ACI WORLDWIDE, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

47-0772104

(I.R.S. Employer
Identification No.)

120 Broadway, Suite 3350

New York, New York 10271

(Address of principal executive offices,
including zip code)

(646) 348-6700

(Registrant's telephone number,
including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer" and "large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☐

As of May 7, 2009, there were 35,027,057 shares of the registrant's common stock outstanding.

ACI WORLDWIDE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited and in thousands)

1. Consolidated Financial Statements

The unaudited consolidated financial statements include the accounts of ACI Worldwide, Inc. (the Company) and its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated. The consolidated financial statements at March 31, 2009, and for the three months ended March 31, 2009 and 2008, are unaudited and reflect all adjustments of a normal recurring nature, except as otherwise disclosed herein, which are, in the opinion of management, necessary for a fair presentation, in all material respects, of the financial position and operating results for the interim periods.

The consolidated financial statements contained herein should be read in conjunction with the consolidated financial statements and notes thereto, together with management's discussion and analysis of financial condition and results of operations, contained in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2008, filed March 4, 2009.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Lease Termination

During the three months ended March 31, 2008, the Company terminated the lease for one of its facilities in Watford, England. Under the terms of the termination agreement, the Company paid a termination fee of approximately \$0.9 million that was recorded in general and administrative expenses in the accompanying consolidated statements of operations for the three months ended March 31, 2008. Further under the termination agreement, the Company was relieved of its contractual obligations with respect to the restoration of facilities back to their original condition. As a result, the Company recognized a gain of approximately \$1.0 million related to the relief from this liability, which is also recorded in general and administrative expenses in the accompanying consolidated statements of operations. At March 31, 2009 and December 31, 2008, the Company had contractual obligations with respect to the restoration of other leased facilities of \$1.5 million and \$1.3 million, respectively, recorded in other liabilities in the accompanying consolidated balance sheets.

Recently Issued Accounting Standards

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141(R), *Business Combinations* (SFAS 141(R)), which replaces SFAS 141. The Company adopted SFAS 141(R) as of January 1, 2009 and will assess the impact if and when a future acquisition occurs.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* (SFAS 160). The Company adopted SFAS 160 as of January 1, 2009 and there was no impact on its consolidated financial statements as the Company's non-controlling interests were not material.

On March 19, 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, (SFAS 161). SFAS 161 amends FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, (SFAS 133) and was issued in response to concerns and criticisms about the lack of adequate disclosure of derivative instruments and hedging activities. The Company adopted SFAS 161 as of January 1, 2009 and there was no impact on its consolidated financial statements.

In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). The Company adopted this standard as of January 1, 2009 and it did not have a material impact on the Company's consolidated financial statements.

Table of Contents

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FSP provides additional guidance for estimating fair value in accordance with SFAS No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. The Company does not expect the adoption of this FSP to have a material effect on the consolidated financial statements.

Reclassification

During the three months ended March 31, 2009, the Company refined the definition of its cost of software licenses fees in order to better conform to industry practice. The Company's definition of cost of software license fee has been revised to be third-party software royalties as well as the amortization of purchased technology. Previously, cost of software license fees also included certain costs associated with maintaining software products that have already been developed and directing future product development efforts. These costs included human resource costs and other incidental costs related to product management, documentation, publications and education. These costs have now been reclassified to research and development and cost of maintenance and services. As a result of this change in definition of cost of software license fees, the Company reclassified \$0.7 million and \$8.2 million to cost of maintenance and services and research and development, respectively, from cost of software license fees in the accompanying consolidated statement of operations for the three months ended March 31, 2008.

Also for the quarter ended March 31, 2009, the Company reclassified depreciation and amortization expense, excluding amortization of purchased technology as a separate line item in the consolidated statements of operations. Previously, depreciation and amortization was allocated to functional line items of the consolidated statement of operations rather than being reported as a separate line item. As a result of disclosing depreciation and amortization as a separate line item, the Company reclassified \$1.0 million from cost of software licenses fees, \$1.4 million from cost of maintenance and services, \$0.1 million from research and development, \$0.1 million from selling and marketing, and \$1.5 million from general and administrative for the three months ended March 31, 2008.

These reclassifications have been made to prior periods to conform to the current period presentation. These reclassifications did not impact total expenses or net loss for the prior period presented.

2. Revenue Recognition, Accrued Receivables and Deferred Revenue

Software License Fees. The Company recognizes software license fee revenue in accordance with American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 97-2, *Software Revenue Recognition* (SOP 97-2), SOP 98-9, Modification of SOP 97-2, *Software Revenue Recognition With Respect to Certain Transactions* (SOP 98-9), and Securities and Exchange Commission (SEC) Staff Accounting Bulletin (SAB) 101, *Revenue Recognition in Financial Statements*, as codified by SAB 104, *Revenue Recognition*. For software license arrangements for which services rendered are not considered essential to the functionality of the software, the Company recognizes revenue upon delivery, provided (i) there is persuasive evidence of an arrangement, (ii) collection of the fee is considered probable and (iii) the fee is fixed or determinable. In most arrangements, vendor-specific objective evidence (VSOE) of fair value does not exist for the license element; therefore, the Company uses the residual method under SOP 98-9 to determine the amount of revenue to be allocated to the license element. Under SOP 98-9, the fair value of all undelivered elements, such as post contract customer support (maintenance or PCS) or other products or services, is deferred and subsequently recognized as the products are delivered or the services are performed, with the residual difference between the total arrangement fee and revenues allocated to undelivered elements being allocated to the delivered element.

When a software license arrangement includes services to provide significant modification or customization of software, those services are not separable from the software and are accounted for in accordance with Accounting Research Bulletin (ARB) No. 45, *Long-Term Construction-Type Contracts* (ARB No. 45), and the relevant guidance provided by SOP 81-1, *Accounting for Performance of Construction-Type and Certain Production-Type Contracts*

(SOP 81-1). Accounting for services delivered over time (generally in excess of twelve months) under ARB No. 45 and SOP 81-1 is referred to as contract accounting. Under contract accounting, the Company generally uses the percentage-of-completion method. Under the percentage-of-completion method, the Company records revenue for the software license fee and services over the development and implementation period, with the percentage of completion generally measured by the percentage of labor hours incurred to-date to estimated total

Table of Contents

labor hours for each contract. For those contracts subject to percentage-of-completion contract accounting, estimates of total revenue and profitability under the contract consider amounts due under extended payment terms. In certain cases, the Company provides its customers with extended payment terms whereby payment is deferred beyond when the services are rendered. In other projects, the Company provides its customer with extended payment terms that are refundable in the event certain milestones are not achieved or the project scope changes. The Company excludes revenues due on extended payment terms from its current percentage-of-completion computation until such time that collection of the fees becomes probable. In the event project profitability is assured and estimable within a range, percentage-of-completion revenue recognition is computed using the lowest level of profitability in the range. If the range of profitability is not estimable but some level of profit is assured, revenues are recognized to the extent direct and incremental costs are incurred until such time that project profitability can be estimated. In the event some level of profitability cannot be reasonably assured, completed-contract accounting is applied. If it is determined that a loss will result from the performance of a contract, the entire amount of the loss is recognized in the period in which it is determined that a loss will result.

For software license arrangements in which a significant portion of the fee is due more than 12 months after delivery or when payment terms are significantly beyond the Company's standard business practice, the software license fee is deemed not to be fixed or determinable. For software license arrangements in which the fee is not considered fixed or determinable, the software license fee is recognized as revenue as payments become due and payable, provided all other conditions for revenue recognition have been met. For software license arrangements in which the Company has concluded that collection of the fees is not probable, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met. In making the determination of collectibility, the Company considers the creditworthiness of the customer, economic conditions in the customer's industry and geographic location, and general economic conditions.

SOP 97-2 requires the seller of software that includes PCS to establish VSOE of fair value of the undelivered element of the contract in order to account separately for the PCS revenue. The Company establishes VSOE of the fair value of PCS by reference to stated renewals with consistent pricing of PCS, expressed in either dollar or percentage terms. The Company considers factors such as whether the period of the initial PCS term is relatively long when compared to the term of the software license or whether the PCS renewal rate is significantly below the Company's normal pricing practices.

In the absence of customer-specific acceptance provisions, software license arrangements generally grant customers a right of refund or replacement only if the licensed software does not perform in accordance with its published specifications. If the Company's product history supports an assessment by management that the likelihood of non-acceptance is remote, the Company recognizes revenue when all other criteria of revenue recognition are met. For those software license arrangements that include customer-specific acceptance provisions, such provisions are generally presumed to be substantive and the Company does not recognize revenue until the earlier of the receipt of a written customer acceptance, objective demonstration that the delivered product meets the customer-specific acceptance criteria or the expiration of the acceptance period. The Company also defers the recognition of revenue on transactions involving less-established or newly released software products that do not have a history of successful implementation. The Company recognizes revenues on such arrangements upon the earlier of receipt of written acceptance or the first production use of the software by the customer.

For software license arrangements in which the Company acts as a sales agent for another company's products, revenues are recorded on a net basis. These include arrangements in which the Company does not take title to the products, is not responsible for providing the product or service, earns a fixed commission, and assumes credit risk only to the extent of its commission. For software license arrangements in which the Company acts as a distributor of another company's product, and in certain circumstances, modifies or enhances the product, revenues are recorded on a gross basis. These include arrangements in which the Company takes title to the products and is responsible for providing the product or service.

For software license arrangements in which the Company permits the customer to receive or exchange for unspecified future software products during the software license term, the Company recognizes revenue ratably over the license term, provided all other revenue recognition criteria have been met. For software license arrangements in which the

customer has the right to change or alternate its use of currently licensed products, revenue is recognized upon delivery of the first copy of all of the licensed products, provided all other revenue recognition criteria have been met. For software license arrangements in which the customer is charged variable software license fees based on usage of the product, the Company recognizes revenue as usage occurs over the term of the licenses, provided all other revenue recognition criteria have been met.

Certain of the Company's software license arrangements include PCS terms that fail to achieve VSOE of fair value due to non-substantive renewal periods, or contain a range of possible PCS renewal amounts that is not sufficiently narrow to establish

Table of Contents

VSOE of fair value. For these arrangements, VSOE of fair value of PCS does not exist and revenues are therefore recognized ratably over the contractually specified PCS term. The Company typically classifies revenues associated with these arrangements in accordance with the contractually specified amounts assigned to the various elements, including software license fees and maintenance fees. The following are amounts included in revenues in the consolidated statements of operations for which VSOE of fair value does not exist for each element (in thousands):

	Three Months Ended March 31,	
	2009	2008
Software license fees	\$ 3,826	\$ 3,227
Maintenance fees	1,376	1,252
Services	1,870	1,258
Total	\$ 7,072	\$ 5,737

Maintenance Fees. The Company typically enters into multi-year time-based software license arrangements that vary in length but are generally five years. These arrangements include an initial (bundled) PCS term of one or two years with subsequent renewals for additional years within the initial license period. For arrangements in which the Company looks to substantive renewal rates to evidence VSOE of fair value of PCS and in which the PCS renewal rate and term are substantive, VSOE of fair value of PCS is determined by reference to the stated renewal rate. For these arrangements, PCS revenues are recognized ratably over the PCS term specified in the contract. In arrangements where VSOE of fair value of PCS cannot be determined (for example, a time-based software license with a duration of one year or less or when the range of possible PCS renewal amounts is not sufficiently narrow), the Company recognizes revenue for the entire arrangement ratably over the PCS term.

For those arrangements that meet the criteria to be accounted for under contract accounting, the Company determines whether VSOE of fair value exists for the PCS element. For those situations in which VSOE of fair value exists for the PCS element, PCS is accounted for separately and the balance of the arrangement is accounted for under ARB No. 45 and the relevant guidance provided by SOP 81-1. For those arrangements in which VSOE of fair value does not exist for the PCS element, revenue is recognized to the extent direct and incremental costs are incurred until such time as the services are complete. Once services are complete, all remaining revenue is then recognized ratably over the remaining PCS period.

Services. The Company provides various professional services to customers, primarily project management, software implementation and software modification services. Revenues from arrangements to provide professional services are generally recognized as the related services are performed. For those arrangements in which services revenue is deferred and the Company determines that the costs of services are recoverable, such costs are deferred and subsequently expensed in proportion to the services revenue as it is recognized.

Hosting. The Company's hosting-related arrangements contain multiple products and services. As these arrangements generally do not contain a contractual right to take possession of the software at anytime during the hosting period without significant penalty, the Company applies the separate provisions of EITF 00-21, *Revenue Arrangements with Multiple Deliverables*. The Company uses the relative fair value method of revenue recognition to allocate the total consideration derived from the arrangement to each of the elements. Any up-front fees allocated to the hosting services are recognized over the estimated life of the hosting relationship. Professional services revenues are recognized as the services are performed when the services have stand-alone value and over the estimated life of the hosting relationship when the services do not have stand-alone value.

The Company may execute more than one contract or agreement with a single customer. The separate contracts or agreements may be viewed as one multiple-element arrangement or separate agreements for revenue recognition purposes. The Company evaluates the facts and circumstances related to each situation in order to reach appropriate conclusions regarding whether such arrangements are related or separate. The conclusions reached can impact the timing of revenue recognition related to those arrangements.

Accrued Receivables. Accrued receivables represent amounts to be billed in the near future (less than 12 months).

Deferred Revenue. Deferred revenue includes (i) amounts currently due and payable from customers, and payments received from customers, for software licenses, maintenance and/or services in advance of providing the product or performing services,

Table of Contents

(ii) amounts deferred whereby VSOE of the fair value of undelivered elements in a bundled arrangement does not exist, and (iii) amounts deferred if other conditions for revenue recognition have not been met.

3. Share-Based Compensation Plans*Employee Stock Purchase Plan*

Under the Company's 1999 Employee Stock Purchase Plan, as amended (the "ESPP"), a total of 1,500,000 shares of the Company's common stock have been reserved for issuance to eligible employees. Participating employees are permitted to designate up to the lesser of \$25,000 or 10% of their annual base compensation for the purchase of common stock under the ESPP. Purchases under the ESPP are made one calendar month after the end of each fiscal quarter. The price for shares of common stock purchased under the ESPP is 85% of the stock's fair market value on the last business day of the three-month participation period. Shares issued under the ESPP during the three months ended March 31, 2009 and 2008 totaled 19,085 and 33,283, respectively.

Share-Based Payments Pursuant to SFAS 123(R)

A summary of stock options issued pursuant to our stock incentive plans is as follows:

	Number of Shares	Weighted -Average Exercise Price (\$)	Weighted- Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value of In-the-Money Options (\$)
Outstanding, December 31, 2008	3,428,297	\$ 21.69		
Granted	60,000	17.77		
Exercised	(108,167)	12.59		
Cancelled/Forfeited/Expired	(141,194)	32.46		
Outstanding, March 31, 2009	3,238,936	\$ 21.46	6.30	\$ 6,976,401
Exercisable, March 31, 2009	1,927,940	\$ 19.74	5.31	\$ 6,352,341

The weighted-average grant date fair value of stock options granted during the three months ended March 31, 2009 and 2008 was \$9.86 and \$9.39, respectively. The Company issued treasury shares for the exercise of stock options during the three months ended March 31, 2009 and 2008. The total intrinsic value of stock options exercised during the three months ended March 31, 2009 and 2008 was \$0.6 million and \$0.3 million, respectively.

The fair value of options granted during the three months ended March 31, 2009 and 2008 were estimated on the date of grant using the Black-Scholes option-pricing model, a pricing model acceptable under SFAS 123(R), with the following assumptions:

	Three Months Ended March 31,	
	2009	2008
Expected life (years)	6.3	6.3
Interest rate	2.5%	3.1%
Volatility	56.2%	55.4%
Dividend yield		

Expected volatilities are based on the Company's historical common stock volatility derived from historical stock price data for historical periods commensurate with the options' expected life. The expected life of options granted represents the period of time that options granted are expected to be outstanding, assuming differing exercise

behaviors for stratified employee

Table of Contents

groupings. The Company used the simplified method for determining the expected life as permitted under SAB 110, Topic 14, *Share-Based Payment*. The simplified method was used as the historical data did not provide a reasonable basis upon which to estimate the expected term. This is due to the extended period during which individuals were unable to exercise options while the Company was not current with its filings with the SEC. The risk-free interest rate is based on the implied yield currently available on United States Treasury zero coupon issues with a term equal to the expected term at the date of grant of the options. The expected dividend yield is zero as the Company has historically paid no dividends and does not anticipate dividends to be paid in the future.

The Company did not grant any long-term incentive program performance share awards (LTIP Performance Shares) pursuant to the Company's 2005 Equity and Performance Incentive Plan, as amended (the 2005 Incentive Plan), during the three months ended March 31, 2009 or 2008.

During the year ended December 31, 2008, the Company changed the expected attainment to 0% for the LTIP Performance Shares granted during the year ended September 30, 2007, based upon revised forecasted diluted earnings per share, which the Company does not expect will achieve the predetermined earnings per share minimum threshold level required for the LTIP Performance Shares granted in 2007 to be earned. As the performance goals were considered improbable of achievement, the Company reversed compensation costs related to the awards granted in 2007 during the year ended December 31, 2008 and no expense was recognized during the three months ended March 31, 2009.

During the three months ended March 31, 2009 and 2008, pursuant to the Company's 2005 Incentive Plan, the Company granted restricted share awards (RSAs). These awards have requisite service periods of four years and vest in increments of 25% on the anniversary dates of the grants. Under each arrangement, stock is issued without direct cost to the employee. The Company estimates the fair value of the RSAs based upon the market price of the Company's stock at the date of grant. The RSA grants provide for the payment of dividends payable on the Company's common stock, if any, to the participant during the requisite service period (vesting period) and the participant has voting rights for each share of common stock. The Company recognizes compensation expense for RSAs on a straight-line basis over the requisite service period.

A summary of nonvested RSAs as of March 31, 2009 and changes during the period are as follows:

	Number of		Weighted-Average
	Restricted		Grant
Nonvested Restricted Share Awards	Share		Date Fair Value
	Awards		
Nonvested at December 31, 2008	462,400	\$	17.97
Granted	2,500		17.77
Vested	(57,750)		16.17
Forfeited or expired	(13,500)		16.17
Nonvested at March 31, 2009	393,650	\$	18.30

During the three months ended March 31, 2009, 57,750 of the RSAs vested. The Company withheld 20,299 of those shares to pay the employees' portion of the minimum payroll withholding taxes.

As of March 31, 2009, there were unrecognized compensation costs of \$10.6 million related to nonvested stock options and \$5.3 million related to the nonvested RSAs, which the Company expects to recognize over weighted-average periods of 2.3 years and 3.2 years, respectively.

The Company recorded stock-based compensation expenses in accordance with SFAS 123(R) for the three months ended March 31, 2009 and 2008 related to stock options, LTIP Performance Shares, RSAs, and the ESPP of \$2.6 million, with corresponding tax benefits of \$1.0 million. Tax benefits in excess of the option's grant date fair value under SFAS 123(R) are classified as financing cash flows. No stock-based compensation costs were capitalized during the three months ended March 31, 2009 and 2008. Estimated forfeiture rates, stratified by employee

classification, have been included as part of the Company's calculations of compensation costs. The Company recognizes compensation costs for stock option awards which vest with the passage of time with only service conditions on a straight-line basis over the requisite service period.

Table of Contents

Cash received from option exercises for the three months ended March 31, 2009 and 2008 was \$1.4 million and \$0.4 million, respectively. The actual tax benefit realized for the tax deductions from option exercises totaled \$0.5 million and \$0.2 million, respectively, for the three months ended March 31, 2009 and 2008.

4. Goodwill

Changes in the carrying amount of goodwill during the three months ended March 31, 2009, consisting primarily of foreign currency translation adjustments, were as follows (in thousands):

	Goodwill
Balance, December 31, 2008	\$ 199,986
Foreign currency translation adjustments	(2,974)
Balance, March 31, 2009	\$ 197,012

5. Software and Other Intangible Assets

At March 31, 2009, software net book value totaling \$28.9 million, net of \$35.4 million of accumulated depreciation, includes software marketed for external sale of \$18.8 million. The remaining software net book value of \$10.1 million is comprised of various software that has been acquired or developed for internal use.

Quarterly amortization of acquired software marketed for external sale is computed using the greater of the ratio of current revenues to total estimated revenues expected to be derived from the software or the straight-line method over an estimated useful life of three to six years. Software amortization expense recorded in the three months ended March 31, 2009 and 2008 totaled \$1.4 million. These software amortization expense amounts are reflected in cost of software license fees in the consolidated statements of operations. Amortization of software for internal use of \$1.3 million and \$0.8 million for the three months ended March 31, 2009 and 2008, respectively, is included in depreciation and amortization in the consolidated statements of operations.

The carrying amount and accumulated amortization of the Company's other intangible assets that were subject to amortization at each balance sheet date are as follows (in thousands):

	March 31, 2009	December 31, 2008
Customer relationships	\$ 38,561	\$ 39,020
Purchased contracts	10,977	11,030
Trademarks and tradenames	2,183	2,236
Covenant not to compete	1,525	1,537
	53,246	53,823
Less: accumulated amortization	(24,777)	(23,476)
Other intangible assets, net	\$ 28,469	\$ 30,347

Other intangible assets amortization expense recorded in the three months ended March 31, 2009 and 2008 totaled \$1.5 million and \$1.7 million, respectively.

Table of Contents

Based on capitalized intangible assets at March 31, 2009, estimated amortization expense for future fiscal years is as follows (in thousands):

Fiscal Year Ending December 31,	Software Amortization	Other Intangible Assets Amortization
Remainder of 2009	\$ 8,733	\$ 4,439
2010	9,268	5,909
2011	6,895	5,556
2012	3,589	4,484
2013	244	4,244
Thereafter	128	3,837
Total	\$ 28,857	\$ 28,469

6. Derivative Instruments and Hedging Activities

The Company maintains an interest-rate risk-management strategy that uses derivative instruments to mitigate the risk of variability in future cash flows (and related interest expense) associated with currently outstanding and forecasted floating rate bank borrowings due to changes in the benchmark interest rate (LIBOR).

At March 31, 2009, the Company had \$75 million of outstanding variable-rate borrowings under a 5-year \$150 million revolving facility that matures on September 29, 2011. The variable-rate benchmark was 3-month LIBOR. During the year ended September 30, 2007, the Company entered into two interest-rate swaps to convert its existing and forecasted variable-rate borrowing needs to fixed rates.

During the three months ended March 31, 2009, the Company elected 1-month LIBOR as the variable-rate benchmark for its revolving facility. The Company also amended its interest rate swap on the \$75 million notional amount from 3-month LIBOR to 1-month LIBOR. This basis swap did not impact the maturity date of the interest rate swap or the accounting.

Although the Company believes that these interest rate swaps will mitigate the risk of variability in future cash flows associated with existing and forecasted variable rate borrowings during the term of the swaps, neither swap qualifies for hedge accounting. Accordingly, the loss resulting from the change in fair value of the interest rate swaps for the three months ended March 31, 2009 and 2008 of \$0.4 million and \$3.7 million, respectively, is reflected as expense in other income (expense), net in the accompanying consolidated statements of operations.

Changes in the fair value of the interest rate swaps were as follows (in thousands):

	Asset (Liability)
Beginning fair value, December 31, 2008	\$ (8,624)
Net settlement payments	309
Loss recognized in earnings	(440)
Ending fair value, March 31, 2009	\$ (8,755)

As of March 31, 2009, the \$8.8 million fair value liability is recorded as \$6.4 million and \$2.4 million in other current liabilities and other noncurrent liabilities, respectively, on the accompanying consolidated balance sheet.

Net settlements are measured monthly and paid monthly under the \$75 million notional amount interest rate swap and paid quarterly under the \$50 million notional amount interest rate swap. The net settlements are recorded in other income (expense)

Table of Contents

in the accompanying consolidated statements of operations. Included in the \$8.8 million fair value at March 31, 2009, is approximately \$1.1 million of net settlement obligations paid by the Company subsequent to March 31, 2009.

7. Fair Value of Financial and Non-financial Instruments

Effective January 1, 2008, the Company adopted the provisions of SFAS No. 157, *Fair Value Measurements* (SFAS 157), for financial assets and financial liabilities. Effective January 1, 2009, the Company adopted the provisions of SFAS 157 for non-financial assets and non-financial liabilities. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements.

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. SFAS 157 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Derivatives. Derivatives are reported at fair value utilizing Level 2 Inputs. The Company utilizes valuation models prepared by a third-party with observable market data inputs to estimate fair value of its interest rate swaps.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of March 31, 2009, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

Description	March 31, 2009	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Derivative liabilities	\$8,755	\$	\$8,755	\$

Certain non-financial assets and non-financial liabilities measured at fair value on a recurring basis include reporting units measured at fair value in the first step of a goodwill impairment test. Certain non-financial assets measured at fair value on a non-recurring basis include non-financial assets and non-financial liabilities measured at fair value in the second step of a goodwill impairment test, as well as intangible assets and other non-financial long-lived assets measured at fair value for impairment assessment. The adoption of SFAS 157 for non-financial assets and

non-financial liabilities had no impact on the financial statements as of or for the three months ended March 31, 2009.

Table of Contents

The Company pays interest quarterly on its long-term revolving credit facility based upon the LIBOR rate plus a margin ranging from 0.625% to 1.375%, the margin being dependent upon the Company's total leverage ratio at the end of the quarter. At March 31, 2009, the fair value of the Company's long-term revolving credit facility approximates its carrying value.

8. Corporate Restructuring and Other Reorganization Charges

Changes in the liability for corporate restructuring charges during the three months ended March 31, 2009 were as follows (in thousands):

	Termination Benefits
Balance, December 31, 2008	\$ 2,547
Adjustments to recognized liabilities	210
Amounts paid during the period	(2,433)
Other	(149)
Balance, March 31, 2009	\$ 175

Other includes the impact of foreign currency translation.

At March 31, 2009 and December 31, 2008, the liabilities were classified as current liabilities in accrued employee compensation in the accompanying consolidated balance sheets. See additional severance costs at Note 16,

International Business Machines Corporation Information Technology Outsourcing Agreement .

9. Common Stock and Earnings (Loss) Per Share

The Company's board of directors has approved a stock repurchase program authorizing the Company, from time to time as market and business conditions warrant, to acquire up to \$210 million of its common stock. Under the program to date, the Company has purchased approximately 6,049,520 shares for approximately \$154 million. The maximum remaining dollar value of shares authorized for purchase under the stock repurchase program was approximately \$56 million as of March 31, 2009.

Earnings (loss) per share is computed in accordance with SFAS No. 128, *Earnings per Share*. Basic earnings (loss) per share is computed on the basis of weighted average outstanding common shares. Diluted earnings (loss) per share is computed on the basis of basic weighted average outstanding common shares adjusted for the dilutive effect of stock options and other outstanding dilutive securities.

The following table reconciles the average share amounts used to compute both basic and diluted loss per share (in thousands):

	Three Months Ended March 31,	
	2009	2008
Weighted average share outstanding:		
Basic weighted average shares outstanding	34,522	35,165
Add: Dilutive effect of stock options and other dilutive securities		
Diluted weighted average shares outstanding	34,522	35,165

For the three months ended March 31, 2009 and 2008, 6.6 million and 4.3 million, respectively, options to purchase shares, restricted share awards, common stock warrants and contingently issuable shares were excluded from the diluted loss per share computation due to the net loss.

Table of Contents**10. Other Income (Expense)**

Other income (expense) is comprised of the following items (in thousands):

	Three Months Ended March 31,	
	2009	2008
Foreign currency transactions gains (losses)	\$ (746)	\$ 3,659
Change in fair value of interest rate swap	(440)	(3,689)
Other	66	(160)
Total	\$ (1,120)	\$ (190)

11. Comprehensive Income (Loss)

The Company's components of other comprehensive income (loss) were as follows (in thousands):

	Three Months Ended March 31,	
	2009	2008
Net loss	\$ (4,132)	\$ (4,901)
Foreign currency translation adjustments	(3,260)	1,482
Comprehensive loss	\$ (7,392)	\$ (3,419)

Accumulated other comprehensive loss included in the Company's consolidated balance sheets represents the accumulated foreign currency translation adjustment. Since the undistributed earnings of the Company's foreign subsidiaries are considered to be indefinitely reinvested, the components of accumulated other comprehensive income (loss) have not been tax effected.

12. Segment Information

The Company's chief operating decision maker, together with other senior management personnel, currently focus their review of consolidated financial information and the allocation of resources based on reporting of operating results, including revenues and operating income, for the geographic regions of the Americas, Europe/Middle East/Africa (EMEA) and Asia/Pacific. The Company's products are sold and supported through distribution networks covering these three geographic regions, with each distribution network having its own sales force. The Company supplements its distribution networks with independent reseller and/or distributor arrangements. As such, the Company has concluded that its three geographic regions are its reportable operating segments.

The Company's chief operating decision maker reviews financial information presented on a consolidated basis, accompanied by disaggregated information about revenues and operating income by geographical region.

Table of Contents

The Company allocated segment support expenses such as global product delivery, business operations and management based upon percentage of revenue per segment. Corporate costs are allocated as a percentage of the headcount by segment. The following are revenues and operating income (loss) for the periods indicated (in thousands):

	Three Months Ended March 31,	
	2009	2008
Revenues:		
Americas	\$ 49,923	\$ 44,014
EMEA	29,015	37,308
Asia/Pacific	9,275	9,341
	\$ 88,213	\$ 90,663
Operating income (loss):		
Americas	\$ 6,867	\$ 1,338
EMEA	(5,745)	(2,181)
Asia/Pacific	(3,229)	(1,233)
	\$ (2,107)	\$ (2,076)

No single customer accounted for more than 10% of the Company's consolidated revenues during the three months ended March 31, 2009 or 2008. Aggregate revenues attributable to customers in the United Kingdom accounted for 10.5% and 11.4% of the Company's consolidated revenues during the three months ended March 31, 2009 and 2008, respectively.

13. Income Taxes

The effective tax rate for the three months ended March 31, 2009 and 2008 is not calculable due to the pretax loss and tax charge reported for the period as a result of losses in tax jurisdictions for which we receive no tax benefit offset by income in tax jurisdictions in which we accrued tax expense and the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities.

The amount of unrecognized tax benefits for uncertain tax positions was \$11.4 million as of March 31, 2009 and \$11.5 million as of December 31, 2008, excluding related liabilities for interest and penalties of \$1.4 million as of March 31, 2009 and \$1.5 million as of December 31, 2008.

The Company believes it is reasonably possible that the total amount of unrecognized tax benefits will decrease within the next 12 months by approximately \$1.7 million, due to settlement of various audits.

14. Contingencies*Legal Proceedings*

From time to time, the Company is involved in various litigation matters arising in the ordinary course of its business. Other than as described below, the Company is not currently a party to any legal proceedings, the adverse outcome of which, individually or in the aggregate, the Company believes would be likely to have a material adverse effect on the Company's financial condition or results of operations.

Class Action Litigation. In November 2002, two class action complaints were filed in the U.S. District Court for the District of Nebraska (the Court) against the Company and certain former officers alleging violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder. Pursuant to a Court order, the two complaints were consolidated as *Desert Orchid Partners v. Transaction Systems Architects, Inc., et al.*, with Genesee County Employees' Retirement System

Table of Contents

designated as lead plaintiff. The complaints, as amended, sought unspecified damages, interest, fees, and costs and alleged that (i) during the purported class period, the Company and the former officers misrepresented the Company's historical financial condition, results of operations and its future prospects, and failed to disclose facts that could have indicated an impending decline in the Company's revenues, and (ii) prior to August 2002, the purported truth regarding the Company's financial condition had not been disclosed to the market while simultaneously alleging that the purported truth about the Company's financial condition was being disclosed throughout that time, commencing in April 1999. The Company and the individual defendants filed a motion to dismiss and the lead plaintiff opposed the motion. Prior to any ruling on the motion to dismiss, on November 7, 2006, the parties entered into a Stipulation of Settlement for purposes of settling all of the claims in the Class Action Litigation, with no admissions of wrongdoing by the Company or any individual defendant. The settlement provides for an aggregate cash payment of \$24.5 million of which, net of insurance, the Company contributed approximately \$8.5 million. The settlement was approved by the Court on March 2, 2007 and the Court ordered the case dismissed with prejudice against the Company and the individual defendants.

On March 27, 2007, James J. Hayes, a class member, filed a notice of appeal with the United States Court of Appeals for the Eighth Circuit appealing the Court's order. On August 13, 2008, the Court of Appeals affirmed the judgment of the district court dismissing the case. Thereafter, Mr. Hayes petitioned the Court of Appeals for a rehearing en banc, which petition was denied on September 22, 2008. Mr. Hayes filed a petition with the U.S. Supreme Court seeking a writ of certiorari which was docketed on February 20, 2009. On April 27, 2009, the Company was informed that Mr. Hayes' petition was denied.

15. International Business Machines Corporation Alliance

On December 16, 2007, the Company entered into an Alliance Agreement (Alliance) with International Business Machines Corporation (IBM) relating to joint marketing and optimization of the Company's electronic payments application software and IBM's middleware and hardware platforms, tools and services. On March 17, 2008, the Company and IBM entered into Amendment No. 1 to the Alliance (Amendment No. 1) and included hereafter in all references to the Alliance, which changed the timing of certain payments to be made by IBM. Under the terms of the Alliance, each party will retain ownership of its respective intellectual property and will independently determine product offering pricing to customers. In connection with the formation of the Alliance, the Company granted warrants to IBM to purchase up to 1,427,035 shares of the Company's common stock at a price of \$27.50 per share and up to 1,427,035 shares of the Company's common stock at a price of \$33.00 per share. The warrants are exercisable for five years.

Under the terms of the Alliance, on December 16, 2007, IBM paid the Company an initial non-refundable payment of \$33.3 million in consideration for the estimated fair value of the warrants described above. The fair value of the warrants granted is approximately \$24.0 million and is recorded as common stock warrants in the accompanying consolidated balance sheet as of March 31, 2009 and December 31, 2008. The remaining balance of \$9.3 million is related to prepaid incentives and other obligations and is recorded in the Alliance agreement liability in the accompanying consolidated balance sheet.

During the three-months ended March 31, 2008, the Company received an additional payment from IBM of \$37.3 million per Amendment No. 1. This payment has been recorded in the Alliance agreement liability in the accompanying consolidated balance sheet. This amount represents a prepayment of funding for technical enablement milestones and incentive payments to be earned under the Alliance and related agreements and accordingly a portion of this payment is subject to refund by the Company to IBM under certain circumstances. As of March 31, 2009, \$20.7 million is refundable subject to achievement of future milestones.

The future costs incurred by the Company related to internally developed software associated with the technical enablement milestones will be capitalized in accordance with SFAS No. 86, *Accounting for Costs of Computer Software to be Sold, Leased, or Otherwise Marketed* (SFAS 86), when the resulting product reaches technological feasibility. Prior to reaching technological feasibility, the costs will be expensed as incurred. The Company will receive partial reimbursement from IBM for expenditures incurred if certain technical enablement milestones and delivery dates specified in the Alliance are met. Reimbursements from IBM for expenditures determined to be direct and incremental to satisfying the technical enablement milestones will be used to offset the amounts expensed or

capitalized as described above but not in excess of non-refundable cash received or receivable. During the three months ended March 31, 2009 and 2008, the Company incurred \$2.7 million and \$1.1 million of costs, respectively, related to fulfillment of the technical enablement milestones. The reimbursement of these costs was recorded as a reduction of the Alliance agreement liability and a reduction in capitalizable costs under SFAS 86 in the accompanying consolidated balance sheets and a reduction of operating expenses in the accompanying consolidated statements of operations for the three months ended March 31, 2009 and 2008.

Table of Contents

Changes in the Alliance agreement liability were as follows (in thousands):

	Alliance Agreement Liability
Balance, December 31, 2008	\$ 43,522
Costs related to fulfillment of technical enablement milestones	(2,697)
Balance, March 31, 2009	\$ 40,825

Of the \$40.8 million Alliance agreement liability, \$7.4 million is current and \$33.4 million is non-current in the accompanying consolidated balance sheet as of March 31, 2009.

IBM will pay the Company additional amounts upon meeting certain prescribed technical enablement obligations and incentives payable upon IBM recognizing revenue from end-user customers as a result of the Alliance. The revenue related to the incentive payments will be deferred until the Company has reached substantial completion of the technical enablement milestones. Subsequent to reaching substantial completion, revenue will be recognized as sales incentives are earned.

The stated initial term of the Alliance is five years, subject to extension for successive two year terms if not previously terminated by either party and subject to earlier termination for cause.

16. International Business Machines Corporation Information Technology Outsourcing Agreement

On March 17, 2008, the Company entered into a Master Services Agreement (Outsourcing Agreement) with IBM to outsource the Company's internal information technology (IT) environment to IBM. Under the terms of the Outsourcing Agreement, IBM will provide the Company with global IT infrastructure services including the following services, which services were previously provided by the Company: cross functional delivery management services, asset management services, help desk services, end user services, server system management services, storage management services, data network services, enterprise security management services and disaster recovery/business continuity plans (collectively, the IT Services). The Company retained responsibility for its security policy management and on-demand business operations.

The initial term of the Outsourcing Agreement is seven years, commencing on March 17, 2008. The Company has the right to extend the Outsourcing Agreement for one additional one-year term unless otherwise terminated in accordance with the terms of the Outsourcing Agreement. Under the Outsourcing Agreement, the Company retains the right to terminate the agreement both for cause and for its convenience. However, upon any termination of the Outsourcing Agreement by the Company for any reason (other than for material breach by IBM), the Company will be required to pay a termination charge to IBM, which charge may be material.

The Company pays IBM for the IT Services through a combination of fixed and variable charges, with the variable charges fluctuating based on the Company's actual need for such services as well as the applicable service levels and statements of work. Based on the currently projected usage of these IT Services, the Company expects to pay \$116 million to IBM in service fees and project costs over the initial seven-year term.

In addition, IBM is providing the Company with certain transition services required to transition the Company's IT operations embodied in the IT Services in accordance with a mutually agreed upon transition plan (the Transition Services). The Company currently expects the Transition Services to be completed approximately 18 months after the effective date of the Outsourcing Agreement and to pay IBM approximately \$8 million for the Transition Services over a period of five years. These Transition Services will be recognized as incurred based on the capital or expense nature of the cost. The Company has expensed approximately \$0.1 million for Transition Services during the three months ended March 31, 2009, that are included in general and administrative expenses in the accompanying consolidated statement of operations and approximately \$6.8 million to date. Of the \$6.8 million recognized, approximately \$1.5 million has been paid, approximately

Table of Contents

\$3.9 million is included in other noncurrent liabilities and \$1.4 million is included in accrued and other current liabilities in the accompanying consolidated balance sheet at March 31, 2009.

The Outsourcing Agreement has performance standards and minimum services levels that IBM must meet or exceed. If IBM fails to meet a given performance standard, the Company would, in certain circumstances, receive a credit against the charges otherwise due.

Additionally, the Company has the right to periodically perform benchmark studies to determine whether IBM's price and performance are consistent with the then current market. The Company has the right to conduct such benchmark studies, at its cost, beginning in the second year of the Outsourcing Agreement.

As a result of the Outsourcing Agreement, 16 employees of the Company became employees of IBM and an additional 62 positions were eliminated by the Company. Changes in the accrued employee compensation for these termination costs were as follows (in thousands):

	Termination Benefits
Balance, December 31, 2008	\$ 465
Amounts paid during the period	(71)
Other (1)	(14)
Balance, March 31, 2009	\$ 380

(1) Other includes the impact of foreign currency translation.

As of March 31, 2009, \$0.4 million is accrued in accrued employee compensation for these termination costs in the accompanying consolidated balance sheet. The Company anticipates that these amounts will be paid by the end of 2009.

17. Assets of Businesses Transferred Under Contractual Arrangements

On September 29, 2006, the Company entered into an agreement whereby certain assets and liabilities related to the Company's MessagingDirect business and WorkPoint product line were legally conveyed to an unrelated party for a total selling price of \$3.0 million. Net assets with a book value of \$0.1 million were legally transferred under the agreement.

An initial payment of \$0.5 million was due at signing and was paid in October of 2006. The remaining \$2.5 million was to be paid in installments through 2010. Additionally, the Company remains a reseller of these products for royalty fee of 50% of revenues generated from sales.

Based on the continuing relationship and involvement subsequent to the closing date, uncertainty regarding collectability of the note receivable, as well as the level of financing provided by the Company, the above transaction was not accounted for as a divestiture for accounting purposes. The accounting treatment for this type of transaction is outlined in SEC Staff Accounting Bulletin Topic 5E. Under this accounting treatment, the assets and liabilities to be divested are classified in other current assets and accrued other liabilities within the Company's consolidated balance sheet. Under that guidance, the Company expected to recognize a gain of \$2.5 million in future periods as payments were received. These future payments are to be recognized as gains in the period in which they are recovered, once the net assets have been written down to zero. In October 2006 and October 2007, the Company collected \$0.5 million of cash pursuant to the contractual arrangements and recognized a pretax gain of \$0.4 million in each period. The remaining \$0.1 million was recorded as interest income. During the year ended December 31, 2008, the Company offset \$0.3 million in invoices payable to the unrelated party against payments due and recognized a pretax gain of \$0.2 million. The remaining \$0.1 million was recorded as interest income. During the three months ended March 31, 2009, a payment of \$0.1 million was received and recorded as a pretax gain and an additional \$0.1 million of invoices

payable to the unrelated party were offset against payments due and recognized as interest income.

Subsequent to March 31, 2009, the Company sold its right to further payments to a third-party for \$1.0 million, which will be recorded as a pretax gain during the three months ending June 30, 2009.

Table of Contents**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Forward-Looking Statements**

This report contains forward-looking statements based on current expectations that involve a number of risks and uncertainties. Generally, forward-looking statements do not relate strictly to historical or current facts and may include words or phrases such as believes, will, expects, anticipates, intends, and words and phrases of similar impact. The forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements in this report include, but are not limited to, statements regarding future operations, business strategy, business environment and key trends, as well as statements related to expected financial and other benefits from our organizational restructuring activities. Many of these factors will be important in determining our actual future results. Any or all of the forward-looking statements in this report may turn out to be incorrect. They may be based on inaccurate assumptions or may not account for known or unknown risks and uncertainties. Consequently, no forward-looking statement can be guaranteed. Actual future results may vary materially from those expressed or implied in any forward-looking statements, and our business, financial condition and results of operations could be materially and adversely affected. In addition, we disclaim any obligation to update any forward-looking statements after the date of this report, except as required by law. All of the foregoing forward-looking statements are expressly qualified by the risk factors discussed in our filings with the Securities and Exchange Commission. Such factors include, but are not limited to, risks related to the global financial crisis, restrictions and other financial covenants in our credit facility, volatility and disruption of the capital and credit markets, our restructuring efforts, the restatement of our financial statements, consolidation in the financial services industry, changes in the financial services industry, the accuracy of backlog estimates, material weaknesses in our internal control over financial reporting, our tax positions, volatility in our stock price, risks from operating internationally, increased competition, our offshore software development activities, the performance of our strategic product, BASE24-eps, the maturity of certain legacy retail payment products, demand for our products, our alliance with IBM, our outsourcing agreement with IBM, the complexity of our products and the risk that they may contain hidden defects, governmental regulations and industry standards, our compliance with privacy regulations, system failures, the protection of our intellectual property, future acquisitions and investments and litigation. The cautionary statements in this report expressly qualify all of our forward-looking statements. Factors that could cause actual results to differ from those expressed or implied in the forward-looking statements include, but are not limited to, those discussed in Item 1A in the section entitled Risk Factors Factors That May Affect Our Future Results or The Market Price of Our Common Stock.

The following discussion should be read together with our financial statements and related notes contained in this report and with the financial statements and related notes and Management's Discussion & Analysis in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008, filed March 4, 2009. Results for the three months ended March 31, 2009, are not necessarily indicative of results that may be attained in the future.

Overview

We develop, market, install and support a broad line of software products and services primarily focused on facilitating electronic payments. In addition to our own products, we distribute, or act as a sales agent for, software developed by third parties. Our products are sold and supported through distribution networks covering three geographic regions—the Americas, EMEA and Asia/Pacific. Each distribution network has its own sales force and supplements its sales force with independent reseller and/or distributor networks. Our products and services are used principally by financial institutions, retailers and electronic payment processors, both in domestic and international markets. Accordingly, our business and operating results are influenced by trends such as information technology spending levels, the growth rate of the electronic payments industry, mandated regulatory changes, and changes in the number and type of customers in the financial services industry. Our products are marketed under the ACI Worldwide brand.

We derive a majority of our revenues from non-domestic operations and believe our greatest opportunities for growth exist largely in international markets. Refining our global infrastructure is a critical component of driving our growth. We have launched a globalization strategy which includes elements intended to streamline our supply chain and

provide low-cost centers of expertise to support a growing international customer base. In fiscal 2006, we established a new subsidiary in Ireland to serve as the focal point for certain international product development and commercialization efforts. This subsidiary oversees remote software development operations in Romania and elsewhere, as well as manages certain of our intellectual property rights. During 2008 and 2009, we have continued our efforts to try and take a direct selling and support strategy in certain countries

Table of Contents

where historically we have used third-party distributors to represent our products, in an effort to develop closer relationships with our customers and develop a stronger overall position in those countries.

We have launched a service called ACI On Demand, wherein we host our payment systems and sell them as a service to banks, retailers and processors.

In March 2008, we announced to customers the timelines for maturing many of our retail payment engines. These products were developed or acquired by ACI over several years and include BASE24, TRANS24-eft, ON/2, OpeN/2 and ASx. Our strategy is to help customers migrate to our next-generation BASE24-eps solution as we discontinue standard support for previous products. This will allow customers to take advantage of our newest technology and allow ACI to more efficiently focus research and development investment.

Key trends that currently impact our strategies and operations include:

Global Financial Markets Uncertainty. The continuing uncertainty in the global financial markets has negatively impacted general business conditions. It is possible that a weakening economy could adversely affect our customers, their purchasing plans, or even their solvency, but we cannot predict whether or to what extent this will occur. We have diversified counterparties and customers, but we continue to monitor our counterparty and customer risks closely. While the effects of the economic conditions in the future are not predictable, we believe our global presence, the breadth and diversity of our service offerings and our enhanced expense management capabilities position us well in a slower economic climate.

Availability of Credit. There have been significant disruptions in the capital and credit markets during the past year and many lenders and financial institutions have reduced or ceased to provide funding to borrowers. The availability of credit, confidence in the entire financial sector, and volatility in financial markets has been adversely affected. These disruptions are likely to have some impact on all institutions in the U.S. banking and financial industries, including our lenders and the lenders of our customers. The Federal Reserve Bank has been providing vast amounts of liquidity into the banking system to compensate for weaknesses in short-term borrowing markets and other capital markets. A reduction in the Federal Reserve's activities or capacity could reduce liquidity in the markets, thereby increasing funding costs or reducing the availability of funds to finance our existing operations as well as those of our customers. We are not currently dependent upon short-term funding, and the limited availability of credit in the market has not affected our revolving credit facility or our liquidity or materially impacted our funding costs.

Increasing electronic payment transaction volumes. Electronic payment volumes continue to increase around the world, taking market share from traditional cash and check transactions. We commissioned an industry study that determined that electronic payment volumes are expected to grow at approximately 13% per year from 2004 through 2009, with varying growth rates based on the type of payment and part of the world. We leverage the growth in transaction volumes through the licensing of new systems to customers whose older systems cannot handle increased volume and through the licensing of capacity upgrades to existing customers.

Increasing competition. The electronic payments market is highly competitive and subject to rapid change. Our competition comes from in-house information technology departments, third-party electronic payment processors and third-party software companies located both within and outside of the United States. Many of these companies are significantly larger than we are and have significantly greater financial, technical and marketing resources. As electronic payment transaction volumes increase, third-party processors tend to provide competition to our solutions, particularly among customers that do not seek to differentiate their electronic payment offerings. As consolidation in the financial services industry continues, we anticipate that competition for those customers will intensify.

Aging payments software. In many markets, electronic payments are processed using software developed by internal information technology departments, much of which was originally developed over ten years ago. Increasing transaction volumes, industry mandates and the overall costs of supporting these older technologies

often serve to make these systems obsolete, creating opportunities for us to replace aging software with newer and more advanced products.

Table of Contents

Adoption of open systems technology. In an effort to leverage lower-cost computing technologies and current technology staffing and resources, many financial institutions, retailers and electronic payment processors are seeking to transition their systems from proprietary technologies to open technologies such as Windows, UNIX and Linux. Our continued investment in open systems technologies is, in part, designed to address this demand.

Electronic payments fraud and compliance. As electronic payment transaction volumes increase, criminal elements continue to find ways to commit a growing volume of fraudulent transactions using a wide range of techniques. Financial institutions, retailers and electronic payment processors continue to seek ways to leverage new technologies to identify and prevent fraudulent transactions. Due to concerns with international terrorism and money laundering, financial institutions in particular are being faced with increasing scrutiny and regulatory pressures. We continue to see opportunity to offer our fraud detection solutions to help customers manage the growing levels of electronic payment fraud and compliance activity.

Adoption of smart card technology. In many markets, card issuers are being required to issue new cards with embedded chip technology. Chip-based cards are more secure, harder to copy and offer the opportunity for multiple functions on one card (e.g. debit, credit, electronic purse, identification, health records, etc.). The EMV standard for issuing and processing debit and credit card transactions has emerged as the global standard, with many regions throughout the world working on EMV rollouts. The primary benefit of EMV deployment is a reduction in electronic payment fraud, with the additional benefit that the core infrastructure necessary for multi-function chip cards is being put in place (e.g., chip card readers in ATM s and POS devices). We are working with many customers around the world to facilitate EMV deployments, leveraging several of our solutions.

Single Euro Payments Area (SEPA) and Faster Payments Mandates. The SEPA and Faster Payments initiatives, primarily focused on the European Economic Community and the United Kingdom, are designed to facilitate lower costs for cross-border payments and reduce timeframes for settling electronic payment transactions. Our retail and wholesale banking solutions provide key functions that help financial institutions address these mandated regulations.

Financial institution consolidation. Consolidation continues on a national and international basis, as financial institutions seek to add market share and increase overall efficiency. Such consolidations have increased, and may continue to increase, in their number, size and market impact as a result of the global economic crisis and the financial crisis affecting the banking and financial industries. There are several potential negative effects of increased consolidation activity. Continuing consolidation of financial institutions may result in a smaller number of existing and potential customers for our products and services. Consolidation of two of our customers could result in reduced revenues if the combined entity were to negotiate greater volume discounts or discontinue use of certain of our products. Additionally, if a non-customer and a customer combine and the combined entity in turn decides to forego future use of our products, our revenue would decline. Conversely, we could benefit from the combination of a non-customer and a customer when the combined entity continues use of our products and, as a larger combined entity, increases its demand for our products and services. We tend to focus on larger financial institutions as customers, often resulting in our solutions being the solutions that survive in the consolidated entity.

Electronic payments convergence. As electronic payment volumes grow and pressures to lower overall cost per transaction increase, financial institutions are seeking methods to consolidate their payment processing across the enterprise. We believe that the strategy of using service-oriented-architectures to allow for re-use of common electronic payment functions such as authentication, authorization, routing and settlement will become more common. Using these techniques, financial institutions will be able to reduce costs, increase overall service levels, enable one-to-one marketing in multiple bank channels and manage enterprise risk. Our

organizational structure is, in part, focused on this trend, by facilitating the delivery of integrated payment functions that can be re-used by multiple bank channels, across both the consumer and wholesale bank. While this trend presents an opportunity for us, it may also expand the competition from third-party electronic payment technology and service providers specializing in other forms of electronic payments. Many of these providers are larger than we are and have significantly greater financial, technical and marketing resources. Several other factors related to our business may have a significant impact on our operating results from year to year. For example, the accounting rules governing the timing of revenue recognition in the software industry are complex and it can be difficult to estimate when we will recognize revenue generated by a given transaction. Factors such as maturity of the software

Table of Contents

product licensed, payment terms, creditworthiness of the customer, and timing of delivery or acceptance of our products often cause revenue related to sales generated in one period to be deferred and recognized in later periods. For arrangements in which services revenue is deferred, related direct and incremental costs may also be deferred. Additionally, while the majority of our contracts are denominated in the United States dollar, a substantial portion of our sales are made, and some of our expenses are incurred, in the local currency of countries other than the United States. Fluctuations in currency exchange rates in a given period may result in the recognition of gains or losses for that period. Also during the year ended September 30, 2007, we entered into two interest rate swaps with a commercial bank whereby we pay a fixed rate of 5.375% and 4.90% and receive a floating rate indexed to the 3-month LIBOR from the counterparty on a notional amount of \$75 million and forecasted borrowings of \$50 million, respectively. During the three months ended March 31, 2009, the Company elected 1-month LIBOR as the variable-rate benchmark for its revolving facility and changed its interest rate to 5.195%. The Company also amended its interest rate swap on the \$75 million notional amount from 3-month LIBOR to 1-month LIBOR. This basis swap did not impact the maturity date of the interest rate swap or the accounting. Fluctuations in interest rates in a given period may result in the recognition of gains or losses for that period.

We continue to seek ways to grow through both organic sources and acquisitions. We continually look for potential acquisitions designed to improve our solutions breadth or provide access to new markets. As part of our strategy, we seek acquisition candidates that are strategic, capable of being integrated into our operating environment, and financially accretive to our financial performance.

Backlog

Included in backlog estimates are all software license fees, maintenance fees and services specified in executed contracts, as well as revenues from assumed contract renewals to the extent that we believe recognition of the related revenue will occur within the corresponding backlog period. We have historically included assumed renewals in backlog estimates based upon automatic renewal provisions in the executed contract and our historic experience with customer renewal rates.

Our 60-month backlog estimate represents expected revenues from existing customers using the following key assumptions:

- § Maintenance fees are assumed to exist for the duration of the license term for those contracts in which the committed maintenance term is less than the committed license term.
 - § License and facilities management arrangements are assumed to renew at the end of their committed term at a rate consistent with our historical experiences.
 - § Non-recurring license arrangements are assumed to renew as recurring revenue streams.
 - § Foreign currency exchange rates are assumed to remain constant over the 60-month backlog period for those contracts stated in currencies other than the U.S. dollar.
 - § Our pricing policies and practices are assumed to remain constant over the 60-month backlog period.
- In computing our 60-month backlog estimate, the following items are specifically not taken into account:
- § Anticipated increases in transaction volumes in customer systems.
 - § Optional annual uplifts or inflationary increases in recurring fees.
 - § Services engagements, other than facilities management, are not assumed to renew over the 60-month backlog period.
 - § The potential impact of merger activity within our markets and/or customers is not reflected in the computation of our 60-month backlog estimate.

The following table sets forth our 60-month backlog estimate, by geographic region, as of March 31, 2009 and December 31, 2008 (in millions). Dollar amounts reflect foreign currency exchange rates as of each period end.

24

Table of Contents

	March 31, 2009	December 31, 2008
Americas	\$ 791	\$ 771
EMEA	466	480
Asia/Pacific	153	156
Total	\$1,410	\$ 1,407

Included in our 60-month backlog estimates are amounts expected to be recognized during the initial license term of customer contracts (Committed Backlog) and amounts expected to be recognized from assumed renewals of existing customer contracts (Renewal Backlog). Amounts expected to be recognized from assumed contract renewals are based on the Company's historical renewal experience. The estimated Committed Backlog and Renewal Backlog estimate as of March 31, 2009 is \$722 million and \$688 million, respectively.

We also estimate 12-month backlog, segregated between monthly recurring and non-recurring revenues, using a methodology consistent with the 60-month backlog estimate. Monthly recurring revenues include all monthly license fees, maintenance fees and processing services fees. Non-recurring revenues include other software license fees and services. Amounts included in our 12-month backlog estimate assume renewal of one-time license fees on a monthly fee basis if such renewal is expected to occur in the next 12 months. The following table sets forth our 12-month backlog estimate, by geographic region, as of March 31, 2009 and December 31, 2008 (in millions). Dollar amounts reflect foreign currency exchange rates as of each period end.

	March 31, 2009			December 31, 2008		
	Monthly Recurring	Non- Recurring	Total	Monthly Recurring	Non- Recurring	Total
Americas	\$139	\$ 43	\$182	\$133	\$ 40	\$173
EMEA	72	43	115	73	37	110
Asia/Pacific	28	10	38	28	14	42
Total	\$239	\$ 96	\$335	\$234	\$ 91	\$325

Estimates of future financial results are inherently unreliable. Our backlog estimates require substantial judgment and are based on a number of assumptions as described above. These assumptions may turn out to be inaccurate or wrong, including for reasons outside of management's control. For example, our customers may attempt to renegotiate or terminate their contracts for a number of reasons, including mergers, changes in their financial condition, or general changes in economic conditions in the customer's industry or geographic location, or we may experience delays in the development or delivery of products or services specified in customer contracts which may cause the actual renewal rates and amounts to differ from historical experiences. Changes in foreign currency exchange rates may also impact the amount of revenue actually recognized in future periods. Accordingly, there can be no assurance that amounts included in backlog estimates will actually generate the specified revenues or that the actual revenues will be generated within the corresponding 12-month or 60-month period. Additionally, because backlog estimates are operating metrics, the estimates are not subject to the same level of internal review or controls as a GAAP financial measure.

Table of Contents

RESULTS OF OPERATIONS

Reclassifications

During the three months ended March 31, 2009, we refined our definition of cost of software licenses fees in order to better conform to industry practice. Our definition of cost of software license fee has been revised to be third-party software royalties as well as the amortization of purchased technology. Previously, cost of software license fees also included certain costs associated with maintaining software products that have already been developed and directing future product development efforts. These costs included human resource costs and other incidental costs related to product management, documentation, publications and education. These costs have now been reclassified to research and development and cost of maintenance and services. As a result of this change in definition of cost of software license fees, we reclassified \$0.7 million and \$8.2 million to cost of maintenance and services and research and development, respectively, from cost of software licenses fees in the accompanying statement of operations for the three months ended March 31, 2008.

Also for the quarter ended March 31, 2009, we reclassified depreciation and amortization expense, excluding amortization of purchased technology as a separate line item in the consolidated statements of operations. Previously, depreciation and amortization was allocated to functional line items of the statement of operations rather than being reported as a separate line item. As a result of disclosing depreciation and amortization as a separate line item, we reclassified \$1.0 million from cost of software licenses fees, \$1.4 million from cost of maintenance and services, \$0.1 million from research and development, \$0.1 million from selling and marketing, and \$1.5 million from general and administrative for the three months ended March 31, 2008.

These reclassifications have been made to prior periods to conform to the current period presentation. These reclassifications did not impact total expenses or net loss for the prior period presented.

Table of Contents

The following table presents the consolidated statements of operations as well as the percentage relationship to total revenues of items included in our Consolidated Statements of Operations (amounts in thousands):

	Three Months Ended March 31,			
	2009	% of Total	2008	% of Total
	Amount	Revenue	Amount	Revenue
Revenues:				
Initial license fees (ILFs)	\$ 13,465	15.3%	\$ 20,954	23.1%
Monthly license fees (MLFs)	17,713	20.1%	16,785	18.5%
Software license fees	31,178	35.4%	37,739	41.6%
Maintenance fees	31,440	35.6%	31,437	34.7%
Services	25,595	29.0%	21,487	23.7%
Total revenues	88,213	100.0%	90,663	100.0%
Expenses:				
Cost of software licenses fees	3,167	3.6%	2,596	2.9%
Cost of maintenance and services	27,222	30.9%	27,619	30.5%
Research and development	18,973	21.5%	20,577	22.7%
Selling and marketing	15,108	17.1%	16,664	18.4%
General and administrative	21,504	24.4%	21,211	23.4%
Depreciation and amortization	4,346	4.9%	4,072	4.5%
Total expenses	90,320	102.4%	92,739	102.4%
Operating loss	(2,107)	-2.4%	(2,076)	-2.3%
Other income (expense):				
Interest income	301	0.3%	593	0.7%
Interest expense	(769)	-0.9%	(1,366)	-1.5%
Other, net	(1,120)	-1.3%	(190)	-0.2%
Total other income (expense)	(1,588)	-1.8%	(963)	-1.0%
Loss before income taxes	(3,695)	-4.2%	(3,039)	-3.4%
Income tax expense	437	0.5%	1,862	2.1%
Net loss	\$ (4,132)	-4.7%	\$ (4,901)	-5.5%

Revenues

Total revenues for the three months ended March 31, 2009 decreased \$2.5 million, or 2.7%, as compared to the same period of 2008. Total revenues decreased primarily as a result of a \$6.6 million, or 17.4%, decrease in software license fees revenues, partially offset by a \$4.1 million, or 19.1%, increase in services revenues.

The decline in total revenues was primarily driven by an \$8.3 million decline in total revenues in the EMEA reportable operating segment offset by a \$5.9 million increase in the America's reportable operating segment. A portion of the decline in the EMEA reportable operating segment can be attributed to the recent strengthening of the U.S. dollar relative to other European currencies.

Software License Fee Revenues

Customers purchase the right to license ACI software for the term of their agreement which term is generally 60 months. Within these agreements are specified capacity limits typically based on transaction volumes. ACI employs measurement tools that monitor the number of transactions processed by customers and if contractually specified limits are exceeded, additional fees are charged for the overage. Capacity overages may occur at varying times throughout the term of the agreement depending on the

Table of Contents

product, the size of the customer, and the significance of customer transaction volume growth. Depending on specific circumstances, multiple overages or no overages may occur during the term of the agreement.

Initial License Fee (ILF) Revenue

ILF revenue includes license and capacity revenues that do not recur on a monthly or quarterly basis. Included in ILF revenues are license and capacity fees that are recognizable at the inception of the agreement and license and capacity fees that are recognizable at interim points during the term of the agreement, including those that are recognizable annually due to negotiated customer payment terms. ILF revenues during the three months ended March 31, 2009 compared to the same period in 2008, decreased by \$7.5 million, or 35.7%. The Americas reportable operating segments increased by \$0.9 million offset by decreases in the EMEA and Asia-Pacific reportable operating segments of \$8.0 million and \$0.4 million, respectively. The decline in ILF revenues in the EMEA reportable operating segment is largely attributable to significant term extensions and contractual renewals with existing customers during the three months ended March 31, 2008 that did not repeat during the three months ended March 31, 2009. Included in the above is a capacity related revenue decline of \$6.0 million in the EMEA reportable operating segment, within the three months ended March 31, 2009 as compared to the same period in 2008.

Monthly License Fee (MLF) Revenue

MLF revenues are license and capacity revenues that are paid up-front but recognized as revenue ratably over an extended period and license and capacity revenues that are paid in monthly or quarterly increments due to negotiated customer payment terms. MLF revenues increased \$1.0 million, or 5.5%, during the three months ended March 31, 2009, as compared to the same period in 2008. The Americas and Asia-Pacific reportable operating segments increased by \$1.2 million and \$0.3 million, respectively, which increase was offset by a decline of \$0.5 million in the EMEA reportable operating segments. Within this increase is a \$0.4 million increase in the amount of paid up-front revenue recognized ratably by customers primarily in the Americas reportable operating segment and a \$0.6 million increase in license and capacity fees that are both invoiced and recognized monthly or quarterly.

Maintenance Fee Revenue

Maintenance fee revenue includes standard and enhanced maintenance or any post contract support fees received from customers for the provision of product support services. Maintenance fee revenues remained consistent in U.S. dollar terms during the three months ended March 31, 2009, compared to the period in 2008 despite the strengthening of the U.S. dollar against most other foreign currencies during the three months ended March 31, 2009 compared to the same period in 2008.

While total maintenance fee revenue was comparable to the three months ended March 31, 2008, maintenance fee revenue in the Americas reportable operating segment increased by \$1.2 million while the EMEA reportable operating segment experienced a decline of \$1.2 million. The decline in the EMEA reportable operating segment can be largely attributable to the strengthening U.S. dollar relative to European currencies.

Services Revenue

Services revenues include fees earned through implementation services, professional services and processing services. Implementation services include product installations, product upgrades, customer specific modifications (CSMs) and product education. Professional services include business consultancy, technical consultancy, on site support services, CSMs, product education, and testing services. Processing services include hosting, on-demand, and facilities management services.

Services revenue increased \$4.1 million, or 19.1%, for the three months ended March 31, 2009, primarily as a result of an increase in professional services revenue in the Americas reportable operating segment, and to a lesser extent, the EMEA reportable operating segment. The increase in professional services revenue is primarily due to on-going customer requirements related to post go-live support, on-going customization or development services, and services required to migrate existing customers to the most current release of installed software products.

Expenses

Total operating expenses for the three months ended March 31, 2009 decreased \$2.4 million, or 2.6%, as compared to the same period of 2008. Total expenses decreased primarily as a result of a \$0.4 million, or 1.4%, decrease in cost of maintenance and services, a \$1.6 million, or 7.8%, decrease in research and development, and a \$1.6 million, or 9.3%, decrease in selling and marketing expenses, partially offset by a \$0.3 million, or 1.4%, increase in general and

administrative costs, a \$0.6 million, or 22.0%, increase in cost of software licenses fees, and a \$0.3 million, or 6.7%, increase in depreciation and amortization.

Cost of Software License Fees

The cost of software licenses for our products sold includes third party software royalties as well as the amortization of

Table of Contents

purchased or developed technology for resale. In general, the cost of software licenses for our products is minimal because we internally develop most of the software components, the cost of which is reflected in research and development expense as it is incurred.

Cost of software licenses increased \$0.6 million, or 22.0%, in the three months ended March 31, 2009 compared to the same period in 2008. Third-party software royalty expense increased \$0.6 million as a result of an increase in license revenue associated with certain products that include a corresponding royalty expense. Purchased or developed technology for resale amortization was \$1.4 million for the three months ended March 31, 2009 and 2008.

Cost of Maintenance and Services

Cost of maintenance and services includes costs to provide hosting services and both the costs of maintaining our software products at customer sites as well as the service costs required to deliver, install and support software at customer sites. Maintenance costs include the efforts associated with providing the customer with upgrades, 24-hour helpdesk, post go-live (remote) support and production-type support for software that was previously installed at a customer location. Service costs include human resource costs and other incidental costs such as travel and training required for both pre go-live and post go-live support. Such efforts include project management, delivery, product customization and implementation, installation support, consulting, configuration, and on-site support.

Cost of maintenance and services for the three months ended March 31, 2009 decreased compared to the same period in 2008 due to lower personnel and related costs of \$1.6 million as a result of previously announced headcount reductions and the strengthening of the U.S. dollar. This decrease was partially offset by \$0.7 million decrease in deferred expenses associated with project implementations and \$0.4 million higher costs resulting from our outsourced information technology services.

Research and Development

Research and development (R&D) expenses are primarily human resource costs related to the creation of new products, improvements made to existing products and the costs associated with maintaining software products that have already been developed. Examples of maintaining software products include product management, documentation, publications and education. Continued R&D effort on existing products addresses issues, if any, related to regulatory requirements and processing mandates as well as compatibility with new operating system releases and generations of hardware.

R&D expense for the three months ended March 31, 2009 decreased as compared to the same period in 2008, due to lower personnel and related costs of \$1.0 million as a result of previously announced headcount reductions and the strengthening of the U.S. dollar and \$2.3 million of reimbursement from IBM for certain expenditures determined to be direct and incremental to satisfying the technical enablement milestones under the Alliance that are recorded as a reduction of R&D expense. These decreases were partially offset by \$1.0 million higher third-party contractor costs and \$0.5 million higher costs resulting from our outsourced information technology services. The remaining \$0.2 million increase is primarily related to a decrease in deferred expenses associated with project implementations.

Selling and Marketing

Selling and marketing includes both the costs related to selling our products to current and prospective customers as well as the costs related to promoting the Company, its products and the research efforts required to measure customers' future needs and satisfaction levels. Selling costs are primarily the human resource and travel costs related to the effort expended to license our products and services to current and potential clients within defined territories and/or industries as well as the management of the overall relationship with customer accounts. Selling costs also include the costs associated with assisting distributors in their efforts to sell our products and services in their respective local markets. Marketing costs include costs needed to promote the Company and its products as well as perform or acquire market research to help us better understand what products our customers are looking for in the future. Marketing costs also include the costs associated with measuring customers' opinions toward the Company, our products and personnel.

Selling and marketing expense for the three months ended March 31, 2009 decreased \$1.6 million, or 9.3%, compared to the same period in 2008 a result of a \$1.2 million decrease in personnel and related costs as a result of previously announced headcount reductions. Selling and marketing expense also decreased approximately \$0.7 million as a result of costs reallocated to general and administrative expense to invest in our new regional general manager organization.

This decrease was partially offset by \$0.2 million higher costs resulting from our outsourced information technology services.

General and Administrative

General and administrative expenses are primarily human resource costs including executive salaries and benefits, personnel

Table of Contents

administration costs, and the costs of corporate support functions such as legal, administrative, human resources and finance and accounting.

General and administrative expense for the three months ended March 31, 2009 increased \$0.3 million, or 1.4%, compared to the same period in 2008. General and administrative expenses increased \$1.0 million as a result of professional fees associated with the restatement of the 2008 quarterly financial statements, \$0.9 million in severance and consulting fees related to the 2008 restructuring activities and related reinvestments and \$0.6 million from higher bad debt expense compared to the same period in 2008. General and administrative expenses also increased approximately \$1.0 million as a result of costs reallocated from certain business functions (primarily services and sales and marketing) to invest in our new regional general manager organization. These increases were partially offset by lower personnel and related costs of \$2.2 million as a result of previously announced headcount reductions and the strengthening of the U.S. dollar, in addition to a \$0.9 million decrease in rent and related costs as a result of facility consolidation and the strengthening of the U.S. dollar.

Depreciation and Amortization

Depreciation and amortization expense includes charges for depreciation of property and equipment and amortization of acquired intangibles excluding amortization of purchased or developed technology for resale. Amortization of acquired intangibles include customer relationships, trade names, non-competes and other intangible assets.

Depreciation and amortization expense for the three months ended March 31, 2009 increased \$0.3 million, or 6.7%, compared to the same period in 2008 as a result of higher capital expenditures.

Other Income and Expense

Other income and expense includes interest income and expense, foreign currency gains and losses, and other non-operating items. Fluctuating currency rates impacted the three months ended March 31, 2009 by \$0.7 million in net foreign currency losses, as compared with \$3.7 million in net gains during the same period in 2008. A \$0.4 million loss on change in fair value of interest rate swaps was incurred during the three months ended March 31, 2009 compared to a \$3.7 million loss in the same period of 2008. Interest income for the three months ended March 31, 2009 decreased \$0.3 million or 49.2% as compared to the corresponding period of 2008 as a result of lower average daily cash balances and lower interest rates. Interest expense decreased \$0.6 million or 43.7% for the three months ended March 31, 2009 as compared to the corresponding period of 2008 as a result of lower interest rates.

Income Taxes

The effective tax rate for the three months ended March 31, 2009 and 2008 was not calculable due to the pretax loss and tax charge reported for the period as a result of losses in tax jurisdictions for which we receive no tax benefit offset by income in tax jurisdictions in which we accrued tax expense and the recognition of tax expense associated with the transfer of certain intellectual property rights from U.S. to non-U.S. entities.

Segment Results

The following table presents revenues and operating income for the periods indicated by geographic region (in thousands):

Table of Contents

	Three Months Ended March 31,	
	2009	2008
Revenues:		
Americas	\$ 49,923	\$ 44,014
EMEA	29,015	37,308
Asia/Pacific	9,275	9,341
	\$ 88,213	\$ 90,663
Operating income (loss):		
Americas	\$ 6,867	\$ 1,338
EMEA	(5,745)	(2,181)
Asia/Pacific	(3,229)	(1,233)
	\$ (2,107)	\$ (2,076)

Liquidity and Capital Resources

As of March 31, 2009, our principal sources of liquidity consisted of \$109.5 million in cash and cash equivalents and \$75 million of unused borrowings under our revolving credit facility. We had bank borrowings of \$75.0 million outstanding under our revolving credit facility as of March 31, 2009. The amount of unused borrowings actually available under the revolving credit facility varies in accordance with the terms of the agreement. We believe that the amount currently available along with our current cash balance provides sufficient liquidity. The revolving credit facility contains certain affirmative and negative covenants, including limitations on the incurrence of indebtedness, asset dispositions, acquisitions, investments, dividends and other restricted payments, liens and transactions with affiliates. The revolving credit facility also contains financial covenants relating to maximum permitted leverage ratio and the minimum interest coverage ratio. At March 31, 2009, we were in compliance with all credit facility covenants. We are not currently dependent upon short-term funding, and the limited availability of credit in the market has not affected our revolving credit facility, our liquidity or materially impacted our funding costs. However, due to the existing uncertainty in the capital and credit markets and the impact of the current economic crisis on our operating results and financial conditions, the amount of available unused borrowings under our existing credit facility may be insufficient to meet our needs and/or our access to capital outside of our existing credit facility may not be available on terms acceptable to us or at all. Additionally, if one or more of the financial institutions in our syndicate were to default on its obligation to fund its commitment, the portion of the committed facility provided by such defaulting financial institution would not be available to us. There can be no assurance that alternative financing on acceptable terms would be available to replace any defaulted commitments.

The Company's board of directors has approved a stock repurchase program authorizing the Company, from time to time as market and business conditions warrant, to acquire up to \$210 million of its common stock. Under the program to date, the Company has purchased approximately 6,049,520 shares for approximately \$154 million. The maximum remaining dollar value of shares authorized for purchase under the stock repurchase program was approximately \$56 million as of March 31, 2009.

We may also decide to use cash to acquire new products and services or enhance existing products and services through acquisitions of other companies, product lines, technologies and personnel, or through investments in other companies.

Cash Flows

The following table sets forth summary cash flow data for the periods indicated. Please refer to this summary as you read our discussion of the sources and uses of cash in each period.

Table of Contents

	Three Months Ended March 31,	
	2009	2008
	(amounts in thousands)	
Net cash provided by (used by):		
Operating activities	\$ 2,849	\$ 46,524
Investing activities	(6,971)	(2,302)
Financing activities	865	(29,806)

Net cash flows provided by operating activities for the three months ended March 31, 2009 amounted to \$2.8 million as compared to \$46.5 million during the same period of 2008. The comparative period decrease in net cash flows from operating activities of \$43.7 million was principally the result of the following items: \$36.1 million received from IBM primarily for prepayment of estimated incentives payments pursuant to the terms of the Alliance, as amended, during the three months ended March 31, 2008, a decrease in cash collections on customer receivables of \$5.8 million in the three months ended March 31, 2009 and a decrease in noncash expenses of \$3.1 million, such as depreciation, amortization, change in fair value of interest rate swaps and deferred taxes in the three months ended March 31, 2009 as compared to the same period of 2008. These items were partially offset by a net loss of \$4.1 million for the three months ended March 31, 2009 compared to a net loss of \$4.9 million for the same period of 2008, a \$0.2 million increase in deferred revenue growth, and an increase in accruals for other expenses of \$0.3 million.

Net cash flows used by investing activities totaled \$7.0 million in the three months ended March 31, 2009 as compared to \$2.3 million used by investing activities during the same period in 2008. During the three months ended March 31, 2009, we used cash of \$5.3 million to purchase software, property and equipment and \$1.7 million for costs related to fulfillment of the technical enablement milestones under the Alliance. During the three months ended March 31, 2008, we used cash of \$2.6 million to purchase software, property and equipment and \$0.9 million for costs related to fulfillment of the technical enablement milestones under the Alliance. These uses of cash were partially offset in the three months ended March 31, 2008, by \$1.2 million received from IBM for reimbursement of estimated capitalizable technical enablement milestones costs pursuant to the terms of the Alliance.

Net cash flows provided by financing activities totaled \$0.9 million in the three months ended March 31, 2009 as compared to net cash flows used by financing activities of \$29.8 million during the same period in 2008. We made payments to third-party financial institutions, primarily related to debt and capital leases, totaling \$0.5 million and \$0.8 million during the three months ended March 31, 2009 and 2008, respectively. During the three months ended March 31, 2009 and 2008, we received proceeds of \$1.4 million and \$0.4 million, respectively, including corresponding excess tax benefits, from the exercises of stock options and \$0.3 million and \$0.6 million, respectively, for the issuance of common stock under our Employee Stock Purchase Plan. In the three months ended March 31, 2008, we used cash of \$30.1 million to purchase shares of our common stock under the stock repurchase program. We used \$0.3 million to pay the employees portion of the minimum payroll withholding taxes on the vested restricted share awards obtained through withholding 20,299 shares during the three months ended March 31, 2009.

We also realized a \$0.2 million decrease in cash during the three months ended March 31, 2009 compared to a \$2.8 million decrease during the same period of 2008 related to foreign exchange rate variances.

We believe that our existing sources of liquidity, including cash on hand and cash provided by operating activities, will satisfy our projected liquidity requirements, which primarily consists of working capital requirements, for the foreseeable future.

Contractual Obligations and Commercial Commitments

We are unable to reasonably estimate the ultimate amount or timing of settlement of all of our reserves for income taxes under FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (as amended). The liability for unrecognized tax benefits at March 31, 2009 is \$11.4 million, of which we believe it is reasonably possible \$1.7 million will be settled within the next 12 months.

Critical Accounting Estimates

The preparation of the consolidated financial statements requires that we make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our

Table of Contents

estimates on historical experience and other assumptions that we believe to be proper and reasonable under the circumstances. We continually evaluate the appropriateness of estimates and assumptions used in the preparation of our consolidated financial statements. Actual results could differ from those estimates.

The following key accounting policies are impacted significantly by judgments, assumptions and estimates used in the preparation of the consolidated financial statements. See Note 1, Summary of Significant Accounting Policies in the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2008, filed on March 4, 2009, for a further discussion of revenue recognition and other significant accounting policies.

Revenue Recognition

For software license arrangements for which services rendered are not considered essential to the functionality of the software, we recognize revenue upon delivery, provided (i) there is persuasive evidence of an arrangement, (ii) collection of the fee is considered probable, and (iii) the fee is fixed or determinable. In most arrangements, because vendor-specific objective evidence of fair value does not exist for the license element, we use the residual method to determine the amount of revenue to be allocated to the license element. Under the residual method, the fair value of all undelivered elements, such as post contract customer support or other products or services, is deferred and subsequently recognized as the products are delivered or the services are performed, with the residual difference between the total arrangement fee and revenues allocated to undelivered elements being allocated to the delivered element. For software license arrangements in which we have concluded that collectibility issues may exist, revenue is recognized as cash is collected, provided all other conditions for revenue recognition have been met. In making the determination of collectibility, we consider the creditworthiness of the customer, economic conditions in the customer's industry and geographic location, and general economic conditions.

Our sales focus continues to shift from our more-established products to more complex arrangements involving multiple products inclusive of our BASE24-eps product and less-established (collectively referred to as "newer") products. As a result of this shift to newer products and more complex, multiple product arrangements, absent other factors, we initially experience an increase in deferred revenue and a corresponding decrease in current period revenue due to differences in the timing of revenue recognition for the respective products. Revenues from newer products are typically recognized upon acceptance or first production use by the customer whereas revenues from mature products are generally recognized upon delivery of the product, provided all other conditions for revenue recognition have been met. For those arrangements where revenues are being deferred and we determine that related direct and incremental costs are recoverable, such costs are deferred and subsequently expensed as the revenues are recognized. Newer products are continually evaluated by our management and product development personnel to determine when any such product meets specific internally defined product maturity criteria that would support its classification as a mature product. Evaluation criteria used in making this determination include successful demonstration of product features and functionality; standardization of sale, installation, and support functions; and customer acceptance at multiple production site installations, among others. A change in product classification (from newer to mature) would allow us to recognize revenues from new sales of the product upon delivery of the product rather than upon acceptance or first production use by the customer, resulting in earlier recognition of revenues from sales of that product, as well as related costs, provided all other revenue recognition criteria have been met.

When a software license arrangement includes services to provide significant modification or customization of software, those services are not considered to be separable from the software. Accounting for such services delivered over time is referred to as contract accounting. Under contract accounting, we generally use the percentage-of-completion method. Under the percentage-of-completion method, we record revenue for the software license fee and services over the development and implementation period, with the percentage of completion generally measured by the percentage of labor hours incurred to-date to estimated total labor hours for each contract. Estimated total labor hours for each contract are based on the project scope, complexity, skill level requirements, and similarities with other projects of similar size and scope. For those contracts subject to contract accounting, estimates of total revenue and profitability under the contract consider amounts due under extended payment terms. For arrangements where we believe it is reasonably assured that no loss will be incurred under the arrangement and fair value for maintenance services does not exist, we use a zero margin approach of applying percentage-of-completion accounting until software customization services are completed. We exclude revenues due on extended payment terms from our

current percentage-of-completion computation until such time that collection of the fees becomes probable.

We may execute more than one contract or agreement with a single customer. The separate contracts or agreements may be viewed as one multiple-element arrangement or separate arrangements for revenue recognition purposes.

Judgment is required when evaluating the facts and circumstances related to each situation in order to reach appropriate conclusions regarding whether such arrangements are related or separate. Those conclusions can impact the timing of revenue recognition related to those arrangements.

Table of Contents*Allowance for Doubtful Accounts*

We maintain a general allowance for doubtful accounts based on our historical experience, along with additional customer-specific allowances. We regularly monitor credit risk exposures in our accounts receivable. In estimating the necessary level of our allowance for doubtful accounts, management considers the aging of our accounts receivable, the creditworthiness of our customers, economic conditions within the customer's industry, and general economic conditions, among other factors. Should any of these factors change, the estimates made by management would also change, which in turn would impact the level of our future provision for doubtful accounts. Specifically, if the financial condition of our customers were to deteriorate, affecting their ability to make payments, additional customer-specific provisions for doubtful accounts may be required. Also, should deterioration occur in general economic conditions, or within a particular industry or region in which we have a number of customers, additional provisions for doubtful accounts may be recorded to reserve for potential future losses. Any such additional provisions would reduce operating income in the periods in which they were recorded.

Intangible Assets and Goodwill

Our business acquisitions typically result in the recording of intangible assets, and the recorded values of those assets may become impaired in the future. As of March 31, 2009 and December 31, 2008, our intangible assets, net of accumulated amortization, were \$28.5 million and \$30.3 million, respectively. The determination of the value of such intangible assets requires management to make estimates and assumptions that affect the consolidated financial statements. We assess potential impairments to intangible assets when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. Judgments regarding the existence of impairment indicators and future cash flows related to intangible assets are based on operational performance of our businesses, market conditions and other factors. Although there are inherent uncertainties in this assessment process, the estimates and assumptions used, including estimates of future cash flows, volumes, market penetration and discount rates, are consistent with our internal planning. If these estimates or their related assumptions change in the future, we may be required to record an impairment charge on all or a portion of our intangible assets. Furthermore, we cannot predict the occurrence of future impairment-triggering events nor the impact such events might have on our reported asset values. Future events could cause us to conclude that impairment indicators exist and that intangible assets associated with acquired businesses is impaired. Any resulting impairment loss could have an adverse impact on our results of operations. Other intangible assets are amortized using the straight-line method over periods ranging from 18 months to 12 years.

As of March 31, 2009 and December 31, 2008, our goodwill was \$197.0 million and \$200.0 million, respectively. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142), we assess goodwill for impairment at least annually or when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. During this assessment, which is completed annually as of October 1st, management relies on a number of factors, including operating results, business plans and anticipated future cash flows.

Stock-Based Compensation

Under the provisions of SFAS No. 123(R), stock-based compensation cost for stock option awards is estimated at the grant date based on the award's fair value as calculated by the Black-Scholes option-pricing model and is recognized as expense ratably over the requisite service period. We recognize stock-based compensation costs for only those shares that are expected to vest. The impact of forfeitures that may occur prior to vesting is estimated and considered in the amount of expense recognized. Forfeiture estimates will be revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The Black-Scholes option-pricing model requires various highly judgmental assumptions including volatility and expected option life. If any of the assumptions used in the Black-Scholes model change significantly, stock-based compensation expense may differ materially for future awards from that recorded for existing awards.

Long term incentive program performance share awards (LTIP Performance Shares) were issued in the year ended September 30, 2007. These awards are earned based on the achievement over a specified period of performance goals related to certain performance indicators. In order to determine compensation expense to be recorded for these LTIP Performance Shares, each quarter management evaluates the probability that the target performance goals will be

achieved, if at all, and the anticipated level of attainment.

Pursuant to our 2005 Incentive Plan, we granted restricted share awards (RSAs). These awards have requisite service periods

Table of Contents

of four years and vest in increments of 25% on the anniversary dates of the grants. Under each arrangement, stock is issued without direct cost to the employee. We estimate the fair value of the RSAs based upon the market price of our stock at the date of grant. The RSA grants provide for the payment of dividends payable on our common stock, if any, to the participant during the requisite service period (vesting period) and the participant has voting rights for each share of common stock.

Accounting for Income Taxes

Accounting for income taxes requires significant judgments in the development of estimates used in income tax calculations. Such judgments include, but are not limited to, the likelihood we would realize the benefits of net operating loss carryforwards and/or foreign tax credit carryforwards, the adequacy of valuation allowances, and the rates used to measure transactions with foreign subsidiaries. As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which the Company operates. The judgments and estimates used are subject to challenge by domestic and foreign taxing authorities. It is possible that either domestic or foreign taxing authorities could challenge those judgments and estimates and draw conclusions that would cause us to incur tax liabilities in excess of, or realize benefits less than, those currently recorded. In addition, changes in the geographical mix or estimated amount of annual pretax income could impact our overall effective tax rate.

To the extent recovery of deferred tax assets is not likely, we record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. Although we have considered future taxable income along with prudent and feasible tax planning strategies in assessing the need for a valuation allowance, if we should determine that we would not be able to realize all or part of our deferred tax assets in the future, an adjustment to deferred tax assets would be charged to income in the period any such determination was made. Likewise, in the event we are able to realize our deferred tax assets in the future in excess of the net recorded amount, an adjustment to deferred tax assets would increase income in the period any such determination was made.

Recently Issued Accounting Standards

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141(R), *Business Combinations* (SFAS 141(R)), which replaces SFAS 141. The Company adopted SFAS 141(R) as of January 1, 2009 and will assess the impact if and when a future acquisition occurs.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51* (SFAS 160). The Company adopted SFAS 160 as of January 1, 2009 and there was no impact on its consolidated financial statements as the Company's non-controlling interests were not material.

On March 19, 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, (SFAS 161). SFAS 161 amends FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, (SFAS 133) and was issued in response to concerns and criticisms about the lack of adequate disclosure of derivative instruments and hedging activities. The Company adopted SFAS 161 as of January 1, 2009 and there was no impact on its consolidated financial statements.

In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* (FSP EITF 03-6-1). The Company adopted this standard as of January 1, 2009 and it did not have a material impact on the Company's consolidated financial statements.

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*. This FSP provides additional guidance for estimating fair value in accordance with SFAS No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased. This FSP also includes guidance on identifying circumstances that indicate a transaction is not orderly. This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. The FSP does not require disclosures for earlier periods presented for comparative purposes at initial adoption. In periods after initial adoption, this FSP requires comparative disclosures only for periods ending after initial adoption. The Company does not expect the adoption of this FSP to have a material effect on the consolidated financial statements.

Table of Contents**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Excluding the impact of changes in interest rates, there have been no material changes to our market risk for the three months ended March 31, 2009. We conduct business in all parts of the world and are thereby exposed to market risks related to fluctuations in foreign currency exchange rates. The U.S. dollar is the single largest currency in which our revenue contracts are denominated. Thus, any decline in the value of local foreign currencies against the U.S. dollar results in our products and services being more expensive to a potential foreign customer, and in those instances where our goods and services have already been sold, may result in the receivables being more difficult to collect. Additionally, any decline in the value of the U.S. dollar in jurisdictions where the revenue contracts are denominated in U.S. dollars and operating expenses are incurred in local currency will have an unfavorable impact to operating margins. We at times enter into revenue contracts that are denominated in the country's local currency, principally in Australia, Canada, the United Kingdom and other European countries. This practice serves as a natural hedge to finance the local currency expenses incurred in those locations. We have not entered into any foreign currency hedging transactions. We do not purchase or hold any derivative financial instruments for the purpose of speculation or arbitrage.

The primary objective of our cash investment policy is to preserve principal without significantly increasing risk. Based on our cash investments and interest rates on these investments at March 31, 2009, and if we maintained this level of similar cash investments for a period of one year, a hypothetical 10 percent increase or decrease in interest rates would increase or decrease interest income by approximately \$0.1 million annually.

During the year ended September 30, 2007, we entered into two interest rate swaps with a commercial bank whereby we pay a fixed rate of 5.375% and 4.90% and receive a floating rate indexed to the 3-month LIBOR from the counterparty on a notional amount of \$75 million and \$50 million, respectively. During the three months ended March 31, 2009, the Company elected 1-month LIBOR as the variable-rate benchmark for its revolving facility. The Company also amended its interest rate swap on the \$75 million notional amount from 3-month LIBOR to 1-month LIBOR. This basis swap did not impact the maturity date of the interest rate swap or the accounting. As of March 31, 2009, the fair value liability of the interest rate swaps was approximately \$8.8 million, \$6.4 million and \$2.4 million of which was included in other current liabilities and other noncurrent liabilities, respectively, on the consolidated balance sheet. The potential additional loss in fair value liability of the interest rate swaps resulting from a hypothetical 10 percent adverse change in interest rates was approximately \$0.2 million at March 31, 2009. Because our interest rate swaps do not qualify for hedge accounting, changes in the fair value of the interest rate swaps are recognized in the consolidated statements of operations, along with the related income tax effects.

Effective January 1, 2008, we adopted the provisions of SFAS No. 157, *Fair Value Measurements* (SFAS 157), for financial assets and financial liabilities. Effective January 1, 2009, we adopted the provisions of SFAS 157 for non-financial assets and non-financial liabilities. SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. SFAS 157 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.

Level 3 Inputs Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

Derivatives. Derivatives are reported at fair value utilizing Level 2 Inputs. We utilize valuation models prepared by a third-party with observable market data inputs to estimate fair value of its interest rate swaps.

Item 4. CONTROLS AND PROCEDURES

Our management, under the supervision of and with the participation of the Chief Executive Officer and Chief Financial Officer, performed an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) as of the end of the period covered by this report, March 31, 2009.

As of December 31, 2008, the Company reported a material weakness in internal control over financial reporting related to accounting for complex software implementation service arrangements in the Asia Pacific region. A material weakness is defined in Public Company Accounting Oversight Board Auditing Standard No. 5 as a deficiency, or a combination of deficiencies in internal control over financial reporting such that there is a reasonable possibility that a material misstatement would not be prevented or detected on a timely basis. In connection with our overall assessment of internal control over financial reporting, we have evaluated the effectiveness of our internal controls as of March 31, 2009 and have concluded that the material weakness related to accounting for complex software implementation services arrangements in the Asia Pacific region was not remediated as of March 31, 2009. Except for the material weakness in internal control over financial reporting as referenced in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008, no other material weaknesses were identified in our evaluation of internal controls as of March 31, 2009.

Changes in Internal Control over Financial Reporting

Remediation plans established and initiated by management in fiscal year 2008 continue to be implemented. There were no other changes in our internal controls over financial reporting during the quarter ended March 31, 2009 that have materially affected or are reasonably likely to materially affect, our internal controls over financial reporting. While we have implemented or continue to implement our remediation activities, we believe it will take multiple quarters of effective application of the control activities, including adequate testing of such control activities, in order for us to revise our conclusion regarding the effectiveness of our internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

From time to time, we are involved in various litigation matters arising in the ordinary course of our business. Other than as described below, we are not currently a party to any legal proceedings, the adverse outcome of which, individually or in the aggregate, we believe would be likely to have a material adverse effect on our financial condition or results of operations.

Class Action Litigation. In November 2002, two class action complaints were filed in the U.S. District Court for the District of Nebraska (the "Court") against the Company and certain former officers alleging violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder. Pursuant to a Court order, the two complaints were consolidated as *Desert Orchid Partners v. Transaction Systems Architects, Inc., et al., with Genesee County Employees Retirement System* designated as lead plaintiff. The complaints, as amended, sought unspecified damages, interest, fees, and costs and alleged that (i) during the purported class period, the Company and the former officers misrepresented the Company's historical financial condition, results of operations and its future prospects, and failed to disclose facts that could have indicated an impending decline in the Company's revenues, and (ii) prior to August 2002, the purported truth regarding the Company's financial condition had not been disclosed to the market while simultaneously alleging that the purported truth about the Company's financial condition was being disclosed throughout that time, commencing in April 1999. The Company and the individual defendants filed a motion to dismiss and the lead plaintiff opposed the motion. Prior to any ruling on the motion to dismiss, on November 7, 2006, the parties entered into a Stipulation of Settlement for purposes of settling all of the claims in the Class Action Litigation, with no admissions of wrongdoing by the Company or any individual defendant. The settlement provides for an aggregate cash payment of \$24.5 million of which, net of insurance, the Company contributed approximately \$8.5 million. The settlement was approved by the Court on March 2, 2007 and the Court ordered the case dismissed with prejudice against the Company and the individual defendants.

On March 27, 2007, James J. Hayes, a class member, filed a notice of appeal with the United States Court of Appeals for the Eighth Circuit appealing the Court's order. On August 13, 2008, the Court of Appeals affirmed the judgment of the district court.

dismissing the case. Thereafter, Mr. Hayes petitioned the Court of Appeals for a rehearing en banc, which petition was denied on September 22, 2008. Mr. Hayes filed a petition with the U.S. Supreme Court seeking a writ of certiorari which was docketed on February 20, 2009. On April 27, 2009, the Company was informed that Mr. Hayes' petition was denied.

Item 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in Item 1A of the Company's Form 10-K for the fiscal year ended December 31, 2008. Additional risks and uncertainties, including risks and uncertainties not presently known to us, or that we currently deem immaterial, could also have an adverse effect on our business, financial condition and/or results of operations.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Issuer Purchases of Equity Securities**

The following table provides information regarding the Company's repurchases of its common stock during the three months ended March 31, 2009:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program
January 1 through January 31, 2009		\$		\$56,545,000
February 1 through February 28, 2009	20,299	\$ 16.99		\$56,545,000
March 1 through March 31, 2009		\$		\$56,545,000
Total	20,299	\$ 16.99		

Pursuant to the Company's 2005 Incentive Plan, the Company granted restricted share awards (RSAs). These awards have requisite service periods of four years and vest in increments of 25% on the anniversary dates of the grants. Under each arrangement, stock is issued without direct cost to the employee. During the three months ended March 31, 2009, 57,750 of the RSAs vested. The Company withheld 20,299 of those shares to pay the employees' portion of the payroll taxes.

Item 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS
