SAFE HARBOR STATEMENT

All statements, trend analyses and other information contained in this report relative to markets for our products and trends in our operations or financial results, as well as other statements including words such as anticipate, believe, plan, estimate, expect, intend, and other similar expressions, constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. Factors that may cause our actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities:

(a) general economic conditions and other factors, including prevailing interest rate levels and stock market performance, which may affect our ability to sell our products, the market value of our investments and the lapse rate and profitability of policies; (b) our ability to achieve anticipated levels of operational efficiencies and cost-saving initiatives and to meet cash requirements based upon projected liquidity sources; (c) customer response to new products, distribution channels and marketing initiatives; (d) mortality, morbidity, and other factors which may affect the profitability of our insurance products; (e) our ability to develop and maintain effective risk management policies and procedures and to maintain adequate reserves for future policy benefits and claims; (f) changes in the federal income tax laws and regulations which may affect the relative tax advantages of some of our products; (g) increasing competition in the sale of insurance and annuities and the recruitment of sales representatives; (h) regulatory changes or actions, including those relating to regulation of insurance products and of insurance companies; (i) our ratings and those of our subsidiaries by independent rating organizations which we believe are particularly important to the sale of our products; (j) the performance of our investment portfolios; (k) the impact of changes in standards of accounting for derivatives and business combinations, goodwill and other intangibles and purchase accounting adjustments; (l) our ability to integrate the business and operations of acquired entities; (m) expected life and annuity product margins; (n) the impact of anticipated investment transactions; and (o) unanticipated litigation or regulatory investigations.

There can be no assurance that other factors not currently anticipated by us will not materially and adversely affect our results of operations. You are cautioned not to place undue reliance on any forward-looking statements made by us or on our behalf. Forward-looking statements speak only as of the date the statement was made. We undertake no obligation to update or revise any forward-looking statement.

AMERUS GROUP CO.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

(1) CONSOLIDATION AND BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for annual financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All adjustments were of a normal recurring nature, unless otherwise noted in Management's Discussion and Analysis and the Notes to Consolidated Financial Statements. Operating results for the nine months ended September 30, 2002 are not necessarily indicative of the results that may be expected for the year ending December 31, 2002 (see further discussion in Management's Discussion and Analysis). For further information and for capitalized terms not defined in this Form 10-Q, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2001.

The accompanying consolidated financial statements include the accounts and operations of the Company and its wholly-owned subsidiaries, principally AmerUs Life Insurance Company (ALIC), AmerUs Annuity Group Co. (AAG), AmerUs Capital Management Group, Inc. (ACM), and ILICO Holdings, Inc., the holding company of Indianapolis Life Insurance Company (ILIC) and its subsidiaries (ILICO). All significant intercompany transactions and balances have been eliminated in consolidation.

Effective on March 29, 2002, Western Security Life Insurance Company, a subsidiary of ILIC, was sold. The insurance business of Western Security Life Insurance Company was transferred to ILIC prior to the sale. The sale of the corporate organization and insurance licenses resulted in a gain of approximately \$1.9 million which is included in realized gains.

The residential financing and property operations were previously for sale and were carried as discontinued operations in the consolidated financial statements. During the third quarter of 2002, it was determined the sale would not be completed. As a result, the consolidated financial statements for prior periods have been restated to reclassify the assets, liabilities, and income of the discontinued operations to the respective financial statement line items. There was no adjustment to the carrying value of the net assets of these operations, and accordingly, there was no effect on stockholders' equity or net income for the restatement.

Certain amounts in the 2001 financial statements have been reclassified to conform to the 2002 financial statement presentation.

(2) EARNINGS PER SHARE

Basic earnings per share of common stock are computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per share assumes the issuance of common shares applicable to stock options and warrants calculated using the treasury stock method. In addition, diluted earnings per share applicable to the Company's Optionally Convertible Equity-linked Accreting Notes (OCEANsSM) are determined using the if-converted method for the number of days in the period in which the common stock price conversion condition is met. No undistributed net income has been allocated to the convertible securities holders since their participation in dividends with common stockholders is established at the amount of the annual regular dividend. See further discussion of the OCEANs in note 5.

Table of Contents**(3) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES**

Effective January 1, 2001, the Company adopted Statement of Financial Accounting Standard (SFAS) No. 133 Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS 137 and SFAS 138, which requires that all derivative instruments, including certain derivative instruments embedded in other contracts, be reported on the balance sheet at fair value. Accounting for gains and losses resulting from changes in the values of derivatives is dependent upon the use of the derivative and its qualification for special hedge accounting. In accordance with the provisions of SFAS No. 133, the Company recorded a transition adjustment as of January 1, 2001 upon adoption of the standard to recognize its derivative instruments at fair value resulting in a pre-tax reduction to income of \$12.4 million (\$8.2 million after-tax) and an increase to Accumulated Other Comprehensive Income (AOCI) of \$2.7 million. The basic and diluted earnings per common share for the cumulative effect of change in accounting for derivatives amounts to \$0.23 for the nine months ended September 30, 2001. The reduction to income which is classified as a cumulative effect of change in accounting for derivatives, net of tax in the Consolidated Statements of Income, is attributable to losses on basis swaps that were natural hedges and losses on interest rate swaps reclassified from AOCI that have been redesignated as cash flow hedges of floating rate funding agreement liability effective January 1, 2001. In addition, the reduction to income includes adjustments to fair value for options being used to hedge embedded options contained within equity-indexed products. The increase in AOCI, which is classified as change in accounting for derivatives in the Consolidated Statements of Comprehensive Income, is attributable to the reclassification of the interest rate swap's fair value adjustment from AOCI to the Consolidated Statements of Income.

During the first nine months of 2002 and 2001, realized/unrealized gains (losses) on investments included an unrealized loss of \$47.8 million and \$62.5 million, respectively, from the change in fair value on call options used as a natural hedge of embedded options within equity-indexed products. Additionally, the first nine months of 2002 and 2001 included an unrealized loss of \$16.8 million and \$14.5 million, respectively, from the change in fair value on the trading securities backing the total return strategy products. Policyowner benefits included an offsetting adjustment to reduce contract liabilities for fair value changes in options embedded within the equity-indexed products and fair value changes on total return strategy products of \$41.1 million and \$62.1 million for the first nine months of 2002 and 2001, respectively. In addition, basis swaps were terminated during the first quarter of 2001 and an increase in fair value of \$1.8 million on those swaps was included in net investment income. AOCI included an unrealized gain of \$2.3 million and loss of \$2.1 million from the fair value change in interest rate swaps used to hedge the floating rate funding agreement liability during the first nine months of 2002 and 2001, respectively. The Company undesignated a cash flow hedge and is now amortizing the amount in AOCI to earnings over the remaining life of the swap, which amounted to \$2.7 million expense in the first nine months of 2002. The Company estimates that \$3.3 million of derivative losses, net of income taxes, included in AOCI will be reclassified into earnings within the next twelve months.

Table of Contents

The following table summarizes the income (loss) impact of the market value adjustments on trading securities and derivatives and the cash flow hedge amortization for the first nine months ended September 30, 2002 and 2001 (in thousands):

	For The Nine Months Ended September	
	2002	30, 2001
	(\$ in thousands)	
	(unaudited)	
Fixed maturity securities held for trading	\$ (16,792)	\$ (14,497)
Options on equity-indexed products	(47,763)	(62,538)
Equity-indexed and total return strategy liabilities	41,110	62,068
Cash flow hedge amortization	(2,659)	
Deferred policy acquisition cost amortization impact of net adjustments above	(676)	4,650
	<u>(26,780)</u>	<u>(10,317)</u>
Pre-tax total	(26,780)	(10,317)
Income taxes	9,373	3,611
	<u>(17,407)</u>	<u>(6,706)</u>
After-tax total	\$ (17,407)	\$ (6,706)

(4) CLOSED BLOCK

The Company has established two closed blocks, which we refer to as the Closed Block. The first was established on June 30, 1996 in connection with the reorganization of ALIC to a stock form. The second was established as of March 31, 2000 in connection with the reorganization of ILIC to a stock form. The operations of ILIC have been included in the consolidated financial statements of the Company since May 18, 2001. Insurance policies which had a dividend scale in effect as of each Closed Block establishment date, were included in the Closed Block. The Closed Block was designed to provide reasonable assurance to owners of insurance policies included therein that, after the reorganization of ALIC and ILIC, assets would be available to maintain the dividend scales and interest credits in effect prior to the reorganization if the experience underlying such scales and credits continues.

Summarized financial information of the Closed Block as of September 30, 2002 and December 31, 2001 and for the three months and nine months ended September 30, 2002 and 2001 are as follows:

AmerUs Capital I 8.85 % Capital Securities Series A due February 1, 2007 (C)	48,095	68,900
AmerUs Capital II 7.00 % Quarterly Income Preferred Securities due July 27, 2003	154	154
	<u>\$ 499,110</u>	<u>\$ 384,628</u>

(A) The Company has multiple credit arrangements with the Federal Home Loan Bank (FHLB). In addition to the long-term advances disclosed above, the Company is eligible to borrow under variable-rate short term fed funds arrangements of which no amount was outstanding at September 30, 2002. These borrowings are secured and interest is payable at the current rate at the time of each advance.

(B) On March 6, 2002, the Company issued \$185 million aggregate original principal amount of OCEANs. The OCEANs are senior subordinated debt and were issued and sold in an original principal

Table of Contents

amount of \$1,000 per OCEAN, with a principal amount at maturity of \$1,270 per OCEAN. The maturity date of the OCEANs is March 6, 2032. The OCEANs will have aggregate principal amount at maturity of \$234,950,000. The notes are convertible into shares of the Company's common stock at an initial conversion price (subject to adjustment) of \$37.60 per share only if the sale price of the common stock exceeds \$47.85 per share for at least 20 trading days in a 30-day trading period or in certain other limited circumstances.

Proceeds from the OCEANs were used to repay borrowings on the Company's revolving credit agreement and to purchase approximately 1.7 million shares amounting to \$59 million of the Company's common stock. The OCEANs are senior subordinated debt, subordinated in right of payment to all existing and future senior debt and senior to all existing and future junior subordinated debt.

(C) On March 26, 2002, \$20.8 million of the AmerUs Capital I 8.85% Capital Securities were repurchased which did not result in a material gain.

For an additional discussion of the terms of the above indebtedness refer to the Company's consolidated financial statements as of December 31, 2001.

(6) FEDERAL INCOME TAXES

The effective income tax rate for the three-months and nine months ending September 30, 2002 and 2001, respectively, varied from the prevailing corporate rate primarily as a result of non-deductible demutualization costs, low income housing and rehabilitation credits, and tax exempt income in 2002 and 2001 and goodwill amortization in 2001.

(7) ACQUISITIONS

On May 18, 2001, the Company completed the acquisition of ILICO for an amount of cash, policy credits and shares of the Company's common stock equal to the value of 9.3 million shares of the Company's common stock. The purchase price totaled approximately \$326 million. The acquisition was accounted for using the purchase method of accounting and accordingly the total purchase price was allocated to the assets and liabilities of ILICO based on the relative fair values as of May 18, 2001, with the excess of the purchase price over the fair value of the assets acquired less the fair value of the liabilities assumed recorded as goodwill. Goodwill was amortized over thirty years through December 31, 2001. In accordance with SFAS 142, Goodwill and Other Intangible Assets, effective January 1, 2002, goodwill is no longer amortized but instead tested for impairment on an annual basis (see note 9). The operations of ILICO have been included in the consolidated financial statements of the Company since May 18, 2001. The allocation of the purchase price of ILICO is as follows (in millions):

	(unaudited)
Investments (including cash and short-term investments)	\$ 4,674.1
Receivables and other assets	434.7
Value of business acquired	215.4
Goodwill	40.7
Separate account assets	345.6
Policyowner reserves and funds	(4,887.4)
Other liabilities	(126.1)
Debt	(25.0)
Separate account liabilities	(345.6)
	<hr/>
Total investment in ILICO	\$ 326.4
	<hr/>

Table of Contents

In June 2002, the Company acquired an Independent Marketing Organization (IMO) for cash of \$7.5 million. The total purchase price was allocated to the assets and liabilities based on the relative fair values with the excess of the purchase price over the fair value of the assets acquired less the fair value of the liabilities assumed recorded as goodwill. Goodwill amounting to \$7.2 million was established in connection with the acquisition. If certain financial targets are met during the next six years, the purchase price can be increased by up to \$3 million per year. Such purchase amounts, if any, would be recorded as additional goodwill.

(8) RESTRUCTURING CHARGES

During the third quarter of 2001, the Company began consolidating various functions in connection with a restructuring of its protection products and accumulation products operations and investment activities. The objective of the restructuring plan is to eliminate duplicative functions for all business units. The elimination of duplicative functions is intended to reduce on-going operating costs for the Company. Corporate administrative functions are being transitioned so they are performed primarily in Des Moines, Iowa. Protection products administrative processes will be transitioned so they are performed in Des Moines; Woodbury, New York; or outsourced. Accumulation products functions will be transitioned to Topeka, Kansas. Investment activities have been restructured to eliminate certain real estate management services which have been outsourced.

Restructuring charges have been included in the consolidated statement of income for the three months and nine months ended September 30, 2002. The restructuring charges for the nine months ended September 30, 2002 include pre-tax severance and termination benefits of \$5.5 million related to the elimination of approximately 90 positions and other pre-tax costs of \$5.3 million primarily related to systems conversion and relocation of employees. An accrual for severance and termination benefits not yet paid amounted to \$2.8 million at September 30, 2002.

The Company has not finalized all restructuring activities as of September 30, 2002. Additional activities will primarily involve relocation or severance benefits for affected employees, various administrative, financial, and actuarial system conversion costs and building disposition costs. Expenditures for all restructuring activities are expected to be completed by the fourth quarter of 2003.

(9) ADOPTION OF SFAS 142

SFAS 142, Goodwill and Other Intangible Assets, changes the accounting for goodwill and other intangible assets and became effective January 1, 2002. SFAS 142 adopts a nonamortization, impairment-only model for the Company's goodwill and indefinite-lived intangible assets. This includes a more stringent impairment test methodology for measuring and recognizing impairment losses. The Company accordingly discontinued amortization of goodwill on January 1, 2002. As of September 30, 2002, goodwill of \$34.2 million is in the protection products segment and \$189.3 million is in the accumulation products segment. The only intangible asset other than goodwill, is value of business acquired (VOBA) which is being amortized and amounted to a gross carrying amount of \$832.4 million and accumulated amortization of \$329.2 million at September 30, 2002. Goodwill changed from \$195.5 million at December 31, 2001 to \$223.5 million at September 30, 2002 primarily due to the adjustment of the ILICO purchase price allocation which increased goodwill approximately \$19.8 million and goodwill attributable to the acquisition of independent marketing organizations of approximately \$8.2 million. The Company has evaluated the transitional impairment analysis for goodwill and other intangible assets and determined such assets are not impaired as of January 1, 2002.

Table of Contents

A reconciliation of net income and basic and diluted earnings per share reported for the three months and nine months ended September 30, 2001 to exclude amortization expense of goodwill is as follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,

Adjusted basic earnings per share	\$ 0.67	\$ 0.58	\$ 1.38	\$ 1.69
Diluted earnings per share as reported	\$ 0.66	\$ 0.51	\$ 1.36	\$ 1.49
Goodwill amortization expense		0.06		0.18
Adjusted diluted earnings per share	\$ 0.66	\$ 0.57	\$ 1.36	\$ 1.67

(10) COMMITMENTS AND CONTINGENCIES

In recent years, the life insurance industry, including the Company and its subsidiaries, have been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is involved in litigation, including class actions, reinsurance claims and regulatory proceedings, arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to these claims and legal actions, would have no material effect on its results of operations and financial position.

Previously, the Company disclosed it was aware of a dispute between the retrocessionaire and the reinsurer of a block of annuity business written by IL Annuity and Insurance Company (IL Annuity), a subsidiary of ILICo, as well as potential claims of the Reinsurer against IL Annuity. Recently, the reinsurer informally notified the Company of its intention to arbitrate a claim. Subsequent to receiving this notice, the Company was informed that the retrocessionaire's claim for breach of contract against the reinsurer was denied. While it is not feasible to predict the outcome of any claims by the reinsurer against IL Annuity, the Company believes, based upon currently available information, that the ultimate liability, if any, with respect to these claims would not have a material adverse effect on the Company's consolidated financial position or results of operations.

(11) OPERATING SEGMENTS

The Company has two operating segments: Protection Products and Accumulation Products. Products generally distinguish a segment. A brief description of each segment follows:

Protection Products. The primary product offerings consist of whole life, interest-sensitive whole life, term life, universal life and equity-indexed life insurance policies. These products are marketed on a national basis primarily through a Preferred Producer agency system, a Personal Producing General Agent (PPGA) distribution system and IMOs.

Accumulation Products. The primary product offerings consist of individual fixed annuities marketed on a national basis primarily through independent brokers and IMOs and insurance contracts issued through funding agreements.

Table of Contents

The Company uses the same accounting policies and procedures to measure operating segment income and assets as it uses to measure its consolidated income from operations and assets with the exception of the elimination of certain items which management believes are not necessarily indicative of overall operating trends. These items are shown between adjusted pre-tax operating income and income from continuing operations on the following operating segment tables and are as follows:

- 1) Realized gains and losses on open block investments.
- 2) Market value changes and amortization of assets and liabilities associated with the application of SFAS 133, such as:
 - Unrealized gains and losses on securities held for trading.
 - Change in option value of equity-indexed products and market value adjustments on total return strategy annuities.
 - Cash flow hedge amortization.
- 3) Amortization of deferred policy acquisition costs (DAC) and VOBA related to the realized gains and losses on the open block investments and the SFAS 133 adjustments.
- 4) Demutualization costs.
- 5) Restructuring costs.
- 6) Other income from non-insurance operations.

These items will fluctuate from period to period depending on the prevailing interest rate and economic environment, are not continuing in nature, or are not part of the core insurance operations. As a result, management believes they do not reflect the Company's ongoing earnings capacity of its operating segments.

Premiums, product charges, policyowner benefits, insurance expenses, amortization of DAC and VOBA and dividends to policyowners are attributed directly to each operating segment. Net investment income and closed block realized gains and losses on investments are allocated based on directly-related assets required for transacting the business of that segment. Other revenues and benefits and expenses which are deemed not to be associated with any specific segment are grouped together in the All Other category. These items primarily consist of holding company revenues and expenses and the operations of the Company's real estate management subsidiary.

Assets are segmented based on policy liabilities directly attributable to each segment. There are no significant intersegment transactions. Depreciation and amortization, excluding amortization of DAC and VOBA as previously discussed, are not significant. There have been no material changes in segment assets since December 31, 2001.

Table of Contents**Item 2. Management's Discussion And Analysis Of Results Of Operations And Financial Condition**

The following analysis of the consolidated results of operations and financial condition of AmerUs Group Co. should be read in conjunction with the Consolidated Financial Statements and related notes.

NATURE OF OPERATIONS

We are a holding company whose subsidiaries are primarily engaged in the business of marketing, underwriting and distributing a broad range of individual life, annuity and insurance deposit products to individuals and businesses in 50 states, the District of Columbia and the U.S. Virgin Islands. We have two reportable operating segments: protection products and accumulation products. The protection products segment was formerly known as the life insurance segment and the accumulation products segment was formerly known as the annuity segment. The primary offerings of the protection products segment are whole life, interest-sensitive whole life, term life, universal life and equity-indexed life insurance policies. The primary offerings of the accumulation products segment are individual fixed annuities and funding agreements.

We acquired ILICO which had assets of approximately \$6 billion on May 18, 2001. Its operations have been included with ours since that date.

FINANCIAL HIGHLIGHTS

Our financial highlights are as follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2002	2001	2002	2001
(\$ in thousands, except per share data)				
Adjusted pre-tax operating income (A):				
Protection Products	\$ 30,127	\$ 27,246	\$ 95,394	\$ 66,725
Accumulation Products	32,314	25,323	90,800	71,321
Other	(1,742)	1,319	(4,732)	3,184
Total adjusted pre-tax operating income	\$ 60,699	\$ 53,888	\$ 181,462	\$ 141,230
Adjusted net operating income (A)	\$ 36,253	\$ 32,258	\$ 108,484	\$ 80,825
Net income	\$ 26,490	\$ 21,510	\$ 55,667	\$ 53,373
Diluted earnings per share:				
Adjusted net operating income (A)	\$ 0.91	\$ 0.77	\$ 2.66	\$ 2.26
Net income	\$ 0.66	\$ 0.51	\$ 1.36	\$ 1.49

	September 30, 2002	December 31, 2001
Total assets	\$ 19,692,545	\$ 18,299,152
Stockholders' equity (without AOCI)	\$ 1,180,790	\$ 1,225,848

(A) Adjusted operating income does not constitute net income computed in accordance with accounting principles generally accepted in the United States, or GAAP. See Adjusted Net Operating Income section for additional information.

Adjusted pre-tax operating income in both of our operating segments increased in 2002 as compared to the comparable periods in 2001. Growth in our protection products adjusted pre-tax operating

Table of Contents

income was primarily attributable to the acquisition of ILICO combined with a slight growth in product margins and a decline in operating expenses. Our accumulation products pre-tax operating income also increased due to the acquisition of ILICO, increased Independent Marketing Organizations (IMOs) operating income and the discontinuation of goodwill amortization.

Net income increased between 2001 and 2002 periods primarily as a result of the growth in our protection products and accumulation products segments. Partially offsetting this growth in earnings were increased realized losses on open block investments and increased net unrealized losses from SFAS 133 related market value adjustments on trading securities, derivatives and certain annuity contracts. See the Adjusted Net Operating Income section for a further discussion of the items included in net income but excluded from operating income.

Total assets increased \$1.4 billion during the first nine months of 2002 primarily as a result of the placement of funding agreements totaling \$750 million, growth in annuity sales which were partially offset by surrenders, and increased investment market values.

Stockholders' equity, excluding AOCI, declined \$45.1 million as a result of treasury stock purchases of \$99.9 million in the first nine months of 2002. The stock repurchases were partially offset by year-to-date net income of \$55.7 million.

ADJUSTED NET OPERATING INCOME

The following table reflects net income adjusted to eliminate certain items (net of applicable income taxes) which our management believes do not necessarily indicate overall operating trends. Adjusted net operating income is the basis we use to assess our overall performance. Adjusted net operating income as described by us may not be comparable to similarly titled measures reported by other companies, including insurance companies. The adjusted net operating income shown below does not constitute net income computed in accordance with accounting principles generally accepted in the United States, or GAAP. The adjustments are presented net of income taxes.

Table of Contents

	For The Three Months Ended September 30, 2002	For The Three Months Ended September 30, 2001	For The Nine Months Ended September 30, 2002	For The Nine Months Ended September 30, 2001
	(\$ in thousands, except per share data)			
Net Income	\$ 26,490	\$ 21,510	\$ 55,667	\$ 53,373
Open block realized (gains) losses (A)	6,825	5,085	36,400	14,579
Net amortization of DAC and VOBA due to open block realized gains (losses) (B)	(1,709)	(3,101)	(6,875)	(5,924)
Net effect of accounting differences from the adoption of SFAS 133 (C)	3,284	4,754	17,407	7,295
Demutualization costs (D)	722	249	1,186	451
Restructuring costs (E)	1,590	4,189	6,644	4,189
Other income from non-insurance operations (F)	(949)	(428)	(1,945)	(1,374)
Cumulative effect of change in accounting for derivatives (G)				8,236
Adjusted Net Operating Income	\$ 36,253	\$ 32,258	\$ 108,48	\$ 80,825
Adjusted Net Operating Income per common share:				
Basic	\$ 0.92	\$ 0.78	\$ 2.69	\$ 2.29
Diluted	\$ 0.91	\$ 0.77	\$ 2.66	\$ 2.26
Weighted average common shares outstanding:				
Basic	39,497,355	41,536,389	40,327,236	35,334,160
Diluted	39,835,426	42,060,929	40,812,121	35,825,884

- (A) Represents total open block realized gains or losses on investments. Open block realized gains or losses may vary widely between periods. Such amounts are determined by management's timing of individual transactions or current market conditions and do not necessarily correspond to the underlying operating trends.
- (B) Represents amortization of DAC and VOBA on the open block realized gains or losses that are included in our product margins.
- (C) Represents the net effect of SFAS 133, Accounting for Derivative Instruments and Hedging Activities, related accounting entries. The accounting entries consist of cash flow hedge amortization, market value adjustments on trading securities, derivatives, certain annuity contracts, and the associated change in amortization of DAC and VOBA resulting from such adjustments.
- (D) Represents costs directly related to our demutualizations. The costs consist primarily of legal, actuarial and consulting expenses.
- (E) Represents costs of restructuring our operations to eliminate duplicative functions. The costs consist primarily of relocation of employees, severance and termination benefits, and systems conversion.
- (F) Represents the net income from our residential financing and property operations which is not part of our core insurance operations.

Table of Contents

(G) Represents the cumulative effect of change in accounting for derivatives, as of January 1, 2001, resulting from our adoption of SFAS 133.

The increase in adjusted net operating income in 2002 was primarily attributable to the acquisition of ILICO which operations have been included in our consolidated financial statements since May 18, 2001 and the growth in our Protection Products and Accumulation Products segments as explained in the next two sections.

PROTECTION PRODUCTS

Our protection products segment consists of whole life, interest-sensitive whole life, term life, universal life and equity-indexed life insurance policies. These products are marketed on a national basis primarily through a Preferred Producer agency system, PPGA distribution system and IMOs. Included in protection products is the closed block of ALIC and the closed block of ILIC established when the companies reorganized to stock forms of ownership. When protection products are sold, we invest the premiums we receive in our investment portfolio and establish a liability representing our commitment to the policyholder. We manage investment spread by seeking to maximize the return on these invested assets, consistent with our asset/liability and credit quality needs. We enter into reinsurance arrangements in order to reduce the effects of mortality risk and the statutory capital strain from writing new business. All income statement line items are presented net of reinsurance amounts. Protection products in force totaled \$78.3 billion at September 30, 2002 and \$70.5 billion at December 31, 2001. A summary of our protection products segment operations follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2002	2001	2002	2001
	(\$ in thousands)			
Revenues:				
Insurance premiums	\$ 77,595	\$ 89,237	\$ 255,938	\$ 210,669
Universal life product charges	31,662	37,672	93,108	80,627
Net investment income	84,202	79,822	248,044	198,147
Closed block realized gains (losses) on investments	(1,126)	1,889	(1,880)	2,202
Other income	1,068	1,005	3,013	1,005
Total revenues	193,401	209,625	598,223	492,650
Benefits and expenses:				
Policyowner benefits	108,406	117,332	330,555	264,869
Underwriting, acquisition and other expenses	15,204	21,567	56,148	53,618
Amortization of DAC and VOBA, net of open block gain/loss adjustment	15,287	17,289	44,126	39,022
Dividends to policyowners	24,377	26,191	72,000	68,416
Total benefits and expenses	163,274	182,379	502,829	425,925
Adjusted pre-tax operating income - Protection Products segment	\$ 30,127	\$ 27,246	\$ 95,394	\$ 66,725

Adjusted pre-tax operating income from our protection products increased 11% in the third quarter of 2002 and 43% in the first nine months of 2002 compared to the respective 2001 periods. The increases were due to a slight growth in product margins and a decline in operating expenses with additional growth for the first nine months attributable to the acquisition of ILICO. The key drivers of our protection products business include sales, persistency, net investment income, mortality and expenses.

Table of Contents

Sales, Premiums and Product Charges. Annualized premium for new products issued represents sales for protection products. The following table summarizes annualized premium by life insurance product:

	Sales Activity by Product			
	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2002	2001	2002	2001
	(\$ in thousands)			
Traditional life insurance:				
Whole life	\$ 1,468	\$ 1,255	\$ 3,728	\$ 4,773
Interest-sensitive whole life	3,427	3,118	24,913	5,543
Term life	4,246	3,110	12,761	6,403
Universal life	9,914	7,519	24,639	13,220
Equity-indexed life	9,277	5,901	30,037	16,626
	<u>28,332</u>	<u>20,903</u>	<u>96,078</u>	<u>46,565</u>
Private label term life premiums	2,071	1,556	6,715	2,289
	<u>2,071</u>	<u>1,556</u>	<u>6,715</u>	<u>2,289</u>
Total	\$ 30,403	\$ 22,459	\$ 102,793	\$ 48,854

Direct first year annualized premiums increased 36% in the third quarter of 2002 compared to the same period in 2001. On a year-to-date basis the increase was 106% primarily due to the acquisition of ILICO which was acquired during the second quarter of 2001. Excluding the sales from ILICO, life insurance sales increased 40% for the year-to-date period as compared to 2001. We experienced growth in almost all our protection product lines with significant increases coming from our universal life and equity-indexed life products. The equity-indexed life product allows the policyowner to elect an earnings strategy for a portion of the account value whereby earnings are credited based on increases in the S&P 500 Index, excluding dividends. The earnings credit is subject to a participation rate and an annual cap. In the first nine months of 2002, sales of these products were \$30.0 million as compared to \$16.6 million for the same period a year ago. We are a leading writer of equity-indexed life products in the United States.

We also distribute term products of ILICO through strategic alliances with private label partners. Under private label arrangements, ILICO designs and issues products that are distributed through other life insurance companies, our private label partners. ILICO reinsures a portion of the risks on those products which we refer to as our private label sales. We have two private label partners that are actively writing new business. During the second quarter of 2002, we ceased recruiting new private label partners.

We recognize premiums on traditional life insurance policies as revenues when the premiums are due. Amounts received as payments for universal life and equity-indexed life insurance policies are not recorded as premium revenue, but are instead recorded as a policyholder liability. Revenues from the universal life and equity-indexed life policies consist of product charges for the cost of insurance, policy administration and policy surrender. All revenue is reported net of reinsurance ceded.

Insurance premium revenue and product charge revenue was lower in the third quarter of 2002 as compared to the third quarter of 2001 primarily due to reinsurance agreements in place which have decreased revenue. For the nine month period ended September 30, 2002, insurance premium and product charge revenue both increased as compared to a year ago primarily due to the acquisition of ILICO.

Table of Contents

Persistency. Annualized lapse rates were as follows:

	For The Nine Months Ended September 30,	
	2002	2001
Lapse rate:		
Including ILICO	7.52%	7.43%
Excluding ILICO	6.64%	7.54%

Our persistency experience remained within our pricing assumptions. Our lapse rate including ILICO for the first nine months of 2002 as compared to 2001 increased as expected due to the completion of ILICO's demutualization payout in July 2001. Lapses tend to decline in anticipation of a demutualization transaction as policyholders want to remain policyholders so they will be eligible for the demutualization payout. Following a demutualization, lapses tend to increase for a period before they return to a more normal level. Our 2002 lapse rate excluding ILICO decreased compared to the first nine months of 2001. We experienced higher lapse rates following the completion of a demutualization in the third quarter of 2000.

Net Investment Income. Net investment income increased both for the three month and nine month periods ending September 30, 2002 as compared to the same periods a year ago. The increase for the year-to-date period was primarily attributable to the acquisition of ILICO while the increase for the quarter-to-date period was primarily due to growth in assets, partially offset by lower effective yields as compared to 2001. The year-to-date effective yield of the investment portfolio was 7.17% compared to 7.30% a year ago.

Mortality and Benefit Expense. We experienced unfavorable mortality in the third quarter of 2002 as compared to the same period a year ago. However, due to the reinsurance arrangements we have in place for mortality, policyowner benefits actually declined between third quarter periods. On a year-to-date basis, we experienced favorable mortality, but due to the acquisition of ILICO, total benefit expense is higher than in the prior year.

Underwriting, Acquisition and Other Expenses. Expenses decreased for the third quarter of 2002 compared to the third quarter of 2001 primarily due to increased reimbursement from reinsurers of commission and expense allowances as more policies are subject to reinsurance and from expense structure changes resulting from the integration with ILICO. For the year-to-date period, decreases in commission and expense allowances from reinsurance and from expense integration were more than offset by the increase resulting from the acquisition of ILICO.

Outlook. We expect to continue to increase sales through our multiple distribution channels and to continue to shift to higher return products, in particular the equity-indexed life products. We also expect to continue to realize operating efficiencies created by the restructuring and centralization of our administrative functions.

Table of Contents**ACCUMULATION PRODUCTS**

Our accumulation products segment primary offerings consist of individual fixed annuities marketed on a national basis primarily through independent brokers and IMOs and insurance contracts issued through funding agreements. Similar to our protection products segment, we invest the deposits we receive from accumulation product sales in our investment portfolio and establish a liability representing our commitment to our policyholder. We manage investment spread by seeking to maximize the return on our invested assets consistent with our asset/liability management and credit quality needs. When appropriate, we periodically reset the interest rates credited to our policyholder liability. Accumulation products in force totaled \$11.0 billion at September 30, 2002 and \$10.7 billion at December 31, 2001. A summary of our accumulation products segment operations follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2002	2001	2002	2001
(\$ in thousands)				
Revenues:				
Immediate annuity and supplementary contract premiums	\$ 674	\$ 3,022	\$ 6,854	\$ 10,216
Annuity product charges	10,545	9,735	31,284	25,893
Net investment income	167,054	148,944	491,941	414,816
Other income	2,938	1,977	8,741	7,206
Total revenues	181,211	163,678	538,820	458,131
Benefits and expenses:				
Policyowner benefits	120,440	106,787	366,203	301,021
Underwriting, acquisition and other expenses	8,394	12,229	23,826	30,784
Amortization of DAC and VOBA, net of open block gain/loss adjustment	24,618	21,302	69,228	60,348
Total benefits and expenses	153,452	140,318	459,257	392,153
IMO Operations:				
Other income	13,583	6,883	36,221	19,790
Other expenses	9,028	4,920	24,984	14,447
Net IMO operating income	4,555	1,963	11,237	5,343
Adjusted pre-tax operating income Accumulation Products segment	\$ 32,314	\$ 25,323	\$ 90,800	\$ 71,321

Adjusted pre-tax operating income from our accumulation products operations increased 28% in the third quarter of 2002 and 27% in the first nine months of 2002 compared to the respective 2001 periods primarily due to the acquisition of ILICO in 2001, increased Independent Marketing Organizations (IMOs) operating income and the discontinuation of goodwill amortization. The drivers of profitability in our accumulation products business are sales, persistency, investment spread, expenses and IMO operations.

Table of Contents

Sales and Product Charges. Deposits we receive for annuities or funding agreements represent sales for accumulation products. The following table summarizes our accumulation products segment deposits:

	Deposits by Product			
	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2002	2001	2002	2001
(\$ in thousands)				
Annuities				
Fixed annuities:				
Deferred fixed annuities	\$311,857	\$261,033	\$ 782,248	\$ 992,024
Equity-indexed annuities	161,185	167,897	487,828	391,894
Variable annuities	1,561	12,428	6,042	16,625
Total annuities	474,603	441,358	1,276,118	1,400,543
Funding agreements	400,000		750,000	
Direct accumulation products	874,603	441,358	2,026,118	1,400,543
Reinsurance ceded	(49,593)	(66,232)	(53,975)	(170,965)
Total deposits, net of reinsurance	\$825,010	\$375,126	\$1,972,143	\$1,229,578

Direct accumulation product sales increased 98% for the third quarter of 2002 compared to the same quarter a year ago. For the nine month period ended September 30, 2002, sales increased 45%. Total annuity sales increased 8% for the quarter and decreased 9% year-to-date. The year-to-date decrease resulted from the deployment of capital to funding agreements which provide a higher return on equity.

We placed fixed rate funding agreements totaling \$400 million and \$750 million in the third quarter and first nine months of 2002, respectively. Funding agreements are insurance contracts for which we receive deposit funds and for which we agree to repay the deposit and a contractual return for the duration of the contract. Total funding agreements as of September 30, 2002 amounted to \$1 billion.

Through our acquisition of ILICO, we obtained a variable annuity product line. In the first quarter of 2002, we ceased new sales of these products, except for new policies issued as part of existing employer-sponsored qualified plan contracts. All sales were discontinued effective September 30, 2002. Our agents will be encouraged to make new sales of variable annuities through AMAL Corporation. As these sales will be through our joint venture, they will not appear in our direct sales amounts. The assets and liabilities related to the direct variable annuities are shown on the consolidated balance sheets as separate account assets and separate account liabilities.

During 2001, we had a reinsurance agreement which ceded 35% of certain fixed annuity production on a modified coinsurance basis. Fixed annuity production ceded under this agreement totaled approximately \$59.4 million and \$160.1 million in the third quarter and first nine months of 2001, respectively. In the fourth quarter of 2001, the agreement was cancelled and the previously ceded premiums were recaptured. In the third quarter of 2002, we entered into a new modified coinsurance reinsurance agreement to cede 25% of certain equity-indexed annuity products.

The deposits we receive on accumulation products are not recorded as revenue but instead as a policyholder liability. Surrender charges are recorded as revenue as an annuity product charge. Annuity product charges increased in 2002 as compared to 2001 due to the growth in business and the acquisition of ILICO.

Persistency. Withdrawals represent funds taken out of accumulation products by policyowners not including those due to the death of policyowners. Annuity withdrawal rates both with and without internal replacements continued to improve in 2002. Annuity withdrawals and annualized annuity withdrawal rates were as follows:

Table of Contents

	For The Nine Months Ended September 30,	
	2002	2001
Annuity withdrawal rates:		
Withdrawals including internal replacements:		
Including ILICO	11.62%	14.36%
Excluding ILICO	7.91%	12.75%
Withdrawals excluding internal replacements:		
Including ILICO	11.09%	12.74%
Excluding ILICO	7.16%	10.37%
Annuity withdrawals (\$ in millions):		
Including ILICO	\$ 1,224.9	\$ 896.8
Excluding ILICO	\$ 673.2	\$ 689.1

Our withdrawal experience remained within our pricing assumptions. Withdrawal rates declined for the first nine months of 2002 as compared to 2001 as our annuity products provide a favorable investment return in this current low interest rate and declining equity market environment.

Investment Spread. Investment results and interest crediting rates were as follows for deferred fixed annuities:

	For The Nine Months Ended September 30,	
	2002	2001
Investment yield	6.71%	7.10%
Average crediting rate	4.66%	5.07%
Investment spread	2.05%	2.03%

The investment spread on deferred fixed annuities increased 2 basis points to 205 basis points in the first nine months of 2002 compared to the first nine months of 2001. Crediting rates were lowered in the fourth quarter of 2001 and in the first three quarters of 2002 to correspond with the decline in investment yields caused by lower rates on new and reinvested funds. At September 30, 2002, the account value of deferred fixed annuities totaled \$6.8 billion of which \$0.9 billion did not have a differential between the credited rate and minimum guarantee rate and could not be lowered. Additionally, deferred fixed annuities with account values totaling \$1.4 billion have multi-year interest rate guarantees for which the credited rate cannot currently be decreased until the end of the multi-year period. At the end of the multi-year guarantee period, the difference between the guaranteed rate and the minimum guaranteed rate will be more than 200 basis points. Also, at September 30, 2002, account values of equity-indexed annuities totaled \$3.4 billion which provide guaranteed rates based on a cumulative floor over the term of the product.

Underwriting, Acquisition and Other Expenses. Expenses decreased for the third quarter of 2002 compared to the third quarter of 2001 primarily due to goodwill no longer being amortized effective

Table of Contents

January 1, 2002 with the adoption of SFAS 142. Goodwill amortization amounted to \$2.5 million in the third quarter of 2001 and \$6.3 million in the first nine months of 2001.

IMO Operations. We own five IMOs. These IMOs have contractual arrangements to promote our insurance products to their networks of agents and brokers. Additionally, they also contract with third party insurance companies. The income from IMO operations primarily represents annuity commissions received by our IMOs from those third party insurance companies. Net IMO operating income increased \$2.6 million in the third quarter of 2002 and \$5.9 million in the first nine months of 2002 compared to the respective 2001 periods due to our acquisition of an IMO in the second quarter of 2002.

Outlook. We anticipate continued increased product sales from our IMOs and multiple distribution channels and a continuing shift of our product mix to higher return products, in particular the equity-indexed annuity products. We also expect to continue to manage our spreads in order to achieve our desired profitability.

OTHER

The other segment primarily consists of holding company revenues and expenses and operations of our real estate management subsidiary. The adjusted pre-tax operating loss in 2002 as compared to the adjusted pre-tax operating income in 2001 is primarily due to the decline in investment fee income for asset management services provided to ILICO prior to the acquisition amounting to \$2.8 million in the first nine months of 2001. After the acquisition of ILICO, such fees are eliminated with expenses in consolidation. In addition, real estate investment and management fee income has declined as we reduce these investment holdings.

Table of Contents**INCOME STATEMENT RECONCILIATION**

A reconciliation of our adjusted pre-tax operating income by segment to net income as shown in our consolidated statements of income follows:

	For The Three Months Ended September 30,		For The Nine Months Ended September 30,	
	2002	2001	2002	2001
(\$ in thousands)				
Adjusted pre-tax operating income:				
Protection Products	\$ 30,127	\$ 27,246	\$ 95,394	\$ 66,725
Accumulation Products	32,314	25,323	90,800	71,321
Other operations	(1,742)	1,319	(4,732)	3,184
Total adjusted pre-tax operating income	60,699	53,888	181,462	141,230
Non-operating increases (decreases) to income:				
Realized and unrealized gains (losses) on assets and liabilities:				
Realized gains (losses) on open block investments	(10,506)	(8,161)	(56,139)	(22,825)
Unrealized gains (losses) on open block options and trading investments	(10,319)	(39,030)	(64,555)	(76,686)
Fair value change in option value of equity-indexed annuity products and market value adjustments on total return strategy annuities	5,242	29,559	41,110	62,068
Cash flow hedge amortization	(1,961)		(2,659)	
Amortization of DAC & VOBA due to open block realized gains (losses)	4,616	7,321	9,902	12,858
Non-recurring expenses:				
Demutualization costs	(722)	(249)	(1,186)	(451)
Restructuring costs	(2,569)	(6,527)	(10,780)	(6,527)
Other income from non-insurance operations	2,272	428	3,268	1,374
Income from continuing operations	46,752	37,229	100,423	111,041
Interest (expense)	(6,414)	(5,974)	(18,778)	(20,716)
Income tax (expense)	(13,848)	(9,745)	(25,978)	(28,716)
Net income from continuing operations	26,490	21,510	55,667	61,609
Cumulative effect of change in accounting for derivatives, net of tax				(8,236)
Net income	\$ 26,490	\$ 21,510	\$ 55,667	\$ 53,373

Realized and Unrealized Losses on Assets and Liabilities. Realized losses on open block investments in the first nine months of 2002 consisted primarily of realized losses and writedowns on investments related to WorldCom, Inc. and its related entities. The level of realized gains and losses will fluctuate from period to period depending on the prevailing interest rate, the economic environment and the timing of investment sales.

Unrealized losses on open block trading investments are generated from our options and trading securities. We use options to hedge our equity-indexed products. In accordance with SFAS 133, we adjusted our options to market value, which, due to the economic environment and deteriorating stock market conditions, resulted in an unrealized loss of \$13.0 million and \$47.8 million in the third quarter and first nine months of 2002, respectively, and \$28.4 million and \$62.2 million in the third quarter and first nine months of 2001, respectively. In addition, we also have trading securities that back our total return strategy fixed annuity products. The market value adjustment on the trading securities resulted in a gain of \$2.7 million and a loss of \$16.8 million in the third quarter and first nine months of 2002, respectively, and a loss of \$10.6 million and \$14.5 million for the third quarter and first nine months of 2001, respectively. Most of the unrealized gains and losses on the options and

Edgar Filing: AMERUS GROUP CO/IA - Form 10-Q

trading securities are offset by similar adjustments to the option portion of the equity-indexed product reserves and to the total return strategy annuity reserves. The reserve adjustments are reflected in policyowner benefits expense in the consolidated statements of income and are explained in the following paragraph.

The fair value change in options embedded within our equity-indexed products and the fair value changes on our total return strategy fixed annuity contracts are being recorded in accordance with SFAS No. 133, which we adopted January 1, 2001. As previously discussed, these fair value changes are offset

Table of Contents

by similar adjustments to unrealized gains (losses) on investments related to the fair value changes on the options that hedge the equity-indexed products and on the trading securities that back the total return strategy products. The reduction in such annuity contract expense is less than the decline in investment income primarily due to minimum guaranteed interest rates.

Non-recurring Expenses. Restructuring costs relate to our consolidation of various functions in connection with a restructuring of our protection products and accumulation products operations and investment activities which began in the third quarter of 2001. The objective of the restructuring plan is to eliminate duplicative functions for all business units and to reduce on-going operating costs. Corporate administrative functions are being transitioned so they are performed primarily in Des Moines, Iowa. Protection products administration processes were previously planned to be performed in Indianapolis, Indiana; Des Moines; or Woodbury, New York; however, it has now been determined that these processes will be transitioned so they are performed in Des Moines, Woodbury, or outsourced. This will result in the elimination of additional positions in Indianapolis. Accumulation products functions are being transitioned to Topeka. Investment activities have been restructured to eliminate certain real estate management services which have been outsourced.

The restructuring charges expensed in the third quarter of 2002 included pre-tax severance and termination benefits of \$0.2 million related to the elimination of approximately 5 positions and other pre-tax costs of \$2.4 million primarily related to systems conversion and relocation of employees. For the first nine months of 2002, restructuring charges included pre-tax severance and termination benefits of \$5.5 related to the elimination of approximately 90 positions and other pre-tax costs of \$5.3 million. An accrual for severance and termination benefits not yet paid amounted to \$2.8 million at September 30, 2002. Additional charges will be incurred for continuing restructuring activities primarily involving severance or relocation benefits for affected employees, various administrative, financial and actuarial system conversion costs, and building disposition costs. System conversion costs will be expensed as incurred and are expected to be substantially completed by the fourth quarter of 2003. A majority of the severance costs due to the transition of the protection products processes from Indianapolis to Des Moines, Woodbury or to be outsourced will be accrued in the fourth quarter of 2002.

Liquidity And Capital Resources

AmerUs Group Co.

As a holding company, AmerUs Group Co.'s cash flows from operations consist of dividends from subsidiaries, if declared and paid, interest from income on loans and advances to subsidiaries (including a surplus note issued to us by ALIC), investment income on our assets and fees which we charge our subsidiaries, offset by the expenses incurred for debt service, salaries and other expenses.

We intend to rely primarily on dividends and interest income from our insurance subsidiaries in order to make dividend payments to our shareholders. The payment of dividends by our insurance subsidiaries is regulated under various state laws. Generally, under the various state statutes, our insurance subsidiaries dividends may be paid only from the earned surplus arising from their respective businesses and must receive the prior approval of the respective state regulator to pay any dividend that would exceed certain statutory limitations. The current statutes generally limit any dividend, together with dividends paid out within the preceding 12 months, to the greater of (i) 10% of the respective company's policyowners' statutory surplus as of the preceding year end or (ii) the statutory net gain from operations for the previous calendar year. Generally, the various state laws give the state regulators discretion to approve or disapprove requests for dividends in excess of these limits. Based on these limitations and 2001 results, our life insurance subsidiaries could pay us an estimated \$80.5 million in dividends in 2002 without obtaining regulatory approval. Our subsidiaries paid us \$10 million in the first nine months of 2002. Prior to making dividends from the insurance subsidiaries, we also consider risk-based capital levels, capital and liquidity operating needs, and other factors.

Table of Contents

We have a \$175 million revolving credit facility with a syndicate of lenders (which we refer to as the Revolving Credit Agreement). As of September 30, 2002, there was a \$101 million outstanding loan balance under the facility. The Revolving Credit Agreement provides for typical events of default and covenants with respect to the conduct of business and requires the maintenance of various financial levels and ratios. Among other covenants, we (a) cannot have a leverage ratio greater than 0.35:1.0, (b) cannot have an interest coverage ratio less than 2.50:1.0, (c) are prohibited from paying cash dividends on common stock in excess of an amount equal to 3% of consolidated net worth as of the last day of the preceding fiscal year, and (d) must cause our insurance subsidiaries to maintain certain levels of risk-based capital.

On March 6, 2002, we issued and sold in a private placement \$185 million aggregate original principal amount of OCEANs. The OCEANs are senior subordinated debt and were issued and sold in an original principal amount of \$1,000 per OCEAN, with a principal amount at maturity of \$1,270 per OCEAN. The maturity date of the OCEANs is March 6, 2032. The OCEANs will have aggregate principal amount at maturity of \$235 million. The notes are convertible into shares of AmerUs Group Co. s common stock at an initial conversion price (subject to adjustment) of \$37.60 per share only if the sale price of the common stock exceeds \$47.85 per share for at least 20 trading days in a 30-day trading period or in certain other limited circumstances.

Proceeds from the OCEANs were used to repay borrowings on the Revolving Credit Agreement and to purchase approximately 1.7 million shares amounting to \$59 million of AmerUs Group Co. s common stock. The OCEANs are senior subordinated debt, subordinated in right of payment to all existing and future senior debt and senior to all existing and future junior subordinated debt.

Our Board of Directors approved a stock purchase program effective August 9, 2002, under which we may purchase up to three million shares of our common stock at such times and under such conditions, as we deem advisable. The purchases may be made in the open market or by such other means as we determine to be appropriate, including privately negotiated purchases. The purchase program supercedes all prior purchase programs. We plan to fund the purchase program from a combination of our internal sources, dividends from insurance subsidiaries and Revolving Credit Agreement. We have repurchased shares in the first six months of 2002 under prior purchase programs. During the first six months of 2002, 2.5 million shares were repurchased and were primarily funded by approximately \$59 million from the OCEANs offering and approximately \$30 million from the Revolving Credit Agreement. During the third quarter of 2002, approximately 0.7 million shares were repurchased and were primarily funded by approximately \$23 million from the Revolving Credit Agreement.

Insurance Subsidiaries

The cash flows of our insurance subsidiaries consist primarily of premium income, deposits to policyowner account balances, income from investments, sales, maturities and calls of investments and repayments of investment principal. Cash outflows are primarily related to withdrawals of policyowner account balances, investment purchases, payment of policy acquisition costs, payment of policyowner benefits, payment of debt, income taxes and current operating expenses. Insurance companies generally produce a positive cash flow from operations, as measured by the amount by which cash flows are adequate to meet benefit obligations to policyowners and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future policy benefit payments and for writing new business.

Management anticipates that funds to meet short-term and long-term capital expenditures, cash dividends to shareholders and operating cash needs will come from existing capital and internally generated funds. Management believes that the current level of cash and available-for-sale and short-term

Table of Contents

securities, combined with expected net cash inflows from operations, maturities of fixed maturity investments, principal payments on mortgage-backed securities and its insurance products, will be adequate to meet the anticipated short-term cash obligations of the life insurance subsidiaries.

Matching the investment portfolio maturities to the cash flow demands of the type of insurance being provided is an important consideration for each type of life insurance and annuity products. We continuously monitor benefits and surrenders to provide projections of future cash requirements. As part of this monitoring process, we perform cash flow testing of assets and liabilities under various scenarios to evaluate the adequacy of reserves. In developing our investment strategy, we establish a level of cash and securities which, combined with expected net cash inflows from operations, maturities of fixed maturity investments and principal payments on mortgage-backed securities, are believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations. There can be no assurance that future experience regarding benefits and surrenders will be similar to historic experience since withdrawal and surrender levels are influenced by such factors as the interest rate environment and general economic conditions and the claims-paying and financial strength ratings of the insurance subsidiaries.

We take into account asset/liability management considerations in the product development and design process. Contract terms for the interest-sensitive products include surrender and withdrawal provisions which mitigate the risk of losses due to early withdrawals. These provisions generally do one or more of the following: limit the amount of penalty-free withdrawals, limit the circumstances under which withdrawals are permitted, or assess a surrender charge or market value adjustment relating to the underlying assets. The following table summarizes liabilities for interest-sensitive life products and annuities by their contractual withdrawal provisions at September 30, 2002 (including liabilities in the closed blocks and the general account):

	(\$ in millions)
Not subject to discretionary withdrawal	\$ 491.4
Subject to discretionary withdrawal with adjustments:	
Specified surrender charges (A)	7,371.0
Market value adjustments	2,976.5
	<hr/>
Subtotal	10,347.5
	<hr/>
Subject to discretionary withdrawal without adjustments	1,887.4
	<hr/>
Total	\$ 12,726.3
	<hr/>

(A) Includes \$1,243.4 million of statutory liabilities with a contractual surrender charge of less than five percent of the account balance.

In addition to the interest-sensitive products, an insurance subsidiary is party to a \$250 million fixed rate funding agreement. Under the agreement, a five-year floating rate insurance contract was issued to a commercial paper conduit which was swapped to a fixed-rate. During the first nine months of 2002, our insurance subsidiaries placed additional funding agreements totaling \$750 million in six to ten year fixed rate insurance contracts. The assets backing the funding agreements are legally segregated and are not subject to claims that arise out of any other business of the insurance subsidiaries. The funding agreements are further backed by the general

Table of Contents

account assets of the insurance subsidiaries. The segregated assets and liabilities are included with general account assets in the financial statements. The funding agreements may not be cancelled unless there is a default under the agreement, but the insurance subsidiaries may terminate the agreement at any time.

In addition, there are variable separate account assets and liabilities representing funds that are separately administered, principally for variable annuity contracts, and for which the contractholder bears the investment risk. Separate account assets and liabilities are reported at fair value and amounted to \$233.6 million at September 30, 2002. Separate account contractholders have no claim against the assets of the general account. The operations of the separate accounts are not included in the accompanying consolidated financial statements.

Through their respective memberships in the Federal Home Loan Banks (FHLB) of Des Moines and Topeka, ALIC and American Investors Life Insurance Company, Inc. are eligible to borrow under variable-rate short term fed funds arrangements to provide additional liquidity. These borrowings are secured and interest is payable at the current rate at the time of each advance. There were no borrowings under these arrangements outstanding at September 30, 2002. In addition, ALIC has long-term fixed rate advances from FHLB outstanding of \$14.0 million at September 30, 2002.

The insurance subsidiaries may also obtain liquidity through sales of investments. The investment portfolio as of September 30, 2002 had a carrying value of \$16.4 billion, including closed block investments.

The level of capital in the insurance companies is regulated by risk-based capital formulas and is monitored by rating agencies. In order to maintain appropriate capital levels, it may be necessary from time to time for AmerUs Group Co. to provide additional capital to the insurance companies.

At September 30, 2002, the statutory surplus of the insurance subsidiaries was approximately \$650 million. Management believes that each life insurance company has statutory capital which provides adequate risk based capital that exceeds required levels.

In the future, in addition to cash flows from operations and borrowing capacity, the insurance subsidiaries may obtain their required capital from AmerUs Group Co.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The main objectives in managing our investment portfolios and our insurance subsidiaries are to maximize investment income and total investment returns while minimizing credit and asset/liability risks in order to provide maximum support to the insurance underwriting operations. Investment strategies are developed based on many factors including asset liability management, regulatory requirements, fluctuations in interest rates and consideration of other market risks. Investment decisions are centrally managed by investment professionals based on guidelines established by management and approved by the boards of directors.

Market risk represents the potential for loss due to adverse changes in the fair value of financial instruments. The market risks related to our financial instruments primarily relate to the investment portfolio, which exposes us to risks related to interest rates and, to a lesser extent, credit quality and prepayment variation. Analytical tools and monitoring systems are in place to assess each of these elements of market risk.

Interest rate risk is the price sensitivity of a fixed income security to changes in interest rates. Management views these potential changes in price within the overall context of asset and liability management. Actuarial professionals estimate the payout pattern of our liabilities, primarily surrenders

Table of Contents

and lapses, to determine duration, which is the present value of the fixed income investment portfolios after consideration of the duration of these liabilities and other factors, which management believes mitigates the overall effect of interest rate risk.

For variable and equity-indexed products, profitability on the portion of the policyholder's account balance invested in the fixed general account option, if any, is also affected by the spreads between interest yields on investments and rates credited to the policies. For the variable products, the policyholder assumes essentially all the investment earnings risk for the portion of the account balance invested in the separate accounts. For the equity-indexed products, we purchase call options that are designed to match the return owed to contract holders who elect to participate in one or more market indices. Profitability on the portion of the equity-indexed products tied to market indices is significantly impacted by the spread on interest earned on investments and the sum of (1) the cost of underlying call options purchased to match the returns owed to contract holders and (2) the minimum interest guarantees owed to the contract holder, if any. Profitability on the equity-indexed products is also impacted by changes in the fair value of the embedded option which provides the contract holder the right to participate in market index returns after the next anniversary date of the contract. This impacts profitability as we only purchase one-year call options to fund the returns owed to the contract holders at the inception of each contract year. This practice matches with the contract holders' rights to switch to different indices on each anniversary date. The value of the forward starting options embedded in the equity-indexed products can fluctuate with changes in assumptions as to future volatility of the market indices, risk free interest rates, market returns and the lives of the contracts.

The table below provides information about our fixed maturity investments and mortgage loans for both our trading and other than trading portfolios at September 30, 2002. The table presents cash flows of principal amounts and related weighted average interest rates by expected maturity dates. The cash flows are based on the earlier of the call date or the maturity date or, for mortgage-backed securities, expected payment patterns. Actual cash flows could differ from the expected amounts.

September 30, 2002									
Amortized Cost	Expected Cash Flows							Cost	Fair Value
	3 months 2002	2003	2004	2005	2006	2007	Thereafter		
(\$ in millions)									
Fixed maturity securities available-for-sale	\$ 354	\$ 1,454	\$ 1,231	\$ 1,255	\$ 1,051	\$ 1,148	\$ 5,883	\$ 12,376	\$ 12,809
Average interest rate	6.4%	6.2%	6.0%	6.8%	6.6%	6.7%	6.7%		
Fixed maturity securities held for trading purposes	\$ 57	\$ 109	\$ 235	\$ 273	\$ 156	\$ 137	\$ 890	\$ 1,857	\$ 1,857
Average interest rate	2.9%	5.2%	3.9%	3.0%	3.5%	3.3%	5.1%		
Mortgage loans	\$ 12	\$ 53	\$ 68	\$ 67	\$ 66	\$ 64	\$ 590	\$ 920	\$ 1,019
Average interest rate	7.8%	8.1%	8.1%	8.0%	8.0%	7.9%	7.8%		
Total	\$423	\$1,616	\$1,534	\$1,595	\$1,273	\$1,349	\$7,363	\$15,153	\$15,685

In accordance with our strategy of minimizing credit quality risk, we consistently invest in high quality marketable securities. Fixed maturity securities are comprised of U.S. Treasury, government agency, mortgage-backed and corporate securities. Approximately 68% of fixed maturity securities are issued by the U.S. Treasury or U.S. government agencies or are rated A or better by Moody's, Standard and Poor's, or the NAIC. Less than 7% of the bond portfolio is below investment grade. Fixed maturity securities have an average maturity of approximately 6.89 years.

Table of Contents

Prepayment risk refers to the changes in prepayment patterns that can either shorten or lengthen the expected timing of the principal repayments and thus the average life and the effective yield of a security. Such risk exists primarily within the portfolio of mortgage-backed securities. Management monitors such risk regularly. We invest primarily in those classes of mortgage-backed securities that are less subject to prepayment risk.

Our use of derivatives is generally limited to hedging purposes and has principally consisted of using interest rate swaps and options. These instruments, viewed separately, subject us to varying degrees of market and credit risk. However when used for hedging, the expectation is that these instruments would reduce overall market risk. Credit risk arises from the possibility that counterparties may fail to perform under the terms of the contracts.

Equity price risk is the potential loss arising from changes in the value of equity securities. In general, equities have more year-to-year price variability than intermediate term grade bonds. However, returns over longer time frames have been consistently higher. Our equity securities are readily marketable.

All of the above risks are monitored on an ongoing basis. A combination of in-house systems and proprietary models and externally licensed software are used to analyze individual securities as well as each portfolio. These tools provide the portfolio managers with information to assist them in the evaluation of the market risks of the portfolio.

Item 4. Controls and Procedures

(a) Based upon their evaluation within 90 days prior to the filing date of this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as defined in Rule 13a-14(c) under the Securities Exchange Act of 1934, as amended, are effective for recording, processing, summarizing and reporting the information we are required to disclose in our reports filed under such act.

(b) There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation referred to above.

Table of Contents

PART II OTHER INFORMATION

Item 1 Legal Proceedings

In recent years, the life insurance industry, including the Company and its subsidiaries, have been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is involved in litigation, including class actions, reinsurance claims and regulatory proceedings, arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive damages. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to these claims and legal actions, would have no material effect on its results of operations and financial position.

Previously, the Company disclosed it was aware of a dispute between the retrocessionaire and the reinsurer of a block of annuity business written by IL Annuity and Insurance Company (IL Annuity), a subsidiary of ILICo, as well as potential claims of the Reinsurer against IL Annuity. Recently, the reinsurer informally notified the Company of its intention to arbitrate a claim. Subsequent to receiving this notice, the Company was informed that the retrocessionaire's claim for breach of contract against the reinsurer was denied. While it is not feasible to predict the outcome of any claims by the reinsurer against IL Annuity, the Company believes, based upon currently available information, that the ultimate liability, if any, with respect to these claims would not have a material adverse effect on the Company's consolidated financial position or results of operations.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

A list of exhibits included as part of this report is set forth in the Exhibit Index which immediately precedes such exhibits and is hereby incorporated by reference herein.

(b) The following reports on Form 8-K were filed during the quarter ended September 30, 2002:

Form 8-K dated August 6, 2002 announcing the release of second quarter 2002 earnings. Supplemental financial information of AmerUs Group Co. was attached.

Form 8-K dated August 12, 2002 providing Chief Executive Officer and Chief Financial Officer certifications pursuant to Section 1350 of Chapter 63 of Title 18 of the United States Code.
