INTRODUCTION

In connection with our financial restructuring and exchange of our debt securities and our subsidiary's preferred stock for shares of our common stock and a lesser principal amount of debt securities, we propose to issue warrants to each of our shareholders of record as of May 28, 2003. The warrants will be issued as of the closing date of the restructuring transaction, which occurred on June 4, 2003.

We are filing this registration statement on Form 10 to register the warrants to be issued to our shareholders. The warrants are, with certain limited exceptions, non-transferable, are exercisable for approximately 591,000

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

shares of our common stock in the aggregate, and may be exercised at any time after the first anniversary date of the restructuring transaction and before August 2, 2007. We have the right to repurchase the warrants upon 30 days prior notice, for \$0.01 per warrant share, at any time after the volume-weighted average market price of our common stock for any ten consecutive trading days equals or exceeds 150% of the exercise price. In accordance with the terms of the Exchange Agreement we have entered into in connection with the restructuring transaction, the exercise price of the warrants is \$5.96.

ITEM 1. BUSINESS

Introduction

We are a leading supplier of intelligent optical networking solutions for metropolitan and regional applications worldwide. Our solutions enable communication carriers and service providers to offer broadband networking services over optical fibers for metropolitan and regional applications. Our technologies permit telecommunications service providers to increase fiber capacity and fiber bandwidth utilization, reduce network costs and complexity over scalable and efficient networking platforms. Our optical networking systems support a wide variety of protocols, mixed speeds of traffic and accommodate changing traffic patterns directly over optical networks.

Our product solutions include optical transport, optical access, and network management solutions optimized for metro and regional markets, and combine to create powerful, cost-effective, and easy-to-manage optical networks. Our dense wavelength division multiplexing, or DWDM, and coarse wavelength division multiplexing, or CWDM, platforms can be used in both metropolitan and regional network applications. DWDM and CWDM technology allows many optical signals to be transmitted simultaneously on the same optical fiber by using different wavelengths of light to distinguish the signals. This technology increases optical network capacity and flexibility.

Our comprehensive suite of optical networking interfaces and optical access multiplexers allow us to also address broadband applications in the optical access market including data center fail-over recovery, storage area networking and internet connectivity applications. In addition,

2

our CWDM product is a lower cost, entry level solution that can be used for enterprise and carrier customer access that complements our DWDM product line. Multiplexing is a process that combines a number of lower speed data transmissions into one high-speed data transmission.

We also have two powerful network management solutions for our DWDM product line. Addressing all key management aspects - fault, configuration, performance, and security - these systems conform to North American and international standards and are simple to learn and use. We have a robust, carrier-class management system that offers broad functionality, including equipment/facilities management, fault management, performance monitoring, security control, alarm filtering, and remote download. We also have an enterprise network management solution that provides an intuitive graphical interface and covers operations, administration, maintenance, and provisioning functionality for our DWDM networks.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We currently have an installed base with over 20 communications service providers and system integrators worldwide, including AT&T Broadband, now Comcast Corporation, Deutsche Telekom, Cox Communications, United Pan-Europe Communications, El Paso Global Networks and Edison Carrier Solutions.

Understanding Our Market

Rapid Growth in Bandwidth Demand

Fueled by the growth of the Internet, the volume of data traffic transmitted across telecommunications networks now exceeds voice traffic. The growth of data traffic is attributable to increased Internet usage, increased access speeds and greater use of bandwidth intensive applications. Bandwidth means the capacity to move information down a communications channel. Bandwidth is defined by the highest data rates that can be transmitted by that channel and is commonly measured in bits per second. According to Ryan, Hankin & Kent, Industry Analysts, Internet traffic is projected to increase at a rate exceeding 40% per year for the next five years.

Migration of Network Infrastructure

Traditional copper-based and SONET/SDH based telecommunications infrastructures were originally designed for voice traffic. These infrastructures do not scale effectively to provide the bandwidth needed to support the growth in high-speed data traffic. In addition, these infrastructures need network-wide upgrades in order to accommodate growing traffic thus resulting in long delays for provisioning new services.

DWDM and CWDM technologies are more flexible, more efficient and more scalable networking alternatives for meeting the growing demand for bandwidth and new broadband services. Broadband means technologies or networks that have the ability to transmit high data rates. DWDM means dense wavelength division multiplexing, which is a sophisticated opto-electronics technology that uses multiple wavelengths of light very efficiently to greatly increase the number of video, data or voice channels of information that can be sent on a single optical fiber. SONET means a transmission protocol for high-speed transmission over fiber optic cable, which was introduced by Bell Communications in 1984 and quickly accepted by American National Standards Institute. SDH means Synchronous Digital Hierarchy, which is transmission protocol for high-speed transmission over fiber optic cable published in 1988 by the Consultative

Committee for International Telegraph and Telephony. It is a transmission protocol used outside the United States that is similar to SONET.

DWDM networks for long-haul applications were the first to be deployed, and optical solutions specifically designed to address the challenges faced by metropolitan markets have significantly lagged in deployment. Accordingly, metro networks are considered to be traffic bottlenecks in the fast and efficient transmission of data.

Enhanced Competition in the Service Provider Market

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Worldwide deregulation in the telecommunications industry has led to an increase in the number of service providers seeking to address the growing demand for bandwidth. In America and internationally, traditional service providers such as incumbent local exchange carriers (ILECs), inter-exchange carriers (IXCs) and post, telephone and telegraph companies (PTTs) are seeing new entrants in the broadband networking market seeking to capitalize on the growing demand for bandwidth. A number of competitors to these incumbents are building new data-centric networks to address the present bandwidth bottlenecks in the metropolitan markets, including utilities and cable television companies which are upgrading their current networks and are leveraging existing investments in fiber optic infrastructure to deliver high-speed data services in both the local and regional markets. This enhanced competition in the carrier and service provider markets is driving increased capital expenditures on network infrastructure that is focused on delivering scalable high-speed data services in a cost efficient manner.

Network Topography

The following describes each of the network segments within the optical network hierarchy:

- o Long-haul networks are high capacity networks that connect service providers and carry voice and data across large geographic regions, typically spanning distances up to 4,000 kilometers. Long-haul networks are relatively simple networks, built around SONET/SDH technology and are primarily designed only to satisfy service provider long haul network capacity requirements.
- o Metropolitan core (metro-core) networks connect the central offices of service providers in a metropolitan area and facilitate the transport and switching of traffic within extended metropolitan areas and between the network edge and long-haul networks. Metropolitan core networks are typically implemented in ring configurations and reach ring circumferences up to 300 kilometers. In order to efficiently use the optical network, sub-rate multiplexing devices aggregate traffic into wavelengths carrying higher speed aggregate bit rates across telecommunications networks. Regional networks typically transport voice and data traffic between cities across distances of 200 to 600 kilometers or more.
- o Access networks connect enterprises or traffic aggregation nodes, in multiple locations throughout metropolitan areas, to service providers' central offices or connect different end-user locations to each other. In order to efficiently use the optical network, optical access devices aggregate traffic from end users into wavelengths or wavelength bands for transport across telecommunications networks.

Because access networks must support the varying demands of end users, these networks tend to be very complex.

Metropolitan area optical network opportunity

Although optical technologies are being deployed in long-haul networks to

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

relieve capacity constraints, these solutions are not specifically designed to address the issues inherent in metropolitan and regional optical networks. Data is normally mapped into the voice multiplexing hierarchy for transport over the long-haul network. Metropolitan optical networks are characterized by varying traffic patterns and protocols as well as varied topologies and end-user requirements, making them more complex and difficult to manage than long haul networks. As a result, service providers have only recently begun to exploit the benefits of optical technologies in metropolitan optical networks.

The optical networking market saw a substantial downturn in 2002 from 2001 levels. The metro WDM market, which was expected to increase, has also experienced a slowdown as capital spending has declined throughout the telecommunications industry. While we believe that the metro WDM world-wide market will grow significantly in the years to come, such growth is not likely to occur until capital spending resumes in the markets we serve, and we are unable to assess at present when this might take place. According to industry analysts, including Ryan, Hankin and Kent and others, the metro WDM market in 2001 was about \$1.2 billion worldwide and is expected to grow to \$3.6 billion by 2005.

Regional optical network opportunity

In addition to the metropolitan market, recent engineering enhancements have permitted the use of DWDM networking platforms for regional optical networking applications. This development opens up the opportunity to address a portion of the substantial long haul market. In some regions, e.g., Europe, regional solutions apply to the majority of the networks installed. Industry researchers recently started looking at reclassifying the regional market opportunity, although statistical data for this market are not available.

Specific challenges facing metropolitan optical networks

Service providers face numerous specific challenges in addressing metropolitan and regional optical networks:

- o Scalability Limitations. Originally constructed for voice traffic, the current network infrastructure based on SONET/SDH technology does not allow for the network efficiencies necessary to address the shift to a predominantly data-driven network. Due to its inherent lack of scalability, the current network infrastructure may require service providers to undertake the expensive and tedious process of replacing network equipment or adding new layers of similar equipment in response to changes or increases in bandwidth demand. Alternative approaches to WDM are being developed by other vendors to address the scalability of the SONET/SDH networks. These nonstandard solutions are called next generation SONET/SDH and can minimize the wasted bandwidth of legacy SONET/SDH. While these solutions allow carriers to combine voice and data on the same network, such solutions do not, however, expand the amount of bandwidth available and are, therefore, unable to accommodate the need for large amounts of bandwidth.

- o Need to Support Multiple Protocols. Metropolitan optical networks are characterized by a wide variety of protocols. The inability to support

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

multiple protocols and services from a single platform further increases the cost and complexity of the metropolitan networks. Alternative approaches to WDM are being developed by other vendors to address the requirement for support of multiple services. These nonstandard solutions are called multi-service provisioning platforms. These solutions generally carry out protocol conversions and are much more complex than WDM solutions.

- o Market Downturn. Virtually all telecom related market segments have suffered a decline in demand in the current economic downturn. What was once viewed as only a long-haul decline in market demand has now affected the regional and metropolitan networks as both enterprise and carrier business have cut back capital spending. Although we expect that demand in the regional and metropolitan markets will be strong in future periods, there are no assurances that capital spending will resume within this sector in the near term.
- o Several Stages of Conversion. Present solutions require several conversions to transport data through a metropolitan network. In the access networks, aggregation of traffic often requires protocol conversions into a common protocol before optical transmission. In the central office, data is often demultiplexed and converted into electrical signals for regeneration, switching or further aggregation into higher capacity links and then reconverted into optical signals for transmission in the metro-core network.
- o Inefficient Bandwidth Utilization. Within metropolitan optical networks, service providers must cater to end-users with varying access speeds. Current optical access solutions do not make efficient use of scarce wavelength resources. Service providers must assign a full wavelength to each signal, whether or not the end-user requires the full bandwidth potential of each wavelength.
- o Difficulty of Network Management. Multiple protocols and services, coupled with the lack of standards that exist in metropolitan optical networks, make network management functions, such as performance monitoring and configuration, exceedingly difficult. Lack of a robust network management platform further adds to the cost and complexity of metropolitan optical networks.
- o Need for New, Enhanced Service Offerings to Generate New Revenue Opportunities. Service providers are searching for next-generation solutions that will enable them to generate additional sources of revenue from offering new or enhanced services to their customers. Current solutions typically require the service provider to deploy equipment that is specifically designed for a particular service and transmission rate. Next-generation solutions must be able to offer enhanced features, wavelength provisioning and bandwidth-on-demand, that end-users will increasingly request from service providers.

Our Solutions

Our solutions feature products designed to specifically address the shortcomings of legacy SONET/SDH networks and to facilitate offering new services throughout metropolitan and regional optical networks. We enable our customers to meet the rapidly growing demand for

bandwidth by offering end-to-end metropolitan and regional optical networking solutions for the aggregation, transport and management of traffic. Our current products, including our GigaMuxTM DWDM transport system, our EPCTM sub-rate multiplexing modules, our JumpStartTM CWDM transport system, as well as the network management product line that includes GigaView, TeraManagerTM and TeraConfiguratorTM, are specifically designed to meet the unique requirements of the metropolitan and regional markets.

Our optical networking solutions offer numerous benefits including:

- o Cost Effective Entry-Level Access Solution. Our Jumpstart CWDM platform allows low cost multiplexing of up to four wavelengths carrying a mix of protocols and signals for access applications. CWDM means coarse wavelength division multiplexing, which is a sophisticated opto-electronics technology that uses multiple wavelengths of light to increase the number of video, data or voice channels of information that can be sent on a single optical fiber.
- o Scalable Architecture. We have created an optical networking solution that simultaneously transmits voice, data, and video over optimized fiber channels. The modular architecture of our solution enables service providers to incrementally expand capacity as their bandwidth needs increase. This simple, scalable, and functional solution solves short and long-term service provider problems, which enhances their ability to reduce costs and offer value-added services. For example, a service provider can begin deployment with a single channel and later expand up to 64 channels, providing up to 640 gigabits per second, or Gbps, of transmission capacity without interrupting existing traffic. A fiber channel is a serial data transfer architecture standard conceived for new mass storage devices and other peripheral devices that require very high bandwidth connections. Bit rates for fiber channels are either 1.06 Gbps or 2.1 Gbps.
- o Protocol and Signal Transparency. Our suite of solutions transports a mix of protocols and signals, including SONET/SDH, Asynchronous Transfer Mode (ATM) over SONET, Internet Protocol (IP) over SONET, Gigabit Ethernet, Fibre Channel and Enterprise System Connectivity in their native formats over numerous wavelengths in the same fiber. This transparency provides operational simplicity in that the service provider can offer networking connectivity without having to worry about protocol conversions. This is particularly important in metropolitan areas where multiple protocols are utilized and data transmission rates change often. The transparency of our solution eliminates the unnecessary conversions from optical to electrical and back to optical, as well as eliminates several layers of equipment that would otherwise be required in the transport and switching of traffic, thus reducing network complexity and signal latency.
- o Protocol Aggregation. Our EPCTM optical access multiplexer aggregates traffic, of varied rates utilizing a wavelength per direction of transmission, from businesses and network points of presence for transport throughout optical networks. This aggregation allows better utilization of wavelengths and lowers capital expenditures of telecom service providers by reducing investments in excess network capacity.
- o Manageability. The design of our end-to-end optical networking solution will allow service providers to perform network management

from a single platform with our

7

TeraManagerTM product. This intelligent optical network element management software platform provides fault, configuration, performance, and security management utilizing an easy-to-use graphical user interface that allows point and click network provisioning and monitoring.

- o Regional optical transport. Our solution permits service providers to expand beyond the confines of metropolitan networks using the same platform for metropolitan and regional applications. Regional networks can now be built using the lower cost solutions developed for the metropolitan environment

Our Strategy

Our objective is to become a leading supplier of intelligent optical networking solutions for metro and regional applications worldwide. The key elements of our strategy are to:

- o Enhance and complete our metropolitan/regional optical networking solutions

We intend to continue to enhance our existing family of metropolitan and regional optical networking products and to introduce new products that increase the functionality of our end-to-end optical solution. We introduced TeraManagerTM and TeraConfiguratorTM in our management solution portfolio in fiscal 2003. We also introduced JumpStartTM, our CWDM solution, in fiscal year 2002. The combination of our GigaMux^r optical transport products, with the EPCTM sub-rate multiplexer, the JumpStartTM CWDM, and TeraManagerTM, our carrier class network management product, creates an intelligent all-optical transport solution.

- o Leverage our engineering leadership

We intend to leverage our engineering expertise in the areas of optical, mechanical, electrical and network management design to continue to provide leading end-to-end metropolitan and regional optical networking systems and to expand our market share. We believe we were the first company to commercially ship a metropolitan optical networking product using DWDM technology. As of January 31, 2003, we had a skilled team of 29 engineers that continually focus on developing products for the metropolitan and regional optical transport market. We believe that our technological leadership has been the key to our success and will enable us to rapidly develop new product offerings and end-to-end optical solutions for the metropolitan and regional markets.

- o Allow our customers to leverage their fiber assets by offering revenue-generating services

The majority of our existing customers and targeted customers have a large amount of fiber assets in the metropolitan and regional network infrastructure. We intend to continue to develop and provide solutions that will enable our customers to leverage their existing fiber infrastructure to deliver

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

revenue-generating services, while reducing their overall network costs. In addition, we believe our existing customer base provides us with an advantage when competing for new customers. We intend to continue to work closely with our customers and invest in sales and marketing resources to maintain our high level of customer service and remain responsive to our customers' changing needs.

8

- o Continue our aggressive pursuit of expense reduction initiatives

We plan to continue to aggressively pursue cost reduction initiatives to control our expenses in line with current and future anticipated revenues. Such reductions may affect the size of our workforce, and may require decreasing our operating expenses and capital spending. During the past two fiscal years we have concentrated on implementing initiatives that have lowered our operating costs and anticipate the need for continued cost reductions if sales volume does not increase in the near future.

- o Maintain our sales, service and support organizations worldwide

We intend to continue to market our products worldwide. We currently have sales, service and support teams in North America, Europe and Asia. We believe that sales, service and support efforts on a customer-by-customer basis are most effective due to the technical evaluation and significant investments that are made by our customers.

Products

Our family of optical networking systems is designed to provide our customers with end-to-end solutions for the metropolitan and regional optical networking markets. Our transport, access, switching and network management systems include the following products, some of which are still in development:

GigaMux'r'--DWDM Optical Transport

Our GigaMux'r' optical transport product uses DWDM technology to expand the capacity of new and existing fibers and enable traffic to travel throughout metropolitan optical networks without optical to electrical to optical conversions at each intermediate node. GigaMux'r' features wavelength translation, wavelength multiplexing, optical amplification, optical add-drop multiplexing, protection switching and performance monitoring. The scalable and modular architecture of our GigaMux'r' product enables service providers to easily and cost effectively expand their existing networks as bandwidth requirements increase. GigaMux'r' can simultaneously transport multiple protocols bi-directionally over one or more fibers, which reduces the cost and complexity of the network.

Our GigaMux'r' product is Network Equipment Building Standards, or NEBS, level III certified. As of January 31, 2003, we had shipped our GigaMux'r' product to over 20 direct carrier customers or resellers worldwide. Our GigaMux'r' product includes the following key features:

- o Scalability: the system can grow from 1 to 64 protected channels (640 Gbps/fiber) without a major upgrade or service interruption.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

- o Protocol transparency: the system can aggregate and transport SONET/SDH (OC-3/STM-1 through OC-192/STM-64 carrying voice, IP or ATM traffic), ESCON, Fibre Channel, Fast Ethernet, Gigabit Ethernet and video.
- o Modular protection: the system's modular protection system allows redundancy to be implemented at any point in the network.

9

- o Add/drop channels: the system is equipped with add/drop modules that allow specific channels to be added or dropped while all other channels pass through. Our filter subsystem can add or drop from single channels to larger wavelength bands.
- o Reach: Up to 600 kilometers with optical amplifiers and up to 1,000 km with the addition of dispersion compensation.

EPC'TM'--Sub-Rate Access Multiplexer

Electric Photonic Concentrator, or EPC'TM', is our sub-rate access multiplexer product that aggregates a wide variety of traffic from businesses and network points of presence for high-speed transport throughout optical networks. The traffic is aggregated and effectively shares a wavelength per direction of transmission and can be ported directly into the DWDM stage of our GigaMux'r'. EPC'TM' is designed to lower the cost and increase the efficiency of bandwidth delivery within optical networks.

Our EPC'TM' products include the following key features:

- o Support for asynchronous or synchronous (SONET/SDH) time division multiplexing of data
- o Provisionable bit rates and protocol and overhead transparency

JumpStart'TM'--CWDM Transport

JumpStart is our entry level solution for multiplexing up to 4 bi-directional data channels using coarse wavelength division multiplexing technology on a single fiber. The product is very compact and can be stacked to provide additional capacity -- 4 channels per fiber.

TeraManager'TM'--Element Management System

TeraManager'TM' is our TLI-based intelligent element management software platform that provides fault, configuration, performance and security management for all our products and for networks built with such products. Service providers can operate our network management platform through an easy-to-use graphical user interface, which gives users a complete network view and enables point and click provisioning and monitoring.

Our TeraManager'TM' product includes the following features:

- o Fault, configuration, security and performance management

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

- o Carrier class performance
- o Interface with higher layer operation support systems

Customers

Our target customer base includes wholesale and retail broadband service providers, such as inter-exchange carriers, local and foreign telephone companies, the telecom affiliates of utility companies (utilicom), cable television service providers, system integrators and distributors.

Our customers generally fit the following customer profiles:

10

- o Wholesale Network Providers--these customers provide wavelength and broadband services to communication service providers and include telecommunication carriers, cable companies and utilicom.
- o Managed Services Providers--these customers provide wavelength and broadband services to enterprises and include telecommunication carriers, cable companies, utilicom and Internet Service Providers.
- o System Integrators--companies that specialize in providing turn key networking solutions for enterprise networks and applications such as data-center connectivity and storage area networks.
- o Major Enterprises--major enterprise customers are generally large organizations with complex networking needs, usually spanning multiple locations and difficult types of network requirements. Enterprise customers include industrial corporations, government agencies, and utilities.
- o Small and Medium Businesses--these customers have a need for networks as well as connection to the Internet and/or to their business partners. However, they generally have limited resources. Therefore, we provide product through systems integrators or Value Added Resellers.

During fiscal 2003, the majority of our sales were to relatively few customers, and we expect this customer concentration to continue for the foreseeable future. For fiscal 2003, we shipped our optical networking products to a total of 23 customers worldwide. Three customers, AT&T Broadband Network Solutions (now Comcast Business Communications), Cox Communications and Deutsche Telekom each represented more than 10% of our net sales for fiscal 2003 and for fiscal 2002.

Key Relationships

We have entered into long-term agreements with some of our customers and strategic allies, including:

AT&T Broadband Network Solutions (Now Comcast Business Communications)

In February 2000, we entered into a strategic alliance agreement with AT&T

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Broadband Network Solutions (now Comcast Business Communications or AT&T Broadband). Under the terms of this agreement, we and AT&T Broadband agreed to negotiate in good faith concerning the implementation of a number of joint sales and marketing initiatives. AT&T Broadband also agreed to help introduce our technology to individuals at other AT&T divisions and to provide feedback concerning our products' performance. The initial term of this agreement expired in February 2002 and was automatically renewed for an additional one-year term in February 2002 and in February 2003. Similar automatic renewals will occur in each succeeding February unless we or AT&T Broadband terminate the agreement for any reason upon ninety days notice. In addition, we concurrently entered into an equipment purchase agreement. The equipment purchase agreement expired in February 2002 and was automatically renewed for an additional one-year term in February 2002 and in February 2003. Similar automatic renewals will occur in each succeeding February unless we or AT&T Broadband terminate the agreement for any reason upon ninety days notice. We started shipping our products to AT&T Broadband in the second quarter of fiscal year 2001.

11

In November 2002, we entered into a separate exclusive supplier agreement with AT&T Broadband. Under this agreement, we become AT&T Broadband's exclusive supplier, subject to certain exceptions, of dense and course wavelength division multiplexing equipment that AT&T Broadband uses to provide UFO Communications, Inc., a private service provider, with certain services on certain AT&T Broadband networks. The initial term of this agreement is five years and continues after the initial term until either party gives 90 days written notice terminating the agreement.

UFO Communications, Inc.

In November 2002, we entered into an exclusive supplier agreement with UFO Communications, Inc., or UFO. Under this agreement, we become UFO's exclusive supplier of dense and course wavelength division multiplexing equipment, subject to certain exceptions, for networks owned, leased or operated by UFO. The initial term of this agreement is five years and can be renewed at any time by the written agreement of both parties for additional terms of one year or longer.

Looking Glass Networks

In August 2001, we entered into an equipment purchase agreement with Looking Glass Networks, or LGN. Under the terms of this agreement, LGN agreed to purchase metro DWDM optical networking equipment from us as its primary supplier. LGN also agreed to receive early adopter access to our new and emerging technologies, to serve as a beta tester for new and emerging equipment and to provide feedback concerning our products' performance. The initial term of this agreement expires in August 2004 and will be automatically renewed for additional one-year terms unless LGN or we terminate the agreement at the end of the initial or any renewal term upon ninety days notice. We started shipping our products to LGN in the third quarter of fiscal year 2002.

Sales and Marketing

Our sales effort is currently focused on North America, Europe and Asia. As of January 31, 2003, our sales and marketing organization included 39 employees,

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

including account managers, sales engineers, support personnel, product managers and marketing personnel. In North America, Europe and Asia, we sell our products through our direct sales force as well as through system integrators. Our international direct sales force is located in the United Kingdom, France, Belgium, Germany, Singapore and China.

In support of our worldwide selling efforts, our marketing team targets potential customers through in-depth market analysis. Our marketing objectives include building market awareness and acceptance of our products as well as expanding our customer base. Our customer acquisition strategy has focused on targeting customers who are aggressively building network infrastructure and are looking to leverage existing fiber assets to generate additional revenue from broadband services. This focus has led to strategic supply agreements with several multiple service operators, utilities, and to a lesser extent competitive local exchange carriers. We also plan to target incumbent carriers as they expand the development of their metropolitan and regional fiber networks. Marketing personnel coordinate our participation in trade shows, seminars and industry events and conduct media relation's activities with trade and general

12

business publications. We participate in many industry organizations responsible for developing standards that are used in optical networks.

Customer Service and Support

Our customer service and support team are a critical component of our customer satisfaction initiative. This team provides support to our customers allowing them to successfully design and implement their optical networks. All services can be customized to meet the needs our customers. Our staff is experienced, and has the equipment necessary to support both installation and problem resolution. A variety of installation service packages supports the implementation from start-up to upgrades and maintenance. Specialists are available 7 days a week, 24 hours a day. We offer a Technical Assistance Center as well as field services support. Multiple technical support service agreements allow our customers to define the level of support they require. Our customer service and support team provides installation, maintenance and training programs addressing the product, installation and maintenance processes and can be delivered at the customer location or at our training facility.

We currently provide service and support to our international customers on a direct basis and are establishing service and support agreements throughout the world. To date revenues from service and support agreements have not been material. We intend to continue to develop our internal team to meet the needs of our customers and will utilize strategic partners to allow us to provide greater value when appropriate.

We provide a total service solution. Our hardware products are warranted against defects for a period of 12 to 36 months dependent on purchase agreements, including technical support and parts repair/replacement. We also offer support contracts for a fee to our customer base, thereby allowing our customers to select a service plan tailored to their own particular needs.

Engineering, Research and Development

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We have assembled a team of highly skilled engineers with extensive experience in the fields of optical, mechanical, electrical and network management design. We believe that our success in introducing DWDM optical technology for use in the metropolitan and regional markets was a result of our strength in research and development. As of January 31, 2003, 29 employees were engaged in engineering, research and development efforts. Our research and development efforts are focused on new product development as well as enhancing performance and reliability of our existing products. We believe that our research and development efforts are key in maintaining technical competitiveness, delivering innovative products, and addressing the needs of the regional and metropolitan market.

Our engineering, research and development expenses were \$9.0 million, \$13.7 million and \$23.9 million for the years ended January 31, 2003, 2002 and 2001, respectively. The decrease in our engineering, research and development expenses was primarily due to headcount reduction and product rationalizations under our cost reduction program.

Manufacturing and Quality

We outsource the manufacturing of our products. We design our products and perform system integration, quality control, final testing and configuration at our San Diego, California location. Our San Diego facility is ISO-9002 certified and we have begun the process of

13

becoming ISO9000/2000. By meeting such standards, we assure our customers that we meet internationally recognized standards for quality, customer care and sound management practices. We believe that outsourcing our manufacturing allows us to conserve working capital, flexibly respond to changes in market demand and more quickly deliver products to our customers.

We currently purchase products from our contract manufacturers and other suppliers on a purchase order basis. We generally do not enter long-term contracts with our contract manufacturers or suppliers, and they are not obligated to perform services for us for any specific period or at any specified price, except as may be provided in a particular purchase order. We purchase a limited number of key components used in the manufacturing of our products from a limited number of suppliers and some of our components are purchased exclusively from a single supplier on a purchase order basis.

Patent, Trademarks and Licenses

We currently hold approximately 36 patents and have several patent applications pending. Although we attempt to protect our intellectual property rights through patents, trademarks, and copyrights, maintaining certain technology as trade secrets and other measures, we cannot assure readers that any patent, trademark, copyright or other intellectual property rights owned by us will not be invalidated, circumvented or challenged, that such intellectual property rights will provide competitive advantages to us or that any of our pending or future patent applications will be issued with the scope of the claims sought by us, if at all. We cannot assure readers that others will not develop technologies that are similar or superior to our technology, duplicate

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

our technology or design around the patents that we own. In addition, effective patent, copyright and trade secret protection may be unavailable or limited in certain foreign countries in which we do business or intend to do business in the future. We also have licensed and may in the future license technologies from other companies on a non-exclusive basis. For example, our CWDM product incorporates technology purchased from Entrada Networks, Inc., our former affiliate, which we then enhanced to complete a commercially feasible product.

We believe that the future success of our business will depend on our ability to translate the technological expertise and innovation of our personnel into new and enhanced products. We cannot assure readers that the steps taken by us will prevent misappropriation of our technology. In the future, we may take legal action to enforce our patents and other intellectual property rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of others, or to defend against claims of infringement or invalidity. Such litigation could result in substantial costs and diversion of resources and could harm our business and operating results.

As is common in our industry, we have from time to time received notification from other companies of intellectual property rights held by those companies upon which our products may infringe. Any claim or litigation, with or without merit, could be costly, time consuming and could result in a diversion of management's attention, which could harm our business. If we were found to be infringing on the intellectual property rights of any third party, we could be subject to liabilities for such infringement, which could be material, and could be required to seek licenses from other companies or to refrain from using, manufacturing or selling certain products or using certain processes. Although holders of patents and other intellectual property rights often offer licenses to their patent or other intellectual property rights, no assurance can be given that licenses would be offered, that the terms of any offered license would be acceptable to us or that failure to obtain a license would not cause our operating results to suffer.

Working Capital Practices

We have historically maintained high levels of inventories to meet output requirements of our customers and to ensure an uninterrupted flow of inputs from suppliers. It is not our standard policy to grant customers the right to return merchandise that performs according to specifications. Typical payment terms require payment within thirty to sixty days from the date of shipment.

We perform ongoing credit evaluations of each customer's financial condition and extend unsecured credit related to the sales of various products. From time to time we receive financial instruments such as letters of credit for payments for international customers. At January 31, 2003, accounts receivable due from AT&T Broadband, Cox Communications, DeltaNet and iNOC accounted for 31%, 16%, 19% and 30% respectively, of net receivables.

Our Backlog

At January 31, 2003, we had backlog that totaled over \$5.0 million compared to slightly over \$200,000 at January 31, 2002. Our backlog consists of orders confirmed with a purchase order for products to be shipped within twelve months

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

to customers with approved credit status. We do not believe that backlog, as of any particular date, should be used as an indication of sales for any future period for two reasons. First, orders are increasingly being booked and shipped in a short period of time and therefore may never be calculated in the backlog amount at the end of any particular quarter. Second, customers have and can change delivery schedules or cancel orders without a significant penalty.

Competition

The market for optical networking equipment is extremely competitive and subject to rapid technological change. We expect competition to continue to be significant in the future. Our primary competitors in the DWDM market include vendors of optical networking and infrastructure equipment such as Nortel Networks, CIENA Corporation, Cisco Systems, and Lucent Technologies, as well as private companies that have been or will be focusing on our target markets. Our primary competitors for our CWDM products include Adva AG Optical Networking, and CIENA Corporation. Many of our competitors have significantly greater financial resources and are able to devote those greater resources to the development, promotion, sales and support of their products. In addition, many of our competitors have more extensive customer relationships than we do, including relationships with our potential customers. We believe each of our competitors has optical networking products in various stages of development.

We believe the principal competitive factors in the optical networking market are:

- o product performance, features, functionality and reliability;
- o price/performance characteristics;
- o timeliness of new product introductions;
- o relationships with existing customers;
- o service, support and financing; and
- o financial stability and strength of company.

15

We believe our products compete favorably with our competition within our marketplace.

The competitors for the legacy products of our subsidiary, Meret Optical Communications, include Pesa, Artel, RGB Spectrum, Utah Scientific, and many other companies.

Increased competition may result in further price reductions, reduced gross margins and loss of market share, any of which could materially and adversely affect our business, operating results and financial condition. There can be no assurance that we will be able to compete successfully against current and future competitors, or that competitive factors will not have a material adverse effect on our business, operating results and financial condition.

Environmental Compliance

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We are required to file environmental compliance reports with the Federal Food and Drug Administration regarding the emissions levels of our laser-based products, which are used in fiber optics communications. All of our products comply with required safety level standards.

Employees

As of January 31, 2003, we had 115 employees, 29 of whom were in engineering, research and development, 39 in sales and marketing, and the remainder in manufacturing and in general and administrative functions. Of the 29 employees in research and development, 15 have masters degrees and 11 have doctorate degrees. We also employ a number of part-time and temporary personnel from time to time in various departments. Our future success will depend in part on our ability to attract, retain and motivate highly qualified technical and management personnel, for whom competition is intense. None of our employees is covered by a collective bargaining agreement and we believe that our relations with our employees are good.

Forward-Looking Statements--Cautionary Statement

All statements other than statements of historical fact contained in this registration statement on Form 10, in our future filings with the Securities and Exchange Commission, in our press releases and in our oral statements made with the approval of an authorized executive officer are forward-looking statements. Words such as "propose," "anticipate," "believe," "estimate," "expect," "intend," "may," "should", "could," "will" and similar expressions are intended to identify such forward-looking statements. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Although we believe that our expectations reflected in these forward-looking statements are based on reasonable assumptions, such statements involve risk and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Important factors that could cause actual results to differ materially from those forward-looking statements include without limitation: our ability to consummate our proposed capital restructuring; our ability successfully to finance our current and future needs for working capital; our ability to keep our common stock listed on the Nasdaq Stock Market; our ability to successfully develop, sell and market our optical networking and other products; our expectations concerning factors affecting the markets for our products, such as demand for increased bandwidth; the scope and duration of the economic slowdown currently being experienced by many of our existing and prospective customers; our ability to compete successfully with companies who are much larger than we are and who have much greater financial resources at their disposal; our ability, or failure, to complete strategic alliances and

strategic opportunities such as sales or spin-offs of subsidiaries or business units on terms favorable to us for reasons either within or outside our control; changed market conditions, new business opportunities or other factors that might affect our decisions as to the best interest of our shareholders; and other risks detailed from time to time in our reports filed with the Securities and Exchange Commission.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We wish to caution readers not to place undue reliance on any such forward-looking statements, which speak only as of the date made. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. These risks and uncertainties are described in the following section. We specifically decline any obligation to publicly release the result of any revisions which may be made to any forward-looking statements to reflect anticipated or unanticipated events or circumstances occurring after the date of such statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements.

Item 2. Financial Information

(a) Selected Financial Data.

The following table sets forth selected consolidated financial data with respect to our five most recent fiscal years ended January 31. The selected consolidated statement of operations data set forth below for each of our three most recent fiscal years, and the selected consolidated balance sheet data set forth at January 31, 2003 and 2002, together with the selected consolidated statement of operations data set forth below for each of the two fiscal years ended January 31, 2000 and 1999, and the consolidated balance sheet data set forth below at January 31, 2001, 2000 and 1999 are derived from our audited consolidated financial statements, which have been audited by BDO Seidman, LLP, independent certified public accountants. The selected consolidated financial data should be read in conjunction with our consolidated financial statements, and the notes thereto including Note A which discusses our significant acquisitions, dispositions and discontinued operations, included elsewhere in this Form 10, and "Management's Discussion and Analysis of Financial Condition and Results of Operations" below.

17

	Fiscal Year Ended January 31,			
	2003	2002	2001	2000

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

The Consolidated Statement of Operations and Balance Sheet data shown above include financial results from the following subsidiaries which have since been disposed of:

(a) Entrada Networks, Inc. is reflected through August 31, 2001.

(b) NETsilicon is reflected through September 14, 1999.

(b) Management's Discussion and Analysis of Financial Condition and Results of Operations

The results of operations reflect our activities and our wholly-owned subsidiaries; this consolidated group is referred to individually and collectively as "We" and "Our".

Overview

Beginning in fiscal 2002, the global telecommunications market deteriorated, reflecting a significant reduction in capital spending by established service providers. This trend intensified during fiscal 2003. Reasons for this reduction include the general economic slowdown, network overcapacity, customer bankruptcies, network build-out delays and limited capital availability. As a result, our sales and results of operations have been and may continue to be adversely affected. The significant slowdown in capital spending has created uncertainty as to the level of demand in our target markets. In addition, the level of demand can change quickly and can vary over short periods of time. As a result of the uncertainty and variations in our markets, accurately forecasting future results, earnings and cash flow is increasingly difficult.

As discussed in more detail throughout our management's discussion and analysis:

- o Our consolidated results of operations during the past two years were adversely affected by the rapid and sustained deterioration of the telecommunications market.

18

After several years of significant growth, our revenues declined during fiscal 2003 and 2002 by 38% and 8.5% respectively, as compared to the respective prior year. The significant reduction in capital spending by service providers, among other factors, contributed to this decline;

- o Our gross margin rates, which historically had been at least 40%, declined to 13% and 23% during fiscal 2003 and 2002, respectively. The significant and rapid decline in revenue from decreased market demand led to significant inventory charges and high-unabsorbed fixed cost, which, among other factors, adversely affected our gross margin rates;
- o We were able to reduce our operating expenses during fiscal 2003 and 2002 by 25% and 27%, respectively as a result of a cost reduction plan

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

implemented. The reduction in operating expenses for fiscal 2003 were partially off-set by legal and professional fees of \$2.8 million associated with our capital restructuring plan;

- o We recorded significant provisions for bad debts of \$1.5 million and \$1.6 million during fiscal 2003 and 2002, respectively, as a result of the significant deterioration of the financial health or bankruptcy of certain customers.

These factors contributed significantly to our loss from continuing operations of \$31.3 million and \$37.1 million for fiscal 2003 and 2002, respectively.

During this prolonged market downturn, we have worked closely with our customers to position the full breadth of our products and services and significantly reduced our cost structure. If capital investment levels continue to decline, or if the telecommunications market does not improve or improves at a slower pace than we anticipate, our revenues and profitability will continue to be adversely affected. However, we believe our results could improve by realizing higher gross margin rates and lower operating expenses resulting from improved product mix, cost reductions relating to our capital restructuring plan and reduced operating expenses, lower inventory-related charges and lower provisions for bad debts.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to our valuation of inventory and our allowance for uncollectable accounts receivable. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements:

- o Revenue recognition. Revenue is generally recognized when the products are shipped, all substantial contractual obligations, if any, have been satisfied, and the collections

of the resulting receivable is reasonably assured. When title does not pass to the customer at time of shipment, revenue is not recognized until all contractual requirements are met and title has transferred. During this transition period, the amount of the sale

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

and/or installation is shown in deferred revenue. Revenue from installation is recognized as the services are performed to the extent of the direct costs incurred. To date, installation revenue has not been material. Revenue from service obligations, if any, is deferred and recognized over the life of the contract. Inventory or demonstration equipment shipped to potential customers for field trials is not recorded as revenue. We accrue for warranty costs, sales returns and other allowances at the time of shipment. Although our products contain a software component, the software is not sold separately and we are not contractually obligated to provide software upgrades to our customers.

- o Inventory. Inventory is evaluated on a continual basis and management must make estimates about the future customer demand for our products, taking into account both the economic conditions and growth potential of our customers. Reserve adjustments are made based on management's estimate of future sales value, if any, of specific inventory items. Reserve adjustments are made for the difference between the cost of the inventory and the estimated market value and charged to operations in the period in which the facts that give rise to the adjustments become known. A misinterpretation or misunderstanding of these conditions or uncertainty in the future outlook of our industry or the economy, or the failure to estimate correctly, could result in inventory losses in excess of the provisions determined to be appropriate at the time of the balance sheet.
- o Accounts receivable. Accounts receivable balances are evaluated on a continual basis and management regularly reviews the financial stability of individual customers. This analysis involves a judgment of the customers current and projected financial condition and the positive or negative effects of the current and projected industry outlook, as well as that of the economy in general. Allowances are provided for potentially uncollectable accounts based on management's estimate of the collectability and the probability of default of customer accounts. If the financial condition of a customer were to deteriorate, resulting in an impairment of their ability to make payments, an additional allowance may be required. Allowance adjustments are charged to operations in the period in which the facts that give rise to the adjustments become known.
- o Intangible assets. We currently have intangible assets that include assets with finite lives, such as our purchased technology. The determination of related estimated useful lives and whether these assets are impaired involves judgments based upon short and long-term projections of future performance. We have no goodwill or indefinite life intangible assets. Other intangible assets with finite lives continue to be amortized over their useful lives.
- o Legal contingencies. We are subject to proceedings, lawsuits and other claims, including proceedings under laws and government regulations related to securities, environmental, labor, product and other matters. We are required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. A determination of the amount of reserves required, if any, for the contingencies is based on a careful analysis of each individual issue with the assistance of outside legal counsel. Our reserves may change in the future due to new developments in each matter or changes in approach such as a change in settlement

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

strategy in dealing with these matters. For more information, see Note H to the consolidated financial statements.

- o Income taxes. We currently have no provisions for income taxes. We have carry-forward domestic federal net operating losses, which may be available, in part, to reduce future taxable income in the United States. However, due to potential adjustments to the net operating loss carry-forwards as provided by the Internal Revenue Code with respect to future ownership changes, future availability of the tax benefits is not assured. In addition, we provided a valuation allowance in full for our deferred tax assets, as it is our opinion that it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Entrada Networks

On August 31, 2000, we completed a merger of our then subsidiary Entrada Networks with Sync Research, Inc. ("Sync"), a NASDAQ listed company. We received 4,244,155 shares of the merged entity, which changed its name to Entrada Networks, Inc. We purchased 93,900 shares of Sync in the open market during June and July 2000 for \$388,000 and on August 31, 2000 purchased an additional 1,001,818 shares directly from Entrada for \$3.3 million. After these transactions and Entrada's issuance of additional shares to outside investors in connection with the merger we owned 49% of Entrada. Accordingly, our financial statements reflected the results of operations of Entrada through August 31, 2000.

Results of Operations: Comparison of the Years Ended January 31, 2003 and January 31, 2002

Net sales. Our consolidated net sales decreased \$15.7 million or 38% to \$25.1 million for fiscal 2003 when compared to net sales of \$40.8 million for fiscal 2002. Net sales for Sorrento Networks, Inc., our primary operating subsidiary, decreased \$13.6 million or 38% to \$22.4 million for fiscal 2003 as compared to net sales of \$36.0 million in fiscal 2002. Net sales for our Meret Optical subsidiary decreased \$1.7 million or 35% in fiscal 2003 to \$3.1 million of which \$296 thousand was intercompany sales as compared to net sales of \$4.8 million in fiscal year 2002.

Gross profit. Cost of sales consists principally of the costs of components, subcontract assembly from outside manufacturers, and in-house system integration, quality control, final testing and configuration costs. Gross margin percent on a consolidated basis decreased to 13% for fiscal 2003 from 23% in fiscal 2002. Consolidated gross profit was \$3.3 million, a decrease of 65% for fiscal 2003 from \$9.3 million for fiscal 2002. Gross margin percent and gross profit were impacted negatively by increases in inventory reserves and sales that were made at lower gross profit margins than the prior year. Gross profit for our Sorrento Networks, Inc. subsidiary decreased to \$3.1 million in fiscal 2003, as compared to \$7.7 million in fiscal 2002, a decrease of 60%. An increase in our inventory reserves taken in the second quarter, accounted for \$3.0 million of the decrease in gross profit for SNI. The gross profit of our Meret Optical subsidiary declined to \$204 thousand in fiscal 2003, as compared to \$1.7 million in fiscal 2002, a decrease of 88%. This decline was primarily the result of an increase in our inventory reserve of \$1.0 million, taken in the second quarter and a decrease in revenue volume.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Selling and marketing. Selling and marketing expenses consist primarily of employee compensation and related costs, commissions to sales representatives, tradeshow expenses and

21

travel expenses. Our consolidated selling and marketing expenses decreased to \$12.0 million, or 48% of net sales, for fiscal 2003 from \$16.2 million, or 40% or net sales for fiscal 2002. The decline was primarily the result of cost reduction efforts implemented, a reduction in both our U.S. and foreign sales offices and lower revenue volume for the year.

Engineering, research and development. Engineering, research and development expenses consist primarily of compensation related costs for engineering personnel, facilities costs, and materials used in the design, development and support of our technologies. All research and development costs are expensed as incurred. We continue to manage our research and development costs in relation to the changes in our sales volume and available capital resources in our development efforts to enhance existing products and introduce new products to our product offering. Our consolidated engineering, research and development expenses decreased to \$9.0 million, or 36% of net sales, for fiscal 2003 from \$13.7 million, or 34% of net sales, for fiscal 2002. The decrease can primarily be attributed to decreases in product development material and personnel related costs.

General and administrative. General and administrative expenses consist primarily of employee compensation and related costs, legal and accounting fees, public company costs, and allocable occupancy costs. Consolidated general and administrative expenses remained consistent at \$12.8 million, or 51% of net sales, for fiscal 2003 compared to 31% of net sales, for fiscal 2002. The increase in general and administrative expenses as a percentage of net sales can be attributed to an increase in professional fees associated with the capital restructuring partially offset by a decrease in personnel related costs.

Other operating expenses. Other operating expenses for both fiscal 2003 and 2002 included approximately \$400 thousand of amortization of purchased technology related to acquisitions included in Meret. During the fiscal year ended January 31, 2002, we recorded a \$2.7 million valuation allowance against option receivables from our former CEO and Chairman.

Other income (expenses). Other income (expenses) from continuing operations increased to \$5.1 million in income for fiscal 2003 from \$6.0 million in expense for fiscal 2002. Investment income increased by \$1.6 million during the fiscal year ended January 31, 2003 from the comparable period last year due to increased investments of our cash surplus in short-term investments. The increase of \$6.3 million in interest expense for the fiscal year ended January 31, 2003 from the prior fiscal year is primarily due to the interest incurred on our convertible debentures and an adjustment relating to the amortization of both the beneficial conversion feature of the value allocated to the issuance of warrants on our senior convertible debentures. The \$5.5 million of interest on these debentures includes the stated 9.75% interest of \$2.3 million of which \$2.0 million was paid in common stock and \$292 thousand was paid in cash, amortization of issuance costs of \$259 thousand, and amortization of the fair value of the warrants issued to the purchasers and placement agent and the deemed beneficial conversion feature of \$2.9 million. Other income increased by

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

\$313 thousand during the fiscal year ended January 31, 2003 from the prior fiscal year resulting primarily from favorable gains on foreign currency exchanges. Gains on marketable securities increased by \$15.5 million for the fiscal year ended January 31, 2003 from the prior fiscal year. \$11.7 million of this increase relates to the realized gain on our sale of 3,396,221 shares of NETsilicon, Inc. common stock to Digi International, Inc. for \$13.6 million in cash. The remaining shares of NETsilicon common stock were exchanged for Digi International common stock and are accounted for under marketable securities. We obtained 2,324,683 shares of Digi common stock on the exchange, of which

22

1,162,342 shares were later sold back to Digi for \$3.6 million in cash and a gain of \$2.6 million. The remaining \$1.2 million increase results from an impairment allowance taken on our available for sale investment in Entrada and \$1.0 million in realized losses on the sale of 1,051,000 shares of Entrada in the prior fiscal year.

Income taxes. There was no provision for income taxes for fiscal years 2003 and 2002. We have carry forwards of domestic federal net operating losses, which may be available, in part, to reduce future taxable income in the United States. However, due to potential adjustments to the net operating loss carry forwards as provided by the Internal Revenue Code with respect to future ownership changes, future availability of the tax benefits is not assured. In addition, we provided a valuation allowance in full for our deferred tax assets, as it is our opinion that it is more likely than not that some portion or all of the assets will not be realized. Our prior management did not file our tax returns for over six years. We had losses during each of these years and do not believe there is tax liability for any of them, other than a nominal penalty for failure to file a return. We have filed our federal returns and are in the process of preparing and filing all our delinquent state tax returns.

Sorrento Networks I, Inc. (SNI) f/k/a Sorrento Networks, Inc.

Net sales. Net sales decreased to \$22.4 million, or 38%, for fiscal 2003 from \$36.0 million for fiscal 2002. In fiscal 2003, 18 customers accounted for 92% of net sales compared with eleven customers, which accounted for 94% in fiscal 2002. We expect to continue experiencing significant fluctuations in annual revenues as a result of our long and variable sales cycle as well as our highly concentrated customer base. Revenue continues to be negatively impacted by weak telecommunication industry volumes and management determination to not pursue low gross margin projects.

Gross profit. Gross profit was \$3.1 million for fiscal 2003, a decrease of 59% from \$7.7 million for fiscal 2002. Gross margin decreased to 14% of net sales for fiscal 2003 from 21% for fiscal 2002. The declines were due primarily to the increases in our obsolescence and inventory value reserves taken in the second quarter and of a significantly higher fixed manufacturing overhead in our cost of shipments for the year as a result of the lower revenue volume. We have initiated cost cutting actions in production due to the lower revenue volume and a continued slowdown in the capital expenditure spending throughout the telecom industry.

Selling and marketing. Sales and marketing expenses decreased to \$11.7 million, or 52% of net sales, for fiscal 2003 from \$15.7 million, or 44% of net

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

sales, for fiscal 2002. The decrease in sales and marketing expenses resulted primarily from a reduction in personnel and related costs, decreased travel expenses, trade show participation, and advertising expenses. The number of sales and marketing personnel decreased to 36 at January 31, 2003 from 38 at January 31, 2002.

Engineering, research and development. Engineering, research and development expenses decreased to \$8.5 million, or 38% of net sales, for fiscal 2003 from \$13.2 million, or 37% of net sales, for fiscal 2002. The decrease in engineering, research and development expenses was the result of decreased expenditures associated with the decrease in engineering personnel and related costs and a reduction in material related development expenses. The number of engineering personnel decreased to 29 at January 31, 2003 from 67 at January 31, 2002.

General and administrative. General and administrative expenses decreased to \$7.6 million, or 34% of net sales, for fiscal 2003 from \$6.9 million, or 19% of net sales, for fiscal

23

2002. The decrease in general and administrative expenses reflects the reduction of executive and administrative personnel and lower operating expenses. The number of general and administrative personnel decreased to 11 at January 31, 2003 from 15 at January 31, 2002.

Deferred and other stock compensation. Deferred and other stock compensation for the fiscal year ended January 31, 2003 includes \$433 thousand of amortization of deferred stock compensation resulting from the value of stock options granted to consultants compared to \$812 thousand for the prior fiscal year. In connection with the grants of stock options with exercise prices determined to be below the fair value of our common stock on the date of grant, SNI recorded deferred stock compensation of \$2.6 million, which is being amortized on an accelerated basis over the vesting period of the options.

Meret Communications, Inc. d/b/a Meret Optical Communications

Net sales. Net sales decreased to \$3.1 million, or 36%, for fiscal 2003 of which \$296 thousand was inter-company sales, from \$4.8 million for fiscal 2002. The reduction in sales volume reflects the continued weak industry volumes.

Gross profit. Gross profit decreased to \$204 thousand, or 88%, for fiscal 2003 from \$1.7 million for fiscal 2002. Gross margin as a percentage of net sales decreased to 7% for fiscal 2003 compared to 35% for the comparable period last year. These declines were due primarily to the increases in our obsolescence reserves taken in the second quarter and a higher fixed manufacturing overhead in our cost of shipments for the quarter as a result of the lower revenue volume.

Selling and marketing. Sales and marketing expenses decreased to \$315 thousand, or 10% of net sales, for fiscal 2003, compared to \$435 thousand, or 9% of net sales, for fiscal 2002. This decrease was a direct result of reduced internal commissions, due primarily to lower revenue volume and changes in the commission structure, resulting in lower commission expense for the year.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Engineering, research and development. Engineering, research and development expenses increased to \$514 thousand, or 17% of net sales compared to \$417 thousand, or 9% of net sales, for fiscal 2002. This increase results from the addition of four engineers to support the development of new products and the enhancement of existing products.

General and administrative. General and administrative expenses increased to \$283 thousand, or 9% of net sales during fiscal 2003 from \$200 thousand, or 4% of net sales, for fiscal 2002. The increase in general and administrative expenses during fiscal 2003 resulted primarily from addition in the administration staff, costs associated with upgrades in our business application software and costs incurred to move the facilities to a new location.

Other operating expenses. Other operating expenses increased to \$421 thousand, or 14% of net sales for fiscal 2003 from \$372 thousand, or 8% of net sales, for fiscal 2002. These costs represent the amortization of purchased technology related to prior acquisitions. The increase represents and adjustment made to record amortization not previously recorded on purchased technology.

24

Results of Operations: Comparison of the Years Ended January 31, 2002 and January 31, 2001.

Net sales. Our consolidated net sales decreased \$3.8 million or 9% to \$40.8 million for fiscal 2002 when compared to net sales of \$44.6 million for fiscal 2001. Net sales of SNI, increased \$9.6 million or 36% to \$36.0 million for fiscal 2002 as compared to net sales of \$26.4 million in fiscal 2001. Net sales for Meret Optical decreased \$1.5 million or 24% in fiscal 2002 to \$4.8 million as compared to net sales of \$6.3 million in fiscal year 2001. Entrada Networks, an operating subsidiary which we spun-off in August 2000, had revenues of \$11.9 million in fiscal 2001 whereas no revenues were reported for Entrada Networks in fiscal year 2002.

Gross profit. Cost of sales consists principally of the costs of components, subcontract assembly from outside manufacturers, and in-house system integration, quality control, final testing and configuration costs. Gross margin percent on a consolidated basis decreased to 23% for fiscal 2002 from 30% in fiscal 2001. Consolidated gross profit was \$9.3 million, a decrease of 29% for fiscal 2002 from \$13.2 million for fiscal 2001. Gross margin percent and gross profit were impacted negatively by increases in inventory reserves and sales that were made at lower gross profit than the prior year. Gross profit of SNI decreased to \$7.7 million in fiscal 2002 from \$9.1 million in fiscal 2001, a decrease of 16%. An increase in inventory reserves accounts for \$3.7 million of the decrease in gross profit. The gross profit of our Meret Optical segment decreased by \$941 thousand from the prior fiscal year and was primarily the result of the revenue volume decrease. The remaining change in gross profit related to Entrada Networks.

Selling and marketing. Selling and marketing expenses consist primarily of employee compensation and related costs, commissions to sales representatives, tradeshow expenses and travel expenses. We continue to manage our expenditures for sales and marketing in relation with the expansion of our domestic and international sales channels and the establishment of strategic relationships. Our consolidated selling and marketing expenses decreased to \$16.2 million, or

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

40% of net sales, for fiscal 2002 from \$17.2 million, or 39% of net sales for fiscal 2001.

Engineering, research and development. Engineering, research and development expenses consist primarily of compensation related costs for engineering personnel, facilities costs, and materials used in the design, development and support of our technologies. All research and development costs are expensed as incurred. We continue to manage our research and development costs in relation to the changes in our sales volume and available capital resources in our development efforts to enhance existing products and introduce new products to our product offering. Our consolidated engineering, research and development expenses decreased to \$13.7 million, or 33% of net sales, for fiscal 2002 from \$23.9 million, or 54% of net sales, for fiscal 2001. The decrease can primarily be attributed to decreases in product development material and personnel related costs.

General and administrative. General and administrative expenses consist primarily of employee compensation and related costs, legal and accounting fees, public company costs, and allocable occupancy costs. Consolidated general and administrative expenses decreased to \$12.7 million, or 31% of net sales, for fiscal 2002 from \$18.1 million, or 41% of net sales, for fiscal 2001. The decrease in general and administrative expenses can be attributed to reductions in investment banking, professional fees and personnel related costs.

25

Other operating expenses. Other operating expenses for both fiscal 2002 and 2001 included approximately \$400 thousand of amortization of purchased technology related to acquisitions included in Meret. During the fiscal year ended January 31, 2002, we recorded a \$2.7 million valuation allowance against option receivables from our former CEO and Chairman. During the fiscal year ended January 31, 2001, approximately \$2.1 million of these costs were attributable to the closure of one of Entrada's facilities and valuation reserves recorded against distributor receivables and capitalized software costs of Entrada.

Other income (expenses). Other income (expenses) from continuing operations decreased to \$6.0 million charges for fiscal 2002 from \$8.5 million income for fiscal 2001. Investment income declined by \$6.9 million during the fiscal year ended January 31, 2002 from the comparable period last year due to reduced investments of our cash surplus in short-term investments, lower interest rates as well as reduced interest received on customer financing receivables. The increase of \$2.4 million in interest expense for the fiscal year ended January 31, 2002 from the prior fiscal year is primarily due to the interest incurred on our newly issued convertible debentures which was partially offset by a decline in our short term borrowings. The \$2.6 million of interest on these debentures included the stated 9.75% interest of \$1.6 million which was paid in common stock, amortization of issuance costs of \$82 thousand and amortization of the fair value of the warrants issued to the purchasers and placement agent and the deemed beneficial conversion feature of \$911 thousand. Other expenses increased by \$99 thousand during the fiscal year ended January 31, 2002 from the prior fiscal year resulting primarily from unfavorable losses on foreign currency exchanges. Gains on marketable securities decreased by \$5.1 million for the fiscal year ended January 31, 2002 from the prior fiscal year. Approximately \$4.0 million of this decrease relates to the gain on our sale of Netsilicon

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

shares during the prior fiscal year. The remaining \$1.1 million decrease results from an impairment allowance of \$178 thousand on our available for sale investment in Entrada and \$1.0 million in realized losses on the sale of 1,051,000 shares of Entrada.

Income taxes. There was no provision for income taxes for fiscal years 2002 and 2001. We have carry forwards of domestic federal net operating losses, which may be available, in part, to reduce future taxable income in the United States. However, due to potential adjustments to the net operating loss carry forwards as provided by the Internal Revenue Code with respect to future ownership changes, future availability of the tax benefits is not assured. In addition, we provided a valuation allowance in full for our deferred tax assets, as it is our opinion that it is more likely than not that some portion or all of the assets will not be realized.

Sorrento Networks I, Inc.

Net sales. Net sales increased to \$36.0 million, or 36%, for fiscal 2002 from \$26.5 million for fiscal 2001. The increase in net sales was primarily due to an increase in the number of deployments of systems to both new and existing customers. In fiscal 2002, eleven customers accounted for 94% of our net sales compared with seven customers which accounted for 91% in fiscal 2001. In addition to the number of new customer and existing customer orders achieved in fiscal year 2002, we continued to increase its product offering by enhancements to existing products and the introduction of new products which also contributed to the increase in net sales in fiscal year 2002. We plan to continue to enhance our existing product line and develop new products to increase sales. Our ability to achieve this goal will depend on continued sales and available working capital that can be allocated to our development efforts.

26

Gross profit. Gross profit was \$7.7 million for fiscal 2002, a decrease of 16% from \$9.1 million for fiscal 2001. Gross margin decreased to 21% of net sales for fiscal 2002 from 34% for fiscal 2001. The gross margin percentage decrease resulted from the shipment of lower margin products to multiple customers with long-term purchase commitments or strategic alliance agreements in fiscal 2002 as well as an increase in the valuation allowance recorded against inventory of \$4.0 million.

Selling and marketing. Sales and marketing expenses increased to \$15.7 million, or 44% of net sales, for fiscal 2002 from \$14.0 million, or 53% of net sales, for fiscal 2001. The increase in sales and marketing expenses resulted from increased travel expenses, trade show participation, and advertising expenses. The number of sales and marketing personnel decreased to 38 at January 31, 2002 from 65 at January 31, 2001.

Engineering, research and development. Engineering, research and development expenses decreased to \$13.2 million, or 37% of net sales, for fiscal 2002 from \$20.4 million, or 77% of net sales, for fiscal 2001. The decrease in engineering, research and development expenses was the result of decreased expenditures associated with the decrease in engineering personnel and decreases in employee relocation and recruiting expenses and reduction in material related development expenses. The number of engineering personnel decreased to 67 at January 31, 2002 from 91 at January 31, 2001.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

General and administrative. General and administrative expenses decreased to \$6.9 million, or 19% of net sales, for fiscal 2002 from \$9.0 million, or 34% of net sales, for fiscal 2001. The decrease in general and administrative expenses reflects the reduction of executive and administrative personnel and lower operating expenses. The number of general and administrative personnel decreased to 15 at January 31, 2002 from 32 at January 31, 2001.

Deferred and other stock compensation. Deferred and other stock compensation for the fiscal year ended January 31, 2002 includes \$812 thousand of amortization of deferred stock compensation resulting from the value of stock options granted to consultants compared to \$1.9 million for the prior fiscal year. In connection with the grants of stock options with exercise prices determined to be below the fair value of our common stock on the date of grant, deferred stock compensation of \$2.6 million was recorded, which is being amortized on an accelerated basis over the vesting period of the options.

Meret Communications, Inc., d/b/a Meret Optical Communications

Net sales. Net sales decreased to \$4.8 million, or 24%, for fiscal 2002 from \$6.3 million for fiscal 2001. The decrease in net sales was primarily due to changes in product demand in the RF Synthesis product family. The majority of this decrease was recognized in the fourth quarter of this year.

Gross profit. Gross profit decreased to \$1.7 million, or 35%, for fiscal 2002 from \$2.6 million for fiscal 2001. Gross margin as a percentage of net sales decreased to 35% for fiscal 2002 compared to 42% for the comparable period last year. The decrease in the gross margin percentage from the prior year resulted from the reduction in RF Synthesis sales which generates a higher gross margin.

Selling and marketing. Sales and marketing expenses remained basically unchanged at \$435 thousand, or 9% of net sales, for fiscal 2002, compared to \$437 thousand, or 7% of net

27

sales, for fiscal 2001. Major expense changes by category within the sales and marketing function included an increase in commissions to external sales representatives that was offset by reduced personnel costs as a result of reductions in the sales force.

Engineering, research and development. Meret incurred engineering expenses during fiscal 2002 of \$417 thousand, or 9% of net sales compared to \$177 thousand, or 3% for the comparable period last year. The increase for the fiscal year ended January 31, 2002 relates to the addition of three engineers to support our development of our new coarse wavelength division multiplexing products and the enhancement of existing products.

General and administrative. General and administrative expenses decreased to \$200 thousand, or 4% of net sales during fiscal 2002 from \$595 thousand, or 9% of net sales for the comparable period last year. The decrease in general and administrative expenses during fiscal 2002 resulted from reductions in bad debt allowances and bank fees.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Liquidity and Capital Resources

We finance our operations through a combination of internal funds, investments and debt and equity financing. At January 31, 2003, our working capital was a negative \$36.5 million including \$4.0 million of investments in marketable securities and \$7.7 million in cash and cash equivalents. The primary reason for our negative working capital condition is that \$48.8 million, reflecting the obligation due to holders of SNI's Series A Preferred Stock as a result of their right of redemption, was classified at year end January 31, 2003 and January 31, 2002, as a current liability. This obligation had been classified as mezzanine in our liability and owner's equity for the period ended January 31, 2001. The Series A Preferred Stock liability can only be paid through lawfully available funds that would normally be generated from SNI profitable operations, which we do not currently have available or foresee the availability of in the near future. As previously discussed, we are in the process of restructuring both our Senior Convertible Debentures of \$32.2 million and the SNI Series A Preferred stock liability of \$48.8 million.

Cash Flow for the Years Ended January 31, 2003, 2002 and 2001

Continuing Operations

Our operations used cash flows of \$14.2 million during fiscal 2003 as compared to \$31.8 million in fiscal 2002. The decrease in cash flows used by operations in fiscal 2003 was primarily the result of lower accounts receivable and inventories, combined with the increase in reserves for inventory and accounts receivable, the use of stock for the payment of interest on debentures and the gain on sale of marketable securities. This favorable impact on cash used for operations was partially offset by the negative cash impact of our larger net operating loss and the use of cash to decrease our accounts payable. In addition to the foregoing there were less significant changes associated with changes in amortization and depreciation and other current liabilities.

We have incurred significant losses and negative cash flows from operations for the past two years. Sorrento Networks, Inc., (SNI) our principal operating subsidiary, has primarily been the operating entity responsible for these high losses and negative cash flows. The losses have been generated as SNI continues to develop its technology, marketing and sales and operations in its effort to become a major supplier of metro and regional optical networks world-wide. In

addition, we have incurred significant restructuring costs of approximately \$2.8 million in 2003 associated with restructuring of our obligations under our 9.75% Senior Convertible Debentures and Series A Preferred Stock. Although we feel these restructuring costs are beneficial to our long-term survival in a depressed telecom market, there is no certainty the restructuring will be approved by the shareholders or will close even with shareholder approval.

We have funded our operations primarily by the sale of securities and the issuance of debt. There can be no assurance that similar funding will be available in the future. In addition, if our restructuring efforts are successful, there will be certain restrictions on us in both the amount of debt we can incur in future periods and the types of securities that we will be able to issue to raise additional capital in future periods. Both of these

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

restrictions could have a negative impact on our ability to raise the additional working capital that we will require in future periods. Further, with the downturn in the economic environment and decreases in capital spending by telecom carriers, our revenue has been negatively impacted and we anticipate that our future revenues will also be negatively impacted. As a result, our need for additional working capital may be accelerated in the future. If such capital is not available, we will need to substantially decrease our operating costs and capital spending in order to fund operations. There can be no assurance that our available cash, future funding or reduction in operating costs will be sufficient to fund our operations in the future.

Our standard payment terms range from net 30 to net 60 days. Receivables from international customers have frequently taken longer to collect. In addition, the downturn in the telecom market has impacted many of the telecom carriers ability to purchase or pay for outstanding commitments within standard payment terms. There can be no assurance that this continued economic environment will not impact either current or future receivables negatively. We do not provide long-term financing to customers buying our equipment.

Investing Activities

Our investing activities during fiscal 2003 provided for cash flows of \$9.1 million. Cash used in investing activities during fiscal year 2003 included purchases of property and equipment of \$3.3 million and \$280 thousand in purchases of other assets. We also made a \$5.0 million investment in UFO Communications, Inc. a private service provider, as part of a strategic relationship. This was offset by \$17.2 million of cash received from the sale of marketable securities and other investments. In fiscal 2002 our investing activities used \$4.0 million. Cash used in investing activities during fiscal 2002 included purchases of property and equipment of \$3.2 million and \$900 thousand in other assets, which was offset by \$144 thousand of cash received from the sale of marketable securities and other investments.

In fiscal 2001 we used cash flows in investing activities of \$12.5 million including \$7.0 million in cash balances at Entrada as of August 31, 2000 when it ceased to be a subsidiary following the merger with Sync Research. We purchased property and equipment of \$14.4 million, invested \$3.3 million in Entrada and \$3.2 million in one of SNI's customers. During fiscal 2001, we received \$4.2 million from the sale of 350,000 of our Netsilicon shares and \$819 thousand from the purchasers of our discontinued operations. We received \$9.2 million offset by our investment of \$3.2 million from the investment in one of SNI's customers and payment of \$1.8 million on a note receivable.

Financing Activities

In fiscal 2003 our financing activities used cash of \$1.4 million and consisted primarily of repayment of our line of credit and long-term debt. Our financing activities during fiscal 2002 provided us \$40.1 million and consisted primarily of financing activities from the sale of common stock in March, 2001 of 76,300 shares which generated proceeds of \$9.6 million and a convertible debenture financing in August, 2001 which raised \$29.7 million. As previously mentioned, we have restructured both our 9.75% convertible debenture financing completed in August, 2001 and the SNI Series A Preferred Stock obligation of

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

\$48.8 million. In addition to the sale of common stock and convertible debentures, we received \$1.1 million from proceeds of stock option and warrant exercises of \$900 thousand and long term debt of \$20 thousand. Offsetting these amounts were repayments of short-term and long-term debt of \$300 thousand.

In fiscal 2001 our financing activities provided cash flows of \$60.6 million which consisted primarily of \$46.6 million in net proceeds from a private placement by SNI of its convertible preferred stock, \$7.9 million in net proceeds from a private placement by Entrada of its common stock, \$3.9 million in proceeds from option and warrant exercises, \$2.4 million in proceeds from long term debt offset by repayments of short and long term debt.

During March 2000, SNI completed a private placement of 8,596,333 shares of its Series A Convertible Preferred Stock to a group of investors receiving net proceeds of approximately \$46.6 million. Each share of the SNI Series A Preferred Stock was, prior to the closing of our capital restructuring on June 4, 2003, convertible into one share of SNI common stock at the option of the holder and could vote on an "as converted" basis except for election of directors, and had a liquidation preference of \$5.45 per share.

On August 31, 2000, we completed a merger of Entrada with Sync Research, Inc., a Nasdaq listed company in which we received 4,244,155 shares of the merged entity, which changed its name to Entrada Networks, Inc. and changed its symbol to ESAN. We purchased 93,900 shares of Sync in the open market during June and July, 2000 for \$388 and on August 31, 2000 purchased an additional 1,001,818 shares directly from Entrada for \$3,306. After these transactions we owned 48.9% of Entrada Networks and we have accounted for our interest on our balance sheet at cost as of January 31, 2001.

On December 1, 2000, we distributed 3,107,155 of our Entrada shares to our shareholders of record as of November 20, 2000. The distribution was made at the rate of one-fourth (0.25) of an Entrada share for each of our outstanding shares. At exercise, options and warrants to acquire our common shares which were granted and unexercised as of November 20, 2000 will receive a

30

similar number of Entrada shares. Prior to January 31, 2001 we distributed 20,182 of our Entrada shares upon the exercise of options and as of January 31, 2001 have reserved 1,080,283 shares for future exercises of options and warrants. The cost basis of these reserved shares and related liability to the option and warrant holders is included in the investment in former subsidiary and dividends payable in the accompanying balance sheet. The aggregate distribution of our Entrada shares including the shares reserved for option and warrant holders has been accounted for at our original cost of \$5.1 million. In addition we have granted options to purchase 410,000 of our Entrada shares for \$3.19 per share (the merger price) to several of our then officers and consultants. In April 2003 our Board of Directors determined that our Entrada shares should be made available for general corporate purposes, and we are no longer reserving any for distribution to option and warrant holders as of November 20, 2000.

We anticipate that we will need additional working capital to fulfill our capital working requirements for the next year. While we have made significant cost reductions to bring our losses more in line with our anticipated or

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

projected revenues, there is no assurance the volume of future revenues will be sufficient to allow us to meet our financial obligations for future periods. Further, we anticipate we will need to sell our marketable securities to finance our working capital needs for future periods. Our holdings of marketable securities are highly volatile and do not trade in large volume. There can be no assurance that when we need to sell our holdings in marketable securities we will be able to obtain a market value price for the securities without negatively impacting the price of such securities. We continue to reduce our operating costs and have initiated activities to raise additional working capital. Our future capital requirements may vary materially from those now planned including the need for working capital to accommodate planned growth, hiring and infrastructure needs. There can be no assurances that our working capital requirements will not exceed our ability to generate sufficient cash internally to support our requirements and that external financing will be available or that, if available, such financing can be obtained on terms favorable to us and our shareholders. In addition our auditors have issued a going concern qualification to their opinion regarding the successful approval and completion of our capital restructuring plan, which closed on June 4, 2003.

Contractual Cash Obligations

The following tables quantify our future contractual obligations and commercial commitments as of January 31, 2003 (dollars in thousands):

Contractual Obligations

	Payments due in fiscal years						
	Total	2004	2005	2006	2007	2008	
Long-term Debt.....	\$ 3,630	\$ 38	\$ 57	\$ 54	\$ 58	\$63	\$
Capital Leases.....	253	198	55	--	--	--	
Operating Leases.....	650	301	158	131	42	18	
9.75% convertible debentures (a).....	32,200	--	32,200	--	--	--	
Series A, preferred stock put (b).....	48,800	48,800	--	--	--	--	
Total.....	\$85,533	\$49,337	\$32,470	\$185	\$100	\$81	\$

(a) Maturity date, August 2, 2004

(b) The Series A had a liquidation preference, and the holders had the right to have the outstanding shares repurchased in the event an initial public offering of SNI did not take place by March 1, 2001. The initial public offering did not take place and a majority of Series A holders exercised their redemption right. SNI has not repurchased those shares because it does not have legally available funds to do so. Applicable law prohibits a repurchase of equity securities when the capital of the corporation is impaired or when such repurchase would cause an impairment of the capital

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

of the corporation. SNI has not had funds legally available to repurchase any of its equity securities since April 2001, and most likely will not in the foreseeable future.

Note: As a result of the consummation of the capital restructuring, the debt obligations to our 9.75% convertible debenture holders of \$32.2 million and Series A Preferred Stock holders of \$48.8 million were eliminated and new 7.5% convertible debentures of \$12.5 million have become effective, which have a maturity date of August 2, 2007.

Results of Operations/Comparison of the Quarters ended April 30, 2003 and 2002.

Net sales. Our consolidated net sales increased \$1.9 million or 31% to \$7.9 million for the quarter ended April 30, 2003 compared to net sales of \$6.0 million for the quarter ended April 30, 2002. Net sales for Sorrento Networks Inc. ("SNI"), our primary operating subsidiary, increased \$2.0 million or 41% to \$6.8 million for the quarter ended April 30, 2003 as compared to net sales of \$4.8 million for the quarter ended April 30, 2002. This increase reflects increased domestic sales resulting from a substantial backlog at the end of last quarter.

During the three months ended April 30, 2003 SNI shipped product to fourteen customers of which five customers represented a combined 92% of our revenues. During the quarter ended April 30, 2002, we shipped product to ten customers of which five customers represented a combined 88% of our net sales. We expect to continue experiencing significant fluctuations in our quarterly revenues as a result of our long and variable sales cycle as well as our highly concentrated customer base.

Net sales for Meret decreased to \$1.1 million, or by 15% for the quarter ended April 30, 2003 from \$1.2 million for the comparable quarter last year. The reduction in sales volume reflects the transfer of one of Meret's product line to SNI. This transfer was done for conformity of products within the two segments.

Gross profit. Cost of sales consists principally of the costs of components, subcontract assembly from outside manufacturers, and in-house system integration, quality control, final testing and configuration costs. Gross margin percent on a consolidated basis remained at 25% for the quarters ended April 30, 2003 and 2002. Consolidated gross profit was \$2.0 million, an increase of 31% for the quarter ended April 30, 2003 from \$1.5 million for the quarter ended April 30, 2002.

Gross profit for SNI increased to \$1.7 million the quarter ended April 30, 2003, as compared to \$1.0 million in the quarter ended April 30, 2002, an increase of 67%. The gross margin increases were primarily the result of higher sales volume and lower fixed manufacturing overhead in our cost of shipments for the quarter. We continue to monitor our costs of production and reduce costs where ever possible.

For the quarter ended April 30, 2003 gross profit for Meret decreased to \$247, or by 47%, from \$463 for the comparable quarter last year. Meret's gross margins decreased to 22% for the quarter ended April 30, 2003 from 42% for the comparable quarter last year. The gross margin decrease was primarily the result of product mix, lower sales volume, and higher fixed manufacturing overhead in our cost of shipments for the quarter.

Selling and marketing. Selling and marketing expenses consist primarily of employee compensation and related costs, commissions to sales representatives, tradeshow expenses and travel expenses. Consolidated selling and marketing expenses decreased to \$2.2 million or 28% of net sales, for the quarter ended April 30, 2003 from \$3.4 million, or 57% of net sales for the quarter ended

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

April 30, 2002. This decrease was primarily the result of cost reduction efforts implemented and reductions in travel expenses, advertising expenses and personnel costs.

Engineering, research and development. Engineering, research and development expenses consist primarily of compensation related costs for engineering personnel, facilities costs and

32

materials used in the design, development and support of our technologies. All research and development costs are expensed as incurred. We continue to manage our research and development cost in relation to the changes in our sales volume and available capital resources in our development efforts to enhance existing products and introduce new products to our product offering. Our consolidated engineering, research and development expenses decreased to \$1.6 million, or 20% of net sales, for the quarter ended April 30, 2003 from \$2.5 million, or 42% of net sales for the quarter ended April 30, 2002. The decline can primarily be attributed to decreases in product development material and personnel related costs reflecting managements planned reduction in operating expense levels.

General and administrative. General and administrative expenses consist primarily of employee compensation and related costs, legal and accounting fees, public company costs and allocable occupancy costs. Consolidated general and administrative expenses decreased to \$1.6 million, or 20% of net sales, for the quarter ended April 30, 2003 from \$1.9 million, or 31% of net sales, for the quarter ended April 30, 2002. The decrease in general and administrative expenses can be attributed to reductions in investment banking, professional fees and personnel related costs due to our ongoing operating expense reduction efforts.

Deferred and other stock compensation. Deferred and other stock compensation for the quarter ended April 30, 2003 includes \$51 of amortization of deferred stock compensation resulting from the amortization of the value of stock options granted to consultants as compared with \$62 of amortization of deferred stock compensation and \$44 of expenses for the comparable quarter last year. These costs were incurred in connection with the grants of stock options with exercise prices determined to be below the fair value of our common stock on the date of grant, we recorded deferred stock compensation of \$2.6 million, which is being amortized on an accelerated basis over the vesting period of the options.

Other income (charges). Other income (charges) from operations was a \$2.6 million charge for the quarter ended April 30, 2003 compared to a \$10.5 million gain for the quarter ended April 30, 2002. The current year quarter consists primarily of costs associated with our convertible debenture which includes deferred interest of \$765, amortization of issuance costs of \$203 and amortization of the fair value of the warrants issued to the purchasers and placement agent and the deemed beneficial conversion feature of \$1.6 million. The quarter ended April 30, 2002 consisted of an \$11.7 million gain on the sale of marketable securities as a result of the sale of 3,396,221 shares of NETsilicon, Inc. common stock to Digi International, Inc. for \$13.6 million in cash. Expenses associated with our convertible debenture included interest of

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

\$766, paid in common stock, amortization of issuance costs of \$36 and amortization of the fair value of the warrants issued to the purchasers and placement agent and the deemed beneficial conversion feature of \$398.

Income taxes. There was no provision for income taxes for the quarters ended April 30, 2003 and 2002. We have carry forwards of domestic federal net operating losses, which may be available, in part, to reduce future taxable income in the United States. However, due to potential adjustments to the net operating loss carry forwards as provided by the Internal Revenue Code with respect to future ownership changes, future availability of the tax benefits is not assured. In addition, we provided a valuation allowance in full for our deferred tax assets, as it is our opinion that it is more likely than not that some portion or all of the deferred tax assets will not be realized.

33

Liquidity and Capital Resources

We finance our operations through a combination of internal funds, investments and debt and equity financing. At April 30, 2003, which was prior to the consummation of our restructuring transaction which closed on June 4, 2003 and is therefore no longer applicable, our working capital was a negative \$37.7 million including \$5.0 million of investments in marketable securities and \$3.8 million in cash and cash equivalents. The primary reason for our negative working capital condition was that \$48.8 million, reflecting the obligation due to Series A Holders obligation as a result of their right of redemption, was classified at year end January 31, 2003, as a current liability. The Series A liability could only be paid through lawfully available funds that would normally be generated from SNI profitable operations, which we did not then have available and did not then foresee the availability of in the near future. As previously discussed, we have recently consummated the restructuring of both our Senior Convertible Debentures of \$32.2 million and the SNI Series A Preferred liability of \$48.8 million.

Operations

Our operations used cash flows of \$5.0 million during the quarter ended April 30, 2003. During the quarter ended April 30, 2002 continuing activities used cash flows of \$4.2 million. The increase in cash flows used by operations resulted primarily from a decrease in our deferred revenue and a decrease in accounts payable, offset by a decrease in accounts receivable and not having a gain from the sales of marketable securities in the current quarter.

We have incurred significant losses and negative cash flows from operations for the past two years. SNI has primarily been the operating entity responsible for these high losses and negative cash flows. The losses have been generated as SNI continues to develop its technology, marketing and sales and operations in its effort to become a major supplier of metro and regional optical networks world-wide.

We have funded our operations primarily by the sale of securities and the issuance of debt. There can be no assurance that similar funding will be available in the future. In addition, after our restructuring efforts are

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

completed, there will be certain restrictions on us in both the amount of debt we can incur in future periods and the types of securities that we will be able to issue to raise additional capital in future periods. Both of these restrictions could have a negative impact on our ability to raise the additional working capital that we will require in future periods. Further, with the downturn in the economic environment and decreases in capital spending by telecom carriers, our revenue has been negatively impacted and we anticipate that our future revenues will also be negatively impacted. As a result, our need for additional working capital may be accelerated in the future. If such capital is not available, we will need to substantially decrease our operating costs and capital spending in order to fund operations. There can be no assurance that our available cash, future funding or reduction in operating costs will be sufficient to fund our operations in the future.

Our standard payment terms range from net 30 to net 60 days. Receivables from international customers have frequently taken longer to collect. In addition, the downturn in the telecom market has impacted many of the telecom carriers ability to purchase or pay for outstanding commitments within standard payment terms. Despite these negative factors we have improved our collection on receivables to 57 days of average sales days outstanding as

34

compared to 144 days outstanding for the same period in the prior year. Additionally, we have also improved our inventory turnover from 1 times per year to 2 times per year when compared to the same period in the prior year. Both the reduction in receivables and inventory have helped to improve our cash flows. There can be no assurance however, that this continued economic environment will not impact either current or future receivables negatively or our ability to control inventory levels. We do not provide long-term financing to customers buying our equipment.

Investing Activities

Our investing activities during the quarter ended April 30, 2003 provided cash flows of \$1.1 million from the disposal of \$775 thousand property and equipment and a \$313 thousand decrease in other assets. During the quarter ended April 30, 2002, investing activities provided cash flows of \$11.6 million. We purchased property and equipment of \$1.9 million and received \$13.6 million on the sale of marketable securities and other assets.

Financing Activities

Our financing activities during the quarter ended April 30, 2003 used cash of \$67 thousand consisting primarily of the repayment of debt. During the quarter ended April 30, 2002, financing activities used cash flows of \$177 thousand, which also consisted primarily of repayment of debt.

We anticipate that we will need additional working capital to fulfill our capital working requirements for the next year. Although we have made significant cost reductions to bring our losses more in line with our anticipated or projected revenues, there is no assurance the volume of future revenues will be sufficient to allow us to meet our financial obligations for future periods. Further, we anticipate we will need to sell our marketable

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

securities to finance our working capital needs for future periods. Our holdings of marketable securities are highly volatile and do not trade in large volume. There can be no assurance that when we need to sell our holdings in marketable securities we will be able to obtain a market value price for the securities without negatively impacting the price of such securities. We continue to reduce our operating costs and have initiated activities to raise additional working capital. Our future capital requirements may vary materially from those now planned including the need for working capital to accommodate planned growth, hiring and infrastructure needs. There can be no assurances that our working capital requirements will not exceed our ability to generate sufficient cash internally to support our requirements and that external financing will be available or that, if available, such financing can be obtained on terms favorable to us and our shareholders. In addition our auditors have issued a going concern qualification to their opinion on our financial statements for the year ended January 31, 2003 included in our Annual Report as filed with the SEC on Form 10-K, as amended, regarding the successful approval and completion of our Capital Restructuring Plan, which closed on June 4, 2003.

Contractual Cash Obligations

The following tables quantify our future contractual obligations and commercial commitments as of April 30, 2003 (dollars in thousands):

35

Contractual Obligations

	Payments due in fiscal years				
	Total	Remainder 2004	2005	2006	2007
Long-term Debt	\$ 3,618	\$ 34	\$ 49	\$ 54	\$
Capital Leases	193	138	55	--	--
Operating Leases	558	209	158	131	--
9.75% convertible debentures (a)	32,200	--	32,200	--	--
Series A, preferred stock put (b)	48,800	48,800	--	--	--
	-----	-----	-----	-----	-----
Total	\$85,369	\$49,181	\$32,462	\$185	\$
	=====	=====	=====	=====	=====

(a) Maturity date, August 2, 2004

(b) The Series A has a liquidation preference, with the holders having a right to have the outstanding shares repurchased in the event an initial public offering did not take place at our subsidiary, SNI, by March 1, 2001. The IPO did not take place and

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

a majority of Series A holders exercised their redemption right. SNI did not repurchased those shares because it did not have legally available funds to do so. Applicable law prohibits a repurchase of equity securities when the capital of the corporation is impaired or when such repurchase would cause an impairment of the capital of the corporation. SNI did not have funds legally available to repurchase any of its equity securities since April 2001.

Note: As a result of the capital restructuring that was consummated on June 4, 2003 completing the capital restructuring, the debt obligations to our convertible debenture holders of \$32,200 and Series A preferred stock holders of \$48,800 have been eliminated and new convertible debentures in the aggregate principal amount of \$12,500 have become effective, with a maturity date of August 2, 2007.

Securities Authorized For Issuance Under Equity Compensation Plans

The following table provides information as of April 30, 2003 regarding compensation plans (including individual compensation arrangements) under which equity securities of Sorrento are authorized for issuance.

36

Plan Category	Number of Securities To Be Issued Upon Exercise Of Outstanding Options, Warrants and Rights ----- (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights ----- (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column(a)) ----- (c)
Equity Compensation Plans Approved by security Holders *(FIBR)	294,277 -----	\$387.53 -----	260,723 -----
Equity Compensation Plans not Approved by Security Holders (SNI)	3,296,003 -----	\$ 4.93 -----	20,000,000 -----
Total	3,590,280 -----	\$ 36.29 -----	20,260,723 -----

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

* As adjusted for stock splits.

See the Stock Option Plans note in the financial statements included in this registration statement for information regarding the material features of the above plans. Each of the above plans provides that the number of shares with respect to which options may be granted, and the number of shares of common stock subject to an outstanding option, shall be proportionally adjusted in the event of a subdivision or consolidation of shares or the payment of a stock dividend on common stock, and the purchase price per share of outstanding options shall be proportionately revised.

Contingent Liabilities

One of our component suppliers is contending that our efforts to reschedule shipments of certain components constitutes an anticipatory breach of the purchase order by which the components were ordered, and has informed us that they believe they are entitled to damages approximately \$950,000, despite the fact none of the goods have as yet been shipped. We do not believe that our supplier can support the amount of the alleged cancellation fee. Our supplier has threatened litigation if the dispute is not satisfactorily resolved and while we believe that our defenses to both liability and damages are strong, we can give no assurance that our position in such litigation would prevail. In the merger agreement between our predecessor corporation and Sync Research, we agreed to indemnify and hold our former subsidiary, Entrada, harmless against any liability arising after the merger in connection with the termination of a certain pension plan previously maintained by Entrada. In the third quarter, we were advised by a consultant retained by us and by the successor corporation to the entity from whom we originally purchased the company that became Entrada that the cost of termination of the pension plan in question is in excess of \$3 million. While we do not believe that we are liable for this cost, it is possible that the successor corporation, which has been funding the pension plan since 1996, may seek a substantial contribution from us towards this liability.

Effects of Inflation and Currency Exchange Rates

We believe that the relatively moderate rate of inflation in the United States over the past few years has not had a significant impact on our sales or operating results or on the prices of raw materials. There can be no assurance, however, that inflation will not have a material adverse effect on our operating results in the future.

The majority of our sales and expenses are currently denominated in U.S. dollars and to date our business has not been significantly affected by currency fluctuations. However, we conduct business in several different countries and thus fluctuations in currency exchange rates could cause our products to become relatively more expensive in particular countries, leading to a reduction in sales in that country. In addition, inflation in such countries could increase our expenses. In the future, we may engage in foreign currency denominated sales or pay material

amounts of expenses in foreign currencies and, in such event, may experience gains and losses due to currency fluctuations. Our operating results could be adversely affected by such fluctuations.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Impact of Recent Accounting Pronouncements

In January 2003, the FASB issued FASB Interpretation ("FIN") No. 46, "Consolidation of Variable Interest Entities", and interpretation of Accounting Research Bulletin No. 51, "Consolidated Financial Statements", FIN No. 46 explains how to identify variable interest entities and how an enterprise assesses its interests in a variable interest entity to decide whether to consolidate that entity. This Interpretation requires existing unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. FIN No. 46 is effective immediately for variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an interest after that date. The Interpretation applies in the first fiscal year or interim period beginning after June 15, 2003, to variable interest entities in which an enterprise holds a variable interest that is acquired before February 1, 2003. We do not anticipate that the adoption of FIN No. 46 will have a material effect on our financial position or results of operations.

In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure," which amended SFAS No. 123, "Accounting for Stock-Based Compensation." The new standard proves alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. Additionally, the statement amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in the annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. This statement is effective for financial statements for fiscal years ending after December 15, 2002. In compliance with SFAS No. 148, we have elected to continue to follow the intrinsic value method in accounting for its stock-based employee compensation arrangement as defined by Accounting Principles Board Opinion ("APB") No. 25, Accounting for Stock Issued to Employees, and has made the applicable disclosures in note K to the consolidated financial statements.

In November 2002, the FASB issued FIN 45, which expands previously issued accounting guidance and disclosure requirements for certain guarantees. FIN 45 requires us to recognize an initial liability for the fair value of an obligation assumed by issuing a guarantee. The provision for initial recognition and measurement of the liability will be applied on a prospective basis to guarantees issued or modified after December 31, 2002. The adoption of FIN 45 is not expected to materially affect our consolidated financial statements.

In June 2002, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 146, "Accounting for Costs Associated with Exit or Disposal Activities", which addresses accounting for restructuring and similar costs. SFAS No. 146 supersedes previous accounting guidance, principally Emerging Issues Task Force ("EITF") Issue No. 94-3. We will adopt the provisions of SFAS 146 for restructuring activities initiated after December 31, 2002. SFAS 146 requires that the liability for costs associated with an exit or disposal activity be recognized when the liability is incurred. Under EITF No. 94-3, a liability for an exit cost was recognized at the date of a company's commitment to an exit plan. SFAS 146 also establishes that the liability should initially be measured and recorded at fair

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

value. Accordingly, SFAS 146 may affect the timing of recognizing future restructuring costs as well as the amount recognized. Adoption of this standard will not have any immediate effect on our consolidated financial statements. We will apply this guidance prospectively.

In April 2002, the Financial Accounting Standards Board issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections". This statement eliminates the current requirement that gains and losses on debt extinguishment must be classified as extraordinary items in the income statement. Instead, such gains and losses will be classified as extraordinary items only if they are deemed to be unusual and infrequent, in accordance with the current GAAP criteria for extraordinary classification. In addition, SFAS 145 eliminates an inconsistency in lease accounting by requiring that modifications of capital leases that result in reclassification as operating leases be accounted for consistent with sale-leaseback accounting rules. The statement also contains other nonsubstantive corrections to authoritative accounting literature. The changes related to debt extinguishment will be effective for fiscal years beginning after May 15, 2002, and the changes related to lease accounting will be effective for transactions occurring after May 15, 2002. Adoption of this standard will not have any immediate effect on our consolidated financial statements. We will apply this guidance prospectively.

In August 2001, the Financial Accounting Standards Board issued SFAS No. 143, Accounting for Asset Retirement Obligations. This Statement is effective for fiscal years beginning after June 15, 2002. SFAS 143 provides accounting requirements for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. Under the Statement, the asset retirement obligation is recorded at fair value in the period in which it is incurred by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value in each subsequent period and the capitalized cost is depreciated over the useful life of the related asset. We do not believe the adoption of SFAS 143 will have a material effect, if any, on our financial position or results of operations.

(c) Quantitative and Qualitative Disclosures About Market Risk

We are exposed to financial market risks, including changes in interest rates and foreign currency rates. Our exposure to interest rate risk is the result of our need for periodic additional financing for our large operating losses and capital expenditures associated with establishing and expanding our operations. The interest rate that we will be able to obtain on debt financing will depend on market conditions at that time, and may differ from the rates we have secured on our current debt.

Almost all of our sales have been denominated in U.S. dollars. A portion of our expenses are denominated in currencies other than the U.S. dollar and in the future a larger portion of our sales could also be denominated in non-U.S. currencies. As a result, currency fluctuations between the U.S. dollar and the currencies in which we do business could cause foreign currency translation gains or losses that we would recognize in the period incurred. We cannot predict the effect of exchange rate fluctuations on our future operating results because of the number of currencies involved, the variability of currency exposure and the potential volatility of currency exchange rates. We attempt to minimize our currency exposure risk through working capital management and do not hedge our exposure to translation gains and losses related to foreign currency net asset exposures.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We do not hold or issue derivative, derivative commodity instruments or other financial instruments for trading purposes. Investments held for other than trading purposes do not impose a material market risk.

We believe that the relatively moderate rate of inflation in the United States over the past few years and the relatively stable interest rates incurred on short-term financing have not had a significant impact on our sales, operating results or prices of raw materials. There can be no assurance, however, that inflation or an upward trend in short-term interest rates will not have a material adverse effect on our operating results in the future should we require debt financing in the future.

Item 3. Properties

We recently moved our headquarters to the San Diego, California facility that we own, which consists of approximately 36,000 square feet used for offices, research and development and manufacturing. We also own a 47,000 square foot facility in San Diego, California adjacent to our headquarters that is used for offices, manufacturing and customer support.

For fiscal year 2003 we occupied an additional 19,240 square feet used for office, research and development and manufacturing activities under lease as detailed below:

Location	Square Footage	Facility Type	Expiration Date
Santa Monica, California...	6,000	Office	April 30, 2003
Fremont, California.....	5,000	Office/Manufacturing	July 31, 2003
Richardson, Texas.....	2,860	Office	September 30, 2003
Stuttgart, Germany.....	5,380	Office	December 31, 2005

As we move to bring our expenses in line with our revenue, we have completed, or are in the process of completing, the relocation of the Santa Monica, California, Fremont, California and Richardson, Texas offices to our San Diego, California facility. In addition, we have closed down our overseas facilities in The Netherlands, Belgium, China and Singapore.

We believe our facilities are suitable and adequate to meet our current needs. See Note E to the Consolidated Financial Statements for terms and amounts of mortgages on the facility we own.

Item 4. Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information as of January 31, 2003, and as of the date of issuance of the warrants being registered hereunder, June 4, 2003, regarding the ownership of our common stock by (i) each of our directors; (ii) each of our present executive officers; (iii) each person known to us to beneficially own 5% or more of our common stock; and (iv) all our directors and executive officers as a group. Except as indicated, all persons named as beneficial owners of common stock have sole voting and

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

investment power with respect to the shares indicated as beneficially owned by them. All persons named have an

40

address at c/o Sorrento Networks Corporation, 9990 Mesa Rim Road, San Diego, California 92121, unless otherwise indicated. All numbers give effect to our 1-for-20 reverse stock split, which took effect on October 28, 2002.

Name of Beneficial Owner (A)	Common Stock Beneficially Owned as of January 31, 2003**		Common Stock Owned as of Date of Issuance of Warrants***

- * Less than 1%
- ** Based on 886,050 shares outstanding
- *** Based on 8,915,628 shares outstanding
- (A) All information with respect to beneficial ownership of the shares is based upon filings made by the respective beneficial owners with the Securities and Exchange Commission or information provided by such beneficial owners to us.
- (B) Includes exercisable options held by Mr. Arneson to acquire 18,833 shares of common stock, and 250 shares of common stock purchased in June 2002.
- (C) Includes options to acquire 1,750 shares of common stock. On March 7, 2000, Mr. Fisher was granted options to acquire 100,000 shares of SNI's common stock at \$5.45 under its option plan for his services as an advisor to it. Pursuant to an outstanding conversion offer, Mr. Fisher may elect to convert the SNI options into options to acquire

41

our common stock at a ratio of 78 for 1. Mr. Fisher is President of Fisher Capital Partners which holds 183,486 shares of Series A. Mr. Fisher is a director of Liberty Media Corporation which owns an approximate 74% economic interest representing an approximate 94% voting interest in UnitedGlobalCom, Inc. ("UGC"). Belmarken Holding, B.V., an indirect subsidiary of UGC, holds 3,027,523 shares of the Series A. Liberty Media also holds convertible debt of United Pan-Europe Communications, N.V., a subsidiary of UGC, which it has agreed to exchange for additional shares in UGC.

- (D) Includes exercisable options held by Mr. Hibbard to acquire 4,250 shares of common stock and 50 shares of common stock purchased in July 2002.
- (E) Includes exercisable options held by Mr. Parsons to acquire 1,834 shares of common stock.
- (F) Mr. Matthews was granted options to acquire 1,750 shares of our common stock upon his election to our board of directors. Under the terms, conditions and vesting schedules as option grants made to other members of our board of directors, the options vest upon completion of one year of service measured from the grant date.
- (G) Includes exercisable options held by Mr. Armstrong to acquire 9,988 shares of common stock, and 150 shares of common stock purchased in June 2002.
- (H) Includes exercisable options held by Mr. Jacobson to acquire 11,354 shares of common stock, and 434 shares of common stock held in a 401K plan.
- (I) Represents holdings reported by Qila, LLC and RII Partners, Inc. on

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

September 20, 2002 on Form 13-D, "General Statement of Beneficial Ownership". Represents exercisable options to acquire 55,370 shares of common stock held by RT Investments, Inc. Mr. and Mrs. Chadha disclaim ownership in all these shares.

- (J) For each beneficial owner, the "Percentage of Outstanding" equals each owner's actual holdings of shares plus shares represented by vested, unexercised options and warrants or other securities convertible into our common stock held, divided by our total shares outstanding at January 31, 2003 plus the unexercised options and warrants or other securities convertible into our common stock detailed above of the referenced holder only. In other words, individual percentages of the listed holders will not add to the group total because the calculations are made separately for each holder.

42

- (L) "Diluted basis" is a concept that is used in the Exchange Agreement we have entered into in connection with our proposed restructuring transaction, and means the total number of shares of our common stock issued and outstanding immediately after the closing of the restructuring transaction, after giving effect to (i) the issuance of shares of common stock as part of the restructuring transaction, (ii) shares of our common stock issuable upon conversion of \$12.5 million principal amount of our new 7.5% convertible debentures being issued, and (iii) shares of our common stock issuable upon exercise of the new warrants being registered hereunder. "Diluted basis" does not give effect to (i) the shares of our common stock issuable under our new 2003 Equity Incentive Plan, (ii) shares of common stock issuable upon conversion of \$600,000 principal amount of new 7.5% convertible debentures that we are issuing to certain holders of Series A Preferred Stock as part of ourthe restructuring transaction in payment of certain legal fees incurred by them, (iii) shares of our common stock issuable upon conversion of our currently outstanding Series D Preferred Stock, and (v) shares of our common stock issuable upon exercise of existing options or warrants.
- (M) Includes 228,300 shares underlying convertible debentures held by Deutsche Bank AG, London Branch.
- (N) Includes 152,200 shares underlying convertible debentures held by ZLP Master Technology Fund, Ltd.
- (O) Includes 448,376 shares underlying convertible debentures held by Belmarken Holding B.V.
- (P) Includes 121,760 shares underlying convertible debentures held by Societe Generale.
- (Q) Includes 176,633 shares underlying convertible debentures held by Sorrento Holdings, L.L.C.

Item 5. Directors and Executive Officers

On May 31, 2003, our directors and executive officers were:

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Name ----	Age ---	Position -----
Phillip W. Arneson.....	66	Chief Executive Officer, President, and Chairman of the Board (ii)
Donne F. Fisher.....	64	Director (i), (ii)
Robert L. Hibbard.....	50	Director (ii)
Larry J. Matthews.....	75	Director (i)
Gary M. Parsons.....	53	Director (i)
Joe R. Armstrong.....	54	Chief Financial Officer
Richard L. Jacobson.....	60	Sr. Vice President, Legal and Secretary

(i) member of the Audit Committee

(ii) member of the Compensation Committee

Our by-laws provide that the members of the Board of Directors will be elected annually by our shareholders for one-year terms. Each director who is not an employee of our company or our subsidiaries receives \$1,000 for each Board of Directors or committee meeting attended. Directors who serve as the chairman of a committee receive an additional \$500 for each committee meeting attended. The Board of Directors has two committees: Audit and Compensation. There are no family relationships between any directors and officers.

Phillip W. Arneson, has been our Chairman and Chief Executive Officer since March 2002. He previously served as our President and Chief Operating Officer from October 2001 until his appointment as Chairman and Chief Executive Officer. He also has served as one of our directors since October 2000 and currently serves on the Meret Communications, Inc. and Sorrento Networks, Inc. Boards of Directors. From 1996 to 2001, Mr. Arneson held the position of

Executive Vice President for the privately held Frandsen Corporation, a diversified financial and manufacturing company where he was responsible for growing the enterprise through acquisitions, internal growth, and strategic partnerships. Additionally, he served as President of two of its operating companies. Mr. Arneson has served several public and private technology companies in executive management, holding positions as Chief Executive Officer, President and Group Vice President as well as having extensive experience as a director of such companies. From 1982 to 1986, he served as Executive Vice President of Allied Signal's Electronic Sector and as Chief Executive Officer of its subsidiary, Amphenol Corp. In 1986, Mr. Arneson's technology group garnered the prestigious IR-100 award for the development of an integrated fiber optics

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

phase modulator. Mr. Arneson holds a B.S. in Electrical Engineering from the University of Minnesota's Institute of Technology and is a veteran, U.S. Marine Corps.

Donne F. Fisher, has served as one of our directors since November 2001 and is chairman of our Audit Committee. Mr. Fisher is currently President of Fisher Capital Partners, Ltd., a private venture capital and investment company he founded in 1991. From 1982 to 1996, Mr. Fisher held various executive officer positions with Tele-Communications, Inc. ("TCI") and its subsidiaries including Executive Vice President and Treasurer. He was a TCI director from 1980 until 1999 when TCI merged into AT&T Corporation. Since his retirement in 1996, Mr. Fisher has been a consultant to TCI (now AT&T Broadband). Mr. Fisher also serves as a director of Liberty Media Corporation, a former subsidiary of AT&T, and General Communications, Inc., a diversified telecommunications provider.

Robert L. Hibbard, has served as one of our directors since November 2001 and is chairman of our Compensation Committee. Mr. Hibbard is an attorney and management consultant in private practice, in which he handles a wide variety of commercial matters including technology licensing and the structuring of merger and acquisitions transactions. From 1997 to 1999, Mr. Hibbard was Chief Executive Officer of Kim Technologies International, Inc., a privately held developer of electromechanical "super" capacitors for wireless applications. From 1994 to 1997, Mr. Hibbard was Vice President and General Counsel at Allied Signal Engines, and from 1987 to 1994, Assistant General Counsel at Allied Signal Aerospace. Mr. Hibbard holds a bachelors degree from Gustavus Adolphus College and a J.D. from Marquette University Law School, where he was a member of the Marquette Law Review.

Gary M. Parsons, has served on our Board of Directors since October 2000. Since 1996, Mr. Parsons has held the position of Chairman of the Board for XM Satellite Radio Holdings, Inc., and in October 2001 was named Chairman and Chief Executive Officer of Mobile Satellite Ventures, LLP. From 1996 to April 2002, Mr. Parsons served as Chairman of Motient Corporation, a wireless data firm. On January 10, 2002, Motient filed a voluntary bankruptcy petition in connection with a prearranged restructuring of its debt and emerged from bankruptcy on May 1, 2002. From 1990 to 1996, Mr. Parsons held a number of executive positions at MCI Communications, Inc., including Executive Vice President, Chief Executive Officer of MCI Metro, Inc., and President of MCI's Southern Division. From 1984 to 1990, Mr. Parsons held the responsibilities of Executive Vice President at Telecom USA, a fiber-optic and long distance venture subsequently acquired by MCI. Mr. Parsons holds a B.S. in Electrical and Computer Engineering from Clemson University and a MBA from the University of South Carolina.

Larry J. Matthews, has served on our Board of Directors since August 2002. Mr. Matthews was a co-founder of Zytec Corporation, a manufacturer of high performance electronics for the telecommunications and computer industries. Mr. Matthews served as an officer and director of

Zytec which grew from a start-up operation to a public company with revenues exceeding \$250 million annually during his tenure. In 1992, Zytec won the National Baldrige Quality Award. A public offering of Zytec was completed in 1994. In 1997, Zytec merged with Computer Products Corporation to form Artesyn Technologies (ATSN, NASDAQ). Mr. Matthews currently serves on Artesyn's board as

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

a director. He also serves on the Board of Veritec, Inc. (VRTC.OB, OTC BB), a seller of microprocessor-based encoding and decoding systems products. From January 1999 to June 2000, Mr. Matthews served as Veritec's Acting President and Chief Executive Officer. Mr. Matthews holds a Bachelor of Engineering degree from Iowa State University, and serves on the boards of several privately held companies.

Joe R. Armstrong, has served as our Chief Financial Officer since January 2001. He brings over 25 years of corporate finance, investor relations, treasury, legal and management experience to our company, having spent 15 years with State Of The Art, a leading provider of accounting software. As chief financial officer, vice president, finance and secretary of State Of The Art, he managed two rounds of venture capital financing, the company's initial public offering and several significant acquisitions and mergers. Prior to joining us, Mr. Armstrong most recently served as CFO for The Bohlin Company. Previously, he was director of marketing finance and financial planning for MAI Basic Four Corporation and a certified public accountant for Vicenti, Lloyd and Stutzman, a regional public accounting firm. Mr. Armstrong holds both bachelors and masters degrees in business from Utah State University.

Richard L. Jacobson, has been our Senior Vice President, Legal and Secretary since July 2000. Mr. Jacobson was a partner with the law firm of Fulbright & Jaworski, LLP from 1990 to 2000 where his practice consisted primarily of securities litigation and SEC enforcement matters. Prior to joining Fulbright in 1988 he was in private practice in Palo Alto, California, from 1986 to 1988, and in Washington, D.C., from 1980 to 1986. From 1977 to 1979, Mr. Jacobson worked for the SEC, where he was a member of the Trial Unit in the Enforcement Division and served as Special Counsel to the Chairman. He served as a law clerk for Ninth Circuit Judge Walter Ely from 1970 to 1971 and then clerked for Associate United States Supreme Court Justice William O. Douglas from 1971 to 1972. Mr. Jacobson holds a J.D. from the University of Southern California and a S.B. from the University of Chicago.

Our other key employees include:

Name -----	Age ---	Position -----

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Darin L. Clause has served as Vice President, Strategic Sales since September 2000 and joined us in December 1999 as Director, Sales Development. Prior to joining us, Mr. Clause was employed with Pirelli as a Senior Product Manager from 1996 to 1999, where he was responsible for implementation of indoor cabling and connectivity business lines for the CATV, CLEC, Utility and IXC markets and multiple channels. From 1994 to 1996, Mr. Clause was a Project and Sales Engineer for Sumitomo Electric Lightwave, where he was responsible for fiber optic passive component sales. Mr. Clause holds a B.S. in Mechanical Engineering from Clemson University.

Subrata Datta has served as Vice President, Engineering since November 2000 and joined upon our acquisition of Distributed Systems International, Inc. in 1996. From 1996 to 1999 he was responsible for all engineering development for the LAN adapter and hub/switch products. Prior to joining, Mr. Datta helped develop the ANSI FDDI and FDDI-II standards and design network components and system-level products for DSI. Prior to DSI, Mr. Datta had extensive design experience while working at AT&T Bell Laboratories on the 3B20 Duplex computer system, based on highly fault tolerant architectures, high-reliability and stringent up-time requirements. Before working for AT&T Bell Laboratories, Mr. Datta worked for IBM's Yorktown Research Center where he focused on FDDI development for their RS6000 workstation systems. Mr. Datta holds a M.S. and B.S. in Electrical Engineering from the Cooper Union School of Engineering.

Demetri Elias, Ph.D. has served as Vice President, Marketing since October 2000 and joined us in April 2000 as Director, Product Line Management. Prior to joining us, Sorrento, Dr. Elias was with Nortel Networks, a leading optical equipment developer, for over 22 years holding positions in research and development, consulting, product management and marketing. In his most recent Nortel Networks assignments he served as Director, Product Line Management and Director, Strategic Marketing on optical networking products. Dr. Elias holds a Ph.D. in Electrical Engineering from McGill University, Montreal, Canada.

Mary A. Lay has served as Vice President, Finance since July 2002 and joined us in March 2002 as Controller. Ms. Lay has also served as Meret's Chief Financial Officer since July 2002. Prior to joining, Ms. Lay brings over 20 years of corporate finance, treasury and management experience to the Company. Ms. Lay's previous experience includes contract and permanent position as Corporate Controller and Chief Financial Officer at several companies including On-Point Technology Systems, Inc., Curtis Coleman Company and Nexergy Tauber. Ms. Lay holds a B.A. in Financial Accounting from National University, an M.B.A. from the University of Phoenix and is a certified public accountant.

Jeff S. Phillips has served as Vice President, Corporate Development since January 2001. From 1995 to 2000, Mr. Phillips was a Vice President at US Bancorp where he focused on financing for telecom related technology concerns and advisory assignments. Prior to joining US Bancorp, Mr. Phillips was a financial analyst/strategist with Hillebrand GmbH, a European investment group. Mr. Phillips began his career as a floor trader at the London International Financial and Futures and Options Exchange where he focused on Deutsche Mark denominated financial derivatives. Mr. Phillips holds a B.A. in Economics from the University of California at Berkeley.

Marc W. Thurman has served as Vice President, Operations since April 2001. Mr. Thurman oversees our manufacturing and operations, supply chain management, and quality assurance

functions. He brings to us nearly 25 years of manufacturing operations, supply chain management and quality assurance experience on leading edge technologies and products for the computer and telecommunication markets. Mr. Thurman's previous experience includes service since 1971, in various functions at Packard Bell NEC, ComCrypt Systems, IDEA Courier, Inc., Sidereal Corporation, Intel Corporation, RTE Corporation, and Western Electric. In his most recent position, Mr. Thurman had manufacturing responsibilities including internal production, contract manufacturing (EMS) and third party manufacturing (TPM), supporting revenues of \$2 billion. Mr. Thurman holds a B.S. in Electrical Engineering from Oregon State University as well as an M.B.A. degree from University of Portland.

Mitchell R. Truelock, has served as Vice President, Sales and Marketing since February 2003 and is responsible for North American and Asia Pacific sales, marketing, product management and customer support. Mr. Truelock joined us in January 2003 as Vice President, Strategic Planning after having consulted with us since August 2002. Prior to working with us, from February 2000 to November 2001, Mr. Truelock was a Vice President in the communications equipment group at Robertson Stephens, a technology investment bank. From June 1998 to February 2000, Mr. Truelock was a Vice President in the technology group at Dain Rauscher Wessels, a technology investment bank. From September 1995 to June 1998, Mr. Truelock was a corporate attorney at Cooley Godward LLP where he focused on mergers and acquisitions, private financings and initial public offerings for technology companies. Mr. Truelock holds an L.L.M. in corporate securities at Georgetown University Law, a J.D. from Southern Methodist University, and a BBA in accounting from the University of Texas at Austin.

Li-Ran Wu has served as Vice President, Management Software since November 2000 and joined us in October 1999. Before joining us, Mr. Wu was a senior consultant and Lead Systems Engineer at Hitachi Telecom where he developed second-generation SONET equipment to complement WDM and OXC products within the OTN. He also developed the WDM information model that was published in 1998. Prior to working at Hitachi, Mr. Wu was with Nortel Networks, Racal Datacom and Taiwan Telecom. While at Nortel he developed a SONET UPSR-based communication messaging protocol. Mr. Wu holds an M.S. in Electrical Engineering from North Carolina State University and a B.S. in Computer Science from Chiao Tung University. He has also completed work on his doctoral thesis at the Georgia Institute of Technology.

Item 6. Executive Compensation

The following tables set forth the annual compensation for our Chief Executive Officer ("CEO") for the fiscal year ended January 31, 2003, and for our four most highly compensated executive officers (the "Named Executive Officers"), other than the CEO, who were serving as executive officers at the end of our fiscal year and whose salary and bonus exceeded \$100,000.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Summary Compensation Table

Name and Principal Position -----	Year ----	Annual Compensation -----		
		Salary (\$) -----	Bonus (\$) -----	Other Annual Compensation (\$) -----
Phillip W. Arneson, Chairman, Chief Executive Officer.....	2003	245,387	205,000	--
	2002	60,582	25,000	--
	2001	--	--	--
Joe R. Armstrong, Chief Financial Officer.....	2003	191,927	165,000	--
	2002	175,011	--	--
	2001	--	--	--
Richard L. Jacobson, Sr. VP Legal and Secretary....	2003	250,000	150,000	--
	2002	251,802	--	--
	2001	140,850	--	--
Jeff S. Phillips, VP Corporate Development.....	2003	170,019	68,000	--
	2002	170,019	10,000	--
	2001	--	--	--
Darin L. Clause, VP Strategic Sales.....	2003	160,014	--	79,393
	2002	160,014	--	158,399
	2001	145,181	--	51,101

(A) Bonus compensation represents performance and retention bonuses paid in fiscal year 2003 and 2002. In fiscal year 2003 Mr. Arneson received the final payment of \$5,000 of his \$30,000 signing bonus per his employment contract which took effect October 2001, a performance bonus of \$125,000 and a retention bonus of \$75,000. Mr. Armstrong received a performance bonus of \$105,000 and a retention bonus of \$60,000. Mr. Jacobson received a \$75,000 performance bonus and a \$75,000 retention bonus. Mr. Phillips received a \$51,000 performance bonus and a \$17,000 retention bonus.

In fiscal year 2002, Mr. Arneson received a signing bonus per his employment contract which took effect October 2001 of \$25,000 and Mr. Phillips received a \$10,000 performance bonus.

(B) Other compensation for Mr. Arneson for fiscal year 2003 consists of temporary living expenses paid by the company of \$48,930 and vacation accrual buy-out of \$23,237. In fiscal year 2002 Mr. Arneson had temporary living expenses of \$12,547.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

- (C) Other compensation for Mr. Armstrong represents vacation accrual buy-out.
- (D) Other compensation for Mr. Jacobson represents vacation accrual buy-out in fiscal year 2003 and relocation related expenses reimbursed by us in fiscal year 2001.
- (E) Other compensation for Mr. Phillips represents living expenses of \$37,918 and \$55,800 for fiscal years 2003 and 2002 respectively, and vacation accrual buy-out of \$6,539 in fiscal year 2002.
- (F) Other compensation for Mr. Clause represents car allowance of \$8,400, \$7,200 and \$2,400 for fiscal years 2003, 2002 and 2001 respectively. Mr. Clause had relocation expenses reimbursed by us of \$70,011 and \$49,340 for fiscal years 2002 and 2001 respectively.

Key Employee Retention and Incentive Plan:

In November 2002, our Board of Directors, acting on a recommendation of the Compensation Committee and in consultation with Towers Perrin, a national executive compensation accounting firm, approved our "Key Employee Retention and Incentive Plan." The purpose of this plan is to provide a means whereby we can achieve the ongoing retention of certain key employees and certain management personnel. In addition, the plan also provides for granting incentive based awards for the achievement of our goals and objectives along with recognition for the participant's continued contributions to our company. In the past we had no such formal plan.

A portion of the retention plan approved by our Board provides for certain economic benefits to be paid to participants upon a change of control or merger of our company. Management participants in the retention plan include our Chief Executive Officer, Chief Financial Officer and Senior Legal Counsel, each of whom have waived their rights to compensation benefits that could or would be triggered under this plan related to our upcoming capital restructuring efforts.

Long-Term Incentive Plans

We have no long-term incentive plans other than our various stock option plans.

Option Grants -- Year Ended January 31, 2003

There were no option grants exercised for the year ended January 31, 2003 for any of the Named Executive Officers.

Aggregated Option/SAR Exercises

The following table sets forth information concerning each exercise of stock options during the year ended January 31, 2003 by each of the Named Executive Officers and the January 31, 2003 value of unexercised options.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Name	Shares Acquired On Exercise (#)	Value Realized (\$)	Number of Securities Underlying Unexercised Options at Fiscal Year-End (\$)		Value of In-the-Mon at Fiscal Exercisable
			Exercisable	Unexercisable	
Phillip W. Arneson.....	--	--	16,833	3,750	--
Joe R. Armstrong.....	--	--	8,875	9,125	--
Richard L. Jacobson.....	--	--	10,760	5,940	--
Jeff S. Phillips.....	--	--	4,805	2,695	--
Darin L. Clause.....	--	--	2,021	2,021	--

(A) Options are "in-the-money" if, on January 31, 2003, the market price of our common stock (\$6.33) exceeded the exercise price of such options. The value of such options is calculated by determining the difference between the aggregate market price of our common stock covered by such options on January 31, 2003, and the aggregate exercise price of such options. As of January 31, 2003 there were no options held by executive officers or management that were exercisable at \$6.33 or less.

Employment Agreements

On March 1, 2002 Mr. Arneson assumed the role as our Chairman, President and Chief Executive Officer. On April 30, 2002, our Board of Directors approved an employment agreement with Mr. Arneson regarding the terms of his employment as Chairman, Chief Executive Officer and President and which superseded his August 2002 contract. The agreement provides for an annual compensation of \$250,000. The agreement also calls for the vesting, as of March 1, 2002, of the 6,250 options granted Mr. Arneson on September 17, 2001, and the granting of 23,750 additional stock options (adjusted for the 1-for-20 reverse split) at a strike price equal to the closing price of our common stock on Nasdaq on March 1, 2002, which shares are to vest at the rate of 1,000 shares per month beginning on April 1, 2002, continuing for 12 months, when 5,000 additional shares vest, and beginning on May 1, 2003, 1,125 shares will vest each month. The employment is at will; however, if Mr. Arneson should be terminated without cause or resign in certain circumstances, he would receive a lump sum severance payment of two years' base salary and vesting of all stock options, and health and life benefits; he would be required to provide exclusive consulting services for two years following his termination. The agreement also calls for the reimbursement of living expenses in San Diego at the rate of \$2,750.00 per month while Mr. Arneson remains employed.

In May 2002, we entered into an employment agreement with Mr. Armstrong, our Chief Financial Officer, which provides for an annual salary of \$200,000 per

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

year plus bonus of \$20,000 to be paid in lump-sum in June 2002, and 10,500 options (adjusted for the 1-for-20 reverse split) to acquire our common stock, which vest over two years. The contract is for no specified term and Mr. Armstrong is an at-will employee such that we or Mr. Armstrong may terminate employment at any time, with or without cause or notice, and with or without reason, subject to the rights and obligations as provided in the contract. However, should Mr. Armstrong be terminated without cause he will receive a lump-sum severance payment of one year's salary, health and life benefits for one year and vesting of all his options. In the event of a change of control, merger or sale of our company, Mr. Armstrong is entitled to receive an immediate payment equal to one year's salary, health and life benefits for one year and vesting of all his options.

In July 2002, we entered into an employment agreement with Mr. Jacobson which provides for an annual salary of \$250,000 per year and 9,000 options (adjusted for the 1-for-20 reverse split) to acquire our common stock, which vest over two years. The contract is for no specified term and Mr. Jacobson is an at-will employee such that either we or Mr. Jacobson may terminate employment at any time, with or without cause or notice, and with or without reason, subject to the rights and obligations as provided in the contract. However, should Mr. Jacobson be terminated without cause he will receive a lump-sum severance payment of six month's salary and vesting of all his options. In the event of a change of control, merger or sale of our company, Mr. Jacobson is entitled to receive an immediate payment equal to six month's salary and vesting of all his options.

On January 25, 2002, the then Directors of Meret Optical Communications, Mr. Cheng and Mr. Sue, approved an employment agreement with Mr. Rajadhyksha appointing him President of Meret and raising his annual salary to \$210,000 per year. In addition to the increase in salary there were provisions for severance benefits based upon termination without cause or change in control of Company. Severance benefits for termination without cause or change in control provisions allow Mr. Rajadhyksha to receive a lump sum payment of up to one year's salary and the vesting of all his options to acquire our common stock. As of August 27, 2002 Mr. Rajadhyksha was no longer with our company and he was paid severance benefits of \$28,270 in full settlement.

Our then Board of Directors approved a two-year employment contract with Mr. Mason ending May 2002, which provided for a base salary of \$130,900 per year and vesting of all his options to acquire our common stock granted prior to February 1, 2000. This contract could be terminated for cause. However, were Mr. Mason to be terminated without cause or resign in certain circumstances prior to the end of the contract term he was entitled to receive a continuation of his base salary and benefits for two years, vesting of all his options to acquire our common stock, and he would be contractually required to provide consulting services to us during the two years following his termination. In March 2002 Mr. Mason notified us that he was resigning with cause, relying on an agreement between Mr. Mason and Dr. Cheng in April 2001 that allowed him to resign for cause at any time prior to the expiration of his employment agreement as a result of having been relocated more than 35 miles from his prior employment location. Mr. Mason's resignation under these circumstances entitled him to receive two year salary and benefit continuation and immediate stock vesting which we agreed to provide on the condition that Mr. Mason sign our standard employee confidentiality, proprietary and invention

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

agreement. Mr. Mason refused to sign the confidentiality agreement and also refused to return valuable company property in his possession. As a result we stopped payments to Mr. Mason and have sought recovery of sums already paid to Mr. Mason under his consulting agreement. Mr. Mason is seeking acceleration of his extended employment benefits.

Our then Board of Directors approved a two-year employment contract with Mr. Sue ending May 2002, which provided for a salary of \$168,500 per year and the vesting of all his options to acquire our common stock granted prior to February 1, 2000. This contract could be terminated for cause. However, were Mr. Sue to be terminated without cause or resign in certain circumstances prior to the end of the contract term he was entitled to receive a continuation of his salary and benefits for two years, vesting of all his options to acquire our common stock and could be contractually required to provide consulting services to us during that period. On May 8, 2002 Mr. Sue resigned from his position effective May 17, 2002 alleging entitlement to the foregoing salary continuation and other benefits. We do not believe Mr. Sue is entitled to any such benefits. In June, 2002 Mr. Sue filed a complaint in arbitration against us to seek entitlement to his salary continuation. We are opposing the complaint and have filed counter claims against Mr. Sue for certain breaches of his duties as an officer and employee of the company.

Our then Board of Directors entered into a two-year employment contract with Mr. Nimrod Johnson, Corporate Controller, ending May 22, 2002, which provided for a salary of \$97,307 per year and the vesting of all his options to acquire our common stock. This contract could be terminated for cause. However, were Mr. Johnson to be terminated without cause or resign in certain circumstances prior to the end of the contract term he was entitled to receive a continuation of his salary and benefits for two years, vesting of all his options to acquire our common stock and could be contractually required to provide consulting services to us during that period. On May 9, 2002 Mr. Johnson resigned from his position effective May 17, 2002 alleging entitlement to the foregoing salary continuation and other benefits. We do not believe Mr. Johnson is entitled to any such benefits. In June, 2002 Mr. Johnson filed a complaint in arbitration against seeking entitlement to his salary continuation and benefits.

Compensation Committee Report

The following report shall not be deemed incorporated by reference by any general statement incorporating by reference this registration statement on Form 10 into any filing under the Securities Act of 1933 or under the Securities Exchange Act of 1934, except to the extent we specifically incorporate this information by reference, and shall not otherwise be deemed filed under such Acts.

The Compensation Committee currently consists of Donne F. Fisher, Robert L. Hibbard and Phillip W. Arneson. The Compensation Committee reviews, recommends and approves changes to our compensation and benefits policies and programs, makes recommendations to the Board for options granted under our plans and is responsible for reviewing and approving the compensation for our executive officers and certain of our senior management. A majority of the Committee is neither our employees nor our former employees nor are they eligible to participate in any of our executive compensation programs. Mr. Arneson does not participate in meetings of the Committee concerning his compensation.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We have developed and are developing compensation programs designed to reflect our performance and to be competitive in the marketplace. In designing compensation programs, we attempt to reflect both value created for shareholders while supporting our strategic goals. The goals of our short-term and long-term compensation programs are to:

Attract, retain and motivate a high caliber executive leadership team and employee group;

Provide competitive base salaries in keeping with a philosophy of career continuity;

Align executive compensation with shareholder interests;

Support our short-term and long-term strategic goal and objectives;

Promote our value and reward individuals for outstanding contributions to our success.

The nature of our business requires a technologically innovative personnel team to make a long-term commitment to our growth. Accordingly, we grant incentive awards primarily in the form of stock options with view towards long-term corporate performance. These awards may not fluctuate as much as year-to-year financial results. Under our programs, a substantial portion of senior executives' potential compensation depends on increases in shareholder value.

We pay for performance on the basis of an individual's level of responsibility. For this purpose, performance means both individual and corporate performance. Individual performance includes the ability to put our business plans into effect and to react to unanticipated events. We base compensation decisions for all employees, including the executive officers on these criteria.

Our executive compensation is based upon three components, base salary, short-term incentive awards and long-term incentives, which are intended to meet our compensation program goals.

Base Salary

In keeping with the long-term and highly technical nature of our business, we take a long-term approach to management development. This career-oriented philosophy requires a competitive base salary. We base our salary structure on competitive positioning (comparing our salary structure with salaries paid by comparable companies), our own business performance, and general economic factors, and increases in the individual's responsibilities, whether through promotions or otherwise. Specific weights are not given to these factors, but competitive positioning is the most important factor. Within the comparable salary ranges, we determine individual senior management salaries based on individual performance, level of responsibility, and experience.

Short-Term Incentive Awards

Our short-term incentive awards are discretionary. When deemed appropriate, they are designed to reflect the officer's contribution to the overall success of the organization and also consider the long-range impact of near-term decisions and contributions. Any award an

executive receives depends on his/her individual performance and level of responsibility. Both objective and subjective measures are considered. These include, but are not limited to: sales, profit margins, operating expense, net income, working capital, individual initiative, business judgment, technical expertise and operational excellence.

Long-Term Incentive Awards

Long-term incentive awards are intended to develop and retain strong management through share ownership and incentive awards that recognize future performance. At present, stock options are the only long term incentive granted to executive officers and all our employees. The Committee believes that a significant portion of senior management's compensation should depend on value created for the shareholders. Options are an excellent way to accomplish this because they tie management's interests directly to the shareholders' interests.

The number of options granted to senior management is based on individual performance and level of responsibility. For this purpose, the Committee measures performance the same way as described above for short-term awards. Option grants must be sufficient in size to provide a strong incentive for executives to work for long-term business interests and become significant owners of our company.

Compensation of the Chief Executive Officer

For fiscal year 2002, Mr. Arneson earned a base salary pursuant to the terms of his employment agreement, outlined above. In addition, he was paid the final payment of \$5,000 of his \$30,000 signing bonus per his employment contract which took effect October 2001, a performance bonus of \$125,000 and a retention bonus of \$75,000.

Stock Option Exchange Offer

To address the needs of our employees, to retain talented employees, and to keep our employees motivated, the Compensation Committee approved a stock option exchange program. The stock option exchange offer was a voluntary program that allowed eligible employees to exchange some or all of their eligible underwater stock options that had an exercise price greater than or equal to \$7.50 per share (before giving effect to our 1-for-20 reverse stock split in October 2002) for our FIBR shares and all options granted by our subsidiary Sorrento Networks, Inc., options regardless of exercise price, for the opportunity to receive an option for a smaller number of shares at a current market price. Eligible employees were required to declare their election to participate in the program before May 17, 2002, at which time the options they elected to exchange were cancelled. In order for the company to avoid adverse accounting treatment, the new grant was awarded after the expiration of six months and one day following the day the exchanged options were cancelled.

All new options granted in the stock option exchange program were vested to the same degree that the cancelled options would have been vested on the replacement grant date, with the remaining unvested portion of each new option grant vesting after the replacement grant date in accordance with the vesting schedule of the cancelled options for which the new grant was exchanged.

Our then current and former directors and executive officers, and key management were not eligible to participate in the stock option exchange program.

We believe the actions we have taken over the past fiscal year have aligned with our objectives and were appropriate to attract, retain and motivate the talent we need to execute our restructuring plan and restore value to our shareowners.

Phillip W. Arneson
Robert L. Hibbard
Donne F. Fisher

Item 7. Certain Relationships and Related Transactions

In February 2003 we entered into a consulting agreement with Mr. Robert Hibbard, to provide services to the Board of Directors and management of our company at a consulting rate of \$175 per hour and a retainer of \$20,000 per month for six months. Mr. Hibbard agrees to make himself available to us for not less than 20 hours per week. The term of this agreement is for twelve months, but may be terminated after six months by either party, with or without cause, upon 5 days written notice. This agreement supersedes his August 2002 consulting agreement. Nearly all of Mr. Hibbard's consulting work for us has involved matters being considered or reviewed by the Board or by committees of the Board. His work has included structuring and implementing our 2003 Equity Incentive Plan, participation in settlement negotiations for pending litigation, assistance in our capital restructuring and improving our intellectual property policies and procedures, among other matters. In fiscal year 2003 Mr. Hibbard was paid \$91,836 in consulting fees.

During July 2000 we agreed to loan \$300,000 for three years at the applicable federal rate provided for in Internal Revenue Code Section 1274 to Mr. Jacobson in connection with accepting employment as our Senior Vice President, Legal. This is a full recourse loan and Mr. Jacobson has pledged his options to acquire our common stock and any options he may receive from any of our subsidiaries as collateral. Mr. Jacobson has received \$300,000 in advances under this loan agreement for which the interest rate is 6.6%. On July 3, 2002 a new note covering the \$300,000 was incorporated in Mr. Jacobson's employment contract. The term remained the same as the July 2000 note, with all unpaid, accrued interest and principal due and payable on August 30, 2003. In December 2002, Mr. Jacobson paid \$39,330 on his loan that included payment of all prior interest due and the remainder applied to his principal balance. As of January 31, 2003 Mr. Jacobson's loan outstanding to our company totaled \$297,961.

During June 2000, we entered into various agreements with Par Chadha, our former CEO and Chairman, which, among other matters, provided for payments of \$250,000 per year for three years of consulting services and loans by us for the exercise of previously granted options to acquire 58,925 options at prices varying from \$140.60 to \$985.00 per share. As the members of our Board of Directors at the time of his resignation ceased to represent more than 50% of the Board in October 2000, all payments for consulting services were accelerated and no future consulting services are required. During October 2000, Mr. Chadha

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

exercised 3,556 options, applying the \$500,000 accelerated payment to the exercise. In addition, he exercised 25,369 options for which we were contractually obligated to loan the \$5.0 million due on their exercise.

55

Mr. Chadha provided us with written notification dated in September 2001 that he does not have any obligations under the agreements. We have notified him that we do not agree with his interpretation of his repayment obligations under the terms of the agreements.

During December 2001, we entered into an agreement whereby the 25,369 option exercise was rescinded. Mr. Chadha returned the 25,369 shares to us for cancellation and we cancelled the receivable due from him and restored the original option agreements. In June 2002, we filed with the Superior Court of California, County of Los Angeles a Complaint for Declaratory Relief regarding the interpretation of the agreement. Also in June 2002, Mr. Chadha filed a lawsuit against us in the Superior Court of California, County of Los Angeles, seeking declaratory relief with respect to the interpretation of his separation agreement and in addition, alleging breach of contract with respect to his option exercise rights and fraud in connection with his rescission agreement. In February 2003, both of these lawsuits were dismissed without prejudice to facilitate settlement negotiations, but they can be refiled at any time. In April 2003, an agreement in principle to settle these lawsuits was reached, subject to the execution of a definitive agreement. There can be no assurance that such a definitive settlement agreement will be executed. Should the cases be refiled, and should Mr. Chadha prevail in court, in addition to any other relief that may be granted, we may be required to issue him 58,925 shares of our stock for no consideration, and/or pay him cash damages, which he alleges to be in excess of \$4 million.

In November 2001, we acquired in a like kind exchange furniture having an approximate current value of \$8,000 from Digital Boardwalk, Inc. ("DBI") which is an affiliate of Par Chadha, our former Chairman and CEO. Also, during the fourth quarter of fiscal 2002, our Meret subsidiary retained DBI to consult on various matters, for which DBI charged a consulting fee of approximately \$49,000, and our Sorrento Networks, Inc. subsidiary retained DBI to consult on a matter for which DBI charged a consulting fee of approximately \$7,000.

On September 30, 2001, our then Chairman and CEO executed a two year consulting agreement with Leonard Hecht whereby Mr. Hecht was to be paid a salary at \$250,000 per year plus benefits and the vesting of all his options to acquire our common stock. We have since stopped making payments under this agreement, and have been notified by Mr. Hecht that he believes we have thereby breached this agreement.

In September 2000, our then Board of Directors approved a two year consulting agreement with Rohit Phansalkar whereby he is paid a salary of \$250,000 per year plus benefits and the vesting of all his options to acquire our common stock. This contract was amended July 21, 2001.

During fiscal 2002, we paid a total of \$55,218 to Phillip W. Arneson as one of our directors. The amounts paid included \$23,500 for consulting work performed for a special Committee of the Board, \$20,760 for various other consulting services including outsourcing advice and organizational matters,

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

attendance fees of \$6,000 for Board and Committee meetings and \$4,958 in reimbursable expenses. Consulting fees were paid at a rate equal to normal fees for attendance at Board meetings.

During fiscal 2001, we entered into employment agreements with Mr. Hecht, Mr. Phansalkar, Mr. Sue, and Mr. Jacobson which provide for loans to the employees to exercise stock options to acquire our common stock and the stock of our subsidiaries including any

56

required tax withholdings due upon exercise. The loans are for a period not to exceed two years at the applicable federal rate, are full recourse and require the pledge of shares issued upon exercise. Currently, no such loans are outstanding.

Item 8. Legal Proceedings

On September 10, 2001, holders of a portion of the outstanding Series A Preferred Stock of our Sorrento Networks, Inc. ("SNI") subsidiary obtained a preliminary injunction from the Delaware Court of Chancery prohibiting it from issuing further shares of its Series A Preferred Stock or incurring any additional debt without the consent of the holders of a majority of the outstanding shares of such Series A Preferred Stock. On January 23, 2002, the Delaware Supreme Court affirmed the granting of the preliminary injunction.

On October 19, 2001, an amended complaint was filed in the injunction action adding as named defendants, our company, our Meret subsidiary, certain of our present and former officers and directors and of our subsidiaries as well as our investment bankers. The amended complaint also added, among other things, claims for fraud, securities fraud, breach of fiduciary duty, conspiracy, and intentional interference with contract as well as requesting the appointment of a receiver for our SNI, all of which claims are based on alleged wrongs committed in connection with or since the Series A placement. SNI and the original individual defendants have all answered this amended complaint denying all allegations of wrongdoing. The new defendants have all moved to dismiss the amended complaint. Management believes the allegations contained in the amended complaint are without merit.

On December 14, 2001, plaintiffs filed motions to sequester the common stock of SNI that are owned by Meret, and the Sorrento Series A Preferred Stock that we own, as an alternative method of obtaining jurisdiction over us and Meret in the Delaware litigation. Management also believes that these motions are without merit.

Currently, hearings on all pending motions have been taken off calendar at the request of all parties, pending the resolution of ongoing settlement discussions between our company and the plaintiffs. Section 8.3 of the Exchange Agreement, as amended, entered into in connection with our proposed capital restructuring provides that this litigation will be dismissed with prejudice against our company, our subsidiaries, and our current officers and directors and any other defendants who execute and deliver a release, and without prejudice against all other defendants, following the closing of the restructuring transaction.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

During June 2000, we entered into various agreements with Par Chadha, our former CEO and Chairman, which, among other matters, provides for payments of \$250,000 per year for three years of consulting services and loans by us for the exercise of previously granted options to acquire 58,925 options at prices varying from \$140.60 to \$985.00 per share. As the members of our Board of Directors at the time of his resignation ceased to represent more than 50% of the Board in October 2000, all payments for consulting services were accelerated and no future consulting services are required. During October 2000, Mr. Chadha exercised 3,556 options, applying the \$500,000 accelerated payment to the exercise. In addition, he exercised 25,369 options for which we were contractually obligated to loan the \$5.0 million due on the exercise. Mr. Chadha provided us with written notification dated in September 2001 that he does not have any obligations under the agreements. We notified him that we do not agree with his interpretation of his repayment obligations under the terms of the agreements.

57

During December 2001, we entered into an agreement whereby the 25,369 option exercise was rescinded. Mr. Chadha returned the 25,369 shares to us for cancellation and we cancelled the receivable due from him and restored the original option agreements. In June 2002, we filed with the Superior Court of California, County of Los Angeles a Complaint for Declaratory Relief regarding the interpretation of the agreement. Also in June 2002, Mr. Chadha filed a lawsuit against us in the Superior Court of California, County of Los Angeles, seeking declaratory relief with respect to the interpretation of his separation agreement and in addition, alleging breach of contract with respect to his option exercise rights and fraud in connection with his rescission agreement. In February 2003, both of these lawsuits were dismissed without prejudice to facilitate settlement negotiations, but they can be refiled at any time. In April 2003, an agreement in principle to settle these lawsuits was reached, subject to the execution of a definitive agreement. There can be no assurance that such a definitive settlement agreement will be executed. Should the cases be refiled, and should Mr. Chadha prevail in court, in addition to any other relief that may be granted, we may be required to issue him 58,925 shares of our stock for no consideration, and/or pay him cash damages, which he alleges to be in excess of \$4 million.

In April 2002, our former Chairman and Chief Executive Officer, Dr. Xin Cheng, who was terminated without cause, filed a claim in arbitration seeking, among other things, payment of \$500,000 and acceleration of the vesting of options pursuant to alleged contractual obligations of SNI. The arbitrator has issued a decision favorable to Dr. Cheng, and having exhausted our legal remedies, we have paid Dr. Cheng \$610,000 in full satisfaction of the arbitration award.

In addition, claims in arbitration have been filed by two of our former financial officers and employees who worked in our Santa Monica office, which has now been closed, alleging that their resignations in May 8, 2002 were for "good reason" as defined in their employment agreements, all of which were to expire on May 22, 2002. We are disputing these claims, and have filed counterclaims in one of the arbitrations. The aggregate amount of these claims is in excess of \$490,000.

We filed a lawsuit against United Pan Europe Communications, N.V., one of

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

our customers and a related party to one of SNI's Series A shareholders, in connection with a past due receivable in the amount of \$1.6 million for equipment shipped in 2000. The defendant has filed for protection under the federal bankruptcy laws, and pursuant to the Exchange Agreement entered into in connection with our capital restructuring, we have executed a definitive settlement agreement and a stipulation of dismissal with prejudice resolving this lawsuit in return for a payment of \$350,000 and the return of certain of the equipment previously shipped. We have received the payment of \$350,000 from UPC and, in accordance with the terms of the Exchange Agreement, have paid that same amount to certain Series A Preferred Stock holders to defray legal costs incurred by them. The equipment has also been returned.

We have been sued by a former officer of SNI alleging breach of a consulting agreement we entered into with him in March 2002, following his resignation "for good reason" as defined in his employment agreement. Our execution of the consulting agreement, upon resignation "for a good reason" was required by the employment agreement, which had been approved by our then Board of Directors in the summer of 2000. The former officer is seeking acceleration of consulting fees due to him under his consulting agreement in the amount of \$229,000. We feel these claims are without merit and are vigorously defending the claims. We have also filed counterclaims. Currently, the matter is in the early stages of discovery.

58

From time to time, we are involved in various other legal proceedings and claims incidental to the conduct of our business. Although it is impossible to predict the outcome of any outstanding legal proceedings, we believe that such legal proceedings and claims, individually and in the aggregate, are not likely to have a material effect on our financial position, results of operations, or cash flows.

Item 9. Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters

Our common stock traded on the Nasdaq SmallCap Market under the symbol FIBR since 1994. On December 16, 1998, we commenced trading on the Nasdaq National Market System under the same symbol.

Effective October 28, 2002 we implemented a one-for-twenty reverse split of our outstanding shares of common stock. No fractional shares were issued in connection with the reverse stock split. In lieu of fractional shares, shareholders received a cash payment based on the market price, after adjustment for the effect of the stock combination. The par value of the common stock changed to \$6.00 per share and the number of authorized shares decreased from 150 million to 7.5 million shares of common stock. The reverse stock split also affects options, warrants and other securities convertible into or exchangeable for shares of our common stock that were issued and outstanding immediately prior to the effective time of the stock combination. Preferred stock was not affected.

The following table sets forth the high and low closing bid prices for our common stock in the over-the-counter market from February 1, 2001 to January 31, 2003, based upon information obtained from Nasdaq. Quotations represent inter-dealer prices; they do not include retail markups, markdowns, or

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

commissions; and they may not represent actual transactions.

Fiscal 2001-2002 -----	High -----	Low -----
Quarter from February 1, 2001 to April 30, 2001.....	\$510.00	\$ 78.20
Quarter from May 1, 2001 to July 31, 2001.....	\$323.80	\$110.60
Quarter from August 1, 2001 to October 31, 2001.....	\$160.40	\$ 33.40
Quarter from November 1, 2001 to January 31, 2002.....	\$101.20	\$ 64.20
Fiscal 2002-2003 -----		
Quarter from February 1, 2002 to April 30, 2002.....	\$ 73.20	\$ 40.00
Quarter from May 1, 2002 to July 31, 2002.....	\$ 53.00	\$ 13.20
Quarter from August 1, 2002 to October 31, 2002.....	\$ 14.80	\$ 2.40
Quarter from November 1, 2002 to January 31, 2003.....	\$ 15.07	\$ 4.15

On March 31, 2003, the average of the high and low bid quotation for our common stock was \$7.00 per share. There is no assurance that a market in our common stock will continue.

Approximate Number of Holders of Common Stock

As of May 31, 2003, (the latest practicable date) there were approximately 756 shareholders of record, including brokerage firms and nominees, of our common stock.

59

Dividends

We have never paid any cash dividends on our common stock. The present policy of our Board of Directors is to retain all available funds to finance the planned level of operations. In light of the anticipated cash needs of our business, it is not anticipated that any cash dividends will be paid to the holders of our common or preferred stock in the foreseeable future.

Securities Authorized For Issuance Under Equity Compensation Plans

The following table provides information as of January 31, 2003 regarding compensation plans (including individual compensation arrangements) under which our equity securities and those of SNI are authorized for issuance.

Number of Securities To Be Issued Upon Exercise Of Outstanding Options, Warrants and	Weighted-Average Exercise Price of Outstanding Options,	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities
--	--	---

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Plan Category	Rights	Warrants and Rights	Reflected in Column (a)
	(a)	(b)	(c)
Equity Compensation Plans			
Approved by security Holders * (FIBR).....	294,277	\$387.53	260,723
Equity Compensation Plans not Approved by Security Holders (SNI).....	3,296,003	\$ 4.93	20,000,000
Total.....	3,590,280	\$ 36.29	20,260,723

* As adjusted for stock splits.

See Note K to the Consolidated Financial Statements for information regarding the material features of the above plans. Each of the above plans provides that the number of shares with respect to which options may be granted, and the number of shares of common stock subject to an outstanding option, shall be proportionally adjusted in the event of a subdivision or consolidation of shares or the payment of a stock dividend on common stock, and the purchase price per share of outstanding options shall be proportionately revised.

Item 10. Recent Sales of Unregistered Securities

During fiscal year 2003 we did not issue any shares of our common stock that were not registered under the Securities Act of 1933. See Item 2, Financial Information for previous years.

Item 11. Description of Registrant's Securities to be Registered.

We are registering hereunder warrants to purchase approximately 591,000 shares of our common stock, which have a par value of \$0.001 per share. We expect to issue the warrants to our shareholders of record on May 28,

2003. The warrants will be issued as of the closing date of our upcoming restructuring transaction, June 4, 2003. The exercise price of the warrants is \$5.96.

The warrants are non-transferable, and may be exercised at any time after the first anniversary date of the restructuring transaction and before August 2, 2007. We have the right to repurchase the warrants upon 30 days prior notice, for \$0.01 per warrant share, at any time after the volume-weighted average market price of our common stock for any ten consecutive trading days equals or exceeds 150% of the exercise price. Exercise of the warrants is subject to the effectiveness of a registration statement with respect to the shares of our common stock to be issued upon exercise of the warrants. We anticipate filing a registration statement registering the shares of our common stock for which the warrants are exercisable prior to the first year anniversary of the closing date of the restructuring transaction.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Item 12. Indemnification of Directors and Officers

Our Certificate of Incorporation permits indemnification to the fullest extent permitted by Delaware law. Our bylaws require us to indemnify any person who was or is a party or is threatened to be made a party to any proceeding, by reason of the fact that such person was or is our director or officer or that, being or having been such a director or officer, such person is or was serving at our request as a director, officer, employee or agent of another business entity, against expenses, judgments, penalties, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such proceeding if such person acted in good faith and in a manner such person reasonably believed to be in, or not opposed to, our best interests and, with respect to any criminal third party proceeding (including any action or investigation which could or does lead to a criminal third party proceeding) had no reasonable cause to believe such conduct was unlawful. We may also indemnify any person who was or is our authorized representative and who was or is a party or is threatened to be made a party to any proceeding by reason of the fact that such person was or is an authorized representative, against expenses actually and reasonably incurred by such person in connection with the defense or settlement of such proceeding if such person acted in good faith and in a manner reasonably believed to be in, or not opposed to, our best interests, except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable to us unless and only to the extent that the court in which such corporate proceeding was pending shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, such authorized representative is fairly and reasonably entitled to indemnity for such expenses which the court shall deem proper. Such indemnification is mandatory under the our by-laws as to expenses actually and reasonably incurred to the extent that our authorized representative has been successful on the merits or otherwise in defense of any third party or corporate proceeding or in defense of any claim, issue or matter therein. The determination of whether an individual is

61

entitled to indemnification may be made by a majority of disinterested directors, independent legal counsel in a written legal opinion or the shareholders.

The Delaware General Corporation Law authorizes a corporation to indemnify directors, officers, employees or agents of the corporation if such party acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the best interest of the corporation and, with respect to any criminal action or proceeding, had no reason to believe his or her conduct was unlawful, as determined in accordance with Delaware General Corporation Law. Delaware law further provides that indemnification shall be provided if the party in question is successful on the merits otherwise. In addition, Delaware General Corporation Law does not permit indemnification in an action or suit by or in the right of the corporation, where such person has been adjudged liable to the corporation, unless, and only to the extent that, a court determines that such person fairly and reasonably is entitled to indemnity for costs the court deems proper in light of liability adjudication. Indemnity is mandatory to the extent a claim, issue or matter has been successfully defended.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

We currently maintain a directors and officers liability insurance policy.

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

The Shareholders of Sorrento Networks Corporation
9990 Mesa Rim Road
San Diego, CA 92121

We have audited the accompanying consolidated balance sheets of Sorrento Networks Corporation (a New Jersey corporation) and subsidiaries (collectively

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

the "Company") as of January 31, 2003 and 2002 and the related consolidated statements of operations and comprehensive loss, stockholders' equity (deficit) and cash flows for each of the three years in the period ended January 31, 2003. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of January 31, 2003 and 2002, and the results of their operations and their cash flows for each of the three years in the period ended January 31, 2003 in conformity with accounting principles generally in the United States of America.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As discussed in the Note R, the Company is in the process of completing a restructuring plan that is subject to shareholder approval. If the Company is not successful in the restructuring it will be delisted from Nasdaq, this delisting would constitute a triggering event that would allow their debenture holders to request accelerated payment of their debentures at 125% of the face value, this condition gives rise to substantial doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustments that might arise from this uncertainty.

As discussed in Note F, the 2002 Financial Statements have been restated to reflect a change in the calculation of the beneficial conversion feature of the Company's debentures.

Sorrento Networks Corporation (formerly Osicom Technologies, Inc.) (the "Company," "We," "Our," or "Us") through its subsidiaries designs, manufactures and markets integrated networking and bandwidth aggregation products for enhancing the performance of data and telecommunications networks. Our products are deployed in telephone companies, Internet Service Providers, governmental bodies and the corporate/campus networks that make up the "enterprise" segment of the networking marketplace. We have facilities in San Diego, California and Fremont, California. In addition, we have various sales offices located in the United States and Europe. We market and sell our products and services through a broad array of channels including worldwide distributors, value added resellers, local and long distance carriers and governmental agencies.

A. THE COMPANY AND BASIS OF PRESENTATION

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect the reported amounts of assets, liabilities, revenues and expenses, the disclosure of contingent assets and liabilities. Actual results could materially differ from these estimates.

We have incurred significant losses and negative cash flows from operations for the past two years. Sorrento Networks, Inc. ("SNI"), the Company's principal operating subsidiary has primarily been the operating entity responsible for these high losses and negative cash flows. The losses have been generated as SNI continues to develop its technology, marketing and sales and operations in its effort to become a major supplier of metro and regional optical networks world-wide. In addition, we have incurred significant restructuring costs of approximately \$2.8 million in 2003 associated with restructuring of our obligations under our Senior Convertible Debentures and Series A Preferred Stock Holders obligations. While we feel these restructuring costs are beneficial to our long-term survival in a depressed telecom market, there is no certainty the restructuring will be approved by the shareholders or will close with our Series A Holders and Senior Convertible Debenture Holders even with Shareholder approval.

Even if our debenture repayment obligations are not accelerated, our future capital requirements may vary materially from those now planned including the need for additional working capital to accommodate planned growth, hiring and infrastructure needs. There can be no assurances that our working capital requirements will not exceed our ability to generate sufficient cash internally to support our requirements and that external financing will be available or that, if available, such financing can be obtained on terms favorable to us and our shareholders.

Digi International, Inc. and NETsilicon, Inc. -- On September 15, 1999, NETsilicon, Inc. ("NSI") completed an initial public offering in which 6,037,500 shares of its common stocks were sold (3,537,500 shares by NSI and 2,500,000 shares by us). NSI received net proceeds of \$22.3 million and we received net proceeds of \$15.4 million. In addition, NSI repaid advances due us of \$5.9 million. In connection with the initial public offering by NSI, our remaining 55% interest became non-voting shares. Accordingly, our financial statements

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

reflected the results of operations of NSI through September 14, 1999 at which time our remaining interest was accounted for as an "available for sale security." Under this accounting, the 7.5 million shares of NSI held by us were marked-to-market at the end of each reporting period with the difference between our basis and the fair market value, as reported on NASDAQ, reported as a separate element of stockholders' equity and included in the computation of comprehensive loss.

In October 2000, we sold 350,000 shares of our investment in NSI for \$4.2 million. The purchasers had the right to receive additional NSI shares from us if the three-day average high for the NSI common stock, as quoted on NASDAQ, at December 31, 2000 was less than the price paid to us by the purchasers but not less than \$8.00 per share. We issued an additional 177,344 shares of NSI to the purchasers, reducing the price per share we received to \$8.00 per share. Our former Chairman and CEO purchased 100,000 of these shares of NSI for \$1.2 million and received an additional 45,546 shares pursuant to the price protection provision. As a result of this transaction, our remaining interest was approximately 7.0 million shares of NSI, or 51% of the outstanding shares of NSI as of January 31, 2002 and continued to be accounted for as a marked-to-market security.

On February 13, 2002, NSI completed a merger with Digi International, Inc. ("DIGI"). In connection with the merger, we exchanged our 6,972,656 shares of NSI for 2,324,683 shares of DIGI and \$13.6 million in cash. One December 9, 2002, we sold one-half of our holdings in DIGI for \$3.10 per share. The purchaser of the stock was

F-10

DIGI, itself. The proceeds from this sale, in the amount of \$3.6 million, were deposited on December 13, 2002. The remaining 1,162,341 DIGI shares owned by us are accounted for as an "available for sale security". Under this accounting, these shares are marked-to-market at the end of each reporting period. The difference between our basis and the fair market value, as reported on NASDAQ, is a separate element of stockholders' equity and is included in the computation of comprehensive income. The closing price of DIGI common stock on January 31, 2003 was \$3.35, and is reflected in the valuation of our marketable securities as of that date.

Entrada Networks, Inc. -- On August 31, 2000, we completed a merger of our then subsidiary Entrada Networks with Sync Research, Inc. ("Sync"), a NASDAQ listed company in which we received 4,244,155 shares of the merged entity, which changed its name to Entrada Networks, Inc. ("ENI"). We purchased 93,900 shares of Sync in the open market during June and July 2000 for \$388 and on August 31, 2000 purchased an additional 1,001,818 shares directly from ENI for \$3.3 million. After these transactions and ENI's issuance of additional shares to

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

outside investors in connection with the merger we owned 49% of ENI. Accordingly, our financial statements reflected the results of operations of ENI through August 31, 2000.

Pursuant to a plan adopted by our Board of Directors prior to the merger we distributed 3,107,155 of our ENI shares on December 1, 2000 to our shareholders of record as of November 20, 2000. The distribution was made at the rate of one-fourth (0.25) of an ENI share for each of our outstanding shares. At exercise, options and warrants to acquire our common shares, which were granted and unexercised as of November 20, 2000, would have received a similar number of ENI shares. Prior to January 31, 2001 we distributed 20,182 of our ENI shares upon the exercise of options and as of January 31, 2003 we have reserved 826,000 shares for future exercises of options and warrants. The cost basis of these reserved shares and related liability to the option and warrant holders is included in the investment in former subsidiary and dividends payable in the accompanying balance sheet. The aggregate distribution of our ENI shares including the shares reserved for option and warrant holders has been accounted for at our original cost of \$5.1 million. In addition, we have granted options to purchase 410,000 of our ENI shares for \$3.19 per share (the merger price) to several of our then officers and consultants. In April 2003 our Board of Directors determined that our ENI should be made available for general corporate purposes, and we are no longer reserving any for distribution to option and warrant holders as of November 20, 2000.

The remaining 326,034 ENI shares owned by us were accounted for as of July 31, 2003 as "available for sale security". Under this accounting, these shares are marked-to-market at the end of each reporting period. The difference between our basis and the fair market value, as reported on NASDAQ, is a separate element of stockholders' equity and is included in the computation of comprehensive income.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation -- The balance sheets and the consolidated statement of operations for the years ended January 31, 2003 and 2002 and the consolidated statement of operations for the year ended January 31, 2001 reflect our accounts and all subsidiaries controlled by us after the elimination of significant intercompany transactions and balances. The consolidated statement of operations for the year ended January 31, 2001 includes the results of Entrada through August 31, 2000 after which date we no longer controlled Entrada. The consolidated group is referred to individually and collectively as the "Company," "We," "Our," or "Us."

Use of Estimates --The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect the reported amounts of assets, liabilities, revenues and expenses, the disclosure of contingent assets and liabilities. Actual results could materially differ from these estimates. In the opinion of Management, all adjustments (which include normal recurring adjustments and charges described in the notes to the financial statements) necessary to present fairly the financial position, results of operations and cash flows for the years ended January 31, 2003, 2002 and 2001 have been made.

Cash and Cash Equivalents -- All cash on hand and in banks, certificates of deposit and other highly-liquid investments with original maturities of three months or less, when purchased are considered to be cash equivalents.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Accounts and Notes Receivable -- In the normal course of business, we extend unsecured credit to our customers related to the sales of various products. Typically credit terms require payment within thirty days from the date of shipment.

Allowance for Doubtful Accounts -- We provide an allowance for doubtful accounts based on our continuing evaluation of our customers' credit risk. We generally do not require collateral from our customers.

Inventory -- Inventory, comprised of raw materials, work in process, finished goods and spare parts, are stated at the lower of cost (first-in, first-out method) or market. We periodically evaluate our on-hand stock and make appropriate disposition of any stock deemed excess or obsolete. Inventories at January 31, 2003 and 2002 consist of:

	2003

Raw material.....	\$10,767
Work in process.....	2,804
Finished goods.....	6,326

	19,897
Less: Valuation reserve.....	(5,963)

	\$13,934
	=====

Marketable Securities -- Marketable securities, which consist of equity securities that have a readily determinable fair value and do not have sale restrictions lasting beyond one year from the balance sheet date, are classified into categories based on our intent. Investments not classified as held to maturity, those for which we have the intent and ability to hold, are classified as available for sale. Our investments in DIGI and ENI are classified as available for sale and are carried at fair value, based upon quoted market prices, with net unrealized gains reported as a separate component of stockholders' equity until realized. Unrealized losses are charged against income when a decline in fair value is determined to be other than temporary. At January 31, 2003, and 2002 marketable securities were as follows:

Cost Unrealized Gains Mar

	=====	=====	=====

Fair Value of Financial Instruments -- The fair value of financial instruments is determined by reference to various market data and other valuation techniques as appropriate. We believe that there are no material differences between the recorded book values of our financial instruments and their estimated fair value.

Property and Equipment -- Property and equipment are recorded at historical cost. Depreciation and amortization are provided over the estimated useful lives of the individual assets or the terms of the leases if shorter using accelerated and straight-line methods. Property and equipment are reviewed for impairment whenever events or circumstances indicate that the asset's undiscounted expected cash flows are not sufficient to recover its carrying amount. We measure impairment loss by comparing the fair market value, calculated as the present value of expected future cash flows, to its net book value. Impairment losses, if any, are recorded currently.

Capitalized leases - Capitalized leases are initially recorded at the present value of the minimum payments at the inception of the contracts, with an equivalent liability categorized as appropriate under current or non-current liabilities. Such assets are depreciated on the same basis as described above. Interest expense, which represents the

F-12

difference between the minimum payments and the present value of the minimum payments at the inception of the lease, is allocated to accounting periods using a constant rate of interest over the lease.

Software Development -- Software development costs where technological

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

feasibility has not been established, are expensed in the period in which they occurred, otherwise, development costs that will become an integral part of our products are deferred in accordance with Statement of Financial Accounting Standards Nos. 2 and 86. The deferred costs are amortized using the straight-line method over the remaining estimated economic life of the product or the ratio that current revenues for the product bear to the total of current and anticipated future revenues for that product. Amortization expense for the years ended January 31, 2003, 2002 and 2001 was \$0, \$0, and \$1,046, respectively, over 3 to 5 years. Accumulated amortization was \$398 as of January 31, 2003 and 2002, bringing the net book value to zero as of January 31, 2003 and 2002.

Purchased Technology -- Technology assets were acquired in connection with the acquisition of Sciteq. These assets were analyzed during and after the close of the acquisition. The discounted projected future cash flow from proven technology and software are capitalized and amortized over their remaining estimated economic life (7 years) using the straight-line method. Accumulated amortization was \$2,415 and \$1,994 at January 31, 2003 and 2002, respectively.

We assess the recoverability of purchased technology primarily by determining whether the amortization of the net book value of purchased technology over its remaining life can be recovered through undiscounted future operating cash flows of the acquired operation. The amount of the impairment, if any, of the net book value of the excess cost over net assets acquired is measured by determining the fair value of these assets primarily based on projected discounted future operating cash flows from the purchased technologies using a discount rate commensurate with our cost of capital.

Research and Development -- We expense research and development costs as incurred in accordance with Statement of Financial Accounting Standards ("SFAS") No. 2, "Accounting for Research and Development Costs." Research and development costs are costs associated with products or processes for which technological feasibility has not been proven and future benefits are uncertain. In-process research and development purchased by us includes the value of products and processes in the development stage and have not reached technological feasibility; this amount is expensed at the date of purchase.

Other investments -- Other investments, included in other assets, include non-marketable securities held in other companies including a privately held competitive local exchange carrier, and a broadband services carrier, UFO Communications, Inc. ("UFO").

In November 2000, we sold all our shares in this local exchange carrier for \$9,937 and \$320 in accumulated, unpaid dividends. Of the total \$10,257 due from the purchaser, approximately 7.7% or \$787 was held in a segregated escrow account for one year. The gain of \$3,701 on the sale of the shares is included in investment income in the accompanying income statement. Due to a dispute, a \$787 reserve against the remaining escrow balance was recorded during the fiscal year ended January 31, 2002.

During the year ended January 31, 2001, we made sales of \$5,746, to this local exchange carrier under a long-term equipment financing agreement. The purchase agreement with this customer provides for invoiced installation and other deployment expenses not to exceed 10% of the equipment cost. The terms of the financing agreement provide that the customer may convert any balances outstanding longer than 90 days into a level 35-month term note at 11% per annum interest. We financed \$5,971, including deployment expenses of \$210, during fiscal 2001 for this customer, which was paid in full including accrued interest during January 2001. We financed \$3,328 of receivables, including deployment expenses of \$120, during fiscal 2000 for this customer and \$3,000 of the then unpaid note was exchanged for our equity interest in the customer. The remaining balance of the note and accrued interest of \$344 was paid in cash.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

On November 12, 2002, as part of a strategic relationship, we purchased \$5 million of UFO Communications, Inc. Series B preferred stock. UFO provides enterprise broadband optical communications services in major metropolitan areas. UFO currently operates metropolitan optical networks in San Francisco and Chicago. We have already supplied optical networking equipment for these markets.

F-13

Revenue Recognition -- We generally recognize product revenue when the products are shipped, all substantial contractual obligations, if any, have been satisfied, and the collection of the resulting receivable is reasonably assured. When title does not pass to the customer at time of shipment, revenue is not recognized until all contractual requirements are met and title has transferred. During this transition period, the amount of the sale and/or installation is shown in deferred revenue. Revenue from installation is recognized as the services are performed to the extent of the direct costs incurred. To date, installation revenue has not been material. Revenue from service obligations, if any, is deferred and recognized over the life of the contract. Inventory or demonstration equipment shipped to potential customers for field trials is not recorded as revenue. We accrue for warranty costs, sales returns and other allowances at the time of shipment. Although our products contain a software component, the software is not sold separately and we are not contractually obligated to provide software upgrades to our customers.

Warranty and Customer Support -- We typically warrant our products against defects in materials and workmanship for a period of one to five years from the date of sale and a provision for estimated future warranty and customer support costs is recorded when revenue is recognized. To date, warranty and customer support costs have not been material.

Income Taxes -- Income taxes are accounted for in accordance with Statement of Financial Accounting Standards No. 109 "Accounting for Income Taxes." The statement employs an asset and liability approach for financial accounting and reporting of deferred income taxes generally allowing for recognition of deferred tax assets in the current period for future benefit of net operating loss and research credit carry forwards as well as items for which expenses have been recognized for financial statement purposes but will be deductible in future periods. A valuation allowance is recognized, if on the weight of available evidence it is more likely than not that some portion or all of the deferred tax assets will not be realized. (See Note L).

Advertising -- We expense advertising expenditures as incurred.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Loss Per Common Share -- We compute earnings per share based on the provision of SFAS No. 128, "Earnings Per Share." Basic income and loss per common share is computed by dividing net income or loss available to common shareholders by the weighted average number of common shares outstanding during each period presented. Diluted EPS is based on the weighted average number of common shares outstanding as well as dilutive potential common shares, which in our case consist of convertible securities outstanding, shares issuable under stock benefit plans, and shares issuable pursuant to warrants. In computing diluted EPS, net income or loss available to common shareholders is adjusted for the after-tax amount of interest expense recognized in the period associated with convertible debt. Potential common shares are not included in the diluted loss per share computation for the years ended January 31, 2003, 2002 and 2001 as they would be anti-dilutive. All references in the financial statements of common shares and per share data give effect to the 1-for-20 stock split effective October 28, 2002. (See Note M).

Foreign Currency Translation -- Our foreign operations have been translated into U.S. dollars in accordance with the principles prescribed in SFAS No. 52, "Foreign Currency Translation." For the periods presented the current rate method was used whereby all assets and liabilities are translated at period end exchange rates, and the resultant translation adjustments would have been included as a separate component of stockholders' equity had such adjustments been material. Revenues and expenses are translated at the average rates of exchange prevailing throughout the period, and the resultant gains and losses are included in net earnings.

Stock-Based Compensation -- We account for employee-based stock compensation utilizing the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees." Accordingly, compensation cost for stock options issued to employees is measured as the excess, if any, of the fair market price of our common stock at the date of grant over the amount an employee must pay to acquire the stock. The amount of deferred stock compensation appears as a separate component of stockholders' equity and is being amortized on an accelerated basis by charges to operations over the vesting period of the options in accordance with the method described in Financial Accounting Standards Board Interpretation No. 28. All such amounts relate to options to acquire common stock of our Sorrento subsidiary granted by it to its employees; during the fiscal years ended January 31, 2003 and 2002, we amortized \$250 and \$625 of the total \$2,604 initially recorded for deferred stock compensation. (See Note J).

For non-employees, we compute the fair value of stock-based compensation in accordance with Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for stock-Based Compensation," and Emerging

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Issues Task Force (EITF) 96-18, "Accounting for Equity Instruments that are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services." All such amounts relate to options to acquire common stock of our Sorrento Networks subsidiary granted by it to its consultants; during the fiscal years ended January 31, 2003 and 2002, we recorded \$183 and \$187 for options granted to consultants. (See Note J).

The FASB issued Interpretation (FIN) No. 44, "Accounting for Certain Transactions Involving Stock Compensation," an Interpretation of APB Opinion No. 25. FIN 44 clarifies the application of Opinion No. 25 for (a) the definition of an employee for purposes of applying Opinion No. 25, (b) the criteria for determining whether a plan qualifies as a non-compensatory plan, (c) the accounting consequences of various modifications to the terms of a previously fixed stock option award, and (d) the accounting for an exchange of stock compensation awards in a business combination. FIN 44 was effective July 2, 2000, but certain conclusions cover specific events that occur after either December 15, 1998, or January 12, 2000. The adoption of this standard had no material effect on our financial position or results of operations.

In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure," which amended SFAS No. 123, "Accounting for Stock-Based Compensation." The new standard provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. Additionally, the statement amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in the annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. This statement is effective for financial statements for fiscal years ending after December 15, 2002. In compliance with SFAS No. 148, Sorrento has elected to continue to follow the intrinsic value method in accounting for its stock-based employee compensation arrangement as defined by Accounting Principles Board Opinion ("APB") No. 25, Accounting for Stock Issued to Employees, and has made the applicable disclosures in Note K to the consolidated financial statements.

Computer Software for Internal Use -- Statement of Position ("SOP") 98-1, "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use," is effective for financial statements with fiscal years beginning after December 15, 1998. The SOP provides guidance on accounting for the costs of computer software developed or obtained for internal use. The SOP requires that we continue to capitalize certain costs of software developed for internal use once certain criteria are met. The adoption of SOP 98-1 had no effect on our financial position or results of operations.

New Accounting Standards -- In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities", an interpretation of Accounting Research Bulletin No. 51, "Consolidated Financial Statements." This Interpretation addresses the consolidation by business enterprises of variable interest entities as defined in the Interpretation. The Interpretation applies immediately to variable interests in variable interest entities created after January 31, 2003, and to variable interests in variable interest entities obtained after January 31, 2003. We have no variable interest entities and thus this Interpretation is not expected to have a material impact on our financials statements.

In December 2002, the Financial Accounting Standards Board ("FASB") issued SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure." This pronouncement amends SFAS No. 123, "Accounting for Stock-Based Compensation" to provide alternative methods of transition for a voluntary

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

change to the fair value based method of accounting for stock-based employee compensation. In addition, this statement also amends the disclosure requirements of SFAS No. 123 to require prominent disclosures in both annual and interim financial statements. Certain of the disclosure modifications are required for fiscal years ending after December 15, 2002 and are included in the notes to these consolidated financial statements.

In June 2002, the FASB issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities." SFAS No. 146 applies to costs associated with an exit activity (including restructuring) or with a disposal of long-lived assets. Those activities can include eliminating or reducing product lines, terminating employees and contracts, and relocating plant facilities or personnel. Under SFAS No. 146, a company will record a liability for a cost associated with an exit or disposal activity when that liability is incurred and can be measured at

F-15

fair value. Under current rules, companies can record a liability for restructuring costs when a commitment to a plan of action is made. SFAS No. 146 will require a company to disclose information about its exit and disposal activities, the related costs, and changes in those costs in the notes to the interim and annual financial statements that include the period in which an exit activity is initiated and in any subsequent period until the activity is completed. SFAS No. 146 is effective prospectively for exit or disposal activities initiated after December 31, 2002, with earlier adoption encouraged. Under SFAS No. 146, a company may not restate its previously issued financial statements, and the new statement grandfathers the accounting for liabilities that a company had previously recorded under Emerging Issues Task Force Issue 94-3. We do not believe the adoption of this statement will have a material impact on our consolidated financial statements. We will apply this guidance prospectively.

In April 2002, the Financial Accounting Standards Board issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections". This statement eliminates the current requirement that gains and losses on debt extinguishment must be classified as extraordinary items in the income statement. Instead, such gains and losses will be classified as extraordinary items only if they are deemed to be unusual and infrequent, in accordance with the current GAAP criteria for extraordinary classification. In addition, SFAS 145 eliminates an inconsistency in lease accounting by requiring that modifications of capital leases that result in reclassification as operating leases be accounted for consistent with sale-leaseback accounting rules. The statement also contains other nonsubstantive corrections to authoritative accounting literature. The changes

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

related to debt extinguishment will be effective for fiscal years beginning after May 15, 2002, and the changes related to lease accounting will be effective for transactions occurring after May 15, 2002. Adoption of this standard will not have any immediate effect on our consolidated financial statements. We will apply this guidance prospectively.

In August 2001, the Financial Accounting Standards Board issued SFAS No. 143, Accounting for Asset Retirement Obligations. This Statement is effective for fiscal years beginning after June 15, 2002. SFAS No. 143 provides accounting requirements for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. Under the Statement, the asset retirement obligation is recorded at fair value in the period in which it is incurred by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value in each subsequent period and the capitalized cost is depreciated over the useful life of the related asset. We do not believe the adoption of SFAS 143 will have a material effect, if any, on our financial position or results of operations.

In June 2001, the Financial Accounting Standards Board finalized SFAS 141, "Business Combinations," and SFAS 142, "Goodwill and Other Intangible Assets." SFAS 141 requires the use of the purchase method of accounting and prohibits the use of the pooling-of-interests method of accounting for business combinations initiated after June 30, 2001. SFAS 141 also requires that we recognize acquired intangible assets apart from goodwill if the acquired intangible assets meet certain criteria. SFAS 141 applies to all business combinations initiated after June 30, 2001 and for purchase business combinations completed on or after July 1, 2001. Upon adoption of SFAS 142, it requires that we reclassify the carrying amounts of intangible assets and goodwill based on the criteria in SFAS 141.

SFAS 142 requires, among other things, that companies no longer amortize goodwill, but instead test goodwill for impairment at least annually. In addition, SFAS 142 requires that we identify reporting units for the purposes of assessing potential future impairments of goodwill, reassess the useful lives of other existing recognized intangible assets, and cease amortization of intangible assets with an indefinite useful life. An intangible asset with an indefinite useful life should be tested for impairment in accordance with the guidance in SFAS 142. SFAS 142 is required to be applied in fiscal years beginning after December 15, 2001 to all goodwill and other intangible assets recognized at that date, regardless of when those assets were initially recognized. SFAS 142 requires us to complete a transitional goodwill impairment test nine months from the date of adoption. We are also required to reassess the useful lives of other intangible assets within the first interim quarter after adoption of SFAS 142. We adopted both SFAS 141 and 142 on February 1, 2002, and there was no impact to our financial statements.

C. PROPERTY AND EQUIPMENT

Property and equipment of the Company consisted of the following components as of January 31, 2003 and 2002:

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

	2003

Manufacturing, engineering and plant equipment and software.....	\$ 19,822
Office furniture and fixtures.....	3,154
Land and building.....	6,721
Leasehold and building improvements.....	1,294

Total property and equipment.....	30,991
Less: Accumulated depreciation.....	(13,888)

Net book value.....	\$ 17,103
	=====

Depreciation expense for fiscal 2003, 2002 and 2001 was \$3,642, \$2,422, and \$3,404 and respectively.

D. SHORT TERM DEBT

Short term debt at January 31, 2003 and 2002 consisted of the following:

	2003

Floating interest rate loan (2.5% over Coast's prime rate) secured by all the tangible assets of Meret:.....	\$ -
	=====

Meret had a line of credit of \$2,000 from Coast Business Credit ("Coast"); the line of credit that was collateralized by substantially all the assets of Meret including accounts receivable, inventory and property and equipment. We guaranteed this line to the extent of \$1,000. This line of credit provided for interest at 2.5% over the bank's prime rate but not less than 8% (8.75% at May 30, 2002) with a minimum monthly interest of \$8. Advances were limited to 80% of eligible accounts receivable and 40% of eligible inventory limited to \$740; this line also provides for a \$500 letter of credit sub-line. Subsequent to January 31, 2002, the Loan and Security Agreement was amended reducing the line of credit to \$1,000, adjusting the advance rate for eligible inventory to 20%, limited to \$370, eliminating minimum monthly interest with an expiration date of July 1, 2002. The highest amount outstanding was \$999 and \$1,259 during fiscal years 2003 and 2002 respectively. The average amount outstanding was \$300 and \$1,419 during fiscal years 2003 and 2002, respectively.

The line of credit with Coast Business Credit was terminated in May 2002.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

E. LONG TERM DEBT

Long term debt at January 31, 2003 and 2002 consisted of the following:

	2003

Variable rate 30 year mortgage note payable (5.5% over LIBOR rate); interest rate at January 31, 2003 was 8.95%.....	\$ 1,269
Fixed rate 30 year mortgage note payable; interest rate at January 31, 2003 was 7.6%.....	2,361
Obligations under finance leases (See Note G).....	237

	3,867
Less: Current portion.....	223

	\$3,644
	=====

On March 25, 1996, Meret completed the purchase of a 35,000 square foot facility in San Diego, California for \$1,779 in cash. On April 24, 1996, Meret entered into a mortgage agreement with a lender in the amount of

F-17

\$1,331 amortized over 30 years with an adjustable interest rate of 5.5% over the LIBOR rate, adjusted bi-annually. Monthly principal and interest payments are \$11. The interest rate at January 31, 2003 was 8.95%.

In October 2000, we completed our purchase of a 41,000 square foot facility immediately adjacent to our existing San Diego, California facility. The purchase price was \$4,805 including the assumption of existing indebtedness of \$2,417. Monthly principal and interest payments are \$18 and at the end of the 30 year term on January 1, 2010 the remaining balance of \$2,109 is due. The loan has a fixed interest rate of 7.6%.

Long term debt including capitalized leases at January 31, 2003 is payable by year as follows:

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

2004.....
 2005.....
 2006.....
 2007.....
 2008.....
 2009 and later.....

F. DEBENTURES

Debentures - During August 2001, we completed a private placement of our 9.75% convertible debentures receiving net proceeds of \$29.8 million. The debentures, due August 2, 2004 have a face value of \$32.2 million, which is convertible into our common stock at \$144.20 per share. At maturity we may elect to redeem the debentures for cash and we have the option of paying the interest on these debentures in shares of our common stock. In addition, the purchasers received four year warrants to acquire an additional 167,592 shares of our common stock at \$144.20 per share and the placement agent received five year warrants to acquire 5,583 shares of our common stock, equity securities, options or warrants at a price less than \$144.20 per share or at a discount to the then market price. The conversion price and warrant exercise are subject to adjustment.

In accordance with Emerging Issues Task Force ("EITF") No. 00-27 we have accounted for the fair value of warrants issued to the purchasers and placement agent and the fair value of the deemed beneficial conversion feature, which results solely as a result of the required accounting, of the debenture as a reduction to the face value of the debentures with an offsetting increase to additional paid in capital. These amounts as well as the issuance costs paid in cash are amortized as additional interest expense over the period the debentures are outstanding. Interest expense during the year ended January 31, 2003 of \$9.6 million included the stated 9.75% interest of \$2.3 million which was paid in 174,863 shares of common stock and \$292 in cash, amortization of issuance costs of \$770, and amortization of the fair value of the warrants issued to the purchasers and placement agent and the deemed beneficial conversion feature of \$6,134. The fiscal 2002 financial statements have been restated to reflect a change in the beneficial conversion feature. The revision had the impact of decreasing additional paid in capital and unamortized debenture discount by approximately \$7.7 million. At January 31, 2003 and 2002 debentures payable consists of:

	2003

Face Value.....	\$ 32,2
Issuance costs.....	(2,4
Value of warrants and deemed beneficial Conversion feature.....	(19,5

Debenture book value at issuance.....	10,2
Accumulated amortization of	
Issuance costs.....	8
Value of warrants and deemed beneficial conversion feature.....	7,0

	\$ 18,1

=====

F-18

We are in the process of a debt and equity restructuring plan that would exchange current outstanding debentures and Series A Preferred stock for common stock and an issuance of a smaller new debenture. See Note R for further information.

G. LEASES, OTHER COMMITMENTS AND CONTINGENCIES

Leases

Rental expense under operating leases was \$1.6 million, \$1.3 million, and \$1.3 million for the years ended January 31, 2003, 2002 and 2001, respectively. The table below sets forth minimum payments under capital and operating leases with remaining terms in excess of one year, at January 31, 2003:

	Capital Leases	Ope L
	-----	---
2004.....	198	
2005.....	55	
2006.....	--	
2007.....	--	
2008.....	--	
	-----	---
	253	
	-----	===
Less: Amount representing interest.....	(16)	

Present value of minimum annual rentals.....	237	

The net book value of equipment under capital leases was \$657 and \$1,071 at January 31, 2003 and 2002, respectively.

Other Commitments

We previously reimbursed Entrada on a prorata basis for space in its San Diego facility utilized by Meret. During the twelve months ended January 31, 2003 and 2002, we paid \$54 and \$48 to Entrada under this month to month

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

agreement.

In March 2001, our Meret subsidiary entered into a \$2.7 million supplier agreement. The agreement requires a minimum monthly cash outlay of \$50 extending over a period of fifty-four months. The remaining balance at January 31, 2003 of \$1.5 million is expected to end in March 2005. The product being acquired is a component used in a product for one of Meret's customers for which there is a five year sales contract.

Contingent Liabilities

One of our component suppliers is contending that our efforts to reschedule shipments of certain components constitutes an anticipatory breach of the purchase order by which the components were ordered, and has informed us that they believe they are entitled to damages in the approximate amount of \$900, despite the fact the goods in question have not as yet been shipped. We do not believe that our supplier can support the amount of the alleged cancellation fee, and we are trying to work out a business solution to the dispute. Our supplier has threatened litigation if the dispute is not satisfactorily resolved and while we believe that our defenses to both liability and damages are strong, we can give no assurance that our position in such litigation would prevail.

In the merger agreement between our predecessor corporation and Sync Research, we agreed to indemnify and hold our former subsidiary, Entrada, harmless against any liability arising after the merger in connection with the termination of a certain pension plan previously maintained by Entrada. In the third quarter, we were advised by a consultant retained by us and by the successor corporation to the entity from whom we originally purchased the company that became Entrada that the cost of termination of the pension plan in question is in excess of \$3 million.

F-19

While we do not believe that we are liable for this cost, it is possible that the successor corporation, which has been funding the pension plan since 1996, may seek a substantial contribution from us towards this liability.

H. LITIGATION

On September 10, 2001, holders of a portion of the outstanding Series A Preferred Stock of our Sorrento subsidiary obtained a preliminary injunction from the Delaware Court of Chancery prohibiting SNI from issuing further shares of its Series A Preferred Stock or incurring any additional debt without the consent of the holders of a majority of the currently outstanding shares of such Series A Preferred Stock. On January 23, 2002, the Delaware Supreme Court

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

affirmed the granting of the preliminary injunction.

On October 19, 2001, an amended complaint was filed in the injunction action, adding as named defendants, the Company, our Meret subsidiary, certain present and former officers and directors of the Company and our subsidiaries as well as our investment bankers. The amended complaint also added, among other things, claims for fraud, securities fraud, breach of fiduciary duty, conspiracy, and intentional interference with contract as well as requesting the appointment of a receiver for our Sorrento subsidiary, all which claims are based on alleged wrongs committed in connection with or since the Series A placement. Our Sorrento subsidiary and the original individual defendants have all answered this amended complaint denying all allegations of wrongdoing. The new defendants have all moved to dismiss the amended complaint. Management believes the allegations contained in the amended complaint are without merit.

On December 14, 2001, the plaintiffs filed motions to sequester the common stock of our Sorrento subsidiary owned by Meret and the Sorrento Series A preferred stock that we own, as an alternative method of obtaining jurisdiction over us and Meret in the Delaware litigation. Management also believes that these motions are without merit.

Currently, hearings on all pending motions have been taken off calendar at the request of all parties, pending the resolution of ongoing settlement discussions between the Company and the plaintiffs. The Exchange Agreement entered into in connection with our proposed capital restructuring provides that this litigation will be dismissed with prejudice against the Company, its subsidiaries, and its current officers and directors, and without prejudice against all other defendants, at the closing of the Agreement. (See Note R).

During June 2000, we entered into various agreements with Par Chadha, our former CEO and Chairman, which, among other matters, provides for payments of \$250 per year for three years of consulting services and loans by us for the exercise of previously granted options to acquire 58,925 options at prices varying from \$140.60 to \$985.00 per share. As the members of our Board of Directors at the time of his resignation ceased to represent more than 50% of the Board in October 2000, all payments for consulting services were accelerated and no future consulting services are required. During October 2000, Mr. Chadha exercised 3,556 options, applying the \$500 accelerated payment to the exercise. In addition, he exercised 25,369 options for which we were contractually obligated to loan the \$5.0 million due on the exercise. Mr. Chadha provided us with written notification dated in September 2001 that he does not have any obligations under the agreements. We have notified him that we do not agree with his interpretation of his repayment obligations under the terms of the agreements.

During December 2001, we entered into an agreement whereby the 25,369-option exercise was rescinded. Mr. Chadha returned the 25,369 shares to us for cancellation and we cancelled the receivable due from him and restored the original option agreements. In June 2002, we filed with the Superior Court of California, County of Los Angeles a Complaint for Declaratory Relief regarding the interpretation of the agreement. Also in June 2002, Mr. Chadha filed a lawsuit against us in the Superior Court of California, County of Los Angeles, seeking declaratory relief with respect to the interpretation of his separation agreement and in addition, alleging breach of contract with respect to his option exercise rights and fraud in connection with his rescission agreement. In February 2003, both of these lawsuits were dismissed without prejudice to facilitate settlement negotiations, but they can be refiled at any time. In April 2003, an agreement in principle to settle these lawsuits was reached, subject to the execution of a definitive agreement. There can be no assurance that such a definitive settlement agreement will be executed. Should the cases be refiled, and should Mr. Chadha prevail in Court, in addition to any other relief that may be granted, we may be required to issue him 58,925

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

shares of our stock for no consideration, and/or pay him cash damages, which he alleges to be in excess of \$4 million.

F-20

In April 2002, our former Chairman and CEO, Dr. Xin Cheng, filed a claim in arbitration seeking, among other things, payment of \$500 and acceleration of the vesting of options pursuant to alleged contractual obligations of our Sorrento subsidiary. The arbitrator has issued a decision favorable to Dr. Cheng, and having exhausted our legal remedies, we have paid Dr. Cheng \$610 in full satisfaction of the arbitration award.

In addition, claims in arbitration have been filed by two of our former financial officers and employees who worked in our Santa Monica office, which has now been closed, alleging that their resignations in May 2002 were for "good reason" as defined in their employment agreements, all of which were to expire on May 22, 2002. We are disputing these claims, and have filed counterclaims in one of the arbitrations. The aggregate amount of these claims is in excess of \$490.

We have also filed a lawsuit against United Pan Europe Communications, N.V., one of our customers and a related party to one of Sorrento's Series A shareholders, in connection with a past due receivable in the amount of \$1.6 million for equipment shipped in 2000. The defendant has filed for protection under the federal bankruptcy laws, and pursuant to the Exchange Agreement entered into in connection with our capital restructuring, we have executed a definitive settlement agreement and a stipulation of dismissal with prejudice resolving this lawsuit in return for a payment of \$350 and the return of certain of the equipment previously shipped. We have received the payment of \$350 from UPC and, in accordance with the terms of the exchange agreement, have paid that same amount to certain Series A Preferred Stock holders. The equipment has also been returned.

We have also been sued by a former officer of our Sorrento subsidiary alleging breach of a consulting agreement we entered into with him in March 2002, following his resignation "for good reason" as defined in his employment agreement. He is seeking acceleration of consulting fees due to him under his consulting agreement in the amount of \$229. We feel these claims are without merit and are vigorously defending the claims. We have also filed counterclaims. Currently, the matter is in the early stages of discovery.

From time to time, we are involved in various other legal proceedings and claims incidental to the conduct of our business. Although it is impossible to predict the outcome of any outstanding legal proceedings, we believe that such legal proceedings and claims, individually and in the aggregate, are not likely to have a material effect on our financial position, results of operations, or cash flows.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

I. STOCKHOLDERS' EQUITY

Effective as of October 28, 2002 we implemented a one-for-twenty reverse split of our outstanding shares of common stock. No fractional shares were issued in connection with the reverse stock split. In lieu of fractional shares, stockholders will receive a cash payment based on the market price, after adjustment for the effect of the stock combination. The par value of the common stock changed to \$6.00 per share and the number of authorized shares decreased from 150 million to 7.5 million shares of common stock. The reverse stock split also affects options, warrants and other securities convertible into or exchangeable for shares of the Company's common stock that were issued and outstanding immediately prior to the effective time of the stock combination. Preferred stock was not affected.

We are authorized to issue the following shares of stock:

7,500,000 shares of Common Stock (\$6.00 par value)

2,000,000 shares of Preferred Stock (\$.01 par value) of which the following series have been designated:

3,000 shares of Preferred Stock, Series D

1,000,000 shares of Preferred Stock, Series F

F-21

We have outstanding the following shares of preferred stock:

	Shares Outstanding	Par Value	Liqu Pref
	-----	-----	-----
Series D.....	1,353	\$0.01	\$
	-----	-----	-----
	1,353	\$0.01	\$
	=====	=====	=====

During January 2001, we issued 86,464 shares of our common stock in conversion of 1,500 shares of our Series D preferred stock. The remaining 1,353 shares of our non-voting, non-dividend bearing Series D preferred stock are being held in escrow pending resolution of acquisition contingencies including

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

liabilities related to funding deficits related to a terminated defined benefit pension plan of Entrada. Payments by the seller towards these liabilities will have no effect on our financial results and payments, if any, by us will reduce the face value of the preferred stock. Each share of Series D preferred stock is convertible into common stock at the market value at the date of conversion and we have the right to redeem the shares prior to conversion for 100% of their conversion value.

J. OTHER CAPITAL STOCK TRANSACTIONS AND BUSINESS ACQUISITIONS

Stock Split - In October, 2002, approval was granted for a one-for-twenty reverse stock split effective October 28, 2002. The effect of this stock split was reflected in the financial statements retroactively as if the stock split occurred at the beginning of the earliest period reported.

Private Placements - Immediately prior to its merger with Sync Research our Entrada subsidiary completed a private placement of 2,431,818 of its common shares receiving net proceeds of \$7,851. We purchased 1,001,818 of these shares for \$3,306. (See Note A).

On March 22, 2001, we completed a private placement of 76,300 unregistered shares of our common stock receiving net proceeds of \$9.6 million. In addition, the purchasers received three-year warrants to acquire an additional 19,075 shares of our common stock at \$163.80 per share. For a period of 18 months from the March 22, 2001 completion date in the event we were to issue shares of common stock or equity securities convertible into our common stock at a price less than \$131.062 per share, the purchasers would be entitled to receive additional shares of common stock.

During 2000, SNI completed a sale of 8,596,333 shares of its Series A Convertible Preferred Stock receiving net proceeds of \$46.6 million from a group of investors. 1,467,891 shares were purchased by, and a finders fee of \$2.0 million was paid through the issuance by Sorrento of an additional 357,799 shares of its Series A Convertible Preferred Stock to, entities in which one of our outside directors at the time, who later in 2000 served for several months as our Chairman and CEO, was a partner or member pursuant to a previously contracted right of participation.

One of our current outside directors purchased 183,486 shares in this placement. At the time of purchase, he was not one of our directors. This individual is also a director of Liberty Media Corporation, which owns an approximate 74% economic interest representing an approximate 94% voting interest in United GlobalCom ("UGC"). The purchaser of 3,027,523 shares in this placement is an indirect subsidiary of UGC. Liberty Media also holds convertible debt in this Series A holder, which it has agreed to exchange for shares in UGC.

Each share of SNI's Series A Preferred Stock is convertible into one share of SNI's common stock at the option of the holder, may vote on an "as converted" basis except for election of directors, and has a liquidation preference of \$5.45 per share. The shares are automatically converted into SNI's common stock upon an underwritten public offering by SNI with an aggregate offering price of at least \$50.0 million. As SNI did not complete a \$50.0 million public offering by March 1, 2001, the holders of more than 50% of the then outstanding Series A shares had the right to request in writing that SNI redeem them at the adjusted liquidation preference. On receipt of such a request, our Sorrento subsidiary has the obligation to redeem the shares in cash, if funds are lawfully available for such a redemption, or to redeem such pro rata portion as to which a lesser amount of lawfully available funds do exist. In April 2001, our Sorrento subsidiary received written redemption requests from holders of a majority of the Series A shares. The difference between the net proceeds received on the sale of these shares

and their liquidation preference of \$48.8 million was recorded as a deemed dividend during the period from issuance to March 31, 2001. During the year ended January 31, 2003 and 2002, we recorded a deemed dividend of \$0 and \$180 with respect to the SNI Series A shares.

As of January 31, 2003 and 2002, the Series A Preferred Stock has been reclassified as a current liability since the holders have exercised their right to request that SNI redeem the shares. The Series A liability can only be paid through lawfully available funds that would normally be generated from SNI profitable operations, which we do not currently have available or foresee the availability of the near future.

We made sales of products to affiliates of two of the purchasers of Sorrento's Series A Preferred Stock. During the years ended January 31, 2003 and 2002, we made sales of \$29 and \$2,076 to the subsidiaries of the purchaser of 33.8% of the shares of which \$29 and \$1,601 was outstanding at January 31, 2003 and 2002 under 180 days terms. During the fiscal years ended January 31, 2003 and 2002, we made sales of \$568 and \$2,553 to the subsidiaries of the purchaser of 6.2% of the shares of which \$324 and \$2 was outstanding at January 31, 2003 and 2002 respectively.

Warrants - During the year ended January 31, 2001, we issued 13,009 shares of our common stock upon the cashless exercise by our lender of 16,668 warrants with exercise prices ranging from \$10.02 to \$15.94. (See Note D).

K. STOCK OPTION PLANS

We have four stock options plans in effect: The 2000 Stock Incentive Plan, the 1988 Stock Option Plan, the 1997 Incentive and Non-Qualified Stock Option Plan and the 1997 Director Stock Option Plan. The stock options have been made available to certain employees and consultants. All options are granted at not less than fair value at the date of grant and have terms varying from 3 to 10 years. The purpose of these plans is to attract, retain, motivate and reward our officers, directors, employees and consultants to maximize their contribution towards our success.

We account for these plans under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. No stock-based employee compensation cost is reflected in net loss, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net loss and loss per share if the company had applied the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

The following table summarizes the activity in the plans:

The fair value of option grants is estimated on the date of grant utilizing the Black-Scholes option-pricing model with the following weighted average assumptions for grants during the year ended January 31, 2003: expected life of option 3 years, expected volatility of 180%, risk free interest rate of 2.15% to 4.50% based upon the date of grant and a 0% dividend yield. The fair value, at date of grant, using these assumptions range from \$3.70 to \$62.20 and the weighted average was \$22.19. The assumptions for the year ended January 31, 2002 were expected life of option 3 years, expected volatility of 140%, risk free interest rate of 2.91% to 4.50% and a 0% dividend yield. The fair value, at date of grant, using these assumptions range from \$46.00 to \$112.60 and the weighted average was \$83.60. The assumptions for the year ended January 31, 2001 were expected life of option 3 to 5 years, expected volatility of 85%, risk free interest rate of 4.89 to 6.75% and a 0% dividend yield. The fair value, at date of grant, using these assumptions range from \$179.40 to \$801.80 and the weighted average was \$443.40.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

F-24

Sorrento Networks Inc.

In addition SNI adopted its 2000 Stock Option/Stock Issuance Plan in February 2000 under which it has granted options to certain of its employees, directors and consultants. All options are generally granted at prices not less than fair value at the date of grant and generally vest over four years. Eligible individuals may be issued shares of common stock directly, either through immediate purchase of the shares at fair value or as a bonus tied to performance of services or the attainment of prescribed milestones. No milestones were attained and, no stock has been issued under the stock issuance program.

The option activity for this plan for the year ended January 31, 2003 is summarized as follows:

	Number of Shares	Weighted Exercise

The holders of the options of our Sorrento subsidiary may elect to convert all or a portion of their options into options to acquire our stock at a ratio of 78 for one. During the year ended January 31, 2003, 2,340,585 shares were exchanged for FIBR options and during January 31, 2002, no options were converted.

Tender Offer

In May 2002 our Board of Directors approved an employees' stock option exchange program. Under the program, employees holding options to purchase Sorrento Networks Corp. common stock were given the opportunity to exchange certain shares of their existing options, those with exercise prices above \$150.00 per share, for new options to purchase an equal number of shares of Sorrento common stock. The new options were granted six months and one day after the cancellation of the old options. The exercise price of the new options was \$109.00, the market price on the last reported trading price of Sorrento common stock on their grant date. Options for 34,960 shares of Sorrento Networks Corp. common stock were exchanged in the program. (Adjusted for 1-20 reverse split).

Options held by the company's executives and officers were not included in the exchange program.

Our domestic operations generate permanent and temporary differences for depreciation, amortization, valuation allowances and tax attributes arising from acquisitions. We have recorded a 100% valuation allowance against its deferred tax assets, including net operating loss and research credit carry forwards, in accordance with the provisions of Statement of Financial Accounting Standards No. 109. Such allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Less: valuation allowance.....	(74,070)

Deferred tax asset.....	\$ --
	=====

At January 31, 2003, we had federal net operating losses which may be available to reduce future taxable income. Among potential adjustments which may reduce available loss carry forwards, the Internal Revenue Code of 1986, as amended, (IRC), reduces the extent to which net operating loss carry forwards may be utilized in the event there has been an "ownership change" of a company as defined by applicable IRC provisions. We believe that the issuances of its equity securities and transfers of ownership of outstanding equity securities may have resulted in one or more such ownership changes and intends to analyze the impact of such transfers on the continued availability, for tax purposes, of the net operating losses incurred through January 31, 2003. Further ownership changes, such as the pending restructuring agreement, in the future, as defined by the IRC, may reduce the extent to which any net operating losses may be utilized. These NOL carry forwards expire as follows:

The shares issuable upon exercise of options and warrants represents the

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

quarterly average of the shares issuable at exercise net of the shares assumed to have been purchased, at the average market price for the period, with the assumed exercise proceeds. Accordingly, options and warrants with exercise prices in excess of the average market price for the period are excluded because their effect would be antidilutive.

N. OTHER RELATED PARTY TRANSACTIONS

Summarized below are all material related party transactions entered into by us and our subsidiaries during the periods presented not otherwise disclosed in these notes.

In February 2003 we entered into a consulting agreement with Mr. Robert Hibbard, a member of the Board of Directors, to provide services to the company at a consulting rate of \$175 per hour plus a retainer of \$20 thousand per month for six months. Mr. Hibbard agrees to make himself available to the Company for not less than 20 hours per week. The term of this agreement is for twelve months, but may be terminated after six months by either party, with or without cause, upon 5 days written notice. This agreement supersedes his August 2002 consulting agreement. Nearly all of Mr. Hibbard's consulting work for us has involved matters being considered or reviewed by the board or by committees of the board. His work has included structuring and implementing our 2003 Equity Incentive Plan for employees, participation in settlement negotiations for pending litigation, assistance in our capital restructuring and improving our intellectual property policies and procedures, among other matters. In fiscal year 2003 Mr. Hibbard was paid \$92 thousand in consulting fees.

During fiscal 2002, we paid a total of \$55 thousand to Phillip W. Arneson as a Director of the Company. The amounts paid included \$24 thousand for consulting work performed for a special Committee of the Board, \$21 thousand for various other consulting services including outsourcing advice and organizational matters, attendance fees of \$6 thousand for Board and Committee meetings and \$5 thousand in reimbursable expenses. Consulting fees were paid at a rate equal to normal fees for attendance at Board meetings.

During July 2000 we agreed to loan \$300 thousand for three years at the applicable federal rate provided for in Internal Revenue Code Section 1274 to Mr. Jacobson in connection with accepting employment as our Senior Vice President, Legal. This is a full recourse loan and Mr. Jacobson has pledged his options to acquire our common stock and any options he may receive from any of our subsidiaries as collateral. Mr. Jacobson has received \$300 thousand in advances under this loan agreement for which the interest rate is 6.6%. On July 3, 2002 a new note covering the \$300 thousand was incorporated in Mr. Jacobson's employment contract. The term remained the same as the July 2000 note, with all unpaid, accrued interest and principal due and payable on August 30, 2003. In December 2002, Mr. Jacobson paid \$39 thousand on his loan that included payment of all prior interest due and the remainder applied to his principal balance. As of January 31, 2003 Mr. Jacobson's loan outstanding to the Company totaled \$298 thousand.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

During June 2000, we entered into various agreements with Par Chadha, our former CEO and Chairman, which, among other matters, provides for payments of \$250 thousand per year for three years of consulting services and loans by us for the exercise of previously granted options to acquire 58,925 options at prices varying from \$140.60 to \$985.00 per share. As the members of our Board of Directors at the time of his resignation ceased to represent more than 50% of the Board in October 2000, all payments for consulting services were accelerated and no future consulting services are required. During October 2000, Mr. Chadha exercised 3,556 options, applying the \$500 thousand accelerated payment to the exercise. In addition, he exercised 25,369 options for which we are contractually obligated to loan the \$5.0 million due on the exercise. During September 2001, Mr. Chadha notified us that he does not have any obligations under the agreements. We have notified him that we do not agree with his interpretation of his repayment obligations under the terms of the agreements.

During December 2001, we entered into an agreement whereby the 25,369 option exercise was rescinded. Mr. Chadha returned the 25,369 shares to us for cancellation and we cancelled the receivable due from him and restored the original option agreements. The required non-cash expense as a result of the rescission equal to the difference between the amount of the loan receivable and the market value of the returned shares was recorded as a reserve of \$2.7 million against the receivable during the year ended January 31, 2002 and is included in other operating expenses in the accompanying income statement. This rescission agreement did not resolve any underlying dispute as to the option loan repayment obligations. An agreement in principle to resolve this dispute has been reached, see details in Note H.

On September 30, 2001, our then Chairman and CEO executed a two year consulting agreement with Leonard Hecht, A FORMER EMPLOYEE OF THE COMPANY, whereby Mr. Hecht is to be paid a salary at \$250 thousand per year plus benefits and the vesting of all his options to acquire our common stock. We have since stopped making payments under this agreement, and have been notified by Mr. Hecht that he believes we have thereby breached this agreement.

In September 2000, our then Board of Directors approved a two year consulting agreement with Rohit Phansalkar, A FORMER EMPLOYEE OF THE COMPANY, whereby he is paid a salary of \$250 thousand per year plus benefits and the vesting of all his options to acquire our common stock. This agreement was amended in July 2001.

O. SUPPLEMENTAL CASH FLOW DISCLOSURES

Interest expense for the years ended January 31, 2003, 2002 and 2001 was \$9,619, \$3,311 and \$918, respectively. During fiscal 2003, \$292 was paid in cash and the remaining \$9,327 neither provided for nor used cash. For fiscal years 2002 and 2001, the interest expense neither provided nor used cash.

P. CONCENTRATIONS OF CREDIT RISK

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of temporary cash investments and trade receivables. As regards the former, we place our temporary cash investments with high credit financial institutions and limits. At times such amounts may exceed the F.D.I.C. limits. We limit the amount of exposure with any one financial institution and believe that no significant concentration of credit risk exists with respect to cash investments. No accounts at a single bank accounted for more than 10% of current assets.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Although we are directly affected by the economic well being of significant customers listed in the following tables, we do not believe that significant credit risk exists at January 31, 2003. We perform ongoing evaluations of our customers and require letters of credit or other collateral arrangements as appropriate. Accordingly, trade receivable credit losses have not been significant.

The following data shows the customers accounting for more than 10% of net receivables at January 31 2003 and 2002:

F-29

Q. SUBSEQUENT EVENTS

Litigation resolution

On March 4, 2003, SNI and UPC executed a Settlement Agreement resolving the litigation between SNI and UPC, exchanging mutual releases, and dismissing

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

the litigation against UPC with prejudice, in exchange for the return of certain equipment by UPC and the payment of \$350 thousand. We have received the payment of \$350 from UPC and, in accordance with the terms of the Exchange Agreement, have paid that same amount to certain Series A Preferred Stock holders to defray legal costs incurred by them. The equipment has also been returned.

In April 2003, an agreement in principle was reached to settle our dispute with Par Chadha and the other parties to our dispute with Mr. Chadha, subject to the execution of a definitive agreement. There can be no assurance that such a definitive agreement will be executed.

Nasdaq

On March 6, 2003 we presented before the Nasdaq Panel our reasons for the request for an extension of time to complete our restructuring plans. On April 4, 2003, the Panel issued a decision extending until May 16, 2003, our time to demonstrate compliance with the minimum shareholder equity standard. As our current plan is to close the capital restructuring, subject to shareholder approval, on or about May 21, 2003, we are asking the Panel for a short extension on the May 16 deadline. While there can be no assurance that the Panel will grant this extension, our understanding is that Panels customarily grant such short extensions under circumstances such as these.

If our stock is delisted from Nasdaq, the ability of holders of our common stock to sell our stock could be adversely affected, our ability to secure future funding might be severely impacted, and there could be a material adverse effect on our financial condition.

R. RESTRUCTURING AGREEMENT IN PRINCIPLE

On March 6, 2003, we and our wholly-owned subsidiary Sorrento Networks, Inc. entered into an Exchange Agreement with the holders of our 9.75% Senior Convertible Debentures (the "Debentures") and the Series A Convertible Preferred Stock (the "Preferred Stock") of Sorrento Networks, Inc. The Exchange Agreement and associated documents contemplate an exchange (the "Exchange") of the Debentures and the Preferred Stock at a closing into shares of common stock and \$12.5 million of our new 7.5% secured convertible debentures (the "New

F-30

Debentures"). Certain holders of the Preferred Stock would also receive additional New Debentures of approximately \$600,000 to pay certain legal fees.

The shares of common stock and the New Debentures to be issued in the Exchange will represent, in the aggregate, approximately 87.5% of our common stock on a diluted basis. This percentage takes into account the total number of existing shares outstanding, the shares to be issued to the holders of the Debentures and the Preferred Stock at the closing, the shares issuable upon

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

conversion of \$12.5 million of New Debentures, and the shares issuable upon conversion of warrants to be issued to existing shareholders. This percentage does not take into account new employee stock options, shares issuable upon conversion of approximately \$600,000 in New Debentures to be issued to certain holders of the Preferred Stock to pay certain legal fees, and certain other issuances. The exact number of shares of common stock that will be issued to the holders of the Debentures and the Preferred Stock upon consummation of the Exchange will depend on the conversion price of the New Debentures, which will not be known until shortly before closing. The New Debentures that will be issued in the Exchange (not including the New Debentures to be issued in satisfaction of legal fees) will be convertible into not less than 8.75%, or more than 26.25%, of our shares of common stock, calculated on the same diluted basis.

The Exchange Agreement contemplates that our existing shareholders will retain 7.5% of our common stock on the same diluted basis, and will receive non-transferable warrants to purchase approximately 5% of our common stock, exercisable beginning one year after the closing at a 10% premium over an average closing price of our stock prior to the closing of the Exchange. We will establish a record date not more than ten business days prior to the closing to determine the specific holders of our common stock who will be entitled to receive the warrants. The warrants will be exercisable at any time prior to August 2, 2007, provided that any such exercise of the warrants will be subject to the effectiveness of a registration statement with respect to the common shares to be issued upon exercise of the warrants. We may repurchase the warrants for a nominal price, upon 30 days prior notice, at any time after the volume-weighted average market price of our common stock for any ten consecutive trading days equals or exceeds 150% of the exercise price.

The New Debentures will mature on August 2, 2007 and will be convertible at any time at the option of the holder at a conversion price equal to the reference price into shares of our common stock. However, the number of shares issuable upon conversion of the New Debentures on a diluted basis as of the closing cannot represent less than 8.75%, or more than 26.25%, of our shares of common stock. Subject to certain limits, interest on the new debentures may be paid, at our option, either in cash, additional new debentures or our common stock.

The new debentures would include covenants restricting our ability to incur senior or subordinated debt or preferred stock other than \$5 million in lease or equipment financing and a \$5 million revolving credit facility (up to \$10 million with certain consents), as well as other standard covenants and protective provisions. At any time prior to the maturity date, we may redeem for cash on a pro rata basis some or all of the new debentures at par, plus accrued interest.

At the closing of the restructuring transaction, the New Debentures will be secured by substantially all of our assets and those of our subsidiaries (with certain exceptions, including the real estate owned by Meret Communications, Inc., and Sorrento Valley Real Estate Holdings, LLC). No later than one year following the closing date, we must provide a second mortgage on such real estate as security for the New Debentures. When we have done so and we have merged our subsidiaries into us, most of the remaining collateral will be released or subordinated at our request to permit us to obtain a secured loan from a bank.

Until one year after the closing and subject to certain exceptions, exchanging holders of debentures and Series A preferred stock who continue to hold common stock received in the exchange and new debentures will be entitled to certain weighted average anti-dilution protection for such continued holdings with respect to certain additional issuances of our common stock. In addition, if we are required to issue shares of common stock upon the exercise of any

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

right, option or warrant to purchase common stock that was issued prior to the closing and was not listed on the option schedule to the exchange agreement, then we will issue additional shares of common stock to the exchanging holders, and will adjust the conversion price of the new debentures sufficient to offset the dilutive impact of such issuances.

F-31

The Series A holders as a group may request, on or before the closing, that we appoint one new director to our Board of Directors. The debenture holders as a group may also request, on or before the closing, that we appoint one new director to our Board of Directors. The new director(s) would continue in office until the next regularly scheduled annual meeting of our shareholders and shall be nominated for re-election at such meeting.

No later than the day before the closing date of the restructuring transaction, we will merge with and into a to-be-formed Delaware corporation, which will be formed solely for the purpose of effecting the change in our state of incorporation from the State of New Jersey to the State of Delaware. Promptly after the closing date of the restructuring transaction, and in no event later than one year after the closing date, our subsidiaries, Sorrento Networks, Inc., Meret Communications, Inc., and Sorrento Valley Real Estate Holdings, LLC, will be merged with and into us.

While we are working to complete the restructuring plan and consummate the exchange, our ability to do so is not certain, and depends on many factors, including but not limited to our ability to satisfy or obtain waivers with regard to the conditions in the definitive agreement, obtain the requisite consents from the debenture holders and Series A shareholders, pay the substantial legal costs associated with the restructuring from existing capital resources, and raise additional capital in a timely manner. If we are not able to carry out the restructuring plan embodied in the letter of intent, we will have to explore other alternatives on an expedited basis. There can be no assurance, however, that we will be able to find an acceptable alternative.

If we are not successful in the restructuring we will be delisted from Nasdaq, this delisting would constitute a triggering event that would allow our debenture holders to request accelerated payment of their debentures at 125% of the face value, this condition gives rise to substantial doubt about the Company's ability to continue as a going concern. If such an event were to occur, we would not have the financial resources to repay such a request, thus resulting in a default under the debenture agreement.

S. SEGMENT INFORMATION

Information for the years ended January 31, 2003, 2002 and 2001 in the table below is presented on the same basis utilized by the Company to manage its business. The segments according to product lines are as follows; Sorrento Networks, Meret Optical and other. Export sales and certain income and expense

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

items are reported in the geographic area where the final sale to customers is made, rather than where the transaction originates. We have no material long term assets outside the United States. The accounting policies of the segments are the same as the policies described in the "Summary of Significant Accounting Policies." Each segment operates independent of one another. The company evaluates the performance of each segment and distributes resources to them based on earnings before income taxes, excluding corporate charges ("Segment income Class) from operations"). Any corporate charges that are allocated to the segments are allocated as a percentage of revenue. These charges, if any, are recorded under "other income (expenses)" and are eliminated in the consolidation process. "Other income (expenses)" is not shown in the supplemental segment information contained below.

Sorrento Networks Corporation (formerly Osicom Technologies, Inc.) (the "Company," "We," "Our," or "Us") through its subsidiaries designs, manufactures and markets integrated networking and bandwidth aggregation products for enhancing the performance of data and telecommunications networks. Our products are deployed in telephone companies, Internet Service Providers, governmental bodies and the corporate/campus networks that make up the "enterprise" segment of the networking marketplace. We have facilities in San Diego, California and various sales offices located in the United States and Europe. We market and sell our products and services through a broad array of channels including worldwide distributors, value added resellers, local and long distance carriers and governmental agencies.

Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial data for the three months ended April 30, 2003 and 2002 along with financial data for January 31, 2003, has been prepared by us, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. The January 31, 2003 balance sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. However, we believe that the disclosures we have made are adequate to make the information presented not misleading. These consolidated financial statements should be read in conjunction with the financial statements and the notes thereto included in our Annual Report on Form 10-K for the year ended January 31, 2003.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect the reported amounts of assets, liabilities, revenues and expenses, the disclosure of contingent assets and liabilities. Actual results could materially differ from these estimates. In the opinion of Management, all adjustments (which include normal recurring adjustments and charges described in the notes to the financial statements) necessary to present fairly the financial position, results of operations and cash flows for the quarters ended April 30, 2003 and 2002 have been made. The results of operations for the quarter ended April 30, 2003 are not necessarily indicative of the operating results for the full year.

We have incurred significant losses and negative cash flows from operations for the past two years. SNI, our principal operating subsidiary, has primarily been the operating entity responsible for these losses and negative cash flows. The losses have been generated as SNI continues to develop its technology, marketing, sales and operations in its effort to become a major supplier of metro and regional optical networks worldwide. We fund our operations primarily through a combination of internal funds, investments, and debt and equity financing. There can be no assurance that similar funding will be available in the future. Further, with the recent downturn in the economic environment and decreases in capital spending by telecom carriers, we believe our current and future revenues could be negatively impacted. However, orders for the quarter ended April 30, 2003 were substantially higher than for the same comparable quarter last year and as a result we believe this upward trend could indicate a potential recovery from the lingering telecom capital expenditure downturn. In either case, future increases in working capital will be required to both maintain and grow our business along with a continued and substantial focus on reducing operating expenses. Given the uncertainty and/or predictability of the telecom market and the limited amount of our existing

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

working capital there can be no assurance that our existing financial resources will be sufficient to cover our operational needs for the next twelve months. If however, our revenues continue to show improvement, we implement our plans on expense reductions and attract additional working capital through the issuance of stock or debt, our balance sheet will be significantly improved and will provide us with the necessary financial resources to meet our operational plans for a period exceeding one year. In addition our auditors have issued a going concern qualification to their opinion regarding the successful approval and completion of our Capital Restructuring Plan, which closed on June 4, 2003.

Our future capital requirements may vary materially from those now planned including the need for additional working capital to accommodate planned growth, hiring and infrastructure needs. There can be no assurances that our working capital requirements will not exceed our ability to generate sufficient cash internally to

F-41

support our requirements and that external financing will be available or that, if available, such financing can be obtained on terms favorable to us and our shareholders.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates that affect the reported amounts of assets, liabilities, revenues and expenses, the disclosure of contingent assets and liabilities. Actual results could materially differ from these estimates. In the opinion of Management, all adjustments (which include normal recurring adjustments and charges described in the notes to the financial statements) necessary to present fairly the financial position, results of operations and cash flows for the quarters ended April 30, 2003 and 2002 have been made.

Certain reclassifications have been made to prior year presentations to conform to the 2004 presentation.

Digi International, Inc. and NETsilicon, Inc.

Digi International, Inc. and NETsilicon, Inc. -- On September 15, 1999, NETsilicon, Inc. ("NSI") completed an initial public offering in which 6,037,500 shares of its common stocks were sold (3,537,500 shares by NSI and 2,500,000 shares by us). NSI received net proceeds of \$22.3 million and we received net proceeds of \$15.4 million. In addition, NSI repaid advances due us of \$5.9 million. In connection with the initial public offering by NSI, our remaining 55% interest became non-voting shares. Accordingly, our financial statements reflected the results of operations of NSI through September 14, 1999 at which time our remaining interest was accounted for as an "available for sale security." Under this accounting, the 7.5 million shares of NSI held by us were marked-to-market at the end of each reporting period with the difference between our basis and the fair market value, as reported on NASDAQ, reported as a separate element of stockholders' equity and included in the computation of

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

comprehensive loss.

In October 2000, we sold 350,000 shares of our investment in NSI for \$4.2 million. The purchasers had the right to receive additional NSI shares from us if the three-day average high for the NSI common stock, as quoted on NASDAQ, at December 31, 2000 was less than the price paid to us by the purchasers but not less than \$8.00 per share. We issued an additional 177,344 shares of NSI to the purchasers, reducing the price per share we received to \$8.00 per share. Our former Chairman and CEO purchased 100,000 of these shares of NSI for \$1.2 million and received an additional 45,546 shares pursuant to the price protection provision. As a result of this transaction, our remaining interest was approximately 7.0 million shares of NSI, or 51% of the outstanding shares of NSI as of January 31, 2002 and continued to be accounted for as a marked-to-market security.

On February 13, 2002, NSI completed a merger with Digi International, Inc. ("DIGI"). In connection with the merger, we exchanged our 6,972,656 shares of NSI for 2,324,683 shares of DIGI and \$13.6 million in cash. On December 9, 2002, we sold one-half of our holdings in DIGI for \$3.10 per share. The purchaser of the stock was DIGI, itself. The proceeds from this sale, in the amount of \$3.6 million, were deposited on December 13, 2002. The remaining 1,162,341 DIGI shares owned by us are accounted for as an "available for sale security". Under this accounting, these shares are marked-to-market at the end of each reporting period. The difference between our basis and the fair market value, as reported on NASDAQ, is a separate element of stockholders' equity and is included in the computation of comprehensive income. The closing price of DIGI common stock on April 30, 2003 was \$4.24, and is reflected in the valuation of our marketable securities as of that date. See Subsequent Events.

Entrada Networks, Inc. -- On August 31, 2000, we completed a merger of our then subsidiary Entrada Networks with Sync Research, Inc. ("Sync"), a NASDAQ listed company in which we received 4,244,155 shares of the merged entity, which changed its name to Entrada Networks, Inc. ("ENI"). We purchased 93,900 shares of Sync in the open market during June and July 2000 for \$388 and on August 31, 2000 purchased an additional 1,001,818 shares directly from ENI for \$3.3 million. After these transactions and ENI's issuance of additional shares to outside investors in connection with the merger we owned 49% of ENI. Accordingly, our financial statements reflected the results of operations of ENI through August 31, 2000.

Pursuant to a plan adopted by our Board of Directors prior to the merger we distributed 3,107,155 of our ENI shares on December 1, 2000 to our shareholders of record as of November 20, 2000. The distribution was made at the rate of one-fourth (0.25) of an ENI share for each of our outstanding shares. At exercise, options and warrants to acquire our common shares, which were granted and unexercised as of November 20, 2000, would have received a similar number of ENI shares. Prior to January 31, 2001 we distributed 20,182 of our ENI shares upon the exercise

F-42

of options and as of January 31, 2003 we have reserved 826,000 shares for future

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

exercises of options and warrants. The cost basis of these reserved shares and related liability to the option and warrant holders is included in the investment in former subsidiary and dividends payable in the accompanying balance sheet. The aggregate distribution of our ENI shares including the shares reserved for option and warrant holders has been accounted for at our original cost of \$5.1 million. In addition, we have granted options to purchase 410,000 of our ENI shares for \$3.19 per share (the merger price) to several of our then officers and consultants. In April 2003, our Board of Directors determined that the 826,000 ENI shares should be made available for general corporate purposes, and we are no longer reserving any for distribution to option and warrant holders.

The remaining 326,034 ENI shares owned by us were accounted for as an "available for sale security". Under this accounting, these shares are marked-to-market at the end of each reporting period. The difference between our basis and the fair market value, as reported on NASDAQ, is a separate element of stockholders' equity and is included in the computation of comprehensive income.

Deferred Stock Compensation

We account for employee-based stock compensation utilizing the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees." Accordingly, compensation cost for stock options issued to employees is measured as the excess, if any, of the fair market price of our common stock at the date of grant over the amount an employee must pay to acquire the stock. This amount appears as a separate component of stockholders' equity and is being amortized on an accelerated basis by charges to operations over the vesting period of the options in accordance with the method described in Financial Accounting Standards Board Interpretation No. 28. All such amounts relate to options to acquire common stock of our Sorrento subsidiary granted by it to its employees; during the three months ended April 30, 2003 and 2002 it amortized \$5 thousand and \$62 thousand, respectively, of the total \$2.6 million initially recorded for deferred stock compensation.

For non-employees, we compute the fair value of stock-based compensation in accordance with Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation," and Emerging Issues Tax Force (EITF) 96-18, "Accounting for Equity Instruments that are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services." All such amounts relate to options to acquire common stock of our subsidiary Sorrento Networks, Inc. ("SNI") granted by it to its consultants; during the three months ended April 30, 2003 and 2002 it recorded \$46 thousand and \$44 thousand, respectively, for options granted to consultants.

Recent Accounting Pronouncements

In January 2003, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation ("FIN") No. 46, "Consolidation of Variable Interest Entities", and interpretation of Accounting Research Bulletin No. 51, "Consolidated Financial Statements", FIN No. 46 explains how to identify variable interest entities and how an enterprise assesses its interests in a variable interest entity to decide whether to consolidate that entity. This Interpretation requires existing unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. FIN No. 46 is effective immediately for variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an interest after that date. The Interpretation applies in the first fiscal year or interim period beginning after June 15, 2003, to variable interest entities in which an enterprise holds a variable interest that is acquired before February 1, 2003. We have adopted FIN No. 46 with no material effect on our financial position or results of

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

operations.

In June 2002, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 146, "Accounting for Costs Associated with Exit or Disposal Activities", which addresses accounting for restructuring and similar costs. SFAS No. 146 supersedes previous accounting guidance, principally Emerging Issues Task Force ("EITF") Issue No. 94-3. We have adopted the provisions of SFAS 146 for restructuring activities initiated after December 31, 2002. SFAS 146 requires that the liability for costs associated with an exit or disposal activity be recognized when the liability is incurred. Under EITF No. 94-3, a liability for an exit cost was recognized at the date of a company's commitment to an exit plan. SFAS 146 also establishes that the liability should initially be measured and recorded at fair value. Accordingly, SFAS 146 may affect the timing of recognizing future restructuring costs as well as the amount recognized. Adoption of this standard did not have any immediate effect on our consolidated financial statements.

F-43

In August 2001, the Financial Accounting Standards Board issued SFAS No. 143, Accounting for Asset Retirement Obligations. This Statement is effective for fiscal years beginning after June 15, 2002. SFAS No. 143 provides accounting requirements for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. Under the Statement, the asset retirement obligation is recorded at fair value in the period in which it is incurred by increasing the carrying amount of the related long-lived asset. The liability is accreted to its present value in each subsequent period and the capitalized cost is depreciated over the useful life of the related asset. The adoption of SFAS 143 did not have a material effect on our financial position or results of operations.

Balance Sheet Detail

Inventories at April 30, 2003 and January 31, 2003 consist of:

	April 30,	
	2003	Ja

Raw material.....	\$10,478	
Work in process.....	2,192

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

Marketable Securities--Marketable securities, which consist of equity securities that have a readily determinable fair value and do not have sale restrictions lasting beyond one year from the balance sheet date, are classified into categories based on our intent. Our investments in DIGI and Entrada are classified as available for sale and are carried at fair value, based upon quoted market prices, with net unrealized gains reported as a separate component of stockholders' equity until realized. Unrealized losses are charged against income when a decline in fair value is determined to be other than temporary. At April 30, 2003, and January 31, 2003, marketable securities were as follows:

	Cost ----	Unrealized Gains -----	Market Value -----
April 30, 2003:			
Digi	\$1,009	\$3,920	\$4,929
Entrada	22	69	91
	-----	-----	-----
	\$1,031	\$3,989	\$5,020
	=====	=====	=====
January 31, 2003:			
Digi	\$1,009	\$2,884	\$3,893
Entrada	22	44	66
	-----	-----	-----
	\$1,031	\$2,928	\$3,959
	=====	=====	=====

Intangible Assets--Under SFAS No. 142, goodwill and indefinite life intangible assets are no longer amortized but are subject to periodic impairment tests. We have no goodwill or indefinite life intangible assets. Other intangible assets with finite lives, such as our purchased technology, will continue to be amortized over their useful lives.

The net carrying value of finite life intangible assets, consisting of purchased technology, as of April 30, 2003, is \$327 thousand, net of amortization and is allocated to the Meret Optical Communications segment.

The change in the net carrying amount of finite life intangible assets during the three months ended April 30, 2003 is due to amortization of \$103 thousand. Annual estimated finite life intangible asset amortization expense for each of the remaining fiscal years is expected to approximate \$40 thousand, \$40 thousand, and \$30 thousand.

F-44

Debentures - During August 2001, we completed a private placement of our 9.75% convertible debentures receiving net proceeds of \$29.8 million. The debentures, due August 2, 2004 have a face value of \$32.2 million, which is

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

convertible into our common stock at \$144.20 per share. At maturity we may elect to redeem the debentures for cash and we have the option of paying the interest on these debentures in shares of our common stock. In addition, the purchasers received four year warrants to acquire an additional 167,592 shares of our common stock at \$144.20 per share and the placement agent received five year warrants to acquire 5,583 shares of our common stock, equity securities, options or warrants at a price less than \$144.20 per share or at a discount to the then market price. The conversion price and warrant exercise are subject to adjustment.

In accordance with Emerging Issues Task Force ("EITF") No. 00-27 we have accounted for the fair value of warrants issued to the purchasers and placement agent and the fair value of the deemed beneficial conversion feature, which results solely as a result of the required accounting, of the debenture as a reduction to the face value of the debentures with an offsetting increase to additional paid in capital. These amounts as well as the issuance costs paid in cash are amortized as additional interest expense over the period the debentures are outstanding. Interest expense during the three months ended April 30, 2003 of \$2.6 million included the stated 9.75% interest of \$765, amortization of issuance costs of \$203, and amortization of the fair value of the warrants issued to the purchasers and placement agent and the deemed beneficial conversion feature of \$1.6 million. At April 30, 2003 and January 31, 2003 debentures payable consists of:

	April 30, 2003

Face Value.....	\$ 32,200
Issuance costs.....	(2,451)
Value of warrants and deemed beneficial Conversion feature.....	(19,525)

Debenture book value at issuance.....	10,224
Accumulated amortization of Issuance costs.....	1,084
Value of warrants and deemed beneficial conversion feature.....	8,632

	\$ 19,940
=====	

We are in the process of a debt and equity restructuring plan that would exchange current outstanding debentures and Series A Preferred Stock for common stock and an issuance of a smaller principal amount of new debentures. See Subsequent Events.

Stockholders' Equity

We are authorized to issue the following shares of stock:

7,500,000 shares of Common Stock (\$6.00 par value)

2,000,000 shares of Preferred Stock (\$.01 par value) of which the following series have been designated:

3,000 shares of Preferred Stock, Series D

1,000,000 shares of Preferred Stock, Series F

We have outstanding the following shares of preferred stock:

	Shares Outstanding -----	Par Value -----	Liq Pre -----
Series D.....	1,353 -----	\$0.01 -----	\$1 -----
	1,353 =====	\$0.01 =====	\$1 =====

F-45

Other Capital Stock Transactions

Stock Split - In October, 2002, approval was granted for a one-for-twenty reverse stock split effective October 28, 2002. The effect of this stock split was reflected in the financial statements retroactively as if the stock split occurred at the beginning of the earliest period reported.

On March 22, 2001, we completed a private placement of 76,300 unregistered shares of our common stock receiving net proceeds of \$9.6 million. In addition, the purchasers received three-year warrants to acquire an additional 19,075 shares of our common stock at \$163.80 per share. For a period of 18 months from the March 22, 2001 completion date in the event we were to issue shares of common stock or equity securities convertible into our common stock at a price less than \$131.062 per share, the purchasers would be entitled to receive additional shares of common stock.

During 2000, SNI completed a sale of 8,596,333 shares of its Series A Convertible Preferred Stock receiving net proceeds of \$46.6 million from a group of investors. 1,467,891 shares were purchased by, and a finders fee of \$2.0 million was paid through the issuance by Sorrento of an additional 357,799 shares of its Series A Convertible Preferred Stock to, entities in which one of our outside directors at the time, who later in 2000 served for several months as our Chairman and CEO, was a partner or member pursuant to a previously contracted right of participation.

One of our current outside directors purchased 183,486 shares in this placement. At the time of purchase, he was not one of our directors. This individual is also a director of Liberty Media Corporation, which owns an approximate 74% economic interest representing an approximate 94% voting interest in United GlobalCom ("UGC"). The purchaser of 3,027,523 shares in this placement is an indirect subsidiary of UGC. Liberty Media also holds convertible

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

debt in this Series A holder, which it has agreed to exchange for shares in UGC.

Each share of SNI's Series A Preferred Stock is convertible into one share of SNI's common stock at the option of the holder, may vote on an "as converted" basis except for election of directors, and has a liquidation preference of \$5.45 per share. The shares are automatically converted into SNI's common stock upon an underwritten public offering by SNI with an aggregate offering price of at least \$50.0 million. As SNI did not complete a \$50.0 million public offering by March 1, 2001, the holders of more than 50% of the then outstanding Series A shares had the right to request in writing that SNI redeem them at the adjusted liquidation preference. On receipt of such a request, our Sorrento subsidiary has the obligation to redeem the shares in cash, if funds are lawfully available for such a redemption, or to redeem such pro rata portion as to which a lesser amount of lawfully available funds do exist. In April 2001, our Sorrento subsidiary received written redemption requests from holders of a majority of the Series A shares. The difference between the net proceeds received on the sale of these shares and their liquidation preference of \$48.8 million was recorded as a deemed dividend during the period from issuance to March 31, 2001.

As of April 30, 2003 and January 31, 2003, the Series A Preferred Stock has been reclassified as a current liability since the holders have exercised their right to request that SNI redeem the shares. The Series A liability can only be paid through lawfully available funds that would normally be generated from SNI profitable operations, which we do not currently have available or foresee the availability of the near future. As of June 4, 2003, we have consummated our restructuring transaction and have cancelled all outstanding Series A Preferred Stock. See Subsequent Events.

Stock Option Plans

We have four stock options plans in effect: The 2000 Stock Incentive Plan, the 1988 Stock Option Plan, the 1997 Incentive and Non-Qualified Stock Option Plan and the 1997 Director Stock Option Plan. The stock options have been made available to certain employees and consultants. All options are granted at not less than fair value at the date of grant and have terms varying from 3 to 10 years. The purpose of these plans is to attract, retain, motivate and reward our officers, directors, employees and consultants to maximize their contribution towards our success.

We account for these plans under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. No stock-based employee compensation cost is reflected in net loss, as all options granted under these plans had an exercise price equal to the market value of the underlying common stock on the date of grant.

F-46

In order to provide more prominent and frequent disclosures about the effects of stock-based compensation as required under SFAS 148, "Accounting for Stock-Based Compensation - Transition and Disclosure", the following table summarizes the pro forma effect of stock-based compensation on net loss and earnings (loss) per share if the optional expense recognition provisions of SFAS

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

123 had been adopted.

The fair value of stock options used to compute pro forma net loss and pro forma loss per share disclosures is estimated using the Black-Scholes option-pricing model, which was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, this model requires the input of subjective assumptions, including the expected price volatility of the underlying stock. Projected data for expected volatility and expected life of stock options is based upon historical and other data. Changes in these subjective assumptions can materially affect the fair value estimate, and therefore the existing valuation models may not provide a reliable single measure of the fair value of the Company's employee stock options.

	For the three months ended, April 30

Earnings Per Share Calculation

The following data show the amounts used in computing basic earnings per share for the quarters ended April 30, 2003 and 2002.

	Three Months Ended A	
	2003	2002
	-----	-----
Net income (loss) available to common shareholders used in basic EPS.....	\$ (6,222)	\$ (6,222)
	=====	=====
Average number of common shares		

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

used in basic EPS..... 886,050
 =====

We had a net loss for the quarter ended April 30, 2003. Accordingly, the effect of dilutive securities including convertible preferred stock, vested and non-vested stock options and warrants to acquire common stock are not included in the calculation of EPS because their effect would be antidilutive. Our convertible debentures create a dilutive situation even though the company had a net loss for the quarter. The following data shows the effect on income and the weighted average number of shares of dilutive potential common stock.

F-47

	Three Months Ended 2003	April 30, 2002

Litigation

On September 10, 2001, holders of a portion of the outstanding Series A Preferred Stock of our Sorrento subsidiary obtained a preliminary injunction from the Delaware Court of Chancery prohibiting SNI from issuing further shares

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

of its Series A Preferred Stock or incurring any additional debt without the consent of the holders of a majority of the currently outstanding shares of such Series A Preferred Stock. On January 23, 2002, the Delaware Supreme Court affirmed the granting of the preliminary injunction.

On October 19, 2001, an amended complaint was filed in the injunction action, adding as named defendants, the Company, our Meret subsidiary, certain present and former officers and directors of the Company and our subsidiaries as well as our investment bankers. The amended complaint also added, among other things, claims for fraud, securities fraud, breach of fiduciary duty, conspiracy, and intentional interference with contract as well as requesting the appointment of a receiver for our Sorrento subsidiary, all which claims are based on alleged wrongs committed in connection with or since the Series A placement. Our Sorrento subsidiary and the original individual defendants have all answered this amended complaint denying all allegations of wrongdoing. The new defendants have all moved to dismiss the amended complaint. Management believes the allegations contained in the amended complaint are without merit.

On December 14, 2001, the plaintiffs filed motions to sequester the common stock of our Sorrento subsidiary owned by Meret and the Sorrento Series A preferred stock that we own, as an alternative method of obtaining jurisdiction over us and Meret in the Delaware litigation. Management also believes that these motions are without merit.

Currently, hearings on all pending motions have been taken off calendar at the request of all parties. The Exchange Agreement entered into in connection with our recently completed capital restructuring provides that this litigation will be dismissed with prejudice against the Company, its subsidiaries, its current officers and directors, and other defendants who execute an appropriate release, and without prejudice against all other defendants. This dismissal will require court approval, which is in the process of being obtained by counsel for all parties. See Subsequent Events.

During June 2000, we entered into various agreements with Par Chadha, our former CEO and Chairman, which, among other matters, provides for payments of \$250 thousand per year for three years of consulting services and loans by us for the exercise of previously granted options to acquire 58,925 options at prices varying from \$140.60 to \$985.00 per share. As the members of our Board of Directors at the time of his resignation ceased to represent more than 50% of the Board in October 2000, all payments for consulting services were accelerated and no future consulting services are required. During October 2000, Mr. Chadha exercised 3,556 options, applying the \$500 thousand accelerated payment to the exercise. In addition, he exercised 25,369 options for which we were contractually obligated to loan the \$5.0 million due on the exercise. Mr. Chadha provided us with written notification dated in September 2001 that he does not have any obligations under the agreements. We have notified him that we do not agree with his interpretation of his repayment obligations under the terms of the agreements.

F-48

During December 2001, we entered into an agreement whereby the 25,369-option exercise was rescinded. Mr. Chadha returned the 25,369 shares to us for cancellation and we cancelled the receivable due from him and restored

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

the original option agreements. In June 2002, we filed with the Superior Court of California, County of Los Angeles a Complaint for Declaratory Relief regarding the interpretation of the agreement. Also in June 2002, Mr. Chadha filed a lawsuit against us in the Superior Court of California, County of Los Angeles, seeking declaratory relief with respect to the interpretation of his separation agreement and in addition, alleging breach of contract with respect to his option exercise rights and fraud in connection with his rescission agreement. In February 2003, both of these lawsuits were dismissed without prejudice to facilitate settlement negotiations, but they can be refiled at any time. In April 2003, an agreement in principle to settle these lawsuits was reached, subject to the execution of a definitive agreement. While there can be no assurance that such a definitive settlement agreement will be executed, the Company has been informed by counsel for all parties that the agreement is acceptable and will be signed. Should the cases be refiled, which now appears unlikely, and should Mr. Chadha prevail in Court, in addition to any other relief that may be granted, we may be required to issue him 58,925 shares of our stock for no consideration, which would be valued at \$292 thousand as of April 30, 2003, and/or pay him cash damages, which he alleges to be in excess of \$4 million.

In addition, claims in arbitration have been filed by two of our former financial officers and employees who worked in our Santa Monica office, which has now been closed, alleging that their resignations in May 2002 were for "good reason" as defined in their employment agreements, all of which were to expire on May 22, 2002. One of the claims has been settled, and we are disputing the other claims. The amount of the disputed claim is approximately \$195 thousand plus attorneys fees.

We filed a lawsuit against United Pan Europe Communications, N.V., one of our customers and a related party to one of Sorrento's Series A shareholders, in connection with a past due receivable in the amount of \$1.6 million for equipment shipped in 2000. The defendant filed for protection under the federal bankruptcy laws, and pursuant to the Exchange Agreement entered into in connection with our capital restructuring, we executed a definitive settlement agreement and a stipulation of dismissal with prejudice resolving this lawsuit in return for a payment of \$350 thousand and the return of certain of the equipment previously shipped. We have received the payment of \$350 thousand from UPC and, in accordance with the terms of the exchange agreement, have paid that same amount to certain Series A Preferred Stock holders. The equipment has also been returned. Accordingly, this lawsuit has been dismissed with prejudice.

We have also been sued by a former officer of our Sorrento subsidiary alleging breach of a consulting agreement we entered into with him in March 2002, following his resignation "for good reason" as defined in his employment agreement. He is seeking acceleration of consulting fees due to him under his consulting agreement in the amount of \$229 thousand. We feel these claims are without merit and are vigorously defending the claims. We have also filed counterclaims. In May 2002, the former officer's motion for summary judgment was denied. Currently, the matter is in discovery.

From time to time, we are involved in various other legal proceedings and claims incidental to the conduct of our business. Although it is impossible to predict the outcome of any outstanding legal proceedings, we believe that such legal proceedings and claims, individually and in the aggregate, are not likely to have a material adverse effect on our financial position, results of operations, or cash flows.

Contingent Liabilities

In the merger agreement between our predecessor corporation and Sync Research, we agreed to indemnify and hold our former subsidiary, Entrada, harmless against any liability arising after the merger in connection with the

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

termination of a certain pension plan previously maintained by Entrada. In the third quarter of 2003, we were advised by a consultant retained by us and by the successor corporation to the entity from whom we originally purchased the company that became Entrada that the cost of termination of the pension plan in question is in excess of \$3.0 million. While we do not believe that we are liable for this cost, it is possible that the successor corporation, which has been funding the pension plan since 1996, may seek a substantial contribution from us towards this liability.

Concentration Of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of temporary cash investments and trade receivables. As regards the former, we place our temporary cash investments with high

F-49

credit financial institutions and limits. At times such amounts may exceed the F.D.I.C. limits. We limit the amount of exposure with any one financial institution and believe that no significant concentration of credit risk exists with respect to cash investments.

Although we are directly affected by the economic well being of significant customers listed in the following tables, we do not believe that significant credit risk exists at April 30, 2003. We perform ongoing evaluations of our customers and require letters of credit or other collateral arrangements as appropriate. Accordingly, trade receivable credit losses have not been significant.

Subsequent Events

Sale of DIGI Stock

On May 7, 2003, we sold our remaining security interest in DIGI International Inc. (Nasdaq: DGII) for \$4.26 per share. The purchaser of the stock was DIGI, itself. The proceeds from this sale, in the amount of \$5.0 million, were deposited on May 7, 2003.

Restructuring Plan

The proposed capital and corporate restructuring plan outlined below, was approved by shareholders on May 29, 2003 and was completed after the market closed on June 4, 2003.

On March 6, 2003, we and our wholly-owned subsidiary Sorrento Networks, Inc. entered into an Exchange Agreement with the holders of our 9.75% Senior Convertible Debentures (the "Debentures") and the Series A Convertible Preferred Stock (the "Preferred Stock") of Sorrento Networks, Inc. The Exchange Agreement and associated documents contemplate an exchange (the "Exchange") of the Debentures and the Preferred Stock at closing into shares of common stock and \$12.5 million of our new 7.5% secured convertible debentures (the "New Debentures"). Certain holders of the Preferred Stock would also receive additional New Debentures of approximately \$600 thousand to pay certain legal fees.

The shares of common stock and the New Debentures to be issued in the Exchange will represent, in the aggregate, approximately 87.5% of our common stock on a diluted basis. This percentage takes into account the total number of existing shares outstanding, the shares to be issued to the holders of the Debentures and the Preferred Stock at the closing, the shares issuable upon conversion of \$12.5 million of New Debentures, and the shares issuable upon conversion of warrants to be issued to existing shareholders. This percentage does not take into account new employee stock options, shares issuable upon conversion of approximately \$600 thousand in New Debentures to be issued to certain holders of the Preferred Stock to pay certain legal fees, and certain other issuances. We issued 8,029,578 shares of common stock to the holders of the Debentures and the Preferred Stock upon consummation of the Exchange. The New Debentures that were issued in the Exchange (not including the New Debentures to be issued in satisfaction of legal fees) are convertible into approximately 19.5% of our shares of common stock, calculated on the same diluted basis.

The Exchange Agreement states that our existing shareholders will retain 7.5% of our common stock on the same diluted basis, and will receive non-transferable warrants to purchase approximately 5% of our common stock, exercisable beginning one year after the closing. The exercise price of the warrants is \$5.96. The shareholders' date of record to receive warrants is May 28, 2003. The warrants will be exercisable at any time prior to August 2, 2007, provided that any such exercise of the warrants will be subject to the effectiveness of a registration statement with respect to the common shares to be issued upon exercise of the warrants. We may repurchase the warrants for a nominal price, upon 30 days prior notice, at any time after the volume-weighted average market price of our common stock for any ten consecutive trading days equals or exceeds 150% of the exercise price.

The New Debentures will mature on August 2, 2007 and will be convertible at any time at the option of the holder at a conversion price of \$5.42. Subject to certain limits, interest on the New Debentures may be paid, at our option, either in cash, additional New Debentures or our common stock.

Edgar Filing: SORRENTO NETWORKS CORP - Form 10-12G

The New Debentures include covenants restricting our ability to incur senior or subordinated debt or preferred stock other than \$5.0 million in lease or equipment financing and a \$5.0 million revolving credit facility (up to \$10.0 million with certain consents), as well as other standard covenants and protective provisions. At any time prior to the

F-51

maturity date, we may redeem for cash on a pro rata basis some or all of the New Debentures at par, plus accrued interest.

The New Debentures are secured by substantially all of our assets and those of our subsidiaries (with certain exceptions, including the real estate owned by Meret Communications, Inc., and Sorrento Valley Real Estate Holdings, LLC). No later than one year following the closing date, we must provide a second mortgage on such real estate as security for the New Debentures. When we have done so and we have merged our subsidiaries into us, most of the remaining collateral will be released or subordinated at our request to permit us to obtain a secured loan from a bank.

Until one year after the closing and subject to certain exceptions, exchanging holders of Debentures and Preferred Stock who continue to hold common stock received in the Exchange and New Debentures will be entitled to certain weighted average anti-dilution protection for such continued holdings with respect to certain additional issuances of our common stock. In addition, if we are required to issue shares of common stock upon the exercise of any right, option or warrant to purchase common stock that was issued prior to the closing and was not listed on the option schedule to the exchange agreement, then we will issue additional shares of common stock to the exchanging holders, and will adjust the conversion price of the New Debentures sufficient to offset the dilutive impact of such issuances.

The Series A holders as a group may request that we appoint one new director to our Board of Directors. The Debenture holders as a group may also request that we appoint one new director to our Board of Directors. The new director(s) would continue in office until the next regularly scheduled annual meeting of our shareholders and shall be nominated for re-election at such meeting.

We merged with and into a newly-formed Delaware corporation immediately prior to the closing of the restructuring, which was formed solely for the purpose of effecting the change in our state of incorporation from the State of New Jersey to the State of Delaware. Promptly after the closing date of the restructuring transaction, and in no event later than one year after the closing date, our subsidiaries, Sorrento Networks, Inc., Meret Communications, Inc., and Sorrento Valley Real Estate Holdings, LLC, will be merged with and into us.

The following table shows a proforma comparison of our balance sheet as of April 30, 2003. It demonstrates, among other things, our positive shareholder equity in excess of \$10.0 million, satisfying the applicable NASDAQ listing requirement.

Notes on the Proforma Consolidated Balance Sheet:

A To record the retirement of the Series A shares.

B To record reacquisition of the Outstanding Debentures, including the reacquisition of the beneficial conversion option associated with the convertible debt. An entry of \$6.1 million is recorded to additional paid in capital to reflect the estimated value of the beneficial conversion option at the date of extinguishment. An additional \$6.2 million representing the unamortized balance of the previously issued debt costs and incremental value of the beneficial conversion feature not reacquired will be recorded as part of the gain on extinguishment.

C To record the issuance of the Exchange Debentures \$12.5 million and the Fee Amount Debentures \$600 thousand. The Fee Amount Debentures were issued to certain exchanging holders in satisfaction of certain legal fees incurred by them in litigation with the Company.

D To record the value of the new shares of common stock issued to holders of the Outstanding Debentures and Series A. Amount is estimated at 8,029,578 shares at a per share price of \$5.42. This is the volume-weighted average closing price of the Company's common stock on the ten trading days ending on the third trading day prior to the closing, which is also the conversion price for the Exchange Debentures and the Fee Amount Debentures.

E To record the upcoming issuance of the New Warrants to existing shareholders. The value of the New Warrants was determined using the Black Scholes option pricing model based on the following inputs: Option price of \$5.96, estimated life of 4 years, volatility of 173%, no dividends and a risk free rate of return of 2.3%.
