NEWS RELEASE

Release Time IMMEDIATE

Date 23 July 2008

Number 26/08

BHP BILLITON PRODUCTION REPORT FOR THE YEAR ENDED 30 JUNE 2008

Annual production was significantly up in 13 commodities, with records achieved in seven commodities. These records were delivered in 14 assets across six of our nine Customer Sector Groups (CSG). This was achieved in an environment in which supply disruptions and input cost pressures are placing challenges on the industry response to continued strong global demand for commodities.

We achieved record shipments in iron ore and manganese, at a time when pricing reached unprecedented levels and demand outlook remains very strong. Western Australia Iron Ore achieved an eighth consecutive annual production record, maintaining an exceptional track record of project delivery. Metallurgical coal production recovered strongly from the extreme weather interruptions during the March 2008 quarter.

Newly commissioned petroleum projects in fiscally stable regimes contributed to a record performance. Ramp up of production from these projects and future growth options will continue to increase the weighting of high margin liquids in our portfolio mix at a time of historically high oil prices.

We continue to develop and deliver world class projects that add significant shareholder value. First product was delivered from 10 major projects across five commodities during the year. A further seven major projects were sanctioned during the period. Over the past quarter we announced a significant increase in our iron ore and manganese resources and reserves. This, along with the Pampa Escondida prospect (Chile), are excellent examples of our deep inventory of expansion options. These options are underpinned by an extensive exploration and development program.

- » Annual production records achieved in petroleum, copper, iron ore, manganese ore and alloy, alumina and molybdenum. Annual production also increased in crude oil and condensate, uranium, lead, zinc, silver and diamonds.
- » Quarterly production records achieved in alumina, copper, iron ore and manganese ore.
- » Annual production records delivered in Western Australia Iron Ore, GEMCO, TEMCO, Illawarra Coal, Hunter Valley Coal, Minerva and Worsley (all Australia), Escondida (Chile), Samarco and Alumar (both Brazil), Samancor (South Africa), Cerrejon Coal (Colombia), Zamzama (Pakistan) and Paranam (Suriname).
- » Quarterly production records delivered in Escondida, Yabulu (Australia), Western Australia Iron Ore, GEMCO, Samarco, Samancor, Alumar and New Mexico Coal (USA).
- » Annual volume growth of 27 per cent in crude oil and condensate from the continuing ramp up of newly commissioned projects and strong operational performance.
- » Annual uranium oxide concentrate production at Olympic Dam (Australia) was the highest since the Western Mining (WMC) acquisition.

Crude Oil, Condensate and Natural Gas Liquids ('000 bbl) (a)	68,168	20,331	20%	41%	10%
Natural Gas (bcf) (a)	368.01	95.37	5%	2%	11%
Total Petroleum Products (million boe) (a)	129.50	36.23	13%	20%	11%

Total Petroleum Products – Strong growth in production mainly due to the continued ramp up of Stybarrow (Australia), Genghis Khan and Atlantis (both USA), excellent operated facility performance and record natural gas production. Record quarterly production and a 13 per cent year on year volume growth is a strong start to our expected 10 per cent compound annual growth rate through to financial year 2011.

Crude Oil, Condensate and Natural Gas Liquids – Production was higher than all comparative periods due to significant growth in high margin crude production. Continued ramp up of new projects and successful development drilling more than offset natural field decline in existing fields.

Natural Gas – Second consecutive record annual production due to increased demand in Australia as well as continued strong market growth in Pakistan.

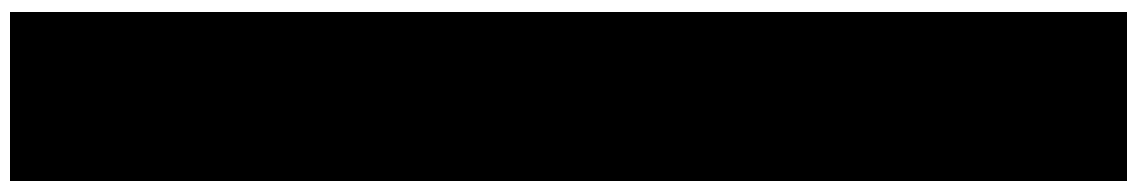

Alumina ('000 tonnes)	4,554	1,149	2%	0%	5%
Aluminium ('000 tonnes)	1,298	305	-3%	-9%	-4%

Alumina – Annual production and sales records were achieved for the second consecutive year. All operations achieved record annual output. Worsley operated consistently above the expanded nameplate capacity.

Production was marginally higher than the March 2008 quarter.

Aluminium – Southern African smelters continued to operate at reduced levels to comply with the mandatory reduction in power consumption. This was in part offset by equal annual record production from Alumar.

Copper ('000 tonnes)	1,375.5	390.7	10%	14%	19%
Lead (tonnes)	253,126	53,176	19%	-15%	-22%
Zinc (tonnes)	144,490	43,454	22%	11%	21%
Silver ('000 ounces)	43,487	9,236	19%	-21%	-18%
Uranium Oxide Concentrate (Uranium) (tonnes)	4,144	1,027	19%	4%	3%

Copper – A third consecutive annual production record was set with the continued ramp up of Escondida Sulphide Leach and Spence (both Chile) and Pinto Valley (USA). In aggregate, these projects contributed 244,300 tonnes for the year ended June 2008. This was achieved despite the impact of two earthquakes in Chile in the December 2007 quarter.

Production increased by 19 per cent versus the March 2008 quarter. In addition, Olympic Dam performed at the highest level since the WMC acquisition, with the build up of underground stockpiles progressing according to the development program.

At 30 June 2008, the Group had 327,941 tonnes of outstanding copper sales that were revalued at a weighted average price of US\$8,555 per tonne. The final price of these sales will be determined in the 2009 financial year. In addition, 311,410 tonnes of copper sales were subject to a finalisation adjustment from the prior period. The finalisation adjustment and provisional pricing impact as at 30 June 2008 increased earnings(b) by US\$225 million for the period.

Total copper production at Escondida is expected to decline by approximately 10 to 15 per cent in the 2009 financial year compared to the 2008 financial year levels due to lower ore grade. Production is then expected to continue at similar levels to the 2009 financial year. The Escondida resource base presents numerous options for delivering production growth in future years, which are currently under study. Exciting results from exploration of the Escondida mining lease are being obtained in areas close to existing infrastructure and processing facilities, including the new Pampa Escondida prospect. Refer to BHP Billiton's Quarterly Exploration and Development Report, also released today, for further information.

Lead – Production for the year ended June 2008 increased due to the completion of the Cannington (Australia) rehabilitation project. Production was lower compared to the March 2008 and June 2007 quarters due to reduced mill throughput and head grades.

Zinc – Production was higher than all comparative periods mainly due to improved grade and an increased proportion of zinc containing ore being processed at Antamina (Peru). The completion of the Cannington rehabilitation project also positively impacted production for the year ended June 2008.

Silver – Production for the year ended June 2008 improved significantly due to the successful completion of the Cannington rehabilitation project and record performance from Escondida and Antamina. Production decreased versus the March 2008 and June 2007 quarters primarily due to lower head grades at Cannington.

Uranium – Production increased significantly due to improvement in recovery and leach circuit performance at Olympic Dam. Olympic Dam achieved the highest production since the WMC acquisition and an all time record of ore hoisted and material milled.

Third party products were purchased from the spot market to meet contractual requirements. This decreased earnings (b) by US\$187 million for the financial year.

Diamonds ('000 carats)	3,349	8644%	-5%	39%
------------------------	-------	-------	-----	-----

Diamonds – Production increased compared to the March 2008 quarter mainly due to a record volume of ore processed during the quarter. As Ekati (Canada) transitions from open pit mining to underground mining the mix of ore processed will change from time to time. In the year ended June 2008, Ekati processed a higher proportion of higher value carats from both Koala and Panda undergrounds versus the year ended June 2007.

Nickel ('000 tonnes)	167.9	42.6	-10%	-12%	-1%
----------------------	-------	------	------	------	-----

Nickel – Production for the year ended June 2008 was impacted by industrial stoppage at Cerro Matoso (Colombia), wet weather interruptions at Yabulu and scheduled maintenance across all operations. This was partially offset by strong production from the Kwinana Nickel Refinery (Australia) and the continued ramp up of Ravensthorpe and the

Yabulu Expansion Project (both Australia). The start up of operations at Ravensthorpe and the Yabulu Expansion Project adversely impacted earnings(b) by US\$313 million for the year ended June 2008.

Towards the end of the June 2008 quarter, Kalgoorlie Nickel Smelter (Australia) commenced a major rebuild of the furnace. The duration of the rebuild is estimated to be around four months. Kwinana Nickel Refinery production will be impacted for the duration of the rebuild.

- 4 -

Iron ore ('000 tonnes) (c)	111,319	29,673	13%	15%	6%
----------------------------	---------	--------	-----	-----	----

Iron Ore – Record production and shipments were achieved for the year and quarter ended June 2008. Western Australia Iron Ore and Samarco (Brazil) set annual and quarterly production records. Successful delivery of ongoing expansion projects led to an eighth consecutive annual production record at our Western Australian iron ore operations. The Samarco expansion project delivered first production during the quarter and continues to ramp up in line with schedule.

With the successful ramp up of Western Australia Iron Ore Rapid Growth Project 3 and continuous operational improvement, Western Australia Iron Ore is expected to produce 137 million tonnes (100 per cent basis) in the next financial year.

Manganese Ore ('000 tonnes)	6,575	1,851	9%	22%	11%
Manganese Alloy ('000 tonnes)	775	190	6%	2%	-1%

Manganese Ore – Production for the year and quarter ended June 2008 were all time records for all operations. South African operations achieved a third consecutive quarterly record despite the impact of the mandatory 10 per cent reduction in power consumption. Furthermore, GEMCO production benefited from the implementation of improvement initiatives in preparation for the expansion project.

Manganese Alloy – Record annual production due to improved facility availability and utilisation at TEMCO and Samancor. This was achieved despite the impact of the mandatory 10 per cent reduction in power consumption and load shedding in South Africa.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

1. Description of Business and Summary of Significant Accounting Policies

Description of Business- Innodata Inc. and subsidiaries (the “Company”) is a global provider of business process, information technology and professional services that are focused on digital enablement. Innodata’s clients comprise several of the world’s leading digital retailers that sell digital content; preeminent publishers and other providers of online business information products; and enterprises in information-intensive industries (such as aerospace, defense, financial services, healthcare, high technology, insurance, and manufacturing) that create and manage large volumes of content to support their products or operations.

The Company operates in two reporting segments: Content Services (CS) and Innodata Advanced Data Solutions (IADS).

The Company’s CS segment provides solutions to digital retailers, information services companies, publishers and enterprises that have one or more of the following broad business requirements: development of digital content (including eBooks); development of new digital information products; and operational support of existing digital information products and systems.

The Company formed its IADS segment in mid-2011 to design and develop new capabilities to enable clients in the financial services, insurance, medical and healthcare sectors to improve decision-support through digital technologies. The Company believes that by creating and commercializing innovative business strategies and technology solutions it will be able to accelerate growth and reduce revenue volatility. IADS operates through two subsidiaries. Synodex offers a range of services for healthcare, medical and insurance companies, and docGenix provides services to financial services institutions. As of June 30, 2013, Innodata owns 85% of Synodex and 94% of docGenix, both limited liability companies.

Basis of Presentation-The condensed consolidated financial statements for the interim periods included herein are unaudited; however, they contain all adjustments (consisting of only normal recurring adjustments) which, in the

opinion of management, are necessary to present fairly the consolidated financial position of the Company as of June 30, 2013, and the results of its operations and comprehensive income (loss), cash flows and stockholders' equity for the six months ended June 30, 2013 and 2012. The results of operations for the interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year.

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2012, included in the Company's Annual Report on Form 10-K. Unless otherwise noted, the accounting policies used in preparing these condensed consolidated financial statements are the same as those described in the December 31, 2012 consolidated financial statements.

Principles of Consolidation-The condensed consolidated financial statements include the accounts of Innodata Inc. and its wholly-owned subsidiaries and the Synodex and docGenix limited liability companies that are majority-owned by the Company. The non-controlling interests in the Synodex and docGenix limited liability companies are accounted for in accordance with Financial Accounting Standards Board (FASB) non-controlling interest guidance. All significant intercompany transactions and balances have been eliminated in consolidation.

INNODATA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

Use of Estimates-In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include those related to revenue recognition, allowance for doubtful accounts and billing adjustments, long-lived assets, goodwill, valuation of deferred tax assets, valuation of securities underlying stock-based compensation, litigation accruals, pension benefits, valuation of derivative instruments and estimated accruals for various tax exposures.

Recent Accounting Pronouncements- In the first quarter of 2013, the Company adopted changes issued by the FASB to the reporting of amounts reclassified out of accumulated other comprehensive income. These changes require an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required to be reclassified in its entirety to net income. For other amounts that are not required to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures that provide additional detail about those amounts. These requirements are to be applied to each component of accumulated other comprehensive income. Other than the additional disclosure requirements, the adoption of these changes had no impact on the Company's condensed consolidated financial statements.

2.

Income Taxes

The Company had unrecognized tax benefits of approximately \$2.2 million at June 30, 2013 and December 31, 2012. The portion of unrecognized tax benefits relating to interest and penalties was approximately \$0.7 million at June 30, 2013 and December 31, 2012, respectively. The unrecognized tax benefits as of June 30, 2013 and December 31, 2012, if recognized, would have an impact on the Company's effective tax rate.

The following presents a roll-forward of the Company's unrecognized tax benefits and associated interest for the six months ended June 30, 2013 (amounts in thousands):

	Unrecognized tax benefits
Balance - January 1, 2013	\$ 2,350
Interest accrual	27
Foreign currency revaluation	(200)
Balance – June 30, 2013	\$ 2,177

The Company is subject to Federal income tax, as well as income tax in various states and foreign jurisdictions. The Company is no longer subject to examination by Federal tax authorities for years prior to 2006 and by New Jersey tax authorities for years prior to 2012. Various foreign subsidiaries currently have open tax years from 2003 through 2012.

INNODATA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

Pursuant to an income tax audit by the Indian Bureau of Taxation in March 2006, one of the Company's Indian subsidiaries received a tax assessment approximating \$273,000, including interest, through June 30, 2013, for the fiscal tax year ended March 31, 2003. Management disagreed with the basis of the tax assessment and filed an appeal with the Appeal Officer against the assessment. In October 2010, the matter was resolved with a judgment in the Company's favor. Under the Indian Income Tax Act, however, the income tax assessing officer has the right to appeal against the judgment passed by the Appeal Officer. In December 2010, the income tax assessing officer exercised this right, against which the Company has filed an application to defend the case, and the Company intends to contest it vigorously. The Indian Bureau of Taxation has also completed an audit of the Company's Indian subsidiary's income tax return for the fiscal tax year ended March 31, 2004. The ultimate outcome was favorable, and there was no tax assessment imposed for the fiscal tax year ended March 31, 2004. In 2008 and 2009, the Indian subsidiary received a final tax assessment for the fiscal years ended March 31, 2005 and 2006 from the Indian Bureau of Taxation. The tax assessment amounted to \$295,000 and \$292,000, including interest through June 30, 2013, for the fiscal years ended March 31, 2005 and 2006, respectively. Management disagrees with the basis of these tax assessments, has filed an appeal against the assessments and is contesting them vigorously. In January 2012, the Indian subsidiary received a final tax assessment of approximately \$1.0 million, including interest, for the fiscal year ended March 31, 2008, from the Indian Bureau of Taxation. Management disagrees with the basis of this tax assessment, and has filed an appeal against it. Due to this assessment, the Company recorded a tax provision amounting to \$455,000 including interest through June 30, 2013. Based on recent experience and the current regulatory environment, management believes that the tax provision of \$455,000 including interest is adequate. The Indian Bureau of Taxation has also completed an audit of the Company's Indian subsidiary's income tax return for the fiscal tax year ended March 31, 2009. The ultimate outcome was favorable, and there was no tax assessment imposed for the fiscal tax year ended March 31, 2009. The Indian Bureau of Taxation commenced an audit of this subsidiary's income tax return for the fiscal year ended March 31, 2010. The ultimate outcome cannot be determined at this time. As the Company is continually subject to tax audits by the Indian Bureau of Taxation, the Company assessed the likelihood of an unfavorable assessment for all fiscal years for which the Company has not been audited as of June 30, 2013, and recorded additional tax provisions in prior quarters amounting to \$862,000 including interest through June 30, 2013.

In January 2013, one of the Company's Philippine subsidiaries received an informal tax assessment for an amount totaling \$3.8 million for the year ended December 31, 2009. The Company has not yet received a formal notice of this assessment and the statute of limitations expired on April 15, 2013 for formal notice of the assessment. Management believes that it is reasonably likely that it will be successful in contesting an assessment, if any. Accordingly, the Company recorded no tax provision on said informal tax assessment. The Company will continuously monitor this matter and will record an appropriate tax provision in the event there is any change in circumstances.

3. Commitments and Contingencies

Line of Credit-The Company has a \$15.0 million line of credit pursuant to which it may borrow up to 80% of eligible accounts receivable. Borrowings under the credit line bear interest at the bank's alternate base rate plus 0.5%, or LIBOR plus 2.5%. The line, which expires in June 2014, is collateralized by the Company's accounts receivable. The Company has no outstanding obligations under this credit line as of June 30, 2013.

Litigation-In 2008, the Supreme Court of the Republic of the Philippines refused to review a decision of the Court of Appeals in Manila against a Philippines subsidiary of the Company that is inactive and has no material assets, and purportedly also against Innodata Inc., that orders the reinstatement of certain former employees of the subsidiary to their former positions and also orders the payment of back wages and benefits that aggregate approximately \$8.5 million. Based on consultation with legal counsel, the Company believes that recovery against the Company is unlikely.

INNODATA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

The Company is also subject to various legal proceedings and claims which arise in the ordinary course of business.

While management currently believes that the ultimate outcome of these proceedings will not have a material adverse effect on the Company's financial position or overall trends in results of operations, litigation is subject to inherent uncertainties. Substantial recovery against the Company in the above-referenced Philippines actions could have a material adverse impact on the Company, and unfavorable rulings or recoveries in the other proceedings could have a material adverse impact on the operating results of the period in which the ruling or recovery occurs. In addition, the Company's estimate of potential impact on the Company's financial position or overall results of operations for the above legal proceedings could change in the future.

The Company's legal reserves related to legal proceedings and claims are based on a determination of whether or not a loss is probable. The Company reviews outstanding proceedings and claims with external counsel to assess probability and estimates of loss. The reserves are adjusted if necessary. While the Company intends to defend these matters vigorously, adverse outcomes that it estimates could reach approximately \$300,000 in aggregate beyond recorded amounts are reasonably possible. If circumstances change, the Company may be required to record adjustments that could be material to its reported financial condition and results of operations.

4. Stock Options

The Company adopted, with stockholder approval, the Innodata Inc. 2013 Stock Plan (the "2013 Plan"). The maximum number of shares of common stock that may be delivered, purchased or used for reference purposes with respect to awards granted under the 2013 Plan is 1,041,096 shares, plus any shares subject to an award or portion of any award under the Innodata Isogen, Inc. 2009 Stock Plan, as amended and restated (the "Prior Plan") that were outstanding as of June 4, 2013 that expire or terminate unexercised, become unexercisable or are forfeited or otherwise terminated, surrendered or cancelled as to any shares without the delivery of shares of stock or other consideration. Shares of stock subject to options or stock appreciation rights ("SARs") granted under the 2013 Plan count against the share reserve as one share for every one share subject to such option or SAR and shares subject to any other type of award granted under the 2013 Plan count against the share reserve as two shares for every one share subject to such award. If any award, or portion of an award, under the 2013 Plan expires or terminates unexercised, becomes unexercisable or is

forfeited or otherwise terminated, surrendered or canceled as to any shares without the delivery of shares of stock or other consideration, the shares subject to such award will thereafter be available for further awards under the 2013 Plan as provided in the next sentence. Shares of stock that again become available for awards pursuant to the expiration, termination, forfeiture or cancellation of any award (other than an option or SAR) granted under the 2013 Plan, or of any award (other than an option or SAR) granted after March 31, 2011 under the Prior Plan, will be added back as two shares for every one share subject to such award or Prior Plan award. All other awards under the 2013 Plan and all other awards under the Prior Plan will be added back as one share for every one share subject to such award or Prior Plan award. The number of shares used for reference purposes in connection with these awards will be considered "delivered" for purposes of computing the maximum number of shares that may be delivered under the Plan.

A summary of option activity under the Company's stock option plans as of June 30, 2013, and changes during the period then ended, is presented below:

INNODATA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value

Total stock-based compensation	\$ 211	\$ 303	\$ 489	\$ 582

5. Comprehensive Income (loss)

Accumulated other comprehensive income (loss), as reflected in the condensed consolidated balance sheets, consists of pension liability adjustments, net of taxes, and changes in fair value of derivatives, net of taxes. The components of accumulated other comprehensive income (loss) as of June 30, 2013, and reclassifications out of accumulated other comprehensive income (loss) for the six months ended June 30, 2013 and 2012, were as follows (net of tax):

Balance at June 30, 2012	\$ 113	\$ (362)	\$ (249)

6. Segment Reporting and Concentrations

The Company's operations are classified into two reportable segments: Content Services (CS) and Innodata Advanced Data Solutions (IADS).

The CS segment provides solutions to digital retailers, information services companies, publishers and enterprises that have one or more of the following broad business requirements: development of digital content (including eBooks); development of new digital information products; and operational support of existing digital information products and systems.

In the second quarter of 2011, the Company launched its IADS segment to perform advanced data analysis. IADS operates through two subsidiaries: Synodex and docGenix. Synodex offers a range of data analysis services in the healthcare, medical and insurance areas. DocGenix provides services to certain financial services institutions.

A significant portion of the Company's revenues are generated from its production facilities in the Philippines, India, Sri Lanka and Israel.

Revenues from external clients and segment operating profit (loss), and other reportable segment information are as follows (in thousands):

INNODATA INC. AND SUBSIDIARIES**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****SIX MONTHS ENDED JUNE 30, 2013 AND 2012****(Unaudited)**

	Three months ended June 30,		Six months ended June 30,

⁽¹⁾ Before elimination of any inter-segment profits.

Income (loss) before provision for (benefit from) income taxes for CS and IADS was \$0.6 million and \$(2.1) million, respectively, for the three months ended June 30, 2013, after eliminating inter-segment profits. Income (loss) before provision for (benefit from) income taxes for CS and IADS was \$1.3 million and \$(3.2) million, respectively, for the six months ended June 30, 2013, after eliminating inter-segment profits.

Income (loss) before provision for income taxes for Content Service and IADS was \$3.7 million and \$(1.7) million, respectively, for the three months ended June 30, 2012, after eliminating inter-segment profits. Income (loss) before provision for income taxes for Content Service and IADS were \$8.9 million and \$(3.2) million, respectively, for the six months ended June 30, 2012, after eliminating inter-segment profits.

INNODATA INC. AND SUBSIDIARIES**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****SIX MONTHS ENDED JUNE 30, 2013 AND 2012****(Unaudited)**

The following table summarizes revenues by geographic region (determined based upon customer's domicile) (in thousands):

	Three months ended		Six months ended	
	June 30, 2013	2012	June 30, 2013	2012
Unites States	\$ 10,992	\$ 17,813	\$ 22,903	\$ 37,846
United Kingdom	1,813	2,004	3,662	4,151
The Netherlands	2,151	1,780	4,210	3,477
Other - principally Europe	1,204	1,171	2,288	2,430
	\$ 16,160	\$ 22,768	\$ 33,063	\$ 47,904

Long-lived assets as of June 30, 2013 and December 31, 2012, respectively, by geographic region, are comprised of (in thousands):

	June 30, 2013	December 31, 2012
United States	\$ 4,729	\$ 3,978
Foreign countries:		
Philippines	1,995	1,424
India	4,953	4,926
Sri Lanka	1,022	931
Israel	45	72
Total foreign	8,015	7,353
	\$ 12,744	\$ 11,331

Two clients generated approximately 28% and 47% of our total revenues for the three months ended June 30, 2013 and 2012, respectively. Two additional clients accounted for 26% of our total revenues for the three months ended June 30, 2013 but each accounted for less than 10% of our total revenues for the three months ended June 30, 2012. No other client accounted for 10% or more of total revenues during these periods. Further, for the three months ended June 30, 2013 and 2012, revenues from non-U.S. clients accounted for 32% and 22%, respectively, of our total revenues.

Two clients generated approximately 27% and 48% of our total revenues for the six months ended June 30, 2013 and 2012, respectively. Two additional clients accounted for 25% of our total revenues for the six months ended June 30, 2013 but each accounted for less than 10% of our total revenues for the six months ended June 30, 2012. No other client accounted for 10% or more of total revenues during these periods. Further, for the six months ended June 30, 2013 and 2012, revenues from non-U.S. clients accounted for 31% and 21%, respectively, of our total revenues.

As of June 30, 2013, approximately 36% of the Company's accounts receivable was from foreign (principally European) clients and 61% of accounts receivable was due from four clients. As of December 31, 2012, approximately 30% of the Company's accounts receivable was from foreign (principally European) clients and 55% of accounts receivable was due from four clients.

INNODATA INC. AND SUBSIDIARIES**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****SIX MONTHS ENDED JUNE 30, 2013 AND 2012****(Unaudited)****7. Income (Loss) Per Share**

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
	(in thousands, except per share amounts)			
Net income (loss) attributable to Innodata Inc. and Subsidiaries	\$ (121)	\$ 2,088	\$ 196	\$ 5,520
Weighted average common shares outstanding	24,940	25,085	24,938	24,771
Dilutive effect of outstanding options	-	1,777	-	1,688
Adjusted for dilution computation	24,940	26,862	24,938	26,459

Basic income per share is computed using the weighted-average number of common shares outstanding during the period. Diluted income per share is computed by considering the impact of the potential issuance of common shares, using the treasury stock method, on the weighted average number of shares outstanding. For those securities that are not convertible into a class of common stock, the “two-class” method of computing income per share is used.

Options to purchase 1.7 million shares of common stock for the three months ended June 30, 2013 were outstanding but not included in the computation of diluted income (loss) per share, because the options exercise price was greater than the average market price of the common shares and, therefore, the effect would have been antidilutive. All options outstanding were included in the computation of diluted net income (loss) per share for the three months ended June 30, 2012 as the exercise price was lower than the average market price. In addition, diluted net income (loss) per share for the three months does not include 1.7 million potential common shares derived from the exercise of stock options because as a result of the Company’s incurring losses, their effect would have been antidilutive.

Options to purchase 0.6 million shares and 0.1 million shares of common stock for the six months ended June 30, 2013 and 2012, respectively, were outstanding but not included in the computation of diluted income (loss) per share,

because the options exercise price was greater than the average market price of the common shares, and therefore, the effect would have been antidilutive.

8. Derivatives

The Company conducts a large portion of its operations in international markets that subject it to foreign currency fluctuations. The most significant foreign currency exposures occur when revenue and associated accounts receivable are collected in one currency and expenses to generate that revenue are incurred in another currency. The Company's primary exchange rate exposure relates to payroll, other payroll costs and operating expenses in the Philippines, India, Sri Lanka and Israel.

To manage its exposure to fluctuations in foreign currency exchange rates, the Company entered into foreign currency forward contracts, authorized under Company policies, with counterparties that were highly rated financial institutions. The Company utilized non-deliverable forward contracts expiring within twelve months to reduce its foreign currency risk.

INNODATA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking hedge transactions. The Company does not hold or issue derivatives for trading purposes. All derivatives are recognized at their fair value and classified based on the instrument's maturity date. The total notional amount for outstanding derivatives as of June 30, 2013 and December 31, 2012 was \$33.2 million and \$32.3 million, respectively, which is comprised of cash flow hedges denominated in U.S. dollars.

The following table presents the fair value of derivative instruments included within the condensed consolidated balance sheets as of June 30, 2013 and December 31, 2012 (in thousands):

	Balance Sheet Location	Fair Value	
		2013	2012
Derivatives designated as hedging instruments:			
Foreign currency forward contracts	Prepaid expenses and other current assets	\$-	\$ 125
Foreign currency forward contracts	Accrued expenses	\$1,827	\$-

The effects of foreign currency forward contracts designated as cash flow hedges on the Company's condensed consolidated statements of operations and comprehensive income (loss) for the six months ended June 30, 2013 and 2012, respectively, were as follows (in thousands):

	Three months ended		Six months ended	
	June 30, 2013	2012	June 30, 2013	2012
Net gain (loss) recognized in OCI ⁽¹⁾	\$ (1,977)	\$ (565)	\$ (1,683)	\$ 253
Net gain (loss) reclassified from accumulated OCI into income ⁽²⁾	\$ (39)	\$ (673)	\$ 269	\$ (955)
Net gain (loss) recognized in income ⁽³⁾	\$ —	\$ —	\$ —	\$ —

- (1) Net change in the fair value of the effective portion classified in other comprehensive income ("OCI").
- (2) Effective portion classified as direct operating costs.
- (3) There were no ineffective portions for the periods presented.

9. Financial Instruments

The carrying amounts of financial instruments, including cash and cash equivalents, accounts receivable and accounts payable approximated their fair value as of June 30, 2013 and December 31, 2012, because of the relative short maturity of these instruments.

"Fair Value Measurements and Disclosures" defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date.

INNODATA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2013 AND 2012

(Unaudited)

The accounting standard establishes a fair value hierarchy that prioritizes the inputs used to measure fair value into three levels. The three levels are defined as follows:

Level 1: Unadjusted quoted price in active market for identical assets and liabilities.

Level 2: Observable inputs other than those included in Level 1.

Level 3: Unobservable inputs reflecting management's own assumptions about the inputs used in pricing the asset or liability.

The following table sets forth the assets and liabilities as of June 30, 2013 and December 31, 2012 that the Company measured at fair value, on a recurring basis by level, within the fair value hierarchy (in thousands). As required by the standard, assets and liabilities measured at fair value are classified in their entirety based on the lowest level of input that is significant to their fair value measurement.

June 30, 2013 Level 1 Level 2 Level 3

Liabilities

Derivatives \$ — \$1,827 \$ —

December 31, 2012 Level 1 Level 2 Level 3

Assets

Derivatives \$ — \$ 125 \$ —

The Level 2 assets and liabilities contain foreign currency forward contracts. Fair value is determined based on the observable market transactions of spot and forward rates. The fair value of these contracts as of June 30, 2013 is

included in accrued expenses and December 31, 2012 is included in prepaid expenses and other current assets in the accompanying condensed consolidated balance sheets.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Disclosures in this Form 10-Q contain certain forward-looking statements, including without limitation, statements concerning our operations, economic performance, and financial condition. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words “project,” “head start,” “believe,” “expect,” “should,” “anticipate,” “indicate,” “point to,” “forecast,” “likely” and other similar expressions generally identify forward-looking statements, which speak only as of their dates.

These forward-looking statements are based largely on our current expectations, and are subject to a number of risks and uncertainties, including without limitation, that contracts could be terminated by clients, projected or committed volumes of work may not materialize; that our Innodata Advanced Data Solutions segment has not reported any substantial revenues to date and is subject to the risks and uncertainties of early-stage companies; the primarily at-will nature of the contracts with our clients and the ability of our clients to reduce, delay or cancel projects; continuing Content Services segment revenue concentration in a limited number of clients; continuing Content Services segment reliance on project-based work; inability to replace projects that are completed, cancelled or reduced; depressed market conditions; changes in external market factors; the ability and willingness of our clients and prospective clients to execute business plans which give rise to requirements for digital content and professional services in knowledge processing; difficulty in integrating and deriving synergies from acquisitions, joint venture and strategic investments; potential undiscovered liabilities of companies that we acquire; changes in our business or growth strategy; the emergence of new or growing competitors; various other competitive and technological factors; and other risks and uncertainties indicated from time to time in our filings with the Securities and Exchange Commission.

Our actual results could differ materially from the results referred to in the forward-looking statements. In light of these risks and uncertainties, there can be no assurance that the results referred to in the forward-looking statements contained in this Form 10-Q will occur.

We undertake no obligation to update or review any guidance or changes in status of client contracts, client relationships, or other forward-looking information, whether as a result of new information, future developments or otherwise.

Business Overview

Innodata (NASDAQ: INOD) is a global provider of business process, information technology and professional services that are focused on digital enablement. Our clients comprise several of the world's leading digital retailers that sell digital content; preeminent publishers and other providers of online business information products; and enterprises in information-intensive industries (such as aerospace, defense, financial services, healthcare, high technology, insurance, and manufacturing) that create and manage large volumes of content to support their products or operations.

We operate in two reporting segments: Content Services (CS) and Innodata Advanced Data Solutions (IADS).

Our CS segment provides solutions to digital retailers, information services companies, publishers and enterprises that have one or more of the following broad business requirements: development of digital content (including eBooks); development of new digital information products; and operational support of existing digital information products and systems.

Many of our clients are driving or are responding to rapid and fundamental changes in the way end users discover, consume and create published information. For some of our publishing and information services clients, this means transforming information products from print to digital; for others, it means migrating already-digital products from web-only distribution to multiple-channel distribution that includes mobile and tablet devices and incorporates mobility, social platform and semantic search; and for others still it means re-tooling pure search-based information products into workflow-imbedded analytical tools that combine content with software to enable context-aware decision-making; and for a select number of our information services clients, it means embracing the content-as-a-service model to integrate content with other tools, applications and data. Each of these transformations requires shifts in products, as well as the technology and the operations that support them.

We are one of the largest producers of eBooks, serving four of the five leading digital retailers of eBooks as well as 80 leading trade, education and professional publishers that sell eBooks. We manufacture both standard eBooks and interactive eBooks in a variety of formats (including EPUB, Mobi and Kindle) and in 12 major languages (including Japanese and Chinese). In addition, we distribute eBooks on behalf of publishers and authors to more than 25 eBook retailers across North America, the United Kingdom, Australia and 24 countries in the European Union. We have produced over one million eBooks since the third quarter of 2011.

We help our clients develop high-value information products and knowledge repositories. Our clients include four of the ten largest information industry companies in the world, spanning financial, legal, healthcare and scientific information.

We formed our IADS segment in mid-2011 to design and develop new capabilities to enable clients in the financial services, insurance, medical and healthcare sectors to improve decision-support through digital technologies. We believe that by creating and commercializing innovative business strategies and technology solutions, we will be able to accelerate growth and reduce revenue volatility. IADS operates through two subsidiaries. Synodex offers a range of services for healthcare, medical and insurance companies, and docGenix provides services to certain financial services institutions. As of June 30, 2013, Innodata owns 85% of Synodex and 94% of docGenix, both limited liability companies.

Each of our segments is organized and managed around three vectors: a vertical industry focus, a horizontal service/process focus, and a supportive operations focus.

The vertically-aligned groups understand our clients' businesses and strategic initiatives. The vertical group for each particular industry includes experts hired from that industry.

Our horizontal service/process-aligned groups include engineering personnel and delivery personnel. Our engineering teams are responsible for creating secure and efficient custom workflows and integrating proprietary and third-party technologies to automate manual processes and improve the consistency and quality of our work product. These tools include categorization engines that utilize pattern recognition algorithms based on comprehensive rule sets and related heuristics, data extraction tools that automatically retrieve specific types of information from large data sources, and workflow systems that enable various tasks and activities to be performed across our multiple facilities.

Our globally distributed delivery personnel are responsible for executing our client engagements in accordance with service-level agreements. We deliver services from facilities in the United States, India, the Philippines, Sri Lanka and Israel.

Other support groups are responsible for managing diverse enabling functions including human resources, organizational development, network and communications technology infrastructure support and physical infrastructure and facilities management.

Our sales staff, program managers and consultants operate primarily from our North American offices, European locations, as well as from client sites.

Revenues

We price our services based on the quantity delivered or resources utilized, and we recognize revenue in the period in which the services are performed and delivered. Revenues for contracts billed on a time-and-materials basis are recognized as services are performed. Revenues under fixed-fee contracts, which are not significant to the overall revenues, are recognized on the percentage of completion method of accounting, as services are performed or milestones are achieved.

We consider standard accounting criteria for determining whether to report revenue gross as a principal versus net as an agent. Factors considered include whether we are the primary obligor, have risks and rewards of ownership, and bear the risk that a client may not pay for the services performed. If there are circumstances where the above criteria are not met and therefore we are not the principal in providing services, amounts received from clients are presented net of payments in the condensed consolidated statements of operations and comprehensive income (loss).

Revenues include reimbursement of out-of-pocket expenses, with the corresponding out-of-pocket expenses included in direct operating costs.

Direct Operating Costs

Direct operating costs consist of direct payroll, occupancy costs, depreciation and amortization, travel, telecommunications, computer services and supplies, and other direct expenses that are incurred in providing services to our clients.

Selling and Administrative Expenses

Selling and administrative expenses consist of management and administrative salaries, sales and marketing costs, new services research and related software development, professional fees and consultant costs, and other administrative overhead costs.

Results of Operations

Three Months Ended June 30, 2013 and 2012

Revenues

Total revenues were \$16.1 million for the three months ended June 30, 2013 compared to \$22.8 million for the three months ended June 30, 2012, a decline of \$6.7 million or approximately 29%. Revenues from the CS segment were \$16.0 million and \$22.7 million for the three months ended June 30, 2013 and 2012, respectively, a decline of \$6.7 million or approximately 30%. This decline is principally attributable to a reduction in eBook-related services that we performed for one of our significant clients. Revenues from the IADS segment were \$0.1 million in both the three months ended June 30, 2013 and 2012, respectively.

Two clients generated approximately 28% and 47% of our total revenues for the three months ended June 30, 2013 and 2012, respectively. Two additional clients accounted for 26% of our total revenues for the three months ended June 30, 2013 but each accounted for less than 10% of our total revenues for the three months ended June 30, 2012. No other client accounted for 10% or more of total revenues during these periods. Further, for the three months ended June 30, 2013 and 2012, revenues from non-U.S. clients accounted for 32% and 22%, respectively, of our total revenues.

Direct Operating Costs

Direct operating costs were \$13.4 million and \$14.7 million for the three months ended June 30, 2013 and 2012, respectively, a decline of \$1.3 million or approximately 8%. Direct operating costs for the CS segment were \$11.8 million and \$13.8 million for the three months ended June 30, 2013 and 2012, respectively, a decline of \$2.0 million or approximately 14%. Direct operating costs for the IADS segment were \$1.6 million and \$0.9 million for the respective periods, net of intersegment profits, an increase of \$0.7 million.

Direct operating costs as a percentage of total revenues increased to 83% for the three months ended June 30, 2013 compared to 64% for the three months ended June 30, 2012. Direct operating costs for the CS segment as a percentage of CS segment revenues were 74% for the three months ended June 30, 2013 compared to 61% for the three months ended June 30, 2012.

The decline in direct operating costs for the CS segment was principally attributable to a decrease in production headcount due to a decline in CS revenues; however, direct operating costs as a percentage of CS segment revenues have increased. Since our direct operating costs are comprised of both fixed and variable costs, a decline in revenues does not translate into a proportionate decline in direct operating costs.

Direct operating costs for the IADS segment represents certain production costs for initial engagements, including pilot engagements, and facility overhead costs for our new delivery center in Asia.

Selling and Administrative Expenses

Selling and administrative expenses were \$4.4 million, or approximately 27% as a percentage of total revenues during the three months ended June 30, 2013, and \$6.2 million, or 27% as a percentage of total revenues for the three months ended June 30, 2012, and represents a decrease of \$1.8 million or approximately 30%. Selling and administrative expenses for the CS segment were \$3.8 million and \$5.3 million in these respective periods. Selling and

administrative expenses for the IADS segment for the respective periods were \$0.6 million and \$0.9 million, net of intersegment profits.

In the second half of 2012 we restructured our operations, which resulted in cost savings in the first quarter of 2013. This led to a decline in selling and administrative expenses for the CS segment during the three months ended June 30, 2013 compared to the three months ended June 30, 2012.

Selling and administrative expenses for the CS segment as a percentage of CS segment revenues was 23% for both the three months ended June 30, 2013 and June 30, 2012.

The \$0.3 million decrease in selling and administrative expenses for the IADS segment is primarily attributable to compensation costs of an executive who left the company at the end of 2012.

Income Taxes

For the three months ended June 30, 2013, we recorded a net benefit from income taxes, as our U.S. entity recorded a benefit from income tax on account of losses it incurred; and with respect to our foreign subsidiaries, we recorded a provision for income taxes in accordance with local tax regulations. Some of our foreign subsidiaries are subject to tax holidays or preferential tax rates which reduces our overall effective tax rate when compared to the U.S. statutory tax rate. In addition, the earnings of our foreign subsidiaries are not subject to tax in the U.S. unless the earnings are repatriated.

For the three months ended June 30, 2012, we recorded a provision for income taxes for the U.S. entity and certain, but not all, of our foreign subsidiaries, as certain foreign subsidiaries are subject to tax holidays or preferential tax rates, thereby lowering our overall effective tax rate compared to the U.S. statutory tax rate. In addition, the earnings of our foreign subsidiaries are not subject to tax in the U.S. unless the earnings are repatriated.

Net Income (Loss)

We generated a net loss of \$0.1 million in the three months ended June 30, 2013 compared to a net income of \$2.1 million in the three months ended June 30, 2012. Net income for the CS segment was \$2.0 million for the three months ended June 30, 2013, compared to \$3.5 million for the three months ended June 30, 2012, net of intersegment profits. The change was primarily attributable to a decline in gross margins resulting from lower revenues offset by a decline in selling and administrative expenses. In addition, we recorded a benefit from income taxes for the three months ended June 30, 2013, compared to a provision for income taxes for the three months ended June 30, 2012. Net loss for the IADS segment was \$2.1 million for the three months ended June 30, 2013 compared to \$1.4 million for the three months ended June 30, 2012, net of intersegment profits.

Six Months Ended June 30, 2013 and 2012

Revenues

Total revenues were \$33.1 million for the six months ended June 30, 2013 compared to \$47.9 million for the six months ended June 30, 2012, a decline of \$14.8 million or approximately 31%. Revenues from the CS segment were \$32.3 million and \$47.2 million for the six months ended June 30, 2013 and 2012, respectively, a decline of \$14.9 million or approximately 32%. This decline is principally attributable to a reduction in eBook-related services that we performed for one of our significant clients. Revenues from the IADS segment were \$0.8 million and \$0.7 million for the six months ended June 30, 2013 and 2012, respectively.

Two clients generated approximately 27% and 48% of our total revenues for the six months ended June 30, 2013 and 2012, respectively. Two additional clients accounted for 25% of our total revenues for the six months ended June 30, 2013 but each accounted for less than 10% of our total revenues for the six months ended June 30, 2012. No other client accounted for 10% or more of total revenues during these periods. Further, for the six months ended June 30, 2013 and 2012, revenues from non-U.S. clients accounted for 31% and 21%, respectively, of our total revenues.

Direct Operating Costs

Direct operating costs were \$26.2 million and \$30.8 million for the six months ended June 30, 2013 and 2012, respectively, a decline of \$4.6 million or approximately 15%. Direct operating costs for the CS segment were \$23.6 million and \$28.3 million for the six months ended June 30, 2013 and 2012, respectively, a decline of \$4.7 million or approximately 16%. Direct operating costs for the IADS segment were \$2.6 million and \$2.5 million for the respective periods, net of intersegment profits.

Direct operating costs as a percentage of total revenues increased to 79% for the six months ended June 30, 2013 compared to 64% for the six months ended June 30, 2012. Direct operating costs for the CS segment as a percentage of CS segment revenues were 73% for the six months ended June 30, 2013 compared to 60% for the six months ended June 30, 2012.

The decline in direct operating costs for the CS segment was principally attributable to a decrease in production headcount due to a decline in CS revenues; however, direct operating costs as a percentage of CS segment revenues have increased. Since our direct operating costs are comprised of both fixed and variable costs, a decline in revenues does not translate into a proportionate decline in direct operating costs.

Direct operating costs for the IADS segment represents certain production costs for initial engagements, including pilot engagements, and facility overhead costs for our new delivery center in Asia.

Selling and Administrative Expenses

Selling and administrative expenses were \$9.0 million, or approximately 27% as a percentage of total revenues during the six months ended June 30, 2013, and \$11.6 million, or 24% as a percentage of total revenues for the six months ended June 30, 2012, and represents a decrease of \$2.6 million or approximately 22%. Selling and administrative expenses for the CS segment were \$7.7 million and \$10.2 million in these respective periods. Selling and administrative expenses for the IADS segment for the respective periods were \$1.3 million and \$1.4 million, net of intersegment profits.

In the second half of 2012, we restructured our operations, which resulted in cost savings in the first quarter of 2013. This led to a decline in selling and administrative expenses for the CS segment during the six months ended June 30, 2013 compared to the six months ended June 30, 2012.

Selling and administrative expenses for the CS segment as a percentage of CS segment revenues was 24% for the six months ended June 30, 2013 compared to 21% for the six months ended June 30, 2012.

Income Taxes

For the six months ended June 30, 2013, we recorded a net benefit from income taxes, as our U.S. entity recorded a benefit from income tax on account of losses it incurred; and with respect to our foreign subsidiaries, we recorded a

provision for income taxes in accordance with local tax regulations. Some of our foreign subsidiaries are subject to tax holidays or preferential tax rates which reduces our overall effective tax rate when compared to the U.S. statutory tax rate. In addition, the earnings of our foreign subsidiaries are not subject to tax in the U.S. unless the earnings are repatriated.

For the six months ended June 30, 2012, we recorded a provision for income taxes for the U.S. entity and certain, but not all, of our foreign subsidiaries, as certain foreign subsidiaries are subject to tax holidays or preferential tax rates, thereby lowering our overall effective tax rate compared to the U.S. statutory tax rate. In addition, the earnings of our foreign subsidiaries are not subject to tax in the U.S. unless the earnings are repatriated.

Net Income

We generated net income of \$0.2 million in the six months ended June 30, 2013 compared to \$5.5 million in the six months ended June 30, 2012. Net income for the CS segment was \$3.3 million for the six months ended June 30, 2013, compared to \$8.7 million for the six months ended June 30, 2012, net of intersegment profits. The change was primarily attributable to a decline in gross margins resulting from lower revenues offset by a decline in selling and administrative expenses. In addition, we recorded a benefit from income taxes for the six months ended June 30, 2013, compared to a provision for income taxes for the six months ended June 30, 2012. Net loss for the IADS segment was \$3.1 million for the six months ended June 30, 2013 compared to \$3.2 million for the six months ended June 30, 2012, net of intersegment profits.

Liquidity and Capital Resources

Selected measures of liquidity and capital resources, expressed in thousands, are as follows:

	June 30, 2013	December 31, 2012
Cash and cash equivalents	\$24,379	\$ 25,425
Short term investments – other	2,773	3,091
Working capital	28,599	32,784

At June 30, 2013, we had cash and cash equivalents of \$24.3 million, of which about \$20.0 million was held by our foreign subsidiaries, and short term investments of \$2.7 million, which was entirely held by our operating foreign subsidiaries located in Asia. Cash balances are held in bank deposits at leading U.S. and foreign commercial banks. We have used, and plan to use, such cash for (i) continuing investments in IADS, which in the second quarter aggregated approximately \$2.2 million and is expected to require similar investments in the third and fourth quarters, (ii) the expansion of our other operations; (iii) general corporate purposes, including working capital; and (iv) possible business acquisitions. As of June 30, 2013, we had working capital of approximately \$28.6 million, as compared to working capital of approximately \$32.8 million as of December 31, 2012. We have a \$15 million line of credit that expires in June 2014 pursuant to which we may borrow up to 80% of eligible accounts receivable.

Net Cash Provided By Operating Activities

Cash provided by our operating activities for the six months ended June 30, 2013 was \$1.6 million, resulting from a net loss of \$0.4 million, adjustments for non-cash items of \$0.6 million, and \$1.4 million provided by working capital changes. Adjustment for non-cash items primarily consisted of \$1.9 million for depreciation and amortization and \$0.5 million for stock-based compensation expense but partially offset by tax benefits recognized amounting to \$2.0 million. Working capital activities primarily consisted of a source of cash of \$3.4 million as a result of net collections of accounts receivable, a use of cash of \$1.3 million for a decrease in accrued salaries, wages and related benefits and a use of cash of \$0.4 million for a decrease in income and other taxes.

Cash provided by our operating activities for the six months ended June 30, 2012 was \$10.2 million, resulting from net income of \$4.5 million, adjustments for non-cash items of \$3 million, and \$2.7 million provided by working capital changes. Adjustment for non-cash items primarily consisted of \$1.9 million for depreciation and amortization and \$0.6 million for stock-based compensation expense. Working capital activities primarily consisted of a source of cash of \$2.8 million as a result of net collections of accounts receivable.

At June 30, 2013, our days' sales outstanding were approximately 60 days as compared to 76 days as of December 31, 2012. The decrease is on account of collection of outstanding amounts from one of our significant clients.

Net Cash Used in Investing Activities

For the six months ended June 30, 2013 and 2012, cash used in our investing activities for capital expenditures were \$3.0 million and \$4.5 million, respectively. Capital spending in 2013 principally consisted of the purchase of technology equipment including servers, network infrastructure and workstations. Also included within capital expenditures are costs incurred to develop our proprietary software platform, tools and technology for the IADS segment amounting to \$0.5 million. Capital spending in 2012 principally consisted of the purchase of technology equipment including workstations, computer software, and leasehold improvements. During the next twelve months, we anticipate that capital expenditures for ongoing technology, equipment, infrastructure upgrades and development of our proprietary software platform, tools and technologies for both CS and IADS will approximate \$4.0 to \$5.0 million, a portion of which we may finance. Also included in investing activities for the six months ended June 30, 2013 is the sale of short-term investments primarily representing proceeds on maturity of \$0.3 million of certificates of deposit, and for the six months ended June 30, 2012, is the sale of short-term investments primarily representing proceeds on maturity of \$3.2 million of certificates of deposit.

Net Cash Provided by (Used in) Financing Activities

Total payments of long-term obligations approximated \$0.2 million for the six months ended June 30, 2013. Proceeds from the exercise of stock options amounted to \$0.1 million and \$0.5 million during the six months ended June 30, 2013 and 2012, respectively.

Future Liquidity and Capital Resource Requirements

We have a \$15.0 million line of credit pursuant to which we may borrow up to 80% of eligible accounts receivable. Borrowings under the credit line bear interest at the bank's alternate base rate plus 0.5%, or LIBOR plus 2.5%. The line, which expires in June 2014, is collateralized by our accounts receivable. We have no outstanding obligations under this credit line as of June 30, 2013.

A significant portion of our cash and cash equivalents and short term investments are held by our foreign operating subsidiaries.

We believe that our existing cash and cash equivalents, short-term investments, funds generated from our operating activities and funds available under our credit facility will provide sufficient sources of liquidity to satisfy our financial needs for the next twelve months. However, if circumstances change, we may need to raise debt or additional equity capital in the future. We have historically funded our foreign expenditures from our U.S. corporate headquarters on an as-needed basis.

In the second quarter of 2012, we filed a shelf registration statement on Form S-3, which gives us the ability to offer, from time to time, up to an aggregate of \$70 million of securities which may consist of common stock, preferred stock, debt securities, warrants, or units consisting of any of the foregoing. The registration is intended to give us flexibility should financing opportunities arise.

Contractual Obligations

The table below summarizes our contractual obligations (in thousands) at June 30, 2013 and the effects that those obligations are expected to have on our liquidity and cash flows in future periods.

Contractual Obligations	<u>Payments Due by Period</u>				<u>After</u>
	<u>Total</u>	<u>Less than 1 year</u>	<u>1-3 years</u>	<u>4-5 years</u>	<u>5</u> <u>years</u>
Vendor obligations	\$ 194	\$ 194	\$ -	\$ -	\$ -
Non-cancelable operating leases	9,312	1,752	3,676	2,068	1,816
Total contractual cash obligations	\$ 9,506	\$ 1,946	\$ 3,676	\$ 2,068	\$ 1,816

Future expected obligations under our pension benefit plan have not been included in the contractual cash obligations table above.

Inflation, Seasonality and Prevailing Economic Conditions

Our most significant costs are the salaries and related benefits of our employees in Asia. We are exposed to higher inflation in wage rates in the countries in which we operate. We generally perform work for our clients under project-specific contracts, requirements-based contracts or long-term contracts. We must adequately anticipate wage increases, particularly on our fixed-price contracts. There can be no assurance that we will be able to recover cost increases through increases in the prices that we charge for our services to our clients.

Our quarterly operating results are subject to certain fluctuations. We experience fluctuations in our revenue and earnings as we replace and begin new projects, which may have some normal start-up delays, or we may be unable to replace a project entirely. These and other factors may contribute to fluctuations in our operating results from quarter to quarter. In addition, as some of our Asian facilities are closed during holidays in the fourth quarter, we typically incur higher wages due to overtime that reduce our margins.

Critical Accounting Policies and Estimates

Our discussion and analysis of our results of operations, liquidity and capital resources is based on our condensed consolidated financial statements which have been prepared in conformity with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, allowance for doubtful accounts and billing adjustments, long-lived assets, goodwill, valuation of deferred tax assets, value of securities underlying stock-based compensation, litigation accruals, pension benefits, valuation of derivative instruments and estimated accruals for various tax exposures. We base our estimates on historical and anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results may differ from our estimates and could have a significant adverse effect on our results of operations and financial position. For a discussion of our critical accounting policies see Part II, Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2012. There have been no material changes to our critical accounting policies during the six months ended June 30, 2013.

Recent Accounting Pronouncements

In the first quarter of 2013, we adopted changes issued by the Financial Accounting Standard Board to the reporting of amounts reclassified out of accumulated other comprehensive income. These changes require an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required to be reclassified in its entirety to net income. For other amounts that are not required to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures that provide additional detail about those amounts. These requirements are to be applied to each component of accumulated other comprehensive income. Other than the additional disclosure requirements, the adoption of these changes had no impact on our condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest rate risk

We are exposed to market risk due to interest rate fluctuations with respect to our credit line with a financial institution which is priced based on the bank's alternate base rate (3.25% at June 30, 2013) plus 0.5%, or LIBOR (0.20% at June 30, 2013) plus 2.5%. We have no outstanding obligations under this line. To the extent we utilize all or a portion of this line of credit, changes in the interest rate will have a positive or negative effect on our interest expense.

Foreign currency risk

We have operations in several international markets that subject us to foreign currency fluctuations. Although the majority of our contracts are denominated in U.S. dollars, a substantial portion of the costs incurred to render services under these contracts is incurred in the local currencies of several international markets where we carry on our operations. Our significant operations are based in the Philippines, India, Sri Lanka and Israel where revenues are generated in U.S. dollars and the corresponding expenses are generated in Philippine peso, Indian rupee, Sri Lanka rupee and Israeli shekel.

To mitigate the exposure of fluctuating future cash flows due to changes in foreign exchange rates, we have entered into foreign currency forward contracts. These foreign currency forward contracts were entered into with a maximum term of twelve months and have an aggregate notional amount of approximately \$33.2 million as of June 30, 2013. We may continue to enter into such instruments or other instruments in the future to reduce foreign currency exposure to appreciation or depreciation in the value of these foreign currencies.

The impact of foreign currency fluctuations will continue to present economic challenges to us and could negatively impact our overall results of operations. A 10% appreciation in the U.S. dollar's value relating to hedged currencies would decrease the forward contracts' fair value by approximately \$3.0 million as of June 30, 2013. Similarly, a 10% depreciation in the U.S. dollar's value relative to hedged currencies would increase the forward contracts' fair value by approximately \$3.7 million. Any increase or decrease in the fair value of our currency exchange rate sensitive forward contracts, if utilized, would be substantially offset by a corresponding decrease or increase in the fair value of the hedged underlying cash flows.

Other than the aforementioned forward contracts, we have not engaged in any hedging activities nor have we entered into off-balance sheet transactions or arrangements.

As of June 30, 2013, our foreign locations held cash and short term investments totaling approximately \$22.8 million. These assets are exposed to foreign exchange risk arising from changes in foreign exchange rates. At present, we do not enter into any hedging instruments to mitigate foreign exchange risk on such assets; however, we may do so in the future.

Item 4. Controls and Procedures

As of the end of the period covered by this report, we performed an evaluation under the supervision, and with the participation, of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934 (the Exchange Act)). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this Quarterly Report, our disclosure controls and procedures were effective.

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

There were no material changes from the legal proceedings previously disclosed in Part I, Item 3. “Legal Proceedings” in our Annual Report on Form 10-K for the year ended December 31, 2012.

Item 1A. Risk Factors

There were no material changes from the risk factors previously disclosed in Part I, Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.
