FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group's key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group's products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired; consequences of the Group's leverage; adverse changes in the South African political situation and economy or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

summary

sappi

1

sappi

We have seen a further improvement in the market for coated paper across all our regions during the quarter. Demand for coated fine paper grew strongly, with apparent consumption up 12% in North America and 8% in Europe compared to the same quarter last year.

Prices for coated paper started to improve in North America. In Europe, prices remained stable ahead of the increase announced for implementation at the end of the quarter.

Pulp prices softened during the quarter and the average hardwood pulp price was below the previous quarter but still well up on a year earlier. The average NBSK benchmark price was similar to the prior quarter.

A number of other factors had a notable impact on Sappi's performance in the quarter. The continued strength of the Rand relative to the US dollar, up 16% compared to the equivalent quarter last year, further squeezed the margins of our South African businesses. Our North American mills faced continued high wood costs and all regions faced higher energy costs and higher costs of other raw materials related to changes in the price of oil.

Sappi's earnings and headline earnings per share for the quarter were 25 US cents and 26 US cents respectively, compared to 4 US cents and 11 US cents for the equivalent quarter last year.

The gain at the operating income level from the fair value adjustment on plantations, net after fellings was US\$12 million for the quarter, down from US\$33 million in the June 2004 quarter.

Finance costs for the quarter were US\$5 million higher than a year ago, largely as a result of slightly higher interest paid and a foreign exchange gain last year, which was not repeated in the quarter.

Taxation in the quarter included credits of US\$13 million related to the conclusion of the Austrian tax audit and the reversal of certain other tax provisions previously raised. The effective rate was also reduced by the geographic split of profits and losses.

For the full year, sales were US\$4.7 billion, 10.0% higher than last year. Operating profit was 30.9% lower at US\$188 million mainly as a result of low prices in operating currencies, the effect of the strong Rand on our South African margins and higher wood and energy costs. The margin of operating profit to sales declined to 4.0% compared to 6.3% last year. The operating margin in the quarter, however, recovered to 5.8%.

Headline earnings per share for the full year was 45 US cents compared to 69 US cents in the prior year.

comment

2

Cash generated by operations strengthened to US\$157 million for the quarter, 5.4% higher than a year earlier. Cash generated by operations for the full year fell from US\$644 million last year to US\$601 million.

Working capital decreased by US\$79 million in the quarter, mainly as a result of increased payables and lower inventories partly offset by higher receivables.

Capital expenditure was US\$110 million for the quarter, and for the full year was US\$334 million. Capital expenditure to depreciation for the year was 82%, which was in line with our target.

Net debt decreased by US\$65 million in the quarter to US\$1,584 million. The increase of net debt for the full year of US\$93 million is almost entirely due to currency translation.

US\$31.5 million in respect of machine closure*

We continued to see strong order inflow in the quarter in our major markets. Our average prices realised increased in North America but there was little movement in average prices realised in Europe.

The operating result from our North American business improved by US\$16 million compared to the June 2004 quarter, aided by lower maintenance costs and higher selling prices.

Our European business had good volume growth in the quarter with total sales volume increasing 6.8% compared to the equivalent quarter last year.

Average prices realised remained low and were at similar levels to the prior quarter in Dollar and Euro terms.

Compared to a year earlier, prices were approximately 3% lower in Euros and 4% higher in Dollar terms.

* *EBITDA and operating profit for the quarter ended September 2003 reduced by US\$31.5 million in respect of machine closure*

Market conditions continued to improve in the quarter. Shipments of coated paper from our North American business for the fiscal year grew ahead of industry shipments. Pulp sales volumes for the quarter fell both sequentially and on last year as a result of higher internal consumption. Paper orders and production were strong; however, sales volumes were down on both periods. This shortfall was due to factors that affected the timing of sales between quarters including reduced transport availability.

operating review for the quarter (continued)

4

Price increases were realised during the quarter. However, the price protection afforded to contract customers during the earlier weak market conditions has limited the pace at which we could implement new prices, despite current strong market conditions.

Our costs have been impacted by higher raw material prices. The largest increases compared to the same quarter last year were in wood and energy which were up US\$5 million and US\$3 million respectively. Higher oil prices started to have a knock-on impact on other purchased chemicals and also on transport costs which are already inflated due to tightness in transport markets.

5

sappi

The Forest Products business had strong demand in the South African market in the quarter but further Rand appreciation depressed prices as a result of greater competition from importers. Demand for our chemical cellulose (dissolving) pulp has been strong and prices increased slightly compared to the June 2004 quarter. The chemical cellulose pulp business continued to perform well.

Costs continued to be well managed and our fixed expenses were flat in Rand terms compared to the equivalent quarter last year.

Dividend

The board has declared a dividend of 30 US cents for the year ended September 2004. A dividend of 29 US cents was paid in the previous year.

Outlook

Many of the factors which affect demand for our products, including economic growth in our major markets and advertising spending, are favourable and are expected to sustain strong demand.

After an extended period of weak prices and overcapacity, demand improvement and higher operating rates support price increases in our major markets.

These benefits are likely to be more than offset in the near term by increased input costs, many of which are related to high energy prices.

The strength of the Rand against the US Dollar continues to place pressure on the price realisations of our South African business despite good demand for its products. The Rand has strengthened further since the end of the reporting period and if sustained at this level will have a detrimental effect on future earnings.

We are nonetheless positive about the outlook for our business. Operating rates are high and we expect significant price improvement in the beginning of the new calendar year. However, the result in our first financial quarter will reflect scheduled maintenance downtime across the group and repair work at Somerset with a direct cost of approximately US\$20 million. These costs, coupled with rising energy and raw materials prices and a charge from the implementation of a new South African accounting standard relating to secondary tax on companies (STC), will make it difficult for us to achieve positive earnings in the first financial quarter.

The directors have declared a dividend (number 81) of 30 US cents per share for the year ended September 2004. In compliance with the requirements of STRATE, the JSE Securities Exchange's electronic settlement system which is applicable to Sappi, the Salient dates in respect of the dividend will be as follows:

Last day to trade to qualify for dividend

Friday 31 December 2004

Date on which shares commence trading
ex-dividend

Monday 3 January 2005

Record date

Friday 7 January 2005

Payment date

Monday 10 January 2005

Dividends payable from the Johannesburg transfer office will be paid in South African Rands except that dividends paid to nominee shareholders in respect of shares which they hold on behalf of non-residents of the Republic of South Africa will, without exception, be paid in United States Dollars.

Dividends payable from the London transfer office will be paid in British pounds sterling or in the case of shareholders with registered addresses in the USA, in United States Dollars.

Dividends payable other than in United States Dollars will be calculated at the respective rates of exchange ruling on Tuesday, 21 December 2004.

There will not be any de-materialisation nor re-materialisation of Sappi Limited share certificates from 3 January to 7 January 2005, both days inclusive.

1. Basis of preparation

The annual financial statements are prepared in conformity with South African Statements of Generally Accepted Accounting Practice (SA GAAP). These quarterly results have been prepared in compliance with AC 127 (Interim financial reporting) and are based on accounting policies which are consistent with those used in the annual financial statements. The same accounting policies have been followed as in the annual financial statements for September 2003, except for the new agriculture accounting standard - Agriculture - AC 137 (IAS 41) which became effective from the beginning of the current financial year.

The effect on equity for the above change is reflected in the group statement of changes in shareholders' equity. The effect on net profit for the current quarter is an increase of US\$11 million, net of US\$3 million tax (June 2004 quarter: increase of US\$21 million, net of US\$11 million tax; September 2003 quarter: decrease of US\$1 million, minimal tax) and an increase of US\$47 million, net of US\$19 million tax for the year ended September 2004 (September 2003: a decrease of US\$6 million, net of US\$2 million tax). Where appropriate, comparative figures have been restated. The restatement has had minimal effect upon the basic and headline earnings per share for the September 2003 quarter, but decreased the basic and headline earnings per share by 3 US cents and 2 US cents for the year ended September 2003, respectively.

The preliminary results for the quarter have been reviewed in terms of South African Auditing Standards by the group's auditors, Deloitte & Touche. Their unqualified review report is available for inspection at the company's registered offices.

2. Comparative figures

Comparative figures have been restated to take into account the effects of the new agriculture accounting standard which became effective from the beginning of the current financial year. The effect on operating profit is the inclusion of the fair value changes in the value of plantations and the expensing of the costs incurred to establish and maintain plantations (silviculture costs) and the amortisation of interest which had been previously capitalised. Net finance costs have increased. In terms of the new accounting standard, interest is no longer capitalised to the carrying value of plantations.

The effect on the cash flow statement is a reclassification of investments in plantations from cash utilised in investing activities to cash generated by operations. Net cash flows remain the same.

Operating profit has been restated to take into account the requirements of circular 3/2004 issued by the South African Institute of Chartered Accountants. Previously non-trading (profit) loss items were excluded from operating profit. The impact of the inclusion is a decrease in operating profit of US\$31 million for the quarter and US\$27 million for the year ended September 2003.

Certain comparative amounts have been reclassified between deferred tax and current tax. This had no effect on reported net income or shareholders' equity.

definitions

Average - averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

* **EBITDA** - earnings before interest (net finance costs), tax, depreciation and amortisation

* **EBITDA to sales** - EBITDA divided by sales

Fellings - the amount charged against the income statement representing the standing value of the plantations harvested

Headline earnings - as defined in circular 7/2002 issued by the South African Institute of Chartered Accountants, separates from earnings all items of a capital nature. It is not necessarily a measure of sustainable earnings. It is a listing requirement of the JSE Securities Exchange South Africa to disclose headline earnings per share.

NBSK - Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, mainly produced from spruce trees in Scandinavia, Canada and north eastern USA. The price of NBSK is a benchmark widely used in the pulp and paper industry for comparative purposes.

* **Net assets** - total assets less current liabilities

* **Net asset value** - shareholders' equity plus net deferred tax

*

Net asset value per share - net asset value divided by the number of shares in issue at balance sheet date.

*

Net debt - current and non-current interest-bearing borrowings, and bank overdrafts (net of cash, cash equivalents and short-term deposits)

*

Net debt to total capitalisation - Net debt divided by shareholders' equity plus minority interest, non-current liabilities, current interest-bearing borrowings and overdraft

* **ROE** - return on average equity. Net profit divided by average shareholders' equity

* **RONA** - operating profit divided by average net assets

*

RONOA - operating profit divided by average net operating assets. Net operating assets are total assets (excluding deferred taxation and cash) less current liabilities (excluding interest-bearing borrowings and bank overdraft)

*

The above financial measures, other than headline earnings per share, are presented to assist our shareholders and the investment community in interpreting our financial results. These financial measures are regularly used and compared between companies in our industry.

In connection with the US Securities Exchange Commission ("SEC") rules relating to "Conditions for Use of Non-GAAP Financial Measures", we have reconciled EBITDA to net profit rather than operating profit and recalculated EBITDA to exclude interest (net finance costs), taxes, depreciation and amortisation (including fellingings). As a result our definition has been amended to retain other income/expenses (previously non-trading profit/loss) as part of EBITDA. The effect on EBITDA for the amended definition is a decrease of US\$31 million for the quarter and US\$27 million for the year ended September 2003 and a decrease of US\$4 million for the quarter and US\$4 million for the year ended September 2004.

We use EBITDA as an internal measure of performance and believe it is a useful and commonly used measure of financial performance in addition to operating profit and other profitability measures under SA GAAP. EBITDA is not a measure of performance under SA GAAP. EBITDA should not be construed as an alternative to operating profit as an indicator of the company's operations in accordance with SA GAAP. EBITDA is also presented to assist our shareholders and the investment community in interpreting our financial results. This financial measure is regularly used as a means of comparison of companies in our industry by removing certain differences between companies such as depreciation methods, financing structures and taxation regimes. Different companies and analysts may calculate EBITDA differently, so making comparisons among companies on this basis should be done very carefully.
