Table of Contents**Management Performance and Financial Conditions****(1) Outline of Operations and Business Results**

Komatsu Ltd. (Company) and its consolidated subsidiaries (together Komatsu) have embarked on the Global Teamwork for Tomorrow mid-range management plan for three years, to be completed in the fiscal year ending March 31, 2013. Under this management plan, Komatsu is focusing its efforts on (1) promotion of ICT applications to products and parts, (2) further advancement of environmental friendliness and safety in machine performance, (3) expansion of sales and service operations in Strategic Markets, and (4) promotion of continuous Kaizen (improvement) by strengthening workplace capability.

In the first quarter (three months from April 1 to June 30, 2011) of the second year of the ongoing management plan, demand for construction and mining equipment continued to remain brisk in Strategic Markets, especially in Asia, while it declined in China and some other countries. In Traditional Markets, demand recovered steadily. Demand for industrial machinery continued to recover slowly. Against this backdrop, consolidated net sales increased to JPY494.1 billion (USD6,101 million, at USD1=JPY81) for the first quarter under review, up 10.5% from the corresponding period a year ago.

In the first quarter under review, the Japanese currency appreciated against the U.S. dollar and Renminbi more than the previous first quarter a year ago; however, Komatsu expanded the volume of sales, while improving selling prices as well as production and other costs. As a result, operating income for the first quarter advanced to JPY68.3 billion (USD844 million), up 26.4% from the corresponding period a year ago. Similarly, operating income ratio improved by 1.7 percentage points to 13.8%. Income before income taxes and equity in earnings of affiliated companies increased by 36.6% to JPY68.4 billion (USD845 million). Net income attributable to Komatsu Ltd. totaled JPY55.7 billion (USD688 million), an improvement of 81.5%.

While Komatsu had initially been concerned about some adverse effects on its production and procurement operations from the Great East Japan Earthquake of March 11, 2011 and the subsequent shortage of power supply, all its plants have been operating in good condition. In addition to continuing its energy-saving efforts in various ways, Komatsu has increased the amount of in-house power generation equipment, as it works to sustain stable production in order to smoothly supply construction equipment to the disaster-stricken regions.

[Markets as Positioned by the Komatsu]

Traditional Markets

Japan, North America and Europe

Strategic Markets

China, Latin America, Asia, Oceania, Africa, Middle East and CIS

Construction, Mining and Utility Equipment

In Strategic Markets, demand remained strong, centering on Asia, while it declined in China, Brazil and some other countries. In Traditional Markets, demand in Japan and North America recovered firmly. Against this backdrop, consolidated net sales of construction, mining and utility equipment totaled JPY435.3 billion (USD5,374 million) for the first quarter under review, up 7.4% from the corresponding period a year ago.

During the first quarter, Komatsu began launching the HB205 and HB215LC hybrid hydraulic excavators on overseas markets, which followed their market introduction in Japan in December last year. With respect to the utility equipment business, which consists of forklift trucks and mini construction equipment, the Company absorbed and merged with Komatsu Utility Co., Ltd. in April this year in order to speed up the pace of strengthening its business in overseas markets, further improve their product competitiveness, and streamline the efficiency of product development.

* Excluding Japan and China

Japan

As demand grew for construction equipment, an essential tool for the recovery and reconstruction of the disaster-stricken regions of the Great East Japan Earthquake and tsunami, centering on rental use, Komatsu quickly recovered production and secured supply operations. As a result, first-quarter sales improved from the previous first quarter a year ago. Sales of new hybrid hydraulic models remained brisk.

With respect to the rental equipment business, the Company has decided to reorganize it to further improve the quality of customer services and the efficiency of operation. Specifically, the Company is going to absorb Komatsu Rental Ltd. in July this year and take over the rental equipment assets of Komatsu Rental Ltd., while a new rental subsidiary will take over and engage exclusively in the rental equipment business.

Americas

In North America, overall demand for construction equipment remained firm, supported by expanded demand in the rental equipment industry. In this market environment, Komatsu embarked on sales of new models compliant to new emission control regulations, as well as new hybrid hydraulic excavator models. Komatsu also continued to promote the zero inventory of distributors campaign which was kicked off last year. In Latin America, while demand for construction equipment for use in civil engineering was sluggish as adversely affected by the credit squeeze and the belated start of public works in Brazil, the largest market of Latin America, demand for mining equipment remained strong in Chile and other countries. As a result, first-quarter sales in the Americas increased from the corresponding period a year ago.

Europe & CIS

First-quarter sales improved from the previous first quarter a year ago, reflecting both recovered market conditions in major markets centering on Germany and concerted efforts especially to expand sales of parts. As a result, first-quarter sales in Europe & CIS improved from the previous first quarter a year ago. Komatsu also launched sales of new hybrid hydraulic excavators in some markets.

In CIS, demand for large equipment grew sharply, centering on use for coal, gold and other resource mining, as well as energy development, such as oil and natural gas. As a result, first-quarter sales increased from the previous first quarter a year ago. Komatsu also continued to strengthen product support operations, as represented by parts repairing and technical support for mining equipment at the new Kuzbass Support Center in Siberia.

Table of Contents

China

First-quarter sales decreased from the corresponding period a year ago, as demand for construction equipment declined particularly for use in civil engineering as adversely affected by the government's credit squeeze policy and belated purchase of land for public works. However, Komatsu projects that the Chinese market will continue to grow in the mid to long-range span against the backdrop of advancing urbanization and other factors. In this light, Komatsu continued to expand its production, sales and product support capabilities by increasing the production capacity of Komatsu (Changzhou) Construction Machinery Corp. and training service engineers of its distributors at the KC Techno Center and in the special training course at Shandong Jiaotong University.

Asia & Oceania

In Indonesia, the largest market of Southeast Asia, demand for mining equipment continued to expand, while demand for construction equipment remained strong in the civil engineering, agriculture and forestry sectors. Demand was also strong in India, Malaysia and some other countries. In Australia, demand for large equipment for use in mines was also strong. Reflecting these market conditions, first-quarter sales in Asia & Oceania increased from the previous first quarter a year ago.

During the first quarter, Komatsu embarked on sales of new hybrid hydraulic excavator models in some countries, while working to introduce KOMTRAX (Komatsu Machine Tracking System)-installed standard construction equipment to more regions. In Australia, Komatsu worked to reinforce sales and product support operations, as represented by reorganized distributor functions in August last year and improved efficiency of local assembly work. In Indonesia, Komatsu opened a pilot plant of the bio diesel fuel project designed to reduce environmental impact.

Middle East & Africa

While political and social conditions have continued to be unstable in some countries, demand for equipment was strong especially for use in mines in Africa. In these market conditions, first-quarter sales improved from the previous first quarter a year ago. Komatsu anticipates that markets will continue to expand as driven by demand in mining and infrastructure development sectors. Komatsu continued its efforts to strengthen its sales and product support operations, as demonstrated by introducing KOMTRAX-installed standard construction equipment to some regions and opening the Dakar Office.

Industrial Machinery and Others

First-quarter sales of industrial machinery and other operations advanced by 40.3% from the previous first quarter a year ago, to JPY58.8 billion (USD727 million). In addition to an increase in sales of wire saws from the previous first quarter, which are used to slice silicon ingots, the basic material for solar cells, sales of machine tools also increased as capital investment by the automobile manufacturing industry headed gradually for recovery.

To further enhance the competitive strength of its industrial machinery business, Komatsu NTC Ltd. and Komatsu Machinery Corporation were merged into a single entity and the Company absorbed Komatsu Engineering Corp. in April this year. In May, the Company and Ushio Inc. terminated the 50-50 joint-venture agreement regarding Gigaphoton Inc. and purchased the remaining 50% shares from Ushio Inc. As a result, Gigaphoton has become a wholly owned subsidiary of the Company.

Table of Contents**(2) Financial Conditions**

As of June 30, 2011, total assets had increased by JPY66.9 billion from the previous fiscal year-end, to JPY2,216.0 billion (USD27,359 million), mainly due to an increase in inventories. Interest-bearing debt increased by JPY51.0 billion from the previous fiscal year-end, to JPY595.1 billion (USD7,347 million). Komatsu Ltd. shareholders' equity increased by JPY24.2 billion from the previous fiscal year-end, to JPY948.0 billion (USD11,704 million). As a result, Komatsu Ltd. shareholders' equity ratio decreased by 0.2 percentage points from the previous fiscal year-end, to 42.8%. Net debt-to-equity ratio* was 0.54 compared to 0.50 as of the previous fiscal year-end.

* *Net debt-to-equity ratio = (Interest-bearing debt - Cash and cash equivalents - Time deposits) / Komatsu Ltd. shareholders' equity*

For the first quarter period under review, net cash used in operating activities amounted to JPY5.9 billion (USD73 million) due mainly to increased inventories, a decrease of JPY61.1 billion from JPY55.2 billion for net cash provided by operating activities for the previous first quarter period. Net cash used in investing activities amounted to JPY32.5 billion (USD401 million) due to acquisition of subsidiaries and equity investees, whereas net cash used in investing activities for the previous first quarter period totaled JPY17.2 billion. Net cash provided by financing activities amounted to JPY38.6 billion (USD478 million) due to procurement of long-term debt and an increase in short-term debt, whereas net cash used in financing activities for the previous first quarter period totaled JPY30.8 billion. As a result, cash and cash equivalents, as of June 30, 2011, totaled JPY83.0 billion (USD1,025 million), a decrease of JPY1.1 billion from the previous fiscal year-end.

(3) Projections for the Fiscal Year Ending March 31, 2012

(From April 1, 2011 to March 31, 2012)

In the construction, mining and utility equipment business, Chinese demand is not as big as projected earlier, however, Komatsu is anticipating a more-than-projected increase of demand in other Strategic Markets and Traditional Markets. In this light, Komatsu makes no change in the projection of April 27, 2011 concerning consolidated business results for the fiscal year ending March 31, 2012.

Cautionary Statement

The announcement set forth herein contains forward-looking statements which reflect management's current views with respect to certain future events, including expected financial position, operating results, and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects and similar terms or expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured.

Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated cost or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; and, the impact of regulatory changes and accounting principles and practices.
