior unsecured debt instruments provide that (i) the repayment amount depends on the occurrence or non-occurrence of a future event, or will be settled in kind, or (ii) the interest amount depends on the occurrence or non-occurrence of a future event, unless it depends solely on a fixed or variable reference interest rate and will be settled in cash. Instruments that are typically traded on money markets would not be subject to the proposed subordination. The proposed order of priorities would apply to insolvency proceedings commenced on or after January 1, 2016. If enacted, the proposed subordination of senior unsecured debt instruments could apply to the notes, which would most likely result in a larger share of loss being allocated to the notes in the event of an insolvency proceeding or the imposition of any Resolution Measures by the competent resolution authority. The final version of the Resolution Mechanism Act may provide for additional Resolution Measures that may become applicable to us. Imposition of a Resolution Measure would likely occur if we become, or are deemed by our competent supervisory authority to have become, “non-viable” (as defined under the then applicable law) and are unable to continue our regulated banking activities without a Resolution Measure becoming applicable to us. **You may lose some or all of your investment in the notes if a Resolution Measure becomes applicable to us.**

By acquiring the notes, you would have no claim or other right against us arising out of any subordination or Resolution Measure, and we would have no obligation to make payments under the notes following the imposition of a Resolution Measure. In particular, the imposition of any Resolution Measure will not constitute a default or an event of default under the notes, under the senior indenture

approximately one year. There is no guarantee that you would be able to reinvest the proceeds from an investment in the notes at a comparable return for a similar level of risk in the event the notes are automatically called prior to the Maturity Date.

or for the purpose of the Trust Indenture Act of 1939, as amended (the “**Trust Indenture Act**”). Furthermore, because the notes are subject to any Resolution Measure, secondary market trading in the notes may not follow the trading behavior associated with similar types of securities issued by other financial institutions which may be or have been subject to a Resolution Measure.

THE NOTES DO NOT PAY ANY COUPONS Unlike ordinary debt securities, the notes do not pay any coupons and do not guarantee any return of your initial investment at maturity.

In addition, by your acquisition of the notes, you waive, to the fullest extent permitted by the Trust Indenture Act and applicable law, any and all claims against the trustee and the paying agent for, agree not to initiate a suit against the trustee and the paying agent in respect of, and agree that neither the trustee nor the paying agent will be liable for, any action that the trustee or the paying agent takes, or abstains from taking, in either case in accordance with the imposition of a Resolution Measure by our competent resolution authority with respect to the notes.

THE NOTES ARE SUBJECT TO THE CREDIT OF DEUTSCHE BANK AG — The notes are senior unsecured obligations of Deutsche Bank AG and are not, either directly or indirectly, an obligation of any third party. Any payment(s) to be made on the notes depends on the ability of Deutsche Bank AG to satisfy its obligations as they come due. An actual or anticipated downgrade in Deutsche Bank AG’s credit rating or increase in the credit spreads charged by the market for taking Deutsche Bank AG’s credit risk will likely have an adverse effect on the value of the notes. As a result, the actual and perceived creditworthiness of Deutsche Bank AG will affect the value of the notes and in the event Deutsche Bank AG were to default on its obligations or become subject to a Resolution Measure, you might not receive any amount(s) owed to you under the terms of the notes and you could lose your entire investment.

Accordingly, you may have limited or circumscribed rights to challenge any decision of our competent resolution authority to impose any Resolution Measure.

THE NOTES MAY BECOME SUBORDINATED TO THE CLAIMS OF OTHER CREDITORS, BE WRITTEN DOWN, BE CONVERTED OR BECOME SUBJECT TO OTHER RESOLUTION MEASURES. YOU MAY LOSE SOME OR ALL OF YOUR INVESTMENT IF ANY SUCH MEASURE BECOMES APPLICABLE TO US — On May 15, 2014, the European Parliament and the Council of the European Union published the Bank Recovery and Resolution Directive for establishing a framework for the recovery and resolution of credit institutions and investment firms. The Bank Recovery and Resolution Directive required each member state of the European Union to adopt and publish by December 31, 2014 the laws, regulations and administrative provisions necessary to comply with the Bank Recovery and Resolution Directive. To implement

THE ISSUER’S ESTIMATED VALUE OF THE NOTES ON THE TRADE DATE WILL BE LESS THAN THE ISSUE PRICE OF THE NOTES The Issuer’s estimated value of the notes on the Trade Date (as disclosed on the cover of this fact sheet) is less than the Issue Price of the notes. The difference between the Issue Price and the Issuer’s estimated value of the notes on the Trade Date is due to the inclusion in the Issue Price of the agent’s commissions, if any, and the cost of hedging our obligations under the notes through one or more of our affiliates. Such hedging cost includes our or our affiliates’ expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge. The Issuer’s estimated value of the notes is determined by reference to an internal funding rate and our pricing models. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities on equivalent terms. This difference in funding rate, as well as the agent’s commissions, if any, and the estimated cost of hedging our obligations under the notes, reduces the economic terms of the notes to you and is

the Bank Recovery and Resolution Directive, Germany has adopted the Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz*, or “**Resolution Act**”) which became effective on January 1, 2015. The Resolution Act may result in the notes being subject to the powers exercised by our competent resolution authority to impose a Resolution Measure on us. A “**Resolution Measure**” may include: writing down, including to zero, any payment on the notes; converting the notes into ordinary shares or other instruments qualifying as core equity tier 1 capital; or applying any other resolution measure, including (but not limited to) transferring the notes to another entity, amending the terms and conditions of the notes or cancelling of the notes. We expect additional Resolution Measures to become applicable to us when the European regulation of July 15, 2014 relating to the resolution of credit institutions and certain investment firms in the framework of a

expected to adversely affect the price at which you may be able to sell the notes in any secondary market. In addition, our internal pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. If at any time a third party dealer were to quote a price to purchase your notes or otherwise value your notes, that price or value may differ materially from the estimated value of the notes determined by reference to our internal funding rate and pricing models. This

difference is due to, among other things, any difference in funding rates, pricing models or assumptions used by any dealer who may purchase the notes in the secondary market.

INVESTING IN THE NOTES IS NOT THE SAME AS INVESTING IN THE STOCKS COMPOSING THE UNDERLYING — The return on

the notes may not reflect the return you would have realized if you had directly invested in the Underlying. For instance, your return on the notes will be limited to the call premiums regardless of any increase in the price of the Underlying, which could be significant.

IF THE LEVEL OF THE UNDERLYING CHANGES, THE VALUE OF YOUR NOTES MAY NOT CHANGE IN THE SAME MANNER —

Your notes may trade quite differently from the level of the Underlying. Changes in the level of the Underlying may not result in comparable changes in the value of your notes.

NO DIVIDEND PAYMENTS OR VOTING RIGHTS — As a holder of the notes, you will not have any voting rights or rights to receive cash dividends or other distributions or other rights that holders of the stocks composing the Underlying would have.

THE UNDERLYING REFLECTS THE PRICE RETURN OF THE STOCKS COMPOSING THE UNDERLYING, NOT THEIR TOTAL RETURN INCLUDING ALL DIVIDENDS AND OTHER DISTRIBUTIONS — The Underlying reflects the changes in the market prices of the stocks composing the Underlying. The Underlying is not, however, a “total return” index, which, in addition to reflecting those price returns, would also reflect the reinvestment of all dividends and other distributions paid on the stocks composing the Underlying.

during the period of approximately six months beginning from the Trade Date, we or our affiliates may, in our sole discretion, increase the purchase price determined as described above by an amount equal to the declining differential between the Issue Price and the Issuer’s estimated value of the notes on the Trade Date, prorated over such period on a straight-line basis, for transactions that are individually and in the aggregate of the expected size for ordinary secondary market repurchases.

In addition to the factors discussed above, the value of the notes and our purchase price in secondary market transactions after the Trade Date, if any, will vary based on many economic and market factors, including our creditworthiness, and cannot be predicted with accuracy. These changes may adversely affect the value of your notes, including the price you may receive in any secondary market transactions. Any sale prior to the Maturity Date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.

THE NOTES WILL NOT BE LISTED AND THERE WILL LIKELY BE LIMITED LIQUIDITY —

The notes will not be listed on any securities exchange. There may be little or no secondary market for the notes. We or our affiliates intend to act as market makers for the notes but are not required to do so and may cease such market making activities at any time. Even if there is a secondary market, it may not provide enough liquidity to allow you to sell the notes when you wish to do so or at a price advantageous to you. Because we do not expect other dealers to make a secondary market for the notes, the price at which you may be able to sell your notes is likely to depend on the price, if any, at which we or our affiliates are willing to buy the notes. If, at any time, we or our affiliates do not act as market makers, it is likely that there would be little or no secondary market in the notes. If you have to sell your notes prior to maturity, you may not be able to do so or you may have to sell them at a substantial loss, even in cases where the level of the Underlying has increased since the Trade Date.

MANY ECONOMIC AND MARKET FACTORS WILL AFFECT THE VALUE OF THE NOTES — While we expect that, generally, the level of the Underlying will affect the value

THE SPONSOR OF THE UNDERLYING MAY ADJUST THE UNDERLYING IN WAYS THAT AFFECT THE LEVEL OF THE UNDERLYING AND HAS NO OBLIGATION TO CONSIDER YOUR INTERESTS

— The sponsor of the Underlying (the “Index Sponsor”) is responsible for calculating and maintaining the Underlying. The Index Sponsor can add, delete or substitute the Underlying components or make other methodological changes that could change the level of the Underlying. You should realize that the changing of Underlying components may affect the Underlying, as a newly added component may perform significantly better or worse than the component it replaces. Additionally, the Index Sponsor may alter, discontinue or suspend calculation or dissemination of the Underlying. Any of these actions could adversely affect the value of, and your return on, the notes. The Index Sponsor has no obligation to consider your interests in calculating or revising the Underlying.

PAST PERFORMANCE OF THE UNDERLYING IS NO GUIDE TO FUTURE PERFORMANCE

— The actual performance of the Underlying over the term of the notes, may bear little relation to the historical closing levels of the Underlying and/or the hypothetical return examples set forth elsewhere in this fact sheet. We cannot predict the future performance of the Underlying or whether the performance of the Underlying will result in the return of any of your investment.

ASSUMING NO CHANGES IN MARKET CONDITIONS AND OTHER RELEVANT FACTORS, THE PRICE YOU MAY RECEIVE FOR YOUR NOTES IN SECONDARY MARKET TRANSACTIONS WOULD GENERALLY BE LOWER THAN BOTH THE ISSUE PRICE AND THE ISSUER’S ESTIMATED VALUE OF THE NOTES ON THE TRADE DATE

— While the payment(s) on the notes described in this fact sheet is based on the full Face Amount of notes, the Issuer’s estimated value of the notes on the Trade Date (as disclosed on the cover of this fact sheet) is less than the Issue Price of the notes. The Issuer’s estimated

of the notes more than any other single factor, the value of the notes prior to maturity will also be affected by a number of economic and market factors that may either offset or magnify each other.

TRADING AND OTHER TRANSACTIONS BY US, JPMORGAN CHASE & CO. OR OUR OR ITS AFFILIATES IN THE EQUITY AND EQUITY DERIVATIVE MARKETS MAY IMPAIR THE VALUE OF THE NOTES

— We or our affiliates expect to hedge our exposure from the notes by entering into equity and equity derivative transactions, such as over-the-counter options, futures or exchange-traded instruments. We, JPMorgan Chase & Co. or our or its affiliates may also engage in trading in instruments linked or related to the Underlying on a regular basis as part of our or their general broker-dealer and other businesses, for proprietary accounts, for other accounts under management or to facilitate transactions for customers, including block transactions. Such trading and hedging activities may adversely affect the level of the Underlying and, therefore, make it less likely that you will receive a positive return on your investment in the notes. It is possible that we, JPMorgan Chase & Co. or our or its affiliates could receive substantial returns from these hedging and trading activities while the value of the notes declines. We, JPMorgan Chase & Co. or our or its affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to the Underlying. To the extent we, JPMorgan Chase & Co. or our or its affiliates serve as issuer, agent or underwriter for such securities or financial or derivative instruments, our, JPMorgan Chase & Co.’s or our or its affiliates’ interests with respect to such products may be adverse to those of the holders of the notes. Introducing competing products into the marketplace in this manner could adversely affect the level of the Underlying and the value of the notes. Any of the foregoing activities described in this paragraph may reflect trading strategies that differ from, or are in direct opposition to, investors’ trading and investment strategies related to the notes.

WE, JPMORGAN CHASE & CO. OR OUR OR ITS AFFILIATES MAY PUBLISH RESEARCH, EXPRESS OPINIONS OR PROVIDE RECOMMENDATIONS THAT ARE INCONSISTENT WITH INVESTING IN OR HOLDING THE NOTES. ANY SUCH RESEARCH, OPINIONS OR RECOMMENDATIONS COULD ADVERSELY AFFECT THE LEVEL OF THE

value of the notes on the Trade Date does not represent the price at which we or any of our affiliates would be willing to purchase your notes in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we or our affiliates would be willing to purchase the notes from you in secondary market transactions, if at all, would generally be lower than both the Issue Price and the Issuer's estimated value of the notes on the Trade Date. Our purchase price, if any, in secondary market transactions would be based on the estimated value of the notes determined by reference to (i) the then-prevailing internal funding rate (adjusted by a spread) or another appropriate measure of our cost of funds and (ii) our pricing models at that time, less a bid spread determined after taking into account the size of the repurchase, the nature of the assets underlying the notes and then-prevailing market conditions. The price we report to financial reporting services and to distributors of our notes for use on customer account statements would generally be determined on the same basis. However,

UNDERLYING AND THE VALUE OF THE NOTES — We, JPMorgan Chase & Co. or our or its affiliates may

publish research from time to time on financial markets and other matters that could adversely affect the level of the Underlying and the value of the notes, or express opinions or provide recommendations that are inconsistent with purchasing or holding the notes. Any research, opinions or recommendations expressed by us, JPMorgan Chase & Co. or our or its affiliates may not be consistent with each other and may be modified from time to time without notice. You should make your own independent investigation of the merits of investing in the notes and the Underlying.

POTENTIAL CONFLICTS OF INTEREST — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent, hedging our obligations under the notes and determining the Issuer’s estimated value of the notes on the Trade Date and the price, if any, at which we or our affiliates would be willing to purchase the notes from you in secondary market transactions. In performing these roles, our economic interests and those of our affiliates are potentially adverse to your interests as an investor in the notes. The calculation agent will determine, among other things, all values, prices and levels required to be determined for the purposes of the notes on any relevant date or time. The calculation agent will also be responsible for determining whether a market disruption event has occurred as well as, in some circumstances, the prices or levels related to the Underlying that affect whether the notes are automatically called. Any determination by the calculation agent could adversely affect the return on the notes.

THE U.S. FEDERAL INCOME TAX CONSEQUENCES OF AN INVESTMENT IN THE NOTES ARE UNCERTAIN — In determining our tax reporting responsibilities, if any, with respect to the notes, we expect to treat them for U.S. federal income tax purposes as prepaid financial contracts that are not debt. Generally, if this treatment is respected, (i) you should not recognize taxable income or loss prior to maturity or other taxable disposition of the notes and (ii) the gain or loss on your notes should be capital gain or loss and should be long-term capital gain or loss if you have held the notes for more than one year. However, significant aspects of the tax treatment of the notes are uncertain. If the Internal Revenue Service (“**IRS**”) were successful in asserting an alternative treatment for the notes, the tax consequences of ownership and disposition of the notes could differ materially and adversely from those described briefly above. In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on the tax treatment of “prepaid forward contracts” and similar instruments. Any resulting guidance could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect. For further information, you should review carefully the section of the product supplement accompanying term sheet No. 2579B entitled “U.S. Federal Income Tax Consequences” and the section of the accompanying term sheet entitled “Tax Consequences.”

See “Selected Risk Considerations” in the accompanying term sheet and “Risk Factors” in the product supplement and prospectus addendum accompanying term sheet No. 2579B for additional information.

Deutsche Bank AG has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this fact sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents including term sheet No. 2579B, the underlying supplement and the product supplement relating to this offering that Deutsche Bank AG has filed with the SEC for more complete information about Deutsche Bank AG and this offering. You may obtain these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, Deutsche Bank AG, any agent or any dealer participating in this offering will arrange to send you the prospectus, prospectus supplement, product

supplement, underlying supplement, term sheet No. 2579B and this fact sheet if you so request by calling toll-free 1-800-311-4409.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase, the notes prior to their issuance. We will notify you in the event of any changes to the terms of the notes, and you will be asked to accept such changes in connection with your purchase of any notes. You may also choose to reject such changes, in which case we may reject your offer to purchase the notes.
