MERRIMAC INDUSTRIES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A. Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-QSB and therefore do not include all information and footnote disclosures otherwise required by Regulation S-B. The financial statements do, however, reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the financial position of the Company as of September 29, 2001 and its results of operations and cash flows for the periods presented. Results of operations of interim periods are not necessarily indicative of results for a full year. These financial statements should be read in conjunction with the audited consolidated financial statements in the Company's Annual Report on Form 10-KSB for December

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

30, 2000. Certain prior year amounts have been reclassified to conform to current year presentation.

B. Contract revenues

Sales and related cost of sales on fixed-price contracts that require customization of standard products to customer specifications are recorded as title to these products transfers to the customer, which is generally on the date of shipment. Prior to shipment, manufacturing costs incurred on such contracts are recorded as work in process inventory. Anticipated losses on contracts are charged to operations when identified. Revenue related to non-recurring engineering charges is generally recognized upon shipment of the initial units produced or based upon contractually established stages of completion.

C. Delaware reincorporation

On February 22, 2001, the Company (previously incorporated in the State of New Jersey) was reincorporated in the State of Delaware. In connection with the reincorporation, each share of Common Stock, par value \$.50 per share, of the Company prior to the reincorporation was converted into one share of Common Stock, par value \$.01 per share, of the Company, as reincorporated in Delaware. As a result of the reincorporation, the authorized capital stock of the Company was increased to 20 million shares of common stock, par value \$.01 per share (from 5 million shares of Common Stock prior to the reincorporation), and one million shares of preferred stock, par value \$.01 per share.

Common Stock and additional paid in capital for December 30, 2000 in the accompanying financial statements have been restated to give the effect to the reincorporation. The Company incurred \$330,000 of costs in connection with the reincorporation in Delaware. Such expense is reflected as a reincorporation charge in the accompanying statement of operations. The reincorporation charge net of tax benefits was \$198,000 or \$.08 per share.

The Board of Directors has the authority to issue up to one million shares of Preferred Stock and to fix the number of shares constituting any series and the designation of such series, and to determine the preferences, rights and qualifications or limitations of such series of Preferred Stock, without any further vote or action by the Company's stockholders.

D. Inventories

Inventories consist of the following:

	September 29, 2001	December 30, 2000
	-----	-----
Finished goods	\$ 451,449	\$ 363,387
Work in process	2,312,077	1,493,784
Raw materials and purchased parts ...	2,165,264	1,770,364
	-----	-----
Total	\$4,928,790	\$3,627,535
	=====	=====

Total inventories are net of valuation allowances for obsolescence of \$1,081,000 at September 29, 2001 and \$1,018,000 at December 30, 2000.

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

MERRIMAC INDUSTRIES, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

E. Net income (loss) per common share

Statement of Financial Accounting Standards No. 128, "Earnings per Share," establishes the computation and presentation of net income per common share. Under the standard, both basic and diluted net income per common share are presented.

Basic net income per common share is calculated by dividing net income, less dividends on Preferred Stock, if any, by the weighted average common shares outstanding during the period.

The calculation of diluted net income per common share is similar to that of basic net income per common share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares, principally those issuable under stock options, were issued during the reporting period.

Stock options and warrants did not have an effect on the computation of diluted loss per share in the three months and nine months ended September 29, 2001 since they were antidilutive.

F. Comprehensive income

Statement of Financial Accounting Standards No. 130, "Reporting Comprehensive Income", defines comprehensive income, which includes items in addition to those reported in the statement of operations, and requires disclosures about the components of comprehensive income. Comprehensive income includes all changes in stockholders' equity during a period except those resulting from investments by or distributions to stockholders. The Company has determined that the components of other comprehensive income impacting the Company consists primarily of foreign currency translation adjustments.

G. Accounting period

The Company's fiscal year is the 52-53 week period ending on the Saturday closest to December 31. The Company has quarterly dates that correspond with the Saturday closest to the last day of each calendar quarter and each quarter consists of 13 weeks in a 52-week year. Every fifth year, the additional week to make a 53-week year (fiscal year 1997 was the last and fiscal year 2002 will be the next) is added to the fourth quarter, making such quarter consist of 14 weeks.

H. Transactions with management and loan to officer-stockholder

On May 4, 1998, the Company sold 22,000 shares of Common Stock from its treasury to Mason N. Carter, Chairman, President and Chief Executive Officer of the Company, at a price of \$12.75 per share (the approximate average closing price of the Common Stock during the first quarter of 1998). The Company extended to Mr. Carter a loan of \$255,000 in connection with the purchase of these shares and amended a prior loan to Mr. Carter of \$105,000. A new promissory note for a total of \$360,000, due May 4, 2003, with interest payments due quarterly, calculated at a variable interest rate based on the prime rate of the Company's lending bank, was executed by Mr. Carter in favor of the Company. However, payment of the interest accrued from November 1998 until November 1999 was deferred until the end of the term of the new promissory note. Payment of the loan is secured by the pledge of the 33,000 shares of Common Stock that were purchased by Mr. Carter with the proceeds of the loans.

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

In addition, on August 31, 2000, in connection with an amendment of Mr. Carter's employment agreement, the Company loaned Mr. Carter \$280,000 with interest calculated at a variable interest rate based on the prime rate of the Company's lending bank, payable annually. In addition, pursuant to Mr. Carter's amended employment agreement, Mr. Carter will receive an annual special bonus on the next five anniversaries of the agreement amendment's effective date, in the form of forgiveness of one-fifth of the principal of and interest on the loan. During 2001, the annual special bonus amount of \$56,000 principal and \$23,000 accrued interest was forgiven totaling \$79,000, and the original promissory note of \$280,000 was reduced to \$224,000 on August 31, 2001, the anniversary date of the amended employment agreement.

-5-

MERRIMAC INDUSTRIES, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

I. Current and long-term debt

The Company was obligated under the following debt instruments at September 29, 2001 and December 30, 2000:

	September 29, 2001	December 30, 2000
	-----	-----
Fleet Bank:		
Revolving credit facility, interest 1/2% below prime.....	\$4,500,000	\$ -
The Bank of Nova Scotia:		
Capital leases, interest 7.0%, due October 2003.....	150,100	211,600
Capital leases, interest 8.7%, due May 2005.....	261,609	311,160
Capital leases, interest 7.3%, due April 2006.....	206,167	-
Capital leases, interest 7.9%, due June 2006.....	170,570	-
	-----	-----
	5,288,446	522,760
Less current portion.....	4,676,016	119,932
	-----	-----
Long-term portion.....	\$ 612,430	\$402,828
	=====	=====

In 2001 the Company borrowed \$4,500,000, which includes \$1,500,000 borrowed during the third quarter, under its existing revolving credit facility with Fleet Bank (formerly Summit Bank) which currently bears interest at 4.5%.

On October 3, 2001, the Company obtained an increase of \$2,000,000 to the revolving credit facility for working capital and general corporate purposes. During October 2001, the Company has borrowed an additional \$1,500,000 under its increased revolving credit facility.

The Company has been approved conditionally, subject to the completion of certain documentation, for an additional increase of \$3,500,000 in the Company's lines of credit with Fleet Bank. The Company's revolving credit facility expires

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

June 30, 2002.

At September 29, 2001 and December 30, 2000, the fair value of the Company's debt approximates carrying value. The fair value of the Company's long-term debt is estimated based on current interest rates.

Capital leases included in property, plant and equipment, net, have a depreciated cost of approximately \$639,000 at September 29, 2001 and \$376,000 at December 30, 2000.

J. Restructuring and related charges

As a result of accelerating the transfer of increased levels and complexity of production to the Company's Costa Rica manufacturing facility, the Company implemented a reduction of its workforce and provided severance benefits to certain employees during the first quarter of 2000. The restructuring charge for the first quarter of 2000 was \$315,000, and charges net of tax benefits of \$189,000 or \$.10 per diluted share and \$.09 per diluted share for the nine months, as a result of increases in common shares from private placements after the first quarter 2000. The reduction in workforce affected fifteen persons, primarily electronic components manufacturing labor, and the full amount of the restructuring charge has been paid.

-6-

MERRIMAC INDUSTRIES, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

K. Private placements of Common Stock and Warrants to purchase Common Stock

On April 7, 2000, the Company entered into a stock purchase and exclusivity agreement with Ericsson Microelectronics, A.B. ("Ericsson") and Ericsson Holding International, B.V. ("EHI") pursuant to which the Company sold to EHI 375,000 newly issued shares of Common Stock, representing approximately 17.5% of the outstanding Common Stock after giving effect to the sale, for an aggregate purchase cash price of \$3,375,000. The stock purchase and exclusivity agreement also provides that the Company will design, develop and produce exclusively for Ericsson Multi-Mix(R) products that incorporate active RF power transistors for use in wireless base station applications, television transmitters and certain other applications that are intended for Bluetooth transceivers and that the Company will generally be the priority supplier for such products. Accordingly, Ericsson will receive first priority on all Multi-Mix(R) resources of the Company and will have priority access to Filtran Microcircuits Inc. proprietary technology and manufacturing capabilities.

On October 26, 2000, the Company entered into subscription agreements for Common Stock and warrants with each of three groups of investors: (i) investors led by Adam Smith Investment Partners, L.P. and certain of its affiliates (the "Adam Smith Investors"), (ii) EHI, and (iii) three members of the board of directors of the Company (the "Director Investors"). Pursuant to the subscription agreements, the Company sold to the investors units at a price of \$12.80 per unit, each unit consisting of one share of common stock and one three-year warrant to purchase one additional share of common stock with an exercise price of \$21.25 ("Units"). Pursuant to the subscription agreements, the Adam Smith Investors purchased 240,000 Units, EHI purchased 100,000 Units and the Director Investors purchased 20,000 Units for an aggregate cash purchase price of \$4,608,000. The Common Stock portion represented approximately 14% of

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

the outstanding stock of the Company after giving effect to the sales.

The warrants were valued using the Black-Scholes option valuation model with a resulting allocation of the aggregate proceeds from the Units attributable to the warrants of \$837,200, net of issue costs. The following assumptions were utilized to value the warrants: price per share of Common Stock of \$15.25; expected life of three years; expected volatility of 40%; a risk free interest rate of 6%; an expected yield of 0.0%; and a liquidity discount of 33%.

L. Lease modification and resource sharing agreement

The Company entered into an agreement effective January 2001, with a customer to relinquish approximately half of the Company's 17,000 square-foot leased manufacturing facility in Costa Rica. Associated with the transaction, the Company entered into a new four-year lease agreement with a five-year renewal option with its Costa Rica landlord for the reduced space. In addition, the Company transferred certain employees to its customer, agreed to share certain personnel resources and common costs, and committed to provide certain management, administrative and other services to its customer.

In connection with the transaction, the Company received \$200,000 from its customer and will receive further payments of \$250,000 over a two-year period. The Company will reduce its rent expense by approximately \$87,000 during each of the next four years to an aggregate amount of approximately \$348,000.

The Company deferred approximately \$102,000 of costs at December 30, 2000 incurred in connection with entering into this agreement and other incremental costs, for the purpose of providing this customer with trained personnel and certain other services required for their dedicated manufacturing capability. Such costs are classified in the balance sheet as other assets at December 30, 2000, and were recovered through the \$200,000 payment received in January 2001 as described above. The deferred rental income of \$34,000 is included in other liabilities.

-7-

MERRIMAC INDUSTRIES, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

M. Pro forma weighted average number of common shares outstanding

Had the sales of 375,000 shares of Common Stock on April 7, 2000 and 360,000 Units on October 26, 2000 referred to in Note K occurred at the beginning of the prior year, the pro forma basic and diluted weighted average number of Common Shares outstanding would have been:

	Quarter	Nine Months

	Ended September 30, 2000	

Basic:		
Actual	2,186,015	2,021,057
Adjustments for sales of:		
Common Stock, April 7, 2000	-	131,868
Units, October 26, 2000 (a)	360,000	360,000
	-----	-----

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

Basic - pro forma	2,546,015	2,512,925	
Effect of dilutive securities-			
Stock options	193,013	150,257	
	-----	-----	
Diluted - pro forma	2,739,028	2,663,182	
	=====	=====	

(a) There is no pro forma dilutive impact from the warrants included in the Units, as the warrant exercise price of \$21.25 exceeds the per share market value of the Common Stock.

N. Recent Accounting Pronouncements

The Financial Accounting Standards Board issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," which established new accounting and reporting standards and requires that every derivative instrument (including certain derivative instruments embedded in other contracts) be recorded as assets or liabilities in the balance sheet measured at fair value. SFAS No. 133 requires that changes in the fair value of derivatives be recognized currently in earnings unless specific hedge accounting criteria are met. The Company has adopted the provisions of the Statement in 2001. The Company does not currently hold derivative instruments or engage in hedging activities and therefore the adoption of SFAS No. 133 has not had a material impact on the Company's financial position, results of operations or cash flows.

On June 30, 2001, the Financial Accounting Standards Board issued SFAS No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Other Intangible Assets". SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting and eliminates the pooling method of accounting. SFAS No. 141 will not have an impact on the Company's business since the Company has historically accounted for business combinations using the purchase method of accounting.

With the adoption of SFAS No.142, which will be adopted by the Company on December 30, 2001, goodwill will no longer be subject to amortization over its estimated useful life. However, goodwill will be subject to at least an annual assessment for impairment and more frequently if circumstances indicate a possible impairment. The Company is required to perform a fair-value-based goodwill impairment test. In addition, under SFAS No. 142, an acquired intangible asset should be separately recognized if the benefit of the intangible is obtained through contractual or other legal rights, or if the intangible asset can be sold, transferred, licensed, rented, or exchanged. Intangible assets will be amortized over their estimated useful lives. Early adoption of SFAS No. 142 is not permitted. Any write-down of goodwill would be charged to results of operations in the periods in which the recorded value of goodwill and certain intangibles is more than its fair value. On an annualized basis, the Company expects that the adoption of these accounting standards will reduce the amortization of goodwill and intangibles by approximately \$150,000 commencing in 2002, unless future impairment reviews result in periodic write-downs of goodwill.

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

O. Business segment data

The Company's operations are conducted primarily through two business segments: (1) electronic components and (2) microwave micro-circuitry. These segments, and the principal operations of each, are as follows:

Electronic components: Design, manufacture and sale of electronic component devices offering extremely broad frequency coverage and high performance characteristics for communications, defense and aerospace applications. Of the identifiable assets, 90% are located in the United States and 10% are located in Costa Rica.

Microwave micro-circuitry: Design, manufacture and sale of microstrip, bonded stripline and thick metal-backed Teflon(R) (PTFE) and mixed dielectric multilayer circuits for communications, defense and aerospace applications. Of the identifiable assets all are located in Canada.

Information about the Company's operations in different industries follows. Operating income is net sales less operating expenses. Operating expenses exclude interest expense, other income and income taxes. Assets are identified with the appropriate operating segment and are substantially all located in the North America geographic area. Corporate assets consist principally of cash. Corporate expenses and inter-segment sales are immaterial.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS

Third quarter and nine months 2001 compared to third quarter and nine months 2000

Consolidated results of operations for the third quarter 2001 reflect a decrease in net sales of \$625,000 or 9.7% to \$5,812,000. This decrease was primarily attributable to a \$743,000 decrease in sales of microwave micro-circuitry products from the Company's subsidiary Filtran Microcircuits Inc. ("FMI"), which was partially offset by a \$118,000 increase in net sales of electronic components.

Consolidated results of operations for nine months 2001 reflect an increase in net sales of \$2,371,000 or 14.5% to \$18,669,000. This increase was primarily attributable to an increase in net sales of electronic components of \$3,271,000, which was partially offset by a decrease in sales of microwave micro-circuitry products of \$900,000 from FMI.

Orders of \$6,295,000 were received during third quarter 2001, a decrease of \$1,050,000 or 14.3% compared to \$7,345,000 in orders received during third quarter 2000. Backlog increased by \$2,095,000 or 19.7% to \$12,735,000 at the end of the third quarter 2001 compared to \$10,640,000 at year-end 2000, and increased by \$988,000 or 8.4% when compared to the end of third quarter 2000 backlog of \$11,747,000. Orders received during the third quarter of 2001 exceeded the third quarter 2001 sales level by approximately 8.3%. Orders of \$20,764,000 were received during nine months 2001, a decrease of \$1,160,000 or 5.3% compared to \$21,927,000 in orders received during nine months 2000. Orders received during the nine months of 2001 exceeded the nine months 2001 sales level by approximately 11.2%.

The Company believes that the current economic downturn, resulting in reduced spending by wireless service providers, has caused many wireless companies to delay their purchases. However, the Company expects that its satellite and defense customers will continue to increase their orders during the fourth quarter 2001. The Company also anticipates receiving its initial orders during the fourth quarter 2001 for its new Multi-Mix(R) Microtechnology products, for which a significant capital investment has been made and substantial research and development costs have been incurred. An extended delay or reduction from planned levels in new orders for the new Multi-Mix(R) Microtechnology products could have a material adverse impact on the Company. The Company's subsidiary FMI has experienced a slowdown in orders for certain of its wireless communication products, which has caused a significant financial impact on the results of operations in third quarter and nine months 2001. The Company further expects that softness in the telecommunications sector that FMI serves, principally millimeter wave applications for wireless broadband solutions, will continue during the remainder of fiscal 2001, and is likely to cause a substantial reduction in the microwave micro-circuitry segment sales and

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

profitability for fiscal 2001 compared to prior year results. The Company implemented a temporary reduction of 25% or 19 persons in the FMI workforce during the second quarter of 2001 in response to the decline in orders for this segment.

Cost of sales decreased \$413,000 or 12.5%, and as a percentage of net sales decreased 1.6% to 49.7% for third quarter 2001. Cost of sales increased \$651,000 or 7.8%, and as a percentage of net sales decreased 3.0% to 48.2% for nine months 2001. Percentage cost reductions for cost of sales were achieved from manufacturing efficiencies attributable to a reduction in direct labor and manufacturing overhead costs, related in part to the transfer of certain additional production to the Company's Costa Rica manufacturing facility, and other manufacturing cost reductions resulting from the personnel restructuring in the first quarter of 2000.

-11-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Depreciation expense included in cost of sales was \$463,000, of which \$192,000 was associated with Multi-Mix(R) Microtechnology capital assets, an increase of \$113,000 in third quarter 2001 compared to third quarter 2000. For nine months 2001 compared to nine months 2000, depreciation expense included in cost of sales was \$1,352,000, an increase of \$157,000. For nine months 2001, \$539,000 of depreciation expense was associated with Multi-Mix(R) Microtechnology capital assets. The increase in depreciation expense was a result of higher capital equipment purchases in the current and prior years.

Gross profit in third quarter 2001 for the electronic components segment was \$2,588,000 or 52.0% of segment net sales of \$4,973,000, compared to gross profit of \$2,316,000 or 47.7% of segment net sales of \$4,855,000 in third quarter 2000. Gross profit for the microwave micro-circuitry segment was \$336,000 or 40.0% of segment net sales of \$839,000, compared to \$819,000 or 51.8% of third quarter 2000 segment net sales of \$1,582,000.

Gross profit in nine months 2001 for the electronic components segment was \$8,271,000 or 54.1% of segment net sales of \$15,291,000, compared to gross profit of \$5,873,000 or 48.9% of segment net sales of \$12,020,000 in nine months 2000. Nine months 2001 gross profit for the microwave micro-circuitry segment was \$1,404,000 or 41.5% of segment net sales of \$3,378,000, compared to \$2,082,000 or 48.7% of nine months 2000 segment net sales of \$4,278,000.

Selling, general and administrative expenses of \$2,281,000 for third quarter 2001 increased by \$50,000 or 2.2%, and when expressed as a percentage of net sales, increased by 4.5% to 39.2%. Increases resulted from employment termination costs for senior level personnel of approximately \$112,000, which was partially offset by reduced sales commission expenses.

Selling, general and administrative expenses of \$7,014,000 for nine months 2001 increased by \$1,066,000 or 17.9%, and when expressed as a percentage of net sales, increased by 1.0% to 37.5%. Increases resulted from employment termination costs for senior level personnel of approximately \$198,000, higher sales commission expenses, increased selling and marketing expenses in connection with the Company's Multi-Mix(R) Microtechnology product line, and higher engineering and technology personnel compensation, recruitment and training costs, and patent-associated and other professional fees.

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

Amortization expense of \$37,000 for the third quarter and \$111,000 for nine months 2001 is attributable to goodwill of approximately \$3,000,000 arising from the acquisition of FMI, which is being amortized on a straight-line basis over a life of twenty years, compared to amortization expense of \$42,000 for the third quarter and \$120,000 for nine months 2000.

Research and development expenses for new products were \$954,000 in third quarter 2001, an increase of \$470,000 or 97.2% compared to third quarter 2000. Except for \$75,000 of expenses at FMI, a decrease of \$3,000 from third quarter 2000, substantially all of the research and development expenses in third quarter 2001 were related to Multi-Mix(R) Microtechnology products. Research and development expenses for new products were \$2,502,000 in nine months 2001, an increase of \$1,169,000 or 87.7% compared to nine months 2000. Except for \$226,000 of expenses at FMI, a decrease of \$12,000 from nine months 2000, substantially all of the research and development expenses in nine months 2001 were related to Multi-Mix(R) Microtechnology products, which resulted in the third quarter 2001 product launches of Multi-Mix PICO(TM) technology products that reduce certain microwave components size by more than 84%.

The consolidated operating loss for third quarter 2001 was \$349,000, which compared to consolidated operating income of \$378,000 for the third quarter 2000. The consolidated operating loss for nine months 2001, after the reincorporation charge of \$330,000, was \$283,000, which compared to consolidated operating income of \$239,000 for nine months 2000 after the personnel restructuring charge of \$315,000. Nine month 2001 consolidated operating income was \$48,000, before the effect of charges associated with the reincorporation in Delaware of \$330,000 in first quarter 2001, compared to \$554,000 of consolidated operating income for nine months 2000 before the personnel restructuring charge of \$315,000 in first quarter 2000.

-12-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The operating loss for the electronic components segment was \$264,000 in third quarter 2001, compared to a \$43,000 operating loss in third quarter 2000. The operating loss for the microwave micro-circuitry segment was \$85,000 in third quarter 2001 compared to operating income of \$421,000 or 26.6% of segment net sales in third quarter 2000.

Operating loss for the electronic components segment was \$360,000 in nine months 2001, after the \$330,000 reincorporation charge in first quarter 2001, compared to a \$739,000 operating loss in nine months 2000 after the restructuring charge of \$296,000 in first quarter 2000. Operating income for the microwave micro-circuitry segment was \$77,000 or 2.3% of segment net sales in nine months 2001 compared to operating income of \$998,000 or 23.3% in nine months 2000 after this segment's restructuring charge of \$19,000 in first quarter 2000. Before the first quarter 2001 reincorporation charge of \$330,000, operating loss for the electronic components segment would have been \$30,000 in nine months 2001 compared to an operating loss of \$443,000 in nine months 2000 before this segment's restructuring charge in first quarter 2000 of \$296,000.

Interest income, net was \$20,000 for third quarter 2001 compared to net interest expense of \$9,000 for third quarter 2000. Interest expense of \$58,000 was capitalized to in-process construction property, plant and equipment in

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

third quarter 2001. Interest income, net was \$69,000 for nine months 2001 compared to net interest expense of \$115,000 for nine months 2000. Interest expense of \$81,000 was capitalized to in-process construction property, plant and equipment in nine months 2001. Interest income was primarily due to the proceeds received from the issuance of common stock in private placements in 2000 that offset interest expense. Interest expense was principally incurred on borrowings under a term loan and revolving credit facility in connection with the acquisition of FMI in 1999.

An income tax benefit of \$120,000 was recorded for third quarter 2001 with an effective tax benefit rate of 36.4% compared to a tax provision of \$150,000 for third quarter 2000 with an effective tax rate of 40.6%. The principal adjustments to the statutory Federal income tax rate of 34% for third quarter 2001 relates to \$20,000 in tax credits associated with research and development expenditures and foreign sales corporation tax benefits, partially offset by a \$12,000 cost due to non-deductible amortization of goodwill.

An income tax benefit of \$110,000 was recorded for nine months 2001 with an effective tax benefit rate of 51.5% compared to a tax provision of \$30,000 for nine months 2000 with an effective tax rate of 24.2%. The principal adjustments to the statutory Federal income tax rate of 34% for nine months 2001 relates to \$60,000 in tax credits associated with research and development expenditures and foreign sales corporation tax benefits of \$15,000, partially offset by a \$38,000 cost due to non-deductible amortization of goodwill.

Net loss for the third quarter of 2001 was \$209,000 compared to net income of \$219,000 for the third quarter 2000. Net loss per share for the third quarter 2001 was \$.08 compared to net income per diluted share of \$.09 reported for the third quarter of 2000.

Net loss for the first nine months of 2001 was \$104,000, after the net effects of the first quarter 2001 reincorporation charge of \$198,000. For the first nine months of 2000, net income of \$94,000 was reported, after the net effects of the first quarter 2000 restructuring charge of \$189,000. Net loss per share for the first nine months 2001 was \$.04, after the net effects of the \$.08 per share reincorporation charge reported in the first quarter of 2001. For the first nine months of 2000, net income per diluted share of \$.04 was reported, after the net effects of the \$.09 per share restructuring charge reported in the first quarter of 2000.

The weighted average number of diluted shares outstanding increased by approximately 244,000 shares or 10% during the third quarter 2001 and approximately 445,000 shares or 20% during the first nine months 2001 compared to the same periods of the prior year, resulting from the issuance in private placements of 375,000 shares in the second quarter 2000 and 360,000 shares in the fourth quarter 2000, as well as stock option exercises during the prior year.

-13-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Capital Resources

The Company had liquid resources comprised of cash and cash equivalents

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

totaling approximately \$900,000 at the end of third quarter 2001 compared to approximately \$3,400,000 at the end of 2000. The Company's working capital was approximately \$2,600,000 and its current ratio was 1.3 at the end of third quarter 2001 compared to \$9,400,000 and 3.0, respectively, at the end of 2000.

The Company's operating activities provided negative cash flows of \$55,000 in nine months 2001 compared to \$982,000 of positive cash flows in nine months 2000. The primary positive operating cash flows resulted from a decrease in accounts receivable, an increase in other liabilities, and higher depreciation and amortization charges. These positive cash flows were offset by an increase in inventories of \$1,301,000 to \$4,929,000, which includes \$965,000 associated with Multi-Mix(R) Microtechnology products, reductions of accounts payable and deferred compensation payments, and the net loss of \$104,000.

The Company has made net investments in property, plant and equipment of \$7,391,000 during nine months 2001, which excludes unpaid invoices of \$1,674,000 at September 29, 2001, compared to net investments made in property, plant and equipment of \$2,304,000 during the nine months of 2000. These capital expenditures, which includes capitalized construction period rent and interest of \$274,000, are related to new production and test equipment capabilities in connection with the introduction of new products and enhancements to existing products. The depreciated cost of capital equipment associated with Multi-Mix(R) Microtechnology was \$9,153,000 at the end of nine months 2001, an increase of \$5,149,000 compared to \$4,004,000 at the end of 2000.

During the first nine months of 2001, the Company borrowed \$4,500,000, which includes borrowings of \$1,500,000 during the third quarter, under its existing revolving credit facility with Fleet Bank (formerly Summit Bank) at an interest rate of one-half percent below the bank's floating prime rate. On October 3, 2001, the Company obtained an increase of \$2,000,000 to the revolving credit facility for working capital and general corporate purposes. During October 2001, the Company has borrowed an additional \$1,500,000 under its increased revolving credit facility and the current interest rate is 4.5%.

The Company has been approved conditionally, subject to the completion of certain documentation, for an additional increase of \$3,500,000 in the Company's lines of credit with Fleet Bank. The Company is contemplating raising capital by a private placement of debt or equity during the fourth quarter of 2001, subject to economic and market conditions. There can be no assurances that capital from either debt or equity will be available to the Company and, if so, on terms favorable to the Company. Management believes that the remaining available \$500,000 revolving credit facility supplemented by the conditionally approved \$3,500,000 increase to its lines of credit, together with its present liquid resources and cash flows that are expected to be provided by operations, should provide sufficient resources for currently contemplated operations in fiscal year 2001.

The Company's capital expenditures for new projects and production equipment have exceeded its depreciation and amortization expenses in the first nine months of 2001 by approximately \$7,400,000. The Company has made \$5,600,000 in payments on purchase order commitments to processing equipment vendors aggregating \$8,600,000 for capital equipment and has a remaining balance on a purchase order for \$700,000 issued to a general contractor for the completion of the 19,200 square-foot building addition to its West Caldwell, New Jersey manufacturing facility. The Company anticipates that such equipment will be purchased and become operational and the building expansion will be completed during the fourth quarter of 2001. The Company has temporarily deferred certain improvements and purchases of additional equipment for the existing 52,000 square-foot facility that are projected to cost approximately \$1,300,000.

Effective January 2001, the Company modified its existing lease, and entered into a resource sharing arrangement with a previous customer, for its

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

Costa Rica manufacturing facility, reducing the size to approximately 8,200 square-feet and extending the lease to December 2004. The Company received an initial payment of \$200,000 in January 2001 under the resource sharing agreement and recovered approximately \$102,000 of costs that were deferred at December 30, 2000 in connection with such agreement.

In February 2001, the Company entered into a new five-year lease in Costa Rica for approximately 36,200 square-feet for a new Multi-Mix(R) Microtechnology manufacturing facility. It is anticipated that the leasehold improvements and capital equipment for this manufacturing facility, which is expected to cost approximately \$4,500,000, should become operational during the fourth quarter 2001.

-14-

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Recent Accounting Pronouncements

The Financial Accounting Standards Board issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," which established new accounting and reporting standards and requires that every derivative instrument (including certain derivative instruments embedded in other contracts) be recorded as assets or liabilities in the balance sheet measured at fair value. SFAS No. 133 requires that changes in the fair value of derivatives be recognized currently in earnings unless specific hedge accounting criteria are met. The Company has adopted the provisions of the Statement in 2001. The Company does not currently hold derivative instruments or engage in hedging activities and therefore the adoption of SFAS No. 133 has not had a material impact on the Company's financial position, results of operations or cash flows.

On June 30, 2001, the Financial Accounting Standards Board issued SFAS No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Other Intangible Assets". SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting and eliminates the pooling method of accounting. SFAS No. 141 will not have an impact on the Company's business since the Company has historically accounted for business combinations using the purchase method of accounting.

With the adoption of SFAS No.142, which will be adopted by the Company on December 30, 2001, goodwill will no longer be subject to amortization over its estimated useful life. However, goodwill will be subject to at least an annual assessment for impairment and more frequently if circumstances indicate a possible impairment. The Company is required to perform a fair-value-based goodwill impairment test. In addition, under SFAS No. 142, an acquired intangible asset should be separately recognized if the benefit of the intangible is obtained through contractual or other legal rights, or if the intangible asset can be sold, transferred, licensed, rented, or exchanged. Intangible assets will be amortized over their estimated useful lives. Early adoption of SFAS No. 142 is not permitted. Any write-down of goodwill would be charged to results of operations in the periods in which the recorded value of goodwill and certain intangibles is more than its fair value. On an annualized basis, the Company expects that the adoption of these accounting standards will reduce the amortization of goodwill and intangibles by approximately \$150,000

Edgar Filing: MERRIMAC INDUSTRIES INC - Form 10QSB

commencing in 2002, unless future impairment reviews result in periodic write-downs of goodwill.

Forward-Looking Statements

This Quarterly Report on Form 10-QSB contains statements relating to future results of the Company (including certain projections and business trends) that are "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those projected as a result of certain risks and uncertainties. These risks and uncertainties include, but are not limited to: general economic and industry conditions; slower than anticipated penetration into the satellite communications, defense and wireless markets; the risk that the benefits expected from the acquisition of Filtran Microcircuits Inc. are not realized; the ability to protect proprietary information and technology; competitive products and pricing pressures; the risk that the Company will not be able to continue to raise sufficient capital to expand its operations as currently contemplated by its business strategy; risks relating to governmental regulatory actions in communications and defense programs; risks associated with demand for and market acceptance of existing and newly developed products; and inventory risks due to technological innovation and product obsolescence, as well as other risks and uncertainties, including but not limited to those detailed from time to time in the Company's Securities and Exchange Commission filings. These forward-looking statements are made only as of the date hereof, and the Company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
