SMITH INTERNATIONAL, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

1. BASIS OF PRESENTATION OF INTERIM FINANCIAL STATEMENTS

The accompanying unaudited consolidated financial statements of Smith International, Inc. and subsidiaries (the "Company") have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the "Commission"). Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. These financial statements should be read in conjunction with the audited financial statements and accompanying notes included in the Company's 2000 Annual Report on Form 10-K and other current filings with the Commission.

The unaudited consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) which the Company considers necessary for a fair presentation of the interim periods. All significant intercompany balances and transactions have been eliminated in the accompanying financial statements. Results for the interim periods are not necessarily indicative of results for the year. Certain prior year amounts have been reclassified to conform to current year presentation.

2. RECENT ACCOUNTING PRONOUNCEMENT

The Company adopted Statement of Financial Accounting Standards No. 133 ("SFAS No. 133"), "Accounting for Derivative Instruments and Hedging Activities," effective January 1, 2001. SFAS No. 133 requires that the Company record derivatives on the balance sheet at fair value and establishes criteria for designation and effectiveness of hedging relationships. The nature of the Company's business activities involves the management of various financial and market risks, including those related to changes in currency exchange rates and interest rates. The Company occasionally employs derivative financial instruments such as foreign exchange contracts, foreign exchange options, and interest rate swap contracts to mitigate or eliminate certain of those risks. The Company does not enter into derivative instruments for speculative purposes.

Fair value hedges are used to manage the Company's exposure to unanticipated changes in the fair value of a recognized asset or liability, or an unrecognized firm commitment. Derivatives that are used to hedge recognized assets or liabilities are not formally designated as fair value hedges, and all

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

changes in fair value are recognized in earnings as offsets to changes in the fair value of the underlying assets or liabilities. Derivatives used to hedge an unrecognized firm commitment are formally designated as fair value hedges, with changes in fair value recognized in earnings and offset by changes in fair value of the firm commitment.

Cash flow hedges are used to manage the Company's exposure to unanticipated changes in future cash flows due to changes in foreign exchange rates and interest rates. Derivatives that are used to hedge foreign denominated future cash flows and changes in interest rates are formally designated as cash flow hedges. To the extent effective, changes in fair value are recorded as a component of accumulated other comprehensive income until the hedged transactions occur and are recognized in earnings.

The adoption of SFAS No. 133 on January 1, 2001 did not have a material impact on the Company's financial position or results of operations. During the first quarter of 2001, the Company recorded the change in fair market value related to fair value hedges, which included foreign exchange contracts, to general and administrative expenses in the accompanying consolidated statement of operations. These amounts were not material. Additionally, the Company recorded the change in value related to cash flow hedges, which included foreign exchange contracts and interest rate swaps, to accumulated other comprehensive income. During the first quarter of 2001, changes in foreign exchange rates and interest rates resulted in an adjustment of \$2.0 million to accumulated other comprehensive income in the accompanying consolidated balance sheet. This amount is expected to be recognized in the statement of operations during the next twelve months, offset by the effect of changes in the underlying basis of the hedged transactions.

4

7

3. BUSINESS COMBINATION

On January 31, 2001, the Company acquired substantially all of the U.S. net assets of Van Leeuwen Pipe and Tube Corporation ("Van Leeuwen"), a leading provider of pipe, valves and fittings to the refining, petrochemical and power generation industries. The transaction was financed with cash consideration of \$41.1 million, borrowed under a short-term loan facility which was subsequently repaid with proceeds from the Company's public debt offering (see Note 8). In connection with the transaction, Wilson also agreed to acquire certain of the seller's inventory, which will be liquidated in the normal course of business. These inventories were purchased in exchange for a non-interest bearing note, recorded in the accompanying financial statements at the discounted value, which matures in January 2003.

This acquisition has been recorded using the purchase method of accounting and, accordingly, the acquired operations have been included in the results of operations since the date of acquisition. The purchase price was allocated to the net assets acquired based upon their estimated fair market values at the dates of acquisition. The excess of the purchase price over the estimated fair value of the net assets has been recorded as goodwill and is being amortized on a straight-line basis over 20 years.

The balances included in the consolidated balance sheet as of March 31, 2001 related to this acquisition are based upon preliminary information and are subject to change when additional information concerning final asset and liability valuations is obtained. Material changes in the preliminary allocations are not anticipated by management.

The following unaudited pro forma supplemental information presents consolidated results of operations as if the Company's significant current and

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

prior year acquisitions had occurred on January 1, 2000 (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2001	2000
Revenues.....	\$ 880,552	\$ 695,460
Net income.....	33,573	11,371
Earnings per share:

5

8

4. EARNINGS PER SHARE

Basic earnings per share ("EPS") is computed using the weighted average number of common shares outstanding during the period. Diluted EPS gives effect to the potential dilution of earnings which could have occurred if additional shares were issued for stock option exercises under the treasury stock method. The following schedule reconciles the income and shares used in the basic and diluted EPS computations (in thousands, except per share data):

Three Months Ended March 31,	
2001	2000

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

	=====	=====

5. COMPREHENSIVE INCOME

Comprehensive income encompasses net income and changes in the components of accumulated other comprehensive income during the periods presented. Accumulated other comprehensive income consists of currency translation adjustments and the unrealized fair value of certain derivative financial instruments. The Company's comprehensive income is as follows (in thousands):

	Three Months Ended March 31,	
	-----	-----
	2001	2000
	-----	-----
Net income.....	\$ 34,218	\$ 11,323

Currency translation adjustments.....	(4,798)	(1,248)
	-----	-----
Comprehensive income.....	\$ 27,391	\$ 10,075
	=====	=====

6. INVENTORIES

Inventories are stated at the lower of cost or market. Cost is determined by the last-in, first-out ("LIFO") method for the majority of the Company's inventories. The remaining inventories are costed under the first-in, first-out ("FIFO") or average cost methods. Inventory costs, consisting of materials, labor and factory overhead, are as follows (in thousands):

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

	March 31, 2001	December 2000
	-----	-----
Raw materials.....	\$ 50,223	\$ 4

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

The following "Management's Discussion and Analysis of Financial Condition and Results of Operations" is provided to assist readers in understanding the Company's financial performance during the periods presented and significant trends which may impact the future performance of the Company. The following discussion should be read in conjunction with the Consolidated Financial Statements of the Company and the related notes thereto included elsewhere in this Form 10-Q, as well as the Consolidated Financial Statements of the Company and the related notes thereto and the related "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Company's 2000 Annual Report on Form 10-K.

The Company manufactures and markets premium products and services to the oil and gas exploration and production industry, the petrochemical industry and other industrial markets. The Company provides a comprehensive line of technologically-advanced products and engineering services, including drilling and completion fluid systems, solids-control and separation equipment, waste-management services, three-cone and diamond drill bits, fishing services, drilling tools, underreamers, casing exit and multilateral systems, packers and liner hangers. The Company also offers supply-chain management solutions through an extensive branch network providing pipe, valves, fittings, mill, safety and other maintenance products.

The Company's worldwide operations are largely driven by the level of exploration and production activity in major energy producing areas and the depth and drilling conditions of these projects. Drilling activity levels are

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

primarily influenced by energy prices but may also be affected by expectations related to the worldwide supply of and demand for oil and natural gas, finding and development costs, decline and depletion rates, political actions and uncertainties, environmental concerns, capital expenditure plans of exploration and production companies and the overall level of global economic growth and activity.

10

13

RESULTS OF OPERATIONS

SEGMENT DISCUSSION

The Company markets its products and services throughout the world through four business units which are aggregated into two reportable segments. The Oilfield Products and Services segment consists of three business units: M-I, Smith Bits and Smith Services. The Distribution segment includes the Wilson business unit. The revenue information below has been summarized by business unit in order to provide additional information in analyzing the Company's operations (dollars in thousands).

* not meaningful

Oilfield Products and Services Segment

Revenues

M-I provides drilling and completion fluid systems, engineering and technical services to the oil and gas industry through its M-I Fluids division. M-I's SWACO division manufactures and markets equipment and services for solids control, separation, pressure control, rig instrumentation and waste management. M-I's revenues increased \$124.5 million, or 46 percent, from the first quarter of 2000. The revenue growth over the prior year quarter reflects the impact of the expansion in market activity, acquisitions and improvements in pricing for M-I's products and services. Excluding the impact of operations acquired in the fourth quarter of 2000, revenues were 37 percent above the amounts reported in the prior year quarter, which compares to a 30 percent increase in the average M-I worldwide rig count between periods. M-I reported base business

11

14

revenue growth in all geographic areas with the majority of the overall increase attributable to higher activity levels in the United States and Europe/Africa.

Smith Bits manufactures and sells three-cone and diamond drill bits primarily for use in the oil and gas industry. Smith Bits' revenues for the three months ended March 31, 2001 were \$27.3 million, or 36 percent, above amounts reported in the comparable 2000 period, with the significant improvement in worldwide drilling activity favorably influencing demand for petroleum drill bits. Revenues generated from the sale of both the petroleum three-cone and diamond bits outpaced the 30 percent increase in the average M-I worldwide rig count between periods. On a combined basis, petroleum three-cone and diamond bit revenues grew 40 percent over prior year levels, reflecting the impact primarily of higher sales volumes, improved pricing and recent product introductions. On a geographic basis, approximately three-quarters of the revenue increase from period-to-period was reported in the United States and Europe/Africa.

Smith Services manufactures and markets products and services used in the oil and gas industry for drilling, workover, well completion and well re-entry. Smith Services' revenues for the current period were \$21.8 million, or 34 percent, above amounts reported in the first quarter of 2000. The revenue increase primarily reflects the impact of higher activity levels in the Western Hemisphere, improved pricing and new contract awards during the past twelve months. The divestiture of the directional operations at the beginning of 2001 partially offset the period-to-period increase in revenue. After excluding the impact of the divested operations, Smith Services' revenues were 39 percent above prior year quarter amounts. Smith Services reported revenue growth across all product groups with increased drilling-related revenues, including tubulars and inspection and machine shop services, accounting for over 60 percent of the increase from the prior year period.

Income Before Interest and Taxes

Income before interest and taxes for the Oilfield Products and Services

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

segment increased \$47.0 million, or 141 percent, from the first quarter of 2000. The increase reflects the combined effect of higher revenues and operating margins. Operating margins for the oilfield operations rose six percentage points from the prior year quarter, to 14 percent of revenues. The majority of the increase in operating margins is attributable to improved gross margins reflecting the impact of improved pricing, higher production volumes and improved coverage of fixed costs. The remainder of the improvement reflects primarily the impact of the leverage of higher revenue levels on sales and administrative support expenses.

Distribution Segment

Revenues

Wilson markets pipe, valves, fittings, mill, safety and other maintenance products to energy and industrial markets, primarily through an extensive network of supply branches in the United States and Canada. Wilson's revenues increased \$66.3 million, or 30 percent, from the first quarter of 2000. Approximately one-half of the increase is attributable to the acquisition of the U.S. operations of Van Leeuwen Pipe and Tube Corporation ("Van Leeuwen"), effective February 1, 2001. After excluding the effect of the Van Leeuwen operations, revenues were 16 percent above levels reported in the first quarter of 2000. The majority of the base revenue increase related to the higher exploration and production levels in North America, which favorably impacted Wilson's energy branches. Higher customer spending associated with plant maintenance benefited Wilson's industrial sector operations and contributed to the period-to-period revenue growth.

Income Before Interest and Taxes

Wilson's income before interest and taxes increased \$2.9 million, or 75 percent, from the prior year period, reflecting primarily the growth in revenues. As a percentage of revenue, operating margins improved slightly from the prior year level as a result of improved coverage of fixed operating expenses.

12

15

Consolidated Results

For the periods indicated, the following table summarizes the results of the Company and presents these results as a percentage of total revenues (dollars in thousands):

	Three Months Ended March 31,

Consolidated revenues were \$239.9 million, or 38 percent, above levels reported in the first quarter of 2000. The revenue growth from the prior year period is attributable primarily to the impact of higher worldwide exploration and production activity levels, acquisitions and improved pricing in the oilfield operations. The Company reported revenue increases in all geographic regions, with approximately three-quarters of the increase generated in the United States and Europe/Africa. After excluding the impact of acquired and divested operations, revenues in the first quarter of 2001 were 30 percent above levels reported in the first quarter of 2000.

Gross profit increased \$84.6 million, or 52 percent, from the prior year quarter. The period-to-period increase in gross profit reflects the effect of the higher revenues, as well as improved gross profit margins in the Company's oilfield operations. Consolidated gross margins rose over two percentage points from the first quarter of 2000, to 28 percent of revenues, as a result of higher sales and production volumes and price increases implemented over the past year. On a consolidated basis, the effect of the gross margin improvement in the Oilfield Products and Services segment was partially offset by the impact of the acquired Van Leeuwen distribution operations which generate lower gross profit margins.

Operating expenses, consisting of selling, general and administrative expenses, increased \$34.9 million from the first quarter of 2000. The majority of the increase related to higher base revenue volumes, which grew 30 percent over the prior year and contributed to 18 percent growth in personnel levels. The variance between periods also reflects the incremental costs associated with acquisitions completed subsequent to March 31, 2000, which collectively accounted for over one-third of the overall increase in operating expenses. Operating expenses as a percentage of revenues declined two percentage points from the prior year quarter reflecting the leverage of higher revenues on the Company's overall sales and administrative expenses.

13

16

Net interest expense, which represents interest expense less interest income, increased \$1.6 million from the first quarter of 2000. The majority of the variance is attributable to the \$126.3 million increase in outstanding debt from March 31, 2000, which relates primarily to acquisitions completed within the last twelve months.

The effective tax rate for the first quarter of 2001 approximated 33 percent, which is below the prior year quarter rate and the U.S. statutory rate. The effective tax rate in 2001 is lower than the U.S. statutory rate due to the impact of M-I's U.S. partnership earnings for which the minority partner is directly responsible for their related income taxes. The Company properly

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

consolidates the pre-tax income related to the minority partner's share of U.S. partnership earnings but excludes the related tax provision. The current period effective rate is below the prior period rate as a result of a favorable shift in the geographic mix of pre-tax income and the impact of higher pre-tax income on certain non-deductible expenses.

Minority interests reflect the portion of the results of majority-owned operations which are applicable to the minority interest partners. Minority interests increased \$10.1 million from the first quarter of 2000 due primarily to the improved profitability of the M-I operations.

LIQUIDITY AND CAPITAL RESOURCES

General

Cash and cash equivalents totaled \$31.3 million at March 31, 2001, a decrease of \$5.2 million from the prior year-end. The Company's operations used \$0.9 million in the first quarter of 2001, as the impact of increased profitability levels were offset by higher investments in working capital accounts, primarily inventory and receivables. Cash flows from operations were not sufficient to fund capital expenditure and acquisition needs resulting in borrowings of \$45.3 million during the quarter.

On January 31, 2001, the Company acquired substantially all of the U.S. net assets of Van Leeuwen Pipe and Tube Corporation for cash consideration of \$41.1 million. Management continues to evaluate opportunities to acquire products or businesses complementary to the Company's operations. These acquisitions, if they arise, may involve the use of cash or, depending upon the size and terms of the acquisition, may require debt or equity financing.

The Company's primary internal source of liquidity is cash flow generated from operations. External sources of liquidity include debt and, if needed, equity financing. During the first quarter of 2001, the Company completed a public debt offering for \$250.0 million of 6.75 percent senior notes and used the net proceeds from the offering to repay short-term borrowings and the majority of the Company's indebtedness under revolving credit agreements. As a result, the Company had additional borrowing capacity of \$195.1 million at March 31, 2001 under various revolving lines of credit facilities, which is available for operating and financing needs. The Company believes funds generated from operations, amounts available under existing credit facilities and external sources of liquidity will be sufficient to finance capital expenditures and working capital needs of the existing operations for the foreseeable future.

NEW ACCOUNTING AND REGULATORY PRONOUNCEMENTS

The Company adopted Statement of Financial Accounting Standards No. 133 ("SFAS No. 133"), "Accounting for Derivative Instruments and Hedging Activities," effective January 1, 2001. SFAS No. 133 requires that the Company record derivatives on the balance sheet at fair value and establishes criteria for designation and effectiveness of hedging relationships. The nature of the Company's business activities involves the management of various financial and market risks, including those related to changes in currency exchange rates and interest rates. The Company occasionally employs derivative financial instruments such as foreign exchange contracts, foreign exchange options and interest rate swap contracts to mitigate or eliminate certain of those risks. The Company does not enter into derivative instruments for speculative purposes.

Edgar Filing: SMITH INTERNATIONAL INC - Form 10-Q

Fair value hedges are used to manage the Company's exposure to unanticipated changes in the fair value of a recognized asset or liability, or an unrecognized firm commitment. Derivatives that are used to hedge recognized assets or liabilities are not formally designated as fair value hedges, and all changes in fair value are recognized in earnings as offsets to changes in the fair value of the underlying assets or liabilities. Derivatives used to hedge an unrecognized firm commitment are formally designated as fair value hedges, with changes in fair value recognized in earnings and offset by changes in fair value of the firm commitment.

Cash flow hedges are used to manage the Company's exposure to unanticipated changes in future cash flows due to changes in foreign exchange rates and interest rates. Derivatives that are used to hedge foreign denominated future cash flows and changes in interest rates are formally designated as cash flow hedges. To the extent effective, changes in fair value are recorded as a component of accumulated other comprehensive income until the hedged transactions occur and are recognized in earnings.

The adoption of SFAS No. 133 on January 1, 2001 did not have a material impact on the Company's financial position or results of operations. During the first quarter of 2001, the Company recorded the change in fair market value related to fair value hedges, which included foreign exchange contracts, to general and administrative expenses in the accompanying consolidated statement of operations. These amounts were not material. Additionally, the Company recorded the change in value related to cash flow hedges, which included foreign exchange contracts and interest rate swaps, to accumulated other comprehensive income. During the first quarter of 2001, changes in foreign exchange rates and interest rates resulted in an adjustment of \$2.0 million to accumulated other comprehensive income in the accompanying consolidated balance sheet. This amount is expected to be recognized in the statement of operations during the next twelve months, offset by the effect of changes in the underlying basis of the hedged transactions.

ITEM 3. QUALITATIVE AND QUANTITATIVE MARKET RISK DISCLOSURES

The Company is exposed to certain market risks arising from transactions that are entered into in the normal course of business. These risks, which are primarily related to interest rate changes and fluctuations in foreign exchange rates, are not considered to be material to the Company. During the reporting period, no events or transactions have occurred which would materially change the information disclosed in the Company's Annual Report on Form 10-K.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits

10.1 Amendment to Loan Agreement dated January 17, 2001, by and among the Company and the Chase Manhattan Bank (successor by merger to Chase Bank of Texas, National Association), individually and as Agent, and the other financial parties thereto.

(b) Reports on Form 8-K

The Registrant filed reports on Form 8-K during the quarterly period ended March 31, 2001. All filings were reported under "Item 5, Other Events" and disclosed the following:

1. Form 8-K dated January 22, 2001 relating to press releases announcing the acquisition of (a) the drilling fluids and solids control assets of Bolland & Cia; (b) Emerson's Sweco Division, which manufactures, markets and services specialty separation equipment; and (c) a definitive agreement to acquire substantially all of the net assets of Van Leeuwen Pipe and Tube Corporation.
2. Form 8-K dated January 31, 2001 relating to a press release announcing the Company's results for the three months and the year ended December 31, 2000.
3. Form 8-K dated February 2, 2001 relating to a press release announcing the acquisition of the U.S. net assets of Van Leeuwen Pipe and Tube Corporation.
4. Form 8-K dated February 16, 2001 relating to completion of an offering of \$250 million of 6.75 percent senior notes due 2011.
5. Form 8-K dated March 26, 2001 relating to a press release announcing the Company's financial outlook for the first quarter of 2001.
