BOARD AUDIT COMMITTEE REPORT

Under the guidance of a written charter adopted by the Board of Directors, the Audit Committee is responsible for overseeing the Company's financial reporting process on behalf of the Board of Directors.

Management has the primary responsibility for the system of internal controls and the financial reporting process. The independent accountants have the responsibility to express an opinion on the financial statements based on an audit conducted in accordance with generally accepted auditing standards. The Audit Committee has the responsibility to monitor and oversee these processes.

In fulfilling its responsibilities, the Audit Committee recommended to the Board the selection of the Company's independent accountants, Grant Thornton, LLP. That firm has discussed with the Committee and provided written disclosures on (1) that firm's independence as required by the Independence Standards Board and (2) the matters required to be communicated under generally accepted auditing standards.

The Committee reviewed with the Vice President, Finance and the independent accountants the overall scope and specific plans for the respective audits as well as the results of their examinations, their evaluation of the Company's internal controls, and the overall quality of Aviation General's accounting and financial reporting.

Following these actions, the Committee recommended to the Board that the audited financial statements be included in the Company's Annual Report on form 10-K for the year ended December 31, 2001 for filing with the Securities and Exchange Commission.

Auditor Fees.

The fees billed to the Company by Grant Thornton, LLP for fiscal year 2001 were as follows:

Edgar Filing: AVIATION GENERAL INC - Form DEF 14A

Audit fees. Grant Thornton's fee for its audit of the Company's annual financial statements and its review of the Company's quarterly financial statements was \$36,450, all of which was billed in fiscal year 2002.

Other fees. Grant Thornton billed the Company a total of \$3,670 for services rendered that are not described above.

-9-

The Committee has considered whether the provision of the services included in the category "other fees" is compatible with maintaining Grant Thornton's independence.

The one Director who currently serves on the Audit Committee is "independent" for purposes of the listing standards that apply to companies listed on the Nasdaq Stock Market.

THE AUDIT COMMITTEE
N. Gene Criss

BOARD COMPENSATION COMMITTEE REPORT ON EXECUTIVE COMPENSATION

The Compensation Committee of the Board of Directors (the "Committee") is composed of Mr. N. Gene Criss. The Committee is charged with the responsibility of reviewing the performance and approving the compensation of key executives and for establishing general compensation policies and standards for reviewing management performance. The Committee also reviews both corporate and key executive performance in light of established criteria and goals and approves individual key executive compensation.

Compensation Philosophy

The executive compensation philosophy of the Company is to provide competitive levels of compensation that advance the Company's annual and long-term performance objectives, reward corporate performance, and assist the Company in attracting, retaining and motivating highly qualified executives. The framework for the Committee's executive compensation programs is to establish base salaries which are competitive with similarly sized companies and to create incentives for excellent performance by providing executives with the opportunity to earn additional remuneration linked to the Company's profitability. The incentive plan goals are designed to improve the effectiveness and enhance the efficiency of Company operations and to create value for stockholders. It is also the Company's policy to encourage share ownership by executive officers and non-employee directors through the grant of stock options.

Components of Compensation

The compensation package of the Company's executive officers consists of base annual salary, participation in the Company's Profit Sharing Plan and stock option grants.

At executive levels, base salaries are reviewed but not necessarily increased annually. Base salaries are fixed at levels slightly below competitive amounts paid to individuals with comparable qualifications, experience and

Edgar Filing: AVIATION GENERAL INC - Form DEF 14A

responsibilities engaged in similar businesses as the Company, based on the experience of the Committee members, directors and employees of the Company within the aviation industry.

The Company has adopted a Profit Sharing Plan, which is intended to advance the interests of the Company by providing eligible employees with an annual incentive to increase the productivity of the Company. Unless the Board of Directors determines otherwise prior to the end of a fiscal year, the Profit Sharing Plan provides for payment to selected employees of an aggregate of 10% of the consolidated pre-tax profits of the Company for the fiscal year. The Compensation Committee administers the Profit Sharing Plan and selects the employees who will receive profit sharing awards. Profit sharing awards are based upon an employee's salary, level of responsibility and attainment of performance goals and objectives. Profit sharing awards are paid as soon as practicable following the end of the fiscal year.

-10-

The Company uses stock options both to reward past performance and to motivate future performance, especially long-term performance. The Committee believes that through the use of stock options, executive interests are directly tied to enhancing shareholder value. Stock options are granted at fair market value as of the date of grant and generally have a term of three to five years. The options vest 33% per year, beginning on the first anniversary date of the grant. The stock options provide value to the recipients only when the market price of the Company's Common Stock increases above the option grant price and only as the shares vest and become exercisable.

Section 162(m) of the Internal Revenue Code, which provides for a \$1,000,000 limit on the deductibility of compensation, presently is not applicable to the Company. The Committee will review its policy with respect to Section 162(m) when and if the section is applicable in the future.

Compensation of Chief Executive Officer

The Committee makes decisions regarding the compensation of the Chief Executive Officer using the same philosophy set forth above. The Committee's approach in setting the Chief Executive Officer's base compensation, as with that of the Company's other executives, is to be competitive with other companies within the industry, taking into consideration company size, operating conditions and compensation philosophy and performance. Mr. Walker's base salary was decreased during fiscal 2001 to an annual salary of \$120,000. Mr. Walker's fiscal 2001 incentive compensation was earned under the same performance criteria that were described previously in this report. He was granted options to purchase a total of 120,000 shares of the Company's common stock during fiscal 2001, of which 20,000 shares represents the automatic grant to directors.

PROPOSAL TWO

AMENDMENT OF 1993 STOCK OPTION PLAN

Introduction

Edgar Filing: AVIATION GENERAL INC - Form DEF 14A

The Board of Directors of the Company has unanimously approved a resolution, subject to shareholder approval, approving an amendment to the Company's 1993 Stock Option Plan (the "Plan") to increase the number of shares of Common Stock that may be issued pursuant to stock options granted there under by 750,000 shares. Before giving effect to the proposed amendment, 481,450 shares of Common Stock remain available for issuance pursuant to the Plan.

The Board of Directors recommends that shareholders vote for the amendment of the Plan. The Board believes the Plan provides a means for key employees and directors upon whose judgment and interest the Company is and will be largely dependent for the successful conduct of its business to increase their personal ownership interest in the Company. It is believed that such incentive awards will further the identification of directors' and key employees' interests with those of the Company. No determination has been made as to the amount of options to be granted to any individual.

-11-

A summary of the Company's 1993 Stock Option Plan follows.

Eligibility

All employees of the Company or any parent or subsidiary of the Company whom the Committee determines to be key employees are eligible to receive stock options under the Plan. The Company estimates that it currently has approximately fifteen such employees (three of whom are officers).

The Plan also provides that both employee directors and non-employee directors are eligible for automatic grants of options. A non-employee director is eligible to receive an option under the Plan if such director is not otherwise an employee of the Company or any subsidiary and was not an employee of the Company or subsidiary for a period of at least one year before the date of grant of an option under the Plan. Three members of the Board presently qualify for the automatic grant of options under the Plan.

Administration

The Plan will be administered by the Compensation Committee, which is comprised of at least two directors of the Company who are not eligible for discretionary grants of options under the Plan or any similar plan of the Company. In addition to having general supervisory and interpretive authority over the Plan, the Committee determines, upon the recommendation of management and subject to the terms and limits of the Plan, the employees, if any, to whom options will be granted, the time at which options are to be granted, the number of shares to be subject to each option, and the terms and conditions of exercise of options.

Award of Stock Options

Employees. Options to purchase shares of Common Stock granted to employees under the Plan may be incentive stock options or non-statutory stock options. Incentive stock options qualify for favorable income tax treatment under Code Section 422, while non-statutory stock options do not. The exercise price of shares of Common Stock covered by an incentive stock option may not be less than 100% (or, in the case of an incentive stock option granted to a 10% shareholder, 110%) of the fair market value of the Common Stock on the date of the option grant. The option price of Common Stock covered by a non-statutory

Edgar Filing: AVIATION GENERAL INC - Form DEF 14A

stock option granted to an employee may not be less than 85% of the fair market value of the Common Stock on the date of grant.

An incentive stock option shall be exercisable in any calendar year only to the extent that the aggregate fair market value (determined at the date of grant) of the Common Stock with respect to which incentive stock options are exercisable for the first time during the calendar year does not exceed \$100,000.

Options may be exercised in whole or in part at such times as may be specified by the Committee in the Participant's stock option agreement; provided that, the exercise provisions for incentive stock options shall in all events not be more liberal than certain restrictions set forth in the Plan.

-12-

Directors. Each eligible non-employee director and employee director of the Company on the effective date of the Plan, and subsequently on each anniversary of the effective date of the Plan, automatically will receive an option to purchase 20,000 shares of Common Stock. Eligible directors may receive multiple annual automatic grants of options pursuant to the terms of the Plan.

The terms and conditions that apply to each such automatic grant shall be as follows: (a) the exercise price per share of Common Stock covered by each such option shall be equal to the fair market value on the date of grant; (b) the option by its term shall expire five years after the date of grant; (c) each option shall be exercisable ratably over three years in increments of 33 1/3% per year commencing on the first anniversary of the date of grant; (d) the option may be exercised by one of the methods described in "Exercise of Options"; and (e) all other terms and conditions applicable to the holding and exercise of the option shall conform to the Company's then current form of option agreement to the extent not inconsistent with the terms of the Plan applicable to incentive stock options.

General

If a stock option is canceled, terminates or lapses unexercised, any un-issued shares allocable to such option may be subjected again to an option. The Committee is expressly authorized to make an award to a Plan Participant (other than a non-employee director) conditioned upon the surrender for cancellation of an existing stock option.

Adjustments will be made in the number of shares which may be issued under the Plan in the event of a future stock dividend, stock split or similar pro rata change in the number of outstanding shares of Common Stock or the future creation or issuance to shareholders generally of rights, options or options for the purchase of Company Common Stock or preferred stock.

Exercise of Options

Generally, an option may only be exercised by payment of the full purchase price in cash. If the option so provides, the option may be exercised by delivering an exercise notice together with irrevocable instructions to a broker to promptly deliver to the Company the amount of sale or loan proceeds from the option shares to pay the exercise price. An option may be exercisable on or after the date of grant.

Transferability of Stock Options

No option may be sold, transferred, pledged, or otherwise disposed of, other than by will or by the laws of descent and distribution. All rights granted to a participant under the Plan shall be exercisable during his or her lifetime only by such participant, or the participant's guardians or legal representatives. Upon the death of a participant, his or her personal representative or beneficiary may exercise the participant's rights under the Plan.

Amendment of the Plan and Stock Options

The Board of Directors may amend the Plan in such respects as it deems advisable; provided that the shareholders of the Company must approve any amendment that would (i) materially increase the benefits accruing to participants under the Plan, (ii) materially increase the number of shares of Common Stock that may be issued under the Plan, or (iii) materially modify the requirements of eligibility for participation in the Plan. Stock options granted under the Plan may be amended with the consent of the recipient so long as the amended award is consistent with the terms of the Plan.

Federal Income Tax Consequences

An employee or director will not incur federal income tax when he or she is granted a stock option.

Upon exercise of a non-statutory stock option, an employee or director generally will recognize ordinary income (which in the case of an employee is subject to income tax withholding by the Company) equal to the difference between the fair market value of the Common Stock on the date of the exercise and the option price. When an employee exercises an incentive stock option, he generally will not recognize income, unless he is subject to the alternative minimum tax. Non-employee directors are not granted incentive stock options under the Plan.

The Company usually will be entitled to a business expense deduction at the time and in the amount that the recipient of an incentive award recognizes ordinary compensation income in connection therewith. As stated above, this usually occurs upon exercise of non-statutory options or the sale or other impermissible disposition of an incentive stock option before the applicable holding period has expired.

Generally, the Company's deduction is contingent upon the Company's meeting withholding tax requirements as to employees; however, tax legislation, enacted August 10, 1993, generally imposes a \$1,000,000 limitation on the amount of the annual compensation deduction allowable to a publicly-held company in respect of its chief executive officer and its four most highly paid officers. An exception is provided for certain performance-based compensation if certain shareholder approval and outside director requirements are satisfied. Because of certain interpretational issues under the statutory provisions, and in the absence of Internal Revenue Service regulations, there can be no assurance that any of the options granted under the Plan will qualify for this exception. No deduction is allowed in connection with an incentive stock option, unless the employee disposes of Common Stock received upon exercise in violation of the holding period requirements.

PERFORMANCE GRAPH

The Securities and Exchange Commission requires that the Corporation include in this Proxy Statement a line-graph presentation comparing cumulative, five year shareholder returns on an indexed basis with (i) a broad equity market index and (ii) either an industry index or peer group. The following graph compares the percentage change in the cumulative total stockholder return on the Company's Common Stock against the cumulative total return of the NASDAQ Stock Market-US Index and the Standard & Poor's Aerospace/Defense Industry Index. Total return for the purpose of this graph assumes reinvestment of all dividends, if any. The stock price performance shown on the graph is not necessarily indicative of future price performance.

CERTAIN TRANSACTIONS

On May 9, 2001, the Company borrowed \$200,000 in the form of an unsecured note payable bearing interest at 9% and due on demand from an entity affiliated with the Company's Chairman of the Board of Directors. On August 3, 2001, the Company issued 200,000 shares of common stock having a fair value at the date of issue of \$120,000 in exchange for a \$100,000 reduction in the note payable and interest expense of \$20,000. On October 18, 2001, the affiliate assigned the note payable with an outstanding balance of \$85,000 to a stockholder.

At December 31, 2001, amounts payable for brochures and publications to a company affiliated with the Chairman of the Board of Directors were approximately \$33,000. Purchases from this entity were approximately \$38,000, \$15,000 and \$200,000 for the years ended December 31, 2001, 2000 and 1999, respectively.

In prior years, the Company extended financing for aircraft and spare parts sold to an international dealer, Authorized Sales and Service Representative (ASSR), owned by a former director and major shareholder of the Company, under a line of credit of up to \$5,000,000. At December 31, 2001, the unpaid balance on this credit line was \$1,529,889. The Company has made efforts to collect the amount owed under this line, including repeated requests for payment, attempts to obtain or cancel approximately 800,000 shares of common

Edgar Filing: AVIATION GENERAL INC - Form DEF 14A

stock of the Company collateralizing the line and attempts to block ownership transfers of said shares. However, during 2001, the ASSR went out of business and the individual suffered other business reversals. In addition, the individual resigned from the Company's Board of Directors in 2001 and all of his stock options were cancelled. Due to the uncertainties relating to ultimate collectivity, during the fourth quarter of 2001, the Company recorded bad debt expense relating to this line of credit for the outstanding balance of \$1,529,889. In addition, the Company wrote off accrued, unpaid interest of \$115,977. Bad debt expense of \$1,529,889 is recorded in other operating expenses and the write-off of interest of \$115,977 is recorded as an offset to interest income in the 2001 statement of operations. Management intends to continue the attempt to collect on amounts owed and continue the attempt to take possession of the common stock collateralizing the line.

A representative of Grant Thornton LLP may be present at the Annual Meeting and have an opportunity at the meeting to make a statement if he desires to do so and be available to respond to appropriate questions.
