CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

Note A Basis of Presentation and Summary of Significant Accounting Policies

The unaudited financial statements herein have been prepared by the Company pursuant to the rules and regulations of the Securities and Exchange Commission. The accompanying interim financial statements have been prepared under the presumption that users of the interim financial information have either read or have access to the audited financial statements for the latest fiscal year ended March 31, 2010. Accordingly, footnote disclosures which would substantially duplicate the disclosures contained in the March 31, 2010 audited financial statements have been omitted from these interim financial statements.

The Company evaluated all subsequent events or transactions. During the period subsequent to September 30, 2010 the Company repurchased 56,552 shares for \$2.5 million or an average of \$44.14 per share. These shares were repurchased under the Company's ongoing share repurchase program described in Note C. See also Note H for a subsequent event related to settlement of litigation.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the consolidated financial statements and footnotes for the fiscal year ended March 31, 2010 included in the Company's Annual Report on Form 10-K. Operating results for the three and six months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the fiscal year ending March 31, 2011.

Basis of Presentation: The consolidated financial statements include the accounts of CorVel and its subsidiaries. Significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates: The preparation of financial statements conforming with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the accompanying financial statements. Actual results could differ from those estimates. Significant estimates include the allowance for doubtful accounts, accrual for bonuses, accruals for self-insurance reserves, share-based payments related to performance based awards, estimated claims for claims administration revenue recognition, estimates used in stock option valuations, and estimates related to legal matters.

Cash and Cash Equivalents: Cash and cash equivalents consist of short-term highly-liquid investment-grade interest-bearing securities with maturities of 90 days or less when purchased. The carrying amounts of the Company's financial instruments approximate their fair values at March 31, 2010 and September 30, 2010. Cash at September 30, 2010 included \$2.3 million of customer deposits held in bank checking accounts.

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

Note A Basis of Presentation and Summary of Significant Accounting Policies (continued)

Goodwill: The Company accounts for its business combinations in accordance with FASB ASC 805-10 through ASC 805-50 *Business Combinations* which requires that the purchase method of accounting be applied to all business combinations and addresses the criteria for initial recognition of intangible assets and goodwill. In accordance with FASB ASC 350-10 through ASC 350-30, goodwill and other intangible assets with indefinite lives are not amortized but are tested for impairment annually, or more frequently if circumstances indicate the possibility of impairment. If the carrying value of goodwill or an intangible asset exceeds its fair value, an impairment loss shall be recognized. The Company's goodwill impairment test is conducted company-wide and the fair value is compared to its carrying value. The measurement of fair value is based on an evaluation of market capitalization and is further tested using a multiple of earnings approach. For all periods presented, no material impairment existed and, accordingly, no loss was recognized.

Revenue Recognition: The Company recognizes revenue when there is persuasive evidence of an arrangement, the services have been provided to the customer, the sales price is fixed or determinable, and collectability is reasonably assured. For the Company's services, as the Company's professional staff performs work, they are contractually permitted to bill for fees earned in fraction of an hour increments worked or by units of production. The Company recognizes revenue as the time is worked or as units of production are completed, which is when the revenue is earned and realized. Labor costs are recognized as the costs are incurred. The Company derives the majority of its revenue from the sale of network solutions and patient management services. Network solutions and patient management services may be sold individually or combined with any of the services the Company provides. When a sale combines multiple elements, the Company accounts for multiple element arrangements in accordance with the guidance included in ASC 605-25.

In accordance with ASC 605-25, the Company allocates revenue for transactions or collaborations that include multiple elements to each unit of accounting based on its relative fair value, and recognizes revenue for each unit of accounting when the revenue recognition criteria have been met. The price charged when the element is sold separately generally determines fair value. When our customers purchase several products from CorVel, the pricing of the products sold is generally the same as if the product were sold on an individual basis. As a result, the fair value of each product sold in a multiple element arrangement is almost always determinable. In the absence of fair value of a delivered element, the Company would allocate revenue first to the fair value of the undelivered elements and the residual revenue to the delivered elements. The Company recognizes revenue for delivered elements when the delivered elements have standalone value and the Company has objective and reliable evidence of fair value for each undelivered element. If the fair value of any undelivered element included in a multiple element arrangement cannot be objectively determined, revenue is deferred until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements. Based upon the nature of our products, bundled products are generally delivered in the same accounting period.

In October 2009, the FASB issued Accounting Standards Update No. 2009-13, *Multiple Deliverable Revenue Arrangements a consensus of FASB Emerging Issues Task Force* (ASU 2009-13). ASU 2009-13 provides for less restrictive separation criteria that must be met for a deliverable to be considered a separate unit of accounting. Additionally, under ASU 2009-13, there is a hierarchy for determining the selling price of a unit of accounting and consideration must be allocated using a relative selling price method. ASU 2009-13 will be effective for the Company on April 1, 2011; however, early adoption is permitted. The Company is currently reviewing the requirements of ASU 2009-13 and has not yet determined the impact on its financial position or results of operations.

Table of Contents

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

Note A Basis of Presentation and Summary of Significant Accounting Policies (continued)

Accounts Receivable: The majority of the Company's accounts receivable are due from companies in the property and casualty insurance industries, self-insured employers, and government entities. Accounts receivable are due within 30 days and are stated as amounts due from customers net of an allowance for doubtful accounts. Accounts outstanding longer than the contractual payment terms are considered past due. The Company determines its allowance by considering a number of factors, including the length of time trade accounts receivable are past due, the Company's previous loss history, the customer's current ability to pay its obligation to the Company and the condition of the general economy and the industry as a whole. No one customer accounted for 10% or more of accounts receivable at either March 31, 2010 or September 30, 2010. No one customer accounted for 10% or more of revenue during either of the three and six month periods ended September 30, 2009 or 2010.

Property and Equipment: Additions to property and equipment are recorded at cost. Depreciation and amortization are provided using the straight-line method over the estimated useful lives of the related assets, which range from three to seven years. The Company capitalizes software development costs intended for internal use. The Company accounts for internally developed software costs in accordance with FASB ASC 350-40, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*, which allows for the capitalization of software developed for internal use. These costs are included in computer software in property and equipment and are amortized over a period of five years.

Long-Lived Assets: The carrying amount of all long-lived assets is evaluated periodically to determine if adjustment to the depreciation and amortization period or to the unamortized balance is warranted. Such evaluation is based principally on the expected utilization of the long-lived assets and the projected, undiscounted cash flows of the operations in which the long-lived assets are deployed.

Income Taxes: The Company provides for income taxes under the liability method. Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities as measured by the enacted tax rates which are expected to be in effect when these differences reverse. Income tax expense is the tax payable for the period and the change during the period in net deferred tax assets and liabilities. The balance of the unrecognized tax benefits as of March 31, 2010 and September 30, 2010 was \$3,170,000 and \$1,626,000, respectively. In the September 2010 quarter, the Company resolved certain tax issues which resulted in a reduction in income tax expense of \$1.9 million.

Earnings Per Share: Earnings per common share-basic is based on the weighted average number of common shares outstanding during the period. Earnings per common shares-diluted is based on the weighted average number of common shares and common share equivalents outstanding during the period. In calculating earnings per share, earnings are the same for the basic and diluted calculations. Weighted average shares outstanding decreased in the September 2010 quarter compared to the same quarter of the prior year for diluted earnings per share due to shares repurchased under the Company's share repurchase program.

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

Note B Stock Based Compensation and Stock Options

The Company's Restated Omnibus Incentive Plan (Formerly The Restated 1988 Executive Stock Option Plan) (the Plan) as in effect at September 30, 2010, permits options for up to 9,682,500 shares of the Company's common stock to be granted over the life of the plan to key employees, non-employee directors and consultants at exercise prices not less than the fair market value of the stock at the date of grant. Options granted under the Plan are non-statutory stock options and generally vest 25% one year from date of grant and the remaining 75% vesting ratably each month for the next 36 months. The options granted to employees and the board of directors expire at the end of five years and ten years from date of grant, respectively.

In May 2006, the Company's Board of Directors granted performance-based stock options for 149,175 shares of common stock at fair market value at the date of grant, which will only vest if the Company attains certain earnings per share targets, as established by the Company's Board of Directors, for calendar years 2008, 2009, and 2010. If a target is missed in a calendar year and achieved in the following calendar year, the plan allows for a portion of earlier year option tranche to be earned. Net of cancelations due to employee terminations, options for 136,050 shares remain outstanding under these performance-based stock options as of September 30, 2010. These options were granted with an exercise price of \$15.76 per share, which was the fair market value at the date of grant, and have a valuation of \$6.75 per share. The Company did not attain the targets for calendar years 2008 and 2009. Currently, management has determined that it is probable that the Company will attain the earnings per share target for calendar year 2010 under these options and, accordingly, the Company recognized \$253,000 during the September 2010 quarter and \$344,000, cumulatively since the date of these option grants.

In February 2008, the Company's Board of Directors granted performance-based stock options for 42,000 shares of common stock at fair market value at the date of grant, which will only vest if the Company attains certain revenue targets for all services sold to claims administration clients and out-of-network bill review revenues, as established by the Company's Board of Directors, for calendar years 2009, 2010, and 2011. The targets for the various options varied by the regions and each region has a different target. Net of cancelations due to employee terminations, options for 38,000 shares remain outstanding under these performance-based stock options as of September 30, 2010. These options were granted with an exercise price of \$25.10 per share, which was the fair market value at the date of grant, and have a valuation of \$9.81 per share. Currently, management has determined that optionees with 12,000 shares attained the revenue targets for calendar year 2009 and expect to attain the revenue targets for calendar year 2010, and, accordingly, the Company has recognized \$3,000 during the September 2010 quarter and \$62,000, cumulatively, since the date of the option grant. Currently, management has determined that it is not probable that the revenue targets for the remaining optionees will be attained and, accordingly, the Company has recognized no stock compensation expense for those options.

In February 2009, the Company's Board of Directors granted performance-based stock options for 100,000 shares of common stock at fair market value at the date of grant, which will only vest if the Company attains certain earnings per share targets, as established by the Company's Board of Directors, for calendar years 2009, 2010, and 2011. Net of cancelations due to employee terminations, options for 95,000 shares remain outstanding under these performance-based stock options as of September 30, 2010. These options were granted with an exercise price of \$19.79 per share, which was the fair market value at the date of grant, and have a valuation of \$8.21 per share. The Company attained these targets for calendar year 2009 and management has determined it is probable we will achieve the targets for calendar year 2010, and accordingly, the Company has recognized stock compensation expense of \$19,000 during the September 2010 quarter and \$409,000, cumulatively, since the date of these option grants.

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

Note B Stock Based Compensation and Stock Options (continued)

In February 2009, the Company's Board of Directors granted performance-based stock options for 10,000 shares of common stock at fair market value at the date of grant, which will only vest if the Company attains certain revenue targets for all services sold to claims administration clients and out-of-network bill review revenues, as established by the Company's Board of Directors, for calendar years 2009, 2010, and 2011. These options were granted with an exercise price of \$20.37 per share, which was the fair market value at the date of grant, and have a valuation of \$8.45 per share. The Company did not achieve the revenue target for calendar year 2009. Currently, management has determined that it is not probable that the Company will attain the revenue targets for 2010 and 2011, and, accordingly, the Company has recognized no stock compensation expense for this stock option grant.

Finally, in November 2009, the Company's Board of Directors granted performance-based stock options for 110,000 shares of common stock at fair market value at the date of grant, which will only vest if the Company attains certain earnings per share targets, as established by the Company's Board of Directors, for calendar years 2010, 2011, and 2012. These options were granted with an exercise price of \$28.92 per share, which was the fair market value at the date of grant, and have a valuation of \$12.57 per share. Currently, management has determined that it is probable that the Company will attain the earnings per share targets for calendar year 2010 and, accordingly, the Company recognized \$20,000 of stock compensation expense for this stock option grant during the September 2010 quarter, and \$311,000, cumulatively, since the date of this option grant.

The tables below shows the amounts recognized in the financial statements for the three and six months ended September 30, 2009 and 2010, respectively.

	Three Months Ended	
	September 30, 2009	September 30, 2010
Cost of revenues	\$ 167,000	\$ 147,000
General and administrative	321,000	526,000
Total cost of stock-based compensation included in income before income tax provision	488,000	673,000
Amount of income tax benefit recognized	(195,000)	(256,000)
Amount charged against net income	\$ 293,000	\$ 417,000
Effect on diluted net income per share	\$ (0.02)	\$ (0.03)

Note B Stock Based Compensation and Stock Options (continued)

The following table summarizes the status of stock options outstanding and exercisable at September 30, 2010:

Range of Exercise Price	Number of Outstanding Options	Weighted Average Remaining Contractual Life	Outstanding Options Weighted Average Exercise Price	Exercisable Options Number of Exercisable Options	Exercisable Options Weighted Average Exercise Price
\$11.00 to \$17.14	242,160	1.28	\$ 15.66	107,760	\$15.53
\$17.15 to \$25.30	287,338	2.97	\$ 21.50	136,845	\$21.06
\$25.31 to \$29.41	250,963	3.69	\$ 27.71	83,994	\$27.31
\$29.42 to \$47.70	246,728	3.83	\$ 33.61	94,993	\$31.22
Total	1,027,189	2.95	\$ 24.55	423,592	\$23.17

A summary of the status for all outstanding options at September 30, 2010, and changes during the three months then ended, is presented in the table below:

	Number of Options	Weighted Average Exercise Per Share	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value as of September 30, 2010
Options outstanding at June 30, 2010	1,079,022	\$ 23.35		
Granted	45,000	39.06		
Exercised	(95,317)	17.94		
Cancelled forfeited	(829)	17.35		
Cancelled expired	(437)	15.79		
Ending outstanding	1,027,189	\$ 24.55	2.95	\$ 18,394,084

Edgar Filing: CORVEL CORP - Form 10-Q

Ending vested and expected to vest	935,488	\$	24.29	2.86	\$ 16,999,104
Ending exercisable at September 30, 2010	423,592	\$	23.17	2.45	\$ 8,174,035

The weighted-average grant-date fair value of options granted during the three months ended September 30, 2009 and 2010, was \$10.92 and \$16.28, respectively.

The Company records compensation expense for employee stock options based on the estimated fair value of the options on the date of grant using the Black-Scholes option-pricing model with the assumptions included in the table below. The Company uses historical data among other factors to estimate the expected volatility, the expected

Table of Contents

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

option life, and the expected forfeiture rate. The risk-free rate is based on the interest rate paid on a U.S. Treasury issue with a term similar to the estimated life of the option. Based upon the historical experience of options cancellations, the Company has estimated an annualized forfeiture rate of 10.64% and 9.27% for the three months ended September 30, 2009 and 2010, respectively. Forfeiture rates will be adjusted over the requisite service period when actual forfeitures differ, or are expected to differ, from the estimate. The following assumptions were used to estimate the fair value of options granted during the three months ended September 30, 2009 and 2010 using the Black-Scholes option-pricing model:

	Three Months Ended September	
	2009	30, 2010
Risk-free interest rate	2.71%	2.15%
Expected volatility	47%	46%
Expected dividend yield	0.00%	0.00%
Expected forfeiture rate	10.64%	9.27%
Expected weighted average life of option in years	4.8 years	4.7 years

All options granted in the six months ended September 30, 2009 and 2010 were granted at an exercise price which was equal to fair market value on the date of grant and are non-statutory stock options.

Note C Treasury Stock and Subsequent Event

The Company's Board of Directors initially approved the commencement of a share repurchase program in the fall of 1996. In June 2010, the Board approved an 850,000 share expansion of the repurchase program to 15,000,000 shares over the life of the share repurchase program. Since the commencement of the share repurchase program, the Company has spent \$230 million to repurchase 14,092,673 shares of its common stock, equal to 54% of the outstanding common stock had there been no repurchases. The average price of these repurchases is \$16.33 per share. These repurchases have been funded primarily from the net earnings of the Company, along with the proceeds from the exercise of common stock options. During the three months ended September 30, 2010, the Company repurchased 164,198 shares for \$6.3 million, or an average of \$38.42 per share. During the six months ended September 30, 2010, the Company repurchased 317,485 shares for \$11.8 million, or an average of \$37.10 per share. The Company had 11,834,279 shares of common stock outstanding as of September 30, 2010, net of the 14,092,673 shares in treasury. Subsequent to the end of the quarter, through November 4, 2010, the Company repurchased 56,552 shares of common stock for \$2.5 million, or an average of \$44.14 per share.

Note D Weighted Average Shares and Net Income Per Share

Weighted average basic common and common equivalent shares decreased from 12,758,000 for the quarter ended September 30, 2009 to 11,861,000 for the quarter ended September 30, 2010. Weighted average diluted common and common equivalent shares decreased from 12,920,000 for the quarter ended September 30, 2009 to 12,104,000 for the quarter ended September 30, 2010. The net decrease in both of these weighted share calculations is due to the repurchase of common stock as noted above, offset by an increase in shares outstanding due to the exercise of stock options under the Company's employee stock option plan.

Net income per common and common equivalent shares was computed by dividing net income by the weighted average number of common and common stock equivalents outstanding during the quarter. The calculations of the basic and diluted weighted shares for the three months and six months ended September 30, 2009 and 2010, are as

follows:

CORVEL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2010

Note E Shareholder Rights Plan

During fiscal 1997, the Company's Board of Directors approved the adoption of a Shareholder Rights Plan. The Shareholder Rights Plan provides for a dividend distribution to CorVel stockholders of one preferred stock purchase right for each outstanding share of CorVel's common stock under certain circumstances. In November 2008, the Company's Board of Directors approved an amendment to the Shareholder Rights Plan to, among other things, extend the expiration date of the rights to February 10, 2022 and set the exercise price of each right at \$118.

The rights are designed to assure that all shareholders receive fair and equal treatment in the event of any proposed takeover of the Company and to encourage a potential acquirer to negotiate with the Board of Directors prior to attempting a takeover. The rights have an exercise price of \$118 per right, subject to subsequent adjustment. The rights trade with the Company's common stock and will not be exercisable until the occurrence of certain takeover-related events.

Generally, the Shareholder Rights Plan provides that if a person or group acquires 15% or more of the Company's common stock without the approval of the Board, subject to certain exceptions, the holders of the rights, other than the acquiring person or group, would, under certain circumstances, have the right to purchase additional shares of the Company's common stock having a market value equal to two times the then-current exercise price of the right.

In addition, if the Company is thereafter merged into another entity, or if 50% or more of the Company's consolidated assets or earning power are sold, then the right will entitle its holder to buy common shares of the acquiring entity having a market value equal to two times the then-current exercise price of the right. The Company's Board of Directors may exchange or redeem the rights under certain conditions.

TPA Licenses	15 Years	204,000	7,000	43,000	161,000
Total		\$8,450,000	\$ 345,000	\$1,883,000	\$6,567,000

Note G Line of Credit

In June 2010, the Company renewed a credit agreement that had been in place throughout fiscal 2010. The line is with a financial institution to provide a revolving credit facility with borrowing capacity of up to \$10 million. Borrowings under this agreement, as amended, bear interest, at the Company's option, at a fixed LIBOR-based rate plus 1.50% or at a fluctuating rate determined by the financial institution to be 1.50% above the daily one-month LIBOR rate. The loan covenants require the Company to maintain the current assets to liabilities ratio of at least 1.25:1, debt to tangible net worth not greater than 1.25:1 and have positive net income. There were no outstanding revolving loans at any time during fiscal 2010 or the quarter ended September 30, 2010, or as of the date hereof, but letters of credit in the aggregate amount of \$6.3 million have been issued separate from the line of credit and therefore do not reduce the amount of borrowings available under the revolving credit facility. The renewed credit agreement expires in September 2011.

Note H Contingencies, Litigation and Subsequent Event

In February 2005, Kathleen Roche, D.C., as plaintiff, filed a putative class action in Circuit Court for the 20th Judicial District, St. Clair County, Illinois, against the Company. The case sought unspecified damages based on the Company's alleged failure to direct patients to medical providers who were members of the CorVel CorCare PPO network and also alleged that the Company used biased and arbitrary computer software to review medical providers bills. On October 29, 2010, the Company entered into a settlement agreement providing for the payment of \$2.1 million to class members and up to an additional \$700,000 for attorneys' fees and expenses, as a result the Company accrued \$2.8 million of estimated liability for this settlement agreement. The Company denies that its conduct was improper in any way and has denied all liability. The settlement agreement must receive approval by the Circuit Court before it becomes effective. There can be no assurance that the Circuit Court will approve the settlement agreement.

Note H Contingencies and Litigation (continued)

In December 2006, Southwest Louisiana Hospital Association dba Lake Charles Memorial Hospital filed a class action arbitration with the American Arbitration Association against the Company (Southwest Louisiana Hospital Association d/b/a. Lake Charles Memorial Hospital, individually and on behalf of those similarly situated v. CorVel Corporation, AAA Case No. 11 193 2760 06). Lake Charles Memorial Hospital alleges that the Company violated Louisiana's Any Willing Provider Act (the AWPAs), which requires a payor accessing a preferred provider contract to give 30 days advance written notice or point of service notice in the form of a benefit card before the payor accesses the discounted rates in the contract to pay the provider for services rendered to a insured under that payor's health benefit plan. In response, the Company filed a counter-suit on December 7, 2007 (CorVel Corporation v. Dr. Kevin Gorin, et. al, Docket No. 653896, 24th Judicial District Court for the Parish of Jefferson, State of Louisiana) seeking a declaratory judgment challenging the constitutionality of the AWPAs' damage provision. In the first phase of the arbitration, the clause construction phase, which concluded in September 2010, the arbitration panel decided that the arbitration agreement between the Company and Lake Charles Memorial Hospital permits class actions. The three additional phases of the arbitration (the class certification, class notification and merits phases) have been stayed pending appeal to permit the Company to seek judicial review of the clause construction phase decision. The Company intends to pursue all available legal remedies, including seeking judicial review of the clause construction phase decision and vigorously defending the arbitration, but there can be no assurance that the Company will be successful in doing so. The Company is not able to estimate the amount of possible loss, if any, at this time.

The Company is involved in other litigation arising in the normal course of business. Management believes that resolution of these matters will not result in any payment that, in the aggregate, would be material to the financial position or results of the operations of the Company.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This report may include certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including (without limitation) statements with respect to anticipated future operating and financial performance, growth and acquisition opportunities and other similar forecasts and statements of expectation. Words such as expects, anticipates, intends, plans, believes, seeks, estimates may, will, would, could and should, and variations of these words and expressions, are intended to identify these forward-looking statements, and include, but are not limited to, statements regarding projected results of operations, management's future strategic plans, market acceptance and performance of our software and services, the competitive nature of and anticipated growth in our markets, the status of pending litigation, our accounting estimates, and our assumptions and judgments. Forward-looking statements made by the Company and its management are based on estimates, projections, beliefs and assumptions of management at the time of such statements and are not guarantees of future performance.

Actual future performance, outcomes and results may differ materially from those expressed in forward-looking statements made by the Company and its management as a result of a number of risks, uncertainties and assumptions. Representative examples of these factors include (without limitation) general industry and economic conditions including a decreasing number of national claims due to decreasing number of injured workers; cost of capital and capital requirements; existing and possible litigation and legal liability in the course of operations; competition from other managed care companies; the ability to expand certain areas of the Company's business; shifts in customer demands; the ability of the Company to produce market-competitive software; changes in operating expenses including employee wages, benefits and medical inflation; governmental and public policy changes; dependence on key personnel; and the continued availability of financing in the amounts and at the terms necessary to support the Company's future business. The Company disclaims any obligations to update or revise any forward-looking statement based on the occurrence of future events, the receipt of new information or otherwise, except as required by law.

Overview

CorVel Corporation is an independent nationwide provider of medical cost containment and managed care services designed to address the escalating medical costs of workers' compensation and auto policies. The Company's services are provided to insurance companies, third party administrators (TPAs) and self-administered employers to assist them in managing medical costs and monitoring the quality of care associated with healthcare claims.

Network Solutions Services

The Company's network solutions services are designed to reduce the price paid by its customers for medical services rendered in workers' compensation cases, auto policies and, to a lesser extent, group health policies. The network solutions offered by the Company include automated medical fee auditing, preferred provider services, retrospective utilization review, independent medical examinations, and inpatient bill review. Network solutions services also includes revenue from the Company's directed care network, including imaging and physical therapy

Table of Contents

Patient Management Services

In addition to its network solutions services, the Company offers a range of patient management services, which involve working on a one-on-one basis with injured employees and their various healthcare professionals, employers and insurance company adjusters. The services are designed to monitor the medical necessity and appropriateness of healthcare services provided to workers' compensation and other healthcare claimants and to expedite return to work. The Company offers these services on a stand-alone basis, or as an integrated component of its medical cost containment services.

Organizational Structure

The Company's management is structured geographically with regional vice-presidents who report to the President of the Company. Each of these regional vice-presidents is responsible for all services provided by the Company in his or her particular region and for the operating results of the Company in multiple states. These regional vice presidents have area and district managers who are also responsible for all services provided by the Company in their given area and district.

Business Enterprise Segments

The Company operates in one reportable operating segment, managed care. The Company's services are delivered to its customers through its local offices in each region and financial information for the Company's operations follows this service delivery model. All regions provide the Company's patient management and network solutions services. FASB ASC 280-10 establishes standards for the way that public business enterprises report information about operating segments in annual and interim consolidated financial statements. The Company's internal financial reporting is segmented geographically, as discussed above, and managed on a geographic rather than service line basis, with virtually all of the Company's operating revenue generated within the United States.

Under FASB ASC 280-10, two or more operating segments may be aggregated into a single operating segment for financial reporting purposes if aggregation is consistent with the objective and basic principles, if the segments have similar economic characteristics, and if the segments are similar in each of the following areas: 1) the nature of products and services; 2) the nature of the production processes; 3) the type or class of customer for their products and services; and 4) the methods used to distribute their products or provide their services. The Company believes each of its regions meet these criteria as each provides similar services and products to similar customers using similar methods of productions and similar methods to distribute the services and products.

Summary of Quarterly Results

The Company generated revenues of \$93.4 million for the quarter ended September 30, 2010, an increase of \$11.0 million, or 13.3%, compared to revenues of \$82.4 million for the quarter ended September 30, 2009. The increase in revenues was primarily due to an increase in patient management business from increase revenues of the Company's TPA services. Network solutions revenue increased primarily due to an increase in the Company's pharmacy and directed care revenues. As the Company has expanded the offer of its TPA services, it has found the directed care and TPA services to be synergistic as customers which buy one service can easily buy the other.

The Company's cost of revenues increased by \$8.5 million, from \$61.6 million in the September 2009 quarter to \$70.2 million in the September 2010 quarter, an increase of 13.9%. This increase was primarily due to the 13.3% increase in revenues noted above. More of the Company's growth came from an increase in the revenues from TPA services, pharmacy and direct care services which generate a lower gross margin than the Company's other services which caused a greater increase in cost of revenues as compared to revenues.

The Company's general and administrative expense increased by \$4.0 million, from \$10.2 million in the September 2009 quarter to \$14.2 million in the September 2010 quarter, an increase of 38.8%. This increase is primarily due to an increase in the Company's legal costs. Legal costs increased due to a \$2.8 million accrual of estimated cost to settle the litigation as discussed in below under Litigation in our Management Discussion and Analysis.

Table of Contents

Excluding the \$2.8 million accrual, general and administrative costs would have increased 11.7%, and close to the growth in revenues.

The Company's income tax expense decreased by \$2.7 million, or 63.5%, from \$4.2 million, in the September 2009 quarter to \$1.5 million in the September 2010 quarter. The decrease in income tax expense was primarily due to the resolution of certain outstanding tax issues which resulted in a reduction to the income tax liability by \$1.8 million along with a decrease in income before income taxes. The effective income tax rate was 39.6% in the September 2009 quarter and 16.9% in the September 2010 quarter. In future quarters, the Company's effective tax rate is expected to return to the more historical range of 38% to 40%.

Weighted diluted shares decreased from 12.9 million shares in the September 2009 quarter to 12.1 million shares in the September 2010 quarter, a decrease of 0.8 million shares, or 6.3%. This decrease was due primarily to the repurchase of 798,931 shares in the four quarters ended September 2010. The decrease in shares resulting from the shares repurchased was offset by the exercise of stock options during the last four quarters.

Diluted earnings per share increased from \$0.50 in the September 2009 quarter to \$0.62 in the September 2010 quarter, an increase of \$0.12 per share, or 24.0%. The increase in diluted earnings per share was due to the decrease in income tax expense along with the reduction in the number of shares outstanding due to the shares repurchased.

Results of Operations for the three months ended September 30, 2009 and 2010

The Company derives its revenues from providing patient management and network solutions services to payors of workers' compensation benefits, auto insurance claims and health insurance benefits. Patient management services include utilization review, medical case management, vocational rehabilitation, and claims processing. Network solutions revenues include fee schedule auditing, hospital bill auditing, independent medical examinations, diagnostic imaging review services and preferred provider referral services. The percentage of total revenues attributable to patient management and network solutions services for the quarters ended September 30, 2009 and September 30, 2010 are as follows:

	September 30, 2009	September 30, 2010
Patient management services	45.2%	47.4%
Network solutions services	54.8%	52.6%

Table of Contents

The following table sets forth, for the periods indicated, the dollar amounts, dollar and percent changes, share changes and the percentage of revenues represented by items reflected in the Company's consolidated income statements for the quarters ended September 30, 2009 and September 30, 2010. The Company's past operating results are not necessarily indicative of future operating results.

	Three Months Ended September 30, 2009	Three Months Ended September 30, 2010	Change	Percentage Change
Revenue	\$82,416,000	\$ 93,392,000	\$10,976,000	13.3%

Revenues**Change in revenue from the quarter ended September 2009 to the quarter ended September 2010**

Revenues increased from \$82.4 million for the three months ended September 30, 2009 to \$93.4 million for the three months ended September 30, 2010, an increase of \$11.0 million, or 13.3%. The increase was primarily due to an increase in the Company's patient management revenues by \$8.3 million or 23.1% from \$35.8 million in the September 2009 quarter to \$44.1 million in the September 2010 quarter. This increase was primarily due to improvements in customer utilization of the Company's TPA services. This was complemented by an increase in network solutions revenue by \$2.7 million, or 5.8%, from \$46.6 million in the September 2009 quarter to \$49.3 million in the September 2010 quarter. This increase was primarily due to an increase in revenues from the Company's pharmacy and directed care services.

Table of Contents

The Company believes that referral volume in patient management services and bill review volume in network solutions services may decrease or reflect nominal growth until there is growth in the number of work related injuries and workers' compensation related claims.

Cost of Revenue

The Company's cost of revenues consist of direct expenses, costs directly attributable to the generation of revenue, and field indirect costs which are incurred in the field offices of the Company. Direct costs are primarily case manager salaries, bill review analysts, related payroll taxes and fringe benefits, and costs for independent medical examination (IME) and diagnostic imaging providers. Most of the Company's revenues are generated in offices which provide both patient management services and network solutions services. The largest of the field indirect costs are manager salaries and bonus, account executive base pay and commissions, administrative and clerical support, field systems personnel, prescription drug costs, PPO network developers, related payroll taxes and fringe benefits, office rent, and telephone expense. Approximately 39% of the costs incurred in the field are costs which support both the patient management services and network solutions operations of the Company's field offices, such as district managers, account executives, rent, and telephone.

Change in cost of revenue from the quarter ended September 30, 2009 to the quarter ended September 30, 2010

The Company's costs of revenue increased from \$61.6 million in the quarter ended September 30, 2009 to \$70.2 million in the quarter ended September 30, 2010, an increase of \$8.5 million or 13.9%. This increase was primarily due to the costs associated with the increase in demand for the Company's TPA services, and to a lesser extent, the Company's pharmacy and directed care services, which are high-cost services. The increase in cost of revenues of 13.9% approximated the 13.3% increase in revenues.

General and Administrative Expense

For the quarter ended September 30, 2010, general and administrative expense consisted of approximately 44% of corporate systems costs which include corporate systems support, implementation and training, amortization of software development costs, depreciation of the hardware costs in the Company's national systems, the Company's national wide area network and other systems related costs. The remaining 56% of the general and administrative expense consisted of national marketing, national sales support, corporate legal, corporate insurance, human resources, accounting, product management, new business development and other general corporate matters. Legal costs increased due to an increase in litigation. Related to a number of small claims, we do not expect any material loss on these small claims. Exclusive of the \$2.8 million legal accrual noted above, systems costs were 55% of total general and administrative costs. It is expected that systems costs will return to the more historical percentages of 55% to 60% of total general and administrative costs.

Change in general and administrative expense from the quarter ended September 30, 2009 to the quarter ended September 30, 2010

General and administrative expense increased from \$10.2 million in the quarter ended September 30, 2009 to \$14.2 million in the quarter ended September 30, 2010, an increase of \$4.0 million, or 38.8%. This increase is primarily due to an increase in the Company's legal costs. Legal costs increased due to the \$2.8 million accrual of estimated costs to settle the litigation liability as discussed below under Litigation in our Management Discussion and Analysis.

Change in Income Tax Provision from the quarter ended September 30, 2009 to the quarter ended September 30, 2010

The Company's income tax expense decreased by \$2.7 million, or 63.5%, from \$4.2 million for the quarter ended September 30, 2009 to \$1.5 million for the quarter ended September 30, 2010 due to the decrease in income before income taxes from \$10.6 million to \$9.1 million combined with the resolution of certain outstanding tax issues which resulted in a reduction to the income tax liability by \$1.8 million. The income tax expense as a percentage of income before income taxes (i.e. effective tax rate) was 39.6% for the three months ended September 30, 2009 and 16.9% for the three months ended September 30, 2010. The income tax provision rates were based upon management's review of the Company's estimated annual income tax rate, including state taxes. This effective

Table of Contents

tax rate differed from the statutory federal tax rate of 35.0% primarily due to state income taxes, the liability reduction and certain non-deductible expenses. In future quarters, the Company's effective tax rate is expected to return to the more historical range of 38% to 40%.

Results of Operations for the six months ended September 30, 2009 and the six months ended September 30, 2010

The following table sets forth, for the periods indicated, the dollar amounts, dollar and percent changes, share changes, and the percentage of revenues represented by certain items reflected in the Company's consolidated income statements for the six months ended September 30, 2009 and September 30, 2010. The Company's past operating results are not necessarily indicative of future operating results.

	Six Months Ended September 30, 2009	Six Months Ended September 30, 2010	Change	Percentage Change
Revenue	\$ 163,728,000	\$ 184,895,000	\$ 21,167,000	12.9%
Cost of revenues	121,779,000	137,853,000	16,074,000	13.2%
Gross profit	41,949,000	47,042,000	5,093,000	12.1%
Gross profit as percentage of revenue	25.6%	25.4%		
General and administrative	20,656,000	25,657,000	5,001,000	24.2%
General and administrative as percentage of revenue	12.6%	13.9%		
Income before income tax provision	21,293,000	21,385,000	92,000	0.4%
Income before income tax provision as percentage of revenue	13.0%	11.6%		
Income tax provision	8,489,000	6,092,000	(2,397,000)	(28.2%)
Net income	\$ 12,804,000	\$ 15,293,000	\$ 2,489,000	19.4%
Weighted Shares				
Basic	12,842,000	11,909,000	(933,000)	(7.3%)
Diluted	12,988,000	12,145,000	(843,000)	(6.5%)
Earnings Per Share				
Basic	\$ 1.00	\$ 1.28	\$ 0.28	28.0%
Diluted	\$ 0.99	\$ 1.26	\$ 0.27	27.3%

Revenues**Change in revenue from the six months ended September 30, 2009 to the six months ended September 30, 2010**

Revenues increased from \$163.7 million for the six months ended September 30, 2009 to \$184.9 million for the six months ended September 30, 2010, an increase of \$21.2 million or 12.9%. The Company's patient management revenues increased \$18.6 million or 27.0% from \$68.8 million in the six months ended September 2009 to

\$87.4 million in the six months ended September 2010. This increase was primarily due to improvements in customer utilization of the Company's TPA services. The Company's network solutions revenues increased from \$94.9 million in the six months ended September 2009 to \$97.5 million in the six months ended September 2010, an increase of \$2.6 million or 2.7%. This increase was primarily due to an increase in customer utilization of the Company's pharmacy and directed care services.

Table of Contents**Cost of Revenue****Change in cost of revenue from the six months ended September 30, 2009 to the six months ended September 30, 2010**

The Company's cost of revenue increased from \$121.8 million in the six months ended September 30, 2009 to \$137.9 million in the six months ended September 30, 2010, an increase of \$16.1 million, or 13.2%. The increase in cost of revenues of 13.2% approximates the increase in revenues of 12.9%. This increase was primarily due to the costs associated with the increase in demand for the Company's TPA services, directed care and pharmacy services, which are lower margin services. The Company's TPA service costs increased \$12.1 million, pharmacy costs increased \$5.7 million and directed care costs increased \$2.6 million in the six months ended September 30, 2010 from the comparable six month period in 2009.

General and Administrative Costs**Change in cost of general and administrative expense from the six months ended September 30, 2009 to the six months ended September 30, 2010**

General and administrative expense increased from \$20.7 million in the six months ended September 30, 2009 to \$25.7 million in the six months ended September 30, 2010, an increase of \$5.0 million, or 24.2%. This increase is primarily due to an increase in the Company's legal costs related to a number of small claims. We do not expect any material loss on these small claims. Legal costs increased due to the \$2.8 million accrual of estimated costs to settle the litigation as discussed below under litigation in our Management Discussion and Analysis. Systems cost increased from \$11.8 million to \$12.3 million due to an increase in non-capitalizable software development expenditures to further improve the Company's TPA product. The Company expects software development expenditures to increase. Exclusive of the \$2.8 million accrual noted above, general and administrative costs increased 10.6%, close to the 12.9% increase in revenues.

Change in Income Tax Provision from the six months ended September 30, 2009 to the six months ended September 30, 2010

The Company's income tax expense decreased by \$2.4 million, or 28.2%, from \$8.5 million for the six months ended September 30, 2009 to \$6.1 million for the six months ended September 30, 2010 due to the resolution of outstanding state tax issues which resulted in a reduction to the income tax liability by \$1.8 million. This was slightly offset by an increase in income before income taxes from \$21.3 million to \$21.4 million. The income tax expense as a percentage of income before income taxes, also known as the effective tax rate, was 39.9% for the six months ended September 30, 2009 and 28.5% for the six months ended September 30, 2010. The income tax provision rates were based upon management's review of the Company's estimated annual income tax rate, including state taxes. This effective tax rate differed from the statutory federal tax rate of 35.0% primarily due to state income taxes, the liability reduction and certain non-deductible expenses. It is expected that the future effective income tax rate will return to the 38% to 40% range.

Liquidity and Capital Resources

The Company has historically funded its operations and capital expenditures primarily from cash flow from operations, and, to a lesser extent, stock option exercises. Working capital increased \$3.3 million, or 12%, from \$27.2 million as of March 31, 2010 to \$30.5 million as of September 30, 2010, primarily due to an increase in cash from \$11.9 million as of March 31, 2010 to \$18.7 million as of September 30, 2010. The increase in cash was primarily due to retention of the Company's net income.

Table of Contents

The Company believes that cash from operations and funds from exercises of stock options granted to employees are adequate to fund existing obligations, repurchase shares of the Company's common stock under its current share repurchase program, introduce new services, and continue to develop healthcare related businesses for at least the next twelve months. The Company regularly evaluates cash requirements for current operations and commitments, and for capital acquisitions and other strategic transactions. The Company may elect to raise additional funds for these purposes, through debt or equity financings or otherwise, as appropriate. Additional equity or debt financing may not be available when needed, on terms favorable to us or at all.

As of September 30, 2010, including \$2.3 million of customer deposits held in bank checking accounts, the Company had \$18.7 million in cash and cash equivalents, invested primarily in short-term, interest-bearing, highly liquid investment-grade securities with maturities of 90 days or less in federally regulated banks.

In June 2010, the Company renewed a credit agreement that had been in place throughout fiscal 2010. The line is with a financial institution to provide a revolving credit facility with borrowing capacity of up to \$10 million. Borrowings under this agreement bear interest, at the Company's option, at a fixed LIBOR-based rate plus 1.50% or at a fluctuating rate determined by the financial institution to be 1.50% above the daily one-month LIBOR rate. The loan covenants require the Company to maintain the current assets to liabilities ratio of at least 1.25:1, debt to tangible net worth not greater than 1.25:1 and have positive net income. There were no outstanding revolving loans at any time during fiscal 2010, or the six months ended September 30, 2010, but letters of credit in the aggregate amount of \$6.3 million have been issued under a letter of credit sub-limit that does not reduce the amount of borrowings available under the revolving credit facility. The credit agreement expires in September 2011.

The Company has historically required substantial capital to fund the growth of its operations, particularly working capital to fund the growth in accounts receivable and capital expenditures. The Company believes, however, that the cash balance at September 30, 2010 along with anticipated internally generated funds, will be sufficient to meet the Company's expected cash requirements for at least the next twelve months.

Operating Cash Flows***Six months ended September 30, 2009 compared to six months ended September 30, 2010***

Net cash provided by operating activities increased from \$18.6 million in the six months ended September 30, 2009 to \$24.5 million in the six months ended September 30, 2010. The increase in cash flow from operating activities was primarily due to the increase in net income to \$15.3 million for the six months ended September 30, 2010 from \$12.8 million for the six months ended September 30, 2009, an increase of \$2.5 million.

Investing Activities***Six months ended September 30, 2009 compared to six months ended September 30, 2010***

Net cash flow used in investing activities increased from \$5.6 million in the six months ended September 30, 2009 to \$9.0 million in the six months ended September 30, 2010, an increase of \$3.4 million. The increase in net cash used in investing activities is primarily due to an increase in office furniture, application software licenses, and the amount of software capitalized during the six months ended September 30, 2010. The Company had no acquisitions or acquisition related disbursements in the six months ended September 30, 2010.

Financing Activities***Six months ended September 30, 2009 compared to six months ended September 30, 2010***

Net cash flow used in financing activities decreased from \$15.6 million for the six months ended September 30, 2009 to \$8.6 million for the six months ended September 30, 2010, a decrease of \$7.0 million. The decrease in cash flow used in financing activities was primarily due to a decrease in purchases under the Company's share repurchase program, partially offset by an increase in the number of options exercised. During the six months ended September 30, 2010, the Company spent \$11.8 million to repurchase 317,485 shares of its common stock. During the six months ended September 30, 2009, the Company spent \$17.4 million to repurchase 610,999 shares of its common stock. The Company has historically used cash provided by operating activities and from the

Table of Contents

exercise of stock options to repurchase stock. The Company expects it may use some of the \$18.7 million of cash on its balance sheet at September 30, 2010 to repurchase additional shares of stock.

Contractual Obligations

The following table summarizes the Company's contractual obligations outstanding as of September 30, 2010.

	Total	Payments Due by Period			
		Within One Year	Between One and Three Years	Between Three and Five Years	More than Five Years
Operating leases	\$48,246,000	\$13,555,000	\$19,038,000	\$11,306,000	\$4,347,000
Uncertain tax positions	1,370,000	1,370,000			
Software licenses	1,700,000	850,000	850,000		
Earn out obligation	500,000	500,000			
Total	\$51,816,000	\$16,275,000	\$19,888,000	\$11,306,000	\$4,347,000

Operating leases are rents paid for the Company's physical locations.

Litigation

In February 2005, Kathleen Roche, D.C., as plaintiff, filed a putative class action in Circuit Court for the 20th Judicial District, St. Clair County, Illinois, against the Company. The case sought unspecified damages based on the Company's alleged failure to direct patients to medical providers who were members of the CorVel CorCare PPO network and also alleged that the Company used biased and arbitrary computer software to review medical providers bills. On October 29, 2010, the Company entered into a settlement agreement providing for the payment of \$2.1 million to class members and up to an additional \$700,000 for attorneys' fees and expenses, as a result the Company accrued \$2.8 million of estimated liability for this settlement agreement. The Company denies that its conduct was improper in any way and has denied all liability. The settlement agreement must receive approval by the Circuit Court before it becomes effective. There can be no assurance that the Circuit Court will approve the settlement agreement.

In December 2006, Southwest Louisiana Hospital Association dba Lake Charles Memorial Hospital filed a class action arbitration with the American Arbitration Association against the Company (Southwest Louisiana Hospital Association d/b/a. Lake Charles Memorial Hospital, individually and on behalf of those similarly situated v. CorVel Corporation, AAA Case No. 11 193 2760 06). Lake Charles Memorial Hospital alleges that the Company violated Louisiana's Any Willing Provider Act (the AWPAs), which requires a payor accessing a preferred provider contract to give 30 days' advance written notice or point of service notice in the form of a benefit card before the payor accesses the discounted rates in the contract to pay the provider for services rendered to a insured under that payor's health benefit plan. In response, the Company filed a counter-suit on December 7, 2007 (CorVel Corporation v. Dr. Kevin Gorin, et. al, Docket No. 653896, 24th Judicial District Court for the Parish of Jefferson, State of Louisiana) seeking a declaratory judgment challenging the constitutionality of the AWPAs' damage provision. In the first phase of the arbitration, the clause construction phase, which concluded in September 2010, the arbitration panel decided that the arbitration agreement between the Company and Lake Charles Memorial Hospital permits class actions. The three additional phases of the arbitration (the class certification, class notification and merits phases) have been stayed pending appeal to permit the Company to seek judicial review of the clause construction phase decision. The Company intends to pursue all available legal remedies, including seeking judicial review of the clause construction phase decision and vigorously defending the arbitration,

Table of Contents

but there can be no assurance that the Company will be successful in doing so The Company is not able to estimate the amount of possible loss, if any, at this time.

The Company is involved in other litigation arising in the normal course of business. Management believes that resolution of these matters will not result in any payment that, in the aggregate, would be material to the financial position or results of the operations of the Company.

Inflation

The Company experiences pricing pressures in the form of competitive prices. The Company is also impacted by rising costs for certain inflation-sensitive operating expenses such as labor and employee benefits, and facility leases. However, the Company generally does not believe these impacts are material to its revenues or net income.

Off-Balance Sheet Arrangements

The Company is not a party to off-balance sheet arrangements as defined by the rules of the Securities and Exchange Commission. However, from time to time the Company enters into certain types of contracts that contingently require the Company to indemnify parties against third-party claims. The contracts primarily relate to: (i) certain contracts to perform services, under which the Company may provide customary indemnification to the purchasers of such services; (ii) certain real estate leases, under which the Company may be required to indemnify property owners for environmental and other liabilities, and other claims arising from the Company's use of the applicable premises; and (iii) certain agreements with the Company's officers, directors and employees, under which the Company may be required to indemnify such persons for liabilities arising out of their relationship with the Company.

The terms of such obligations vary by contract and in most instances a specific or maximum dollar amount is not explicitly stated therein. Generally, amounts under these contracts cannot be reasonably estimated until a specific claim is asserted. Consequently, no liabilities have been recorded for these obligations on the Company's balance sheets for any of the periods presented.

Critical Accounting Policies

The SEC defines critical accounting policies as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

The following is not intended to be a comprehensive list of our accounting policies. Our significant accounting policies are more fully described in Note A to the Consolidated Financial Statements. In many cases, the accounting treatment of a particular transaction is specifically dictated by accounting principles generally accepted in the United States of America, with no need for management's judgment in their application. There are also areas in which management's judgment in selecting an available alternative would not produce a materially different result.

We have identified the following accounting policies as critical to us: 1) revenue recognition, 2) cost of revenues, 3) allowance for uncollectible accounts, 4) goodwill and long-lived assets, 5) accrual for self-insured costs, 6) accounting for income taxes, and 7) share-based compensation.

Table of Contents

Revenue Recognition: The Company recognizes revenue when there is persuasive evidence of an arrangement, the services have been provided to the customer, the sales price is fixed or determinable, and collectability is reasonably assured. For the Company's services, as the Company's professional staff performs work, they are contractually permitted to bill for fees earned in fraction of an hour increments worked or by units of production. The Company recognizes revenue as the time is worked or as units of production are completed, which is when the revenue is earned and realized. Labor costs are recognized as the costs are incurred. The Company derives the majority of its revenue from the sale of network solutions and patient management services. Network solutions and patient management services may be sold individually or combined with any of the services the Company provides. When a sale combines multiple elements, the Company accounts for multiple element arrangements in accordance with the guidance included in ASC 605-25.

In accordance with ASC 605-25, the Company allocates revenue for transactions or collaborations that include multiple elements to each unit of accounting based on its relative fair value, and recognizes revenue for each unit of accounting when the revenue recognition criteria have been met. The price charged when the element is sold separately generally determines fair value. When our customers purchase several products from the Company, the pricing of the products sold is generally the same as if the product were sold on an individual basis. As a result, the fair value of each product sold in a multiple element arrangement is almost always determinable. In the absence of fair value of a delivered element, the Company would allocate revenue first to the fair value of the undelivered elements and the residual revenue to the delivered elements. The Company recognizes revenue for delivered elements when the delivered elements have standalone value and the Company has objective and reliable evidence of fair value for each undelivered element. If the fair value of any undelivered element included in a multiple element arrangement cannot be objectively determined, revenue is deferred until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements. Based upon the nature of the Company's products, bundled products are generally delivered in the same accounting period.

Cost of revenues: Cost of services consists primarily of the compensation and fringe benefits of field personnel, including managers, medical bill analysts, field case managers, telephonic case managers, systems support, administrative support and account managers and account executives and related facility costs including rent, telephone and office supplies. Historically, the costs associated with these additional personnel and facilities have been the most significant factor driving increases in the Company's cost of services. Locally managed and incurred IT costs are charged to cost of revenues whereas the costs incurred and managed at the corporate offices are charged to general and administrative expense.

Allowance for Uncollectible Accounts: The Company determines its allowance by considering a number of factors, including the length of time trade accounts receivable are past due, the Company's previous loss history, the customers current ability to pay its obligation to the Company, and the condition of the general economy and the industry as a whole. The Company writes off accounts receivable when they become uncollectible.

The Company must make significant management judgments and estimates in determining contractual and bad debt allowances in any accounting period. One significant uncertainty inherent in the Company's analysis is whether its past experience will be indicative of future periods. Although the Company considers future projections when estimating contractual and bad debt allowances, the Company ultimately makes its decisions based on the best information available to it at that time. Adverse changes in general economic conditions or trends in reimbursement amounts for the Company's services could affect the Company's contractual and bad debt allowance estimates, collection of accounts receivable, cash flows, and results of operations. No one customer accounted for 10% or more of accounts receivable at March 31, 2010 or September 30, 2010.

Goodwill and Long-Lived Assets: Goodwill arising from business combinations represents the excess of the purchase price over the estimated fair value of the net assets of the acquired business. Pursuant to ASC 350-10 through ASC 350-30, *Goodwill and Other Intangible Assets*, goodwill is tested annually for impairment, or more frequently if circumstances indicate the potential for impairment. Also, management tests for impairment of its amortizable intangible assets and long-lived assets and whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The Company's impairment is conducted at a company-wide level. The measurement of fair value is based on an evaluation of market capitalization and is further tested

Table of Contents

using a multiple of earnings approach. In projecting the Company's cash flows, management considers industry growth rates and trends and cost structure changes. No changes or events occurred which indicated a need to test impairment during the September 2010 quarter. However, future events or changes in current circumstances could affect the recoverability of the carrying value of goodwill and long-lived assets. Should an asset be deemed impaired, an impairment loss would be recognized to the extent the carrying value of the asset exceeded its estimated fair market value.

Accrual for Self-insurance Costs: The Company self-insures for the group medical costs and workers compensation costs of its employees. The Company purchases stop loss insurance for large claims. Management believes that the self-insurance reserves are appropriate; however, actual claims costs may differ from the original estimates requiring adjustments to the reserves. The Company determines its estimated self-insurance reserves based upon historical trends along with outstanding claims information provided by its claims paying agents.

Accounting for Income Taxes: The Company provides for income taxes in accordance with provisions specified in ASC 740, *Accounting for Income Taxes*, which is based upon management's judgments and estimations of various tax rates. Accordingly, deferred income tax assets and liabilities are computed for differences between the financial statement and tax bases of assets and liabilities. These differences will result in taxable or deductible amounts in the future, based on tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which temporary differences become deductible. In making an assessment regarding the probability of realizing a benefit from these deductible differences, management considers the Company's current and past performance, the market environment in which the Company operates, tax-planning strategies and the length of carry-forward periods for loss carry-forwards, if any. Valuation allowances are established when necessary to reduce deferred tax assets to amounts that are more likely than not to be realized. Further, the Company provides for income tax issues not yet resolved with federal, state and local tax authorities.

Share-Based Compensation: The Company accounts for share based compensation in accordance with the provisions of ASC Topic 718 *Compensation - Stock Compensation*. Under ASC 718, share-based compensation cost is measured at the grant date, based on the calculated fair value of the award, and is recognized as an expense over the employee's requisite service period (generally the vesting period of the equity grant). Some of the stock options are performance based and the stock compensation expense is recorded based upon the actual results compared to the option targets. For the quarter ended September 30, 2010, the Company recorded share-based compensation expense of \$673,000. Share-based compensation expense recognized in the first six months of fiscal 2011 is based on awards ultimately expected to vest; therefore, it has been reduced for estimated forfeitures. ASC Topic 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

The Company estimates the fair value of stock options using the Black-Scholes valuation model. Key input assumptions used to estimate the fair value of stock options include the exercise price of the award, the expected option term, the expected volatility of the Company's stock over the option's expected term, the risk-free interest rate over the option's term, and the Company's expected annual dividend yield. The Company's management believes that the valuation technique and the approach utilized to develop the underlying assumptions are appropriate in calculating the fair values of the Company's stock options granted in fiscal 2011. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by persons who receive equity awards.

Table of Contents

Recent Accounting Standards Update

In October 2009, the FASB issued Accounting Standards Update No. 2009-13, *Multiple Deliverable Revenue Arrangements a consensus of FASB Emerging Issues Task Force* (ASU 2009-13). ASU 2009-13 provides for less restrictive separation criteria that must be met for a deliverable to be considered a separate unit of accounting. Additionally, under ASU 2009-13, there is a hierarchy for determining the selling price of a unit of accounting and consideration must be allocated using a relative-selling price method. ASU 2009-13 will be effective for the Company on April 1, 2011; however, early adoption is permitted. The Company is currently reviewing the requirements of ASU 2009-13 and has not yet determined the impact on its financial position or results of operations.

Item 3 Quantitative and Qualitative Disclosures About Market Risk

As of September 30, 2010, the Company held no market risk sensitive instruments for trading purposes, and the Company did not employ any derivative financial instruments, other financial instruments, or derivative commodity instruments to hedge any market risk. The Company had no debt outstanding as of September 30, 2010, and therefore, had no market risk related to debt.

Item 4 Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that, as of September 30, 2010, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported, within the time periods specified in the rules and forms of the Securities and Exchange Commission and (ii) accumulated and communicated to our management, including our principal executive and principal accounting officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the three months ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1 Legal Proceedings**

In February 2005, Kathleen Roche, D.C., as plaintiff, filed a putative class action in Circuit Court for the 20th Judicial District, St. Clair County, Illinois, against the Company. The case sought unspecified damages based on the Company's alleged failure to direct patients to medical providers who were members of the CorVel CorCare PPO network and also alleged that the Company used biased and arbitrary computer software to review medical providers bills. On October 29, 2010, the Company entered into a settlement agreement providing for the payment of \$2.1 million to class members and up to an additional \$700,000 for attorneys' fees and expenses, as a result the Company accrued \$2.8 million of estimated liability for this settlement agreement. The Company denies that its conduct was improper in any way and has denied all liability. The settlement agreement must receive approval by the Circuit Court before it becomes effective. There can be no assurance that the Circuit Court will approve the settlement agreement.

In December 2006, Southwest Louisiana Hospital Association dba Lake Charles Memorial Hospital filed a class action arbitration with the American Arbitration Association against the Company (Southwest Louisiana Hospital Association d/b/a. Lake Charles Memorial Hospital, individually and on behalf of those similarly situated v. CorVel Corporation, AAA Case No. 11 193 2760 06). Lake Charles Memorial Hospital alleges that the Company violated Louisiana's Any Willing Provider Act (the AWPA), which requires a payor accessing a preferred provider contract to give 30 days' advance written notice or point of service notice in the form of a benefit card before the payor accesses the discounted rates in the contract to pay the provider for services rendered to a insured under that payor's health benefit plan. In response, the Company filed a counter-suit on December 7, 2007 (CorVel Corporation v. Dr. Kevin Gorin, et. al, Docket No. 653896, 24th Judicial District Court for the Parish of Jefferson, State of Louisiana) seeking a declaratory judgment challenging the constitutionality of the AWPA's damage provision. In the first phase of the arbitration, the clause construction phase, which concluded in September 2010, the arbitration panel decided that the arbitration agreement between the Company and Lake Charles Memorial Hospital permits class actions. The three additional phases of the arbitration (the class certification, class notification and merits phases) have been stayed pending appeal to permit the Company to seek judicial review of the clause construction phase decision. The Company intends to pursue all available legal remedies, including seeking judicial review of the clause construction phase decision and vigorously defending the arbitration, but there can be no assurance that the Company will be successful in doing so. The Company is not able to estimate the amount of possible loss, if any, at this time.

The Company is involved in other litigation arising in the normal course of business. Management believes that resolution of these matters will not result in any payment that, in the aggregate, would be material to the financial position or results of the operations of the Company.

Item 1A. Risk Factors

A restated description of the risk factors associated with our business is set forth below. This description includes any and all changes (whether or not material) to, and supersedes, the description of the risk factors associated with our business previously disclosed in Part 1, Item 1A of our Annual Report on Form 10-K for the fiscal year ended March 31, 2010.

Past financial performance is not necessarily a reliable indicator of future performance, and investors in our common stock should not use historical performance to anticipate results or future period trends. Investing in our common stock involves a high degree of risk. Investors should consider carefully the following risk factors, as well as the other information in this report and our other filings with the Securities and Exchange Commission, including our consolidated financial statements and the related notes, before deciding whether to invest or maintain an

Table of Contents

investment in shares of our common stock. If any of the following risks actually occurs, our business, financial condition and results of operations would suffer. In this case, the trading price of our common stock would likely decline. The risks described below are not the only ones we face. Additional risks that we currently do not know about or that we currently believe to be immaterial also may impair our business operations.

Changes in government regulations could increase our costs of operations and/or reduce the demand for our services.

Many states, including a number of those in which we transact business, have licensing and other regulatory requirements applicable to our business. Approximately half of the states have enacted laws that require licensing of businesses which provide medical review services such as ours. Some of these laws apply to medical review of care covered by workers' compensation. These laws typically establish minimum standards for qualifications of personnel, confidentiality, internal quality control and dispute resolution procedures. These regulatory programs may result in increased costs of operation for us, which may have an adverse impact upon our ability to compete with other available alternatives for healthcare cost control. In addition, new laws regulating the operation of managed care provider networks have been adopted by a number of states. These laws may apply to managed care provider networks having contracts with us or to provider networks which we may organize. To the extent we are governed by these regulations, we may be subject to additional licensing requirements, financial and operational oversight and procedural standards for beneficiaries and providers.

Regulation in the healthcare and workers' compensation fields is constantly evolving. We are unable to predict what additional government initiatives, if any, affecting our business may be promulgated in the future. Our business may be adversely affected by failure to comply with existing laws and regulations, failure to obtain necessary licenses and government approvals or failure to adapt to new or modified regulatory requirements. Proposals for healthcare legislative reforms are regularly considered at the federal and state levels. To the extent that such proposals affect workers' compensation, such proposals may adversely affect our business, financial condition and results of operations.

In addition, changes in workers' compensation, auto and managed health care laws or regulations may reduce demand for our services, require us to develop new or modified services to meet the demands of the marketplace or reduce the fees that we may charge for our services. One proposal which had been considered in the past, but not enacted by Congress or certain state legislatures, is 24-hour health coverage, in which the coverage of traditional employer-sponsored health plans is combined with workers' compensation coverage to provide a single insurance plan for work-related and non-work-related health problems.

Our sequential revenue may not increase and may decline. As a result, we may fail to meet or exceed the expectations of investors or analysts which could cause our common stock price to decline.

Our sequential revenue growth may not increase and may decline in the future as a result of a variety of factors, many of which are outside of our control. If changes in our sequential revenue fall below the expectations of investors or analysts, the price of our common stock could decline substantially. Fluctuations or declines in sequential revenue growth may be due to a number of factors, including, but not limited to, those listed below and identified throughout this Risk Factors section: the decline in manufacturing employment, the decline in workers' compensation claims, the decline in healthcare expenditures, the considerable price competition in a flat-to-declining workers' compensation market, litigation, the increase in competition, and the changes and the potential changes in state workers' compensation and automobile managed care laws which can reduce demand for our services. These factors create an environment where revenue and margin growth is more difficult to attain and where revenue growth is less certain than historically experienced. Additionally, our technology and preferred provider network face competition from companies that have more resources available to them than we do. Also, some customers may handle their managed care services in-house and may reduce the amount of services which are outsourced to managed care companies such as CorVel. These factors could cause the market price of our common stock to fluctuate substantially. There can be no assurance that our growth rate in the future, if any, will be at or near historical levels.

Table of Contents

In addition, the stock market has in the past experienced price and volume fluctuations that have particularly affected companies in the healthcare and managed care markets resulting in changes in the market price of the stock of many companies, which may not have been directly related to the operating performance of those companies.

Due to the foregoing factors, and the other risks discussed in this report, investors should not rely on period-to-period comparisons of our results of operations as an indication of our future performance.

Exposure to possible litigation and legal liability may adversely affect our business, financial condition and results of operations.

We, through our utilization management services, make recommendations concerning the appropriateness of providers' medical treatment plans of patients throughout the country, and as a result, could be exposed to claims for adverse medical consequences. We do not grant or deny claims for payment of benefits and we do not believe that we engage in the practice of medicine or the delivery of medical services. There can be no assurance, however, that we will not be subject to claims or litigation related to the authorization or denial of claims for payment of benefits or allegations that we engage in the practice of medicine or the delivery of medical services.

In addition, there can be no assurance that we will not be subject to other litigation that may adversely affect our business, financial condition or results of operations, including but not limited to being joined in litigation brought against our customers in the managed care industry. We maintain professional liability insurance and such other coverages as we believe are reasonable in light of our experience to date. If such insurance is insufficient or unavailable in the future at reasonable cost to protect us from liability, our business, financial condition or results of operations could be adversely affected.

In February 2005, Kathleen Roche, D.C., as plaintiff, filed a putative class action in Circuit Court for the 20th Judicial District, St. Clair County, Illinois, against the Company. The case sought unspecified damages based on the Company's alleged failure to direct patients to medical providers who were members of the CorVel CorCare PPO network and also alleged that the Company used biased and arbitrary computer software to review medical providers' bills. On October 29, 2010, the Company entered into a settlement agreement providing for the payment of \$2.1 million to class members and up to an additional \$700,000 for attorneys' fees and expenses, as a result the Company accrued \$2.8 million of estimated liability for this settlement agreement. The Company denies that its conduct was improper in any way and has denied all liability. The settlement agreement must receive approval by the Circuit Court before it becomes effective. There can be no assurance that the Circuit Court will approve the settlement agreement.

In December 2006, Southwest Louisiana Hospital Association dba Lake Charles Memorial Hospital filed a class action arbitration with the American Arbitration Association against the Company (Southwest Louisiana Hospital Association d/b/a. Lake Charles Memorial Hospital, individually and on behalf of those similarly situated v. CorVel Corporation, AAA Case No. 11 193 2760 06). Lake Charles Memorial Hospital alleges that the Company violated Louisiana's Any Willing Provider Act (the AWPAct), which requires a payor accessing a preferred provider contract to give 30 days' advance written notice or point of service notice in the form of a benefit card before the payor accesses the discounted rates in the contract to pay the provider for services rendered to a insured under that payor's health benefit plan. In response, the Company filed a counter-suit on December 7, 2007 (CorVel Corporation v. Dr. Kevin Gorin, et. al, Docket No. 653896, 24th Judicial District Court for the Parish of Jefferson, State of Louisiana) seeking a declaratory judgment challenging the constitutionality of the AWPAct's damage provision. In the first phase of the arbitration, the clause construction phase, which concluded in September 2010, the arbitration panel decided that the arbitration agreement between the Company and Lake Charles Memorial Hospital permits class actions. The three additional phases of the arbitration (the class certification, class notification and merits phases) have been stayed pending appeal to permit the Company to seek judicial review of the clause construction phase decision. The Company intends to pursue all available legal remedies, including seeking judicial review of the clause construction phase decision and vigorously defending the arbitration, but there can be no assurance that the Company will be successful in doing so. The Company is not able to estimate the amount of possible loss, if any, at this time.

Table of Contents

If lawsuits against us are successful, we may incur significant liabilities.

We provide to insurers and other payors of healthcare costs managed care programs that utilize preferred provider organizations and computerized bill review programs. Health care providers have brought, against us and our customers, individual and class action lawsuits challenging such programs. If such lawsuits are successful, we may incur significant liabilities.

We make recommendations about the appropriateness of providers' proposed medical treatment plans for patients throughout the country. As a result, we could be subject to claims arising from any adverse medical consequences. Although plaintiffs have not to date subjected us to any claims or litigation relating to the granting or denial of claims for payment of benefits or allegations that we engage in the practice of medicine or the delivery of medical services, we cannot assure you that plaintiffs will not make such claims in future litigation. We also cannot assure you that our insurance will provide sufficient coverage or that insurance companies will make insurance available at a reasonable cost to protect us from significant future liability.

Our failure to compete successfully could make it difficult for us to add and retain customers and could reduce or impede the growth of our business.

We face competition from PPOs, TPAs and other managed healthcare companies. We believe that as managed care techniques continue to gain acceptance in the workers' compensation marketplace, our competitors will increasingly consist of nationally-focused workers' compensation managed care service companies, insurance companies, HMOs and other significant providers of managed care products. Legislative reform in some states has been considered, but not enacted to permit employers to designate health plans such as HMOs and PPOs to cover workers' compensation claimants. Because many health plans have the ability to manage medical costs for workers' compensation claimants, such legislation may intensify competition in the markets served by us. Many of our current and potential competitors are significantly larger and have greater financial and marketing resources than we do, and there can be no assurance that we will continue to maintain our existing customers, our past level of operating performance or be successful with any new products or in any new geographical markets we may enter.

Declines in workers' compensation claims may harm our results of operations.

Within the past few years, the economy has performed below historical averages which leads to fewer workers on a national level and could lead to fewer work related injuries. If declines in workers' compensation costs occur in many states and persist over the long-term, it would have an adverse impact on our business, financial condition and results of operations.

We provide an outsource service to payors of workers' compensation and auto healthcare benefits. These payors include insurance companies, TPAs, municipalities, state funds, and self-insured, self-administered employers. If these payors reduce the amount of work they outsource, our results of operations would be materially adversely affected.

If the utilization by healthcare payors of early intervention services continues to increase, the revenue from our later-stage network and healthcare management services could be negatively affected.

The performance of early intervention services, including injury occupational healthcare, first notice of loss, and telephonic case management services, often result in a decrease in the average length of, and the total costs associated with, a healthcare claim. By successfully intervening at an early stage in a claim, the need for additional cost containment services for that claim often can be reduced or even eliminated. As healthcare payors continue to increase their utilization of early intervention services, the revenue from our later stage network and healthcare management services will decrease.

We face competition for staffing, which may increase our labor costs and reduce profitability.

We compete with other healthcare providers in recruiting qualified management and staff personnel for the day-to-day operations of our business, including nurses and other case management professionals. In some markets,

Table of Contents

the scarcity of nurses and other medical support personnel has become a significant operating issue to healthcare providers. This shortage may require us to enhance wages to recruit and retain qualified nurses and other healthcare professionals. Our failure to recruit and retain qualified management, nurses and other healthcare professionals, or to control labor costs could have a material adverse effect on profitability.

If competition increases, our growth and profits may decline.

The markets for our network services and patient management services are also fragmented and competitive. Our competitors include national managed care providers, preferred provider networks, smaller independent providers and insurance companies. Companies that offer one or more workers' compensation managed care services on a national basis are our primary competitors. We also compete with many smaller vendors who generally provide unbundled services on a local level, particularly companies with an established relationship with a local insurance company adjuster. In addition, several large workers' compensation insurance carriers offer managed care services for their customers, either by performance of the services in-house or by outsourcing to organizations like ours. If these carriers increase their performance of these services in-house, our business may be adversely affected. In addition, consolidation in the industry may result in carriers performing more of such services in-house.

The failure to attract and retain qualified or key personnel may prevent us from effectively developing, marketing, selling, integrating and supporting our services.

We are dependent, to a substantial extent, upon the continuing efforts and abilities of certain key management personnel. In addition, we face competition for experienced employees with professional expertise in the workers' compensation managed care area. The loss of key personnel, especially V. Gordon Clemons, Chairman, and Dan Starck, President, Chief Executive Officer, and Chief Operating Officer, or the inability to attract, qualified employees, could have a material unfavorable effect on our business and results of operations.

If we fail to grow our business internally or through strategic acquisitions we may be unable to execute our business plan, maintain high levels of service or adequately address competitive challenges.

Our strategy is to continue internal growth and, as strategic opportunities arise in the workers' compensation managed care industry, to consider acquisitions of, or relationships with, other companies in related lines of business. As a result, we are subject to certain growth-related risks, including the risk that we will be unable to retain personnel or acquire other resources necessary to service such growth adequately. Expenses arising from our efforts to increase our market penetration may have a negative impact on operating results. In addition, there can be no assurance that any suitable opportunities for strategic acquisitions or relationships will arise or, if they do arise, that the transactions contemplated could be completed. If such a transaction does occur, there can be no assurance that we will be able to integrate effectively any acquired business. In addition, any such transaction would be subject to various risks associated with the acquisition of businesses, including, but not limited to, the following:

- an acquisition may negatively impact our results of operations because it may require incurring large one-time charges, substantial debt or liabilities; it may require the amortization or write down of amounts related to deferred compensation, goodwill and other intangible assets; or it may cause adverse tax consequences, substantial depreciation or deferred compensation charges;

- we may encounter difficulties in assimilating and integrating the business, technologies, products, services, personnel or operations of companies that are acquired, particularly if key personnel of the acquired company decide not to work for us;

- an acquisition may disrupt ongoing business, divert resources, increase expenses and distract management;

Table of Contents

the acquired businesses, products, services or technologies may not generate sufficient revenue to offset acquisition costs;

we may have to issue equity or debt securities to complete an acquisition, which would dilute the position of stockholders and could adversely affect the market price of our common stock; and

acquisitions may involve the entry into a geographic or business market in which we have little or no prior experience.

There can be no assurance that we will be able to identify or consummate any future acquisitions or other strategic relationships on favorable terms, or at all, or that any future acquisition or other strategic relationship will not have an adverse impact on our business or results of operations. If suitable opportunities arise, we may finance such transactions, as well as internal growth, through debt or equity financing. There can be no assurance, however, that such debt or equity financing would be available to us on acceptable terms when, and if, suitable strategic opportunities arise.

Our Internet-based services are dependent on the development and maintenance of the Internet infrastructure.

The Internet has experienced a variety of outages and other delays as a result of damages to portions of its infrastructure, and it could face outages and delays in the future. These outages and delays could reduce the level of Internet usage, as well as the availability of the Internet to us for delivery of our Internet-based services. In addition, our customers who use our Web-based services depend on Internet service providers, online service providers and other Web site operators for access to our Web site. All of these providers have experienced significant outages in the past and could experience outages, delays and other difficulties in the future due to system failures unrelated to our systems. Any significant interruptions in our services or increases in response time could result in a loss of potential or existing users, and, if sustained or repeated, could reduce the attractiveness of our services.

An interruption in our ability to access critical data may cause customers to cancel their service and/or may reduce our ability to effectively compete.

Certain aspects of our business are dependent upon our ability to store, retrieve, process and manage data and to maintain and upgrade our data processing capabilities. Interruption of data processing capabilities for any extended length of time, loss of stored data, programming errors or other system failures could cause customers to cancel their service and could have a material adverse effect on our business and results of operations.

In addition, we expect that a considerable amount of our future growth will depend on our ability to process and manage claims data more efficiently and to provide more meaningful healthcare information to customers and payors of healthcare. There can be no assurance that our current data processing capabilities will be adequate for our future growth, that we will be able to efficiently upgrade our systems to meet future demands, or that we will be able to develop, license or otherwise acquire software to address these market demands as well or as timely as our competitors.

The introduction of software products incorporating new technologies and the emergence of new industry standards could render our existing software products less competitive, obsolete or unmarketable.

There can be no assurance that we will be successful in developing and marketing new software products that respond to technological changes or evolving industry standards. If we are unable, for technological or other reasons, to develop and introduce new software products cost-effectively, in a timely manner and in response to changing market conditions or customer requirements, our business, results of operations and financial condition may be adversely affected.

Developing or implementing new or updated software products and services may take longer and cost more than expected. We rely on a combination of internal development, strategic relationships, licensing and

Table of Contents

acquisitions to develop our software products and services. The cost of developing new healthcare information services and technology solutions is inherently difficult to estimate. Our development and implementation of proposed software products and services may take longer than originally expected, require more testing than originally anticipated and require the acquisition of additional personnel and other resources. If we are unable to develop new or updated software products and services cost-effectively on a timely basis and implement them without significant disruptions to the existing systems and processes of our customers, we may lose potential sales and harm our relationships with current or potential customers.

A breach of security may cause our customers to curtail or stop using our services.

We rely largely on our own security systems, confidentiality procedures and employee nondisclosure agreements to maintain the privacy and security of our and our customers' proprietary information. Accidental or willful security breaches or other unauthorized access by third parties to our information systems, the existence of computer viruses in our data or software and misappropriation of our proprietary information could expose us to a risk of information loss, litigation and other possible liabilities which may have a material adverse effect on our business, financial condition and results of operations. If security measures are breached because of third-party action, employee error, malfeasance or otherwise, or if design flaws in our software are exposed and exploited, and, as a result, a third party obtains unauthorized access to any customer data, our relationships with our customers and our reputation will be damaged, our business may suffer and we could incur significant liability. Because techniques used to obtain unauthorized access or to sabotage systems change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures.

If we are unable to increase our market share among national and regional insurance carriers and large, self-funded employers, our results may be adversely affected.

Our business strategy and future success depend in part on our ability to capture market share with our cost containment services as national and regional insurance carriers and large, self-funded employers look for ways to achieve cost savings. We cannot assure you that we will successfully market our services to these insurance carriers and employers or that they will not resort to other means to achieve cost savings. Additionally, our ability to capture additional market share may be adversely affected by the decision of potential customers to perform services internally instead of outsourcing the provision of such services to us. Furthermore, we may not be able to demonstrate sufficient cost savings to potential or current customers to induce them not to provide comparable services internally or to accelerate efforts to provide such services internally.

If we lose several customers in a short period, our results may be materially adversely affected.

Our results may decline if we lose several customers during a short period. Most of our customer contracts permit either party to terminate without cause. If several customers terminate, or do not renew or extend their contracts with us, our results could be materially and adversely affected. Many organizations in the insurance industry have consolidated and this could result in the loss of one or more of our customers through a merger or acquisition. Additionally, we could lose customers due to competitive pricing pressures or other reasons.

We are subject to risks associated with acquisitions of intangible assets.

Our acquisition of other businesses may result in significant increases in our intangible assets and goodwill. We regularly evaluate whether events and circumstances have occurred indicating that any portion of our intangible assets and goodwill may not be recoverable. When factors indicate that intangible assets and goodwill should be evaluated for possible impairment, we may be required to reduce the carrying value of these assets. We cannot currently estimate the timing and amount of any such charges.

Table of Contents

If we are unable to leverage our information systems to enhance our outcome-driven service model, our results may be adversely affected.

To leverage our knowledge of workplace injuries, treatment protocols, outcomes data, and complex regulatory provisions related to the workers' compensation market, we must continue to implement and enhance information systems that can analyze our data related to the workers' compensation industry. We frequently upgrade existing operating systems and are updating other information systems that we rely upon in providing our services and financial reporting. We have detailed implementation schedules for these projects that require extensive involvement from our operational, technological and financial personnel. Delays or other problems we might encounter in implementing these projects could adversely affect our ability to deliver streamlined patient care and outcome reporting to our customers.

The increased costs of professional and general liability insurance may have an adverse effect on our profitability.

The cost of commercial professional and general liability insurance coverage has risen significantly in the past several years, and this trend may continue. In addition, if we were to suffer a material loss, our costs may increase over and above the general increases in the industry. If the costs associated with insuring our business continue to increase, it may adversely affect our business. We believe our current level of insurance coverage is adequate for a company of our size engaged in our business.

If the referrals for our patient management services decline, our business, financial condition and results of operations would be materially adversely affected.

In some years, we have experienced a general decline in the revenue and operating performance of patient management services. We believe that the performance decline has been due to the following factors: the decrease of the number of workplace injuries that have become longer-term disability cases; increased regional and local competition from providers of managed care services; a possible reduction by insurers on the types of services provided by our patient management business; the closure of offices and continuing consolidation of our patient management operations; and employee turnover, including management personnel, in our patient management business. In the past, these factors have all contributed to the lowering of our long-term outlook for our patient management services. If some or all of these conditions continue, we believe that the performance of our patient management revenues could decrease.

Healthcare providers are becoming increasingly resistant to the application of certain healthcare cost containment techniques; this may cause revenue from our cost containment operations to decrease.

Healthcare providers have become more active in their efforts to minimize the use of certain cost containment techniques and are engaging in litigation to avoid application of certain cost containment practices. Recent litigation between healthcare providers and insurers has challenged certain insurers' claims adjudication and reimbursement decisions. Although these lawsuits do not directly involve us or any services we provide, these cases may affect the use by insurers of certain cost containment services that we provide and may result in a decrease in revenue from our cost containment business.

If material weaknesses in our internal controls are identified by us or our independent registered public accountants, it could have a material adverse effect on our business and stock price.

Any material weaknesses identified in our internal controls as part of the ongoing evaluation being undertaken by us and our independent registered public accountants pursuant to Section 404 of the Sarbanes-Oxley Act of 2002 could cause investors to lose confidence in our reported financial information and us, which could result in a decline in the market price of our common stock, and cause us to fail to meet our reporting obligations in the future, which in turn could impact our ability to raise equity financing if needed in the future. The effectiveness of our controls and procedures could be limited by errors or faulty judgments. In addition, if we expand, through either organic growth or through acquisitions (or both), the challenges involved in implementing appropriate controls will increase and may require that we evolve some or all of our internal control processes.

Table of Contents**Item 2 Unregistered Sales of Equity Securities and Use of Proceeds**

There were no sales of unregistered securities during the period covered by this report. The following table shows the repurchases of the Company's common stock made by or on behalf of the Company in open-market transactions for the quarter ended September 30, 2010 pursuant to a publicly announced plan.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares that may yet be Purchased Under the Program
July 1 to July 31, 2010	55,685	\$ 36.85	55,685	1,015,840
August 1 to August 31, 2010	56,603	38.23	56,603	959,237
September 1 to September 30, 2010	51,910	40.23	51,910	907,327
Total	164,198	\$ 38.40	164,198	907,327

In 1996, the Company's Board of Directors authorized a stock repurchase program for up to 100,000 shares of the Company's common stock. The Company's Board of Directors has periodically increased the number of shares authorized for repurchase under the repurchase program. The most recent increase occurred in June 2010 and brought the number of shares authorized for repurchase over the life of the program to 15,000,000 shares. There is no expiration date for the repurchase program.
